rules and regulations

This section of the FEDERAL REGISTER contains regulatory documents having general applicability and legal effect most of which are keyed to and codified in the Code of Federal Regulations, which is published under 50 titles pursuant to 44 U.S.C. 1510.
The Code of Federal Regulations is sold by the Superintendent of Documents. Prices of new books are listed in the first FEDERAL REGISTER issue of each month.

Title 5—Administrative Personnel

CHAPTER I—CIVIL SERVICE COMMISSION

PART 213—EXCEPTED SERVICE

Department of the Army

Section 213.3307 is amended to show that one position of Special Assistant to the Secretary and one position of Secretary to the Special Assistant to the Secretary of the Army are excepted under Schedule C.

Effective on November 10, 1975, §§ 213.3307(a) (3) and (4) are added as set out below:

§ 213.3307 Department of the Army.

(a) • • •

(3) One Special Assistant to the Secretary.

(4) One Secretary to the Special Assistant to the Secretary.

(5 U.S.C. 3301, 3302; EO 10577, 3 CFR 1954–1958 Comp., p. 218)

UNITED STATES CIVIL SERVICE COMMISSION,
[SEAL] JAMES C. SPRY,
Executive Assistant to the Commissioners.

[FR Doc.75-30103 Filed 11-7-75;8:45 am]

PART 213—EXCEPTED SERVICE

Department of Defense

Section 213.3306 is amended to show that one position of Confidential Assistant to the Defense Representative, Iran, and one position of Private Secretary to the Defense Representative, Iran, have been excepted under Schedule C.

Effective on November 10, 1975, § 213.3306(a) (70) and (71) are added as set out below:

§ 213.3306 Department of Defense.

(a) • • •

(70) One Confidential Assistant to the Defense Representative, Iran.

(71) One Private Secretary to the Defense Representative, Iran.

(5 U.S.C. 3301, 3302; EO 10577, 3 CFR 1954–1958 Comp., p. 218)

UNITED STATES CIVIL SERVICE COMMISSION,
[SEAL] JAMES C. SPRY,
Executive Assistant to the Commissioners.

[FR Doc.75-30104 Filed 11-7-75;8:45 am]

PART 213—EXCEPTED SERVICE

Department of Housing and Urban Development

Section 213.3384 is amended to show that one position of Special Assistant to the Assistant Secretary for Policy Development and Research is expected under Schedule C.

Effective on November 10, 1975, § 213.3384(1) (5) is added as set out below.

§ 213.3384 Department of Housing and Urban Development.

• • • • •

(1) *Office of the Assistant Secretary for Policy Development and Research.*

• • •

(5) One Special Assistant.

(5 U.S.C. 3301, 3302; EO 10577, 3 CFR 1954–1958 Comp., p. 218)

UNITED STATES CIVIL SERVICE COMMISSION,
[SEAL] JAMES C. SPRY,
Executive Assistant to the Commissioners.

[FR Doc.75-30106 Filed 11-7-75;8:45 am]

PART 213—EXCEPTED SERVICE

Environmental Protection Agency

Section 213.3318 is amended to show that one position of Regional and Intergovernmental Liaison Specialist is excepted under Schedule C.

Effective on November 10, 1975, § 213.3318(e) is added as set out below:

§ 213.3318 Environmental Protection Agency.

• • • • •

(e) *Office of Regional and Intergovernmental Relations.*

(1) One Regional and Intergovernmental Liaison Specialist.

(5 U.S.C. 3301, 3302; EO 10577, 3 CFR 1954–1958 Comp., p. 218)

UNITED STATES CIVIL SERVICE COMMISSION,
[SEAL] JAMES C. SPRY,
Executive Assistant to the Commissioners.

Title 7—Agriculture

CHAPTER IV—FEDERAL CROP INSURANCE CORPORATION, DEPARTMENT OF AGRICULTURE

[Amendment No. 71]

PART 401—FEDERAL CROP INSURANCE

Corn Endorsement (Grain and Silage)

Pursuant to the authority contained in the Federal Crop Insurance Act, as amended, the above-identified regulations are amended effective beginning with the 1976 crop year in the following respect:

1. The following section is added:

§ 401.151 The Corn Endorsement (grain and silage) with production guarantees in bushels of grain and tons of silage.

The provisions of this endorsement, which shall be applicable for the 1976 and Succeeding Crop Years in those counties where the actuarial table so provides, are as follows:

1. *Insured crop.* The crop insured shall be field corn or silage corn planted for harvest as grain or silage. Insurance shall not attach on any acreage on which it is determined by the Corporation that the corn was planted for the development or production of hybrid seed.

2. *Production guarantees.* The production guarantees per acre shown on the county actuarial table (hereinafter called "actuarial table") shall be increased by 3 bushels for any acreage harvested for grain and 1 ton for any acreage harvested for silage from which the applicable amount harvested per acre equals or exceeds 3 bushels or 1 ton, respectively. The silage guarantee shall apply to (1) any acreage of silage corn or to (2) any acreage of field corn harvested for silage. The bushel guarantee shall apply to all other acreage.

(3) *Insurance period.* Insurance on any insured acreage shall attach at the time the corn is planted and shall cease on final adjustment of a loss or upon harvest, whichever occurs first, but in no event shall insurance remain in effect later than October 31 in North Dakota, or December 10 in all other states, of the calendar year in which the corn is normally harvested: *Provided,* That for any acreage of silage corn or any acreage of field corn harvested for silage, insurance shall remain in effect no later than September 30: *Provided, further,* That if the insured harvests any acreage of field corn for silage after September 30, any damage to such corn that occurred after said date shall not be considered to have been insured.

4. *Additional notice of loss requirement.* In addition to the requirements of Section 8 of the Policy, the insured shall give written notice to the Corporation by September 30 if any acreage of (1) unharvested silage corn or (2) field corn to be harvested as silage, has been damaged to the extent that a loss on the unit is probable. The Corporation reserves the right to reject any claim for loss if such notice is not given and the Corporation determines that the amount of loss cannot be satisfactorily determined.

5. *Claims for loss.* (a) Any claim for loss on an insurance unit (hereinafter called "unit") shall be submitted to the Corporation, on a form prescribed by the Corporation, not later than 60 days after the time of loss. The Corporation reserves the right to provide additional time if it determines that circumstances beyond the control of either party prevent compliance with this provision.

(b) It shall be a condition precedent to the payment of any loss that the insured establish the production of the insured crop on the unit and that such loss has been directly caused by one or more of the hazards insured against during the insurance period for the crop year for which the loss is claimed, and furnish any other information

V 40 217 NOV 10 75 XUM

regarding the manner and extent of loss as may be required by the Corporation.

(c) Losses shall be determined separately for each unit. The amount of loss with respect to any unit shall be determined by (1) multiplying the insured acreage of corn on the unit by the applicable production guarantee per acre, and multiplying such result by the applicable price for computing indemnities which product shall be the dollar amount of insurance for the unit, (2) subtracting therefrom the dollar amount obtained by multiplying the total production to be counted for the unit by the applicable price for computing indemnities, and (3) multiplying the result obtained in (2) by the insured interest. Where a unit contains both acreage to which the grain guarantee applies and acreage to which the silage guarantee applies, the dollar amount of insurance and the dollar amount of the production to be counted shall be determined separately for each portion, and such dollar amounts shall be added together to determine the total of such amounts for the unit: *Provided*, That, if for the unit the insured fails to report all of his insurable acreage or interest, the amount of loss shall be determined with respect to all of his insurable acreage and interest, but in such cases or otherwise, if the premium computed on the basis of the insurable acreage and interest exceeds the premium on the reported acreage and interest, or the acreage and interest when determined by the Corporation under Section 3 of the policy, the amount of loss shall be reduced proportionately.

The total production to be counted for a unit shall be determined by the Corporation and, subject to the provisions hereinafter, shall include all harvested production and any appraisals made by the Corporation for unharvested or potential production, poor farming practices, uninsured causes of loss, or for acreage abandoned or put to another use without the consent of the Corporation: *Provided*, That, the total production to be counted on any acreage of corn shall be as follows for the conditions described: (1) 50 percent of the applicable production guarantee or the appraised production, whichever is greater, for any acreage which, with the consent of the Corporation, is planted in the current crop year, before harvest of corn becomes general, to any other crop (excluding small grains normally maturing for harvest in the following crop year) insurable in the county for the current crop year under the regulations of the Corporation; (2) the appraised production in excess of three bushels of grain or one ton of silage per acre for any unharvested acreage; (3) the harvested production and appraised production (if any) in excess of three bushels of grain or one ton of silage per acre for any acreage from which less than three bushels of grain or one ton of silage per acre are harvested; (4) not less than the applicable harvested production guarantee for any acreage which is abandoned, put to another use without prior written consent of the Corporation, or damaged solely by an uninsured cause. *Provided, further*, That, if the insured gives a notice pursuant to Section 4 of this endorsement, or indicates an intent to harvest any corn for silage and the harvested production would not be able to be determined for the insurance unit, the Corporation will appraise the production in tons of silage, and in the case of field corn such appraisals are to be used in computing the amount of loss only if such corn is actually harvested for silage. The Corporation reserves the right to determine the amount of production of unharvested corn standing in the field on the basis of a field appraisal immediately after the end of the insurance period.

(d) Notwithstanding the provisions of subsection (c) of this section, in determining the production of corn to be counted, from acreage to which the bushel guarantee applies, with a moisture content of 17 percent or more, the Corporation shall, where appropriate when due to insurable causes occurring within the insurance period, reduce such production 1 percent for each full 1 percent of moisture in excess of 16 percent up to and including 40 percent. If the Corporation determines that the moisture content is over 40 percent or if the test weight of shelled corn is below 40 pounds per bushel, the percent of the production to be counted shall be that as agreed upon by the Corporation and the insured, or in the absence of agreement as appraised by the Corporation: *Provided, however*, That the percent of the gross production of corn harvested for grain to be counted shall not be less than 35 percent.

(e) In determining the production of stored corn, 2.50 cubic feet of ear corn and 1.25 cubic feet of shelled corn shall be treated as 1 bushel, except that in the case of ear corn the quantity so determined may be adjusted by a shelling percentage, and/or on the basis of test weight, and in the case of shelled corn the quantity may be adjusted on the basis of test weight. The production of corn will not be adjusted for the presence of husks unless the Corporation determines that in harvesting ear corn, none of the husks were removed.

(f) In determining the production of corn harvested for silage after September 30, the Corporation will adjust such production to what it would have been on September 30 taking into consideration any reduction in the moisture content.

6. *Meaning of terms.* For the purpose of the corn insurance program the terms:

(a) "Harvest" means picking the corn from the stalk either by hand or machine or cutting the corn for any purpose.

(b) "Silage" means corn harvested by severing the stalk from the land and chopping the stalk and the ear for the purpose of livestock feed.

7. *Cancellation and termination for indebtedness dates.* For each year of the contract the cancellation date and the termination date for indebtedness are the following applicable dates immediately preceding the beginning of the crop year for which the cancellation or the termination is to become effective:

State	Cancellation date	Termination date for indebtedness
Delaware, Illinois, Indiana, Iowa, Maryland, Michigan, Minnesota, Nebraska, Ohio, Pennsylvania, and Wisconsin	Dec. 31	May 10
North Dakota	do	Apr. 15
All other States	do	Apr. 30

(Secs. 506, 516, 52 Stat. 73, as amended, 77, as amended; 7 U.S.C. 1506, 1516)

This endorsement provides coverage in terms of bushels of grain and tons of silage, instead of, as at present, in terms of bushels of grain with a conversion factor to be used in converting silage to an equivalent in grain. It is believed that this will simplify administration. In some counties, it will result in a higher level of coverage on silage as compared to grain. It is contemplated that insurance under this endorsement will be offered in 1976 only in certain selected counties where so provided in the county actuarial table. If the experience proves successful in the selected counties, the endorsement may be offered in all or part of the remaining corn insurance counties in the future. The rules herein do not fall within the criteria set forth in the Department of Agriculture's interim guidelines relating to the Inflationary Impact Statement required by the Office of Management and Budget Circulars A-107.

As indicated, it is desirable that this amendment become effective in 1976. Notice of changes must be given present insureds by December 15, 1975, and applications for insurance will be taken in the near future. It would, therefore, be impossible to follow both the procedures for notice and public participation prescribed by 5 U.S.C. 553(b) and (c) prior to the adoption of this amendment and to comply with the contractual provisions with respect to filing such changes in time to be effective for the 1976 crop year.

Under the circumstances, the Board of Directors found that it would be impracticable and contrary to the public interest to follow the procedure for notice and public participation prescribed by 5 U.S.C. 553 (b) and (c), as directed by the Secretary of Agriculture in a Statement of Policy, executed July 20, 1971 (36 FR 13804), prior to its adoption. Accordingly, said amendment was adopted by the Board of Directors on October 29, 1975.

[SEAL] PETER F. COLE,
Secretary, Federal Crop Insurance Corporation.

EARL L. BUTZ,
Secretary.

CHAPTER VII—AGRICULTURAL STABILIZATION AND CONSERVATION SERVICE (AGRICULTURAL ADJUSTMENT), DEPARTMENT OF AGRICULTURE

PART 701—NATIONAL RURAL ENVIRONMENTAL PROGRAMS FOR 1975 AND SUBSEQUENT YEARS

The title of Part 701 is revised to read as set forth above and the part is revised effective with the 1975 programs, to set forth the regulations governing the following Rural Environmental Programs:

(a) Agricultural Conservation Program.

(b) Forestry Incentives Program.

(c) Emergency Conservation Measures Program.

The provisions peculiar to each of the programs will be included in a separate subpart for that program and those provisions which are common to the three programs will be included in another subpart.

The material previously appearing in these sections remains in full force and effect with respect to the National Rural Environmental Assistance Programs for 1971 thru 1973 and to the National Rural Environmental Conservation Program for 1974, as applicable.

Sec.

701.1 Introduction.
701.2 Definitions.

Subpart—Agricultural Conservation Program

701.3 Program objective.
701.4 State funds.
701.5 County funds.
701.6 Availability of funds.
701.7 Eligible person.
701.8 Eligible land.
701.9 Conservation practices.
701.10 Development of county programs.
701.11 Selection of practices.
701.12 State programs.
701.13 Rates of cost-sharing.
701.14 Starting of practices.
701.15 Method of approval.
701.16 Long-term agreements.
701.17 Replacement, enlargement, or restoration.
701.18 Pooling agreements.
701.19 Special provisions for low-income farmers and ranchers.
701.20 Practices substantially completed during program year.
701.21 Conservation materials and services.
701.22 Small cost-share increases.
701.23 Maximum cost-share limitation.
701.24 Completion of practices.
701.25 Time of filing payment application.
701.26 Other program provisions.

Subpart—Forestry Incentives Program

701.27 Program objective.
701.28 Program year for accounting purposes.
701.29 Designated counties.
701.30 Eligible persons, land, and ownerships.
701.31 Program funds.
701.32 Eligible practices and cost-share requirements.
701.33 National program.
701.34 Development of State programs.
701.35 Development of county programs.
701.36 Adaptation of practices.
701.37 Rates of cost-sharing.
701.38 Prior approval for cost-sharing.
701.39 Method of approval.
701.40 Long-term agreements.
701.41 Restoration of practices.
701.42 Maximum cost-share limitation.
701.43 Completion of practices.
701.44 Time of filing payment application.
701.45 Other program provisions.

Subpart—Emergency Conservation Measures Program

701.46 Program objective.
701.47 Program availability.
701.48 Eligible land and person.
701.49 Emergency conservation measures.
701.50 Practice approval.
701.51 Extent of cost-sharing.
701.52 Eligible costs.
701.53 Filing requests.
701.54 Approving requests.
701.55 Pooling agreements.
701.56 Payment limitation.
701.57 Other program provisions.

Subpart—General Provisions

701.58 Restriction on program eligibility.
701.59 Delegation of authority.
701.60 Practice specifications.
701.61 Responsibility for technical phases of practices.
701.62 Items of cost on which rates of cost-sharing may be based.
701.63 Handbooks, bulletins, instructions, and forms.
701.64 Opportunity for requesting cost-shares.
701.65 Repair, upkeep and maintenance of practices.
701.66 Public benefits when installing practices.
701.67 Practices requiring more than one program year for completion.
701.68 Practice involving the establishment or improvement of vegetative cover.
701.69 Failure to meet minimum requirements.
701.70 Practices carried out with aid from ineligible persons.
701.71 Division of cost-shares.
701.72 Death, incompetency, or disappearance.
701.73 Applying cost-share limitations.
701.74 Persons eligible to file application for payment of cost-shares.
701.75 Time and manner of filing application and required information.
701.76 Appeals.
701.77 Performance based on advice or action of county or State committee.
701.78 Compliance with regulatory measures.
701.79 Maintenance and use of practices.
701.80 Practices defeating purposes of program.
701.81 Depriving others of cost-shares.
701.82 Filing of false claims.
701.83 Cost-shares not subject to claims.
701.84 Assignments.

AUTHORITY: Sec. 4, 49 Stat. 164, Secs. 7–15, 16(a), 16(f), 16A, 17, 49 Stat. 1148, as amended, 71 Stat. 176, 71 Stat. 426, 72 Stat. 864, 75 Stat. 233, 86 Stat. 676; (16 U.S.C. 590d, 590g–590o, 590p(a), 590pA, 590q); Secs. 1001–1009, 87 Stat. 241 (16 U.S.C. 1501–1510).

§ 701.1 Introduction.

(a) Through the rural environmental programs for 1975 and subsequent years administered by the Department of Agriculture, the Federal Government will share with farmers, ranchers, and other eligible private landowners in the United States, Guam, Puerto Rico, and the Virgin Islands the cost of carrying out: (1) Approved soil and water conservation practices, including related wildlife conservation practices, (2) approved forestry practices, and (3) emergency conservation measures, in accordance with the provisions of this part and such modifications thereof as may hereafter be made.

(b) Cost-sharing may be available (1) for soil and water conservation practices under the agricultural conservation program; (2) for forestry practices under the agricultural conservation program or forestry incentives program; and (3) for practices to correct damage to land or conservation practices caused by natural disasters under the emergency conservation measures program.

(c) Information with respect to the several practices for which costs will be shared, the exact specifications and rates of cost-sharing for such practices, and the eligibility requirements for participating in the programs, may be obtained from the agricultural stabilization and conservation county committee (called county committee in this part) for the county in which the farm, ranch or other eligible land is located or from the agricultural stabilization and conservation State committee (called State committee in this part), for the State in which such county is located.

§ 701.2 Definitions.

(a) "County program development group" consists of the county committee; the county extension agent; a representative of the Soil Conservation Service; a representative of the U.S. Forest Service; a representative of the State forestry agency or its equivalent, when he accepts an invitation to be a member of the group; and a representative of the conservation district in the county, where the governing board of the district accepts an invitation to designate a representative (if there is more than one district in the county, the governing boards of the districts may jointly designate only one person to represent all of the districts); and shall have the responsibility stated in § 701.10 and 701.35.

(b) "Farm" or "ranch" means that area of land considered as a farm under the regulations governing reconstitution of farms, allotments, and bases, Part 719 of this chapter, as amended, except that, for Hawaii, Puerto Rico, and the Virgin Islands, "farm" or "ranch" means that area of land considered as a farm under the regulations governing determination of farms, Part 826, 827, and 828 of this title, respectively, and that, for the forestry incentives program, "farm" or "ranch" means eligible ownership tracts of forest land as provided in § 701.30.

(c) "National program development group" consists of representatives of the Agricultural Stabilization and Conservation Service; Soil Conservation Service; Forest Service; Extension Service; Economic Research Service; Farmers Home Administration; Agricultural Research Service; Office of the General Counsel; Office of Planning and Evaluation; and Office of Management and Finance; with responsibility for developing program recommendations, including changes in administrative procedures and policy guidelines, and evaluations of program effectiveness and operating arrangements.

(d) "Program year" means the period designated nationally during which practices or components thereof must be carried out to be eligible for cost-sharing.

(e) "State" means any one of the United States, Puerto Rico, the Virgin Islands, and in the case of Forestry Incentives Program includes Guam.

(f) "State program development group" consists of the State committee, the State Director of Extension; the State Conservationist of the Soil Conservation Service; a representative of the U.S. Forest Service; a representative of the State forestry department, or its equivalent, when he accepts an invitation to be a member of the group; and a representative of the State Soil Conservation Committee, or its equivalent, when he accepts an invitation to be member of the group; and has the responsibility stated in §§ 701.11 and 701.34.

(g) In the regulations in this part and in all instructions, forms, and documents in connection therewith, all other words and phrases shall, unless the context or subject matter otherwise requires, have the meanings assigned to them in the regulations governing reconstitution of farms, allotments, and bases, Part 719 of this chapter, as amended.

V 40 I 217 NOV 10 75 XUM

Subpart—Agricultural Conservation Program

§ 701.3 Program objective.

The objective of the Agricultural Conservation Program (referred to in this subpart as the "program") is to assure the continued supply of food and fiber necessary for the maintenance of a strong and healthy people and economy, and to provide for environmental conservation or enhancement. This will be accomplished by encouraging enduring conservation practices on farms and ranches to reduce the loss of agricultural soil, water, woodland, or wildlife resources and to prevent agricultural-related pollution of water, land, and air.

§ 701.4 State funds.

(a) Funds available for practices to be performed under the program for a program year will be distributed among States on the basis of conservation needs.

(b) National limitations on the amount of funds which may be obligated under long-term agreements will be apportioned to States.

(c) The distribution of funds under this section will not include the amount required for increases in small Federal cost-shares in § 701.22.

§ 701.5 County funds.

The State committee will allocate the funds available for practices and apportion the long-term agreement limitations among the counties within the State consistent with the program objective and will give particular consideration to the furtherance of special projects, watershed conservation projects, resource conservation development projects, and other conservation projects sponsored by local people and organizations.

§ 701.6 Availability of funds.

(a) The provisions of the program are necessarily subject to such legislation as the Congress of the United States may hereafter enact; the paying of the cost-shares provided herein is contingent upon such appropriation as the Congress may hereafter provide for such purpose; and the amounts of such cost-shares will necessarily be within the limits finally determined by such appropriation.

(b) The funds provided for a particular program year will not be available for paying cost-shares for which applications are filed in the county office after December 31 of the year following that program year.

§ 701.7 Eligible person.

An eligible person is a farmer or rancher who as an individual, partnership, association, corporation, estate, trust, or other business enterprise, or other legal entity (excluding districts which have taxing authority, Federal agencies, States and State agencies, but not excluding political subdivisions of a State) and, as an owner, landlord, tenant, or sharecropper, participates in the operation of a farm or ranch.

§ 701.8 Eligible land.

(a) The program is applicable to: (1) Privately owned lands; (2) land owned by a State or political subdivision of a State; (3) lands owned by corporations which are partly owned by the United States; (4) lands temporarily owned by the United States or a corporation wholly owned by it, which were not acquired or reserved for conservation purposes, including lands administered by Farmers Home Administration, The U.S. Department of Defense, or by any other Government agency designated by the Deputy Administrator, Programs; (5) any cropland farmed by private persons which is owned by the United States or a corporation wholly owned by it; (6) Indian lands, except that where grazing operations are carried out on Indian lands administered by the Department of the Interior, such lands are within the scope of the program only if covered by a written agreement approved by the Department of the Interior giving the operator an interest in the grazing and forage growing on the land and a right to occupy the land in order to carry out the grazing operations; and (7) noncropland owned by the United States for performance by private persons of practices which directly conserve or benefit nearby or adjoining privately owned lands of such persons who maintain and use such federally owned noncropland under agreement with the Federal agency having jurisdiction thereof.

(b) The program is not applicable to: (1) noncropland owned by the United States which was acquired or reserved for conservation purposes, or which is to be retained permanently under Government ownership, including, but not limited to, grazing lands administered by the Forest Service of the U.S. Department of Agriculture, or by the Bureau of Land Management (including lands administered under the Taylor Grazing Act), or the Fish and Wildlife Service of the U.S. Department of the Interior, except as indicated in paragraph (a) (7) of this section; and (2) nonprivate persons for performance of practices on any land owned by the United States or a corporation wholly owned by it.

§ 701.9 Conservation practices.

Practices are developed by the county committee, in consultation with the county program development group, for inclusion in the county program subject to review by the State program development group and approval by the State committee. The practices included in county programs must be consistent with the agricultural conservation policy stated in section 7 of the Soil Conservation and Domestic Allotment Act, as amended, and national program policy and are developed primarily to meet a definite need to accomplish one or more of the following:

(a) Establish long-lasting protective cover.

(b) Improve or sustain protective cover.

(c) Conserve or safely dispose of water.

(d) Benefit wildlife.

(e) Establish or improve stands of forest trees.

(f) Give protection against soil erosion and flood damage.

(g) Prevent agricultural-related pollution of water, land, and air.

(h) Meet special county conservation needs.

§ 701.10 Development of county programs.

(a) A program shall be developed in each county by the county committee, in consultation with the county program development group, in accordance with the National and State development guidelines and policies provided.

(b) The county program shall be approved by the State committee in consultation with the State program development group.

§ 701.11 Selection of practices.

The practices to be included in the county program shall be only those practices for which cost-sharing is essential to permit accomplishment of the program objective.

§ 701.12 State programs.

(a) The chairman of the State committee shall invite the following persons, or their designees, to participate in the deliberations on guidelines for development of county programs: The Governor of the State, the president of the land-grant college, the State director of the Farmers Home Administration, and the heads of the State soil conservation committee (board or commission), the State Agricultural Extension Service, the State and Federal agencies having responsibility for wildlife conservation, the State agency having responsibility for pollution control or general quality of the environment and other State and Federal agricultural and environmental agencies. The chairman of the State committee may also invite others with conservation interests to participate in such deliberations.

(b) The State program shall consist of a composite of all county programs as approved by the State committee in consultation with the State program development group.

§ 701.13 Rates of cost-sharing.

(a) The maximum cost-share for each practice shall be the percentage of the average cost of performing the practice considered necessary to obtain the needed performance of the practice, but which will be such that the participant will make a significant contribution to the cost of performing the practice.

(b) Levels of cost-sharing shall not be in excess of 75 percent nor less than 50 percent of the average cost for all practices as recommended by the county committee and approved by the State committee. (See § 701.19 for special provisions for low-income farmers.)

(c) For the purpose of establishing rates of cost-sharing, the average cost of performing a practice may be the average cost for a State, a county, or a part of a county, as determined by the State committee.

§ 701.14 Starting of practices.

Cost will not be shared for practices, or components of practices, which are started before a formal or informal request is filed. For practices for which approval was given under the preceding year's program, performance was started but not completed during that program year, and the county committee believes the extension of the approval to the current year's program is justified under the provisions of the current year's program, the filing of the request for cost-sharing under the preceding year's program shall be regarded as meeting the requirement of the current year's program that a request for cost-sharing be filed before performance of the practice is started.

§ 701.15 Method of approval.

The county committee will determine the extent to which Federal funds will be made available to share the cost of each approved practice, taking into consideration the county allocation, the conservation and environmental problems in the county and of the land involved, and the practices for which requested cost-sharing is considered by the county committee as most needed. The method approved shall provide for the issuance of notices of approval showing for each approved practice the number of units of the practice for which the Federal Government will share in the cost and the amount of the cost-share for the performance of that number of units of the practice. To the extent practicable, notices of approved practices shall be issued before performance of the practice is started. No practice may be approved for cost-sharing except as authorized by the county program, or in accordance with procedures incorporated therein. Available funds for cost-sharing shall not be allocated on a pro-rata basis, but shall be directed to the accomplishment of the most enduring benefits attainable.

(a) Cost-sharing may be approved under annual agreements or long-term agreements.

(b) Annual agreements may be approved in all counties. Long-term agreements are limited to farms or ranches which are within Soil Conservation Districts (or comparable districts) through which the Soil Conservation Service provides planning and technical services, except:

(1) Farms and ranches located within a county designated for the Great Plains Conservation Program are ineligible for long-term agreements under this program.

(2) Farms and ranches not located within a Soil Conservation District (or comparable district) may be eligible, provided conservation plans of operations are developed by the farmer or rancher in cooperation with the Soil Conservation Service and approved by an appropriate State official or, in cases where an appropriate State official is not available, approved by the Soil Conservation Service.

§ 701.16 Long-term agreements.

(a) The period of a long-term agreement will be for not less than three (3) program years nor more than ten (10) program years. The county committee and the signatories to the agreement in consultation with the Soil Conservation Service representative, will mutually determine the period of the agreement.

(b) The long-term agreement will be based on a conservation plan of operations for the farm or ranch which has been approved by the Soil Conservation District (or comparable district) or, for farms or ranches not located in a Soil Conservation District (or comparable district), by an appropriate State official or the Soil Conservation Service, as applicable.

(c) The long-term agreement will provide that the farmer or rancher will carry out those measures in the conservation plan of operations which are determined to be essential to meeting the basic conservation needs of the farm or ranch, whether or not cost-sharing is approved for such measures.

(d) The owner of the farm or ranch will be required to be a signatory to a long-term agreement, whether or not he contributes to the cost of approved practices thereon.

(e) Any signatory to a long-term agreement who is not an owner of the farm or ranch must provide assurance that he will have control of the land for the duration of the period of the agreement.

(f) The level of cost-sharing in effect for practices in all years of a long-term agreement shall be the level in effect for the beginning year of the agreement. The rate of cost-sharing for payment purposes for such practice will be based on the average cost of performing the practice at the time the practice is performed.

(g) A long-term agreement may be canceled for failure to comply with the terms of the agreement if, after consulting with the Soil Conservation District (or comparable district) board or, if none exists, with a representative of the Soil Conservation Service, the county committee and State committee find that the seriousness of the irregularities warrant such action. If the agreement is canceled, the signatories to the agreement are jointly and severally responsible for refunding all cost-shares paid and will forfeit all rights to further payments under the agreement. In such a case, no other refund or forefeiture provisions of these regulations apply.

(h) A long-term agreement may be revised in accordance with instructions issued by the Deputy Administrator, Programs where there is a change in status of the participants, the land under agreement, or farming operations.

(i) An eligible person who acquires control of land under an approved agreement may elect to become a successor in interest under such agreement.

(j) An agreement will be terminated with respect to land for which loss of control has occurred and where the person acquiring control of such land elects not to become a successor in interest under the agreement. If the loss of control is for reasons beyond the control of the signatories to the agreement, the county committee will determine whether or not any cost-shares previously paid shall be refunded, but in no event shall the refund be greater than would be required in cases where loss of control is voluntary. If the loss of control is voluntary on the part of the signatories to the agreement, the signatories will be jointly and severally responsible for refunding all cost-shares paid and will forfeit all rights to further payments, with respect to the land for which control is lost: *Provided*, That, a refund will not be required for cost-shares where, after consulting with the Soil Conservation District (or comparable district) board or, if none exists, with a representative of the Soil Conservation Service, the county committee and the State committee determined that failure to perform the remaining practices in the agreement will not impair the effectiveness of the practices which have been performed and that the completed practices will provide conservation benefits consistent with the cost-shares which have been paid.

(k) An agreement may be terminated by Deputy Administrator, Programs, if, after considering the recommendation of the Soil Conservation District (or comparable district) board or, if none exists, with a representative of the Soil Conservation Service, the county committee recommends and the State committee concurs that such action is in the public interest. In such case, the Deputy Administrator, Programs, will determine the amount of cost-shares previously paid that shall be refunded.

§ 701.17 Replacement, enlargement, or restoration.

The establishment or installation of a practice, for the purposes of the program, shall be deemed to include the replacement, enlargement, or restoration of practices for which cost-sharing has been allowed if the practices has served for its normal lifespan, or if all of the following conditions exist:

(a) Replacement, enlargement, or restoration of the practice is needed to solve the problem;

(b) The failure of the original practice was not due to the lack of proper maintenance by the current operator; and

(c) The county committee believes that the replacement, enlargement, restoration of the practice merits consideration under the program to an equal extent with other practices.

§ 701.18 Pooling agreements.

Farmers, ranchers, or eligible landowners in any local area may agree in writing, with the approval of the county committee, to perform designated amounts of practices which, by conserving or improving resources of the com-

V 40 217 NOV 10 75 XUM

munity, will solve a mutual conservation, pollution, or other environmental problem on the land of the participants. For purposes of eligibility for cost-sharing, practices carried out under such an approved written agreement shall be regarded as having been carried out on the land of the persons who performed the practices.

§ 701.19 Special provisions for low-income farmers and ranchers.

(a) Notwithstanding any other provision of this subpart, the county committee may approve, in the case of low-income farmers and ranchers as defined in this section, levels of cost-sharing of up to 80 percent of the average cost of performing practices.

(b) A low-income farmer or rancher is one who, as determined by the county committee, is a small producer who is largely dependent on the farm or ranch for his livelihood, and whose prospective income and financial resources for the current year are such that he could not reasonably be expected to perform needed conservation practices at the level of cost-sharing applicable to other persons in the county.

(c) In approving requests for cost-sharing the county committee shall give special consideration to requests filed by low-income farmers and ranchers.

§ 701.20 Practices substantially completed during program year.

Approved practices may be deemed, for purposes of payment of cost-shares, to have been carried out during a program year, if the county committee determines that they are substantially completed by the end of that program year. However, no cost-shares for such practices shall be paid until they have been completed in accordance with all applicable specifications and program provisions, except as provided in § 701.67.

§ 701.21 Conservation materials and services.

(a) *Availability.* Part or all of the cost-share for an approved practice may be in the form of conservation materials or services furnished through the program for use in carrying out the practice. Materials or services may not be furnished to persons who are indebted to the Federal Government, as indicated by the debt record maintained in the office of the county committee, except in those cases where the agency to which the debt is owed waives its rights to set-off in order to permit the furnishing of materials and services.

(b) *Cost to farmer or rancher.* The farmer or rancher shall be responsible for paying that part of the cost of the material or service which is in excess of the amount to be advanced toward the purchase of the material or service. The maximum amount which may be advanced toward the purchase of the material or service in the cost-share attributable to the use of the material or service, or, upon request by the farmer or rancher and approval by the county committee, the cost-share for all components of the practice which likely will be completed during the program year, plus any applicable small cost-share increase, but not in excess of the cost of the material or service.

(c) *Responsibility for materials and services.* (1) If the materials or services are improperly used in carrying out the practices with respect to which they were furnished, recovery of the amount advanced toward the purchase of the materials or services will be made from the persons who share in the cost-share payment for the practice, in the proportion in which they share in the cost-share payment. If the materials or services are not used for the purpose for which they were furnished, the person to whom they were furnished shall be indebted to the Federal Government for the amount advanced toward the cost of the materials or services.

(2) Any person to whom materials are furnished shall be responsible to the Federal Government for any damage to the materials, unless he shows that the damage was caused by circumstances beyond his control. If materials are abandoned or not used during the program year, they may, in accordance with instructions issued by the Deputy Administrator, Programs, be transferred to another person or otherwise disposed of at the expense of the person who abandoned or failed to use the material; or be retained by the person for use in a subsequent program.

(d) *Eligibility to furnish conservation materials and services.* (1) To be eligible to furnish conservation materials or services on the basis of purchase orders issued by the county committee, a vendor must agree that he will fill purchase orders without regard to the race, religion, color, or national origin of the person to whom the purchase order is issued. A vendor shall not be eligible to furnish conservation materials and services if he has performed any of the actions which would warrant suspension as stated in paragraph (d)(3) of this section.

(2) A vendor who is found by the State committee or county committee to have knowingly misused a purchase order will be subject to payment of liquidated damages for such misuse, in addition to being jointly and severally responsible with the farmer to refund any overpayment made to the vendor by the Government. The liquidated damages will be determined in accordance with instructions issued by the Deputy Administrator, Programs. The assessment of liquidated damages is not in lieu of other remedies and will in no way bar, mitigate, or be a substitute for any other remedies the Government may have against a vendor for knowingly misusing a purchase order. If the facts warrant it, the vendor will be suspended from furnishing conservation materials and services.

(3) A vendor shall be suspended by the State committee or county committee from furnishing conservation materials and services if:

(i) His name is currently on the Department's list of debarred, ineligible, and suspended bidders or contractors or is currently suspended or debarred under CCC Suspension and Debarment Regulations;

(ii) He knowingly misused a purchase order contrary to his vendor's agreement and such misuse has a material and significant adverse effect on the administration of the program;

(iii) He is currently suspended or debarred under any other Department program; or

(iv) He has committed acts of misconduct, including but not limited to fraudulent activities, showing such serious lack of business integrity as to warrant suspension.

(4) A vendor's employee who has performed any of the actions which would warrant suspension of a vendor as stated in paragraph (d)(3) of this section shall be prohibited from handling purchase orders for an otherwise eligible vendor.

(5) The State committee or county committee will determine the period during which a vendor shall be declared ineligible to furnish conservation materials and services in accordance with paragraph (d)(1) of this section; a vendor shall be suspended in accordance with paragraph (d)(3) of this section; or an employee of a vendor shall be prohibited from handling purchase orders in accordance with paragraph (d)(4) of this section. The length of the period will be based on the nature, gravity, and extent of the irregularities involved, but in no case will the ineligibility be permanent.

§ 701.22 Small cost-share increases.

If the sum of the cost-shares computed (dropping all fractions of a dollar except where the payment is less than $1) for any person with respect to any farm, ranch or other eligible ownership would be:

(a) Not more than $20, the payment shall be increased by 40 percent;

(b) More than $20 but not more than $40, the payment shall be increased by $8, plus 20 percent of the excess over $20;

(c) More than $40 but not more than $60, the payment shall be increased by $12, plus 10 percent of the excess over $40;

(d) More than $60 but not more than $186, the payment shall be increased by $14; or

(e) More than $186 but less than $200, the payment shall be increased to $200.

§ 701.23 Maximum cost-share limitation.

For each program year the total of all cost-shares to any person with respect to farms and ranches (§ 701.2(b)) in the United States, Puerto Rico, and the Virgin Islands for approved practices which are not carried out under pooling agreements shall not exceed the sum of $2,500, and those carried out under pooling agreements shall not exceed the sum of $10,000. (Also see § 701.73.)

§ 701.24 Completion of practices.

Cost-sharing for the practices contained in this part is conditioned upon the performance of the practices in accordance with all applicable specifications and program provisions. Except as provided in §§ 701.20 and 701.67, practices must be completed during the program year in order to be eligible for cost-sharing.

§ 701.25 Time of filing payment application.

Payment of cost-shares will be made only upon application submitted on the prescribed form to the county office by December 31 of the year following the current program year or such earlier date as is prescribed by the Deputy Administrator, Programs. Any application for payment may be rejected if any form or information required of the applicant is not submitted to the county office within the applicable time limit.

§ 701.26 Other program provisions.

Other provisions as contained in §§ 701.1 and 701.2 and in the Subpart, General Provisions, apply to the Agricultural Conservation Program.

Subpart—Forestry Incentives Program

§ 701.27 Program objective.

The objective of the forestry incentives program (referred to in this subpart as the "program") is to ensure a future supply of timber. This will be accomplished by encouraging land owners to apply forestry practices for production of timber and related benefits to increase afforestation of suitable open lands, reforestation of cutover and understocked forest lands, intensive multipurpose management, and protection of forest resources.

§ 701.28 Program year for accounting purposes.

The fiscal year will be the program year for accounting purposes.

§ 701.29 Designated counties.

The State committee in consultation with the State forester, will designate the counties in which the program will be operated. The following will be considered in making the selections:

(a) The total acreage in the county devoted to desirable types of softwood and hardwood timber.

(b) The estimated area in the county that is under eligible ownership.

(c) The estimated acreage suitable for the production of forest products.

(d) The availability of funds.

§ 701.30 Eligible persons, land, and ownerships.

(a) An eligible person is a private individual, group, association, corporation, or other legal entity which owns eligible land. Eligible land is "nonindustrial" private forest lands capable of producing industrial wood crops, excluding land owned by private entities which regularly engage in the business of manufacturing forest products or providing public utilities services of any type, or the subsidiaries of such entities.

(b) Eligible ownerships are tracts of land of not more than 500 acres. The Director, Environmental Quality and Land Use Division, ASCS, after consultation with appropriate representative of the Forest Service, may approve tracts of more than 500 where it is deemed to be to the public's significant benefit.

§ 701.31 Program funds.

(a) *States and counties.* Each designated State and county will receive a share of the funds provided nationally for the program. The State committee will consult with the State forester when determining the allocation of such funds to the designated counties. Funds will be distributed on the basis of the forest production opportunities in each State, considering the acreage of private commercial forest lands, the number of eligible owners, the potential productivity of such lands and the need for reforestation, timber stand improvement, or other forestry management needs.

(b) A limitation on the amount of funds which may be obligated under long-term agreements shall be established by the State committee in accordance with guidelines provided by the Deputy Administrator, Programs.

§ 701.32 Eligible practices and cost-share requirements.

(a) The following National practices and practice authority are those eligible for cost-sharing:

(1) Practice FP–1. Planting Trees.

(2) Practice FP–2. Improving a Stand of Forest Trees.

(3) Practice authority—SF Practice. Special Forestry Practices. The Director, Environmental Quality and Land Use Division, ASCS, after consultation with the Forest Service, may approve special forestry practices needed to take care of a significant and unique local condition for which the National practices are not adequate. Such practices may be approved for inclusion in county programs only upon the recommendation of the county program development group with the concurrence of the State program development group.

(b) A forest mangement plan is required as a condition of cost-sharing. The plan will be developed in consultation with the land owner, approved by the service forester, and will contain information for accurate evaluation of practice effectiveness. The participant will be required to perform those measures in the plan which are essential to the effectiveness of the practice for which costs are shared.

§ 701.33 National program.

The National program is based on recommendations developed by the National program development group.

§ 701.34 Development of State programs.

(a) A State program shall be developed in each State in accordance with the provisions contained in this part and in the National program and such modifications thereof as may thereafter be made. The program shall be developed by the State program development group.

(b) The program for the State shall be that recommended by the State program development group and approved by the Director, Environmental Quality and Land Use Division, ASCS after consulting the Forest Service.

§ 701.35 Development of county programs.

(a) A county program shall be developed in each designated county in accordance with the provisions of the State program and such modifications thereof as may be made. The county program shall be developed by the county program development group. The county program development group, working with the governing body of the conservation district, the forestry agency representatives of the State, the county supervisor of the Farmers Home Administration, and others with conservation and environmental interest, shall develop recommendations for the county program.

(b) The program for the county shall be that recommended by the county program development group and approved by the State program development group.

§ 701.36 Adaptation of practices.

(a) The practices included in the State program must meet the conditions and requirements of the National program. National program provisions may be modified or deleted to make practices more restrictive where such changes will still result in the practices effectively meeting the objective of the program.

(b) The practices included in the county program must meet the conditions and requirements of the State program. State program provisions may be modified or deleted to make practices more restrictive where such changes will still result in the practices effectively meeting the objectives of the program.

§ 701.37 Rates of cost-sharing.

(a) The maximum cost-share for each practice shall be the percentage of the average cost of performing the practice considered necessary to obtain the needed performance of the practice, but which will be such that the participant will make a significant contribution to the cost of performing the practice.

(b) Levels of cost-sharing shall not be in excess of 75 percent nor less than 50 percent of the average cost as approved by the State committee.

(c) For the purpose of establishing rates of cost-sharing, the average cost of perfoming a practice may be the average cost for a State, a county, or a part of a county, as determined by the State committee.

(d) The rates of cost-sharing for practices included in the county program may be lower than the rates approved for general use in the State.

§ 701.38 Prior approval for cost-sharing.

Costs will be shared only for those practices, or components of practices, for which cost-sharing is requested and approval issued before performance thereof is started.

§ 701.39 Method of approval.

The county committee will determine the extent to which Federal funds will

V 40 217 NOV 10 75 N XUM

be made available to share the cost of each approved practice, taking into consideration the county allocation, the forestry needs in the county and of the land involved, and the practices for which requested cost-sharing is considered by the county committee as most needed. The method approved shall provide for the issuance of notices of approval showing for each approved practice the number of units of the practice for which the Federal Government will share in the cost and the amount of the cost-share for the performance of that number of units of the practice. Notices of approved practices shall be issued before performance of the practice may be started. No practice may be approved for cost-sharing except as authorized by the national, State or county program, or in accordance with procedures incorporated therein. Available funds for cost-sharing shall not be allocated on a pro-rata basis, but shall be directed to the accomplishment of the most production attainable.

(a) Cost-sharing may be approved under annual agreements or long-term agreements.

(b) Land covered by a Great Plains Conservation Program contract is not excluded from an annual or long-term agreement if otherwise eligible and is approved by both the Forest Service and the Soil Conservation Service.

(c) The same practices, cost-share levels and general program provisions apply to both annual agreements and long-term agreements.

§ 701.40 Long-term agreements.

(a) The period of a long-term agreement will be for not less than three (3) years nor more than ten (10) years. The county committee and the signatories to the agreement in consultation with the Forest Service representative, will mutually determine the scheduling of essential practices and practice cost-sharing over the period of the agreement.

(b) The long-term agreement will be based on a forest management plan for the ownership tract which has been developed by the Forest Service.

(c) The long-term agreement will provide that the owner will carry out those measures in the forest management plan which are determined to be essential whether or not cost-sharing is approved for such measures.

(d) The level of cost-sharing in effect for practices in all years of a long-term agreement shall be the level in effect for the beginning year of the agreement. The rate of cost-sharing for payment purposes for such practice will be based on the average cost of performing the practice at the time the practice is performed.

(e) A long-term agreement may be canceled for failure to comply with the terms of the agreement if, after consulting with the Forest Service, the county committee and State committee find that the seriousness of the irregularities warrant such action. If the agreement is canceled, the signatories to the agreement are jointly and severally responsible for refunding all cost-shares paid and will forfeit all rights to further payments under the agreement. In such a case, no other refund or forfeiture provisions of these regulations apply.

(f) A long-term agreement may be revised in accordance with instructions issued by the Deputy Administrator, Programs where there is a change in status of the participants or the land under agreement.

(g) An eligible person who acquires control of land under an approved agreement may elect to become a successor in interest under such agreement.

(h) An agreement will be terminated with respect to land for which loss of control has occurred and where the person acquiring control of such land elects not to become a successor in interest under the agreement. If the loss of control is for reasons beyond the control of the signatories to the agreement, the county committee will determine whether or not any cost-shares previously paid shall be refunded, but in no event shall the refund be greater than would be required in cases where loss of control is voluntary. If the loss of control is voluntary on the part of the signatories to the agreement, the signatories will be jointly and severally responsible for refunding all cost-shares paid and will forfeit all rights to further payments, with respect to the land for which control is lost: *Provided*, That a refund will not be required for cost-shares where, after consulting with the Forest Service, the county committee and the State committee determine that failure to perform the remaining practices in the agreement will not impair the effectiveness of the practices which have been performed and that the completed practices will provide forestry benefits consistent with the cost-shares which have been paid.

(i) An agreement may be terminated if, after considering the recommendation of the Forest Service, the county committee recommends and the State committee concurs that such action is in the public interest.

§ 701.41 Restoration of practices.

(a) Cost-sharing may be authorized under the program only for the establishment or installation of the practices contained in this part. Cost-sharing may not be authorized for repeating any of the practices in this part with the same owner on the same acreage, except as provided in paragraph (b) of this section.

(b) Cost-sharing may be authorized for the replacement, enlargement, or restoration of practices for which cost-sharing has been allowed under the program only if all of the following conditions exist:

(1) Replacement or restoration of the practice is needed to solve the problem;

(2) The failure of the original practice was not due to the lack of proper maintenance by the current operator; and

(3) The county committee believes that the replacement or restoration of the practice merits consideration under the program to an equal extent with other practices.

§ 701.42 Maximum cost-share limitation.

For each fiscal year the total of all cost-shares to any owner with respect to eligible ownerships (§ 701.30 (b)) in the United States, Puerto Rico, Guam, and the Virgin Islands for approved practices carried out under annual and/or long-term agreements shall not exceed the sum of $10,000.

§ 701.43 Completion of practices.

Cost-sharing for the practices contained in this subpart is conditioned upon the performance of the practices in accordance all applicable specifications and program provisions.

§ 701.44 Time of filing payment application.

Payment of cost-shares will be made only upon application submitted on the prescribed form to the county office by the prescribed time limit or any authorized extension thereof. Any application for payment may be rejected if any form or information required of the applicant is not submitted to the county office within the applicable time limit.

§ 701.45 Other program provisions.

Other provisions as contained in §§ 701.1 and 701.2 and in the subpart, General Provisions, apply to the Forestry Incentives Program.

Subpart—Emergency Conservation Measures Program

§ 701.46 Program objective.

The objective of the emergency conservation measures program is to rehabilitate farmlands damaged by wind erosion, floods, hurricanes, or other natural disasters by sharing with eligible farmers the cost of restoring damaged farmlands.

§ 701.47 Program availability.

Subject to the availability of funds, the county committee may implement the program where new conservation problems have been created on farmland by a natural disaster which, if not treated: (a) Will impair or endanger the land; (b) materially affect the productive capacity of the land; (c) represent damage which is unusual in character and, except for wind erosion, is not the type which would recur frequently in the same area; and (d) will be so costly to rehabilitate that Federal assistance is required to return the land to productive agricultural use.

§ 701.48 Eligible land and person.

Eligibility of land and person is the same as for the Agricultural Conservation Program as provided in § 701.7 and § 701.8.

§ 701.49 Emergency conservation measures.

(a) Cost-sharing may be offered for emergency conservation measures only to replace or restore a practice or to restore the land to a condition similar to that existing prior to the natural disaster; and may not be offered for the solution of conservation problems existing prior to the disaster involved.

(b) Emergency conservation measures or practices for which cost-sharing may be authorized are:

(1) *Practice EC1.* Removing debris from farmland, including farmsteads and roadways.

(2) *Practice EC2.* Grading, shaping, releveling or similar measures to restore farmland.

(3) *Practice EC3.* Restoring permanent fences.

(4) *Practice EC4.* Restoring structures and other installations.

(5) *Practice EC5.* Emergency wind erosion control measures.

(6) *Practice EC6.* Drought emergency measures.

(7) *Practice EC7.* Other emergency conservation measures.

Other needed emergency conservation practices not included in practices EC1 through EC6 may be included in county programs only upon the recommendation of the county committee in consultation with the county program development group and the approval of the State committee.

§ 701.50 Practice approval.

Practices developed within the framework of practice EC1 thru EC6 (§ 701.49) may be approved by the county committee for use in the county. Practices developed according to the guidelines for practice EC7 require prior approval of the State committee.

§ 701.51 Extent of cost-sharing.

The extent of cost-sharing is the smaller of: (a) the actual cost less the amount the county committee determines the farmer can bear in restoring the damaged farmland, or (b) 80 percent of the actual cost.

§ 701.52 Eligible costs.

Upon determination that a producer is eligible for assistance, cost-sharing shall be granted for all reasonable costs incurred. This extends to personal labor, equipment, or materials. County committees shall limit costs for the use of personal equipment to an amount that reflects actual expenses considering operating costs and depreciation. Expenses for personal labor and personal equipment should be less than rates charged by contractors who expect to make a profit for their efforts.

§ 701.53 Filing requests.

Cost-sharing must be requested by a date established by the county committee.

§ 701.54 Approving requests.

County committees will determine eligibility for assistance on an individual basis considering the: (a) Type and extent of damage and (b) farmer's capability (financial and otherwise) to rehabilitate the damaged farmland. Assistance will not be offered where the farmland can be restored in a relatively short period of time using normal farm labor and equipment at minimum cost.

§ 701.55 Pooling agreements.

Pooling agreements may be used on the same basis as provided for the Agricultural Conservation Program in § 701.18.

§ 701.56 Payment limitation.

There is no maximum payment limitation under the program. Requests or cumulative requests for cost-sharing in excess of $10,000 per person per disaster require prior approval of the State committee.

§ 701.57 Other program provisions.

Other provisions as contained in §§ 701.1 and 701.2 and in the subpart, General Provisions, apply to the emergency conservation measures program.

Subpart—General Provisions

§ 701.58 Restriction on program eligibility.

The regulations in Part 796 of this chapter prohibiting the making of payments to program participants who harvest or knowingly permit to be harvested for illegal use, marijuana or other such prohibited drug-producing plants on any part of the land owned or controlled by them are applicable to these programs.

§ 701.59 Delegation of authority.

No delegation contained in these programs to a State or county committee shall preclude the Deputy Administrator, Programs or his designee, from determining any question arising under these programs or from reversing or modifying any determination made by a State or county committee.

§ 701.60 Practice specifications.

(a) Minimum specifications which practices must meet to be eligible for cost-sharing shall be set forth in the county program, or incorporated therein by specific reference to a standard publication or other written document containing such specifications.

(b) Practice specifications shall represent those levels of performance which are needed in order for the practice to be effective in meeting the program objective and which are not in excess of levels for which cost-sharing can be justified.

§ 701.61 Responsibility for technical phases of practices.

The Soil Conservation Service and Forest Service are responsible for the technical phases of the practice as assigned and such assignment will be specified in State and county programs.

(a) The State conservationist of the Soil Conservation Service may utilize assistance from private, State or Federal, agencies in carrying out the assigned responsibilities. Responsibilities will not be assigned for counties with respect to which the Deputy Administrator, Programs and the Administrator, SCS, agree that it would not be administratively practicable for the Soil Conservation Service to discharge these responsibilities. In such counties, these responsibilities shall be assumed by the county committees. The Soil Conservation Service will utilize to the full extent available resources of the State forestry agencies in carrying out assigned responsibilities for practices involving the establishment of windbreaks or shelterbelts on farmland to prevent wind erosion.

(b) The Forest Service is responsible for the technical phases of practices or components of practices involving the planting of trees for forestry purposes and those involving the improving or protecting of a stand of forest trees, as specified in State and county programs. The Forest Service may utilize the assistance of private, State or Federal agencies in carrying out these assigned responsibilities, but services of State forestry agencies will be utilized to the full extent that such services are available.

(c) The technical assistance to be furnished in servicing assigned practices will include, where appropriate, the following technical phases: (1) Determining whether the practice is needed and practicable; (2) selecting the site (if necessary), determining the specific measures needed, and performing any required layout work for the practice; (3) supervising the installation of the practice if needed to assure conformity with specifications; and (4) certifying the extent performed and whether the specifications for the practice have been met. The technical agency shall perform all four phases for all assigned practices in State and county programs, except as may be provided in instructions issued by the Deputy Administrator, Programs.

§ 701.62 Items of cost on which rates of cost-sharing may be based.

Except as otherwise provided by the wording contained in procedural handbooks, notices, and regulations the cost of any direct and significant factor in the performance of a practice may be considered in establishing the rate of cost-sharing for the practice.

§ 701.63 Handbooks, bulletins, instructions, and forms.

The Deputy Administrator, Programs is authorized to prepare and issue handbooks, bulletins, instructions, and forms required in administering these programs. Copies of handbooks, bulletins, instructions and forms containing detailed information with respect to these programs as they apply to specific States, counties, areas, farms, ranches, and other eligible ownerships will be available in the office of the State committee at the office of the county committee.

§ 701.64 Opportunity for requesting cost-shares.

Each farmer, rancher, or eligible landowner, regardless of his race, creed, color, or national origin, shall be given an opportunity to request that the Federal Government share in the cost of those practices which he considers he needs

V 40 217 NOV 10 75 XUM

on his farm, ranch, or other eligible land. The county committee, taking into consideration the request and any conservation or forest management plan developed for the land involved with the assistance of any State or Federal agency, and without regard to the race, creed, color, or national origin of the person, shall direct the available funds for cost-sharing to those practices where cost-sharing is considered most essential to the accomplishment of the program objective.

§ 701.65 Repair, upkeep and maintenance of practices.

Cost-sharing is not authorized for repairs or for normal upkeep or maintenance of any practice.

§ 701.66 Public benefits when installing practices.

Persons responsible for any aspect of performing practices are to be encouraged to install the practices in such a way to promote public benefits by improving or preserving environmental quality and ecological balance by preventing or abating pollution and other environmental degradation; benefiting the community by means such as preserving open space, or enhancing the appearance of the area; benefiting wildlife and other desirable life forms; preserving historic, archeological, or scenic sites of interest; and avoiding the creation of hazards to persons or animals.

§ 701.67 Practices requiring more than one program year for completion.

Cost-shares approved under these programs will not be considered as earned until all components of the approved practice are completed in accordance with all applicable specifications and program provisions. Cost-shares for completed components may be paid only on the condition that the farmer, rancher, or eligible landowner will complete the remaining components of the practice within the time prescribed by the county committee and regardless of whether cost-sharing therefor is offered unless he is prevented from doing so because of reasons beyond his control.

§ 701.68 Practice involving the establishment or improvement of vegetative cover.

Costs for practices involving the establishment or improvement of vegetative cover, including trees, may be shared even though a good stand is not established, if the county committee determines, in accordance with standards approved by the State committee, that the practice was carried out in a manner which would normally result in the establishment of a good stand, and that failure to establish a good stand was due to weather or other conditions beyond the control of the operator. The county committee may require as a condition of cost-sharing in such cases that the area be reseeded or replanted or that other needed protective measures be carried out. Cost-sharing in such cases may be approved also for repeat applications of measures previously carried out or for additional eligible measures. Cost-sharing for such measures shall be approved to the extent such measures are needed to assure a good stand even though less than that required by the applicable practice wording for initial approvals.

§ 701.69 Failure to meet minimum requirements.

Notwithstanding other provisions of these programs, costs may be shared for performance actually rendered even though the minimum requirements for a practice are not met, if the farmer, rancher, or eligible landowner establishes to the satisfaction of the county committee and the county representative of any other agency having responsibility for technical phases of the practice that he made a reasonable effort to meet the minimum requirements, and that the practice as performed adequately solves the problem.

§ 701.70 Practices carried out with aid from ineligible persons.

The entire cost-share for a practice carried out with aid from an ineligible person, including a State or Federal agency, shall be credited to the eligible persons who contributed to the cost of carrying out the practice: *Provided*, That the cost-share credited to an eligible person shall not exceed his contribution to the cost of carrying out the practice.

§ 701.71 Division of cost-shares.

(a) The cost-share for a practice shall be credited to the person who carried out the practice. If more than one person contributed to the carrying out of the practice, the cost-share for the practice shall be divided among such persons in the proportion that the county committee determines they contributed to the carrying out of the practice. In making his determination, the county committee shall take into consideration the value of the labor, equipment, or material contributed by each person toward the carrying out of the practice, and shall assume that each contributed equally unless it is established to the satisfaction of the county committee that their respective contributions thereto were not in equal proportion. Any advances toward the cost of materials or services under § 701.21, the furnishing of land, and the furnishing of the right to use water will not be considered as a contribution to the carrying out of any practice.

(b) The allowance by an eligible person of a credit to another eligible person in the form of an adjustment in rental or an exchange of cash or other consideration will not be considered as a contribution to the carrying out of any practice unless it is established to the satisfaction of the county committee that such credit is directly related to the cost or cost-share of the practice. A person will not be considered as having contributed to the carrying out of a practice if the county committee determines that he has been or is to be fully reimbursed for contributions he made to the performance of the practice, through an adjustment in rental or an exchange of cash or other consideration between eligible persons directly related to the cost or cost-share for the practice.

§ 701.72 Death, incompetency, or disappearance.

In case of death, incompetency, or disappearance of any person, any cost-shares due him shall be paid to his successor, determined in accordance with the provisions of the regulations in Part 707 of this chapter, as amended.

§ 701.73 Applying cost-share limitations.

(a) All or any part of any cost-share which otherwise would be due any person for a program year may be withheld, or required to be refunded, if, with respect to that program year, he has adopted, or participated in adopting, any scheme or device, including the dissolution, reorganization, revival, formation or use of any corporation, partnership, estate, trust or any other means, designed to evade a maximum cost-share limitation.

(b) For the purpose of applying the maximum cost-share limitations, the rules of paragraphs (b)(1) through (9) of this section shall apply in determining whether certain individuals who may have an interest in the ownership or operation of a farm or ranch (§ 701.2 (b)) are to be considered as one or as separate persons. In cases where more than one rule would appear to be applicable, the rule which is most restrictive as to number of persons shall apply.

(1) *Husband and wife.* Husband and wife shall be considered as one person for all farms in which either has an interest except that a husband or wife shall be considered as a separate person with respect to any farm as to which all the conditions set forth in paragraph (b)(9) of this section are met.

(2) *Family groups.* Members of the same family shall be considered as one person for all farms in which any member has an interest except that any member shall be considered as a separate person with regard to any farm as to which all the conditions set forth in paragraph (b)(9) of this section are met.

(3) *Partnerships.* A partnership and its members shall be considered as one person for all farms in which the partnership or any member thereof has an interest except that the partnership or any member thereof shall be considered a separate person with respect to any farm as to which all the conditions set forth in paragraph (b)(9) of this section are met: *Provided*, That in no event shall cost-sharing be approved for both the partnership and the individual members thereof on the same farm.

(4) *Corporation.* A corporation (including a grazing association) and its shareholders or members shall be considered as one person for all farms in which the corporation or any shareholder or member has an interest except that the corporation or any shareholder or member thereof shall be considered a separate person with respect to any farm

as to which all the conditions set forth in paragraph (b)(9) of this section are met: *Provided*, That in no event shall cost-sharing be approved for both the corporation and the individual shareholders or members thereof on the same farm.

(5) *Trust.* The trustees of a trust and the beneficiaries of the trust shall be considered as one person on all farms in which the trustee or any beneficiary of the trust has an interest except that the trustee or any beneficiary of the trust shall be considered a separate person with respect to any farm as to which all the conditions of paragraph (b)(9) of this section are met: *Provided*, That in no event shall cost-sharing be approved for both the trustee and the beneficiaries of the trust on the same farm.

(6) *Estates.* The administrator or executor of an estate and the heirs thereof shall be considered as one person on all farms in which the administrator or executor or any heir thereof has an interest except that the administrator or executor or any heir of the estate shall be considered as a separate person with respect to any farm as to which all the conditions of paragraph (b)(9) of this section are met: *Provided*, That in no event shall cost-sharing be approved for both the administrator or executor and the heirs of the estate on the same farm.

(7) *Tenants in common and joint tenants.* All persons owning a farm as tenants in common or as joint tenants shall be considered as one person with respect to such farm except that the owners shall be considered separate persons if all the conditions set forth in paragraph (b)(9) of this section are met.

(8) *Joint undertakings.* Two or more individuals acting as a group under an arrangement which, although lacking in the legal elements of a corporation or partnership, is in the nature of a joint undertaking shall be considered as one person with respect to any farm to which the joint undertaking applies except that the joint undertaking or any member thereof shall be considered a separate person with respect to any farm as to which all the conditions set forth in paragraph (b)(9) of this section are met: *Provided*, That in no event shall cost-sharing be approved for both the joint undertaking and the individual members thereof on the same farm.

(9) *Exception.* The conditions which must be met in order for an individual or other entity referred to in paragraph (b)(1), (2), (3), (4), (5), (6), (7), or (8) of this section to be considered a separate person are as follows:

(i) The interest of such individual or other entity in the farm and income therefrom must be separate and distinct from the interest therein of the other individuals or entity referred to in the applicable subparagraph;

(ii) Such individual or other entity must exercise, separate from the other individuals or entity referred to in the applicable subparagraph, responsibility for management of such separate interests; and

(iii) The contribution of such individual or entity to the cost of performing practices must be made from a fund or account separate from that of any other individual or entity referred to in the applicable subparagraph.

(c) For the purpose of applying the cost-share limitation, a corporation or partnership shall be considered as a separate person from any other corporation or partnership which may participate in the program, even though there are common stockholders or members, with respect to any farm as to which all of the following conditions are met: (1) The interests of such corporation or partnership in the farm and the income therefrom must be separate and distinct from the interest therein of the other corporation or partnership; (2) such corporation or partnership must exercise, separate from the other corporation or partnership, responsibility for management of such separate interest; (3) the contribution of such corporation or partnership to the cost of performing practices must be made from a fund or account separate from that of the other corporation or partnership: *Provided*, That, in no event shall cost-sharing be approved on the same farm for more than one corporation or partnership having common stockholders or membership.

§ 701.74 Persons eligible to file application for payment of cost-shares.

Any person who bore a part of the cost of an approved practice is eligible to file an application for payment of cost-share due him.

§ 701.75 Time and manner of filing application and required information.

It shall be the responsibility of persons participating in these programs to submit to the county office forms and information needed to establish the extent of the performance of approved practices and compliance with applicable program provisions. The time limits with regard to the submission of such forms and information shall be established where necessary for efficient administration of the programs. Such time limits shall afford a full and fair opportunity to those eligible to file the forms and information within the period prescribed. At least 2 weeks notice to the public shall be given of any general time limits prescribed. Such notice shall be given by mailing notice to the office of each county committee and making copies available to the press. Other means of notification; including radio announcements and individual notices to persons affected, shall be used to the extent practicable. Notice of such time limits which are applicable to individual persons, such as time limits for reporting performance of approved practices, shall be issued in writing to the persons affected. Exceptions to the time limits may be made in cases where failure to submit required forms and information within the applicable time limits is due to reasons beyond the control of the farmer or rancher.

§ 701.76 Appeals.

Any person may obtain reconsideration and review of determinations affecting his participation in these programs, in accordance with Part 780 of this chapter, as amended.

§ 701.77 Performance based on advice or action of county or State committee.

Cases involving performance rendered in good faith in reliance upon action or advice of an authorized representative of a county committee or State committee shall be handled in accordance with Part 790 of this chapter.

§ 701.78 Compliance with regulatory measures.

Persons who carry out practices under these programs shall be responsible for obtaining the authorities, rights, easements, or other approvals necessary to the performance and maintenance of the practices in keeping with applicable laws and regulations. The person with whom the cost of the practice is shared shall be responsible to the Federal Government for any losses it may sustain because he infringes on the rights of others or fails to comply with applicable laws or regulations.

§ 701.79 Maintenance and use of practices.

The sharing of costs for the performance of approved practices on any farm or ranch under these programs shall be subject to the condition that the person with whom the costs are shared will maintain and use such practices for the purpose for which cost-sharing was authorized throughout their normal lifespans as determined by the county committee, as long as the land on which they are carried out is under his control, unless the State or county committee determines that good farming or forest management practice does not require such maintenance and use or that the failure to so maintain and use the practices was due to conditions beyond his control. If the State or county committee finds that there has not been compliance with this provision, with respect to any practice, the person with whom costs for the practice were shared shall be required to refund all of the cost-share for the practice, or such part thereof as the State or county committee may determine.

§ 701.80 Practices defeating purposes of program.

If the county committee finds with the concurrence of the State committee, or if the State committee finds, that any person has adopted or participated in any practice which tends to defeat the purposes of these programs, including, but not limited to, failure to maintain, in accordance with good farming or forest management practices, practices carried out during a previous program year, it may withhold, or require to be refunded, all or any part of the cost-share which otherwise would be due him for the pro-

V 40 217 NOV 10 75 XUM

gram year in which he adopted or participated in the practice which tends to defeat the purposes of these programs.

§ 701.81 Depriving others of cost-shares.

If the State committee finds that any person has employed any scheme or device (including coercion, fraud, or misrepresentation), the effect of which would be or has been to deprive any other person of the cost-shares due that person, under these programs, it may withhold, in whole or in part, from the person participating in or employing such a scheme or device, or require him to refund in whole or in part, the cost-share which otherwise would be due him for the program year in which the scheme or device was employed.

§ 701.82 Filing of false claims.

If the State committee finds that any person has knowingly supplied false information, or has knowingly filed a false claim, including a claim for payment of the cost-share under these programs for practices not carried out or for practices carried out in such a manner that they do not meet the required specifications therefor, such person shall not be eligible for any cost-share under the program year with respect to which the false information or false claim was filed, and shall refund all amounts that may have been paid to him under that program year. The withholding or refunding of cost-shares will be in addition to and not in substitution of any other penalty or liability which might otherwise be imposed by law.

§ 701.83 Cost-shares not subject to claims.

Any cost-share or portion thereof, due any person shall be determined and allowed, without regard to questions of title under State law; without deductions of claims for advances except as provided in § 701.84, and without regard to any claim or lien against the crop, or proceeds thereof, in favor of the owner or any other creditor. The regulations issued by the Secretary governing setoffs and withholdings, Part 13 of this title, as amended, shall be applicable to the program.

§ 701.84 Assignments.

Any person who may be entitled to any cost-share under these programs may assign his right thereto, in whole or in part, in accordance with the regulations governing the assignment of payments.

Effective date. Since farmers are now completing their plans for the 1975 program year it is essential that the foregoing regulations governing the Rural Environmental Programs for 1975 and subsequent years be made effective as soon as possible. It is hereby found and determined that compliance with the notice, public procedure, and 30-day effective date provisions of 5 U.S.C. 553 is impracticable and contrary to the public interest. Accordingly, the regulations shall become effective November 10, 1975.

Signed at Washington, D.C., on November 3, 1975.

E. J. PERSON,
Acting Administrator, Agricultural Stabilization and Conservation Service.

CHAPTER XIV—COMMODITY CREDIT CORPORATION, DEPARTMENT OF AGRICULTURE

[CCC Grain Price Support Regulations, 1970 and Subsequent Crops Rye Supplement, Amendment 5]

PART 1421—GRAINS AND SIMILARLY HANDLED COMMODITIES

Adjustment in Support Rates for Shipment

The regulations issued by the Commodity Credit Corporation (CCC), published in the Federal Register at 35 F.R. 10355, as amended, containing provisions for price support loans and purchases applicable to the 1970 and subsequent crops of rye are further amended as follows:

1. Section 1421.340(d) is revised, to delete the words "at not to exceed the UGSA rates", to read as follows:

§ 1421.340 Warehouse receipts.

* * * * *

(d) *Liens.* Warehouse receipts and rye represented thereby stored in an approved warehouse operating under the Uniform Grain Storage Agreement (UGSA) may be subject to liens only for warehouse handling charges. However, in no event shall a warehouseman be entitled to satisfy the lien by sale of the rye when CCC is the holder of the warehouse receipt.

* * * * *

2. Since storage is no longer on a uniform-rate basis, it is desirable to delete all references to computed rates applicable under the Uniform Grain Storage Agreement (UGSA) and to insert "truck receiving and rail loading-out charges in effect for the shipping warehouse". Accordingly § 1421.344(b) is revised to read as follows, and § 1421.344(c) (2) (i) is revised to increase the add-on rate for grain stored within the switching limits of designated terminal markets to read as follows:

§ 1421.344 Support rates.

* * * * *

(b) *Basic support rates for warehouse-stored rye received by rail or utilizing combination barge-rail rates—(1) When shipped by rail and stored intransit at interior locations.* The applicable basic support rate for warehouse-storage loans on rye which was received by rail and stored in an approved warehouse at other than a port terminal market shall be determined by adding to the basic support rate established for the county from which the rye was shipped, the amount of freight charges per bushel actually paid in, and an amount equal to the truck receiving and rail loading-out charges in effect for the shipping warehouse. The freight rate paid into the storage point shall not exceed the lowest rate which will permit the storage intransit privilege and protect the lowest single car rate applying from origin through point of storage to a terminal market designated in paragraph (c) (2) of this section that would be used in commercial channels of trade. If the rye is stored in approved warehouse at a transit point which takes a penalty by reason of backhaul or out-of-line movement when destined to a designated terminal market that would be used in commercial channels of trade, such penalty or cost by reason of such movement shall be deducted from the support rates as determined in this paragraph.

(2) *When shipped by rail and stored as designated port terminal market locations.* The applicable basic support rate for warehouse storage loans on rye which was received by rail and stored in an approved warehouse at a port terminal market designated in paragraph (c) (2) (iii) of this section shall be determined by adding to the basic support rate established for the county from which the rye was shipped, the amount of freight charges per bushel actually paid in and an amount equal to the truck receiving and rail loading-out charges in effect for the shipping warehouse. The freight rate paid into the storage point shall not exceed the lowest applicable freight rate to the port terminal market that would be used in commercial channels of trade.

(3) *When shipped utilizing combination barge-rail rates.* The applicable basic support rate for warehouse-storage loans on rye which was shipped utilizing combination barge-rail freight rates which are published and on file with the Interstate Commerce Commission and stored in an approved warehouse shall be determined by adding to the basic support rate established for the county from which the rye was shipped, the amount of freight charges per bushel actually paid in and an amount equal to the truck receiving and rail loading-out charges in effect for the shipping warehouse. The freight rate paid into the storage point shall not exceed a rate which will permit the storage intransit privilege and protect the lowest single car or barge freight rate applying from origin through point of storage to one of the interior or port terminal markets designated in paragraph (c) (2) of this section that would be used in commercial channels of trade. If the rye is stored in an approved warehouse at a transit point which takes a penalty by reason of backhaul or out-of-line movement when destined to the designated interior or port terminal market that would be used in commercial channels of trade, such penalty or cost by reason of such movement shall be deducted from the support rates as determined in this paragraph.

(4) *When shipped by rail through an unapproved warehouse.* The applicable basic support rate for warehouse storage loans on rye which was received by rail shipped through an unapproved warehouse and stored in an approved warehouse at a terminal market designated in paragraph (c) (2) (iii) of this section shall be determined by adding to the basic support rate established for the county from which the rye was shipped the amount of freight charges per bushel actually paid in and an amount equal to the loading-out charges. The county office shall determine receiving and loading-out charges from approved warehouses in the local area. An average of these charges shall become the truck receiving and rail loading-out charge to be added on. The freight paid into the storage point shall be the lowest applicable freight rate to the port terminal market that would be used in commercial channels of trade.

(c) * * *

(2) *Stored within the switching limits of designated terminal markets.* (i) The applicable basic support rate for warehouse-storage loans on rye which was received by truck, or by barge not utilizing combination barge-rail freight rates, and stored in an approved warehouse located within the switching limits of a terminal market designated in paragraph (c) (2) (ii) or (iii) of this section shall be determined by adding eight cents per bushel to the basic county support rate established for the county (or city) in which the terminal market is located.

* * * * *

Since rye is currently being harvested in many parts of the rye-producing area and the provisions of this amendment are needed to carry out the loan program more effectively compliance with the notice of proposed rulemaking would be impracticable and contrary to the public interest. Therefore, this amendment is issued without following such procedure.

* * * * *

(Secs. 4 and 5, 62 Stat. 1070, as amended (15 U.S.C. 714 b and c); secs. 105, 401, 63 Stat. 1051, as amended (7 U.S.C. 1441 note and 1421)).

Effective date: November 10, 1975.

Signed at Washington, D.C., on November 3, 1975.

E. J. PERSON,
Acting Executive Vice President, Commodity Credit Corporation.

[FR Doc.75-30199 Filed 11-7-75;8:45 am]

PART 1421—GRAIN AND SIMILARLY HANDLED COMMODITIES

Standards for Approval of Warehouses for Grain, Rice, Dry Edible Beans, and Seed

The only substantive change under this revision is the elimination of the restrictive requirement for performance bonds or other security covering the obligations of warehousemen storing and handling grain, rice, dry edible beans, and seed under Commodity Credit Corporation programs. Accordingly, it is determined that compliance with the notice of proposed rulemaking procedures is unnecessary and contrary to the public interest.

The regulations appearing in this subpart which were published on February 15, 1969 (34 F.R. 2243), and amended on February 11, 1974 (39 F.R. 5184), are revised to read as follows:

Sec.
1421.5551 General statement and administration.
1421.5552 Basic standards.
1421.5553 Bonding requirements for net worth.
1421.5554 Examination of warehouses.
1421.5555 Exceptions.
1421.5556 Approval of warehouse; requests for reconsideration.
1421.5557 Exemption from requirements.

AUTHORITY: Sec. 4, 62 Stat. 1070, as amended (15 U.S.C. 714b).

§ 1421.5551 General statement and administration.

(a) This subpart prescribes the requirements which must be met by a warehouseman in the United States or Puerto Rico who desires the initial or continuing approval of his warehouse(s) by Commodity Credit Corporation (hereinafter called "CCC") for the storage and handling of (1) wheat, oats, corn, rye, barley, grain sorghums, flaxseed, and soybeans under a Uniform Grain Storage Agreement (which commodities hereinafter are referred to collectively as "grain"), (2) rough rice under a Uniform Rice Storage Agreement, (3) milled rice under a Milled Rice Storage Agreement, (4) dry edible beans under a Bean Storage Agreement, and (5) seed under a Seed Storage Agreement, which are owned by CCC or held by CCC as security for price support loans. This subpart also prescribes the procedure to be followed by a warehouseman in obtaining such approval. This subpart is not applicable to grain, rough and milled rice, dry edible beans, and seed purchased in store for prompt shipment or to handling operations of a temporary nature.

(b) Copies of the CCC storage agreement and other forms required to obtain approval under this subpart may be obtained from the Prairie Village Agricultural Stabilization and Conservation Service Commodity Office, U.S. Department of Agriculture, Post Office Box 8377, Shawnee Mission, Kansas 66208 (hereinafter referred to as the "Prairie Village Office").

(c) A warehouse must be approved by the Prairie Village Office and a storage agreement must be entered into by CCC and the warehouseman before such warehouse will be used by CCC. The approval of a warehouse or the entering into of a storage agreement does not constitute a commitment that the warehouse will be used by CCC and no official or employee of the U.S. Department of Agriculture is authorized to make any such commitment.

(d) A warehouseman, in applying for approval under this subpart, shall submit to CCC at the Prairie Village Office:

(1) A completed Form CCC-24, "Application for Approval of Warehouse for Grain, Rice, Dry Edible Beans, and Seed", and a completed Form CCC-24-1, "Supplemental to Application for Approval of Warehouse for Grain, Rice, Dry Edible Beans, and Seed".

(2) A current financial statement on Form TW-51, "Financial Statement", supported by such supplemental schedules as may be requested. Such statement shall show the financial condition of the warehouseman as of a date not earlier than ninety (90) days prior to the date of the warhouseman's application or such other date as may be established by CCC. Subsequent financial statements shall be furnished annually and at such other times as may be required by CCC. If the warehouseman employs the services of a public accountant, the financial statement must be certified or otherwise authenticated by the public accountant to the extent consistent with the accountant's verification of facts contained in the statement. Such certification or authentication may be separate from the financial statement. Only one financial statement is required for a chain of warehouses owned or operated by a single business entity.

(3) Evidence that he is licensed by the appropriate licensing authority as required under § 1421.5552(b) (2) and such other documents or information as CCC may require.

§ 1421.5552 Basic standards.

Unless otherwise provided in this subpart, each warehouseman and each of the warehouses owned or operated by him which is to be approved, or has been approved, for the storage or handling of grain, rough and milled rice, dry edible beans, and seed under CCC programs shall meet the following standards:

(a) Neither the warehouseman nor any of his officials or supervisory employees is suspended or debarred under CCC's regulations governing suspension and debarment, 7 CFR, Part 1407, for any of the causes set forth in § 1407.5 thereof.

(b) The warehouseman shall: (1) Be an individual, partnership, corporation, association, or other legal entity engaged in the business of storing or handling for hire the commodity involved. The warehouseman, if a corporation, shall be authorized by its charter to engage in such business.

(2) Have a current and valid license for the kind of storage operation for which he seeks approval if such a license is required by State or local laws or regulations.

(3) Have a net worth equal at least to the product obtained by multiplying the maximum storage capacity of the warehouse (the total quantity of the commodity involved which the warehouse can accommodate when stored in the customary manner) times five (5) cents per bushel in the case of grain, twenty (20) cents per hundredweight in the case of rough rice, thirty-five (35) cents per hundredweight in the case of milled rice, and twenty-five (25) cents per hundredweight in the case of dry edible beans, and, in the case of seed, the net worth shall be equal at least to the product obtained by multiplying the estimated total number of pounds of seed to be stored times three (3) cents

V 40 217 NOV 10 75 XUM

per pound, but in no case shall the net worth be less than $10,000. If the required minimum net worth exceeds the $10,000, the warehouseman may satisfy any deficiency in net worth between the $10,000 and such required minimum net worth by furnishing an acceptable bond or other security acceptable to CCC meeting requirements of § 1421.5553.

(4) Have available sufficient funds to meet ordinary operating expenses.

(5) Have satisfactorily corrected, upon request by CCC, any deficiencies in the performance of any storage agreement with CCC.

(6) Maintain complete inventory and operating records.

(7) Use only prenumbered warehouse receipts and scale tickets.

(c) (1) The warehouseman, his officials or his supervisory employees in charge of the warehouse operation shall have the necessary experience, organization, technical qualifications, and skills in the warehousing business as related to the commodities involved to enable them to provide proper storage and handling services, and

(2) The warehouseman, his officials, and each of his supervisory employees in charge of the warehouse operations shall have a satisfactory record of integrity, judgment, and performance.

(d) The warehouse shall: (1) Be of sound construction, in good state of repair, and adequate to handle, store, and preserve the commodity involved.

(2) Be under the control of the contracting warehouseman at all times.

(3) Not be subject to greater than normal risk of fire, flood, or other hazards.

(4) Have adequate firefighting equipment for the type of warehouse and commodity involved.

(5) Be located on a railroad or waterway or have a suitable method of delivering the commodity involved.

(6) Have a work force and equipment available to complete the load out within approximately thirty (30) working days of that quantity of grain for which the warehouse is or may be approved under a Uniform Grain Storage Agreement and within approximately ninety (90) working days of that quantity of the commodity for which the warehouse is or may be approved under a Uniform Rice Storage Agreement, a Milled Rice Storage Agreement, a Bean Storage Agreement, or a Seed Storage Agreement. The load out capacity of any of these warehouses need not exceed the equivalent of 200 railroad cars per day

§ 1421.5553 Bonding requirements for net worth.

A bond furnished by a warehouseman under this subpart must meet the following requirements:

(a) Such bond shall be executed by a surety company which: (1) Has been approved by the U.S. Treasury Department, and (2) maintains an officer or representative authorized to accept service of legal process in the State where the warehouse is located.

(b) A bond furnished by a warehouseman shall be on Form CCC–33, "Warehouseman's Bond—Storage Agreement", except that a bond furnished under State law (statutory bond) or under operational rules of nongovernmental supervisory agencies may be accepted in an equivalent amount as a substitute for a bond running directly to CCC if: (1) CCC determines that it provides adequate protection to CCC, (2) it has been executed by a surety specified in paragraph (a) of this section or has a blanket rider and endorsement executed by such a surety with the liability of the surety under such rider or endorsement being the same as that of the surety under the original bond, and (3) is noncancellable for not less than ninety (90) days or includes a rider providing for not less than ninety (90) days' notice to CCC before cancellation. Excess coverage on a substitute bond for one warehouse will not be accepted or applied by CCC against insufficient bond coverage on other warehouses operated by a warehouseman.

(c) Cash and negotiable securities offered by a warehouseman may be accepted by CCC in lieu of the equivalent amount of required bond coverage. Any such cash or negotiable securities accepted by CCC will be returned to the warehouseman when the period for which coverage was required has ended and there appears to CCC to be no liability under the storage agreement.

(d) A legal liability insurance policy may be accepted by CCC in lieu of the required amount of bond coverage provided such policy contains a clause or rider making the policy payable to CCC. CCC determines that it affords protection equivalent to a bond, and the Office of the General Counsel, U.S. Department of Agriculture, approves it for legal sufficiency.

§ 1421.5554 Examination of warehouses.

Except as otherwise provided in this subpart, a warehouse will be examined by a person designated by CCC before it is approved by CCC for the storage or handling of the commodity involved and periodically thereafter to determine its compliance with CCC's standards and requirements.

§ 1421.5555 Exceptions.

Notwithstanding any other provisions of this subpart: (a) The financial, bond, and original and periodic warehouse examination provisions of this subpart are not applicable to any warehouseman approved or applying for approval for the storage or handling of grain, rough or milled rice, dry edible beans, or seed under CCC programs if his warehouse is licensed under the U.S. Warehouse Act for the same commodity but a special examination shall be made of such warehouse whenever such action is determined necessary.

(b) A Certificate of Competency issued by the Small Business Administration with respect to warehouseman will be accepted by CCC as establishing conformance by the warehouseman with the standards prescribed in § 1421.5552(b), (1), (3), and (4), (c)(1), and (d), and the warehouseman will not be required to furnish bond coverage for a deficiency in net worth.

(c) A warehouseman who has a net worth of at least $10,000 but who fails, or whose warehouse fails, to meet one or more of the other standards of this subpart may be approved if: (1) CCC determines that the warehouse services are needed and the warehouse storage and handling conditions provide satisfactory protection for the commodity involved, and

(2) The warehouseman furnishes such bond coverage (or cash or acceptable negotiable securities or legal liability insurance policy) as may be prescribed by CCC.

§ 1421.5556 Approval of warehouses: requests for reconsideration.

(a) CCC will approve a warehouse if it determines that the warehouse meets the standards set out in this subpart. CCC will forward a notice of approval to the warehouseman. Approval under this subpart, however, does not relieve the warehouseman of responsibility for performing his obligations under any contract with CCC or any other agency of the United States. An approval will remain in effect until the storage agreement expires or is otherwise terminated unless CCC sooner withdraws its approval.

(b) Except as otherwise provided in this subpart: (1) CCC will not approve the warehouse if CCC determines that the warehouse does not meet the standards set out in this subpart.

(2) CCC may withdraw its approval of a warehouse if CCC determines that such warehouse ceases to meet such standards or if the warehouseman fails to perform his obligations under the CCC storage agreement.

(3) CCC will forward a notice of disapproval or withdrawal of approval to the warehouseman. The notice will state the cause(s) for such action. Unless the warehouseman or any of his officials or supervisory employees is suspended or debarred as provided in § 1421.5552(a), CCC will approve, or reinstate approval of, the warehouse upon the warehouseman establishing that he has remedied the cause(s) for CCC's action. If there appears to be a justifiable basis for suspension or debarment of the warehouseman or any of his officials or supervisory employees, CCC may defer action on an application for approval or reinstatement of approval or may withdraw approval pending a decision with respect to suspension or debarment proceedings.

(c) (1) If disapproval or withdrawal of approval by CCC is due to failure to meet the standards set forth in § 1421.5552, other than the standard in paragraph (a) thereof, the warehouseman may at any time after receiving notice of such action request reconsideration of the action and present to the Director of the Prairie Village Office, orally or in writing, information in support of his request. The Director, upon consideration of such information, shall notify the warehouseman in writing of his determination. The warehouseman may, if the Director's determination is adverse to the warehouseman, obtain a review of the determination and an informal hearing in connection therewith by filing an appeal with the Deputy Administrator, Commodity Operations, ASCS. The time for filing appeals, forms of request for appeal, nature of the informal hearing, determination, and reopening of the hearing shall be as prescribed by §§ 780.6, 780.7, 780.8, 780.9, and 780.10, respectively, of the ASCS regulations governing appeals, 7 CFR Part 780. In connection with such regulations, the warehouseman shall be considered to be a "participant".

(2) If disapproval or withdrawal of approval by CCC is due to failure to meet the standard set forth in § 1421.5552(a), the warehouseman's rights of appeal and hearing shall be as provided in regulations governing suspension and debarment by CCC, 7 CFR Part 1407. After expiration of his suspension or debarment, a warehouseman may, at any time, apply for approval under this subpart.

§ 1421.5557 Exemption from requirements.

If warehousing services in any area cannot be secured under the provisions of this subpart and no reasonable and economical alternative is available for securing such services for commodities under CCC programs, the President or Executive Vice President, CCC, may exempt, in writing applicants in such area from one or more of the standards of this subpart and may establish such other standards as are considered necessary to safeguard satisfactorily the interests of CCC.

Effective date: This revision shall be effective on November 10, 1975. Warehousemen approved under prior regulations are not required to submit new applications for approval under this revision but are subject to the provisions of this subpart for continued approval to handle and store the commodities involved.

Signed at Washington, D.C., on November 3, 1975.

E. J. PERSON,
Acting Executive Vice President Commodity Credit Corporation.

Title 10—Energy

CHAPTER II—FEDERAL ENERGY ADMINISTRATION

PART 213—OIL IMPORT REGULATIONS

Elimination of Reporting Requirements

On October 15, 1975, the Federal Energy Administration (FEA) issued a proposal to amend § 213.23 of the Oil Import Regulations by eliminating the reporting requirements contained in paragraph (c). Six comments were received, all of which were in favor of this proposal. Accordingly, FEA hereby amends § 213.23 as proposed.

As indicated in the proposal, this amendment will result in no reduction in the amount of data available to FEA with regard to the quantity, country of origin, and further processing requirements of imported crude petroleum and petroleum products. Its purpose is, rather, to eliminate a reporting procedure that has proved burdensome to importers, and that yields data already received by FEA from other sources.

(Federal Energy Administration Act of 1974, Pub. L. 93275; E.O. 11790, 39 FR 23185; Trade Expansion Act of 1962, P.L. 87794, as amended; Proclamation No. 3279, 24 FR 1781, as amended by Proclamation No. 4210, 38 FR 9645, Proclamation No. 4227, 38 FR 16195, Proclamation No. 4317, 38 FR 35103, Proclamation No. 4341, 40 FR 3956, Proclamation No. 4355, 40 FR 10437, Proclamation No. 4370, 40 FR 19421, and Proclamation No. 4377, 40 FR 23429)

In consideration of the foregoing, Part 213 of Chapter II, Title 10 of the Code of Federal Regulations, is amended as set forth below, effectively immediately.

Issued in Washington, D.C., November 4, 1975.

DAVID G. WILSON,
Acting General Counsel, Federal Energy Administration.

§ 213.23 [Amended]

Section 213.23 is amended by deleting paragraph (c), and by redesignating paragraphs (d) and (e) as paragraphs (c) and (d) respectively.

Title 12—Banks and Banking

CHAPTER V—FEDERAL HOME LOAN BANK BOARD

[75–1003]

PART 555—BOARD RULINGS

Amendments to Ruling Relating to the Effect of Participations on Borrowing Members

NOVEMBER 5, 1975.

SUMMARY

The following summary of the Ruling amended by this Resolution is provided for the reader's convenience and is subject to the full explanation in the following preamble and to specific provisions of the amended Ruling.

I. SITUATION PRIOR TO THIS AMENDMENT

Borrowers from a Federal mutual association were deemed to be members of the association which singly or jointly originated the loan, and they also were deemed to be members of any Federal association or associations purchasing the loan, or a participation therein, from the Federal association which originated the loan.

II. PROPOSED AMENDMENT

A. Borrowers from a Federal mutual association would be members only of the association singly or jointly originating the loan, provided that such loan has not been fully repaid, and such association has not sold its entire ownership interest in the loan.

B. A third party assuming the loan in full would be deemed the borrowing member of the originating association in lieu of the original borrower.

III. FINAL AMENDMENT

The same as the Proposed Amendment.

IV. REASON FOR THIS AMENDMENT

To simplify the question of determining borrowing membership in a Federal mutual association, and to conform the Board's interpretative Ruling more closely to the relevant provisions of Section 4 of the charters of Federal mutual associations.

The Federal Home Loan Bank Board, by Resolution No. 75–895, dated October 1, 1975, proposed to amend § 555.9 of the Rules and Regulations for the Federal Savings and Loan System (12 CFR 555.9) to simplify the question of determining membership rights of borrowers of Federal mutual associations. Notice of such proposed rulemaking was duly published in the FEDERAL REGISTER on October 8, 1975 (40 FR 47151) with an invitation for interested persons to submit written comments by October 23, 1975.

For the reasons stated in the proposal and summarized above, and on the basis of its consideration of all relevant material presented by interested persons and otherwise available, the Board hereby approves the proposal without change and hereby amends § 555.9 to read as set forth below, effective November 10, 1975.

Since this is an amendment of an interpretative ruling, the Board hereby finds that publication of such amendment for the 30-day period specified in 12 CFR 508.14 and 5 U.S.C. 553(d) prior to the effective date of said amendment is unnecessary, and the Board hereby provides that said amendment shall become effective as hereinbefore set forth.

Section 555.9 is revised to read as follows:

§ 555.9 Members; borrowing; loan participation, effect on.

Solely for the purpose of determining borrower membership in a Federal mutual association pursuant to Parts 544 and 563b of this Chapter, a person will be deemed to be a borrowing member of a Federal mutual association pursuant to its charter if and only if such association has singly or jointly originated a loan to that person, such loan has not been fully repaid, and the entire ownership interest of the originating association in such loan has not been sold to a third party or parties. In the event such loan has been assumed in full, the person assuming the loan shall be deemed to be a borrowing member of the originating association in lieu of the original borrower whether or not the original borrower has been released from his obligation on the loan.

V 40 217 NOV 10 75 XUM

(Sec. 5, 48 Stat. 132, as amended; 12 U.S.C. 1464. Reorg. Plan No. 3 of 1947, 12 FR 4981, 3 CFR, 1943–48 Comp., P. 1071)

By the Federal Home Loan Bank Board.

Title 14—Aeronautics and Space

CHAPTER II—CIVIL AERONAUTICS BOARD

[Regulation SPR-95, Amdt. 5]

PART 372—OVERSEAS MILITARY PERSONNEL CHARTERS

Amendment Regarding Escrowed Charter Deposits

In SPDR-41,[1] the Board issued a Notice of Proposed Rulemaking to amend Parts 372, 373, and 378 of the Board's Special Regulations (14 CFR Parts 372, 373, and 378) so as to: (1) permit escrowed charter deposits to be invested in bank certificates of deposit (CD), and (2) revise the method of determining the maximum extent to which escrowed funds may be so invested.

Our special regulations which govern the operation of various types of charters require their organizers, authorized to act as indirect air carriers, to provide security for safeguarding charter customers' advance payments by either posting a bond, or by an arrangement which involves posting a bond in combination with a bank depository agreement. When the latter type of security arrangement is used, certain of these regulations, *i.e.*, those governing Overseas Military Personnel Charters (Part 372), Study Group Charters (Part 373), Inclusive Tour Charters (Part 378), and One-stop-inclusive Tour Charters (Part 378a)[2] permit such escrowed funds to be invested in "federal, state, or municipal bonds, or other negotiable securities which are publicly traded on a securities exchange," provided that such "other" securities may be substituted for cash in an amount not greater than 80% of their market value at the time of deposit.

Pursuant to the notice, comments have been filed by Davis Agency, Inc., Union Bank of California, and Western Ski Vacations, Inc.[3]

At the time this rulemaking proceeding was instituted, the rules of the Federal Reserve Board (FRB), reflecting a long-standing policy, did not permit its regulated banks to accept interest-bearing savings deposits from business corporations and other profit-making organizations, while savings and loan institutions, regulated by the Federal Home Loan Bank Board (FHLBB) were not subject to such inhibition. As a result of this difference in the regulatory framework of these financial institutions, savings and loan institutions were more attractive than FRB-regulated banks as depositories of escrowed funds under our rules, since the former could pay interest to the depositor, while the latter could not.[4] The Board was therefore persuaded that, to the extent compatible with our regulatory objectives, we should consider amending our own rules to enable FRB-regulated banks to offer interest to depositors of escrow funds. Since we were obviously without power to authorize FRB-regulated banks to pay interest on "savings deposits" made by charter operators, so long as FRB rules precluded such arrangements,[5] we decided—first by issuing *ad hoc* waivers and then by institution of this rulemaking proceeding—to try to ameliorate the competitive disadvantage of FRB-regulated banks by authorizing them to offer depositors an opportunity to invest escrowed funds in CD's.

The purpose of the proposed rule was thus to permit investment of escrowed funds in bank certificates of deposit in the same manner and to the same extent as such funds may be invested in "other" securities.[6] The proposed rule would permit escrowed funds to be invested in an aggregate amount not exceeding 80% of the funds in the escrow account, thereby giving that 20% of the funds of the escrow account be retained in cash and would provide that, should the value of these securities fall, from time to time, additional cash or securities must be deposited in the escrow account.

Upon consideration, the Board has determined to adopt the rule as proposed, with a technical modification. The tentative findings and conclusions set forth in SPDR-41 are incorporated and made final, and, except to the extent granted herein, all requests contained in the comments are denied.

The primary area of comment centered around the proper characterization of CD's and the extent of their liquidity. Both Davis and Western Ski urged that since CD's are virtually "demand instruments" and are "as stable, secure and liquid as cash in demand deposits," the 80% limitation on investments in "other" securities should not apply to CD's.

The comments thus challenged our subsumed view of the restricted liquidity of CD's, *i.e.*, that they are not cash equivalents, in that the issuing bank is legally precluded from binding itself to redeem a CD before its maturity date. Since our rulemaking proceeding had therefore been proven to require resolution of a clear legal issue as to the restrictions governing CD's, we turned to the Federal Reserve Board for their opinion on this issue. In response to our request, the legal staff of the Federal Reserve Board rendered its opinion.[7] The opinion explained that a bank may not obligate itself to redeem its certificate of deposit, since that would run counter to the Federal Reserve Act's general prohibition against payment of a time deposit before maturity; but if, in fact, a particular bank's policy is to redeem time deposits before maturity, upon request—even though it cannot be legally bound to do so—then the bank is permitted to state that policy to prospective depositors.

In light of the foregoing summary of the Federal Reserve Board's staff opinion, we adhere to the view which underlay our proposal that, since CD's are not cash equivalents, investments of escrowed funds in CD's should not be permitted except to the limit applicable to "other securities."[8] Indeed, it appearing from the FRB staff opinion that premature redemption of CD's, upon request of the holder, is a practice *not* universally followed by issuing banks, we are modifying the proposed rule so as to permit escrowed funds to be invested only in CD's issued by banks which are willing to state expressly that they do follow this practice.[9]

Finally, we have made one editorial change in the rule,[10] to make clear that investment in CD's is not limited to those which are negotiable. The rule, as proposed, read ". . . bonds or other negotiable securities, consisting of bank certificates of deposit or securities which are publicly traded on a securities exchange . . ." The modified language makes clear that "negotiable" refers only to "securities publicly traded on a securities exchange" and that investment is permitted in either governmental bonds or "other securities," consisting of bank certificates of deposit or negotiable securities which are publicly traded on a securities exchange.

No comments were received with respect to the proposed revision of the method for determining the maximum extent to which escrowed funds may be invested, and, upon consideration, we have determined to adopt that proposal also.

In consideration of the foregoing, the Board hereby amends Part 372 of its Special Regulations (14 CFR Part 372) effective December 10, 1975, as follows:

Section 372.24(a)(2)(ii)(*f*) is revised to read as follows:

§ 372.24 Surety bond, depository agreement, escrow agreement.

(a) • • •
(2) • • •
(ii) • • •

(*f*) Notwithstanding any provisions above, the amount of total cash deposits required to be maintained in the depository account of the bank may be reduced by one or both of the following: The amount of surety bond in the form prescribed herein in excess of the minimum bond required by subdivision (i) of this subparagraph; an escrow with the designated bank of Federal, State, or municipal bonds or other securities, consisting of certificates of deposit issued by banks having a stated policy of redeeming such certificates before maturity at the request of the holder (subject only to such interest penalties or other conditions as may be required by law, or negotiable securities which are publicly traded on a securities exchange, all such securities to be made payable to the escrow account: *Provided*, That such other securities shall be substituted in an amount no greater than 80 percent of the total market value of the escrow account at the time of such substitution: *And provided, further*, That should the market value of such other securities subsequently decrease, from time to time, then additional cash or securities qualified for investment hereunder shall promptly be added to the escrow account, in an amount equal to the amount of such decreased value; or

• • • • • •

(Sections 101(3), 204(a), 401, and 402 of the Federal Aviation Act of 1958, as amended, 72 Stat. 737, 743, 754, and 757, as amended, 49 U.S.C. 1301, 1324, 1371 and 1372.)

By the Civil Aeronautics Board:

Adopted: November 5, 1975.

[SEAL] EDWIN Z. HOLLAND, *Secretary.*

[FR Doc.75-30183 Filed 11-7-75;8:45 am]

[Regulation SPR-96, Amdt. 8]

PART 373—STUDY GROUP CHARTERS BY DIRECT AIR CARRIERS AND STUDY GROUP CHARTERERS

Amendment Regarding Escrowed Charter Deposits

For the reasons stated in SPR-95, issued contemporaneously herewith, the Civil Aeronautics Board hereby amends Part 373 of its Special Regulations (14 CFR Part 373) effective December 10, 1975, as follows:

Section 373.15(b)(2)(viii) is revised to read as follows:

§ 373.15 Surety bonds.

• • • • • •

(b) • • •
(2) • • •

(viii) Notwithstanding any provisions above, the amount of total cash deposits required to be maintained in the depository account of the bank may be reduced by one or both of the following: The amount of surety bond in the form prescribed herein in excess of the minimum bond required by subparagraph (1) of this paragraph; an escrow with the designated bank of Federal, State, or municipal bonds or other securities, consisting of certificates of deposit issued by banks having a stated policy of redeeming such certificates before maturity at the request of the holder (subject only to such interest penalties or other conditions as may be required by law), or negotiable securities which are publicly traded on a securities exchange, all such securities to be made payable to the escrow account: *Provided*, That such other securities shall be substituted in an amount no greater than 80 percent of the total market value of the escrow account at the time of such substitution: *And provided, further*, That should the market value of such other securities subsequently decrease, from time to time, then additional cash or securities qualified for investment hereunder shall promptly be added to the escrow account, in an amount equal to the amount of such decreased value;

• • • • • •

(Sections 101(3), 204(a), 401, and 402 of the Federal Aviation Act of 1958, as amended, 72 Stat. 737, 743, 754, and 757, as amended, 49 U.S.C. 1301, 1324, 1371 and 1372.)

By the Civil Aeronautics Board.

Adopted: November 5, 1975.

[SEAL] EDWIN Z. HOLLAND, *Secretary.*

[FR Doc.75-30184 Filed 11-7-75;8:45 am]

[Regulation SPR-97, Amdt. 12]

PART 378—INCLUSIVE TOUR CHARTERS

Amendment Regarding Escrowed Charter Deposits

For the reasons stated in SPR-95, issued contemporaneously herewith, the Civil Aeronautics Board hereby amends Part 378 of its Special Regulations (14 CFR Part 378) effective December 10, 1975, as follows:

Section 378.16(b)(2)(viii) is revised to read as follows:

§ 378.16 Surety bond.

• • • • • •

(b) • • •
(2) • • •

(viii) Notwithstanding any provisions above, the amount of total cash deposits required to be maintained in the depository account of the bank may be reduced by one or both of the following: The amount of surety bond in the form prescribed herein in excess of the minimum bond required by subparagraph (1) of this paragraph; an escrow with the designated bank of Federal, State, or municipal bonds or other securities, consisting of certificates of deposit issued by banks having a stated policy of redeeming such certificates before maturity at the request of the holder (subject only to such interest penalties or other con-

[1] Docket 27480, dated February 7, 1975, 40 F.R. 6512, February 12, 1975.

[2] Part 378a, which contains such provisions, was adopted subsequent to the issuance of SPDR-41, but in that Notice the Board had stated that if it ultimately determined to adopt the amendments proposed therein, the same amendment would be made to such other charter rules, with comparable security provisions, as might by that time have become adopted.

[3] Western Ski's separate petition for rulemaking, Docket 27688, requesting that the Board also amend Part 372a (Travel Group Charters) so as to permit investment in CD's, is discussed *infra*.

[4] In its comment Union Bank repeats the charge—which it first made in connection with the waiver application to which its comment refers (pp. 6–7)—that this competitive disadvantage results from the Board's rules, rather than from FRB regulations. Thus, it states that the Board's "existing regulations create an unjustified discrimination between these two types of banking institutions" (p. 6) or, in any event, enable "the Board's staff to accord one type of federally-regulated banking institution an inherent competitive advantage over that of another," (*ibid.*) and therefore urges the Board to amend its regulations on escrows so that depositors will be able "to select the bank of their choice without regard to artificial and unnecessary Board restrictions superimposed on the existing regulatory regimes of the FRB and the FHLBB." (*ibid.*)

This charge is of course without merit; it is largely attributable to the mistaken belief—urged on the Board's staff by Union Bank's counsel in connection with said waiver application—that Regulation Q of the FRB rules permits a bank to agree in advance that it will redeem a CD, prior to maturity, upon request of the depositor. The Board's staff had taken the position—supported by FRB's Office of General Counsel, as set forth in the letter filed in this proceeding, which is discussed *infra*—that Union Bank could not lawfully include such an undertaking in its depository agreements. By the same token, insofar as its instant comment suggests (p. 6, footnote 4) that the Board's staff was responsible for inordinately delaying consideration of Union Bank's waiver application, it appears that, in fact, the delay was primarily due to the difficulties encountered by our staff in obtaining from Union Bank an acceptable form of undertaking with respect to redemption of CD's, which might meet the requirements of our charter rules and conform with the rules of FRB.

[5] Subsequent to the issuance of SPDR-41, the FRB issued proposed rules to revise its long-standing policy, by authorizing banks to accept "savings deposits" up to $100,000 from business corporations and other profit-making organizations. 40 F.R. 25031, June 12, 1975. The proposed rules were recently made final, with the maximum amount of deposit increased to $150,000. 40 F.R. 46301, October 7, 1975.

[6] On the same day that the Board issued SPDR-41, American Leadership Study Groups filed a petition for rulemaking (Docket 27482), requesting that Part 378 be amended for inclusive tour charters. That petition has been rendered moot by our institution of this proceeding, and it is accordingly dismissed.

[7] The request and the response have been placed in the docket of this proceeding.

[8] As we noted in SPDR-41, we declined to include Travel Group Charter (TGC) escrows in this proceeding, because the rules governing TGC's have never permitted escrowed funds to be invested in any type of security, for it has been the Board's policy to require that cash be fully available at all times to meet the needs of participants in charters operated under that rule. In view of the Federal Reserve Board's staff opinion as to the stability and liquidity of CD's, we have no reason to change our position. The petition for rulemaking filed by Western Ski in D.27688 is therefore denied, along with the requests for such rulemaking which were included in the comments filed herein.

[9] In its comment, Union Bank suggested that the proposed rule be revised so as to provide that the depository bank must specifically agree that all funds invested in CD's "shall be available at all times for timely disbursement. . . ." We believe that the suggested language might imply an undertaking which the bank could not lawfully make, and therefore we prefer language which simply declares the bank's redemption policy, consistent with the FRB staff opinion.

[10] In its comment, Union Bank suggested that the term "bank certificate of deposit" be defined so as to refer only to certificates of deposit issued by federally insured institutions. This revision seems unnecessary, since the word "bank," as used in the relevant sections of Parts 372, 373, 378, and 378a, is already defined as "a bank, savings and loan association, or other financial institution insured by the Federal Deposit Insurance Corporation or the Federal Savings and Loan Insurance Corporation." Sections 372.24(b), 373.15(b)(2)(vi), 378.16(b)(2)(vi), and 378a.31(b)(2)(vi), respectively.

V 40 217 NOV 10 75 XUM

ditions as may be required by law), or negotiable securities which are publicly traded on a securities exchange, all such securities to be made payable to the escrow account: *Provided*, That such other securities shall be substituted in an amount no greater than 80 percent of the total market value of the escrow account at the time of such substitution: *And provided, further*, That should the market value of such other securities subsequently decrease, from time to time, then additional cash or securities qualified for investment hereunder shall promptly be added to the escrow account, in an amount equal to the amount of such decreased value;

* * * * *

(Sections 101(3), 204(a), 401, and 402 of the Federal Aviation Act of 1958, as amended, 72 Stat. 737, 743, 754, and 757, as amended, 49 U.S.C. 1301, 1324, 1371 and 1372.)

By the Civil Aeronautics Board.

Adopted: November 5, 1975.

[Regulation SPR-98, Amdt. 4]

PART 378a—ONE-STOP-INCLUSIVE TOUR CHARTERS

Amendment Regarding Escrowed Charter Deposits

For the reasons stated in SPR-95, issued contemporaneously herewith, the Civil Aeronautics Board hereby amends Part 378a of its Special Regulations (14 CFR Part 378a) effective December 10, 1975, as follows:

Section 378a.31(b)(2)(viii) is revised to read as follows:

§ 378a.31 Surety bond, depository agreement.

* * * * * *

(b) * * *

(2) * * *

(viii) Notwithstanding any provisions above, the amount of total cash deposits required to be maintained in the depository account of the bank may be reduced by one or both of the following: The amount of surety bond in the form prescribed herein in execss of the minimum bond required by subparagraph (1) of this paragraph; an escrow with the designated bank of Federal, State, or municipal bonds or other securities, consisting of certificates of deposit issued by banks having a stated policy of redeeming such certificates before maturity at the request of the holder (subject only to such interest penalties or other conditions as may be required by law), or negotiable securities which are publicly traded on a securities exchange, all such securities to be made payable to the escrow account: *Provided*, That such other securities shall be substituted in an amount no greater than 80 percent of the total market value of the escrow account at the time of such substitution: *And provided, further*, That should the market value of such other securities subsequently decrease, from time to time, then additional cash or securities qualified for investment hereunder shall promptly be added to the escrow account, in an amount equal to the amount of such decreased value;

* * * * * *

(Sections 101(3), 204(a), 401, and 402 of the Federal Aviation Act of 1958, as amended, 72 Stat. 737, 743, 754, and 757, as amended, 49 U.S.C. 1301, 1324, 1371 and 1372.)

By the Civil Aeronautics Board.

Adopted: November 5, 1975.

Title 17—Commodity and Securities Exchanges

CHAPTER II—SECURITIES AND EXCHANGE COMMISSION

[Release No. 34-11787; File No. S7-600]

PART 240—GENERAL RULES AND REGULATIONS SECURITIES EXCHANGE ACT OF 1934

PART 249b—FURTHER FORMS, SECURITIES EXCHANGE ACT OF 1934

Registration of Clearing Agencies

The Securities and Exchange Commission (the "Commission") announced today the adoption of Rule 17Ab2-1 (17 CFR 240.17Ab2-1) and related Form CA-1 (17 CFR 249b.200) under the Securities Exchange Act of 1934 (the "Act"), effective immediately. The Rule and Form set forth the procedure for the registration and exemption from registration of clearing agencies, as defined in Section 3(a)(23) [1] of the Act.

Background. As amended by the Securities Acts Amendments of 1975 (the "1975 Amendments"),[2] the Act provides for federal regulation of the securities handling process, including the registration and regulation of clearing agencies, with a view to facilitating the establishment of a national system for the prompt and accurate clearance and settlement of securities transactions. The grant of authority to the Commission in the 1975 Amendments is exclusive in some areas; in other areas, including the regulation of clearing agencies, the Commission's authority is shared with the "appropriate regulatory agency," as defined in Section 3(a)(34) of the Act.[3]

The registration requirements. Pursuant to Section 17A(b)(1) of the Act, a clearing agency must register with the Commission if the clearing agency performs any of the functions of a clearing agency with respect to any security, other than an exempted security, as defined in Section 3(a)(12) of the Act. On and after December 1, 1975, it will be unlawful for any clearing agency, unless registered in accordance with the Act or exempted from the requirement to register, directly or indirectly, to make use of the mails or any means or instrumentality of interstate commerce to perform the functions of a clearing agency with respect to any security, other than an exempted security.

Under Section 17A(b)(2) of the Act, a clearing agency subject to the registration requirement registers by filing an application for registration in such form as the Commission, by rule, may prescribe, containing the rules of the clearing agency and such other information and documents as the Commission, by rule, may prescribe.

---

[1] Section 3(a)(23) of the Act provides:

(A) The term "clearing agency" means any person who acts as intermediary in making payments or deliveries or both in connection with transactions in securities or who provides facilities for comparison of data respecting the terms of settlement of securities transactions, to reduce the number of settlements of securities transactions, or for the allocation of securities settlement responsibilities. Such term also means any person, such as a securities depository, who (i) acts as a custodian of securities in connection with a system for the central handling of securities whereby all securities of a particular class or series of any issuer deposited within the system are treated as fungible and may be transferred, loaned, or pledged by bookkeeping entry without physical delivery of securities certificates, or (ii) otherwise permits or facilitates the settlement of securities transactions or the hypothecation or lending of securities without physical delivery of securities certificates.

(B) The term "clearing agency" does not include (i) any Federal Reserve bank, Federal home loan bank, or Federal land bank; (ii) any national securities exchange or registered securities association solely by reason of its providing facilities for comparison of data respecting the terms of settlement of securities transactions effected on such exchange or by means of any electronic system operated or controlled by such association; (iii) any bank, broker, dealer, building and loan, savings and loan, or homestead association, or cooperative bank if such bank, broker, dealer, association, or cooperative bank would be deemed to be a clearing agency solely by reason of functions performed by such institution as part of customary banking, brokerage, dealing, association, or cooperative banking activities, or solely by reason of acting on behalf of a clearing agency or a participant therein in connection with the furnishing by the clearing agency of services to its participants or the use of services of the clearing agency by its participants, unless the Commission, by rule, otherwise provides as necessary or appropriate to assure the prompt and accurate clearance and settlement of securities transactions or to prevent evasion of this title; (iv) any life insurance company, its registered separate accounts, or a subsidiary of such insurance company solely by reason of functions commonly performed by such entities in connection with variable annuity contracts or variable life policies issued by such insurance company or its separate accounts; (v) any registered open-end investment company or unit investment trust solely by reason of functions commonly performed by it in connection with shares in such registered open-end investment company or unit investment trust, or (vi) any person solely by reason of its performing functions described in paragraph 25(E) of this subsection.

[2] Pub. L. 94-29 (June 4, 1975).

[3] For clearing agencies, the appropriate regulatory agency may be the Commission, the Board of Governors of the Federal Reserve System, the Comptroller of the Currency or the Federal Deposit Insurance Corporation.

In accordance with Section 19(a)(1) of the Act, the Commission is required, upon filing of an application for registration as a registered clearing agency, to publish notice of the filing and afford interested persons an opportunity to submit written data, views and arguments concerning the application. Within 90 days of the date of publication of the notice, or any longer period to which the applicant consents, the Commission must either grant the registration, by order, or institute proceedings to determine whether registration should be denied. Proceedings to determine whether registration should be denied must be concluded within 180 days of the date of publication of the filing of the application for registration, unless the Commission, for good cause, extends the time for the conclusion of such proceedings; the proceedings may be extended for up to 90 days if the Commission publishes its reasons for the extension. At the conclusion of the proceedings, the Commission must grant registration if the Commission finds that the requirements of the Act and the rules and regulations thereunder are satisfied and must deny registration if the Commission does not make such a finding.

The Commission may not grant registration prior to the sixtieth day after the date of publication of notice of filing of an application for registration by a clearing agency for which the Commission is not the appropriate regulatory agency unless the appropriate regulatory agency for such clearing agency has notified the Commission of the appropriate regulatory agency's determination that the clearing agency is "so organized and has the capacity to be able to safeguard securities and funds in its custody or control or for which it is responsible and that the rules of such clearing agency are designed to assure the safeguarding of such securities and funds." [4]

Determination to be made by the Commission in connection with registration of clearing agencies. Section 17A(b)(3) of the Act provides that a clearing agency shall not be registered unless the Commission makes nine determinations (the "Determinations")[5]. The first Determination is that the registrant's organization and capacity enable the registrant to facilitate the clearance and settlement of securities transactions, safeguard securities and funds, comply with the provisions of the Act and carry out the purposes of Section 17A of the Act. The remaining eight Determinations concern the registrant's rules and require findings that the rules provide reasonable access, fair representation of participants in the administration of the registrant's affairs, and an equitable allocation of dues and fees; do not impose a schedule of prices for services rendered by participants; provide for appropriate disciplining of participants; are in accordance with paragraph (5) of Section 17A(b) of the Act (relating to the fairness of procedures utilized in connection with disciplinary actions and denials of access); carry out the purposes of Section 17A of the Act; and do not impose any burden on competition not necessary or appropriate in furtherance of the purposes of the Act.

---

[4] Section 19(a)(2)(A) of the Act.

[5] Section 17A(b)(3) of the Act provides:

(3) A clearing agency shall not be registered unless the Commission determines that:

(A) Such clearing agency is so organized and has the capacity to be able to facilitate the prompt and accurate clearance and settlement of securities transactions for which it is responsible, to safeguard securities and funds in its custody or control or for which it is responsible, to comply with the provisions of this title and the rules and regulations thereunder, to enforce (subject to any rule or order of the Commission pursuant to section 17(d) or 19(g)(2) of this title) compliance by its participants with the rules of the clearing agency, and to carry out the purposes of this section.

(B) Subject to the provisions of paragraph (4) of this subsection, the rules of the clearing agency provide that any (i) registered broker or dealer, (ii) other registered clearing agency, (iii) registered investment company, (iv) bank, (v) insurance company, or (vi) other person or class of persons as the Commission, by rule, may from time to time designate as appropriate to the development of a national system for the prompt and accurate clearance and settlement of securities transactions may become a participant in such clearing agency.

(C) The rules of the clearing agency assure a fair representation of its shareholders (or members) and participants in the selection of its directors and administration of its affairs. (The Commission may determine that the representation of participants is fair if they are afforded a reasonable opportunity to acquire voting stock of the clearing agency, directly or indirectly, in reasonable proportion to their use of such clearing agency.)

(D) The rules of the clearing agency provide for the equitable allocation of reasonable dues, fees and other charges among its participants.

(E) The rules of the clearing agency do not impose any schedule of prices, or fix rates or other fees, for services rendered by its participants.

(F) The rules of the clearing agency are designed to promote the prompt and accurate clearance and settlement of securities transactions, to assure the safeguarding of securities and funds which are in the custody or control of the clearing agency or for which it is responsible, to foster cooperation and coordination with persons engaged in the clearance and settlement of securities transactions, to remove impediments to and perfect the mechanism of a national system for the prompt and accurate clearance and settlement of securities transactions, and, in general, to protect investors and the public interest; and are not designed to permit unfair discrimination in the admission of participants or among participants in the use of the clearing agency, or to regulate by virtue of any authority conferred by this title matters not related to the purposes of this section or the administration of the clearing agency.

(G) The rules of the clearing agency provide that (subject to any rule or order of the Commission pursuant to section 17(d) or 19(g)(2) of this title) its participants shall be appropriately disciplined for violation of any provision of the rules of the clearing agency by expulsion, suspension, limitation of activities, functions, and operations, fine, censure, or any other fitting sanction.

(H) The rules of the clearing agency are in accordance with the provisions of paragraph (5) of this subsection, and, in general, provide a fair procedure with respect to the disciplining of participants, the denial of participation to any person seeking participation therein, and the prohibition or limitation by the clearing agency of any person with respect to access to services offered by the clearing agency.

(I) The rules of the clearing agency do not impose any burden on competition not necessary or appropriate in furtherance of the purposes of this title.

The Commission's exemptive authority. Section 17A(b)(1) of the Act provides, among other things, that the Commission may exempt any clearing agency or any class of clearing agencies from any provisions of Section 17A or the rules and regulations thereunder if the Commission finds that an exemption is ". . . consistent with the public interest, the protection of investors, and the purposes of [Section 17A], including the prompt and accurate clearance and settlement of securities transactions and the safeguarding of securities and funds." The Commission's exemptive authority may be exercised, conditionally or unconditionally, upon the Commission's own motion or upon application.

Registration and exemption from registration. The Commission has concluded that it will not be able, by December 1, 1975, either to make all the Determinations required by Section 17A(b)(3) of the Act in connection with the grant of registration or to determine whether exemptions from registration should be granted. Since, on and after December 1, 1975, it will be unlawful for clearing agencies to engage in clearing agency functions unless registered or exempt from registration, the Commission has provided, by rule, that, during the period from December 1, 1975 until the Commission grants or denies registration or grants an exemption from registration, applicants whose applications are filed on or before November 24, 1975 will be exempt from the registration requirements of the Act and the rules and regulations thereunder which would be applicable to clearing agencies as a result of registration under the Act.

In addition to applying for registration or for exemption from registration, an applicant may comply with the registration requirements of the Act by applying for registration and requesting the Commission to exempt the applicant from one or more of the Determinations. The Commission anticipates that, in appropriate cases, the registrations of applicants which request registration based on fewer than all the Determinations and which file applications on or before November 24, 1975 will be granted on or before December 1, 1975, to be effective on December 1, 1975. Registration granted in response to a request for exemption from one or more of the De-

V 40 N 217 NOV 10 75 XUM

terminations will not be effective for more than eighteen months from the date on which it is made effective and will not be granted to an applicant for which the Commission is not the appropriate regulatory agency unless the appropriate regulatory agency for the applicant first notifies the Commission that the agency has made the determination required by Section 19(a)(2)(A) of the Act.

Rule 17Ab2–1. Rule 17Ab2–1 requires a clearing agency to apply for registration or exemption from registration on, and in accordance with the instructions to, Form CA–1.

During the period from December 1, 1975 until the Commission grants or denies registration or grants an exemption from registration, applicants whose applications are filed on or before November 24, 1975 will be exempt from the registration requirements of the Act and the rules and regulations thereunder and, except as the Commission may otherwise provide by rule or by order, from the other requirements of the Act which would be applicable to clearing agencies as a result of registration.

The Rule provides that, if requested by an applicant, in granting registration of a clearing agency, the Commission may exempt the clearing agency from one or more of the requirements as to which the Commission is directed to make the Determinations but provides also that any such registration shall not be effective for more than eighteen months from the date on which the registration is made effective. Under the Rule, within nine months of the date on which an eighteen month registration is made effective, the Commission either must make all the Determinations with respect to the registered clearing agency or must institute proceedings to determine whether registration should be denied at the expiration of the eighteen month registration.

Under the Rule, the filing of an amendment to, or additional information in connection with, an application for registration or for exemption from registration as a clearing agency which registration or exemption has not been granted, extends to 90 days from the date of any such filing, the period within which the Commission is required to grant registration, institute proceedings to determine whether registration should be denied or grant an exemption. The Rule provides, also, for the updating of certain items on Form CA–1.

Form CA–1. Form CA–1 requires the clearing agency applying for registration or for exemption from registration under Section 17A of the Act to file with the Commission certain information in order to aid the Commission in determining that the requirements contained in Section 17A(b)(3) of the Act are satisfied or that an exemption is appropriate.

The information required by Form CA–1 includes the name and principal business address of the registrant, the registrant's form of organization and the date on which it was organized. Form CA–1 also requires the registrant to disclose any arrangements with others under which another person processes, keeps, transmits or maintains any securities, funds or records of the registrant with respect to the registrant's clearing agency activities. In addition, the Form requires information as to the types of insurance carried or provided by the registrant, the exposure of the registrant to loss if a participant fails to meet its obligations to the registrant, and the existence and amount of any securities differences.

Form CA–1 requires the registrant to file a series of exhibits including, among other things, a list of persons who directly or indirectly may control or direct the management or policies of the registrant; a list of the registrant's corporate officers who supervise or are directly responsible for the conduct of registrant's clearing agency activities; a narrative and graphic description of the registrant's organizational structure; a copy of the registrant's currently effective constitution, articles of incorporation or association, by-laws, rules, procedures and instruments corresponding thereto and a complete list of all dues, fees and other charges imposed by registrant for its clearing agency activities. The Form also requires information as to any material pending legal proceedings and copies of all contracts with any national securities exchange, national securities association, clearing agency or securities market for which the registrant performs clearing agency functions.

The Form further requires the inclusion, as an exhibit, of the most recent financial statements of the clearing agency.

In addition, the Form requires the inclusion of exhibits which demonstrate the operational capabilities of the registrant including: descriptions of each service or function performed by the registrant; descriptions of the measures or procedures employed by the registrant to provide for the security of any system which performs the functions of a clearing agency; a description of the measures or procedures employed by registrant to provide for the safeguarding of securities and funds in its custody or control; and a description of all back-up systems or subsystems which are designed to prevent interruption in the functions of the registrant as a result of technical or other malfunctions by the registrant's automated facilities.

With respect to access of participants to clearing agency services, the Form requires the inclusion of exhibits setting forth a list of current participants or persons who have applied for participation in the registrant's clearing agency's activities; a description of any specifications, qualifications, or other criteria which limit, are interpreted to limit, or have the effect of limiting access to, or use of, any clearing agency services furnished by the registrant; copies of any form of contract governing the terms by which persons may subscribe to clearing agency services; and a schedule of any prices, rates or fees fixed by registrant for services rendered by its participants.

Finally, if filed as an application for exemption from registration as a clearing agency, the Form requires the registrant to submit a statement demonstrating why grant of an exemption from registration would be consistent with the public interest, the protection of investors, and the purposes of Section 17A of the Act, including the prompt and accurate clearance and settlement of securities transactions and the safeguarding of securities and funds.

Receipt of Form CA–1 by the Commission. The Commission will acknowledge receipt of applications for registration or for exemption from registration on Form CA–1 filed with the Commission pursuant to Rule 17Ab2–1.

Statutory basis and competitive considerations. Rule 17Ab2–1 and Form CA–1 are adopted pursuant to Sections 2, 17, 17A, 19 and 23(a) of the Securities Exchange Act of 1934.[*] In accordance with Section 23(a) of the Act, the Commission has considered the impact which the adoption of Rule 17Ab2–1 and related Form CA–1 would have on competition and finds that the adoption of Rule 17Ab2–1 and Form CA–1 will not impose any burden on competition. The Commission has adopted Rule 17Ab2–1 and related Form CA–1, effective immediately, without general notice of rulemaking and without opportunity for public procedure, upon the Commission's findings, in accordance with the Administrative Procedure Act, 5 U.S.C. 553 (d)(3) and (b)(3)(B), that such action is necessary in order to provide an orderly and timely procedure for the registration or exemption from registration of clearing agencies and that the need to implement a registration procedure for clearing agencies makes notice and public procedure impracticable, unnecessary and contrary to the public interest.

Requests for comments. While the Commission has been unable to provide notice and public procedure with regard to the adoption of Rule 17Ab2–1 and Form CA–1, the Commission invites public comment on the Rule and Form as adopted and intends to review the Rule and Form in light of comments received. Comments should be submitted in triplicate, to George A. Fitzsimmons, Secretary, Securities and Exchange Commission, 500 North Capitol Street, Washington, D.C. 20549, not later than February 1, 1976. All communications should refer to File No. S7–600 and will be available for inspection in the Commission's Public Reference Room located at 1100 L Street, N.W., Washington, D.C.

1. Section 240.17Ab2–1, the text of Rule 17Ab2–1 is added as follows:

§ 240.17Ab2–1 Registration of clearing agencies.

(a) An application for registration or for exemption from registration as a clearing agency, as defined in section 3(a)(23) of the Act, or an amendment to any such application shall be filed with the Commission on Form CA–1, in accordance with the instructions thereto.

(b) Any applicant for registration or for exemption from registration as a clearing agency whose application is filed with the Commission on or before November 24, 1975, on and in accordance with the instructions to Form CA–1, with respect to the clearing agency activities described in the application shall, during the period from December 1, 1975 until the Commission grants registration, denies registration or grants an exemption from registration, be exempt from the registration provisions of Section 17A(b) of the Act and the rules and regulations thereunder and, unless the Commission shall otherwise provide by rule or by order, the provisions of the Act and the rules and regulations thereunder which would be applicable to clearing agencies as a result of registration under the Act.

(c)(1) The Commission, upon the request of a clearing agency, may grant registration of the clearing agency in accordance with Sections 17A(b) and 19(a)(1) of the Act but exempt the registrant from one or more of the requirements as to which the Commission is directed to make a determination pursuant to subparagraphs (A)–(I) of Section 17A(b)(3) of the Act, provided that any such registration shall be effective only for eighteen months from the date the registration is made effective (or such longer period as the Commission may provide by order).

(2) In the case of any clearing agency registered in accordance with paragraph (c)(1) of this section, not later than nine months from the date such registration is made effective the Commission either will grant registration in accordance with Sections 17A(b) and 19(a)(1) of the Act, without exempting the registrant from one or more of the requirements as to which the Commission is directed to make a determination pursuant to subparagraphs (A)–(I) of Section 17A(b)(3) of the Act, or will institute proceedings in accordance with Section 19(a)(1)(B) of the Act to determine whether registration should be denied at the expiration of the registration granted in accordance with paragraph (c)(1) of this section.

(d) The filing of an amendment to an application for registration or for exemption from registration as a clearing agency, which registration or exemption has not been granted, or the filing of additional information or documents prior to the granting of registration or an exemption from registration shall extend to ninety days from the date such filing is made (or to such longer period as to which the applicant consents) the period within which the Commission shall grant registration, institute proceedings to determine whether such registration shall be denied, or conditionally or unconditionally exempt registrant from the registration and other provisions of Section 17A of the Act or the rules or regulations thereunder.

(e) If any information reported at items 1–3 of Form CA–1 is or becomes inaccurate, misleading or incomplete for any reason, whether before or after registration or an exemption from registration has been granted, the registrant shall file promptly an amendment on Form CA–1 correcting the inaccurate, misleading or incomplete information.

(f) Every application for registration or for exemption from registration as a clearing agency or amendment to, or additional information or document filed in connection with, any such application shall constitute a "report" or "application" within the meaning of Sections 17, 17A, 19 and 32(a) of the Act.

2. Section 249b.200 (Form CA–1) is added as follows:

§ 249b.200 Form CA–1, form for registration or for exemption from registration as a clearing agency and for amendment to registration as a clearing agency pursuant to Section 17A of the Securities Exchange Act of 1934.

This form shall be used for application for registration or for exemption from registration as a clearing agency and for amendment to registration as a clearing agency pursuant to Section 17A of the Securities Exchange Act of 1934.

Copies of Form CA–1. Copies of Form CA–1 may be obtained from the Publications Section, Securities and Exchange Commission, 500 North Capitol Street, Washington, D.C. 20549 and at each of the Commission's regional offices.

By the Commission.

[SEAL] GEORGE A. FITZSIMMONS,
Secretary.

NOVEMBER 3, 1975.

The text of Form CA–1 reads as follows:

INSTRUCTION FOR USE OF FORM CA–1

APPLICATION FOR REGISTRATION OR FOR EXEMPTION FROM REGISTRATION AS A CLEARING AGENCY AND FOR AMENDMENT TO REGISTRATION PURSUANT TO THE SECURITIES EXCHANGE ACT OF 1934 ("THE ACT")

I. General Instructions for Preparing and Filing Form CA–1

1. Form CA–1 is to be used by clearing agencies, as defined in Section 3(a)(23) of the Act, which perform the functions of a clearing agency with respect to any security other than an exempted security, as defined in Section 3(a)(12) of the Act, to apply for registration or for exemption from registration or to amend registration with the Securities and Exchange Commission (the "Commission"). As used hereinafter, the term "Form CA–1" includes the form and any required schedules, exhibits or attachments thereto.

2. Clearing agencies are required to file four completed copies of Form CA–1 with the Commission, 500 North Capitol Street, Washington, D.C. 20549. In addition, with respect to a clearing agency for which the Commission is not the appropriate regulatory agency, as defined in Section 3(a)(34)(B) of the Act, Section 17(c)(1) of the Act requires such clearing agency to file with the appropriate regulatory agency for such clearing agency a signed copy of any application, document or report filed with the Commission. Each clearing agency should retain an exact copy of Form CA–1 for the clearing agency's records.

3. The date on which a Form CA–1 is received by the Commission shall be the date of filing thereof if all the requirements with respect to filing have been complied with. A Form CA–1 which is not prepared and executed in compliance with applicable requirements may be returned as not acceptable for filing. However, acceptance of Form CA–1 shall not constitute a finding that it has been filed as required or that the information submitted is true, current or complete.

4. Copies of Form CA–1 and the schedules, exhibits and attachments thereto may be duplicated and are acceptable for filing provided an *original, manual signature* is affixed to the execution section of each copy. Form CA–1 and the schedules, exhibits and attachments thereto may be duplicated by any method producing legible copies, of type size identical to that in the Form, on good quality, unglazed, white paper.

5. If Form CA–1 is filed by a corporation, it shall be signed in the name of the corporation by a principal officer duly authorized; if it is filed other than by a corporation it shall be signed by a duly authorized principal of the organization filing the Form. As used in this Form, principal officer means the president, vice president, treasurer, secretary, comptroller or any other person performing a similar function.

6. If the space provided for the answers to items 1–9 of Form CA–1 is insufficient, the complete answer shall be prepared on Schedule A, which shall be attached to the Form.

7. Individuals' names, except for executing signatures, shall be given in full wherever required (last name, first name, middle name). The full middle name is required. Initials are not acceptable unless the individual legally has only an initial.

8. Unless the context otherwise requires, "registrant" means the entity on whose behalf Form CA–1 is filed, whether filed as a registration, as an application for exemption from registration or as an amendment to a previously filed Form CA–1.

9. Unless the context clearly indicates otherwise, the terms used in Form CA–1 have the meanings given in the Act.

II. Instructions Relating to Filing Form CA–1 as a Registration Form or an Application for Exemption From Registration

10. If Form CA–1 is being filed as a registration form or an application for exemption from registration, all applicable items are required to be answered in full. If any item is not applicable, respond with "none" or "N/A" (not applicable), as appropriate.

11. If Form CA–1 is being filed as an application for exemption from registration, it must be accompanied by a statement demonstrating why the granting of an exemption from registration as a clearing agency would be consistent with the public interest, the protection of investors and the purposes of Section 17A of the Act.

III. Instructions Relating to Filing Form CA–1 as an Amendment to a Registration Form

12. Promptly following the date on which information reported at items 1–3 of Form CA–1 becomes inaccurate, incomplete or misleading, the registrant shall file an amendment on Form CA–1 correcting the inaccurate, incomplete or misleading information.

13. If an item is amended, the registrant must repeat all unamended items as they last appeared on the page on which the amended item appears and must file four copies of the new page, each with updated

[*] 15 U.S.C. 78b, 78q, 78q–1, 78s and 78(w)(a).

V 40 217 NOV 10 75 XUM

and properly completed cover and execution pages.

IV. *Instructions as to SPECIFIC ITEMS on Form CA–1*

14. *Cover page*—Indicate whether Form CA–1 is filed as a registration, an application for exemption from registration or an amendment. If the Form is filed as a registration, indicate whether the applicant requests the Commission to consider granting registration in accordance with paragraph (c)(1) of Rule 17Ab2–1.

15. *Item 1*—Include a street address; a post office box alone is not acceptable.

16. In responding to, and furnishing the schedules required by, the items on Form CA–1, particularly items 5(c)(ii) and 5(d)(ii) and the exhibits required by items 20 and 21, the registrant may request that confidential treatment be accorded with respect to the information disclosed, by binding the responses, schedules and exhibits for which confidential treatment is sought separately from the balance of Form CA–1 and furnishing a statement requesting confidential treatment, specifying both the exemptive provision under the Freedom of Information Act (5 U.S.C. 552 (b)) on which the request is based and the considerations which make the exemptive provision applicable to the information for which confidential treatment is requested.

V. *Notice*

17. Under Sections 17, 17A(b) and 23(a) of the Securities Exchange Act of 1934 and the rules and regulations thereunder, the Securities and Exchange Commission is authorized to solicit the information required to be supplied by this Form from applicants for registration or for exemption from registration as a clearing agency. Disclosure to the Commission of the information requested in Form CA–1 (except for the disclosure by an individual registrant of his Social Security number as an IRS Employee Identification Number, which is voluntary) is a prerequisite to the processing of applications for registration or for exemption from registration as a clearing agency. The information will be used for the principal purpose of determining whether the Commission should grant registration or an exemption from registration or institute proceedings to deny registration. Social Security members, if furnished, will be used only to assist the Commission in identifying applicants and, therefore, in promptly processing applications. Information supplied on this Form will be included routinely in the public files of the Commission.

FORM CA–1

FORM CA–1 FOR REGISTRATION OR FOR EXEMPTION FROM REGISTRATION AS A CLEARING AGENCY AND FOR AMENDMENT TO REGISTRATION AS A CLEARING AGENCY PURSUANT TO THE SECURITIES EXCHANGE ACT OF 1934

GENERAL FORM CA–1 is to be used to apply for registration or for exemption from registration as a clearing agency and to amend registration as a clearing agency with the Securities and Exchange Commission pursuant to Section 17A of the Securities Exchange Act of 1934. Read all instructions before preparing the Form. Please type or print all responses.

(Exact name of registrant as specified in charter)

(Address of registrant's principal place of business)

This Form is filed as:
A registration ____
A request for exemption from registration ____
An amendment ____

If filed as a registration, does registrant request the Commission to consider granting registration in accordance with paragraph (c)(1) of Rule 17Ab2–1 under the Act? ____ Yes ____ No

EXECUTION

The Registrant submitting this Form, its schedules, its exhibits and its attachments and the person by whom it is executed represent hereby that all information contained herein is true, current and complete. Submission of any amendment after registration has become effective represents that items 1–3 and any schedules, exhibits and attachments related to items 1–3 remain true, current and complete as previously submitted.

Registrant agrees and consents that the notice of any proceeding under Sections 17A or 19 of the Act involving registrant may be given by sending such notice by registered or certified mail or confirmed telegram to the person named, and at the address given, in response to Item 2.

Dated the ____ day of _____ 19__

Name of clearing agency

(Manual signature of Principal Officer or duly authorized Principal)

(Title)

ATTENTION: Intentional misstatements or omissions of facts constitute Federal Criminal Violations (See 18 U.S.C. 1001 and 15 U.S.C. 78ff(a)).

GENERAL INFORMATION

1. Exact name, principal business address, mailing address (if different) and telephone number of registrant:

Name of registrant:

IRS Empl. Ident. No.:

Name under which clearing agency activities are conducted, if different:

If name of registrant is hereby amended, state name under which registered previously:

If name under which clearing agency activities are conducted is hereby amended, state name given previously:

Address of principal place of business:

Number and Street City State Zip Code

Mailing Address, if different:

Number and Street City State Zip Code

Telephone Number:

Area Code Telephone Number

2. Name, title, mailing address and telephone number of person in charge of registrant's clearing agency activities:

Name Title

Number and Street

City State Zip Code

Telephone Number:

Area Code Telephone Number

3. (a) If registrant is a corporation or a national association: state date on which registrant was incorporated or organized and jurisdiction in which incorporated or under which organized:

Date:_____Jurisdiction:_____

(b) If registrant is not a corporation or a national association, describe on Schedule A the form of organization under which registrant conducts its business and identify the jurisdiction in which registrant is organized.

4. Does registrant have any arrangement with any other person under which, with respect to registrant's clearing agency activities, such other person processes, keeps, transmits or maintains any securities, funds, records or accounts of registrant or registrant's participants relating to clearing agency activities? ____ Yes ____ No

If the answer is "yes", furnish on Schedule A, as to each such arrangement, the full name and principal business address of the other person and a brief summary of each such arrangement.

5. (a) With respect to clearing agency activities, please provide the following information regarding the type of insurance carried or provided:

Type of insurance	Yes	No	Amount of coverage	Amount of deductible
1 Blanket bond				
2 Fidelity				
3 Errors and omissions				
4 Mail policy				
5 Air courier				
6 Lost instrument				
7 Other (please specify on schedule A)				

(b) If any of registrant's clearing agency activities are not covered by insurance, has provision been made for self-insurance? ____ Yes ____ No. If yes, indicate on Schedule A the provisions made for self-insurance (e.g., accounting reserve or funded reserve) and the amount thereof.

(c)(i) As a result of registrant's clearing agency activities, is registrant exposed to loss if a participant fails to perform its obligations to the clearing agency, any other participant or any other person? ____ Yes ____ No

(ii) If "yes", describe on Schedule A the operational, organizational or other rules, procedures or practices (citing rules if applicable) which result in registrant's exposure to loss.

(d)(i) Does the registrant maintain a clearing or participants' fund, mark to the market open obligations involving the purchase or sale of securities or otherwise require participants to protect registrant against losses to which it may be exposed as a result of a participant's failure to perform its obligations to the clearing agency, any other participant or any other person? ____ Yes ____ No

(ii) If "yes", describe on Schedule A the operational, organizational or other rules, procedures or practices (citing rules if applicable) which are designed to protect registrant against any such losses.

6. (a) Is registrant audited by an independent accountant? ____ Yes ____ No

(b) If registrant is audited by an independent accountant, does the audit include a review of internal controls related to clearing agency activities? ____ Yes ____ No

(c) Fiscal year end of registrant

_____/_____
Month Day

7. (a) What are registrant's internal policies and procedures for reconciling differences (including long and short stock record differences and dividend differences) in its clearing agency activities? (Describe on Schedule A.)

(b) State, as of September 30, 1975, the dollar amount of the potential exposure of registrant, if any, as a result of differences (without offsetting long differences against short differences and without offsetting any suspense account items) in its clearing agency activities not resolved after 20 business days. $_____

8. (a) How many employees does registrant have engaged in clearing agency activities?

(b) How many years has registrant performed clearing agency activities?

9. (a) Are registrant's clearing agency activities subject to regulation by any federal agency other than the Commission or by any state or political subdivision? ____ Yes ____ No. If yes, specify the name of the agency, state or political subdivision:
Name of Agency, State or Political Subdivision:

(b) Have the registrant's clearing agency activities been the subject of periodic examinations by any federal agency other than the Commission or by any state or political subdivision? ____ Yes ____ No. If yes, specify the name of the agency, state or political subdivision.
Name of Agency, State or Political Subdivision:

SCHEDULE A OF FORM CA–1

1. Full name of Registrant as stated in Item 1 of Form CA–1.

2. Item of Form (Identify) Response

EXHIBITS—BUSINESS ORGANIZATION

10. List in Exhibit A any person who either directly or indirectly, through agreement or otherwise, may control or direct the management or policies of registrant. For each person listed, provide the full name and address and attach a copy of each written agreement or, if the agreements are unwritten, describe the agreement or arrangement through which such person exercises or may exercise such control or direction.

11. List in Exhibit B the registrant's corporate officers, trust officers, managers or other persons occupying a similar status or performing similar functions who supervise, or are directly responsible for the conduct of, registrant's clearing agency activities, indicating for each:

(a) Name, (b) Title, (c) Area of responsibility, and (d) A brief account of the business experience during the last five (5) years.

12. Attach as Exhibit C narrative and graphic descriptions of registrant's organizational structure. If clearing agency activities are conducted primarily by a division, subdivision, or other segregable entity within the registrant corporation or organization, identify the relationship of such entity to the registrant's overall organizational structure and limit the descriptions to the division, subdivision or other segregable entity which performs clearing agency activities.

13. Attach as Exhibit D a list of persons who directly or indirectly, through one or more intermediaries, are controlled by, or are under common control with, the clearing agency and indicate the nature of the control relationship.

14. Attach as Exhibit E a copy of the currently effective constitution, articles of incorporation or association, by-laws, rules, procedures and instruments corresponding thereto, of the registrant and a complete list of all dues, fees and other charges imposed by registrant for its clearing agency activities.

15. Attach as Exhibit F a brief description of any material pending legal proceeding, other than ordinary and routine litigation incidental to the business, to which the registrant or any of its subsidiaries is a party or to which any of its or their property is the subject. Include the name of the court or agency in which the proceeding is pending, the date instituted, and the principal parties thereto, a description of the factual basis alleged to underlie the proceeding and the relief sought. Include similar information as to any such proceeding known to be contemplated by governmental agencies.

16. Attach as Exhibit G copies of all contracts with any national securities exchange, national securities association or clearing agency or securities market for which the registrant acts as a clearing agency or performs clearing agency functions.

EXHIBITS—FINANCIAL INFORMATION

17. Attach as Exhibit H a balance sheet and statement of income and expenses, and all notes or schedules thereto of registrant, as of registrant's most recent fiscal year for which such information is available, certified by an independent accountant. (If certified financial information is not available, uncertified financial information should be submitted).

18. Attach as Exhibit I the addresses of all offices in which clearing agency activities are performed by registrant, or for registrant by any person listed in response to item 4, and identify the nature of the clearing activities performed in each office listed.

EXHIBITS—OPERATIONAL CAPABILITY

19. Attach as Exhibit J narrative descriptions of each service or function performed by the registrant.

20. Attach as Exhibit K a description of the measures or procedures employed by registrant to provide for the security of any system which performs the functions of a clearing agency. Include a general description of any operational safeguards designed to prevent unauthorized access to the system (including unauthorized input or retrieval of information for which the primary record source is not hard copy). Identify any instances within the past year in which the described security measures or safeguards failed to prevent unauthorized access to the system and describe any measures taken to prevent a recurrence of any such incident. Describe also any measures used to verify the accuracy of information received or disseminated by the system.

21. Attach as Exhibit L a description of the measures or procedures employed by registrant to provide for the safeguarding of securities and funds in its custody or control. Identify any instances within the past year in which the described security measures or safeguards failed to prevent any unauthorized access to securities or funds in possession of registrant and any measures taken to prevent a recurrence of any such incident.

22. If clearing agency functions are performed by automated facilities or systems, attach as Exhibit M a description of all backup systems or subsystems which are designed to prevent interruptions in the performance of any function as a result of technical or other malfunction. Include backups for input or output links to the system and precautions with respect to malfunctions in any areas external to the system.

EXHIBITS—ACCESS TO SERVICES

23. Attach as Exhibit N a list of the persons who currently participate, or who have applied for participation, in registrant's clearing agency activities (if registrant performs more than one activity, a columnar presentation may be utilized).

24. Attach as Exhibit O a description of any specifications, qualifications, or other criteria which limit, are interpreted to limit, or have the effect of limiting access to, or use of, any clearing agency service furnished by the registrant and state the reasons for imposing such specifications, qualifications, or other criteria.

25. Attach as Exhibit P copies of any form of contracts governing the terms on which persons may subscribe to clearing agency services provided by the registrant.

26. Attach as Exhibit Q a schedule of any prices, rates or fees fixed by registrant for services rendered by its participants.

27. Attach as Exhibit R a schedule of any prohibitions or limitations imposed by the clearing agency on access by any person to services offered by any participant.

EXHIBIT—APPLICATION FOR EXEMPTION

28. If this is an application for an exemption from registration as a clearing agency, attach as Exhibit S a statement demonstrating why the granting of an exemption from registration as a clearing agency would be consistent with the public interest, the protection of investors and the purposes of Section 17A of the Act, including the prompt and accurate clearance and settlement of securities transactions and the safeguarding of securities and funds.

[Docket No. 75N–0068]

RADIOACTIVE BIOLOGICAL PRODUCTS

Reassignment of Responsibility

Correction

On page 43488, in the issue for Monday, September 22, 1975, a correction was published for FR Doc. 75–19315, which appeared originally at page 31311, in the issue for Friday, July 25, 1975. There were several errors in the correction, therefore the following changes should be made:

1. The docket number, which now reads "Docket No. 75N–0067", should be changed to read: "Docket No. 75N–0068".

2. The heading reading "RADIOACTIVE NEW DRUGS AND RADIOACTIVE BIOLOGICS", should read "RADIOACTIVE BIOLOGICAL PRODUCTS".

3. The heading reading "Termination of Exemptions" should read "Reassignment of Responsibility".

4. The page number which reads 31298 should read "31311".

Title 24—Housing and Urban Development

CHAPTER X—FEDERAL INSURANCE ADMINISTRATION

[Docket No. FI-746]

PART 1920—PROCEDURE FOR MAP CORRECTION

Letter of Map Amendment for the City of Fort Smith, Arkansas

On August 28, 1971, in 36 FR 17335, the Federal Insurance Administrator published a list of communities with Special Flood Hazard Areas and the map number and locations where Flood Insurance Rate Maps were available for public inspection. This list included the City of Fort Smith, Arkansas, as an eligible community and included Map No. H 055013 13 which indicates that Lot 121, Village Harbor Phase II, Fort Smith, Arkansas, as recorded in Plat Record 347 in the office of the Circuit Clerk and Ex-officio Recorder of Sebastian County, Arkansas, is in its entirety within the Special Flood Hazard Area. It has been determined by the Federal Insurance Administration, after further technical review of the above map in light of additional, recently acquired flood information, that the structure on the above property is within Zone C, and not within the Special Flood Hazard Area. The map amendment is not based on the placement of fill on the above named property after the effective date of the Flood Insurance Rate Map of the community. Accordingly, effective December 29, 1970, Map No. H 055013 13 is hereby corrected to reflect that the structure on the above property is not within the Special Flood Hazard Area.

(National Flood Insurance Act of 1968 (Title XIII of Housing and Urban Development Act of 1968), effective January 28, 1969 (33 F.R. 17804, November 28, 1968), as amended, 42 U.S.C. 4001–4128; and Secretary's delegation of authority to Federal Insurance Administrator 34 F.R. 2680, February 27, 1969, as amended by 39 F.R. 2787, January 24, 1974).

Issued: October 21, 1975.

RICHARD W. KRIMM,
Acting Federal Insurance Administrator.

[Docket No. FI-321]

PART 1920—PROCEDURE FOR MAP CORRECTION

Letter of Map Amendment for the City of Fullerton, California

On August 6, 1974, in 39 F.R. 28249, the Federal Insurance Administrator published a list of communities with Special Flood Hazard Areas and the map number and locations where Flood Hazard Boundary Maps were available for public inspection. This list included the City of Fullerton, California, as an eligible community and included Map No. H 060219 07, which indicates that Lot Nos. 1 through 27, 30 through 36, and 39 through 71, in Tract No. 8526, Fullerton, California, as recorded in Book 355, Pages 1 through 4, of Miscellaneous Maps, Records of Orange County, California, are in their entirety within the Special Flood Hazard Area. It has been determined by the Federal Insurance Administration, after further technical review of the above map in light of additional, recently acquired flood information, that the above mentioned property is not within the Special Flood Hazard Area. Accordingly, effective June 28, 1974, Map No. H 060219 07 is hereby corrected to reflect that the above lots are not within the Special Flood Hazard Area.

(National Flood Insurance Act of 1968 (Title XIII of Housing and Urban Development Act of 1968), effective January 28, 1969 (33 F.R. 17804, November 28, 1968), as amended, 42 U.S.C. 4001–4128; and Secretary's delegation of authority to Federal Insurance Administrator 34 F.R. 2680, February 27, 1969, as amended by 39 F.R. 2787, January 24, 1974.)

Issued: October 22, 1975.

[Docket No. FI-747]

PART 1920—PROCEDURE FOR MAP CORRECTION

Letter of Map Amendment for the City of Wheat Ridge, Colorado

On May 26, 1972, in 37 FR 10668, the Federal Insurance Administrator published a list of communities with Special Flood Hazard Areas and the map number and locations where Flood Insurance Rate Maps were available for public inspection. This list included the City of Wheat Ridge, Colorado, as an eligible community and included Map No. H 085079 03, which indicates that Lot 14, Daniels Subdivision, Wheat Ridge, Colorado, as recorded in Book 21, Page 49, in the office of the Clerk and Recorder of Jefferson County, Colorado, is in its entirety within the Special Flood Hazard Area. It has been determined by the Federal Insurance Administration, after further technical review of the above map in light of additional, recently acquired flood information, that the above mentioned property is within Zone C, and is not within the Special Flood Hazard Area. The map amendment is not based on the placement of fill on the above named property after the effective date of the Flood Insurance Rate Map of the community. Accordingly, effective May 26, 1972, Map No. H 085079 03 is hereby corrected to reflect that the above property is not within the Special Flood Hazard Area.

(National Flood Insurance Act of 1968 (Title XIII of Housing and Urban Development Act of 1968), effective January 28, 1969 (33 F.R. 17804, November 28, 1968), as amended, 42 U.S.C. 4001–4128; and Secretary's delegation of authority to Federal Insurance Administrator 34 F.R. 2680, February 27, 1969, as amended by 39 F.R. 2787, January 24, 1974.)

Issued: October 21, 1975.

[Docket No. FI-326]

PART 1920—PROCEDURE FOR MAP CORRECTION

Letter of Map Amendment for the Town of Old Saybrook, Connecticut

On August 7, 1974, in 39 FR 28424, the Federal Insurance Administrator published a list of communities with Special Flood Hazard Areas and the map number and locations where Flood Hazard Boundary Maps were available for public inspection. This list included the Town of Old Saybrook, Connecticut, as an eligible community and included Map No. H 090069 01, which indicates that the existing structure on Lot No. 7 in the subdivision of land of Betsy Hatch Hill, Old Saybrook, Connecticut, as recorded in Volume 167, Page 536, in the office of the Town Clerk, Old Saybrook, Connecticut, is in its entirety within the Special Flood Hazard Area. It has been determined by the Federal Insurance Administration, after further technical review of the above map in light of additional, recently acquired flood information, that the above mentioned structure is not within the Special Flood Hazard Area. Accordingly, effective July 26, 1974, Map No. H 090069 01 is hereby corrected to reflect that the above structure is not within the Special Flood Hazard Area.

(National Flood Insurance Act of 1968 (Title XIII of Housing and Urban Development Act of 1968), effective January 28, 1969 (33 FR 17804, November 28, 1968), as amended, 42 U.S.C. 4001–4128; and Secretary's delegation of authority to Federal Insurance Administrator 34 FR 2680, February 27, 1969, as amended by 39 FR 2787, January 24, 1974.)

Issued: October 22, 1975.

PART 1920—PROCEDURE FOR MAP CORRECTION

Letter of Map Amendment for the City of Indianapolis, Indiana

On May 17, 1974, in 39 F.R. 17518, the Federal Insurance Administrator published a list of communities with Special Flood Hazard Areas and the map number and locations where Flood Hazard Boundary Maps were available for public inspection. This list included the City of Indianapolis, Indiana, as an eligible community and included Map Nos. H 180159 61 and 69 which indicate that Timbers III Subdivision, Indianapolis, Indiana, recorded as Instrument No. 75 43967 in the office of the Recorder of Marion County, Indiana, is in its entirety within the Special Flood Hazard Area. It has been determined by the Federal Insurance Administration, after further technical review of the above map in light of additional, recently acquired flood information, that the above property is not within the Special Flood Hazard Area. Accordingly, effective May 17, 1974, Map Nos. H 180159 61 and 69 are hereby corrected to reflect that the above property is not within the Special Flood Hazard Area.

(National Flood Insurance Act of 1968 (Title XIII of Housing and Urban Development Act of 1968), effective January 28, 1969 (33 F.R. 17804, November 28, 1968), as amended, 42 U.S.C. 4001–4128; and Secretary's delegation of authority to Federal Insurance Administrator 34 F.R. 2680, February 27, 1969, as amended by 39 F.R. 2787, January 24, 1974).

Issued: October 20, 1975.

RICHARD W. KRIMM,
Acting Federal Insurance Administrator.

PART 1920—PROCEDURE FOR MAP CORRECTION

Letter of Map Amendment for the City of New Braunfels, Texas

On December 2, 1972, in 37 FR 25711, the Federal Insurance Administrator published a list of communities with Special Flood Hazard Areas and the map number and locations where Flood Insurance Rate Maps were available for public inspection. This list included the City of New Braunfels, Texas, as an eligible community and included Map No. H 485493 07 which indicates that 645 Rock Street, New Braunfels, Texas, as recorded in Volume 152, Pages 205 through 207 in the office of the Clerk of Comal County, Texas, is in its entirety within the Special Flood Hazard Area. It has been determined by the Federal Insurance Administration, after further technical review of the above map in light of additional, recently acquired flood information, that the above property is within Zone C, and not within the Special Flood Hazard Area. The map amendment is not based on the placement of fill on the above named property after the effective date of the Flood Insurace Rate Map of the community. Accordingly, effective December 4, 1972, Map No. H 485493 07 is hereby corrected to reflect that the above property is not within the Special Flood Hazard Area.

(National Flood Insurance Act of 1968 (Title XIII of Housing and Urban Development Act of 1968), effective January 28, 1969 (33 FR 17804, November 28, 1968), as amended, 42 U.S.C. 4001–4128; and Secretary's delegation of authority to Federal Insurance Adminis-

PART 1920—PROCEDURE FOR MAP CORRECTION

Letter of Map Amendment for the City of Lakewood, Colorado

On July 20, 1972, in 37 FR 14387 and 14388, the Federal Insurance Administrator published a list of communities with Special Flood Hazard Areas and the map number and locations where Flood Insurance Rate Maps were available for public inspection. This list included the City of Lakewood, Colorado, as an eligible community and included Map No. H 085075 06, which indicates that Lot 37, Block 11, Meadowlark Hills, Lakewood, Colorado, as recorded in Book 12, Page 2, in the office of the Clerk and Recorder of Jefferson County, Colorado, is in its entirety within the Special Flood Hazard Area. It has been determined by the Federal Insurance Administration, after further technical review of the above map in light of additional, recently acquired flood information, that the above mentioned property is within Zone B, and is not within the Special Flood Hazard Area. The map amendment is not based on the placement of fill on the above named property after the effective date of the Flood Insurance Rate Map of the community. Accordingly, effective July 21, 1972, Map No. H 085075 06 is hereby corrected to reflect that the above property is not within the Special Flood Hazard Area.

(National Flood Insurance Act of 1968 (Title XIII of Housing and Urban Development Act of 1968), effective January 28, 1969 (33 FR 17804, November 28, 1968), as amended, 42 U.S.C. 4001–4128; and Secretary's delegation of authority to Federal Insurance Administrator 34 FR 2680, February 27, 1969, as amended by 39 FR 2787, January 24, 1974.)

Issued: October 14, 1975.

J. ROBERT HUNTER,
Acting Federal Insurance Administrator.

[Docket No. FI-764]

PART 1920—PROCEDURE FOR MAP CORRECTION

Letter of Map Amendment for the County of Mobile, Alabama

On January 8, 1972, in 37 FR 281, the Federal Insurance Administrator published a list of communities with Special Flood Hazard Areas and the map number and locations where Flood Insurance Rate Maps were available for public inspection. This list included the County of Mobile, Alabama, as an eligible community and included Map No. H 015008 25, which indicates that the subdivision known as Adobe Ridge Estates Unit Two, Mobile County, Alabama, as recorded in Map Book 25, Page 103, in the office of the Judge of the Probate Court of Mobile County, Alabama, is in its entirety within the Special Flood Hazard Area. It has been determined by the Federal Insurance Administration, after further technical review of the above map in light of additional, recently acquired flood information, that the above mentioned property is within Zone C, and is not within the Special Flood Hazard Area. The map amendment is not based on the placement of fill on the above named property after the effective date of the Flood Insurance Rate Map of the community. Accordingly, effective December 15, 1970, Map No. H 015008 25 is hereby corrected to reflect that the above property is not within the Special Flood Hazard Area.

(National Flood Insurance Act of 1968 (Title XIII of Housing and Urban Development Act of 1968), effective January 28, 1969 (33 FR 17804, November 28, 1968), as amended, 42 U.S.C. 4001–4128; and Secretary's delegation of authority to Federal Insurance Administrator 34 FR 2680, February 27, 1969, as amended by 39 FR 2787, January 24, 1974.)

Issued: October 14, 1975.

J. ROBERT HUNTER,
Acting Federal Insurance Administrator.

[Docket No. FI-763]

PART 1920—PROCEDURE FOR MAP CORRECTION

Letter of Map Amendment for the County of New Castle, Delaware

On December 7, 1971, in 36 FR 23215, the Federal Insurance Administrator published a list of communities with Special Flood Hazard Areas and the map number and locations where Flood Insurance Rate Maps were available for public inspection. This list included the County of New Castle, Delaware, as an eligible community and included Map No. H 105085 07, which indicates that property in New Castle County, Delaware, known as Fairfield Section 3, Lot 351, as recorded on Microfilm No. 884; and Section 4, Lots 433, 486, and 488, as recorded on Microfilm No. 1409, in the office of the Recorder of Deeds of New Castle County, Delaware, are in their entirety within the Special Flood Hazard Area. It has been determined by the Federal Insurance Administration, after further technical review of the above map in light of additional, recently acquired flood information, that the above mentioned property is within Zone C, and is not within the Special Flood Hazard Area. The map amendment is not based on the placement of fill on the above named property after the effective date of the rate map. Accordingly, effective June 6, 1970, Map No. H 105085 07 is hereby corrected to reflect that the above property is not within the Special Flood Hazard Area.

(National Flood Insurance Act of 1968 (Title XIII of Housing and Urban Development Act of 1968), effective January 28, 1969 (33 FR 17804, November 28, 1968), as amended, 42 U.S.C. 4001–4128; and Secretary's delegation of authority to Federal Insurance Administrator 34 FR 2680, February 27, 1969, as amended by 39 FR, 2787, January 24, 1974.)

Issued: October 14, 1975.

J. ROBERT HUNTER,
Acting Federal Insurance Administrator.

Letter of Map Amendment for the County of New Castle, Delaware

[Docket No. FI-771]

On December 7, 1971, in 36 F.R. 23215, the Federal Insurance Administrator published a list of communities with Special Flood Hazard Areas and the map number and locations where Flood Insurance Rate Maps were available for public inspection. This list included New Castle County, Delaware, as an eligible community and included Map No. H 105085 08, which indicates that parts of the subdivision called Glasgow Pines, as recorded on Microfilm No. 2384, Sheets 1–4 and 6–8, in the Office of the Recorder of Deeds of New Castle County, Delaware, are in their entirety within the Special Flood Hazard Area. It has been determined by the Federal Insurance Administration, after further technical review of the above map in light of additional, recently acquired flood information, that the property recorded on Microfilm No. 2384, Sheets 1, 3, 4, and 6; buildings B–7 and B–11 on property recorded on Sheet 2; the existing structure on the property northeast of Scotland Drive, and lots 1–13, 25, 26, and 61–67, recorded on Sheet 7; and lots 14, 15, 18, 21–24, 27–31, 34–40, and 46–60, recorded on Sheet 8, are within Zone C, and are not within the Special Flood Hazard Area. The map amendment is not based on the placement of fill on the above named property after the effective date of the rate map. Accordingly, effective June 6, 1970 Map No. H 105085 08 is hereby corrected to reflect that the above property and structures are not within the Special Flood Hazard Area.

(National Flood Insurance Act of 1968 (Title XIII of Housing and Urban Development Act of 1968), effective January 28, 1969 (33 FR 17804, November 28, 1968), as amended, 42 U.S.C. 4001–4128; and Secretary's delegation of authority to Federal Insurance Administrator 34 FR 2680, February 27, 1969, as amended by 39 FR 2787, January 24, 1974).

Issued: October 15, 1975.

PART 1920—PROCEDURE FOR MAP CORRECTION

Letter of Map Amendment for Fairfax County, Virginia

On January 8, 1972, in 37 FR 281, the Federal Insurance Administrator published a list of communities with Special Flood Hazard Areas and the map number and locations where Flood Insurance Rate Maps were available for public inspection. This list included Fairfax County, Virginia, as an eligible community and included Map No. H 515525 21 which indicates that Lot 9, Section 2, Country Club Manor, being 14932 Greymont Drive, Centreville, Fairfax County, Virginia, as recorded in Deed Book 2901, Page 286 in the office of the Clerk of the Court of Fairfax County, Virginia, is in its entirety within the Special Flood Hazard Area. It has been determined by the Federal Insurance Administration, after further technical review of the above map in light of additional, recently acquired flood information, that the above property is within Zone C, and not within the Special Flood Hazard Area. The map amendment is not based on the placement of fill on the above named property after the effective date of the Flood Insurance Rate Map of the community. Accordingly, effective June 17, 1970, Map No. H 515525 21 is hereby corrected to reflect that the above property is not within the Special Flood Hazard Area.

(National Flood Insurance Act of 1968 (Title XIII of Housing and Urban Development Act of 1968), effective January 28, 1969 (33 FR 17804, November 28, 1968), as amended, 42 U.S.C. 4001–4128; and Secretary's delegation of authority to Federal Insurance Administrator 34 FR 2680, February 27, 1969, as amended by 39 FR 2787, January 24, 1974.)

PART 1920—PROCEDURE FOR MAP CORRECTION

Letter of Map Amendment for Virginia Beach, Virginia

On October 3, 1970, in 35 FR 15442, the Federal Insurance Administrator published a list of communities with Special Flood Hazard Areas and the map number and locations where Flood Insurance Rate Maps were available for public inspection. This list included Virginia Beach, Virginia, as an eligible community and included Map No. H 515531A 13 which indicates that the lot located at 3932 Richardson Road, Virginia Beach, Virginia, as recorded in Plat Map Book 17, Page 71 in the office of the Clerk of Virginia Beach, Virginia, is in its entirety within the Special Flood Hazard Area. It has been determined by the Federal Insurance Administration, after further technical review of the above map in light of additional, recently acquired flood information, that the structure on the above property is within Zone C, and not within the Special Flood Hazard Area. The map amendment is not based on the placement of fill on the above named property after the effective date of the Flood Insurance Rate Map of the community. Accordingly, effective September 8, 1970, May No. H 515531A 13 is hereby corrected to reflect that the structure on the above property is not within the Special Flood Hazard Area.

(National Flood Insurance Act of 1968 (Title XIII of Housing and Urban Development Act of 1968), effective January 28, 1969 (33 FR 17804, November 28, 1968), as amended, 42 U.S.C. 4001–4128; and Secretary's delegation of authority to Federal Insurance Administrator 34 FR 2680, February 27, 1969, as amended by 39 FR 2787, January 24, 1974).

Issued: October 14, 1975.

J. ROBERT HUNTER,
Acting Federal Insurance Administrator.

PART 1920—PROCEDURE FOR MAP CORRECTION

Letter of Map Amendment for the Town of Bedford, Massachusetts

On September 7, 1973, in 38 FR 24358, the Federal Insurance Administrator published a list of communities with Special Flood Hazard Areas and the map number and locations where Flood Insurance Rate Maps were available for public inspection. This list included the Town of Bedford, Massachusetts, as an eligible community and included Map No. H 255209 02, which indicates that Lot 8–A, Bedford, Massachusetts, as recorded in Book 10222, Page End, in the office of the Register of Deeds of Middlesex County, Massachusetts, is in its entirety within the Special Flood Hazard Area. It has been determined by the Federal Insurance Administration, after further technical review of the above map in light of additional, recently acquired flood information, that the existing structure on the above mentioned property is within Zone C, and is not within the Special Flood Hazard Area. The map amendment is not based on the placement of fill on the above named property after the effective date of the Flood Insurance Rate Map of the community. Accordingly, effective September 7, 1973, Map No. H 255209 02 is hereby corrected to reflect that the structure on the above property is not within the Special Flood Hazard Area.

(National Flood Insurance Act of 1968 (Title XIII of Housing and Urban Development Act of 1968), effective January 28, 1969 (33 FR 17804, November 28, 1968), as amended, 42 U.S.C. 4001–4128; and Secretary's delegation of authority to Federal Insurance Administrator 34 FR 2680, February 27, 1969, as amended by 39 FR 2787, January 24, 1974.)

Issued: October 14, 1975.

J. ROBERT HUNTER,
Acting Federal Insurance Administrator.

[Docket No. FI-770]

PART 1920—PROCEDURE FOR MAP CORRECTION

Letter of Map Amendment for the Town of Largo, Florida

On May 27, 1971, in 36 FR 9632, the Federal Insurance Administrator published a list of communities with Special Flood Hazard Areas and the map number and locations where Flood Insurance Rate Maps were available for public inspection. This list included the Town of Largo, Florida, as an eligible community and included Map No. H 125122 02, which indicates that Lot B of the subdivision known as Pine Crest Estates, Pinellas County, Florida, as recorded in Plat 54, Page 69, in the Court House of Pinellas County, Florida, is in its entirety within the Special Flood Hazard Area. It has been determined by the Federal Insurance Administration, after further technical review of the above map in light of additional, recently acquired flood information, that the above mentioned property is within Zone C, and is not within the Special Flood Hazard Area. The map amendment is not based on the placement of fill on the above named property after the effective date of the rate map. Accordingly, effective August 7, 1970, Map No. H 125122 02 is hereby corrected to reflect that the above property is not within the Special Flood Hazard Area.

(National Flood Insurance Act of 1968 (Title XIII of Housing and Urban Development Act of 1968), effective January 28, 1969 (33 FR 17804, November 28, 1968), as amended, 42 U.S.C. 4001–4128; and Secretary's delegation of authority to Federal Insurance Administrator 34 FR 2680, February 27, 1969, as amended by 39 FR 2787, January 24, 1974.)

Issued: October 15, 1975.

J. ROBERT HUNTER,
Acting Federal Insurance Administrator.

Title 29—Labor

CHAPTER XVII—OCCUPATIONAL SAFETY AND HEALTH ADMINISTRATION, DEPARTMENT OF LABOR

PART 1952—APPROVED STATE PLANS FOR ENFORCEMENT OF STATE STANDARDS

Approval of Oregon State Poster

1. *Background.* Part 1953 of Title 29, Code of Federal Regulations, provides procedures under section 18 of the Occupational Safety and Health Act of 1970 (29 U.S.C. 667) (hereinafter referred to as the Act) for review of changes and progress in the development and implementation of State plans which have been approved in accordance with section 18(c) of the Act and Part 1902 of this chapter. On December 28, 1972, a notice was published in the FEDERAL REGISTER (37 FR 28628) of the approval of the Oregon plan and the adoption of Subpart D to Part 1952 containing the decision. The notice of Approval of Revised Developmental Schedule was published on April 1, 1974, in the FEDERAL REGISTER (39 FR 11881). On June 5, 1974, the State of Oregon submitted a supplement to the plan involving a developmental change (see Subpart B of 29 CFR Part 1953). Final approval of this supplement was delayed pending the adoption of appropriate regulations on requirements for approval of State posters (see Subpart A of 29 CFR Part 1952 as amended November 5, 1974, (39 FR 39036)).

2. *Description of the supplement.* The supplement contains the Oregon State Poster which is to be posted at all covered workplaces in the State. Among other things, the poster contains provisions notifying employees of their obligations and protections under the Oregon Safe Employment Act (hereinafter called OSEA), their right to request workplace inspections and their right to remain anonymous as a result, their right to participate in inspections, their protection against discharge or discrimination under State law for the exercise of their rights under State law and their right to file complaints with the Occupational Safety and Health Administration concerning the administration of the State program. The Oregon State Poster meets all the criteria of Subpart A of 29 CFR Part 1952 with the exception of 29 CFR 1952.10(a) (5) (vi)—protection against discharge or discrimination under Federal law. According to Field Information

V 40 217 NOV 10 75 XUM

Memorandum #75-5, dated January 14, 1975, States with posters printed prior to the issuance of final regulations were provided a period of one year to correct deficiencies in State posters and, in the interim, provide an alternative method of complying with Subpart A of 29 CFR 1952.10. The State of Oregon has provided the following assurances: (a) the State will reprint posters including the employee discrimination provision by June 22, 1976, and (b) the State will, in the interim, notify each complainant at the time of complaint, that they also have a right to file a discrimination complaint with the Assistant Secretary of Labor for Occupational Safety and Health (hereinafter referred to as the Assistant Secretary) under section 1(c) of the Act.

3. *Location of the plan and its supplement for inspection and copying.* A copy of the poster, along with the approved plan, may be inspected and copied during normal business hours at the following locations: Technical Data Center, Room N-3620, 200 Constitution Avenue NW., Washington, D.C. 20210; Office of the Assistant Regional Director, Occupational Safety and Health Administration, Room 6048, 909 First Avenue, Federal Office Building, Seattle, Washington 98174; Workmen's Compensation Board, Labor and Industries Building, Room 204, Salem, Oregon 97310.

4. *Public participation.* Under § 1953.2 of this chapter, the Assistant Secretary may prescribe alternative procedures to expedite the review process or for any other good cause which may be consistent with applicable law. The Assistant Secretary finds that the Oregon Poster and assurances from the State as stated above incorporate all of the provisions required under 29 CFR 1952.10(a)(5) and 29 CFR 1903.2(a)(3) (39 FR 39306, November 5, 1974). Accordingly, it is believed that further opportunity for public comment and notice is unnecessary.

5. *Decision.* After careful consideration, the Oregon plan supplement outlined above is approved under Part 1953. This decision incorporates the requirements of the Act and implementing regulations applicable to State plans generally. In addition, Subpart D of 29 CFR Part 1952 is amended to reflect the completion of a developmental step upon the approval of the State Poster. Accordingly, § 1952.109 of Subpart D of Part 1952, for the reason stated in 4 above, is hereby amended as follows:

§ 1952.109 Completed developmental step.

* * * * *

(b) In accordance with the requirements of § 1952.10, the Oregon State Poster with assurances submitted on September 2, 1975, was approved by the Assistant Secretary on November 5, 1975.

Signed at Washington, D.C. this 5th day of November 1975.

JOHN T. DUNLOP,
Secretary of Labor.

[FR Doc.75-30192 Filed 11-7-75;8:45 am]

Title 35—Panama Canal

CHAPTER I—CANAL ZONE REGULATIONS

PART 5—PUBLIC LANDS; MILITARY RESERVATIONS

Revision of Boundaries of Certain Military Reservations

This document amends the regulations describing the boundaries of two military reservations in the Canal Zone. The amendment transfers certain lands from the Coco Solo Naval Reservation to the Fort Gulick Army Reservation because the subject lands have been declared surplus to the needs of the Department of the Navy.

§ 5.28 [Amended]

In 35 CFR Part 5, § 5.28(a) is amended as follows:

(a) In the portion of § 5.28(a) that is designated "Parcel No. 3," the last three unnumbered paragraphs (which begin: "The directions of the lines . . .") are deleted.

(b) Add, immediately under the above description of Parcel No. 3, the following description of new Parcel No. 4 of Fort Gulick Army Reservation.

PARCEL NO. 4

Beginning at monument B–12, which is a monel plug, located in the back of a curb on the southwesterly side of Johnston Avenue, at its intersection with the southwesterly prolongation of the southeasterly curb of Fulton Road, near the Southeasterly corner of Building No. 5, the geodetic position of which, referred to the Canal Zone triangulation system is in latitude 9°22′ N. plus 2,291.2 feet and longitude 79°53′ W., plus 525.2 feet from Greenwich;

Thence from said initial point by metes and bounds:

S. 34°20′00″ E., 179.6 feet, along the back of the curb on the southwesterly side of Johnston Avenue to monument B–12–1, which is a monel plug;

S. 11°30′30″ E., 58.6 feet, to monument B–12–2, which is a monel plug in the pavement at the intersection of Johnston Avenue, Maile Street, and Molten Avenue;

S. 11°18′45″ W., 899.0 feet, through monument B–12–3, which is a monel plug, located in the back of the curb on the northwesterly side of Molten Avenue, to monument B–12–4, which is a monel plug located in the back of the curb on the northwesterly side of Molten Avenue, the distances being 106.9 feet and 792.1 feet, successively, from beginning of the course;

S. 13°57′15″ W., 158.9 feet, to monument B–12–5, which is a monel plug, located on the southeasterly side of an island at the intersection of Molten Avenue and Maile Street;

S. 14°43′30″ W., 252.3 feet to monument B–12–6, which is a monel plug, located at the back of the curb on the northwesterly side of Molten Avenue between quarters "E" and "F";

Southwesterly, following the back of the curb on the northwesterly side of Molten Avenue, to monument B–12–7, which is a monel plug, located between quarters "D" and "E" (the direct bearing and distance from monument B–12–6 to B–12–7 is S. 24°56′45″ W., 223.4 feet);

S. 20°08′30″ E., 778.8 feet, through monument B–12–8, which is a monel plug located in the back of the curb on the southwesterly side of Molten Avenue to monument B–12–9, which is a monel plug located in the back of the curb on the southwesterly side of Molten Avenue, the distance being 474.1 feet and 304.7 feet, successively, from beginning of the course;

S. 20°51′30″ E., 425.7 feet, to monument B–12–10, which is a monel plug, located in the back of the curb on the southwesterly side of Molten Avenue opposite the southwesterly prolongation of the southeasterly curb of Conley Street;

N. 89°31′45″ E., 117.5 feet, to monument B–12–11, which is a monel plug, located in the back of the curb on the southeasterly side of Conley Street at its intersection with Bernhard Street;

On a curve to the right, following the back of the curb at the above-named intersection to monument B–12–12, which is a monel plug, located in the back of the curb on the southwesterly side of Bernhard Street (the direct bearing and distance from monument B–12–11 to B–12–12 is S. 65°32′40″ E., 21.1 feet);

S. 20°13′15″ E., 332.2 feet, following the back of the curb, on the southwesterly side of Bernhard Street to monument B–12–13, which is a monel plug located in the northwesterly side of the concrete taxiway to landing strip;

N. 67°25′45″ E., 252.3 feet, along the northwesterly side of the above-mentioned taxiway to monument B–12–14, which is a monel plug, located near the southwesterly intersection of Maile Street;

N. 74°21′15″ E., 588.6 feet, along the northwesterly side of the above-mentioned taxiway to monument B–12–15, which is a monel plug, located near the northeasterly intersection with McEwen Street;

N. 03°37′30″ W., 413.6 feet, along the prolongation of and the back of the curb on the easterly side of McEwen Street, to monument B–12–16, which is a monel plug, located in the back of the curb;

N. 86°27′30″ E., 131.1 feet, to monument B–12–17, which is a 1½ inch iron pipe, located 1.5 feet, more or less, easterly from a cyclone fence and 60.6 feet westerly from the centerline of Randolph Road;

Southerly 1,883.8 feet, along a line parallel to and 60.6 feet westerly from the centerline of Randolph Road and along the easterly side of the above-mentioned cyclone fence, to monument B–12–23, which is a 1½ inch iron pipe, located near the northwesterly corner of Building No. 1119. The geodetic position of monument B–12–23 is in latitude 9°21′ N. plus 4,038.3 feet and longitude 79°52′ W. plus 5,103.5 feet;

N. 86°08′00″ E., 28.0 feet, to monument B–12–24, which is a monel plug in a concrete pavement;

S. 03°41′30″ E., 114.1 feet, to monument B–12–25, which is a monel plug in a concrete pavement;

S. 86°18′30″ W., 30.3 feet, to an unmarked point called B–12–26, located 1.5 feet, more or less, easterly from a cyclone fence, the geodetic position of which is in latitude 9°21′ N. plus 3,924.3 feet and 79°52′ W. plus 5,098.4 feet;

S. 03°36′00″ E., 379.0 feet, to unmarked point called A–1, located on the northern boundary of Fort Gulick Army Reservation, Parcel No. 2 (at Coco Solo) and N. 89°59′35″ W., 12.2 feet, from old monument "A" (Precise Bench Mark "A"). The geodetic position of unmarked point called A–1 is in latitude 9°21′ N. plus 3,546.0 feet and longitude 79°52′ W. plus 5,074.6 feet;

N. 89°59′35″ W., 823.4 feet, more or less, along the northern boundary of the above-mentioned Parcel No. 2 (at Coco Solo), on the northerly side of a cyclone fence and the southerly side of a drainage ditch, through monument "B", which is an 8-inch square concrete monument, to an unmarked point called B–1, located on the mean low water line of Manzanillo Bay, the distances being 508.4 feet and 315 feet, more or less, successively, from beginning of the course;

Due north, 23 feet, more or less, to an unmarked point called B–1a, located on the face of a concrete seawall at the mean low water line of Manzanillo Bay;

In a general northerly direction, following the mean low water line of Manzanillo Bay (except where drainage ditches extend inland from the shore line) to an unmarked point called B–7–2b, located on the northwesterly side of Pier No. 2 beneath the eave line on the southwesterly side of Building No. 7 and N. 34°16′15″ W., 2.0 feet, from monument B–7–3 (not on boundary), which is a monel plug in the concrete pavement of the above-mentioned Pier No. 2. The geodetic position of unmarked point called B–7–2b is in latitude 9°22′ N., plus 2,714.1 feet and longitude 79°52′ W. plus 1,064.7 feet;

N. 34°16′15″ W., 320.3 feet, following the eave line on the southwesterly side of Building No. 7, to monument B–7–2, which is a monel plug, located in the pavement of Pier No. 1 and 7.3 feet northwesterly from its southeasterly face;

N. 55°37′00″ E., 207.3 feet, along the northwesterly sides of Buildings No. 7 and No. 4, to monument B–7–1, which is a monel plug located in the pavement near the northeasterly corner of Building No. 4;

S. 34°17′15″ E., 541.2 feet, along the prolongation of and the back of the curb on the southwesterly side of Johnson Avenue to monument B–8, which is a monel plug located in the concrete pavement on the southwesterly side of Johnston Avenue;

S. 55°40′45″ W., 102.6 feet, along the northwesterly side of Building No. 3 to monument B–9, which is an iron rod set in concrete, located near the northwesterly corner of the above-mentioned Building No. 3;

S. 34°33′00″ E., 185.4 feet, along the southwesterly side of the above-mentioned Building No. 3, to monument B–10 which is a 1¼-inch pipe, located near the southwesterly corner of the above-mentioned Building No. 3;

N. 55°34′15″ E., 101.8 feet, along the southeasterly side of the above-mentioned Building No. 3, to monument B–11, which is a monel plug, located in the back of the curb on the southwesterly side of Johnston Avenue;

S. 34°17′15″ E., 247.8 feet, along the back of the curb on the southwesterly side of Johnston Avenue, to monument B–12, the point of beginning.

There shall also be included in the above-described reservation all land and water within a zone extending 100 yards out from the mean low water line on all shores of the reservation bordering on Manzanillo Bay.

In addition, the Department of the Army will have jurisdiction over that water area extending 100 yards southeasterly and southwesterly from the southeasterly side and southwesterly end of Pier No. 1 (bounded on the northeast by a line extending N. 79°00′ W. from the extreme northwesterly corner of Pier No. 1).

The directions of the lines refer to the true meridian.

All geographic positions are referred to the Panama-Colon datum of the Canal Zone Triangulation System.

The reservation contains a total area of 3,423.7 acres, more or less (Parcel No. 1 at Gulick—mainland 1,755.8 acres and islands 85.3 acres, more or less; Parcel No. 2 at Coco Solo—area above mean low water 45.55 acres, more or less; Parcel No. 3—1,400.4 acres, more or less and Parcel No. 4 at Coco Solo 136.7 acres more or less) and is as shown on Canal Zone Government Drawings No. M6118-44, entitled "Map Showing United States Army and Navy Reservations, Fort Gulick, Fort Randolph and Coco Solo, Canal Zone" dated January 20, 1958 (Revision No. 2 dated February 20, 1959) scale 1:10,000, and No. 6121-72 entitled "Map Showing United States Army and Navy Reservations, Fort Gulick, Fort Randolph and Coco Solo, Canal Zone" dated September 15, 1969 (Revision No. 2 dated December 14, 1973) scale 1:10,000. Both maps are on file in the Office of the Governor of the Canal Zone, Balboa Heights, C. Z.

§ 5.42 [Amended]

In 35 CFR 5, § 5.42(a) is amended as follows:

(a) The first unnumbered paragraph of § 5.42(a) is revised to read as follows:

The following-described area of land, situated in the Canal Zone and designated as the Coco Solo Naval Reservation is reserved and set apart as, and assigned to the usea and purposes of, a Navy reservation, under the jurisdiction and control of the Secretary of the Navy, but subject to § 5.82.

(b) The portion of §§ 5.42(a) that is designated "Parcel No. 1" is deleted in its entirety.

(c) The last paragraph of § 5.42(a) (Which begins: The total area of Coco Solo Navy Reservation. * * *") is revised to read as follows:

The total area of Coco Solo Navy Reservation, Parcel No. 2, above the mean low water line or above the extreme low water line, is 2,566 acres more or less and is as shown on Canal Zone Government Drawing No. 6121-72 entitled "Map Showing United States Army and Navy Reservations, Fort Gulick, Fort Randolph, and Coco Solo, Canal Zone, scale 1: 10,000, dated September 15, 1969 (Revision No. 2 dated December 14, 1973) on file in the Office of the Governor of the Canal Zone, Balboa Heights, C. Z.

Effective date: This amendment is effective October 1, 1975.

(2 C.Z.C. 31, 33, 76A Stat. 7, 35 CFR 3.3(c))

Dated: September 23, 1975.

H. R. PARFITT,
Governor of the Canal Zone.

MARTIN R. HOFFMANN,
Secretary of the Army.

Title 36—Parks, Forests, and Public Property

CHAPTER X—COMMISSION OF FINE ARTS

PART 1002—RULES FOR COMPLIANCE WITH 5 U.S.C. 552a, THE PRIVACY ACT OF 1974

On October 1, 1975, the Commission of Fine Arts published in the FEDERAL REGISTER (40 FR 45306) its proposed regulations for implementation of the Privacy Act of 1974. Interested persons were invited to submit written comments, suggestions, or objections before October 30, 1975. No written comments, suggestions, or objections have been received.

The regulations set forth below, incorporating necessary editorial and typographic changes, are hereby adopted with the following additions:

1. Section 1002.2(b), Requests for access, is revised.

2. Section 1002.2, Requests for access, subparagraph (c)(v)(B), is revised.

There are no other amendments and the proposed regulations for the implementation of the Privacy Act of 1974 are hereby affective as set forth below.

Signed in Washington, D.C., on November 5, 1975 by:

CHARLES A. ATHERTON,
Secretary,
Commission of Fine Arts.

Sec.
1002.1 Rules for determining if an individual is the subject of a record.
1002.2 Requests for access.
1002.3 Access to the accounting of disclosure from records.
1002.4 Requests for copies of records.
1002.5 Requests to amend records.
1002.6 Requests for review.
1002.7 Schedule of fees.

AUTHORITY: Pub. L. 93-579, 88 Stat. 1896 (5 U.S.C. 552a(f)).

§ 1002.1 Rules for determining if an individual is the subject of a record.

(a) Individuals desiring to know if a specific system of records maintained by the Commission of Fine Arts contains a record pertaining to them should address their inquiries to the Secretary, Commission of Fine Arts, 708 Jackson Place, N.W., Washington, D.C. 20006. The written inquiry should contain a specific reference to the system of records maintained by CFA listed in the CFA Notices of Systems of Records or it should describe the type of record in sufficient detail to reasonably identify the system of records. Notice of CFA Systems of Records will bc made in the Federal Register and copies of the notices will be available upon request to the Secretary when so published. A compilation of such notices will also be made and published by the Office of the Federal Register in accordance with section 5 U.S.C. 552a(f).

(b) At a minimum, the request should contain sufficient identifying information to allow CFA to determine if there is a record pertaining to the individual making the request in a particular system of records. In instances where identification is insufficient to insure disclosure to the individual to whom the information pertains in view of the sensitivity of the information, CFA reserves the right to solicit from the requester additional identifying information.

(c) Ordinarily the requester will be informed whether the named system of records contains a record pertaining to the requester within 10 days of the receipt of such a request (excluding Saturdays, Sundays, and legal Federal holidays). Such a response will also contain or reference the procedures which must be followed by the individual making the request in order to gain access to the record.

V 40 N 217 NOV 10 75 XUM

(d) Whenever a response cannot be made within 10 days, the Secretary will inform the requester of the reasons for the delay and the date by which a response may be anticipated.

§ 1002.2 Requests for access.

(a) *Requirement for written requests.* Individuals desiring to gain access to a record pertaining to them in a system of records maintained by CFA must submit their request in writing in accordance with the procedures set forth in subsection (b), below.

(b) *Procedures.* (1) Content of the request. The request for access to a record in a system of records shall be addressed to the Secretary, at the address cited above; and shall name the system of records or contain a description (as concise as possible) of such system of records. The request should state that the request is pursuant to the Privacy Act of 1974. In the absence of such a statement, if the request is for a record pertaining to the requester maintained by CFA in a system of records, the request will be presumed to be made under the Privacy Act of 1974. The requester should include any other information which may assist in the rapid identification of the record for which access is being requested (e.g., maiden name, dates of employment, etc.).

(2) Requirements for identification will normally be limited to the presentation of any standard picture and signature or signature identification card, such as driver's license, so that a comparison of the signature and the signature on the original request may be made. The appearing individual will be read paragraph (3), subsection (i) to Title 5 CFR 552a which specifies the penalty for knowingly or willfully requesting or obtaining a record concerning an individual from an agency under false pretenses and asked to sign a statement attesting to the fact that he or she understands the paragraph and that he or she is, in fact, the individual who made the request (or the individual authorized to receive the disclosure by the requesting individual). This signature will be compared with the other two. If the appearing individual is other than the requesting individual, then he or she must also present a letter of introduction signed by the requesting individual so that the comparison of signature may be made.

(c) *CFA action on request* (1) A request for access will ordinarily be answered within 10 days (excluding Saturdays, Sundays, and legal Federal holidays), except when the Secretary determines otherwise, in which case the requester will be informed of the reason for the delay and an anticipated date by which the request will be answered. When the request can be answered within 10 days, it shall include the following:

(i) A statement that there is a record as requested or a statement that there is not a record in the system of records maintained by CFA;

(ii) A statement as to whether access will be granted only by providing a copy of the record through the mail; or the address of the location and the date and time at which the record may be examined. In the event the requester is unable to meet the specified date and time, alternate arrangements may be made with the official specified in paragraph (b)(1) of this section;

(iii) A statement, when appropriate, that examination in person will be the sole means of granting access only when the Secretary has determined that it would not unduly impede the requester's right of access;

(iv) The amount of fees charged, if any (see §§ 1002.4 and 1002.7); and

(v) The name, title, and telephone number of the CFR official having operational control over the record.

(A) *Access by the parent of a minor,* or legal guardian. A parent or a minor, upon presenting suitable personal identification, may access on behalf of the minor any record pertaining to the minor maintained by CFA in a system of records. A legal guardian may similarly act on behalf of an individual declared to be incompetent due to physical or mental incapacity or age by a court of competent jurisdiction, upon the presentation of documents authorizing the legal guardian to so act; and upon suitable personal identification of the guardian.

(B) *Granting access when accompanied or represented by another individual.* When an individual requesting access to his or her record in a system of records maintained by CFA wishes to be accompanied or represented by another individual during the course of the examination of the record, the individual making the request shall submit to the official having operational control of the record a signed statement authorizing that person access to the record.

(vi) *Medical records.* The records in a system of records which are medical records shall be disclosed to the individual in such a manner and following such procedures as the Secretary shall direct. When CFA, in consultation with a physician, determines that the disclosure of medical information could have an adverse effect upon the individual to whom it pertains, CFA may transmit such information to a physician named by the individual.

(vii) *Exceptions.* Nothing in this section shall be construed to entitle an individual the right to access to any information compiled in reasonable anticipation of a civil action or proceeding.

§ 1002.3 Access to the accounting of disclosures from records.

Rules governing the granting of access to the accounting of disclosures are the same as those for granting access to the records outlined in § 1002.2, above.

§ 1002.4 Requests for copies of records.

Rules governing requests for copies of records are the same as those for the granting of access to the records outlined in § 1002.2, above (see also § 1002.7 for rules regarding fees).

§ 1002.5 Requests to amend records.

(a) *Requirement for written requests.* Individuals desiring to amend a record that pertains to them in a system of records maintained by CFA must submit their request in writing in accordance with the procedures set forth herein unless the requirement is waived by the official having responsibility for the system of records. Records not subject to the Privacy Act of 1974 will not be amended in accordance with these provisions; however, individuals who believe that such records are inaccurate may bring this to the attention of the CFA.

(b) *Procedures.* (1)(i) The request to amend a record in a system of records shall be addressed to the Secretary. Included in the request shall be the name of the system and a brief description of the record proposed for amendment. In the event the request to amend the record is the result of the individual's having gained access to the record as set forth above, copies of previous correspondence between the requester and CFA will serve in lieu of a separate description of the record.

(ii) Individuals desiring assistance in the preparation of a request to amend a record should contact the Secretary at the address cited above.

(iii) The exact portion of the record the individual seeks to have amended should be clearly indicated. If possible, the proposed alternative language should also be set forth, or, at a minimum, the facts which the individual believes are not accurate, relevant, timely, or complete, should be set forth with such particularity as to permit CFA not only to understand the individual's basis for the request, but also to make an appropriate amendment to the record.

(iv) The request must also set forth the reasons why the individual believes his record is not accurate, relevant, timely, or complete. In order to avoid the retention by CFA of personal information merely to permit the verification of records, the burden of persuading CFA to amend a record will be upon the individual. The individual must furnish sufficient facts to persuade the official in charge of the system of the inaccuracy, irrelevancy, timeliness, or incompleteness of the record.

(2) *CFA action on the request.* To the extent possible, a decision upon a request to amend a record will be made within 10 days (excluding Saturdays, Sundays, and legal Federal holidays). In the event that a decision cannot be made within this time frame, the individual making the request will be informed within the 10 days of the expected date for a decision. The decision upon a request for amendment will include the following:

(i) The decision of the Commission of Fine Arts whether to grant in full, or deny any part of the request to amend the record;

(ii) The reasons for the determination for any part of the request which is denied;

(iii) The name and address of the official with whom an appeal of the denial may be lodged;

(iv) The name and address of the official designated to assist, as necessary, and upon the request of, the individual making the request in preparation of the appeal;

(v) A description of the review of the appeal within CFA (see § 1002.6); and

(vi) A description of any other procedures which may be required of the individual in order to process an appeal.

§ 1002.6 Request for review.

(a) Individuals wishing to request a review of the decision by CFA with regard to an initial request to amend a record in accordance with the provisions of § 1002.5 above, should submit the request for review in writing and, to the extent possible, include the information specified in paragraph (a) of this section. Individuals desiring assistance in the preparation of their request for review should contact the Secretary at the address provided herein.

(b) The request for review should contain a brief description of the record involved or in lieu thereof, copies of the correspondence from CFA in which the request to amend was denied and also the reasons why the requester believes that the disputed information should be amended. The request for review should make reference to the information furnished by the individual in support of his claim and the reasons as required by § 1002.5 above set forth by CFA in its decision denying the amendment. Appeals filed without a complete statement by the requester setting forth the reasons for the review will, of course, be processed. However, in order to make the appellate process as meaningful as possible, the requester's disagreement should be understandably set forth. In order to avoid the unnecessary retention of personal information, CFA reserves the right to dispose of the material concerning the request to amend a record if no request for review in accordance with this section is received by CFA within 180 days of the mailing by CFA of its decision upon an initial request. A request for review received after the 180-day period may, at the discretion of the Secretary, be treated as an initial request to amend a record.

(c) The request for review should be addressed to the Secretary.

(d) Upon receipt of a request for review, the Secretary will convene a review group composed of the Secretary and the Chairman. This group will review the basis for the requested review and will develop a recommended course of action to the office's Committee on Freedom of Information and Privacy (hereinafter referred to as the Committee). If at any time additional information is required from the requestee, the Secretary is authorized to acquire it or authorize its acquisition from the requester.

(e) The Committee is composed of:

(1) The Chairman;

(2) The Secretary;

(3) The Assistant Secretary;

(4) The Administrative Assistant.

(f) The Committee will review the request for review and the recommended course of action and will recommend a decision on the request for review to the Chairman, who has the final authority regarding appeals.

(g) The Chairman will inform the requester in writing of the decision on the request for review within 30 days (excluding Saturdays, Sundays, and legal Federal holidays) from the date of receipt by CFA of the individual's request for review unless the Chairman extends the 30-day period for good cause. The extension of and the reasons therefor will be sent by CFA to the requester within the initial 30-day period. Included in the notice of a decision being reviewed, if the decision does not grant in full the request for review, will be a description of the steps the individual may take to obtain judicial review of such a decision, and a statement that the individual may file a concise statement with CFA setting forth the individual's reasons for his disagreement with the decision upon the request for review. The Secretary has the authority to determine the "conciseness" of the statement, taking into account the scope of the disagreement and the complexity of the issues. Upon the filing of a proper concise statement by the individual, any subsequent disclosure of the information in dispute will have the information in dispute clearly noted and a copy of the concise statement furnished, as well as a concise statement by CFA setting forth its reasons for not making the requested changes, if CFA chooses to file such a statement. A copy of the individual's statement, and, if it chooses, CFA's statement will be sent to any prior transferee of the disputed information who is listed on the accounting required by 5 U.S.C. 552a(c).

§ 1002.7 Schedule of fees.

No fees will be charged for search, review, or copies of the record.

[FR Doc.75-30233 Filed 11-7-75;8:45 am]

Title 39—Postal Service

CHAPTER I—U.S. POSTAL SERVICE

PART 762—DISBURSEMENT POSTAL MONEY ORDERS

Authorization of New Series of Postal Money Orders

On August 19, 1975, there was published in the FEDERAL REGISTER (40 FR 36146) a notice of proposed rulemaking which would add new Parts 762, 763, and 764 to Subchapter J of title 39, CFR, which would be renamed. These new parts would authorize a new series of postal money orders, designated Disbursement Postal Money Orders, which would be used by the Postal Service exclusively for payment of certain postal obligations and would not be made available for purchase from the Postal Service by the public.

The Postal Service has decided to adopt this proposal, with certain changes, and minor and technical corrections as appear below. For example, the Postal Service has renumbered proposed parts 763 and 764 as subdivisions of Part 762. In addition, and as a result of comments received, the following changes are made:

1. The definition of "Presenting Bank" in § 762.2(e) of the proposal (renumbered § 762.12(e) is amended to clarify the term "depositor".

2. Section 762.5 of the proposal (renumbered § 762.15) describes the methods of Postal Service payments not made by disbursement postal money orders. This section is amended to refer to an additional method that may come into use in the future, electronic funds transfer.

3. The first part of § 763.7 of the proposal (renumbered § 762.27), which deals with the processing of disbursement postal money orders by Federal Reserve Banks, is amended to refer to the agreement between the Postal Service and the Federal Reserve Banks as depositaries and fiscal agents of the United States.

4. Sections 763.7(b)(1) and (2) of the proposal (renumbered § 762.27(b)(1) and (2)) are amended to clarify the term "depositors", as was done to § 762.2(e) (renumbered § 762.12(e)). Amendments are also made to delete the reference to money orders being "cashed" and to indicate that the account to be charged is the general account of the United States Treasury.

Accordingly, the Postal Service adopts this proposal, with the above mentioned changes, effective immediately.

ROGER P. CRAIG,
Deputy General Counsel.

1. In 39 CFR, Subchapter J is renamed "Postal Service Debt Obligations; Disbursement Postal Money Orders."

2. New Part 762 is added and reads as follows:

Subpart A—General, Definitions, Issuance

Sec.
762.11 General
762.12 Definitions
762.13 Issuance
762.14 Amounts for which disbursement postal money orders may be issued
762.15 Postal Service payments not made by disbursement postal money order

Subpart B—Endorsements, Payment, Guaranties, Warranties and Processing of Disbursement Postal Money Orders

762.21 Scope
762.22 Definitions
762.23 General rules
762.24 Guaranty of endorsements
762.25 Reclamation of amounts of paid disbursement postal money orders
762.26 Postal facilities not to cash disbursement postal money orders
762.27 Processing of disbursement postal money orders by federal reserve banks.
762.28 Release of original disbursement postal money orders
762.29 Endorsement of disbursement postal money orders by payees
762.30 Disbursement postal money orders issued to incompetent payees
762.31 Disbursement postal money orders issued to deceased payees

Subpart C—Issuance of Substitutes for Lost, Destroyed, Mutilated, and Defaced Disbursement Postal Money Orders

762.41 Advice of non-receipt or loss, destruction, or mutilation

V 40 217 NOV 10 75 XUM

Sec.
762.42 Request for substitute disbursement postal money orders; requirements for undertaking of indemnity
762.43 Issuance of substitute disbursement postal money order
762.44 Receipt or recovery of original disbursement postal money order
762.45 Removal of stoppage of payment

AUTHORITY: 39 U.S.C. 401(2), 401(3), 401(4), 401(10), and 404(6).

Subpart A—General, Definitions, Issuance

§ 762.11 General.

The Postal Service, at its discretion, issues a specialized postal money order, designated a Disbursement Postal Money Order in payment of Postal Service obligations. Disbursement Postal Money Orders are distinguishable on their face from other postal money orders in the following ways:

(a) Disbursement Postal Money Orders have words of negotiability—"Pay to the order of"—printed on their face, while other postal money orders simply bear the words "Pay to" on their face;

(b) Disbursement Postal Money Orders, unlike other postal money orders, bear on their face the phrase, "This special money order is drawn by the Postal Service to pay one of its own obligations."; and

(c) The amounts of Disbursement Postal Money Orders are printed in words as well as numbers, while the amounts of postal money orders available at post offices are printed in numbers only.

§ 762.12 Definitions.

As used in Part 762 of this chapter, the term:

(a) "Disbursement Postal Money Order" means a money order (described in Part 762) issued by the Postal Service to pay one of its own obligations.

(b) "Federal Reserve Bank" means a Federal Reserve Bank or branch thereof.

(c) "Financial organization" means any bank, savings bank, savings and loan association or similar institution, or Federal or State chartered credit union.

(d) "Person" or "persons" means an individual or individuals, or an organization or organizations, whether incorporated or not, including all forms of banking institutions.

(e) "Presenting Bank" means a bank or other depositor of a Federal Reserve Bank which presents Disbursement Postal Money Orders to and receives credit therefor from a Federal Reserve Bank.

(f) "Reclamation" means the action taken by the Postal Service to obtain refund of the amounts of paid Disbursement Postal Money Orders.

(g) "Postal Service" means the United States Postal Service.

§ 762.13 Issuance.

Disbursement Postal Money Orders are issued solely by Postal Data Centers and solely for the purpose of paying Postal Service obligations. Accordingly, Disbursement Postal Money Orders may be issued in lieu of U.S. Treasury checks.

§ 762.14 Amounts for which disbursement postal money orders may be issued.

Disbursement Postal Money Orders may be issued for any amount appropriate to pay Postal Service Obligations. There is no maximum amount above which a Disbursement Postal Money Order may not be issued.

§ 762.15 Postal Service payments not made by disbursement postal money order.

Postal Service payments not made by Disbursement Postal Money Order are made by cash, U.S. Treasury Check, or by regular postal money order, and may be made by electronic funds transfer.

Subpart B—Endorsements, Payment, Guaranties, Warranties and Processing of Disursement Postal Money Orders

§ 762.21 Scope.

The regulations in this subpart prescribe the requirements for endorsement and the conditions for payment of Disbursement Postal Money Orders drawn by the Postal Service.

§ 762.22 Definitions.

For definitions applicable to this subpart see § 762.12 of this chapter.

§ 762.23 General rules.

All Disbursement Postal Money Orders drawn by the Postal Service are payable without limitation of time. The Postal Service shall have the usual right of a drawee to examine Disbursement Postal Money Orders presented for payment and refuse payment of any Disbursement Postal Money Orders, and shall have a reasonable time to make such examination. Disbursement Postal Money Orders shall be deemed to be paid by the Postal Service only after first examination has been fully completed. If the Postal Service is on notice of a doubtful question of law or fact when a Disbursement Postal Money Order is presented for payment, payment will be deferred pending settlement by the Postal Service.

§ 762.24 Guaranty of endorsements.

The presenting bank and the endorsers of a Disbursement Postal Money Order presented to the Postal Service for payment shall be deemed to guarantee to the Postal Service that all prior endorsements are genuine, whether or not an express guaranty is placed on the Disbursement Postal Money Order. When the first endorsement has been made by one other than the payee personally, the presenting bank and the endorsers shall be deemed to guarantee to the Postal Service, in addition to other warranties, that the person who so endorsed had unqualified capacity and authority to endorse the Disbursement Postal Money Order on behalf of the payee.

§ 762.25 Reclamation of amounts of paid disbursement postal money orders.

The Postal Service shall have the right to demand refund from the presenting bank of the amount of a paid Disbursement Postal Money Order if after payment the Disbursement Postal Money Order is found to bear a forged or unauthorized endorsement, or an endorsement by another for a deceased payee where the right to the proceeds of such Disbursement Postal Money Orders terminated upon the death of the payee, or to contain any other material defect or alteration which was not discovered upon first examination. If refund is not made, the Postal Service shall take such action against the proper parties as may be necessary to protect its interests.

§ 762.26 Postal facilities not to cash disbursement postal money orders.

Post offices and other postal facilities shall not be expected to cash Disbursement Postal Money Orders or to return cash for endorsed Disbursement Postal Money Orders offered in payment for postal service in amounts less than the value of a Disbursement Postal Money Order. However, properly endorsed Disbursement Postal Money Orders may be accepted as total or partial payment for postal services.

§ 762.27 Processing of disbursement postal money orders by federal reserve banks.

In accordance with an agreement between the Postal Service and the Federal Reserve Banks as depositaries and fiscal agents of the United States, Federal Reserve Banks will handle Disbursement Postal Money Orders as follows:

(a) Federal Reserve Banks shall not be expected to cash Disbursement Postal Money Orders presented directly to them for payment; and

(b) Each Federal Reserve Bank shall:

(1) Receive Disbursement Postal Money Orders from its member banks, and its other depositors which guarantee all prior endorsements thereon;

(2) Give immediate credit therefor in accordance with its current Time Schedules and charge the amount thereof to the general account of the United States Treasury, subject to examination and payment by the Postal Service; and

(3) Forward the Disbursement Postal Money Orders to the Postal Service.

§ 762.28 Release of original disbursement postal money orders.

An original Disbursement Postal Money Order may be released to a responsible endorser only upon receipt of a properly authorized request showing the reason it is required.

§ 762.29 Endorsement of disbursement postal money orders by payees.

(a) *General requirements.* Disbursement Postal Money Orders shall be endorsed by the payee or the payees named, or by another on behalf of such payee or payees as set forth in this Subpart B. The forms of endorsement shall conform to those recognized by general principles of law and commercial usage for the negotiation, transfer, or collection of negotiable instruments.

(b) *Endorsement of disbursement postal money orders by a financial organization under the payee's authorization.* When a Disbursement Postal Money Order is credited by a financial organization to the payee's account under his authorization, the financial organization may use an endorsement substantially as follows:

Credit to the account of the within-named payee in accordance with payee's or payees' instructions. Absence of endorsement guaranteed.

A financial organization using this form of endorsement shall be deemed to guarantee to all subsequent endorsers and to the Postal Service that it is acting as an attorney in fact for the payee or payees, under his or their authorization.

(c) *Endorsement of disbursement postal money orders drawn in favor of financial organizations.* All Disbursement Postal Money Orders drawn in favor of financial organizations, for credit to the accounts of persons designating payment so to be made, shall be endorsed in the name of the financial organization as payee in the usual manner.

§ 762.30 Disbursement postal money orders issued to incompetent payees.

(a) If the Disbursement Postal Money Order is endorsed by a legal guardian or other fiduciary and presented for payment by a bank it will be paid by the Postal Service without submission to the Postal Service of documentary proof of authority of the guardian or other fiduciary.

(b) If a guardian has not been or will not be appointed, the Disbursement Postal Money Order shall be forwarded to the Money Order Division, Postal Data Center, P.O. Box 14963, St. Louis, MO 63182, with a full explanation of the circumstances.

§ 762.31 Disbursement postal money orders issued to deceased payees.

(a) If the Disbursement Postal Money Order is endorsed by an Executor or Administrator and presented for payment by a bank it will be paid by the Postal Service without submission to the Postal Service of documentary proof of the authority of the Executor or Administrator.

(b) If an Executor or Administrator has not been appointed or if there is doubt as to whether the proceeds of the Disbursement Postal Money Order pass to the estate of the deceased payee, the instrument should be returned to the Money Order Division, Postal Data Center, P.O. Box 14963, St. Louis, MO 63182, for determination whether, under applicable laws, payment is due, and for reissuance to the appropriate payee.

Subpart C—Issuance of Substitutes for Lost, Destroyed, Mutilated, and Defaced Disbursement Postal Money Orders.

§ 762.41 Advice of non-receipt or loss, destruction, or mutilation.

(a) In the event of the non-receipt, loss, or destruction of a Disbursement Postal Money Order, or the mutilation or defacement of a Disbursement Postal Money Order to an extent which renders it non-negotiable, the owner should immediately contact the Money Order Division, Postal Data Center, P.O. Box 14963, St. Louis, MO 63182, describing the Disbursement Postal Money Order, stating the purpose for which it was issued, giving, if possible, its date, number, and amount, and requesting that payment be stopped. In cases involving mutilated or defaced Disbursement Postal Money Orders the owner should enclose the mutilated or defaced item with his communication.

(b) If the Disbursement Postal Money Order, which is the basis of the owner's claim, is determined to be outstanding, the Money Order Division shall furnish the claimant an appropriate application form for obtaining a substitute Disbursement Postal Money Order. However, the execution of an application shall not be required in the event the original written statement submitted by the claimant substantially meets the requirements of the prescribed application form.

§ 762.42 Request for substitute disbursement postal money orders; requirements for undertaking of indemnity.

In the case of a request for a substitute Disbursement Postal Money Order:

(a) An undertaking of indemnity in penal sum equal to the amount of the Disbursement Postal Money Order shall, unless otherwise provided in this section, be executed by the claimant, as may be required by the Postal Service, and submitted to the Money Order Division.

(b) Unless the Postal Service determines that an undertaking of indemnity is essential in the public interest, no undertaking of indemnity shall be required in the following classes of cases:

(1) If the Postal Service is satisfied that the loss, theft, destruction, mutilation or defacement occurred wihout fault of the owner or holder, and while the Disbursement Postal Money Order was in the custody or control of the Postal Service;

(2) If substantially the entire Disbursement Postal Money Order is presented and surrendered by the owner or holder and the Postal Service is satisfied as to the identity of the Disbursement Postal Money Order presented and that any missing portions are not sufficient to form the basis of a valid claim against the Postal Service;

(3) If the Postal Service is satisfied that the original Disbursement Postal Money Order is not negotiable and cannot be made the basis of a valid claim against the Postal Service; or

(4) If the amount of the Disbursement Postal Money Order is not more than $200.

§ 762.43 Issuance of substitute disbursement postal money order.

Upon approval of the undertaking of indemnity, application, or statement of claim, the Money Order Division shall issue to the claimant a substitute Disbursement Postal Money Order showing such information as may be necessary to identify the original instrument.

§ 762.44 Receipt or recovery of original disbursement postal money order.

(a) If the original Disbursement Postal Money Order is received or recovered by the owner after he has requested the Postal Service to stop payment on the original but before a substitute has been received, he should immediately advise the Money Order Division and hold such original Disbursement Postal Money Order until receipt of instructions with respect to its negotiability.

(b) If the original Disbursement Postal Money Order is received by the owner after a substitute has been received by him, the original shall not be cashed, but shall be immediately forwarded to the Money Order Division. Under no circumstances shall both the original and substitute be cashed.

§ 762.45 Removal of stoppage of payment.

Requests for removal of stoppage of payment shall be addressed to the Money Order Division. No request for removal of stoppage of payment shall be accepted after issuance of a substitute Disbursement Postal Money Order has been approved.

[FR Doc.75-30112 Filed 11-7-75;8:45 am]

Title 40—Protection of Environment

CHAPTER I—ENVIRONMENTAL PROTECTION AGENCY

[FRL 453-6]

PART 52—APPROVAL AND PROMULGATION OF IMPLEMENTATION PLANS

West Virginia

On November 8, 1974, the State of West Virginia submitted to the Administrator of the Environmental Protection Agency amendments to the West Virginia State Implementation Plan (SIP) for the attainment and maintenance of national ambient air quality standards, to be processed as SIP revisions. The amendments included:

1. An amendment to Regulation II, "To Prevent and Control Particulate Air Pollution from Combustion of Fuel in Indirect Heat Exchangers," Section 3.03. The amendment allows sulfur oxides to be added to a combustion unit exit gas stream for the purpose of improving control equipment efficiency on existing fuel burning units. This amendment applies only to units in existence as of September 1, 1974.

2. An amendment of Regulation VII, "To Prevent and Control Particulate Air Pollution from Manufacturing Process Operations." The essential change allows the primary aluminum reduction potlines which are equipped with fluidized bed reactors or other similar gas cleaning devices to be exempt from the provisions presently governing process weight operations, provided that at least 99% of the gaseous fluoride if removed from the exit gas stream, and the particulate loading is not greater than 0.01 grains per standard cubic foot (gr/scf).

V 40 N 217 NOV 10 75 XUM

3. Amendments to the West Virginia State Implementation Plan's general control strategies for particulate matter. The essential change allows compliance schedules for sources of particulate matter to extend beyond June 30, 1975, but no later than June 30, 1977, provided that the primary ambient air quality standard in the AQCR and localized area where such sources are located will be attained and maintained by June 30, 1975.

On December 6, 1974, the State of West Virginia submitted proof that hearings regarding these amendments, having given adequate notice to the public, took place at the following times:

1. Proposed changes to Regulation II—June 5, 1974.
2. Proposed changes to Regulation VII—July 23, 1974.
3. Proposed changes to the general control strategies outlined in the SIP—July 23, 1974.

On December 24, 1974 (39 FR 39584), the Regional Administrator of EPA Region III announced receipt of the amendments to West Virginia Regulations II and VII, as well as the amendments to the State Implementation Plan, and provided for a 30-day public comment period, ending January 23, 1975. During this period, no comments were received.

In light of the lack of comments received, and the Administrator's own evaluation, the Administrator hereby approves the revisions to Regulations II, VII, and the change in the State Implementation Plan relating to the State's authority to issue orders extending beyond the attainment date, effective December 10, 1975. The revisions meet the requirements of section 110 of the Clean Air Act. The change to Regulation VII presents no legal problems, and is realistic state-of-the-art control technology. The change in the SIP is considered to be more restrictive than the original state provision, because now, in order for the Administrator to approve an extension of a compliance schedule, the State of West Virginia must demonstrate that each extension granted will not interfere with attainment and maintenance of primary ambient air quality standards. The change does not address attainment or maintenance of secondary standards, which are not required to be met until June 30, 1977.

Copies of these amendments are available for public inspection during normal business hours at the following offices:

U.S. Environmental Protection Agency, Region III, Curtis Building, Sixth and Walnut Streets, Philadelphia, Pennsylvania 19106.
West Virginia Air Pollution Control Commission, 1558 Washington Street, East, Charleston, West Virginia 25311.
Freedom of Information Center, U.S. Environmental Protection Agency, 401 M Street SW., Washington, D.C. 20460.

(42 U.S.C. 1857c-5)

Dated: October 31, 1975.

JOHN QUARLES,
Acting Administrator.

Part 52 of Chapter I, Title 40, Code of Federal Regulations is amended as follows:

1. In § 52.2520, paragraph (c) is revised to read as follows:

§ 52.2520 Identification of plan.

* * * * *

(c) Supplemental information was submitted on

(1) March 30, April 20 and May 15, 1972, November 14, 1973, and November 8, 1974, by the West Virginia Air Pollution Control Commission.

(2) June 13, 1974.

[FR Doc.75-30088 Filed 11-7-75;8:45 am]

[FRL 452-2]

PART 52—APPROVAL AND PROMULGATION OF IMPLEMENTATION PLANS

Approval of Revision to West Virginia State Implementation Plan

On June 17, 1974, the State of West Virginia submitted to the Regional Administrator, EPA Region III, an amended Regulation XIII of the West Virginia Administrative Regulations—"Permits for Construction, Modification, or Relocation of Stationary Sources of Air Pollution, and Procedures for Registration and Evaluation". The State has requested that this amendment be considered as a revision to the West Virginia State Implementation Plan for the attainment and maintenance of national ambient air quality standards. The major provisions of the amendment are as follows:

(1) Defining the meaning of "indirect source" and other associated terms.

(2) Outlining timetables for submittal of permit applications and approval or disapproval action by the State.

(3) Outlining the time frame for public participation.

(4) Outlining procedures for the monitoring of an indirect source after the owner of said source has been granted a permit, and commences construction of the facility.

On October 24, 1974, the State of West Virginia submitted adequate proof in accordance with 40 CFR 51.4 that a public hearing was held on January 11, 1974, in Charleston, West Virginia.

On November 8, 1974 (39 FR 39581), the Regional Administrator acknowledged receipt of this amendment, proposed the amendment as a revision to the federally enforceable SIP, and provided for a 30 day public comment period, ending December 9, 1974. During this period, comments were received, from the National Realty Committee, recommending disapproval of Regulation XIII for the following reasons:

(1) The provisions for transferring permits in Section 9.01 could create financial problems for the developer.

(2) The provision in Section 9.02 that obligates the State Agency Director to suspend a permit after six months if construction has not commenced is too restrictive and should provide for a longer time period.

EPA contends that the provisions in Sections 9.01 and 9.02 may present an administrative burden for the developer, but do not contain any deficiencies that would warrant EPA disapproval pursuant to the provisions in 40 CFR 51.18.

In addition, comments were received from Sears, Roebuck and Company, recommending disapproval for the following reasons:

(1) EPA has no authority to promulgate regulations to control indirect sources in the State of West Virginia, since the State has shown no violations of the carbon monoxide standard.

(2) The provision in Section 4.04, which stipulates that the State can grant a permit based on air quality criteria or factors necessary to carry out the intent and purpose of the regulation, is too vague.

(3) Section 9.03, which allows the State to cancel or suspend a permit when the stipulated conditions are not adhered to, does not entitle the permit holder to a public hearing prior to such action.

EPA contends that these arguments for recommending disapproval are invalid for the following reasons:

(1) The Clean Air Act provides that a state has the authority to adopt, and EPA has authority to approve regulations governing control of indirect sources, when necessary to insure attainment or maintenance of the carbon monoxide and photochemical oxidant standards.

(2) It is reasonable to issue permits based on air quality criteria or factors necessary to carry out the intent and purpose of this regulation, especially when the regulation is explicit as to its intent and purpose. Therefore, Section 4.04 is not vague and is approvable.

(3) The West Virginia Administrative Procedure Act, W. Va. Code Ann. § 29A-5-4 (1971 Replacement Volume) authorizes "any party adversely affected by a final order or decision in a contested case" to appeal that decision to the circuit court. Thus, due process rights can be asserted on appeal from such action, and therefore, Section 9.03 is approvable.

Upon further evaluation by the Administrator, Regulation XIII meets the requirements of the Clean Air Act, and 40 CFR Part 51, Requirements for Preparation, Adoption and Submittal of Implementation Plans. In light of EPA's evaluation, the Administrator hereby approves the amendments to Regulation XIII of the West Virginia administrative regulations as a revision to the West Virginia SIP. At the same time, the Administrator hereby rescinds 40 CFR Section 52.2525, which corresponds to West Virginia's Regulation XIII.

Effective date—In view of the fact that the State of West Virginia is already conducting review under its amended regulation and that it will serve no useful purpose to defer the effective date of this revision for 30 days, the Administrator hereby finds good cause for making this rulemaking effective immediately.

Copies of West Virginia's Regulation XIII are available during normal business hours at the following locations:

U.S. Environmental Protection Agency, Region III, Curtis Building, Second Floor, Sixth and Walnut Streets, Philadelphia, Pa. 19106.

West Virginia Air Pollution Control Commission, 1558 Washington Street, East, Charleston, West Virginia 25311.
Public Information Reference Unit, U.S. Environmental Protection Agency, 401 M Street, SW., Washington, D.C. 20460.

(42 U.S.C. 1857 c-5)

JOHN QUARLES,
Acting Administrator.

OCTOBER 31, 1975.

Part 52 of Chapter I, Title 40 of the Code of Federal Regulations is amended as follows:

1. In § 52.2520, paragraph (c)(2) is revised to read as follows:

§ 52.2520 Identification of plan.

* * * * *

(c) * * *

(2) June 17 and November 8, 1974.

§ 52.2525 [Revoked]

2. Section 52.2525 is revoked.

[FR Doc.75-30090 Filed 11-7-75;8:45 am]

Title 45—Public Welfare

CHAPTER II—SOCIAL AND REHABILITATION SERVICE (ASSISTANCE PROGRAMS) DEPARTMENT OF HEALTH, EDUCATION, AND WELFARE

FINANCIAL ASSISTANCE

Safeguarding Information; Protective and Vendor Payments

Chapter II of Title 45 of the Code of Federal Regulations is amended to implement certain provisions of Public Law 94-88, approved August 9, 1975, which amend title IV of the Social Security Act, with respect to safeguarding information about applicants and recipients, the effective date for the requirement to assign support rights to the agency, and the limitations on Federal financial participation in vendor or protective payments. The purpose of the amendments is to bring the Department's regulations into conformity with the statutory changes which are already in effect. The basis for the amendments are the statutory changes which are discussed below:

A. *Safeguarding Information.*

1. Public Law 92-603, the Social Security Amendments of 1972 provided, under titles I, X, XIV, and XVI (AABD), for disclosure of information to public officials who need it in connection with their official duties.

2. Public Law 93-647, the Social Services Amendments of 1974, extended that provision to title IV-A.

3. Public Law 94-88 (untitled) deleted that provision from title IV-A, and limited release of information to purposes directly connected with the administration of certain Federal or Federally-aided programs.

The end result is that the provision for release to public officials in the broader sense is now applicable only to titles I, X, XIV and XVI (AABD). Since these titles have (for the 50 States and the District of Columbia) been superseded by a new title XVI (SSI), the further result is that the provision is effective only for Puerto Rico, the Virgin Islands, and Guam.

These changes are reflected in § 205.50. Title IV-D has been deleted from the opening sentence of § 205.50(a) because regulations pertaining to that title are published today under 45 CFR 302.18 at

B. *Effective Date*—Pub. L. 94-88 is effective August 1, 1975. This change is reflected in §§ 232.10(b) and 232.11(a)(4).

C. *Limitations on matching for protective or vendor payments.* Section 204 of Pub. L. 94-88 exempts such payments from the 10 percent limitation when they are required to be made because of the failure of caretaker relatives to assign support rights or cooperate in securing support.

This provision is implemented by changes in §§ 234.60(b)(2)(i)-(B), and 237.50(b)(1)(iv). Because of the urgent need to bring the Department's regulations into conformity with the statutory changes and because the provisions are of benefit both to State agencies and to applicants for and recipients of AFDC, the Department finds that there is good cause to dispense with Notice of proposed rulemaking. However, any written comments, suggestions or objections addressed to the Acting Administrator, Social and Rehabilitation Service, Department of Health, Education, and Welfare, P.O. Box 2366, Washington, D.C. 20013, and received on or before December 10, 1975, will be considered with a view to possible revision.

Such comments will be available for public inspection in room 5225 of the Department's offices at 330 C Street SW., Washington, D.C., beginning approximately two weeks after publication of this regulation in the FEDERAL REGISTER, on Monday through Friday of each week from 8:30 a.m. to 5:00 p.m. (area code 202-245-0950).

Chapter II, Title 45 of the Code of Federal Regulations is amended as follows:

1. Section 205.50 is amended by revising paragraphs (a) (b) and (c), adding a new paragraph (d), and redesignating paragraph (d) as (e). As revised, § 205.50 reads as set forth below:

§ 205.50 Safeguarding information for the financial assistance and social services programs.

(a) *State plan requirements.* A State plan under title IV-A of the Social Security Act, except as provided in paragraph (e) of this section, must provide that:

(1) Pursuant to State statute which imposes legal sanctions:

(i) The use or disclosure of information concerning applicants and recipients will be limited to purposes directly connected with: Such purposes include establishing eligibility, determining amount of assistance, and providing services for applicants and recipients.

(A) The administration of the plan of the State approved under title IV-A, the plan or program of the State under title IV-B, IV-C, or IV-D, or under title I, X, XIV, XVI (AABD), XIX, or XX or the supplemental security income program established by title XVI (SSI);

(B) Any investigation, prosecution, or criminal or civil proceeding conducted in connection with the administration of any such plans or programs; and

(C) The administration of any other Federal or federally assisted program which provides assistance, in cash or in kind, or services, directly to individuals on the basis of need. Under the requirements of this paragraph (a)(1)(i), disclosure to any committee or legislative body (Federal, State, or local) of any information that identifies by name and address any such applicant or recipient shall be prohibited; and certification of receipt of AFDC to an employer for purposes of claiming tax credit under Pub. L. 94-12, the Tax Reduction Act of 1975, (see § 235.40 of this chapter) shall be considered to be for a purpose directly connected with the administration of the plan.

(ii) The State agency has authority to implement and enforce the provisions for safeguarding information about applicants and recipients;

(iii) Publication of lists or names of applicants and recipients will be prohibited.

(2) The agency will have clearly defined criteria which govern the types of information that are safeguarded and the conditions under which such information may be released or used. Under this requirement:

(i) Types of information to be safeguarded include but are not limited to:

(A) The names and addresses of applicants and recipients and amounts of assistance provided (unless excepted under paragraph (e) of this section);

(B) Information related to the social and economic conditions or circumstances of a particular individual;

(C) Agency evaluation of information about a particular individual;

(D) Medical data, including diagnosis and past history of disease or disability, concerning a particular individual.

(ii) The release or use of information concerning individuals applying for or receiving financial assistance or services is restricted to persons or agency representatives who are subject to standards of confidentiality which are comparable to those of the agency administering the financial assistance or services programs.

* * * * * *

(b) *State plan requirements for the medical assistance programs.* A State plan under title XIX of the Social Security Act must meet all the requirements of paragraph (a) of this section, except that disclosure shall be limited to purposes directly connected with the administration of the medical assistance program under title XIX.

(c) State plan requirements for the social services programs in the 50 States and the District of Columbia. A State plan under title XX of the Social Security Act must meet all the requirements of paragraph (a) of this section, except that disclosure shall be limited to purposes directly connected with the admin-

V 40 217 NOV 10 75 XUM

istration of that program, the plan of the State approved under Part A of title IV, the plan of the State developed under Part B of that title, the Supplemental Security Income program established by title XVI, or the plan of the State approved under title XIX;

(d) *State plan requirements for programs of financial assistance and services in Puerto Rico, the Virgin Islands, and Guam.* A State plan under title I, X, XIV, or XVI (AABD) of the Social Security Act must meet all the requirements of paragraph (a) of this section and also provide for disclosure of information concerning applicants and recipients for use by public officials who require such information in connection with their official duties. Under this requirement, such information shall be available only to public officials who certify in writing that:

(A) They are public officials as defined by State or Federal law of general applicability; and

(B) The information to be disclosed and used is required in connection with their official duties.

(e) *Exception.* In respect to a State plan under title I, IV–A, X, XIV, or XVI of the Social Security Act, exception to the requirements of paragraph (a)(1)(iii) of this section may be made by reason of the enactment or enforcement of State legislation, prescribing any conditions under which public access may be had to records of the disbursement of funds or payments under such titles within the State, if such legislation prohibits the use of any list or names obtained through such access to such records for commercial or political purposes.

2. Section 232.10 is amended by revising paragraph (b) to read as follows:

§ 232.10 Furnishing of social security numbers.

The State plan must provide that:

* * * * *

(b) For new applicants, the requirements of paragraph (a) of this section shall be effective August 1, 1975; and, for current recipients, it shall be effective as determined by the State agency but not later than the time of the next redetermination of eligibility required by § 206.10(a)(9) of this chapter.

* * * * *

3. Section 232.11(a)(4) is revised to read as set forth below:

§ 232.11 Assignment of rights to support.

(a) * * *

(4) For new applicants, the requirements of paragraph (a) of this section shall be effective August 1, 1975; and for current recipients, it shall be effective as determined by the State agency but not later than the time of the next redetermination of eligiblity required by § 206.10(a)(9) of this chapter and in any event not later than February 1, 1976.

* * * * *

4. Section 234.60 is amended by revising paragraph (b)(2)(i) to read as follows:

§ 234.60 Protective and vendor payments for dependent children.

* * * * *

(b) * * *

(2)(i) In computing such 10 percent, the following individuals are not to be counted:

(A) Those with respect to whom protective payments or payments to persons furnishing goods or services are made for any month because of their refusal without good cause to participate in a work incentive program or because of their refusal without good cause to accept a bona fide offer of employment in which they are able to engage; or

(B) Those with respect to whom protective payments or payments to persons furnishing goods or services are made for any month because of the refusal of caretaker relatives to comply with the eligibility requirements of §§ 232.11 or 232.12 of this chapter.

* * * * *

5. Section 237.50 is amended by revising paragraph (b)(1)(iv) to read as set forth below:

§ 237.50 Recipient count, Federal financial participation.

* * * * *

(b) AFDC category. For the AFDC category under title IV, Part A, of the Act

(1) The recipient count for any month may include:

* * * * *

(iv) Eligible recipients in families not otherwise counted in whose behalf protective or nonmedical vendor assistance payments are made for such month, not to exceed 10 percent of the total recipients counted under subdivisions (i), (ii), and (iii) of this subparagraph. The 10 percent limitation does not apply with respect to individuals for whom protective or nonmedical vendor payments are made pursuant to section 402(a)(19)(F) of the Act because there has been a refusal without good cause to accept employment, work or training, or with respect to individuals for whom protective or vendor payments are made pursuant to section 402(a)(26) of the Act because of the failure of the caretaker relative to assign rights to support or to cooperate in determining paternity and securing support.

* * * * *

(Sec. 110249 Stat. 647 (42 U.S.C. 1302))

Effective date: Except as otherwise specified, these regulations shall be effective February 3, 1976, or earlier at State option.

(Catalog of Federal Domestic Assistance Program No. 13.761, Public Assistance-Maintenance Assistance (State Aid))

Dated: October 1, 1975.

JOHN A. SVAHN,
Acting Administrator, Social and Rehabilitation Service.

Approved: November 3, 1975.

DAVID MATHEWS,
Secretary.

CHAPTER III—OFFICE OF CHILD SUPPORT ENFORCEMENT (CHILD SUPPORT ENFORCEMENT PROGRAM) DEPARTMENT OF HEALTH, EDUCATION, AND WELFARE

PART 302—STATE PLAN REQUIREMENTS

PART 304—FEDERAL FINANCIAL PARTICIPATION

Rates of Federal Sharing; Safeguarding of Information

Chapter III of Title 45 of the Code of Federal Regulations is amended to implement certain provisions of Pub. L. 94–88, approved August 9, 1975, which amends part D of title IV of the Social Security Act. Those provisions relate to the operation of the State's Child Support Enforcement Program in the absence of an assignment of child support rights by the caretaker, and also Federal financial participation at the 50 percent rate for States which are operating Child Support Enforcement Programs under a waiver granted by the Secretary. The purpose of the amendments is to bring the Department's regulations into conformity with the statutory changes which are already in effect. The basis for the amendments are the statutory changes which are discussed below:

A. *Operation of the Child Support Enforcement Program in the absence of an assignment.* Section 203 of Pub. L. 94–88 provides that the States have until the next redetermination, but in no case later than February 1, 1976, to obtain assignments of support rights under section 402(a)(26)(A) of the Act for recipients of AID to Families with Dependent Children. This provision applies to States with laws which complied with section 402(a-(26)(A) as of August 1, 1975, and to those individuals who were recipients of aid as of that date. During this period the statutory requirements of establishing paternity, collecting child support, distributing child support collections and making incentive payments to States and political subdivisions opreate as if there were an assignment in effect. This provision is implemented by adding a new § 302.40.

In addition, if the State has an approved IV–D plan in effect the costs in relation to such activities are subject to Federal financial participation (FFP), until December 31, 1975, at the 75 percent rate as if there were an assignment in effect. New § 302.27 implements this provision.

B. *Federal financial participation at the 50 percent rate.* Section 201 of Pub. L. 94–88 provides for FFP at the rate of 50% for a State that is operating a Child Support Enforcement Program plan which meets all of the State plan requirements of Section 454 of the Act except those for which it has received a waiver granted by the Secretary in accordance with Section 201 of Pub. L. 94–88. This provision is implemented by a new § 304.28.

Chapter III is also amended by adding a new section to incorporate requirements for safeguarding information

identical to those currently applicable to title IV–A as specified in 45 CFR 205.50.

When final regulations implementing the Child Support Enforcement Program were published on June 26, 1975 (40 FR 27154), the State plan requirements for safeguarding information about applicants and recipients for the financial assistance and social services programs (45 CFR 205.50) were made applicable to title IV–D State plans. This was not a statutory requirement. The administrative purpose was to extend to information obtained under the title IV–D program the same protection afforded information obtained under the title IV–A program. The bases for the Secretary's decision to extend the same safeguards to the title IV–D program were the fact that the two programs serve essentially the same applicants and recipients and the statutory provisions require continuous exchange of information between the two programs, and the desire to fully comply with the spirit as well as the letter of the Privacy Act of 1974.

Good cause exists to dispense with the normal proposed rulemaking procedures because of the urgent need to bring the Department's regulations into conformity with the statutory changes accomplished by the additions of §§ 302.40, 304.27 and 304.28. Those procedures have been waived for § 302.18 because this amendment does not alter existing policy, but merely incorporates it as a separate State plan requirement in these regulations.

However, any written comments, suggestions or objections addressed to the Acting Director, Office of Child Support Enforcement, Department of Health, Education, and Welfare, P.O. Box 2366, Washington, D.C. 20013, and received on or before December 10, 1975, will be considered with a view to possible revision of these regulations.

Such comments will be available for public inspection in room 5225 of the Department's offices at 330 C Street, SW., Washington, D.C., beginning approximately two weeks after publication of this Notice in the FEDERAL REGISTER, on Monday through Friday of each week from 8:30 a.m. to 5 p.m. (area code 202–245–0950).

Parts 302 and 304, Chapter III, Title 45 of the Code of Federal Regulations are amended as follows:

1. Part 302 is amended by adding new §§ 302.18 and 302.40, as set forth below:

§ 302.18 Safeguarding information.

The State plan shall provide that: (a) Pursuant to State statute which imposes legal sanctions, the use or disclosure of information concerning applicants or recipients of child support enforcement services is limited to purposes directly connected with:

(1) The administration of the plan or program approved under parts A, B, C or D of title IV or under titles I, X, XIV, XVI, XIX or XX or the supplemental security income program established under title XVI.

(2) Any investigations, prosecution or criminal or civil proceeding conducted in connection with the administration of any such plan or program; and

(3) The administration of any other Federal or Federally assisted program which provides assistance, in cash or in-kind, or services, directly to individuals on the basis of need;

(b) These safeguards shall also prohibit disclosure to any committee or legislative body (Federal, State, or local) of any information that identifies by name or address any such applicant or recipient.

§ 302.40 Operation of the Child Support Enforcement Program in the absence of an assignment.

(a) In the case of any State the law of which on August 1, 1975 met the requirements of 45 CFR 232.11(a)(1), with respect to those recipients of assistance who continue to be eligible for assistance in the absence of an assignment pursuant to 45 CFR 232.11(a)(4), the provisions of §§ 302.31, 302.32, 302.51, and 302.52 shall apply as if there were an assignment in effect pursuant to 45 CFR 232.11.

(b) Section (a) remains in effect until December 31, 1975, and as of the close of business on that date it is repealed.

(Sec. 1102, 49 Stat. 647 (42 U.S.C. 1302))

2. Part 304 is amended by adding new §§ 304.27 and 304.28 to read as set forth below:

§ 304.27 Federal financial participation in the operation of the Child Support Enforcement Program in the absence of an assignment.

(a) Federal financial participation is available at the 75 percent rate for expenditures made under an approved State plan pursuant to 45 CFR 302.40 until December 31, 1975, irrespective of the requirement of an assignment in § 302.20(a)(1).

(b) This section remains in effect until December 31, 1975 and as of the close of business on that date it is repealed.

§ 304.28 Federal financial participation at the 50 percent rate.

For States to which a waiver has been granted by the Secretary pursuant to Section 201 of Pub. L. 94–88, Federal financial participation is available at the rate of 50 percent for the amounts expended by a State pursuant to a plan which meets the conditions, except as provided by such waiver, of Section 454 of the Act.

(Sec. 1102, 49 Stat. 647 (42 U.S.C. 1302))

Effective date: These regulations were effective August 1, 1975.

Dated: October 1, 1975.

JOHN A. SVAHN,
Acting Director, Office of Child Support Enforcement.

Approved: November 3, 1975.

DAVID MATHEWS,
Secretary.

[FR Doc.75-30123 Filed 11-7-75;8:45 am]

CHAPTER X—COMMUNITY SERVICES ADMINISTRATION

PART 1061—CHARACTER AND SCOPE OF SPECIFIC COMMUNITY ACTION PROGRAMS

CSA Policy Re Grants Funded Under Title X of the Public Works and Economic Development Act of 1965

In August 1975 the Department of Commerce announced the availability of a $375 million appropriation which had been made available for financing eligible projects under the Job Opportunities Program. All Federal departments, agencies and Regional Commissions were invited to recommend projects which have the potential to stimulate the creation of jobs for unemployed persons in eligible areas.

The Community Services Administration canvassed all of its grantees and other organizations eligible under the Community Services Act. Of the proposals submitted to the Department of Commerce, 231 were approved by that Department for funding. The Department will transfer $64.6 million to the Community Services Administration for the funding of the selected projects.

The purpose of this subpart is twofold: (1) to announce to all grantees listed in Appendix A the *reservation of funds* for their proposed projects for financial aid under the Job Opportunities Program; and (2) to set forth CSA's rules and regulations governing award of funds and implementation of the program.

Due to the emergency nature of the program and the legislative requirement that funds be obligated by December 31, 1975 these regulations are being filed as interim regulations effective November 10, 1975. However, CSA will consider comments and revise its regulations accordingly if warranted. Please address all comments to: Mr. Angel F. Rivera, Associate Director for Operations, Community Services Administration, 1200–19th Street, NW., Washington, D.C. 20506.

Sec.

1061.40–1 Applicability.
1061.40–2 Definition.
1061.40–3 Policy.
1061.40–4 Funding.
1061.40–5 Organizations/agencies eligible for Title X Funds.
1061.40–6 Program conditions.
1061.40–7 Application process.
1061.40–8 Reporting requirements.
1061.40–9 Additional requirements.

AUTHORITY: Sec. 602, 76 Stat. 530; 42 U.S.C. 2942.

Effective: November 10, 1975.

BERT A. GALLEGOS,
Director.

§ 1061.40–1 Applicability.

This subpart is applicable to grantees funded under Section 222(a) of the Community Services Act of 1974 for projects/activities under the terms of the Job Opportunities Program, Title X of the Public Works and Economic Development Act of 1965 when the financial assistance

V 40 217 NOV 10 75 XUM

is administered by the Community Services Administration.

§ 1061.40–2 Definition.

An *eligible area* is: (a) Any area which the Secretary of Labor designates as an area which has a rate of unemployment equal to or in excess of 6.5 percent for three consecutive months;

(b) Any area which is designated by the Secretary of Labor pursuant to Section 204(c) of CETA; and

(c) Any area which is designated by the Secretary of Commerce pursuant to Section 401 of the Public Works and Economic Development Act of 1965 as a redevelopment area.

§ 1061.40–3 Policy.

The policy of the Department of Commerce is that the funds are to be administered under the rules and regulations of the agency to which the funds have been transferred. Therefore, grantees listed in Appendix A to this subpart will be funded for Title X activities under Section 222 (a) of the Community Services Act of 1974 and all rules and regulations applicable to that section of the Act will apply to projects under the Job Opportunities Program when financial assistance is administered by CSA. (See CSA Instruction 6000–2a, Applicability of Directives.) Exception: See § 1061.40–4, Funding.

§ 1061.40–4 Funding.

(a) Because Title X does not require a non-Federal share contribution and due to the emergency nature of the program, CSA Instruction 6802–3 (§§ 1068.20–1 thru 1068.20–7) implementing Section 225(c) of the Community Services Act will not apply to grants under the Job Opportunities Program. Therefore, in cases where no non-Federal contributions have been mobilized, the Federal contribution will be equivalent to 100 percent of the approved costs of the assisted program. Of course, grantees are always encouraged to seek non-Federal contributions toward total program costs.

(b) Each proposed project submitted to Commerce via CSA was a prospectus rather than a formal application. Therefore, each grantee whose project has been selected by Commerce must now file a formal application, consistent with the project outlined in its submission to Commerce and within the constraints of the funds approved, in order to fulfill certain legal and administrative requirements.

§ 1061.40–5 Organizations/agencies eligible for Title X Funds.

(a) Those agencies/organizations for whom funds have been transferred to CSA and reserved for projects to be undertaken under the Job Opportunities Program, Title X of the Public Works and Economic Development Act of 1965 are eligible to submit applications for funding of those projects.

(b) Any of the above grantees may enter into contracts or subgrants under the provisions set forth in OEO Form 280, *Agreement for Delegation of Activities.*

§ 1061.40–6 Program conditions.

(a) *Eligible Participants.* All projects must hire unemployed persons who reside in the eligible area. Preferred consideration, to the maximum extent feasible, will be given to persons who have exhausted unemployment benefits, to unemployed persons who are not eligible for unemployment benefits (except for persons lacking work experience) and to unemployed persons who have been unemployed for fifteen or more weeks. All grantees must insure that, in addition, all participants employed under this program meet CSA income eligibility criteria. (See CSA Instruction 6004–1h (§§ 1060.2–1–1060.2–4).) However, when a grantee is unable to recruit unemployed persons who reside within the area in which the project is located:

(1) The grantee may seek an unemployed person to fill the job from outside of the eligible area;

(2) If the grantee is still unable to recruit such unemployed person from outside of the area, a person who is not unemployed and resides within the area may be hired;

(3) In either of the above two situations, memoranda must be maintained in the grantee's project records of efforts to hire the unemployed.

(b) *Method of Recruitment.* Grantees shall utilize the services of the State Employment Service, Comprehensive Employment and Training Act (CETA) prime sponsors, or other appropriate local job-referral agencies or methods.

(c) *Start-up Deadline.* All positions resulting from financial aid received under this program must be filled no later than March 1, 1976 unless delayed by climatic conditions, in which case employment will begin as soon as practical. (If employment does not commence at that time the Department of Commerce rules require that funds be deobligated and returned to the Department.)

(d) *Non-Personnel Costs.* No funds will be provided to projects which have more than 25 percent necessary non-labor costs unless it meets one of the following conditions:

(1) The funds are to be used to fund jointly a program authorized under Title II or VI of the Comprehensive Employment and Training Act of 1963, as amended, for necessary non-labor costs such as materials, supplies and equipment, if the overall project will provide a substantial number of jobs in an area of high unemployment; or

(2) The funds are to be used to supplement funds of other Federal agencies or from non-Federal sources in order to permit the prompt initiation of projects which will stimulate the creation of jobs for unemployed persons in eligible areas, and where these supplemental funds provide not more than 20 percent (20%) of the total project costs. Grantees shall certify on CAP Form 25 that other funding sources are not otherwise available and they shall estimate and document the number of jobs which are projected to result from this financial assistance; or

(3) The program, project, or activity funded will directly result in the creation of a significant number of permanent jobs in the private sector of the economy. Grantees shall certify on CAP Form 25 that other funding sources are not otherwise available and estimate and document the number of jobs which are projected to result in the private sector from this financial assistance.

(4) (Note: All projects funded must be consistent with the proposals originally submitted on the Department of Commerce Form SEC–887, Summary of Evaluation and Findings—Title X. No waiver of the 25 percent non-labor costs limitation shall be approved if doing so would result in changing the labor intensity figure contained in the initial Title X proposal which was one of the key determining factors in the selection of projects.)

(e) *Duration of Projects.* (1) At least 75 percent of each project must be completed within 12 months from the effective date of the grant. The Director may suspend or terminate the grant in whole or in part for non-compliance.

(2) In no event will grants be made for a period to exceed 15 months.

§ 1061.40–7 Application process.

(a) *Required Forms.* (1) The forms and other documents to be used in applying for funding under the Job Opportunities Program are being made available as an enclosure to CSA Instruction 6102–1 which will be forwarded to all eligible grantees.

(2) The forms are to be submitted to the appropriate CSA Regional Office.

(3) The forms to be used are as follows:

(i) CSA Form 419, Summary of Work Programs and Budget (See OEO Instruction 6710–1, CH6.) (Note: Goals and activities must also be consistent with the standards of effectiveness for Title II projects as outlined in CSA Instruction 7850–1a and the Form 419 must reflect these standards.)

(ii) CAP Form 25, Program Account Budget (See OEO Instruction 6710–1.)

(iii) CAP Form 25a, Program Account Budget Support Sheet (See OEO Instruction 6710–1.)

(iv) Statement of Accounting System Certification (Appendix B to this subpart) (New grantees only)

(v) CAP Form 11, Assurance of Compliance with OEO's Regulations Under Title VI of the Civil Rights Act of 1964 (New grantees only)

(vi) Narrative Proposal (See Appendix C)

(vii) OEO Form 394, Checkpoint Procedures for coordination (See OEO Instruction 6710–1, CH5)

(b) *Deadline for submission.*—All applications must be submitted to the appropriate Regional Office no later than November 21, 1975.

§ 1061.40–8 Reporting requirements.

(a) *Weekly Payroll Reporting Form—Title X (ED–110X).* The Department of Commerce will be conducting a comprehensive evaluation to determine the effectiveness of the Title X program as an anti-recessional tool. *Selected* grantees shall be required to provide data by completing ED–110X on a weekly or payroll period basis. Grantees required to submit this form will be notified by CSA at a future date and a supply of forms will be provided by CSA.

(b) *Program Progres Report (PPR) (OEO form 440).* Grantees will submit a Program Progress Report, OEO Form 440, summarizing accomplishments during the first 5 months of the funding period and a second PPR report summarizing the entire year funding period. (See OEO Instruction 7031–1.) These will be due in the appropriate CSA Regional Office not later than 180 days after the beginning of the funding period and 60 days after the end of the funding period respectively. The 5th month PPR will include the required Transition Employment Plan referenced in the Narrative Proposal.

(c) *Financial Reporting.* Grantee Quarterly Financial Reports, CSA Form 315 and Form 315a, are to be submitted to the appropriate CSA Regional Office in accordance with the requirements and procedures found in OEO Instructions 6807–2 and 6807–2, CH1.

(d) *Department of Commerce Additional Reporting Requirements.* Grantees will be informed at a later date of additionally reporting requirements imposed by Commerce with which they must comply.

§ 1061.40–9 Additional Requirements.

(a) *Bonding (NEW GRANTEES ONLY).* CSA must receive written assurance, prior to release of funds, from grantees who are not currently funded by CSA that arrangements have been made for appropriate bonding of grantee officials. (See Appendix D.)

(b) *Auditing.* Audits will be conducted consistent with policy promulgated in OEO Instructions 6801–1 and 6801–1, CH1.

(c) *Evaluations.* All grantees are required to undertake self-evaluations. In addition, CSA may undertake on-site evaluations of selected projects. Grantees may be requested to participate in and be required to provide necessary data for these evaluations.

APPENDIX B

Statement To Be Submitted by Appropriate Public Financial Officer when the Applicant Is a Public Agency or when the Accounting System of a Private-Nonprofit Agency Will Be Maintained by a Public Agency.

(*Address of Regional or Program Office of CSA, as appropriate*)

Dear Sirs: I am the chief financial officer of (*name of public body*) and, in this capacity, I will be responsible for providing financial services adequate to insure the establishment and maintenance of an accounting system for the (*name of applicant*), which is a public (*or non-profit*) agency charged with carrying out a CSA program in (*name of community*). The accounting system will have internal controls adequate to safeguard the assets of such agency(*ies*), check the accuracy and reliability of accounting data, promote operating efficiency, and encourage compliance with prescribed management policies of the agency(*ies*).

_____
Signature of financial officer

_____

APPENDIX C

CONTENTS OF NARRATIVE PROPOSAL

The narrative proposal should include:

1. A profile of economic conditions for area served.
2. Economic problem addressed and specific categories of unemployment.
3. The expected impact of this program on the unemployment of the area.
4. Non-CSA resource opportunities mobilized and/or planned.
5. Describe how this program will be integrated with grantees' on-going projects to expand results.
6. Method and criteria for participant recruitment and selection.
7. Project schedule of participant hiring.
8. Description of basic approach for transitioning participants into permanent unsubsidized jobs (Transition Employment Plan).
9. Availability of skills among the unemployed persons in the project area to meet the skill needs and be hired on the proposed project.
10. Plans for subcontracting including justification for choice of delegates.

APPENDIX D

G.5 e. Bond coverage of officials. Prior to the release of funds to any grantee, public or private, for the first initial grant, OEO must receive written assurance that arrangements have been made for appropriate bonding of grantee officials. This assurance may either take the form of a statement that no bond is needed (in line with the conditions noted below) or it may consist of a letter from a bonding company or agent stating the type of bond, amount and period of coverage, positions covered, and the annual cost of the bond that has been obtained.

A bond does not need to be provided by a grantee, public or private, if funds are to be deposited in a public treasury and disbursed and audited by local or State public officials who normally perform these duties. In this case, the financial role of the officials of the grantee agency must be limited to making withdrawals from the Federal Reserve System for deposit in the public treasury and certifying appropriate expenditures for disbursement. Nor does a grantee which is a public agency need to provide a new bond if all employees who are authorized to sign or countersign checks on the grantee's commercial bank account or to disburse cash are already bonded, in an amount consistent with local requirements and practices.

In all other situations, grantees—whether public or private agencies—must take steps to secure fidelity bond coverage in line with the following guides:

(1) Coverage should be secured in the aggregate amount of $25,000 for persons authorized to sign or countersign checks or to disburse sizeable amounts of cash (such as for payrolls). Persons who handle only petty cash need not be bonded. Nor is it necessary to bond officials who are authorized to sign Payment Vouchers, but who are not authorized to sign or countersign checks or to disburse cash.

(2) Grantees normally should obtain a 3 year bond, payable annually, with an option to cancel in the event the program terminates before three years. Such terms are available from most surety companies.

(3) Grantees are responsible for assuring that appropriate officials of delegate agencies are bonded. Existing bond coverage on officials of delegate agencies which are public agencies shall be considered acceptable. Coverage for officials of delegate agencies which are private organizations shall be equal to the average of funds to be expended each month (up to an aggregate amount of $25,000.) If a delegate agency will expend less than $1,000 per month in program funds, on the average, bond coverage is not required.

(4) Copies of bonds secured by the grantee and by delegates agencies should be filed by the grantee and need not be submitted to OEO.

CHAPTER XII—ACTION

PART 1221—RETIRED SENIOR VOLUNTEER PROGRAM COST SHARING

On April 24, 1975, there was published in the FEDERAL REGISTER (40 FR 18002), a notice of proposed rule making to add a new Part 1221 to Title 45. This provides regulations to implement section 201(b) of the Domestic Volunteer Service Act of 1973, Pub. L. 93–113, 87 Stat. 402, as amended by section 4 of an Act to amend Title VII of the Older Americans Act, Pub. L. 93–351, 87 Stat. 358. These regulations prescribe the annual percentage limitations for required local contributions for grants under the Retired Senior Volunteer Program (RSVP). They also provide for exceptions to the published limitations in case of demonstrated need.

Some clerical errors were noted and corrections were made in the proposed regulations. All comments submitted with respect to the proposed new Retired Senior Volunteer Program Cost Sharing regulations were given due consideration.

As a result of comments received, the following clarifying changes are made:

1. Section 1221.1 is amended as follows:

a. On lines 6–8 delete "annual percentage limitations of required local contribution" and substitute "maximum local share contribution required"; b. Insert "share" after "local" on line 11; c. On line 18 delete "these limitations" and substitute "the required local cost sharing." The adopted changes help clarify the cost sharing activity related to the community.

2. Section 1221.4 has its title changed to "Failure to meet local cost sharing commitment." The modification is more indicative of the section content.

In addition to the foregoing changes, a number of suggestions were made but are not adopted. The comments below are to relevant sections, subjects covered, and reasons why suggestions are not incorporated in the final regulations.

1. Several comments to amend § 1221.2(a) were offered. The suggested changes would require less local cost-sharing. A number of socio-economic reasons were provided to justify RSVP project reliance on the Federal Government for most of its support. Some of the reasons included economic depression in local areas; keen competition for local service dollars; communities are not oriented toward service programs for the elderly; the RSVP does not have a tangible impact on older people in comparison to other program.

Consideration was also given to the fact that the present RSVP cost-sharing schedule has been in effect one year. During the past year, only five requests for exceptions have been received by ACTION. The mechanism for exception exists; its use is being carefully analyzed. Section 1221.3 of this Part identifies the procedure for reviewing exceptions.

2a. A comment with respect to the composition of the proposed National Exceptions Review Board in § 1221.3, suggested that representation of project sponsors be included. It is felt that project sponsors have an apportunity to present at length, every supportive fact and kind of reasoning they can.

b. A recommendation was also made that exceptions to the cost-sharing schedule be made by an appropriate ACTION Regional Director rather than by the National Exceptions Review Board. The reason given was that a Regional Director is closer to the community. The Retired Senior Volunteer Program is national in scope, operating with limited federal funds. Equitable distribution of such limited funds can best be coordinated at the national, not regional levels of ACTION. Further, national programs management requires consistency in project operations.

3. The comment was made to have language in § 1221.4(a) delete reference to the cost-sharing commitment and substitute "required contribution amount." The existing phrase: "cost-sharing commitment" is preferred because it reflects the sponsor's percentile commitment to the total project budget in return for federal dollars. The commitment may not be precisely the required amount. It is felt that this new section is a fair and equitable addendum to the existing cost-sharing procedures.

4. A change was suggested in section 1221.5 to prohibit ACTION from administratively altering budget periods. The response held that RSVP sponsors should request the extension or reduction in a budget year to allow project conformity with a sponsor's funding dates, budget year, or accounting practices. ACTION alters budget periods only when necessary to meet its fiscal management responsibilities. The alterations will, however, be kept to a minimum.

Accordingly, with these changes, additions, and clarifications, the proposed new Part 1221 is adopted as set forth below.

JOHN L. GANLEY,
Deputy Director.

Sec.
1221.1 Introduction.
1221.2 RSVP cost sharing schedule.
1221.3 Procedure for exception to the RSVP cost sharing schedule.
1221.4 Failure to meet local cost sharing commitment.
1221.5 Administratively altered budget periods.

AUTHORITY: Sec. 211(b) of Pub. L. 93–113, 87 Stat. 402 as amended by section 4 of Pub. L. 93–351, 87 Stat. 358.

§ 1221.1 Introduction.

Section 201(b) of the Domestic Volunteer Service Act of 1973, Pub. L. 93–113, 87 Stat. 402 (the Act), as amended by section 4 of An Act to Amend Title VII of the Older Americans Act, Pub. L. 93–351, 87 Stat. 358, prescribes the maximum local share contribution required for grants under the Retired Senior Volunteer Program (RSVP). The required local share contribution may not exceed the following annual percentages of approved project budgets: 10 percent in the first year; 20 percent, the second; 30 percent, the third; 40 percent, the fourth and 50 percent in any subsequent years. Section 201, of the Act also provides that the Director of ACTION may make exceptions to the required local cost sharing in cases of demonstrated need.

§ 1221.2 RSVP Cost-Sharing Schedule.

(a) The following RSVP cost-sharing schedule identifies for each budget period, normally one year, the required percentage of the local cost-sharing to approved project budgets of RSVP project sponsors as well as the Federal contribution:

Budget period	Federal	Local (nonfederal)
1	90%	10%
2	80%	20%
3	70%	30%
4	60%	40%
5 and beyond	50%	50%

Local contributions may voluntarily exceed the annual required local contribution in any year. However, such voluntary contributions shall not be a consideration for receiving, nor determining the size of, any RSVP initial or continuation grant.

(b) Exceptions may be made by the Director to these nonfederal cost-sharing requirements in unusual situations, with consideration given to the financial capabilities of the grant applicant, the availability of community support for RSVP and availability of other qualified applicants. Applicants will be required to substantiate the need for an exception. The need for continuation of an exception will be evaluated annually based on the merits and progress of a project and the best interests of RSVP volunteers, the community in which they serve, and ACTION.

(c) An RSVP continuation grant shall not be awarded to a sponsor unable to meet the agreed to cost-sharing commitment for the preceding budget period. Time for meeting the commitment, however, may be extended or waived by ACTION under exceptional circumstances.

§ 1221.3 Procedure for exception to RSVP Cost-Sharing Schedule.

A written request to the appropriate ACTION Regional Office for an exception to the RSVP Cost-Sharing Schedule will be transmitted by the Regional Director to the Director for Older Americans Volunteer Programs together with a recommendation on the request and all supporting data. The request will be evaluated and a recommendation made by a National Exceptions Review Board, comprised of the Associate Director of ACTION for Domestic and Anti-Poverty Operations, the Director of the Budget Division of ACTION, and the General Counsel for ACTION or their designated representatives. All requests will be acted on within two weeks after receipt of the request for an exception. The grant applicant will be advised in writing of the decision by the Director or the Director's designee and reasons for the decision.

§ 1221.4 Failure to meet local cost-sharing commitment.

(a) If by the end of the third quarter of a budget period a sponsor is unable to meet the current cost-sharing commitment, a continuation grant award may be considered only when:

(1) A full effort has been made by the sponsor to carry out the cost-sharing plan approved by the current grant award, and the circumstances causing the deficiency are found by the ACTION Regional Director to be the result of unusual or unforeseen circumstances, and

(2) There is reason to believe the deficiency, in addition to the required local share for the new budget period, can be fully made up before the end of the third quarter of a new budget period, and

(3) The project achievements and the project potential clearly merit special consideration.

(b) If at the end of a budget period, it first appears there has been a failure of the RSVP sponsor to provide or obligate the nonfederal share of the RSVP budget, it constitutes a breach of the conditions of the grant. As a consequence, the ACTION Regional Director will:

(1) Request the RSVP sponsor to identify:

(i) Why the commitment was not met, and identify specific efforts made to obtain the required nonfederal contribution.

(ii) The anticipated sources and amounts of local support for continuation of the project in the new budget period.

(iii) The kind of technical assistance requested from ACTION to improve the sponsor's capacity to develop local resources in support of RSVP.

(2) After review of this information:

(i) Choose to waive all or part of the unmet cost-sharing commitment,

(ii) Disallow the Federal support for which there was insufficient cost-sharing funds and require the sponsor to reimburse ACTION for the amount disallowed,

(iii) Accept sponsor's offer to add the nonfederal deficiency to the budget of a continuation grant, specifying which budget categories will be increased and by what amounts, or

(iv) Initiate suspension and/or termination proceedings under Part 1206.

§ 1221.5 Administratively altered budget periods.

(a) The budget period for RSVP grants may be shortened or lengthened by ACTION for administrative purposes. If the current budget period is shortened, the sponsor is obligated to honor his cost-sharing commitment, but only as a percentage of the total grant funds expended. The sponsor's cost-sharing commitment for a subsequent continuation grant shall be in accordance with the RSVP Cost-Sharing Schedule, except that the percentage may be reduced for a budget period by one percentage point for each month the sponsor's previous budget period was shortened.

(b) If during the first four years of a project, the budget period is lengthened to more than twelve months, the percentage of the sponsor's cost sharing obligation will remain the same.

Issued in Washington, D.C. on November 10, 1975.

Title 46—Shipping

CHAPTER IV—FEDERAL MARITIME COMMISSION

[Docket No. 72-41; General Order 35]

PART 526—FREE TIME AND DEMURRAGE CHARGES ON IMPORT PROPERTY APPLICABLE TO ALL COMMON CARRIERS BY WATER

PART 551—TRUCK DETENTION AT THE PORT OF NEW YORK

By notice of proposed rulemaking published in the FEDERAL REGISTER on August 23, 1972, the Commission served notice that it intended to promulgate certain rules and regulations to implement an equitable solution to the delays in the handling and interchange of freight between ocean and motor carriers experienced at the Port of New York. Comments from interested parties were solicited. These proposed rules are intended to supersede the truck detention rules promulgated by the Commission in Docket No. 1153, *Truck and Lighter Loading and Unloading Practices*, 12 F.M.C. 166 (1969). Following publication, and in response to a petition filed by Middle Atlantic Conference, the Commission issued an Amended Notice of Proposed Rulemaking providing for filing of responses to comments. Eighteen comments were submitted in this proceeding by, or on behalf of, a wide range of interested parties. Replies to these comments have been filed by Hearing

V 40 0217 NOV 10 75 XUM

Counsel and 11 answers to Hearing Counsel's replies have also been submitted. Subsequent to the submission of these answers, Hearing Counsel petitioned the Commission to take testimony limited to the factual issues surrounding § 551.2(a)(i) [section B(1)(a)][1] which precludes prelodging of delivery orders and dock receipts at marine terminal facilities at the Port of New York on the grounds that there appeared to be disputes of fact concerning the present practice of prelodging documents, operational and procedural problems caused by such prelodging, and acceptable alternatives to the prelodging rule. The Commission, noting that with the exception of those comments filed pertaining to the prelodging rule it had sufficient information to promulgate a final rule, granted Hearing Counsel's request and directed that the Administrative Law Judge issue a recommended decision thereon.

Administrative Law Judge Charles E. Morgan issued his Initial Decision on the prelodging issue to which exceptions and replies thereto were filed. The positions of the various parties on the prelodging of delivery orders and dock receipt are discussed herein. Also, because of the many and varied revisions incorporated into our final rule, we have discussed below certain other portions of the rule and the comments submitted with respect thereto. Our final rules promulgated herein have been drafted with careful consideration given the parties. Comments and arguments not specifically discussed or reflected herein have been nevertheless considered and found not relevant nor material.

Section 551.1(b) [section A2] defines a terminal operator. One commentator urges us not to exclude from that definition "marine terminal facilities operated or controlled by the Department of Defense." We find such a request to be inconsistent both with the provisions of 46 CFR 533.3 and with the policy of avoiding conflict between agencies of the U.S. government which might result from an attempt by one such agency to regulate the activities of another. However, in order to make clear the scope of these regulations, we have limited the applicability of the "terminal operator" definition to the "purposes of this Part."

While no specific comments were directed to § 551.1(c) [section A3], which identifies the type of entities which will be subject to the tariffs of terminal operators, we have, for the sake of clarity and consistent with the suggestion of Hearing Counsel, amended § 551.1(c) by inserting the word "including" between the terms "terminal operators" and "steamship companies acting as terminal operator."

Section 551.1(d) [section A4], which identifies the types of persons who "shall be entitled to receive remuneration in accordance with the provisions of this Rule," has been amended to clarify who is to ultimately benefit from charges collected pursuant to these rules.

Several parties commented on § 551.1(g) [section A7], which sets forth the conditions under which "a terminal" operator would not be assessed a penalty under these rules "if receipt or delivery of cargo . . . is prevented or delayed." In addition to strikes, work stoppage, and several unusual weather conditions, we are asked to include "acts of God," "fires," "serious accidents," "work slowdowns," and "congestion in anticipation of a strike of longshoremen or following the termination of such a strike." One party who opposes this suggestion sees no reason why the terminal operator should be excused from compliance with the rules, and therefore, rather than expanding the proposed exceptions would limit the existing exception to those instances where the "strike" or "work stoppage" is not the result of a violation of the collective bargaining agreement between the terminal operator and its employees.

While we sympathize with those parties who want to add "congestion" and "work slowdown" to the list of exceptions, we are nevertheless in full agreement with the position of Hearing Counsel that terminal operators cannot absolve themselves of all of their responsibilities under this rule. The objective behind this provision is to incorporate the distinction previously drawn by the Commission between work slowdowns and insufficient equipment which tends to delay operations, *and* strikes, work stoppages, or unusual weather conditions or other such causes which terminate operations. The former is the responsibility of the terminal operator; the latter is beyond his control, relieving him of detention payments. See *Truck and Lighter Loading and Unloading Practices, supra*, at 170, notes 179. Thus, since it is our intention that terminal operators be free from liability for situations over which they have no control, we have expanded § 551.1(g) to include acts of God, fires, and serious accidents as causes absolving the terminal operator. The question of whether or not a particular condition is so severe as to exonerate the person against whom a claim is made is the subject of § 551.1(j) [section A10].

Section 551.1(h) [section A8] sets out other conditions under which a terminal operator will not be liable for delay. One commentator suggests that this section be amended to make it clear that the existing trade practice whereby the terminal operator is required to sort/separate shipments on a single bill of lading by marks will continue to be permitted. In response thereto, another party points out that this section does not prohibit receipt or delivery of cargo by marks and numbers or any other service requiring the sorting of cargo, other than by bill of lading, at the request of the shipper, consignee or motor carrier, but merely excludes such shipments from the coverage of the proposed rule. The purpose of § 551.1(h) is to provide that the shipper-importer will be responsible for delays where the terminal operator is required to sort or separate shipments by marks. Additionally, and since, as was pointed out by one of the parties, terminal operators are required as part of their operations to segregate incoming/outgoing shipments by bills of lading, § 551.1(h) contemplates that as to a single motor carrier loading/unloading multiple LTL shipments, time, for purposes of this rule, shall not be computed separately for the loading/unloading of each shipment, as urged by one of the parties, but rather shall accrue during the entire time the vehicle is being loaded/unloaded. This, however, should not be confused with § 551.2(a)(2) [section B.1(b)], dealing with several vehicles picking up/delivering multiple shipments on a single delivery order/dock receipt, where time shall be computed separately for each vehicle loaded/unloaded on an open delivery order or dock receipt. Finally, §551.1(h) has been amended to reflect Hearing Counsel's suggestion that terminal operators not be held liable for delays caused by U.S. government regulations.

We find merit in one party's observation that if procedures on the docks are to be sped up, it must be realized that delay is incurred by motor carriers with regard to empty as well as stuffed containers. Consequently, we have modified § 551.1(i) [section A9] by the addition of the following sentence: "For purposes of this Part, 'containers' shall include empty as well as stuffed containers."

Section 551.1(k) [section A11] establishes procedures to be followed by terminal operators who elect to deliver breakbulk cargo to motor carriers prior to full discharge and is not concerned, as one of the commentators believes, with situations involving the stripping of containerized cargo. Moreover, this section does not require but merely permits the terminal operator to effect delivery before the vessel is discharged. Because § 551.4(i) [section D9] makes it the responsibility of the consignee or his agent (motor carrier) to determine when a cargo is available (at nonappointment piers) and § 551.3(b) [section C2] will not allow appointments unless the cargo is properly available, the terminal operator has to advise the motor carrier only when the cargo is so available. For example, until breakbulk shipments have been stripped from the container, there is nothing which obligates the terminal operator to make delivery as soon as the vessel discharged its unstripped containers.

Another party suggests that because the documents in the possession of the terminal operator do not always show the identity of the motor carrier that will pick up the cargo; language should be added to § 551.1(k) requiring the terminal operator to make a reasonable effort to ascertain the party to receive such notice and effect the same. We question the practical necessity of such a revision since it is only reasonable to presume that the terminal operator would, in the interest of sound business practice, make all reasonable efforts to contact the appropriate person in order to have cargo removed from the pier prior to full discharge. Common sense would likewise dictate that if this person cannot be ascertained, no notification would be issued. Nevertheless, in our final rule we have substituted "the consignee or its designated agent" for "motor carrier" as the person to be notified by the terminal operator. Lastly, we agree with the suggestion of one commentator that in order to avoid any question as to whether, in fact, authority was or was not given, section 551.1(k) should be modified to require that the terminal operator employee authorizing the delivery of cargo prior to the vessel being fully discharged be identified.

Section 551.1(l) [section A 12], in effect, allows the terminal operator the option of selecting the system under which it will operate. One party is of the opinion that the terminal operator will opt more often for the nonappointment system where detention time begins to run from the time validated on the gate pass as provided in § 551.6(b). In this regard, it is argued that this section should be amended to operate in harmony with ICC tariffs by deleting the nonappointment and combination procedures and keeping only the appointment system wherein truck detention time begins when the motor carrier arrives at the gate. We cannot agree. To implement such a suggestion would, in our opinion, deprive the terminal operator of the prerogative to institute a procedure that would best implement the objectives of the proposed rules. The proposed rules are geared toward the expeditious loading/unloading of cargo which of necessity entails a smooth procedure between the terminal operator and motor carriers and are not concerned with the relationship between motor carrier and shipper. Our final rule, however, reflects the suggestion of two of the parties that § 551.1(l) be modified to require that any change in the procedures at a given pier should only be made on thirty (30) days' notice and upon the filing of an appropriate tariff amendment effecting such change.

Section 551.2(a)(1) [section B1(a)], as originally proposed, prohibited the prelodging of delivery orders and dock receipts. Upon review of the record in this proceeding we remain convinced that prelodging of delivery orders causes not only delay and congestion but also sets the stage for what could become serious security problems at the Port. As concerns the former, we find merit in one party's observation that an incomplete prelodged delivery order causes not only delay to the motor carrier concerned while the receiving clerk perfects the delivery order or prepares a new one, but also hinders the progress of the other trucks who have the proper documentation but cannot proceed until the initial problem has been resolved.

Some commentators argue that not only will prelodging not unnecessarily impede the free movement of import cargo, but a prohibition of prelodging will result in additional expenses for shippers and consignees using the Port. In support thereof, it is contended that the prelodging of delivery orders is necessary because of the five-day limit on free time on imports. With fast container service and slow mails, it is submitted that the customhouse broker is occasionally delayed in processing the import, especially if the goods arrive in several containers, to the point where free time is about to expire and therefore must telephone the pickup order to the motor carrier and lodge the delivery order at the pier if the trucker is to get his goods before his free time expires. Also, it is argued that by prelodging the delivery order the clerk can verify, in advance of the arrival of the motor carrier, that the freight has been paid and the original bill of lading has been delivered to the ocean carrier, a procedure that allegedly can cut down on delays. Whatever the merits of these arguments, the fact remains, as the Administrative Law Judge found, that when a trucker does not have in his possession a full and complete delivery order upon arrival at the pier, delay, *in fact*, occurs. The movement of cargo from the piers is appreciably slowed down while the terminal personnel are straightening out the problems created by an incomplete or lost prelodged delivery order. One of the purposes of this proposed rule is to better define the responsibilities of all parties involved at the Port for the expeditious interchange of cargo. We believe a prohibition on prelodging delivery orders is consistent with such purpose.

Except to the extent the Administrative Law Judge recommended that a $15 fee be levied for the handling of each prelodged dock receipt discussed in detail *infra*, we agree with his findings as they relate to the practice of prelodging such documents. Exceptions taken to the Administrative Law Judge's conclusion that the prelodging of dock receipts does not cause any significant truck detention at the Port reiterate the arguments supporting the prohibition of the prelodging of delivery orders, the essence of which is based on allegations of port congestion and delay in service. It is their position that it would be just as easy to hire a special messenger to deliver the dock receipt to the truck terminals within the Port area, as it is to deliver them to piers. We disagree. Such a procedure would be expensive for the shipper since the messenger would more often than not just "wait around" truck terminals to meet motor carriers. Moreover, and considering the traffic problem in and around the city, it would be most impractical to meet the motor carrier and/or -"gypsy truckers", who has no truck terminal, at a predetermined place. In any event, there has been presented ample evidence that delay at the Port is not due primarily from the prelodging of dock receipts, which, as a matter of record, occurs only with a small percentage of export cargo, but instead is due to the prelodging of delivery orders.

Finally, there are those situations where prelodging of the dock receipt is the only practical solution if there is to be a prompt receipt of the export cargo in order that the motor carrier can unload as soon as it arrives at the piers. For instance, and as observed by the Administrative Law Judge, when the exporter wished to take advantage of infrequent sailings by utilizing overnight shipments (i.e., shipments which leave the point of origin the night before and arrive at the docks the following morning), the forwarder, of necessity, must prelodge the dock receipt at the marine terminal in lieu of delivering it to a truck terminal. Similarly, the prelodging of dock receipts at the pier is more desirable than to have to decide as to which of at least two carriers involved with long-haul shipments will be the recipient of the dock receipt; particularly, since truckers "swap" tractors and trailers, and may go directly to the pier or to a local delivery agent for pier delivery.

Additional support for the prelodging of dock receipts derives from the Administrative Law Judge's finding that "exporters frequently are unaware of exactly when goods will be ready for transportation to the Port of New York." This means that the forwarder is unable to obtain the "pro and con" numbers of the motor carrier transporting the goods until the last minute and it is only at this time that the forwarder is able to begin to estimate the transit time from the inland point to the docks. Moreover, and because terminal facilities are subject to the handling of the excessive amounts of import/export shipments and labor problems, there are times when the forwarder will not know until just before arrival of the vessel the specific pier for delivery.

We also find considerable merit in the Administrative Law Judge's observations that prohibiting prelodging of dock receipts would: (1) Disrupt pre-reserved shipping space since, in many instances, the ocean carrier transporting the goods will insist on knowing, in advance, the size and amount of the shipment it has "booked"; and (2) be unwise because it could lead to the misuse of blank dock receipts which would have to be left at inland points if no prelodging is permitted. As long as the prelodging practice is not abused, we believe it will be to the advantage of the users of the Port to continue its use. In conclusion, therefore, while we do not deny that it would be more beneficial for the trucker to have the dock receipt in his hand when he arrives at the pier, the practicalities involved in the export of goods require, under certain situations, prelodging of dock receipts.

The Administrative Law Judge also recommended a $15 service charge for prelodging, noting that since the time and expense involved in handling prelodged dock receipts was for the convenience of the forwarder or exporter, the cost of such service should be borne by them and not by all who use the marine terminal operators' service (in the form

[1] The provisions promulgated herein have been renumbered to conform to established Commission numbering system and FEDERAL REGISTER procedures. We have made reference, as exhibited in brackets, to the corresponding section as originally proposed.

V 40 217 NOV 10 75 XUM

of higher stevedoring rates). We do not agree. We agree with the position taken by those parties who oppose this $15 assessment fee on the ground that it will work only as a penalty by unreasonably burdening the shipper who is trying to export his product as quickly and cheaply as possible. Further, such a fee could well drive the small inland shipper out of business since he would not be able to absorb a $15 charge in his selling price of exported goods without running the risk of pricing his product out of the competitive market. As a result, a service charge might, under the circumstances, give rise to an unreasonable preference in favor of large volume exporters who obviously could absorb such a charge. Such a charge could also cause prospective exporters to avoid the Port as well as present exporters to divert their shipments to other less expensive ports, all to the financial disadvantage of the Port.

For the aforementioned reasons, we have modified the final version of § 551.2 (a)(1) to reflect a prohibition of the prelodging of delivery orders but to allow the continuance of the practice of prelodging dock receipts without any service fee.

We have further modified § 551.2(a)(1) to permit time stamps and notations on gate passes and other arrival documents to be duplicated on the trucker's copy of the delivery order or dock receipt, instead of on a blank paper as originally proposed. The existence of a blank piece of paper is just another document that would be susceptible to being lost or stolen. We see no reason to further complicate the paperwork involved. Moreover, and as one party points out, the time stamp on a copy of the dock receipt or delivery order retained by the trucker would be helpful in the processing of future claims.

Section 551.2(a)(2) [section B1(b)] pertains to a motor carrier's use of the open delivery order/dock receipt. One party suggests that to allow a motor carrier to continue the established and accepted practice of presenting open documents on less than truckload (LTL) shipments will compound the problem of cargo security at breakbulk terminals. We disagree. Quite the contrary, by permitting a terminal operator to establish his own safeguards for the handling of LTL shipments, which he would do by filing the appropriate procedures in his tariff, security would, we feel, be improved. This conclusion is based on the fact that each procedure for physically handling cargo across the platform will, necessarily, take into account security considerations peculiar to that breakbulk terminal facility. In our final rules, we have adopted Hearing Counsel's suggestion that the terminal operator be required to establish procedures by which the motor carrier, subsequent to the receipt or delivery of the initial load, would have to exhibit satisfactory authorization before picking up or delivering the "remaining truckloads or shipments." The substitution of this language for the word "cargo", as originally proposed, will alleviate any confusion as to what the motor carrier has authority to pickup or deliver.

Several parties commented on § 551.2 (b) [section B2] which sets forth the information to be included within a dock receipt. Comments addressed to this provision range from suggesting that the dock receipts requirements be "in exact conformity" with the U.S. Standard Master, to urging that the terminal operator be allowed complete discretion to determine the form or content of the dock receipt. We cannot accede to either suggestion.

While we are not opposed to a dock receipt in the form of the U.S. Standard Master, the party making such suggestion is not clear as to whether its contents will only include that as required by § 551.2(b) of our rules, or would supplement the existing information already present on the U.S. Master Standard. Further, any suggested change in this section that would dilute our requirements, such as one party's proposal that terminal operators be allowed to impose their own documentation requirements, would destroy the effectiveness of the rules by undermining our objective of standardizing documentation throughout the Port. As another commentator aptly pointed out the laxity and arbitrariness of documentation procedures have been among the major causes of truck delays and disputes between motor carriers and terminal operators. Consequently, in the interest of standardization and giving due regard to allowing terminal operators some flexibility, § 551.2(b) has been revised to provide a terminal operator the discretion to vary the format of a document while requiring him to embody information therein to be applicable portwide. In order that the dock receipt will reflect all pertinent information necessary to expedite the movement of cargo, we have revised the final § 551.2(b) to include certain substantive changes as suggested by the parties, which we believe would help further to eliminate haphazard documentation.

Section 551.2(c) [section B3], as originally proposed, required the use of a particular delivery order form containing certain specific information. At the outset, we would point out that all concerned would benefit from a standardized delivery order form since it would reduce paperwork and simplify the processing of such documents. However, with the introduction of Customs' new form 11–RC–450, both our proposed standardized form and another party's proposed replacement which would be aligned to the U.S. Standard Master have become incompatible with the purpose of the truck detention rules; i.e., requiring the motor carrier to have in his possession documents encompassing the information necessary to quickly gain access to the piers for the delivery or pickup of cargo. Without substantial modification, or at worst, separate preparation, of the aforementioned forms, it would become impossible for either of the forms to conform to the changes affected by this new Customs' form.

Nevertheless, the consensus of the parties hereto is that all that is needed for the proper delivery of cargo is a document containing information sufficient to properly identify the shipment to all parties concerned and to authorize its delivery. We agree. The use of such a document will not compromise the needs of the motor carriers, terminal operators, ocean carriers and others engaged in the interchange of cargo at the Port of New York. Therefore, for reasons of security, simplicity, and expedition, delivery orders to be used need only contain the information outlined in § 551.2(c) herein.

We have incorporated into our final rule suggestions regarding information required to be in the delivery order which would not have an adverse effect on cargo security and the control of cargo. The remaining comments have been found to be of minimal value towards the adoption of a practical and useful delivery order. Lastly, we would explain that the term "address of the terminal" as used in § 551.2(c)(2) [section B3(b)], refers to the terminal designation (i.e., Berth No., Port Elizabeth) and not the street address.

Because of the similarity of originally proposed sections B5 and B6 they will be discussed together. The combined effect of these two sections is to allow the terminal operator to refuse to complete or correct the documents necessary to effect the pickup or delivery of cargo. Three parties object to granting the terminal operator this ontion, arguing that the terminal operator would abuse his discretion to the extent of arbitrarily turning away the motor carrier. Therefore, we are asked that both provisions be modified to require the terminal operator to complete incomplete, or correct deficient documents with the charge for such service shifted to the shipper in lieu of the motor carrier as presently required by § 551.7(c) [section F3] of our rules.

In reply, Hearing Counsel point out that: (1) The efficacy of our truck detention rules is predicated upon the working relationship between motor carriers and terminal operators, not the shipper and terminal operator; and (2) any economic hardship that may befall the major carrier accomplished by the terminal operator is a direct result of its own action. Obviously, if the motor carrier does not request such services from the terminal operator, he will have to return to the pier after the documents are corrected or completed. More important, we consider the procedure as outlined in sections B5 and B6 as the fastest method of correcting inaccurate and/or incomplete documents which, as all parties agree, have been a continual source of delay, congestion and confusion at the Port.

In response to a suggestion advanced by Hearing Counsel, we have consolidated the language of sections B5 and B6 into one section, designated § 551.2

(e) and redesignated proposed sections B7 and B8 as § 551.2 (f) and (g), respectively.

Section 551.2(f) [section B7] requires that a terminal operator provide a written statement to the motor carrier explaining the former's reason for rejecting documents. The purpose of this requirement is not to create additional paperwork, as suggested by one party, but rather to eliminate disputes and/or misunderstandings and allow the parties concerned to document delay and thereby attribute fault.

Section 551.2(g) [section B8], as originally proposed, required that any authorization for the delivery of cargo from one location to another in certain specific enumerated circumstances must have the written approval of the ocean carrier involved. This section further required that any delay occasioned thereby be excluded from computation of penalty time. Upon review of certain of the comments we agree with Hearing Counsel that since this section affects only the relationship between steamship companies and terminal operators, the final determination as to whether authorization should be oral or written should be left to the discretion of the parties concerned. We are not persuaded by the argument of one of the parties that this will put the terminal operator at a decided disadvantage where the steamship company claims the delivery of cargo was not authorized.

We do, however, find merit with one commentator's argument that because any delays caused by the changes described in this section are matters both within the control of and for the benefit of the steamship company or terminal operator, depending on the circumstances, neither should be absolved from liability. The shipping public should not be penalized because either of the persons in issue elect to make a change in their operations without adequate opportunity to correct documents to reflect the change.

In view of the above, § 551.2(g) has been revised to delete the "in writing" requirement and to provide that delay occasioned in certain circumstances shall be chargeable to the party responsible for such change.

Sections 551.3, 551.4 and 551.5 [sections C, D, and E], generally set forth the various procedures to be employed at a terminal under the appointment system, nonappointment system, and a combination of both. Here it should be pointed out as a general matter that while the Port Adjudicator is authorized to settle disputes concerning specific claims submitted pursuant to this Part, this will in no way oust the Commission of jurisdiction under section 17 of the Act.

We have modified § 551.3(a)(2) [section C1(b)] to require the terminal operator to identify the terminal operator employee granting the appointment, in addition to listing the information already required by this section. In case of disputes, such additional information will make it easier for a person requesting an appointment to substantiate that an appointment was granted.

Section 551.3(b) [section C2] relates under what circumstances the terminal operator shall grant an appointment. In response to the comments of two of the parties, we have modified this section to make it clear that the term "freight release" means the notification by the steamship company to the terminal operator that conditions precedent to the release of the cargo have been satisfied.

As originally proposed, § 551.3(c)(1) [section C3(a)] required motor carriers to arrive 15 minutes prior to his scheduled appointment. Certain commentators argued that such a time requirement does nothing to enhance efficiency, particularly when service is provided at a predetermined time. We agree. Since under our rules the motor carrier will be required to have in his possession the necessary documentation to gain access to the piers prior to receiving a gate pass, the deletion of such a time requirement would be consistent with the purpose of avoiding delay. Consequently, we have amended our final rules to provide that a motor carrier need only arrive on time to proceed directly for pickup or delivery of cargo.

Section 551.3(d) [section C4], as proposed, establishes when the computation of time begins at an appointment terminal but excludes therefrom delays caused by the action/inaction of the Bureau of Customs or other governmental agency. Because of Customs' refusal to time-stamp or otherwise document the length of time consumed by Customs' clearance of documents, we concur with certain parties that the original § 551.3(d) should be revised as suggested by Hearing Counsel. By separately setting out when the gate pass for either a dock receipt or delivery order will be time stamped, we are able to avoid the problems incurred by the procedures of Customs. Thus, while a gate pass for a dock receipt will be stamped immediately by terminal personnel, the stamping of the gate pass for a delivery order will not be effected until the motor carrier has proceeded through Customs.

We have also incorporated into our final rules a new section 551.6 [section F] "Computation of Time". In effect, this new section will accomplish the same objectives as proposed section C4, that is, to establish a fixed point for the computation of time which takes into consideration delays as to which the terminal operator can demonstrate that he was not responsible.

Section 551.4(a) [section D1] requires that service periods be established for each business day at a terminal operating on a non-appointment system. One party proposed that this section should also include the requirement that the terminal operator publish in its tariff the daily capacity of each terminal facility and the number of vehicles to be scheduled in each service period. We do not agree. The purpose behind this section is to grant the terminal operator flexibility in determining capacity which can change from day to day, depending on numerous factors. To adopt the revision suggested would, we feel, stifle any effect that this section would have in alleviating congestion at the Port. Accordingly, we have adopted section D1 as proposed and redesignated it § 551.4 (a).

Sections 551.4(c) and (d) establish the procedure for the issuance of a time-stamped gate pass which will institute free time for the motor carrier in delivering or picking up cargo. Before discussing specific objections hereto, we would point out that the dock receipt/delivery order, itself, constitutes the basis for the issuance of the gate pass which is merely being used as an internal control measure. Therefore, to clarify any misunderstanding, it should be pointed out that the dock receipt/delivery order is checked for form and authenticity prior to, and not after, the issuance of the gate pass. However, admission to the pier will not be conditioned upon the examination of the substantive contents of the document. Possession of the document is sufficient.

In commenting, one party suggests that the validation time, controlling entry to the pier for motor truckers with dock receipts/delivery orders, include not only the time stamp on the gate pass, but also the time entered in the terminal operator's security log as is presently being done at this party's terminal. In effect, we are asked to require motor carriers, upon receiving their time stamped gate pass, to proceed to the delivery/receiving clerks' office for the purpose of being time recorded in the terminal operator's security log. The benefit of such a procedure, we are told, is that it will discourage the motor carrier from taking a "break" en route from one point to another. We see little merit in this proposed additional requirement. To permit a terminal operator to record a different time in its own records for the commencement of free time is contrary to the very purpose of our validation and entry procedures under which the validation time on the gate pass constitutes the official time for the commencement of free time.

Comments were also directed to certain procedures of § 551.4(d) [section D4]. This section, in pertinent part, provides that Customs' processing would be initiated immediately upon admission to the terminal facility and that a Customs' time stamp would be issued at the completion of such processing. Thus, the time between the validation time on the gate pass and the time stamp of Customs would be excluded from the time allowances provided for loading without penalty. For various reasons, the substance of which need not be discussed, Customs has informed us that it will not issue time stamps. Because Customs' clearance is an integral and necessary step in the delivery of imports, any detention rule must be compatible with the procedures of Customs. Therefore, we have adopted in our final rules Hearing Counsel's re-

V 40 217 NOV 10 75 XUM

vision of § 551.4(c) and (d). These new provisions not only eliminate the requirement that Customs time stamp documents but also simplify the procedure by allowing the motor carrier, upon the validation of his gate pass on arrival at the pier, to proceed directly to Customs for the processing of his papers. Thereafter, the motor carrier's papers are presented to the delivery clerk of the terminal operator for the stamping of the gate pass, at which point, time for purposes of detention commences. Under the procedure for validation and computation of time in § 551.6 [section F], the time consumed (1) in obtaining Customs' clearance for delivery orders, and (2) between the issuance of the time stamped gate pass and the subsequent time stamping thereon by the receiving clerk for dock receipts, is excluded from the time for detention purposes.

Further, Hearing Counsel's substitutions are consistent with the purpose of the original § 551.4 (c) and (d); i.e., placing the responsibility on the shipper and motor carrier for preparation and presentation of correct documentation. As presently worded, § 551.4 (c) and (d) will stop the current practice of motor carriers being denied entry to the piers because of improper documentation.

Section 551.4(e) [section D5] allows the Motor carrier to elect to receive a preference slip entitling the motor carrier to service on the next business day within 30 minutes after issuance of a gate pass. One party alleges that this procedure would be susceptible to abuse by the motor carriers. We do not agree. This section is intended to prevent favoritism toward certain motor carriers by terminal operators by assuring that all motor carriers will be treated equally. As pointed out by another commentator, preference slips are: (1) An integral part of the time slot or service period procedures which recognizes that every pier has a maximum capacity; and (2) they encourage orderly scheduling of nonappointment vehicles.

In adopting § 551.4(e) we point out that security problems will not be aggravated since the vehicle arriving for service under a preference slip must still possess a delivery order/dock receipt.

Section 551.4(f) [section D6] permits the terminal operator to turn away carriers when the capacity of a terminal facility has been reached but not before issuing these carriers preference slips for service on the next business day. This section will alleviate the problem of motor carriers being turned away without service after having waited in line for several hours.

One party asks that we delete § 551.4 (f) in its entirety, urging that since all motor carriers have received notice that the cargo is ready, every vehicle which arrives at the pier should be served. We disagree. While the fear of abuse of discretion by the terminal operator may have some theoretical merit, the practicalities of the situation dictate that terminal operators will want cargo removed from their facilities as rapidly as possible. Therefore, it is doubtful that vehicles will be turned away capriciously if service of those vehicles is feasible. Moreover, a rule which would require a facility to exceed its capacity would not be workable.

Once the terminal has decided to turn away the motor carrier with a preference slip, there is nothing in the rules that requires the terminal operator to reconsider his decision. Therefore, a motor carrier cannot insist on being admitted and serviced to completion. This situation should allay the fears of one party who was concerned as to who would pay for the overtime incurred if a motor carrier could successfully insist on completed service.

Additionally, to complement the requirements of sections 551.2(a)(1) and 551.6, we have adopted, as part of our final rules, Hearing Counsel's proposed modification to the last sentence of § 551.4(f), to wit:

> • • • The preference slip shall be attached to the gate pass when said gate pass is issued and all notations recorded on the preference slip shall be duplicated on the motor carrier's copy of the delivery order or dock receipt.

Section 551.7(a) [section G1], as originally proposed, assessed a $15 penalty against a terminal operator for refusing service to a motor carrier possessing complete documentation. An unjustified refusal to serve a motor carrier results in confusion at the pier, loss of valuable time to the motor carrier, and a loss of revenue for everyone concerned. Consequently, the terminal operator must be given the incentive to minimize or avoid such confusion. Having reviewed the comments, we conclude that the avoidance of this confusion can best be achieved by increasing the penalty from $15 to $30 rather than by introducing a sliding scale of penalties up to $60 as suggested by one party. This rule does not contemplate that "penalties" be compensatory but rather that the charge will encourage accuracy and efficiency. Accordingly, our final rules provide a $30 penalty for denial of service due to the fault of the terminal operator.

Section 551.7(b) [section G2] assesses a $15 penalty against the motor carrier for failing to meet an appointment. We have rejected one party's suggestion that this section be amended to provide that a motor carrier be excused from any penalty for such failure if it is due to the reasons as provided in § 551.1(g). To do as this party urges would only cause endless dispute over the cause of the missed appointment. If the purpose of these rules is to be achieved, the motor carrier must act responsibly in its dealings on the pier.

However, we do find merit in another party's observation that § 551.7(b) should take into consideration the situation in which the motor carrier fails to meet an appointment and the terminal operator has furnished special equipment at the pier. Accordingly, we have added a second sentence to § 551.7(b), which reads: "• • • If, pursuant to § 551.3(b), a motor carrier is advised that special equipment will be required and the motor carrier fails to meet said appointment, the motor carrier shall be subject to a charge of $30." We conclude that the $30 penalty is sufficient incentive for the motor carrier to keep its appointment.

Section 551.7(c) [section G3] requires the terminal operator to charge the motor carrier a $15 penalty for completing or correcting deficient documents. Eight parties commented on this section. Three parties argue this penalty is unreasonably high and unwarranted unless every steamship company, terminal operator and exporter/importer is obligated to pay penalties for every mistake or clerical error made. It is further suggested that the $15 penalty will create an extremely unhealthy climate between the affected parties because the motor carrier does not prepare the documentation and disputes over minor corrections will be encouraged. An additional argument urges that, since this fee will be passed on, the result will be to discourage use of the Port.

Hearing Counsel defend the $15 as an appropriate charge encouraging more care in the preparation of the pertinent documents. We agree.

Notwithstanding fears expressed by certain parties regarding possible abuse of these penalty provisions, sound business practices would dictate wise use of discretion before assessing the $15 penalty.

Section 551.7(d) [section G4], as proposed, stated that if a motor carrier seeks and gets a schedule appointment prior to issuance of a freight release of the subject cargo, the motor carrier will be penalized $15. Upon review of the comments, we concur that the proper party to be assessed the penalty is the terminal operator. As certain parties pointed out, the freight release involves communication only between the steamship company and the terminal operator. Thereafter, the terminal operator then notifies the broker that the goods are ready for pickup, and the broker in turn calls the motor carrier to come and collect the cargo. Hence, the motor carrier does not know whether a freight release has been issued or not unless he is so informed by the terminal operator. Consequently, we do not believe that the motor carrier should be penalized for seeking a schedule appointment since it is unlikely that he would make a request for a schedule appointment unless the terminal operator had advised him (through the broker) that the freight release had been issued and the cargo was available.

We agree with Hearing Counsel that a $30 penalty, in lieu of $15 as proposed, is justified in view of time lost by the motor carrier when an error is made in notification.

Therefore, we have revised § 551.7(d) to provide for a $30 penalty assessed against the terminal operator.

Section 551.7(e) [section G5], as proposed, provides for the assessment of a $15 penalty against the terminal operator for wrongfully advising the motor carrier that cargo is ready and available. While four parties argue that a $15 penalty is inadequate, with one suggesting that it be increased to $65, a fifth party contends that any increase in penalty would tend to slow down the movement of cargo by encouraging over-zealous verification and reverification of simple facts. We cannot agree with the fifth party. Considering that the purpose of this section is to deter erroneous notification of available cargo and that, generally, considerable reliance is placed upon the terminal operator's word, we agree that an increase in penalty is appropriate. Consequently, the penalty provided in § 551.7(e) has been increased to $30.

It has also been suggested that this section require written verification that notification was made to facilitate motor carriers' proof that notification was given. Such a requirement, in our opinion, is an unnecessary burden on the terminal operator. It would not expedite movement of cargo but would merely reenforce any claims by motor carriers. Additionally, the fact that it is a costly operation for a motor carrier to make a second trip to the piers, creates a reasonable presumption that a motor carrier would not arrive at the piers without a prior notification to do so.

Section 551.7(f) [section G6] outlines the time allowances applicable to containers handled as a single unit and to noncontainerized cargo under an appointment/nonappointment system. Two parties argue that the allowances prescribed in this section should conform to those established by the ICC. Not to do so, they urge, will only serve to confuse shippers and to create unnecessary complications in billing for, and collection of, detention charges. Hearing Counsel argue that the ICC detention time provisions serve different objectives than those of this proposed rule. We agree.

The ICC rules permit reimbursement to the motor carrier for all delays at marine terminal facilities for which the motor carrier is not responsible. However, this reimbursement comes to the motor carrier from his principal who pays the charges. Our rules, which establish penalties for unreasonable delays for which the terminal operator is responsible, are designed to have the responsible terminal operator pay for the detention of the motor carrier. The key to our rule is the relationship of the trucker to the terminal operator and not of the trucker to its principal.

Further, we are persuaded that certain benefits will override any confusion that may occur from having two divergent detention charges. With the time-stamped gate pass, the trucker will be able accurately to compute the amount owed him by his principal. Further, that amount is subject to be offset in an amount equal to the detention charges collected from the terminal operator. This arrangement may also have the effect of encouraging importers/exporters to use the Port. Accordingly, we have incorporated § 551.7(f) as proposed, into our final rule.

Section 551.7(h)(1) [section G8(a)], as proposed, assesses a $65 penalty against the terminal operator who refuses service to a motor carrier holding an appointment when the refusal is due to a lack of manpower. Under this section it is no excuse, as noted by one party, that the terminal operator did not anticipate the needs of a particular cargo. We consider such a predicament to be preventable by foresight on the part of the terminal operator, and not a situation beyond his control. Implicit in this section is the obligation of the terminal operator to complete loading/unloading the motor carrier admitted to the terminal facility. A part of that obligation is the responsibility of the terminal operator to foresee labor problems which would tend to delay operations.

Additionally, because this section is designed to act as an inducement for orderly and efficient scheduling of motor carriers, we agree with Hearing Counsel that the penalty should be reduced to $30. A $30 penalty is consistent with other penalty sections of this Part. Therefore, we have adopted § 551.7(h)(1) as modified by the reduced penalty.

Comments on § 551.7(h)(2) were directed only to that portion which relieves the terminal operator of the $65 penalty if he refuses to service a nonappointment vehicle as a result of labor's refusal to work overtime. It is argued that because the terminal operator is responsible for its labor it should not be absolved from liability. Hearing Counsel reply that a refusal under the aforementioned circumstances is equivalent to a work stoppage, and under the theory of § 551.1(g) [section A7], the terminal operator should be relieved of any liability for the actions of labor under the circumstances. We agree.

Distinguishing this section from § 551.7(h)(1) wherein the terminal operator is liable for labor's refusal to work overtime, we would point out that a terminal operator has the time to anticipate the services that can be rendered with reference to motor carriers holding appointments while not so with nonappointments. Accordingly, we have adopted, as part of our final rule, § 551.7(h)(2) as proposed, except that for the same reasoning as employed in § 551.7(h)(1), *supra*, we have reduced the penalty to $30.

Section 551.8 [section H], in general, sets out the procedure for the submission of claims for penalties. Upon review of the comments, we find that many of the suggestions and rationale have considerable merit. Consequently in the final rule, § 551.8 has been revised to be more responsive to these constructive comments. This generally conforms to Hearing Counsel's proposal with certain minor modifications of our own.

We are in total agreement with those parties who submit that claim forms, as originally proposed, are unnecessary. For purposes of this rule, all that is necessary is a copy of the dock receipt/delivery order with its accompanying documentation supported by a brief explanation of the facts giving rise to the claim and the dollar amount of such claim. In accordance with § 551.2(a)(1), the necessary information will be duplicated on a copy of the appropriate document which the motor carrier will always have in his possession.

While we agree with the basis of Hearing Counsel's proposed extension of filing claims from 15 days to 60 days, we believe that a 45-day period would be more reasonable. A 45-day period is quite enough time to discourage any possible laxity in preparation for filing a claim and at the same time will not prejudice the parties concerned. Further, we agree with the suggestion of one party that all periods of 15 days, as proposed by Hearing Counsel, should be expanded to 20 days so as to be more realistic and to increase the likelihood of compliance.

One party noted that the original proposed section H did not cover the situations where steamship companies are responsible for delays of trucks. The example cited is the premature issuance of a freight release resulting in the motor carrier being notified that the shipments are available when, in fact, they are not. We are told that the terminal operator might under the circumstances reject a claim on the ground that the delay was caused by the steamship company. In order to cure this deficiency, we have amended § 551.8(e)(1) [section H5(a)] to include the following language: "• • • or otherwise denies a claim on the ground that the delay was caused by the steamship company."

Therefore, pursuant to section 4 of the Administrative Procedure (5 U.S.C. 553), and the Commission's authority under sections 17 and 43 of the Shipping Act, 1916 (46 U.S.C. 816, 841a), Title 46 CFR is hereby amended as follows:

1. A new part 551 is added reading as follows:

Sec.

551.1 General provisions.
551.2 Documentation.
551.3 Terminals operating on appointment system.
551.4 Terminals operating a non-appointment system.
551.5 Combination non-appointment/appointment system.
551.6 Computation of time.
551.7 Penalties.
551.8 Submission of claims for penalties.

AUTHORITY: Section 4, Administrative Procedure Act (5 U.S.C. 553); sections 17 and 43, Shipping Act, 1916; 39 Stat. 734, 75 Stat. 766; 46 U.S.C. 816, 841a. The reporting requirements contained in § 551.1(1) have been approved by the U.S. General Accounting Office under number B-180233 (R0248).

§ 551.1 General provisions.

(a) The "Port of New York" is that area designated as "The Port District" on the map (Attachment A)

(b) For purposes of this Part, a terminal operator is any person who receives cargo from motor carriers and/or delivers cargo to motor carriers in connection with transportation by common carrier by water, excluding persons who operate marine terminal facilities con-

V 40 217 NOV 10 75 XUM

trolled by the Department of Defense including the military department and all agencies of the Department of Defense.

(c) Motor carriers (common, contract, or private), terminal operators including steamship companies acting as terminal operators, and steamship companies whose action or inaction otherwise impede expeditious pickup and delivery of cargo by motor carriers at marine terminal facilities within the Port of New York shall be subject to the provisions established by terminal operators in accordance with this Part which provisions shall be reflected in the tariff of each such terminal operator.

(d) Importers and exporters, or motor carriers or other agents of importers or exporters, and terminal operators at marine terminal facilities in the Port of New York shall be entitled to receive remuneration in accordance with the provisions of this Part.

(e) The person responsible for operating each marine terminal facility within the Port of New York shall identify himself to the Federal Maritime Commission not more than 10 days after the effective date of this Part and shall thereafter promptly notify the Commission of any change in responsibility. Based thereon, the Federal Maritime Commission (Commission) will publish and maintain a current list identifying, as to each such marine terminal facility, the party responsible for receipt and settlement of claims arising under this Part.

(f) All communication to the Federal Maritime Commission required by this Part shall be to the Federal Maritime Commission, Office of the Secretary, 1100 L Street NW., Washington, D.C. 20573.

(g) No penalty shall be imposed upon a terminal operator under this Part if receipt or delivery of cargo at a marine terminal facility is prevented or delayed by strike or work stoppage, act of God, fire, serious accident, or severe or unusual weather condition. The Commission shall be notified in writing by the party claiming the existence of the condition who shall specify the date and time of commencement and termination of any such strike, work stoppage, or severe or unusual weather or other condition. However, no terminal operator shall be absolved from liability under this Part for delays resulting from inadequate or insufficient labor, and/or equipment, other than reasonable delays necessary to obtain special equipment required for handling unusual cargo on a non-appointment basis.

(h) Terminal operators shall not be liable for delays due to United States Government regulations; nor shall terminal operators be liable for time consumed by receipt or delivery of cargo by marks other than by bill of lading, provided at the request of the shipper, consignee or motor carrier.

(i) Steamship companies responsible for house-to-house movement of containers, i.e., containers moving as a unit from origin to destination, are responsible under this Part for delay occasioned by lack of sufficient chassis, or unavailability, action or inaction of their container inspection personnel. For purposes of this Part "containers" shall include empty as well as stuffed containers.

(j) Disputes concerning liability under any provisions of this Part shall be settled by an impartial Adjudicator selected by the Commission.

(k) Terminal operators are not required to deliver cargo to motor carriers prior to the time that the ocean vessel which transported said cargo is fully discharged. If a terminal operator exercises the option of delivering cargo to motor carriers prior to the time that the ocean carrier which transported said cargo is fully discharged, the terminal operator shall notify the consignee or its designated agent that the cargo is on the pier, at its place of rest, and segregated by bill of lading, and shall identify the terminal operator employee giving such notification.

(l) Marine terminal facilities in the Port of New York shall be operated in accordance with the appointment, non-appointment, or combination appointment/non-appointment procedures established by the terminal operator in accordance with this Part. Each terminal operator shall identify in its respective tariff whether its marine terminal facility will be operated on an appointment, non-appointment, or combination appointment/non-appointment basis. Said tariff shall incorporate the specific procedures applicable at each such marine terminal facility which procedures shall comply with the provisions of this Part, be prominently displayed at the marine facility, and shall be modified on not less than 30 days' notice.

§ 551.2 Documentation.

(a) (1) Delivery orders shall not be mailed or delivered to terminal operators, nor mailed or delivered to steamship companies for receipt on behalf of terminal operators, prior to arrival of motor carrier vehicles at marine terminal facilities. Dock receipts may be lodged with terminal operators or steamship companies for receipt on behalf of terminal operators prior to arrival of motor carrier vehicles at marine terminal facilities. Upon arrival at marine terminal facilities, motor carrier vehicle operators shall have physical possession of delivery orders required by this Part, and shall either have physical possession of dock receipts required by this Part or shall have had said dock receipts lodged with the terminal operator or steamship company in accordance with the above-described procedure. Motor carrier vehicles having physical possession of delivery orders or dock receipts immediately shall be issued a sequentially numbered and time-stamped gate pass by order of arrival. When dock receipts are lodged with the terminal operator or steamship company, the sequentially numbered and time-stamped gate pass immediately shall be issued upon tender of the dock receipt to the gateman by the motor carrier vehicle driver. The sequential number and all time stamps and notations recorded on the gate pass and any other arrival document shall be recorded on the copy of the delivery order or dock receipt retained by the motor carrier. Motor carrier vehicles not complying with the requirements of this paragraph shall be denied entry to the marine terminal facility.

(2) Motor carriers shall be permitted to receive cargo on Open Delivery Orders, i.e., single delivery orders covering multiple truckloads or shipments, and deliver cargo on Open Dock Receipts, i.e., single dock receipts covering multiple truckloads or shipments, upon presenting to the terminal operator, subsequent to receipt or delivery of the initial load, satisfactory evidence of authorization to effect receipt or delivery of the remaining truckloads or shipments, as established by the terminal operator and published in its tariff.

(b) Dock receipts required as full and complete documentation for receipt of export cargo shall include the following information:

(1) Name of the motor carrier.
(2) Name of forwarding agent. (If none, insert "none").
(3) Shipper.
(4) Name of vessel.
(5) Pier, berth, or area designated for receipt of cargo.
(6) Port of discharge.
(7) Container identification and seal number. (On full container loads.)
(8) Booking number.
(9) Cargo to be held on dock should be so indicated in space provided for vessel name.
(10) Marks, number of packages, commodity, cube and weight.
(11) An original and three copies of the dock receipt authorized by the steamship line that is to receive the cargo must be tendered to the terminal operator, one of which shall be returned to and retained by the motor carrier in accordance with § 551.2(a)(1).

(c) Delivery order required as full and complete documentation for the delivery of import cargo shall provide the following information:

(1) Name and address of party issuing delivery order.
(2) Address of terminal.
(3) Name and address of motor carrier making pickup.
(4) Vessel name.
(5) Voyage number or estimate date of arrival.
(6) Bill of Lading number.
(7) Port of Lading.
(8) City of destination. (On full container load.)
(9) Container identification number. (On full container loads.)
(10) Booking number. (On receipt of empty containers.)
(11) Marks, number of packages, commodity, cube and weight. When partial lots are to be delivered, they should be identified by marks.
(12) Date free time expires.
(13) Date through which demurrage is paid/guaranteed after free time has expired.

(14) An original and two copies of the delivery order, the original legibly signed in ink, with the name of the signer typed below the signature, shall be tendered to the terminal operator, one of which shall be returned to and retained by the motor carrier in accordance with § 551.2(a)(1).

(d) (1) Terminal operators shall not honor delivery orders with strikeouts or other changes to the original.

(2) If a motor carrier named in an original delivery order substitutes another motor carrier in its place, the motor carrier named in the original delivery order shall provide a turnover order to the second carrier containing all information required by the original delivery order. Both the original delivery order and the turnover order must be presented to the terminal operator by the motor carrier requesting delivery of cargo. Upon written request, in accordance with procedures established by the terminal operator and published in its tariff, special arrangements may be made to accommodate general agency situations.

(e) If a motor carrier presents documents to the terminal operator which do not contain all information required by this Part, or which are complete but contain inaccurate information, said motor carrier shall be required to surrender its gate pass and shall be denied service; or, at the request of said motor carrier, the terminal operator may correct or complete the deficient document and serve said motor carrier in accordance with this Part.

(f) If documents are rejected by the terminal operator, or service is refused for any other reason, the terminal operator shall provide the motor carrier written explanation, time-stamped, of the deficiencies in documentation or other reason(s) for refusal of service, and shall attach thereto a copy of the deficient document, if any.

(g) Section 551.2(e) shall not be applicable if documents are incorrect because of substitution of one vessel for another, redocking of a vessel from a scheduled pier to another, or change in consignment of an export shipment from a scheduled vessel to another due to an early closeout of the scheduled vessel or other such rescheduling for the convenience of the steamship company or terminal operator. Delay occasioned in such circumstances shall be included in the computation of time for purposes of this rule and chargeable to the party responsible for such change.

§ 551.3 Terminals operating on appointment system.

Subject to the following provisions of this section terminal operators shall establish the basis upon which appointments will be available and shall publish in their tariffs reasonable methods and procedures for booking appointments.

(a) (1) Except for good cause, all requests for appointments shall be granted. If a request for an appointment is not granted, the terminal operator shall record the request and reason for refusal.

(2) Appointments, when granted, shall be identified by sequentially assigned numbers. The terminal operator shall record the date and time of requests for appointments, the name of the person making the requests; the date, time and identification number of scheduled appointments; and shall identify the terminal operator employee granting the appointment.

(b) Appointments to receive delivery of cargo shall not be granted by terminal operators unless and until a freight release covering subject cargo has been provided by the steamship company. Appointments shall be granted only if the terminal operator is advised of the nature, type and quantity of cargo to be delivered or received. If, because of the size, weight or shape of the cargo, special equipment is required, the terminal operator shall so advise the motor carrier at the time the appointment is granted, and the motor carrier shall advise the terminal operator of the type of "rolling stock" which it will employ to effectuate the interchange of cargo.

(c) (1) Gate passes shall be issued to motor carriers by order of arrival at the marine terminal facility. Motor carriers arriving after the time of a scheduled appointment shall be deemed to have missed the appointment and may be denied service.

(2) Except where a terminal operator has arranged for delivery of cargo on the last day of free time, or on the first or second day of demurrage, in accordance with § 551.3(e)(2) of this Part motor carriers may cancel appointments (without penalty) provided the terminal operator is given three (3) working hours' notice of said cancellation.

(d) (1) Upon receipt of a gate pass issued pursuant to § 551.3(c)(1), motor carrier personnel holding dock receipts or other satisfactory evidence of authorization to effect delivery or cargo shall proceed immediately to the receiving clerk of the terminal operator who shall immediately time-stamp the gate pass upon presentation of documents. After said documents are determined to be in proper order, the motor carrier shall be routed for unloading.

(2) Upon receipt of a gate pass issued pursuant to § 551.3(c)(1), motor carrier personnel holding delivery orders or other satisfactory evidence of authorization to receive delivery of cargo shall proceed to Bureau of Customs for completion of required procedures, and thereafter, shall immediately proceed to the delivery clerk of the terminal operator who shall immediately time-stamp the gate pass upon presentation of documents. After said documents are determined to be in proper order, the motor carrier shall be routed for loading.

(e) (1) See General Order 8, § 526.1(c) of this chapter for provisions regarding extension of free time.

(2) At full-appointed terminals, if an appointment is not available as requested, an appointment shall be granted within 72 hours (three business days) of said request, except as provided by paragraphs (e)(2)(i) and (ii) of this section.

(i) *Cargo permitted 5 days' free time—Extension of free time:*

(A) If an appointment is requested at least 48 hours prior to the expiration of free time, the terminal operator shall arrange to deliver cargo prior to expiration of free time, or extend free time until an appointment is granted.

(B) If an appointment is requested less than 48 hours—but more than 24 hours—prior to expiration of free time, the terminal operator shall arrange for delivery of cargo prior to the close of business on the first working day of demurrage for which first demurrage day the cargo shall be liable, or, after said first demurrage day, cargo shall assume non-demurrage status until an appointment is granted.

(C) If an appointment is requested less than 24 hours prior to expiration of free time, the terminal operator shall arrange for delivery of cargo prior to the close of business on the second working day of demurrage for which two (2) demurrage days the cargo shall be liable, or, after said two (2) demurrage days, cargo shall assume non-demurrage status until an appointment is granted.

(ii) *Cargo permitted 2 or 3 days' free time—Extension of free time:*

(A) If an appointment is requested at least 24 hours prior to expiration of free time, the terminal operator shall arrange to deliver cargo prior to expiration of free time or extend free time until an appointment is granted

(B) If an appointment is requested less than 24 hours prior to expiration of free time, the terminal operator shall arrange for delivery of cargo prior to the close of business on the first working day of demurrage for which first demurrage day the cargo shall be liable, or, after said first demurrage day, cargo shall assume non-demurrage status until an appointment is granted.

§ 551.4 Terminals operating a non-appointment system.

(a) Each business day shall be divided into a number of "service periods" (for example, periods commencing at 8 a.m., 10 a.m., 1 p.m., 3 p.m.) as scheduled by the terminal operator according to the nature and capabilities of the particular facility.

(b) Motor carriers arriving at marine terminal facilities shall be issued sequentially numbered time-stamped gate passes by order of arrival, valid for entry to the terminal facility at the time of commencement of the service period indicated thereon.

(c) Upon receipt of a gate pass issued pursuant to § 551.4(b), motor carrier personnel holding dock receipts or other satisfactory evidence of authorization to effect delivery of cargo shall proceed immediately to the receiving clerk of the terminal operator who shall immediately time-stamp the gate pass upon presentation of documents. After said documents are determined to be in proper order the motor carrier shall be routed for unloading.

(d) Upon receipt of a gate pass issued pursuant to § 551.4(b), motor carrier

V 40 N 217 NOV 10 75 XUM

personnel holding delivery orders or other satisfactory evidence of authorization to receive delivery of cargo shall proceed to Bureau of Customs for completion of required procedures and thereafter immediately proceed to the delivery clerk of the terminal operator, who shall immediately time-stamp the gate pass upon presentation of documents. After said documents are determined to be in proper order the motor carrier shall be routed for loading.

(e) A motor carrier entitled to a gate pass scheduling service for a later service period, but unwilling to wait for that service, may elect, not more than 30 minutes after issuance of said gate pass, to receive a preference slip (Attachment B) entitling said motor carrier to service on the next business day as specified thereon. However, free time will not be extended if cargo is on the last day of free time, nor will collection of demurrage charges be suspended if cargo is on demurrage.

(f) Motor carriers arriving at a marine terminal facility after the capacity of said facility has been reached may be turned away, but shall be given preference for service on the next business day according to the order in which they arrived and were turned away. Motor carriers turned away under these circumstances shall be issued a preference slip (Attachment B), sequentially numbered, which shall assure preference for service on the next business day and, where cargo is on the last day of free time, create a one-day extension of free time, or suspend collection of demurrage charges for one day as to cargo already on demurrage. The preference slip shall be attached to the gate pass when said gate pass is issued and all notations recorded on the preference slip shall be duplicated on the motor carrier's copy of the delivery order or dock receipt.

(g) If, at the commencement of its scheduled service period, a motor carrier is not available to receive cargo which is on the last day of free time, and because of the unavailability of said motor carrier, the terminal operator is unable to provide service on that day, there shall be no extension of free time.

(h) If all vehicles scheduled for a service period are discharged prior to the end of that period, the motor carrier available and holding the next sequenced gate pass shall be served.

(i) It shall be the responsibility of the motor carrier to determine from the terminal operator whether cargo to be delivered to said motor carrier is on the pier, at its place of rest, and segregated by bill of lading.

§ 551.5 Combination non-appointment/appointment system.

(a) An express line or non-appointment line may be established in conjunction with an appointment system in such a manner as the terminal operator determines best suits the needs of the particular facility.

(b) All rules applicable to non-appointment facilities (§ 551.4) shall be applicable to the non-appointment portion of a combination non-appointment/appointment terminal operation.

(c) If a motor carrier attempts to make an appointment at a facility operating a combination system, and no appointment is available, and then said motor carrier seeks service as a non-appointment vehicle, said motor carrier shall be treated as a non-appointment vehicle for purposes of extension of free time.

§ 551.6 Computation of time.

(a) Validation time is (1) time of issuance of a gate pass upon a motor carrier's arrival at a marine terminal facility or (2) if, upon arrival, a motor carrier is scheduled for a later service period, the time of commencement of that scheduled service period, or (3) if a motor carrier is issued a preference slip pursuant to § 551.4(e) or § 551.4(f), the time scheduled thereon.

(b) Time for purposes of this Part shall accrue from validation or appointment time. Delay demonstrated by the terminal operator to be due to United States Government regulations, action or inaction of motor carrier personnel, or other such cause shall be excluded from computation of time. Time elapsed, if any, between appointment or validation time and presentation of documents to the delivery or receiving clerk shall be presumed to be due to such cause.

§ 551.7 Penalties.

(a) A terminal operator who refuses to serve a motor carrier after rejecting, for lack of full and complete documentation, a delivery order or dock receipt which does contain the information required by this Part, shall be subject to a penalty of $30.

(b) If a motor carrier fails to meet a scheduled appointment at a marine terminal facility, said motor carrier shall be subject to a charge of $15. If, pursuant to § 551.3(b) a motor carrier is advised that special equipment will be required and the motor carrier fails to meet said appointment, the motor carrier shall be subject to a charge of $30.

(c) If, pursuant to § 551.2(e) of this Part, a terminal operator completes or corrects deficient documents presented by a motor carrier, a charge of $15 shall be assessed against said motor carrier.

(d) If, contrary to § 551.3(b) of this Part, a freight release covering subject cargo has not been authorized prior to a scheduled appointment, the terminal operator that granted said appointment shall be assessed a penalty of $30.

(e) If, pursuant to § 551.1(k) or a request under § 551.4(l) of this Part, a terminal operator notifies a motor carrier that cargo is on the pier, at its place of rest, and segregated by bill of lading, and cargo is not on the pier, at its place of rest, and segregated by bill of lading, and cargo is not on the pier, at its place of rest, and segregated by bill of lading when the motor carrier attempts to obtain said cargo, the terminal operator shall be subject to a penalty of $30.

(f) *Time allowances.*—(1) *Containers handled as a single unit.* If service is not completed within the following times, penalty charges will accrue against the terminal operator at a rate of $4.00 per 15 minutes, or any fraction thereof, in excess of these times.

Appointment	75 minutes
Non-appointment	120 minutes

(2) *Non-containerized cargo.* When vehicles are loaded by the terminal operator, or unloaded by the terminal operator at the request of the motor carrier, within the time periods set forth below, there will be no penalty. If a vehicle is not loaded or unloaded within the following time periods, penalty charges will accrue against the terminal operator at a rate of $4.00 per 15 minutes, or any fraction thereof, in excess of these times.

(i) Non-Appointment Vehicles:

0 to 5,000 pounds	210 minutes
5,001 to 10,000 pounds	240 minutes
10,001 to 15,000 pounds	270 minutes
15,001 to 30,000 pounds	285 minutes
over 30,000 pounds	300 minutes

(ii) Appointment Vehicles:

2,000 pounds or less	90 minutes
2,001 to 5,000 pounds	120 minutes
5,001 to 10,000 pounds	150 minutes
10,001 to 15,000 pounds	180 minutes
15,001 to 20,000 pounds	210 minutes
20,001 to 25,000 pounds	240 minutes
over 25,000 pounds	270 minutes

(g) When freight is unloaded by the driver or other personnel of the motor carrier and unloading is not completed within the times prescribed by § 551.7(f) of this Part, as computed from the time that the vehicle is spotted at a place convenient for unloading, the terminal operator shall be entitled to a penalty payment of $4.00 for each 15 minute period or any fraction thereof in excess of the specified time, unless the delay is demonstrated by the motor carrier to have been occasioned by the action or inaction of the terminal operator.

(h) A motor carrier admitted to a marine terminal facility for loading or unloading—or holding an appointment for loading or unloading—shall be completely loaded or unloaded prior to the close of that business day. If the motor carrier is not completely loaded or unloaded when the terminal closes on that business day, time for purposes of this Part shall accrue only while the terminal is conducting operations. In addition:

(1) Motor carriers holding appointments shall be entitled to a penalty payment of $30 from the terminal operator whether the shutout of the vehicle was due to refusal of management to authorize overtime, or labor's refusal to work overtime.

(2) Non-appointment vehicles shall be entitled to a penalty payment of $30 from the terminal operator if the shutout of the vehicle was due to refusal of management to authorize overtime. If the shutout results from labor's refusal to work overtime, the terminal operator shall not be subject to a penalty.

(3) Management shall be presumed to have refused to authorize overtime, unless the terminal operator establishes otherwise.

§ 551.8 Submission of claims for penalties.

(a) All communication required by this section shall be via certified mail; return receipt requested.

(b) Any person claiming payments under this section shall file a written claim with the terminal operator or motor carrier against whom said claim is made.

(c) (1) Claims shall be filed within forty-five (45) calendar days from the date on which the claim arose or said claim shall be barred. The party against whom claim is made shall within twenty (20) calendar days from receipt of said claim make payment thereon or reject. In rejecting a claim, the terminal operator or motor carrier shall set forth the reason or reasons for said rejection and shall provide available documentation substantiating said rejection. Claims rejected because they do not contain sufficient information may be resubmitted no later than twenty (20) days from receipt of rejection.

(2) Rejected claims may be submitted for review within twenty (20) days of receipt of rejection to the Adjudicator who will affirm or reverse the rejection of claims within 30 days of receipt of the request for review. All decisions of said Adjudicator shall be final and binding.

(d) (1) Claims submitted by motor carriers, or importers or exporters on whose behalf motor carriers act, shall include the motor carrier's copy of the applicable delivery order or dock receipt, any other relevant document, a brief, but complete description of the facts giving rise to the claim, and a statement of the amount claimed.

(2) Claims filed by terminal operators shall include the terminal operator's copy of the applicable delivery order or dock receipt, a copy of the gate pass and any other arrival documents issued, copies of all other relevant documents, a brief explanation of the facts giving rise to the claim, and a statement of the amount claimed.

(e) (1) If the party identified as the terminal operator at a marine terminal facility under § 551.1(e) rejects a claim pursuant to §§ 551.1(i), 551.2(g), or otherwise denies a claim on the ground that the delay was caused by the steamship company, the original claim and a statement of the reasons for rejection shall be forwarded within seven days to the steamship company alleged by the terminal operator to be liable for the claim, copy to the claimant.

(2) The steamship company shall pay or reject the claim within twenty (20) calendar days from receipt thereof.

(3) If the claim is rejected by the steamship company, the claimant may submit both rejections to the Adjudicator who shall review the rejection of the claim by both parties and determine liability as between the two.

2. The first sentence of § 526.1(c) is revised to read as follows:

§ 526.1 Free time and demurrage charges at the Port of New York.

* * * * * *

(c) *Except as provided in* sections 551.3 (e)(2), 551.4(e), and 551.4(g) of Part 551, where a carrier is for any reason, unable, or refuses, to tender cargo for delivery during free time, free time must be extended for a period equal to the duration of the carrier's disability or refusal. * * *

* * * * * *

Effective date: These rules and regulations shall become effective December 10, 1975.

By order of the Federal Maritime Commission.

[SEAL] FRANCIS C. HURNEY, *Secretary.*

Title 49—Transportation

CHAPTER V—NATIONAL HIGHWAY TRAFFIC SAFETY ADMINISTRATION, DEPARTMENT OF TRANSPORTATION

[Docket No. 73-32; Notice 2]

PART 520—PROCEDURES FOR CONSIDERING ENVIRONMENTAL IMPACTS

The purpose of this amendment to Title 49 of the Code of Federal Regulations is to add a new Part 520 establishing procedures for considering environmental impacts.

A notice of proposed procedures on this subject was published on December 21, 1973 (38 FR 35018). Two comments were received on the proposed procedures: one, from the United States Environmental Protection Agency, supported the proposal and considered it to be responsive to the National Environmental Policy Act of 1969 (NEPA) and the NEPA guidelines prepared by the Council on Environmental Quality; the second, from General Motors Corporation, had some objections which have been carefully considered in this issuance of final procedures. In view of some of GM's comments, the issuance of the Department of Transportation (DOT) Order 5610.1B, "Procedures for Considering Environmental Impacts," (39 FR 35234), and further consideration within the NHTSA, the final procedures have been slightly modified.

Definitions. In order to differentiate a written environmental analysis submitted to the agency by its grantees or contractors from that undertaken by the agency itself, the meaning of the term "environmental assessment" has been changed from an internal agency evaluation process to an evaluation process external to the agency, and the term "environmental review" has been added to denote the written environmental analysis undertaken by the agency.

Applicability. "Consolidation of statements," § 520.4(f), allowing actions which have substantially similar environmental impacts to be covered by a single impact statement or environmental review culminating in a negative declaration is included in this final issuance.

GM commented that the increase in costs illustration used as an example for the project amendments exception in § 520.4(d)(5) (herein renumbered as § 520.4(e)(5)) is ambiguous and could also permit a circumvention of the initial environmental evaluation process. In response to this, the section has been revised to make it clear that only project amendments with no environmental consequences are excepted from the review process. The criteria for determining which project amendments are excepted is intended to match that for excepting minor agency actions (§ 520.4(e)(6)).

Section 520.4(d)(6) of the proposed procedures was erroneously included and is accordingly deleted.

Guidelines. The general guidelines have been reworded, upon GM's request, to clarify that an environmental impact statement or negative declaration is to be prepared for any of the three situations enumerated under this general category.

Section 520.5(b), *Specific guidelines,* has been modified to reflect GM's comments, revised DOT Order 5640.1, and further determinations within the NHTSA. Subparagraphs (7)–(12) have been added and the original subparagraph (7) has been renumbered as (13). The agency has determined that these additional classes of actions should be enumerated in order to better identify those typical areas of environmental concern the NHTSA's activities may impact.

Research activities. In accordance with section 4 of final DOT Order 5610.1B, proposed implementing instructions for assessing the environmental consequences of research activities will be prepared by the Assistant Secretary for Systems Development and Technology, with the concurrence of the NHTSA. Until these final procedures are promulgated, however, the guidelines set forth on this subject in the proposed procedures will be followed.

Procedures. The procedures subpart includes a number of additions and modifications. With respect to certain ac-

V 40 217 NOV 10 75 XUM

tions enumerated in Subpart A which may have an environmental significance, the official responsible for the action will prepare reviews that are much more comprehensive than the assessments proposed by the previous notice. He will conclude his review with a brief written report, to be included in the proposed or ongoing action, in which he will either recommend that a draft environmental impact statement (DEIS) be prepared to determine the environmental impact involved, or declare that the action would not have a significant effect on the quality of the environment. A review report that concludes with a "negative declaration" is not required to go through the extensive comment and review process provided for the DEIS, but it will be retained by the agency and made available to the public upon request.

Once an Associate Administrator, the Chief Counsel, or a Regional Administrator (in consultation with his Governor's Representative) determines, that an agency action under his jurisdiction requires the preparation of a DEIS, he will transmit a "notice of intent" to prepare the DEIS to the appropriate Federal, State, and local agencies and publish the notice in the FEDERAL REGISTER. In addition, a schedule of procedures and review will be developed in each case to assure completion of the DEIS before the first significant point of decision in the program or project development process. Once the DEIS is circulated for review and comment, not less than 45 days in any case will be allowed for comment. A public hearing on a DEIS will be held when appropriate, and notice of the hearing will be issued in the FEDERAL REGISTER at least 30 days before the hearing. Final environmental impact statements (FEIS) will be prepared and distributed as soon as practicable after the expiration of the comment and hearing process.

In accordance with the final DOT order 5610.1B, a new § 520.34 has been added, establishing procedures for the review of environmental statements prepared by other agencies.

Four attachments having a direct bearing on the preparation of impact statements have been added to this issuance of the final rule and will be followed by this agency.

Effective date: November 4, 1975.

In consideration of the foregoing, a new Part 520, "Procedures for Considering Environmental Impacts," is added to Title 49, Code of Federal Regulations, as set forth below.

(Secs. 102(2)(A), 102(2)(C), Pub. L. 91-190, 83 Stat. 853 (42 U.S.C. 4332); secs. 2(b), 4(f), Pub. L. 89-670, 80 Stat. 931 (49 U.S.C. 1651(b), 1653(f)); Executive Order 11514, 35 FR 4247; 40 CFR Part 1500; DOT Order 5610.1B, 39 FR 35234; delegations of authority at 49 CFR 1.45, 1.51).

Issued on November 4, 1975.

JAMES B. GREGORY,
Administrator.

A new Part 520 is added as follows:

Subpart A—General

Sec.
520.1 Purpose and scope.
520.2 Policy.
520.3 Definitions.
520.4 Applicability.
520.5 Guidelines for identifying major actions significantly affecting the environment.

Subpart B—Procedures

520.21 Preparation of environmental reviews, negative declarations, and notices of intent.
520.22 Maintenance of list of actions.
520.23 Preparation of draft environmental impact statements.
520.24 Internal processing of draft environmental impact statements.
520.25 External review of draft environmental impact statements.
520.26 Public hearings.
520.27 Legislative actions.
520.28 Preparation of final environmental impact statements.
520.29 Internal review of final environmental impact statements.
520.30 Availability of final environmental impact statements.
520.31 Amendments or supplements.
520.32 Emergency action procedures.
520.33 Timing of proposed NHTSA actions.
520.34 Comments on environmental statements prepared by other agencies.
Attachment 1—Form and content of statement.
Attachment 2—Areas of environmental impact and Federal agencies and Federal-State agencies with jurisdiction by law or special expertise to comment thereon.
Attachment 3—Offices within Federal agencies and Federal-State agencies for information regarding the agencies' NEPA activities and for receiving other agencies' impact statements for which comments are requested.
Attachment 4—State and local agency review of impact statements.

Subpart A—General

§ 520.1 Purpose and scope.

(a) Section 102(2)(C) of the National Environmental Policy Act of 1969 (83 Stat. 853; 42 U.S.C. 4332(2)(C)), as implemented by Executive Order 11514 (3 CFR, 1966–1970 Comp., p. 902) and the Council on Environmental Quality's Guidelines of April 23, 1971 (36 FR 7724), requires that all agencies of the Federal Government prepare detailed environmental statements on proposals for legislation and other major Federal actions significantly affecting the quality of the human environment. The purpose of the Act is to build into the agency decision-making process careful consideration of all environmental aspects of proposed actions.

(b) This part specifies National Highway Traffic Safety Administration (NHTSA) procedures for conducting environmental assessments and reviews, and for the preparation of environmental impact statements on proposals for legislation and other major agency actions significantly affecting the quality of the human environment.

§ 520.2 Policy.

The agency will strive to carry out the full intent and purpose of the National Environmental Policy Act of 1969 and related orders and statutes, and take positive steps to avoid any action which could adversely affect the quality of the human environment.

§ 520.3 Definitions.

(a) "Environmental assessment" is a written analysis describing the environmental impact of a proposed or ongoing agency action, submitted to the agency either by its grantees or contractors, or by any person outside the agency as part of any program or project proposal within the scope of activities listed in § 520.4(b).

(b) "Environmental review" is a formal evaluation undertaken by the agency, culminating in a brief document (the environmental review report), to determine whether a proposed or ongoing NHTSA action may have a significant impact on the environment. The review document will be included in the proposed or ongoing agency action, and either support a negative declaration or recommend the preparation of a draft environmental impact statement.

(c) "Draft environmental impact statement" (DEIS) means a preliminary statement on the environmental impact of a proposed or ongoing NHTSA action which is circulated for comment and review within and outside NHTSA.

(d) "Final environmental impact statement" (FEIS) means a detailed statement which, pursuant to section 102(2)(C) of the National Environmental Policy Act, identifies and analyzes the anticipated environmental impact of a proposed or ongoing NHTSA action.

(e) "Negative declaration" means a statement prepared subsequent to an environmental review, which states that a proposed or ongoing NHTSA action will have no significant environmental impact and therefore does not require a draft or final environmental impact statement.

§ 520.4 Applicability.

(a) *Scope.* This part applies to all elements of NHTSA, including the Regional Offices.

(b) *Actions covered.* Except as provided in paragraph (e) of this section, this part applies to the following agency actions and such actions and proposals as may be sponsored jointly with another agency:

(1) New and continuing programs and projects; budget proposals; legislative proposals by the agency; requests for appropriations; reports on legislation initiated elsewhere where the agency has primary responsibility for the subject matter involved; and any renewals or reapprovals of the foregoing;

(2) Research, development, and demonstration projects; formal approvals of work plans; and associated contracts;

(3) Rulemaking and regulatory actions, including Notices of Proposed Rulemaking (NPRM); requests for procurement (RFP); requests for grants (Annual Work Programs); and contracts;

(4) All grants, loans or other financial assistance for use in State and Community projects;

(5) Annual State Highway Safety Work Programs;

(6) Construction; leases; purchases; operation of Federal facilities; and

(7) Any other activity, project, or action likely to have a significant effect on the environment.

(c) *Continuing actions.* This part applies to any action enumerated in paragraph (b) of this section, even though such action arise from a project or program initiated prior to enactment of the National Environmental Policy Act on January 1, 1970.

(d) *Environmental assessments.* Within the scope of activities listed in § 520.4(b), any person outside the agency submitting a program or project proposal may be requested to prepare an environmental assessment of such proposed action to be included in his submission to the agency.

(e) *Exceptions.* (1) Assistance in the form of general revenue sharing funds, distributed under the State and Local Fiscal Assistance Act of 1972, 31 U.S.C. 1221, with no control by the NHTSA over the subsequent use of such funds;

(2) Personnel actions;

(3) Administrative procurements (e.g., general supplies) and contracts for personal services;

(4) Legislative proposals originating in another agency and relating to matters not within NHTSA's primary areas of responsibility;

(5) Project amendments (e.g., increases in costs) which have no environmental significance; and

(6) Minor agency actions that are determined by the official responsible for the actions to be of such limited scope that they clearly will not have a significant effect on the quality of the human environment.

(f) *Consolidation of statements.* Proposed actions (and alternatives thereto) having substantially similar environmental impacts may be covered by a single environmental review and environmental impact statement or negative declaration.

§ 520.5 Guidelines for identifying major actions significantly affecting the environment.

(a) *General guidelines.* The phrase, "major Federal actions significantly affecting the quality of the human environment," as used in this part, shall be construed with a view to the overall, cumulative impact of the actions, other Federal projects or actions in the area, and any further contemplated or anticipated actions. Therefore, an environmental impact statement should be prepared in any of the following situations:

(1) Proposed actions which are localized in their impact but which have a potential for significantly affecting the environment;

(2) Any proposed action which is likely to be controversial on environmental grounds;

(3) Any proposed action which has unclear but potentially significant environmental consequences.

(b) *Specific guidelines.* While a precise definition of environmental significance that is valid in all contexts is not possible, any of the following actions should ordinarily be considered as significantly affecting the quality of the human environment:

(1) Any matter falling under section 4(f) of the Department of Transportation Act (49 U.S.C. 1653(f)) and section 138 of Federal-aid highway legislation (23 U.S.C. 138), requiring the use of any publicly owned land from a park, recreation area, or wildlife and waterfowl refuge of national, State, or local significance as determined by the Federal, State, or local officials having jurisdiction thereof, or any land from an historic site of national, State, or local significance;

(2) Any matter falling under section 106 of the National Historic Preservation Act of 1966 (16 U.S.C. 470(f)), requiring consideration of the effect of the proposed action on any building included in the National Register of Historic Preservation and reasonable opportunity for the Advisory Council on Historic Preservation to comment on such action;

(3) Any action that is likely to affect the preservation and enhancement of sites of historical, architectural, or archaeological significance;

(4) Any action that is likely to be highly controversial regarding relocation housing;

(5) Any action that (i) divides or disrupts an established community, disrupts orderly, planned development, or is inconsistent with plans or goals that have been adopted by the community in which the project is located; or (ii) causes significantly increased congestion;

(6) Any action that (i) involves inconsistency with any Federeal, State, or local law or administrative determination relating to the environment; (ii) has a significantly detrimental impact on air or water quality or on ambient noise levels for adjoining areas; (iii) involves a possibility of contamination of a public water supply system; or (iv) affects ground water, flooding, erosion, or sedimentation;

(7) Any action that may directly or indirectly result in a significant increase in noise levels, either within a motor vehicle's closed environment or upon nearby areas;

(8) Any action that may directly or indirectly result in a significant increase in the energy or fuel necessary to operate a motor vehicle, including but not limited to the following: (i) Actions which may directly or indirectly result in a significant increase in the weight of a motor vehicle; and (ii) actions which may directly or indirectly result in a significant adverse affect upon the aerodynamic drag of a motor vehicle;

(9) Any action that may directly or indirectly result in a significant increase in the amount of harmful emissions resulting from the operation of a motor vehicle;

(10) Any action that may directly or indirectly result in a significant increase in either the use of or the exposure to toxic or hazardous materials in the manufacture, operation, or disposal of motor vehicles or motor vehicle equipment.

(11) Any action that may directly or indirectly result in a significant increase in the problem of solid waste, as in the disposal of motor vehicles or motor vehicle equipment;

(12) Any action that may directly or indirectly result in a significant depletion of scarce natural resources associated with the manufacture or operation of motor vehicles or motor vehicle equipment; and

(13) Any other action that causes significant environment impact by directly or indirectly affecting human beings through adverse impacts on the environment.

(c) *Research activities.* (1) In accordance with DOT Order 5610.1B, the Assistance Secretary for Systems Development and Technology (TST) will prepare, with the concurrence of the NHTSA, proposed procedures for assessing the environmental consequences of research activities. Until final procedures are promulgated, the following factors are to be considered for periodic evaluation to determine when an environmental statement is required for such programs:

(i) The magnitude of Federal investment in the program;

(ii) The likelihood of widespread application of the technology;

(iii) The degree of environmental impact which would occur if the technology were widely applied; and

(iv) The extent to which continued investment in the new technology is likely to restrict future alternatives.

(2) The statement or environmental review culminating in a negative declaration must be written late enough in the development process to contain meaningful information, but early enough so that this information can practically serve as an input in the decision-making process. Where it is anticipated that an environmental impact statement may ultimately be required but its preparation is still premature, the office shall prepare a publicly available record briefly setting forth the reasons for its determination that a statement is not yet necessary. This record shall be updated at least quarterly, or as may be necessary when significant new information becomes available concerning the potential environmental impact of the program. In any case, a statement or environmental review culminating in a negative declaration must be prepared before research activities have reached a state of investment or commitment to implementation likely to determine subsequent development or restrict later alternatives. Statements on technology research and development programs shall include an analysis not only of alternative forms of the same technology that might reduce any adverse environmental impacts but also of alternative technologies that would serve the same func-

V 40 217 NOV 10 75 XUM

tion as the technology under consideration. Efforts shall be made to involve other Federal agencies and interested groups with relevant expertise in the preparation of such statements because the impacts and alternatives to be considered are likely to be less well defined than in other types of statements.

Subpart B—Procedures

§ 520.21 Preparation of environmental reviews, negative declarations, and notices of intent.

(a) *General responsibilities.*—(1) *Associate Administrators and Chief Counsel.* Each Associate Administrator and the Chief Counsel is responsible for determining, in accordance with Subpart A, whether the projects and activities under his jurisdiction require an environmental review, and for preparing all such reviews, negative declarations, and notices of intent.

(2) *Regional Administrators.* Each Regional Administrator, in consultation with the Governor's Representative, is responsible for determining, in accordance with Subpart A, whether proposed State activities in his Region, as stated in Annual Work Programs, require an environmental review, and for the preparing all such reviews, negative declarations, and notices of intent.

(3) *Associate Administrator for Planning and Evaluation.* The Associate Administrator for Planning and Evaluation may request in accordance with the requirements of this order, that the appropriate Associate Administrator or Regional Administrator prepare an Environmental review or Environmental Impact Statement for any proposed or continuing NHTSA action, or comment on any environmental statement prepared by other agencies.

(b) *Coordination.* Coordination with appropriate local, State and Federal agencies should be accomplished during the early stages by the responsible official to assist in identifying areas of significance and concern. Existing procedures, including those established under the Office of Management and Budget (OMB) Revised Circular A–95, should be used to the greatest extent practicable to accomplish this early coordination.

(c) *Applicants.* (1) Each applicant for a grant, loan, or other financial assistance for use in State and community projects may be requested to submit, with the original application, an environmental assessment of the proposed project.

(2) Under OMB Revised Circular A–95, "Evaluation, Review, and Coordination of Federal Assistance Programs and Projects," and DOT 4600.4B, "Evaluation, Review and Coordination of DOT Assistance Programs and Projects," dated February 27, 1974, a grant applicant must notify the clearinghouse of its intention to apply for Federal program assistance. The notification must solicit comments on the project and its impacts from appropriate State and local agencies. Since it is the NHTSA's policy to assure that (i) interested parties and Federal, State, and local agencies receive early notification of the decision to prepare an environmental impact statement, and (ii) their comments on the environmental effects of the proposed Federal action are solicited at an early stage in the preparation of the draft impact statement, this early notification requirement may be met by a grant applicant by sending the notification to interested parties and agencies at the same time it is sent to the clearinghouse.

(d) *Consultants.* Consultants may prepare background or preliminary material and assist in preparing a draft or final environmental statement for which the NHTSA takes responsibility. Care should be exercised in selecting consultants, and in reviewing their work, to insure complete and objective consideration of all relevant project impacts and alternatives, particularly if the consultant may expect further contracts based on the outcome of the environmental decision.

(e) *Environmental review report.* The environmental review shall culminate in a brife written report of the same title, which shall be included in the proposed or ongoing agency action, and which:

(1) Describes the proposed or ongoing NHTSA action, the environment affected, and the anticipated benefits;

(2) Evaluates the potential environmental impact, including those adverse impacts which cannot be avoided, should the proposal be implemented or the action continued;

(3) Assesses the alternatives to the proposed or ongoing action and their potential environmental impact.

(4) Evaluates the cumulative and long-term environmental effects of the proposed or ongoing action;

(5) Describes the irreversible and irretrievable commitments of resources involved in the proposal's implementation or the action's continuance;

(6) Identifies any known or potential conflicts with State, regional, or local plans and programs;

(7) Weighs and analyzes the anticipated benefits against the environmental and other costs of the proposed or ongoing action in a manner which reflects similar comparisons of reasonably available alternatives; and

(8) Concludes with a negative declaration or recommends the preparation of a DEIS.

(f) *Negative declarations.* (1) If the responsible official judges that the environmental impact of a proposed or ongoing action under his jurisdiction will not significantly affect the quality of the human environment, the following declaration will be included in the environmental review report:

It is the judgment of this agency, based on available information, that no significant environmental impact will result from execution of this action.

(2) A DEIS may be changed to a negative declaration if the public review process indicates that the proposal or ongoing action will not have a significant effect upon the environment.

(3) An index of all negative declarations and a copy of each environmental review report shall be retained by the responsible official under whose jurisdiction it was prepared and shall be made available for public inspection upon request.

(g) *Notice of intent to prepare a draft environmental impact statement.* If the responsible official under whose jurisdiction an environmental review is prepared determines that the proposed or ongoing action could have a potentially significant effect on the quality of the environment, he shall: coordinate with the Associate Administrator for Planning and Evaluation and the Chief Counsel, transmit to appropriate Federal, State and local agencies and have published in the FEDERAL REGISTER a notice of intent to prepare an environmental statement as soon as is practicable after the determination to prepare such a statement.

§ 520.22 Maintenance of a list of actions.

(a) The Associate Administrator for Planning and Evaluation shall be responsible for the preparation and maintenance of a list of actions for which draft or final environmental impact statements have been or are to be prepared. This list shall be on file with the Associate Administrator for Planning and Evaluation and shall be available for public inspection in the Docket Section upon request. A copy of the initial list and its updatings at the end of each calendar quarter shall be transmitted by the Associate Administrator for Planning and Evaluation to TES and CEQ.

(b) If a determination is made that an environmental statement is not necessary for a proposed action (1) which has been identified as normally requiring preparation of a statement, (2) which is similar to actions for which a significant number of statements have been prepared, (3) which the agency has previously announced would be the subject of a statement, or (4) for which the official responsible for such proposal has made a negative determination in response to a request from the CEQ, a record briefly setting forth the decision and the reasons for that determination shall be prepared by the responsible official. Such a record of negative determinations and any evaluations made pursuant to § 520.21 which conclude that preparation of a statement is not yet timely shall be prepared by the responsible official, submitted to the Associate Administrator for Planning and Evaluation, and made available by the Associate Administrator for Planning and Evaluation in the same manner as provided in paragraph (a) of this section for lists of statements under preparation.

§ 520.23 Preparation of draft environmental impact statements.

(a) *Planning stage.* (1) When a DEIS is to be prepared, the responsible official shall promptly initiate its preparation and develop a schedule in consultation

with the Associate Administrator for Planning and Evaluation, to assure completion prior to the first significant point of decision in the program or project development process.

(2) The environmental impacts of proposed activities should be initially assessed concurrently with the initial technical and economic studies.

(3) Section 102(2)(A) of NEPA requires each Federal agency to utilize a "systematic, interdisciplinary approach" to plans and programs affecting the environment. To assure that all environmental impacts are identified and assessed, all relevant disciplines should be represented. If the necessary disciplines are not represented on the staff of the applicant or NHTSA, it is appropriate to use professional services available in other Federal, State or local agencies, universities, or consulting firms. The use of the interdisciplinary approach should not be limited to the environmental statement. This approach should also be used in the early planning stages to help assure a systematic evaluation of reasonable alternative courses of action and their potential social, economic, and environmental consequences.

(b) *Form and content requirements.* Attachment 1 of this order prescribes the form and content requirements to be followed for each draft and final environmental impact statement. The DEIS must fulfill and satisfy, to the fullest extent possible at the time it is prepared, the requirements established for final statements.

(c) *"Lead agency".* CEQ guidelines provide that when more than one Federal agency (1) directly sponsors an action, or is directly involved in an action through funding, licenses, or permits, or (2) is involved in a group of actions directly related to each other because of their functional interdependence and geographical proximity, consideration should be given to preparing one statement for all the Federal actions involved. Agencies in such cases should consider the designation of a single "lead agency" to assume supervisory responsibility for preparation of a joint statement. Where a lead agency prepares the statement, the other agencies involved should provide assistance with respect to their areas of jurisdiction and expertise. The statement should contain an evaluation of the full range of Federal actions involved, should reflect the views of all participating agencies, and should be prepared before major or irreversible actions have been taken by any of the participating agencies. Some relevant factors in determining an appropriate lead agency are: The time sequence in which the agencies become involved, the magnitude of their respective involvement, and their relative expertise with respect to the project's environmental effects.

Questions concerning "lead agency" decisions should be raised with CEQ through TES. For projects serving and primarily involving land owned by or under the jurisdiction of another Federal agency, that agency may be the appropriate lead agency.

(d) *Applicants.* Where the agency requests an applicant for financial assistance or other agency approval to submit an environmental assessment, the responsible official will (1) assist the applicant by outlining the information required, and (2) in all cases make his own evaluation of the environmental issues involved and take responsibility for the scope and content of draft and final environmental statements.

§ 520.24 Internal processing of draft environmental impact statements.

Before circulating a DEIS for external review, the official responsible for the DEIS shall (1) receive the concurrence of the Associate Administrator for Planning and Evaluation and the Chief Council; and (2) prepare a memorandum for approval by the Administrator which shall:

(a) Set forth the basis on which it was determined that a potentially significant environmental effect exists;

(b) Attach the DEIS;

(c) Identify the Federal, State, and local agencies and private sources from which comments on the DEIS are proposed to be solicited (see Attachment 2[1]); and

(d) Include a recommendation on whether a public hearing on the proposed action should be held.

§ 520.25 External review of draft environmental impact statements.

(a) *Requirements.* The official responsible for the DEIS shall:

(1) Transmit 5 copies of the DEIS to the CEQ and 2 copies to TES;

(2) Solicit comments from all Federal, State, and local agencies which have jurisdiction by law or special expertise with respect to the possible environmental impact involved, and from the public (see Attachment 2); and

(3) Inform the public and interested parties of the availability of the DEIS and provide copies as appropriate; and

(4) Allow a comment period of not less than 45 days from the Friday of the week following receipt of the draft impact statement by CEQ. Requests for extensions shall be granted whenever possible, and particularly when warranted by the magnitude and complexity of the statement or the extent of citizen interest.

(b) *Procedures.*—(1) *Federal and Federal-State agency review.* (i) The DEIS shall be circulated for review to the Federal and Federal-State agencies with special expertise or jurisdiction by law with regard to the potential environmental impact involved. These agencies and their relevant areas of expertise are identified in Attachment 2.

(ii) For actions within the jurisdiction of the Environmental Protection Agency (air or water quality, solid wastes, pesticides, radiation standards, noise), the DEIS shall be sent to EPA.

(iii) For actions which would affect any property that is included in the National Register of Historic Preservation, the DEIS should be sent to the Advisory Council on *Historic* Preservation and the State Liaison Office for Historic Preservation.

(2) *State and local review.* Where a review of the proposed action by State and local agencies authorized to develop and enforce environmental standards is relevant, comments are to be solicited directly from such agencies with known responsibilities in environmental matters, and shall be obtained as follows:

(i) Where review of direct Federal development projects, and of projects assisted under programs listed in Attachment D to revised OMB Circular A–95 (as implemented by DOT 4600.4B "Evaluation, Review and Coordination of DOT Assistance Programs and Projects", dated February 27, 1974), takes place prior to preparation of an environmental statement, comments of the reviewing agencies on the environmental effects of the proposed project are inputs to the environmental statement. These comments shall be attached to the draft statement when it is circulated for review and copies of the draft shall be sent to those who commented. A–95 clearinghouses or other agencies designated by the Governor may also secure comments on environmental statements. In all cases, copies of the draft environmental statements shall be sent to clearinghouses and to the applicant whose project is the subject of the statement.

(ii) Comments shall be directly obtained from appropriate State and local agencies, except where review is secured by agreement through A–95 clearinghouses, unless the Governor of the appropriate State has designated some other point for obtaining his review. Instructions for obtaining the views of such agencies are contained in the joint OMB–CEQ memorandum (see Attachment 4). Comments shall be solicited from municipalities and counties on all projects located therein.

(iii) State and local review of NHTSA procedures, regulations, and policies for administering Federal programs of assistance to State and local governments shall be obtained pursuant to procedures established by OMB Circular No. A–85.

(iv) Generally, environmental statements on legislative and budget proposals may be excluded from State and local review.

(3) *General public review.* (i) At the time the DEIS is circulated to Federal, State, and local agencies, public availability of the DEIS for comment and review will be announced by the CEQ in the FEDERAL REGISTER. Copies of the DEIS should be sent to known interested parties, and press releases should be sent to local news media advising where the DEIS is available and now copies may be obtained. The Office of Public Affairs and Consumer Services shall maintain a list of groups, including conservation organizations and motor vehicle manufacturers, known to be interested in the agency's activities, and directly notify

[1] Filed as part of the original document.

V 40 217 NOV 10 75 XUM

such groups of the availability of the DEIS or send them a copy as soon as it has been prepared.

(ii) A DEIS should be available to the public at least 30 days prior to the time of a public hearing on the DEIS.

(iii) Copies of the DEIS will be made available at the NHTSA Docket Section, Room 5108, 400 Seventh Street, SW., Washington, D.C. 20590, and, where appropriate, NHTSA Regional Offices, at the offices of any applicants or grantees, at appropriate State, regional, and metropolitan clearing houses, and local public libraries, and furnished to public and private organizations and individuals with special expertise with respect to the potential environmental impact involved, and to those with an interest in the action who request an opportunity to comment. Copies to be made available to the public shall be provided without charge to the extent practicable, or at a fee which is not more than the actual cost of reproducing copies required to be sent to other Federal agencies, including the CEQ.

(iv) A copy of the DEIS should in all cases be sent to any applicant whose project is the subject of the statement.

(v) If a DEIS is changed to a negative declaration as a result of the public review process, all agencies and individuals that received copies and/or commented on the DEIS must be informed that a negative declaration was substituted for the DEIS and given a brief explanation of the reason for such substitution.

(c) *Utilization of comments.* Comments received on the draft statement, and inputs (in summary form, if appropriate) from the processes for citizen participation, shall accompany the environmental statement through the normal internal project or program review process.

§ 520.26 Public hearings.

(a) A public hearing on a proposed or ongoing action covered by a DEIS shall be held upon the determination by the official responsible for such action, in consultation with the Associate Administrator for Planning and Evaluation, that a public hearing would be appropriate and in the public interest. In deciding whether a public hearing is appropriate, the responsible official should consider:

(1) The magnitude of the proposal in terms of economic costs, the geographic area involved, and the uniqueness or size of the commitment of the resources involved;

(2) The degree of interest in the proposal, as evidenced by requests from the public and from Federal, State, and local authorities that a hearing be held;

(3) The likelihood that information will be presented at the hearing which will be of assistance to the agency in fulfilling its responsibilities under the NEPA;

(4) The extent to which public involvement already has been achieved through other means, such as earlier public hearings, meetings with citizen representatives, and/or written comments on the proposed action; and

(5) The extent of potential environmental impact.

(b) If it is determined that a public hearing is to be held in accordance with paragraph (a) of this section, the official responsible for the action shall both announce the hearing through newspaper articles, direct notification to interested parties, and clearinghouses, and cause a notice to be issued in the FEDERAL REGISTER at least 30 days prior to the time of such hearing:

(1) Identifying the subject matter of the hearing;

(2) Announcing the date, time, and place of the hearing and the procedures to be followed; and

(3) Announcing the availability of the DEIS and any other information, as appropriate, for public inspection at one or more locations in the area affected by the action.

§ 520.27 Legislative actions.

(a) A DEIS on both legislative proposals and reports for which NHTSA either develops the Departmental position or originates the legislation will be cleared with TES, filed with CEQ, and submitted to the Office of Management and Budget through the normal DOT and NHTSA legislative process.

(b) The preparation, circulation, and filing of the environmental statement shall be in accordance with OMB Bulletin 72–6, "Proposed Federal Actions Affecting the Environment."

(c) A DEIS and any comments that have been received should be available to the Congress and to the public for consideration in connection with the proposed legislation or report on proposed legislation. In cases where the scheduling of Congressional hearings on recommendations or reports on proposals for legislation which the Department has forwarded to the Congress does not allow adequate time for the completion of a FEIS, a DEIS may be furnished to the Congress and made available to the public pending transmittal of the comments as received and the final text.

§ 520.28 Preparation of final environmental impact statements.

(a) If the action is to go forward and the DEIS has not been changed to a negative declaration, as soon as practicable after the expiration of the comment period and hearing process, if any, the official responsible for the action shall prepare a final environmental impact statement (FEIS), taking into account all comments received and issues raised during such period and process.

(b) The FEIS shall conform to the guidelines for form and content in Attachment 1.

(c) The FEIS shall then be submitted to the Chief Counsel by the official responsible for the action, for determination of legal sufficiency.

§ 520.29 Internal review of final environmental impact statements.

(a) Upon completion of the review for legal sufficiency of the FEIS, the Chief Counsel shall transmit 2 copies of the FEIS to TES for concurrence. Unless other notification is provided within 2 weeks after receipt in TES, the statement will be considered concurred in by TES.

(b) After concurrence by TES, the FEIS will be transmitted by the Chief Counsel to the Administrator for approval.

(c) If an action requires the personal approval of the Secretary or Deputy Secretary pursuant to a request by them or by TES, TGC, or the NHTSA office originating the action, the final environmental statement shall be accompanied by a brief cover memorandum requesting the Secretary's or Deputy Secretary's approval of the action.

(1) The memorandum shall have signature lines for the concurrence of the Assistant Secretary for Environment, Safety, and Consumer Affairs, the General Counsel, and the Deputy Secretary, and for the approval of the Secretary or Deputy Secretary.

(2) TES, in conjunction with the Executive Secretary, is responsible for informing the Assistant Secretary for Congressional and Intergovernmental Affairs and the Office of Public Affairs of the Secretary's decisions so that they, in coordination with the operating administrations or other Secretarial Offices involved, may take the appropriate actions.

§ 520.30 Availability of final environmental impact statements.

(a) Pending final approval and filing with CEQ, a proposed FEIS may be made available to the public and Federal, State, or local agencies if it carries a notation that it is not approved and filed.

(b) After approval by the Administrator, the Associate Administrator for Planning and Evaluation will send 5 copies of the FEIS (together with comments) to the CEQ; individual copies with comments attached to the EPA and all Federal, State, and local agencies and members of the public who submitted comments on the DEIS or requested copies of the FEIS. If the length of the statement or the number of comments make this distribution requirement highly impractical, TES should be consulted to consider an alternative arrangement.

(c) Copies of the FEIS will be made available in the NHTSA Docket Section, Room 5108, 400 Seventh Street SW., Washington, D.C. 20590, and, where appropriate, NHTSA Regional Offices, at the offices of any applicants or grantees, and at appropriate State, regional, and metropolitan clearinghouses and, where the impact is localized, public libraries.

(d) The official responsible for the action shall, upon request, make available copies of the FEIS and substantive comments received on the DEIS without charge to the extent practicable, or at a fee which is not more than the actual cost of reproducing copies.

§ 520.31 Amendments or supplements.

A draft or final environmental impact statement may be amended or supplemented. Supplements or amendments should be considered when substantial changes are made in the proposed or ongoing action that will introduce a new or changed environmental effect of significance to the quality of the environment, or significant new information becomes available concerning its environmental aspects. In such cases, the supplement or amendment shall be processed in consultation with TES with respect to the need for, or desirability of, recirculating the statement for the appropriate period. TES concurrence must be secured before issuance.

§ 520.32 Emergency action procedures.

The CEQ Guidelines allow modification of requirements in case of a national emergency, a disaster or similar great urgency. The processing times may be reduced, or if the emergency situation warrants, preparation and processing of a DEIS, FEIS, or negative declaration may be abbreviated. Such procedural changes, however, should be requested only for those projects where the need for immediate action requires processing in other than the normal manner.

§ 520.33 Timing of proposed NHTSA actions.

To the maximum extent practicable, no administrative action (i.e., any proposed action to be taken by the agency other than agency proposals for legislation to Congress, budget proposals, or agency reports on legislation) subject to this part and covered by an environmental impact statement shall be taken sooner than 90 days after a DEIS has been circulated for comment, furnished to the CEQ, and made public. Neither shall such administrative action be taken sooner than 30 days after the FEIS (together with comments) has been filed with CEQ, and made available to commenting agencies and the public. If the FEIS is filed within 90 days after a DEIS has been circulated for comment, furnished to the CEQ and made public, the 30-day period and 90-day period may run concurrently to the extent that they overlap. The 90-day time period is measured from the date of publication in the FEDERAL REGISTER of the list of weekly filings of environmental impact statements with the CEQ, but the 30-day period is computed from the date of receipt by the CEQ.

§ 520.34 Comments on environmental statements prepared by other agencies.

(a) All requests for NHTSA's views on a DEIS or a proposed action undergoing environmental review by another agency will be transmitted to the Associate Administrator for Planning and Evaluation for action or referral to TES where appropriate. Offices within NHTSA may be requested by the Associate Administrator for Planning and Evaluation to supply any pertinent information and comments for a coordinated agency response.

(b) NHTSA's comments and the comments of any offices responding to a request by the Associate Administrator for Planning and Evaluation should be organized in a manner consistent with the structure of an environmental review set out in § 520.21(e). NHTSA programs that are environmentally related to the proposed action under review should be identified so interrelationships may receive due consideration.

(c) Copies of NHTSA's comments on environmental statements prepared by other agencies shall be distributed as follows:

(1) The original and 1 copy to the requesting agency;

(3) 5 copies to CEQ.

(d) Requests by the public for copies should be referred to the agency originating the statement.

ATTACHMENT 1—FORM AND CONTENT OF STATEMENT

1. Form. a. Each statement will be headed as follows:

DEPARTMENT OF TRANSPORATION NATIONAL HIGHWAY TRAFFIC SAFETY ADMINISTRATION

(Draft) Environmental Impact Statement Pursuant to section 102(2)(C), Pub. L. 91–190; 83 Stat. 853; 42 U.S.C. 4332(2)(C).

b. The heading specified above shall be modified to indicate that the statement also covers sections 4(f) of the DOT Act or 106 of the National Historic Preservation Act, when appropriate.

c. Each statement will, as a minimum, contain sections corresponding to paragraph 3 herein, supplemented as necessary to cover other matters provided in this Attachment.

d. The format for the summary to accompany draft and final environmental statements is as follows:

SUMMARY

(Check one) ( ) Draft ( ) Final; Department of Transportation, National Highway Traffic Safety Administration. Name, address, and telephone number of individual who can be contacted for additional information about the proposed action or the statement. (Note: DOT Order 2100.2 prescribes procedures for reporting public contacts in rulemaking.)

(1) Name of Action. (Check one) ( ) Administrative Action. ( ) Legislative Action.

(2) Brief description of action indicating what States (and counties) are particularly affected.

(3) Summary of environmental impact and adverse environmental effects.

(4) List alternatives considered.

(5) (a) (For draft statements) List all Federal, State, and local agencies from which comments have been requested.

(b) (For final statements) List all Federal, State, and local agencies and other sources from which written comments have been received.

(6) Dates the draft statement and the final statement if issued were made available to the Council on Environmental Quality and the public.

2. Guidance as to content of statement. The following paragraphs of this Attachment are intended to be considered, where relevant, as guidance regarding the content of environmental statements. This guidance is expected to be supplemented by research reports, guidance on methodology, and other material from the literature as may be pertinent to evaluation of relevant environmental factors.

3. General content. The following points are to be covered:

a. A description of the proposed Federal action (e.g., "The proposed Federal action is approval of a grant application to construct • • •"), a statement of its purpose, and a description of the environment affected, including information, summary technical data, and maps and diagrams where relevant, adequate to permit an assessment of potential environmental impact by commenting offices and the public.

(1) Highly technical and specialized analyses and data should generally be avoided in the body of the draft impact statement. Such materials should be appropriately summarized in the body of the environmental statement and attached as appendices or footnoted with adequate bibliographic references.

(2) The statement should succinctly describe the environment of the area affected as it exists prior to a proposed action, including other related Federal activities in the area, their interrelationships, and cumulative environmental impact. The amount of detail provided in such descriptions should be commensurate with the extent and expected impact of the action, and with the amount of information required at the particular level of decision making (planning, feasibility, design, etc.). In order to insure accurate descriptions and environmental considerations, site visits should be made where appropriate.

(3) The statement should identify, as appropriate, population and growth characteristics of the affected area and any population and growth assumptions used to justify the project or program or to determine secondary population and growth impacts resulting from the proposed action and its alternatives (see paragraph 3c(2)). In discussing these population aspects, the statement should give consideration to using the rates of growth in the region of the project contained in the projection compiled for the Water Resources Council by the Bureau of Economic Analysis of the Department of Commerce and the Economic Research Service of the Department of Agriculture (the OBERS projection).

(4) The sources of data used to identify, quantify, or evaluate any or all environmental consequences must be expressly noted.

b. The relationship of the proposed action and how it may conform to or conflict with adopted or proposed land use plans, policies, controls, and goals and objectives as have been promulgated by affected communities. Where a conflict or inconsistency exists, the statement should describe the extent of reconciliation and the reasons for proceeding notwithstanding the absence of full reconciliation.

c. The probable impact of the proposed action on the environment. (1) This requires assessment of the positive and negative effects of the proposed action is it affects both national and international human environment. The attention given to different environmental factors will vary according to the nature, scale, and location of proposed actions. Among factors to be considered should be the potential effect of the action on such aspects of the environment as those listed in Attachment 2, and in section 520.5(b), supra. Primary attention should be given in the statement to discussing those factors most evidently impacted by the proposed action.

(2) Secondary and other foreseeable effects, as well as primary consequences for the environment, should be included in the

V 40 N 217 NOV 10 75
XUM

analyses. Secondary effects, such as the impact on fuel consumption, emissions, or noise levels of automobiles or in the use of toxic or scarce materials, may be more substantial than the primary effects of the original action.

d. Alternatives to the proposed action, including, where relevant, those not within the existing authority of the responsible preparing office. Section 102(2)(D) of NEPA requires the responsible agency to "study, develop, and describe appropriate alternatives to recommended courses of action in any proposal which involves unresolved conflicts concerning alternative uses of available resources." A rigorous exploration and an objective evaluation of the environmental impacts of all reasonable alternative actions, particularly those that might enhance environmental quality or avoid some or all of the adverse environmental effects, are essential. Sufficient analysis of such alternatives and their environmental benefits, costs, and risks should accompany the proposed action through the review process in order not to foreclose prematurely options which might enhance environmental quality or have less detrimental effects. Examples of such alternatives include: the alternatives of not taking any action or of postponing action pending further study; alternatives requiring actions of a significantly different nature which would provide similar benefits with different environmental impacts, e.g., low capital intensive improvements, mass transit alternatives to highway construction; alternatives related to different locations or designs or details of the proposed action which would present different environmental impacts. In each case, the analysis should be sufficiently detailed to reveal comparative evaluation of the environmental benefits, costs, and risks of the proposed action and each reasonable alternative. Where an existing impact statement already contains such an analysis its treatment of alternatives may be incorporated, provided such treatment is current and relevant to the precise purpose of the proposed action.

e. Any probable adverse environmental effects which cannot be avoided (such as water or air pollution, noise, undesirable land use patterns, or impacts on public parks and recreation areas, wildlife and waterfowl refuges, or on historic sites, damage to life systems, traffic congestion, threats to health, or other consequences adverse to the environmental goals set out in section 101(b) of NEPA). This should be a brief section summarizing in one place those effects discussed in paragraph 3c that are adverse and unavoidable under the proposed action. Included for purposes of contrast should be a clear statement of how all adverse effects will be mitigated. Where mitigating steps are included in the statement, the responsible official shall see that they are carried out.

f. The relationship between local short-term uses of man's environment and the maintenance and enhancement of long-term productivity. This section should contain a brief discussion of the extent to which the proposed action involves tradeoffs between short-term environmental gains at the expense of long-term losses, or vice versa, and a discussion of the extent to which the proposed action forecloses future options.

g. Any irreversible and irretrievable commitments of resources that would be involved in the proposed action should it be implemented. This requires identification of unavoidable impacts and the extent to which the action irreversibly curtails the range of potential uses of the environment. "Resources" means not only the labor and materials devoted to an action but also the natural and cultural resources lost or destroyed.

h. An indication of what other interests and considerations of Federal policy are thought to offset the adverse environmental effects of the proposed action identified pursuant to subparagraphs (c) and (e) of this paragraph. The statement should also indicate the extent to which these stated countervailing benefits could be realized by following reasonable alternatives to the proposed action (as identified in subparagraph (d) of this paragraph) that would avoid some or all of the adverse environmental effects. In this connection if a cost-benefit analysis of the proposed action has been prepared, it, or a summary, should be attached to the environmental impact statement, and should clearly indicate the extent to which environmental costs have not been reflected in such analysis.

i. A discussion of problems and objections raised by other Federal agencies, State and local entities, and citizens in the review process, and the disposition of the issues involved and the reasons therefor. (This section shall be added to the final environmental statement at the end of the review process.)

(1) The draft and final statements should document issues raised through consultations with Federal, State, and local agencies with jurisdiction or special expertise and with citizens, of actions taken in response to comments, public hearings, and other citizens involvement proceedings.

(2) Any unresolved environmental issues and efforts to resolve them, through further consultations or otherwise, should be identified in the final statement. For instance, where an agency comments that the statement has inadequate analysis or that the agency has reservations concerning the impacts, or believes that the impacts are too adverse for approval, either the issue should be resolved or the final statement should reflect efforts to resolve the issue and set forth any action that will result.

(3) The statement should reflect that every effort was made to discover and discuss all major points of view on the environmental effects of the proposed action and alternatives in the draft statement. However, where opposing professional views and responsible opinion have been overlooked in the draft statement and are raised through the commenting process, the environmental effects of the action should be reviewed in light of those views. A meaningful reference should be made in the final statement to the existence of any responsible opposing view not adequately discussed in the draft statement indicating responses to the issues raised.

(4) All substantive comments received on the draft (or summaries of responses from the public which have been exceptionally voluminous) should be attached to the final statement, whether or not each such comment is thought to merit individual discussion in the text of the statement.

j. Draft statement should indicate at appropriate points in the text any underlying studies, reports, and other information obtained and considered in preparing the statement, including any cost-benefit analyses prepared. In the case of documents not likely to be easily accessible (such as internal studies or reports), the statement should indicate how such information may be obtained. If such information is attached to the statement, care should be taken to insure that the statement remains an essentially self-contained instrument, capable of being understood by the reader without the need for undue cross reference.

4. Publicly owned parklands, recreational areas, wildlife and waterfowl refuges and historic sites. The following points are to be covered:

a. Description of "any publicly owned land from a public park, recreational area or wildlife and waterfowl refuge" or "any land from an historic site" affected or taken by the project. This includes its size, available activities, use, patronage, unique or irreplaceable qualities, relationship to other similarly used lands in the vicinity of the project, maps, plans, slides, photographs, and drawings showing a sufficient scale and detail the project. This also includes its impact on park, recreation, wildlife, or historic areas, and changes in vehicular or pedestrian access.

b. Statement of the "national, State or local significance" of the entire park, recreational area, refuge, or historic site "as determined by the Federal, State or local officials having jurisdiction thereof."

(1) In the absence of such a statement lands will be presumed to be significant. Any statement of "insignificance" by the official having jurisdiction is subject to review by the Department as to whether such statement is capricious.

(2) Where Federal lands are administered for multiple uses, the Federal official having jurisdiction over the lands shall determine whether the subject lands are in fact being used for park, recreation, wildlife, waterfowl, or historic purposes.

c. Similar data, as appropriate, for alternative designs and locations, including detailed cost estimates (with figures showing percentage differences in total project costs) and technical feasibility, and appropriate analysis of the alternatives, including any unique problems present and evidence that the cost or community disruptions resulting from alternative routes reach extraordinary magnitudes. This portion of the statement should demonstrate compliance with the Supreme Court's statement in the Overton Park case, as follows:

[The] very existence of the statute indicates that protection of parkland was to be given paramount importance. The few green havens that are public parks were not to be lost unless there were truly unusual factors present in a particular case or the cost or community disruption resulting from alternative routes reached extraordinary magnitudes. If the statutes are to have any meaning, the Secretary cannot approve the destruction of parkland unless he finds that alternative routes present unique problems. 401 U.S. 402, 412 (1971).

d. If there is no feasible and prudent alternative, description of all planning undertaken to minimize harm to the protected area and statement of actions taken or to be taken to implement this planning, including measures to maintain or enhance the natural beauty of the lands traversed.

(1) Measures to minimize harm may include replacement of land and facilities, providing land or facilities, provision for functional replacement of the facility (see 49 CFR 25.267).

(2) Design measures to minimize harm; e.g., tunneling, cut and cover, cut and fill, treatment of embankments, planting, screening, maintenance of pedestrian or bicycle paths and noise mitigation measures all reflecting utilization of appropriate interdisciplinary design personnel.

e. Evidence of concurrence or description of efforts to obtain concurrence of Federal, State or local officials having jurisdiction over the section 4(f) property regarding the action proposed and the measures planned to minimize harm.

f. If Federally-owned properties are involved in highway projects, the final statement shall include the action taken or an indication of the expected action after filing a map of the proposed use of the land or other appropriate documentation with the Secretary of the Department supervising the land (23 U.S.C. 317).

g. If land acquired with Federal grant money (Department of Housing and Urban Development open space or Bureau of Outdoor Recreation land and water conservation funds) is involved, the final statement shall include appropriate communications with the grantor agency.

h. TGC will determine application of section 4(f) to public interests in lands, such as easements, reversions, etc.

i. A specific finding by the Administrator that there is no feasible and prudent alternative and that the proposal includes all possible planning to minimize harm to the "4(f) area" involved.

5. Properties and sites of historic and cultural significance. The statement should document actions taken to preserve and enhance districts, sites, buildings, structures, and objects of historical, architectural, archeological, or cultural significance affected by the action.

a. Draft environmental statements should include identification, through consulting the National Register and applying the National Register Criteria (36 CFR Part 800), of properties that are included in or eligible for inclusion in the National Register of Historic Places that may be affected by the project. The National Register is published in its entirety each February in the Federal Register. Monthly additions and listings of eligible properties are published in the Federal Register the first Tuesday of each month. The Secretary of the Interior will advise, upon request, whether properties are eligible for the National Register.

b. If application of the Advisory Council on Historic Preservation's (ACHP) Criteria of Effect (36 CFR Part 800) indicates that the project will have an effect upon a property included in or eligible for inclusion in the National Register of Historic Places, the draft environmental statement should document the effect. Evaluation of the effect should be made in consultation with the State Historic Preservation Officer (SHPO) and in accordance with the ACHP's criteria of Adverse Effect (36 CFR Part 800).

c. Determinations of no adverse effect should be documented in the draft statement with evidence of the application of the ACHP's Criteria of Adverse Effect, the views of the appropriate State Historic Preservation Officer, and submission of the determination to the ACHP for review.

d. If the project will have an adverse effect upon a property included in or eligible for inclusion in the National Register of Historic Places, the final environmental statement should include either an executed Memorandum of Agreement or comments from the Council after consideration of the project at a meeting of the ACHP and an account of actions to be taken in response to the comments of the ACHP. Procedures for obtaining a Memorandum of Agreement and the comments of the Council are found in 36 CFR Part 800.

e. To determine whether the project will have an effect on properties of State or local historical, architectural, archaeological, or cultural significance not included in or eligible for inclusion in the National Register, the responsible official should consult with the State Historic Preservation Officer, with the local official having jurisdiction of the property, and where appropriate, with historical societies, museums, or academic institutions having expertise with regard to the property. Use of land from historic properties of Federal, State and local significance as determined by the official having jurisdiction thereof involves section 4(f) of the DOT Act and documentation should include information necessary to consider a 4(f) determination (see paragraph 4).

6. Impacts of the proposed action on the human environment involving community disruption and relocation. a. The statement should include a description of probable impact sufficient to enable an understanding of the extent of the environmental and social impact of the project alternatives and to consider whether relocation problems can be properly handled. This would include the following information obtainable by visual inspection of the proposed affected area and from secondary sources and community sources when available.

(1) An estimate of the households to be displaced including the family characteristics (e.g., minorities, and income levels, tenure, the elderly, large families).

(2) Impact on the human environment of an action which divides or disrupts an established community, including where pertinent, the effect of displacement on types of families and individuals affected, effect of streets cut off, separation of residences from community facilities, separation of residential areas.

(3) Impact on the neighborhood and housing to which relocation is likely to take place (e.g., lack of sufficient housing for large families, doublings up).

(4) An estimate of the businesses to be displaced, and the general effect of business dislocation on the economy of the community.

(5) A discussion of relocation housing in the area and the ability to provide adequate relocation housing for the types of families to be displaced. If the resources are insufficient to meet the estimated displacement needs, a description of the actions proposed to remedy this situation including, if necessary, use of housing of last resort.

(6) Results of consultation with local officials and community groups regarding the impacts to the community affected. Relocation agencies and staff and other social agencies can help to describe probable social impacts of this proposed action.

(7) Where necessary, special relocation advisory services to be provided the elderly, handicapped and illiterate regarding interpretations of benefits, assistance in selecting replacement housing and consultation with respect to acquiring, leasing, and occupying replacement housing.

b. This data should provide the preliminary basis for assurance of the availability of relocation housing as required by DOT 5620.1, Replacement Housing Policy, dated June 24, 1970, and 49 CFR 25.53.

7. Considerations relating to pedestrians and bicyclists. Where appropriate, the statement should discuss impacts on and consideration to be given in the development of the project to pedestrian and bicycle access, movement and safety within the affected area, particularly in medium and high density commercial and residential areas.

8. Other social impacts. The general social groups specially benefitted or harmed by the proposed action should be identified in the statement including the following:

a. Particular effects of a proposal on the elderly, handicapped, non-drivers, transit dependent, or minorities should be described to the extent reasonably predictable.

b. How the proposal will facilitate or inhibit their access to jobs, educational facilities, religious institutions, health and welfare services, recreational facilities, social and cultural facilities, pedestrian movement facilities, and public transit services.

9. Standards as to noise, air, and water pollution. The statement shall reflect sufficient analysis of the effects of the proposed action on attainment and maintenance of any environmental standards established by law, or administrative determination (e.g., noise, ambient air quality, water quality) including the following documentation:

a. With respect to water quality, there should be consultation with the agency responsible for the State water pollution control program as to conformity with standards and regulations regarding storm sewer discharge sedimentation control, and other non-point source discharges.

b. The comments or determinations of the offices charged with administration of the State's implementation plan for air quality as to the consistency of the project with State plans for the implementation of ambient air quality standards.

c. Conformity to adopted noise standards, compatible, if appropriate, with different land uses.

10. Energy supply and natural resources development. Where applicable, the statement should reflect consideration of whether the project or program will have any effect on either the production or consumption of energy and other natural resources, and discuss such effects if they are significant.

11. Flood hazard evaluation. When an alternative under consideration encroaches on a flood plain, the statement should include evidence that studies have been made and evidence of consultations with agencies with expertise have been carried out. Necessary measures to handle flood hazard problems should be described. In compliance with Executive Order 11296, and Flood Hazard Guidelines for Federal Executive Agencies, promulgated by the Water Resources Council, or how such requirements can be met during project development.

12. Considerations relating to wetlands or coastal zones. Where wetlands or coastal zones are involved, the statement should include:

a. Information on location, types, and extent of wetlands areas which might be affected by the proposed action.

b. An assessment of the impacts resulting from both construction and operation of the project on the wetlands and associated wildlife, and measures to minimize adverse impacts.

c. A statement by the local representative of the Department of the Interior, and any other responsible officials with special expertise, setting forth his views on the impacts of the project on the wetlands, the worth of the particular wetlands areas involved to the community and to the Nation, and recommendations as to whether the proposed action should proceed, and, if applicable, along what alternative route.

d. Where applicable, a discussion of how the proposed project relates to the State coastal zone management program for the particular State in which the project is to take place.

13. Construction impacts. In general, adverse impacts during construction will be of less importance than long-term impacts of a proposal. Nonetheless, statements should appropriately address such matters as the following identifying any special problem areas:

a. Noise impacts from construction and any specifications setting maximum noise levels.

b. Disposal of spoil and effect on borrow areas and disposal sites (include specifications where special problems are involved).

c. Measures to minimize effects on traffic and pedestrians.

14. Land use and urban growth. The statement should include, to the extent relevant and predictable:

a. The effect of the project on land use, development patterns, and urban growth.

V 40 217 NOV 10 75 XUM

b. Where significant land use and development impacts are anticipated, identify public facilities needed to serve the new development and any problems or issues which would arise in connection with these facilities, and the comments of agencies that would provide these facilities.

ATTACHMENT 2—AREAS OF ENVIRONMENTAL IMPACT AND FEDERAL AGENCIES AND FEDERAL-STATE AGENCIES WITH JURISDICTION BY LAW OR SPECIAL EXPERTISE TO COMMENT THEREON

NOTE: Filed as part of the original document. For text see 39 FR 32546, September 30, 1975.

ATTACHMENT 3—OFFICES WITHIN FEDERAL AGENCIES AND FEDERAL-STATE AGENCIES FOR INFORMATION REGARDING THE AGENCIES' IMPACT STATEMENTS FOR WHICH COMMENTS ARE REQUESTED

NOTE: Filed as part of the original document. For text see 39 FR 35248, September 30, 1975.

ATTACHMENT 4—STATE AND LOCAL AGENCY REVIEW OF IMPACT STATEMENTS

1. OBM Revised Circular No. A-95 through its system of clearinghouses provides a means for securing the views of State and local environmental agencies, which can assist in the preparation of impact statements. Under A-95, review of the proposed project in the case of federally assisted projects (Part I of A-95) generally takes place prior to the preparation of the impact statement. Therefore, comments on the environmental effects of the proposed project that are secured during this stage of the A-95 process represent inputs to the environmental impact statement.

2. In the case of direct Federal development (Part II of A-95), Federal agencies are required to consult with clearinghouses at the earliest practicable time in the planning of the project or activity. Where such consultation occurs prior to completion of the draft impact statement, comments relating to the environmental effects of the proposed action would also represent inputs to the environmental impact statement.

3. In either case, whatever comments are made on environmental effects of proposed Federal or federally assisted projects by clearinghouses, or by State and local environmental agencies through clearinghouses, in the course of the A-95 review should be attached to the draft impact statement when it is circulated for review. Copies of the statement should be sent to the agencies making such comments. Whether those agencies then elect to comment again on the basis of the draft impact statement is a matter to be left to the discretion of the commenting agency depending on its resources, the significance of the project and the extent to which its earlier comments were considered in preparing the draft statement.

4. The clearinghouses may also be used, by mutual agreement, for securing reviews of the draft environmental impact statement. However, the Federal agency may wish to deal directly with appropriate State or local agencies in the review of impact statements because the clearinghouses may be unwilling or unable to handle this phase of the process. In some cases, the Governor may have designated a specific agency, other than the clearinghouse, for securing reviews of impact statements. In any case, the clearinghouses should be sent copies of the impact statement.

5. To aid clearinghouses in coordinating State and local comments, draft statements should include copies of State and local agency comments made earlier under the A-95 process and should indicate on the summary sheet those other agencies from which comments have been requested, as specified in Attachment 1.

[FR Doc.75-30129 Filed 11-7-75;8:45 am]

proposed rules

This section of the FEDERAL REGISTER contains notices to the public of the proposed issuance of rules and regulations. The purpose of these notices is to give interested persons an opportunity to participate in the rule making prior to the adoption of the final rules.

DEPARTMENT OF COMMERCE

[15 CFR Part 923]

National Oceanic and Atmospheric Administration

COASTAL ZONE MANAGEMENT PROGRAM APPROVAL REGULATIONS

Proposed Amendment

The National Oceanic and Atmospheric Administration on January 9, 1975, published final guidelines pursuant to the Coastal Zone Management Act of 1972 (Pub. L. 92-583, 86 Stat. 1280), hereafter referred to as the "Act," for the purpose of defining the procedures by which States can qualify to receive administrative grants under the Act. The National Oceanic and Atmospheric Administration is publishing herewith a proposed amendment to the approval regulations issued January 9, 1975 (15 CFR 923). The purpose of proposing this amendment is to further clarify the procedure to be utilized by the Office of Coastal Zone Management (OCZM) in its evaluation of applications submitted for segmented approval pursuant to 15 CFR 923.43. Comment on this proposed amended is invited through November 30, 1975.

Comment should be addressed to the Assistant Administrator for Coastal Zone Management, National Oceanic and Atmospheric Administration, U.S. Department of Commerce, Washington, D.C. 20230. Following the close of the comment period, and after review of the comments submitted, the Administrator may modify this amendment to the regulations so as to reflect such comments. The Administrator shall then publish the proposed amendment in final form in the FEDERAL REGISTER.

Subpart E—Miscellaneous. Section 923.43 Segmentation, published January 9, 1975 (15 CFR 923.43), is hereby amended by adding the following new paragraph (c).

§ 923.43 Segmentation.

* * * * *

(c) OCZM may, upon the finding of extenuating circumstances relating to segmented approval, waive certain considerations contained under this section. The considerations that the State must (i) provide an adequate consideration of the national interest in the siting of facilities necessary to meet requirements which are other than local in nature for the State's entire coastal zone and (ii) define the boundaries of the coastal zone for the entire State may be waived if OCZM determines that their completion would serve no useful purpose in evaluating the merits of the application for segmented approval. For example, if a State submits and application for the approval of a relatively small island segment, the OCZM may determine that the considerations contained above (i and ii) would serve no useful purpose, and thus may be waived by OCZM.

R. J. CARNAHAN,
Acting Assistant Administrator for Administration.

DEPARTMENT OF HEALTH, EDUCATION, AND WELFARE

Office of Education

[45 CFR Part 103]

RESEARCH PROJECTS IN VOCATIONAL EDUCATION

Additional Criteria for Selection of Applicants for Fiscal Year 1976

Pursuant to the authority contained in section 131(a) of Part C of the Vocational Education Act of 1963, as amended (20 U.S.C. 1281(a)), notice is hereby given that the Commissioner of Education, with the approval of the Secretary of Health, Education, and Welfare, proposes to amend Part 103 of Title 45 of the Code of Federal Regulations, revising Appendix B to read as set forth below. The proposed Appendix B contains additional criteria for selection of applications under the program of support for Research Projects in Vocational Education for fiscal year 1976.

(a) *Program purpose.* Section 131(a) of Part C of the Vocational Education Act of 1963, as amended (20 U.S.C. 1281(a)), provides for federally administered grants or contracts for Research Projects in Vocational Education. The purpose of these research projects is to produce information and products that are designed to improve vocational education. These projects are conducted under grants or contracts awarded by the Commissioner of Education, in accordance with the provisions of Part C of the Act and the applicable Federal regulations (45 CFR Part 103). Eligible applicants are local educational agencies, State boards for vocational education, public and private agencies, institutions, and organizations.

(b) *Regulations and criteria.* Regulations relating to the administration of the Research Program under Part C of the Vocational Education Act of 1963 are found in 45 CFR Part 103. (See particularly 45 CFR 103.11-15). Regulations were published in the FEDERAL REGISTER on November 6, 1973, relating to general fiscal and administrative provisions for all Office of Education programs and are found in 45 CFR Parts 100 and 100a. These general regulations are applicable to the program under section 131(a) of Part C of the Act.

(c) *Additional criteria.* In addition to the criteria for review of applications already published in the FEDERAL REGISTER, as described above, it is proposed that the additional criteria set forth in the proposed revision to Appendix B of the regulations in 45 CFR Part 103 will be applicable in connection with the review of applications for new projects to be awarded in fiscal year 1976.

(d) *Written comments.* Interested persons are invited to submit written comments, suggestions, or objections regarding such proposed additional criteria to the Division of Research and Demonstration, Office of Education, 7th and D Streets, SW., Room 5042, ROB-3, Washington, D.C. 20202. Comments received in response to this notice will be available for public inspection at the above office on Mondays through Fridays between 8:30 a.m. and 4 p.m. All relevant material must be received on or before December 10, 1975 unless the 30th day is a Saturday, Sunday, or Federal holiday in which case comments must be received by the next following business day.

It is hereby certified that the economic and inflationary impacts of this proposed regulation have been evaluated in accordance with OMB Circular A-107.

(Catalog of Federal Domestic Assistance Program Number 13.498; Vocational Education—Research)

Dated: September 8, 1975.

T. H. BELL,
U.S. Commissioner of Education.

Approved: October 30, 1975.

DAVID MATHEWS,
Secretary of Health, Education, and Welfare.

APPENDIX B

RESEARCH PROJECTS IN VOCATIONAL EDUCATION

ADDITIONAL CRITERIA FOR THE FISCAL YEAR 1976

In awarding grants from fiscal year 1976 funds available under section 131(a) of Part C of the Vocational Education Act, the Commissioner of Education will fund applications which rank high on the basis of the criteria set forth below. In addition, the Commissioner of Education may give consideration to projects of national, regional, or interstate significance in the priorities described below.

(a) *Adult vocational education.* Adults who are underemployed, about to become unemployed, or unemployed, should be a prime target population for vocational education. Vocational education programs, both public and private, need to be improved and

V 40 N 217 NOV 10 75 XUM

expanded to adequately serve the needs of this adult population.

Applications within this priority must effectively demonstrate plans to eliminate sex bias in all aspects of the proposed work. The Commissioner of Education is authorized to support applied studies and development projects that address one or more of the following three specific areas.

(1) *Access to vocational education by employees.* Vocational education should assist in the vocational development of employees in cooperation with business, industry and labor. Such efforts should result in improved access to vocational education by employees from goods-producing industries, service industries, and public agencies. Applications may include such items as:

(i) Assessment of previous research endeavors and administrative practices that have sought to identify, analyze, and implement cooperative efforts between vocational education, business, labor, and industry;

(ii) Assessment and or development of guidance and counseling programs that incorporate career development plans for employees;

(iii) Assessment and or development of programs that include strategies such as educational leave and tuition aid; and

(iv) Development of exemplary coordination activities between vocational education programs and public employment training programs funded under the Comprehensive Employment Training Act.

(2) *Competency based adult vocational education.* The movement towards competency-based education is an important concern for the future. Applications are encouraged that would expand competency-based adult vocation education. These applications may include the following activities:

(i) Assessment of research results concerning competency-based education for adults; and

(ii) Develop adult vocational education competency-based programs that assess learner-competencies, identify learner needs, and prescribe learner activities.

(3) *Vocational education in entrepreneurship.* There is a need to expand vocational education programs to provide adults with entreprenurial competencies which facilitate self-employment. Applications should propose the development of instructional or curriculum materials for use in open-entry and open-exit programs.

(b) *Postsecondary vocational education.* During the past decade vocational education has expanded tremendously at the postsecondary level in programs that do not offer baccalaureate degrees at public, private, and proprietary institutions.

The Commissioner is authorized to support applied studies and development projects which focus on one or more of the areas described below. Applications which address the areas listed below must effectively demonstrate plans to eliminate sex bias in all aspects of the proposed work. Applications may address one or more of the following areas.

(1) Modularization or individualization of vocational education programs in new and emerging areas such as energy and environment where labor shortages exist for technically trained persons;

(2) Develop and evaluate programs that serve the needs of students in inner city and/or rural areas;

(3) Identify and evaluate exemplary programs that reduce the drop-out rate from vocational education at the postsecondary level;

(4) Develop and/or evaluate cooperative agreements between public, private, and proprietary postsecondary institutions and business, industry, and labor; and

(5) Develop and field test criteria, instruments, and procedures to assess productivity and impact of postsecondary vocational education programs.

(c) *Individualization and modularization of instructional materials.* The pressure for enrolling more students and a greater variety of students in vocational education is increasing. In order to meet this enrollment demand and to provide more effective instruction in a greater variety of educational settings, it is necessary to use technology oriented delivery systems.

The Commissioner is authorized to support applied studies and development projects of the type described below. Applications within this priority must effectively demonstrate plans to eliminate sex bias in all aspects of the proposed work. The proposed work should address each of the following points:

(1) Individualize or modularize instructional materials for use with a specific technology oriented delivery system; and

(2) Field test and evaluate the instructional materials.

(d) *Special needs populations.* There are special populations which have unique needs with respect to vocational education. This priority is concerned with:

(1) Populations which require bilingual vocational education;

(2) Populations in correctional institutions;

(3) Migrant populations; and

(4) Handicapped populations.

The Commissioner is authorized to support applied studies and development projects that focus on one or more of the areas described below. Applications which address the areas listed below must effectively demonstrate plans to eliminate sex bias in all aspects of the proposed work.

(1) *Bilingual vocational education*—The proposed work may address one or more of the following points:

(i) Develop improved methods of teaching students with limited English-speaking ability;

(ii) Develop instructional material for use by teacher educators who teach either preservice or inservice vocational education. These instructional materials should be designed to aid the teacher educators to effectively teach vocational education to teachers and prospective teachers who will be teaching students who have limited English-speaking ability; and

(iii) Develop vocational education curriculum materials for use by students who have limited English-speaking ability.

(2) *Correctional vocational education*—The proposed work may assess the need for vocational education correctional programs, evaluate existing vocational education correctional programs or develop new vocational education programs for persons in correctional settings.

(3) *Vocational education for migrants*—The proposed work may assess the need for vocational education programs for migrants, evaluate existing education programs that serve migrants, or develop and evaluate new programs for delivering vocational education to migrants.

(4) *Vocational education for the handicapped*—The proposed work may assess the needs and barriers to mainstreaming or integrating of appropriate handicapped students into regular vocational education programs, develop criteria for the identification of such handicapped students, or evaluate existing vocational education programs that mainstreams handicapped students.

(e) *Application review criteria.* The following criteria will be utilized in reviewing formally transmitted applications. These criteria are consistent with section 100a.26, Review of Applications, in the Office of Education General Provisions for Programs, published in the FEDERAL REGISTER on November 6, 1973. A segment or segments of an application should address each criterion. Each criterion is weighted and includes the maximum score that can be given to an application in relation to the criterion. The maximum score for the criteria total 100 points and the maximum weight for each criterion is listed below. Applications that receive less than 30 points will not be funded.

Criteria

(1) *Priority area.*—The application is adequately focused on an announced priority area ---------- 10

(2) *Need, problem, and literature review.*—The application clearly: (a) describes the need for the project and provides specific evidence of the need; (b) analyzes and describes the problem rather than symptoms of the problem; and (c) describes a strong conceptual framework for the proposed work with an adequate review of current literature and other related efforts which support the need, problem, objectives, and plans---------- 10

(3) *Objectives.*—The objectives are educationally significant, sharply defined, clearly stated, capable of being attained, and are measurable--------- 10

(4) *Plan.*—The application clearly describes how the objectives will be accomplished by: (a) the overall design for the proposed project; (b) the specific procedures of each segment of the design in terms of how each objective will be undertaken and accomplished; (c) the project management plan shows how and when personnel and resources will be utilized to accomplish each objective; (d) the design and procedures for the dissemination of the results and end products, and (e) specific plans for eliminating sex bias in all aspects of the proposed work.

When appropriate, the plan includes: (a) precise definition of terms; (b) description of the characteristics and number of subjects; (c) valid evaluation procedures that include control groups; (d) sampling plan; (e) statistical and analytical procedures; and (f) plans for evaluating project outcomes---------- 35

(5) *Results and end products.*—The application clearly describes: (a) the educational significance of the proposed results and/or products; (b) what will be delivered to the government; (c) the format in which the results or product will be delivered to the government; and (d) the form in which results and products will be developed for transportability purposes to user populations---------- 15

(6) *Applicant's staff qualifications and experience.*—The application clearly describes: (a) the qualifications of the project director, key professional staff and consultants; (b) specification of the work to be performed by the project director, key staff, and consultants; (c) time commitments planned for the project by the project director, key staff, and consultants; and (d) evidence of past experience on the part of the proposed applicant in similar or related projects, including a narrative of that relationship ---------- 15

(7) *Budget and institutional commitment.*—The application provides: (a) a clear statement of costsharing which is substantiated by line items in the proposed budget; (b) evidence of the provision of adequate facilities and equipment; (c) reasonable cost-effectiveness in respect to the expected results; and (d) documented assurances of support from cooperating agencies and institutions---------- 5

Total ---------- 100

Office of the Secretary

[45 CFR Part 50]

U.S. EXCHANGE VISITOR PROGRAM—REQUEST FOR WAIVER OF THE TWO-YEAR FOREIGN RESIDENCE REQUIREMENT

Proposed Rule Making

Notice is hereby given that the Department of Health, Education, and Welfare proposes a revision of its regulation governing requests for waiver of the foreign residence requirement in connection with the Exchange Visitor Program authorized under the Mutual Educational and Cultural Exchange Act (75 Stat. 527, 22 U.S.C. 2451, et seq.). The revised regulation would change the membership of the Exchange Visitor Waiver Review Board; would clarify the definitions of the criteria which the Board applies and the types of information which the applicant institution should provide; and would include provision for requests for waivers for members of the exchange visitor's family in addition to the exchange visitor.

Prior to the final adoption of the proposed revision, consideration will be given to comments which are received on or before December 26, 1975. Comments should be addressed to: Executive Secretary, Exchange Visitor Waiver Review Board, Department of Health, Education, and Welfare, 330 Independence Avenue, SW., Washington, D.C. 20201. Comments received will be available for inspection in Room 4028, at the above address.

PART 50—U.S. EXCHANGE VISITOR PROGRAM—REQUESTS FOR WAIVER OF FOREIGN RESIDENCE REQUIREMENT

Sec.
50.1 Authority.
50.2 Exchange Visitor Waiver Review Board.
50.3 Policy.
50.4 Procedure.
50.5 Personal Hardship, Persecution and Visa Consideration.
50.6 Release from Foreign Government.

AUTHORITY: 75 Stat. 527, 22 U.S.C. 2451 et seq.; 84 Stat. 116, 8 U.S.C. 1182(e).

CROSS REFERENCE: Department of State Regulations governing the Exchange-Visitor Program are published at 22 CFR Part 63.

§ 50.1 Authority.

Under the authority of the Mutual Educational and Cultural Exchange Act of 1961 (75 Stat. 527) and the Immigration and Nationality Act as amended (84 Stat. 116), the Department of Health, Education, and Welfare is an "interested United States Government agency" with the authority to submit requests through the Department of State to the Attorney General for the waiver of the two-year foreign residence requirement for exchange visitors under the Mutual Educational and Cultural Exchange Program.

§ 50.2 Exchange Visitor Waiver Review Board.

(a) *Establishment.* The Exchange Visitor Waiver Review Board is established for the purpose of carrying out the Department's responsibilities under the Exchange Visitor Program.

(b) *Functions.* The Exchange Visitor Waiver Review Board is responsible for making thorough and equitable evaluations of applications for waiver submitted to the Department and for rendering recommendations to the Department of State on such applications on behalf of the Secretary.

(c) *Membership.* The Exchange Visitor Waiver Review Board consists of not less than five members, of whom no less than three shall consider any particular application. The Special Assistant to the Secretary for International Affairs is an ex officio member of the Board and serves as Chairman of the Board. He may designate a staff member of the Office of the Secretary to serve as member and Chairman in his absence. Two regularly assigned members are appointed by the Assistant Secretary for Health to consider applications concerning health and related fields and two regularly assigned members are appointed by the Assistant Secretary for Education to consider applications concerning education or training and related fields. The Board may be expanded to include members from other appropriate operating components of the Department when necessary in order to consider an application in other fields of interest to the Department (e.g. welfare, social security or rehabilitation). When, in the Board's judgment, it is required, the Board may obtain expert advisory opinion from other sources.

§ 50.3 Policy.

(a) *Criteria and information pertaining to waivers.* The Department of Health, Education, and Welfare has a stringent and restrictive policy with respect to requesting waivers for foreign visitors under the exchange visitor program. Each case is evaluated individually on the basis of the facts available. The general criteria which are applied are:

(1) The program or activity of the applicant institution or organization in which the exchange visitor is employed must be of high priority and significance in an area of interest to the Department. The Waiver Review Board will not request a waiver when the documentation clearly demonstrates that the problem is primarily one of recruitment in order to overcome a local community or institutional manpower shortage, however serious.

(2) The exchange visitor must be needed as an integral part of the program or activity, or of an essential component thereof. The Board will not request a waiver when the principal problem appears to be one of administrative or program inconvenience to the institution or other employer.

(3) The exchange visitor must possess outstanding qualifications, training, and experience. The Board will not request a waiver simply because an individual has specialized training or experience or is occupying a senior staff position in a university, hospital, or other institution.

(b) *Waivers for members of exchange visitor's family.* (1) Where a decision is made to request a waiver for an exchange visitor, a waiver will also be requested for the spouse and children, if any, if they are also subject to the foreign residence requirement..

(2) In cases of married couples where one spouse is an exchange visitor, the subject of a waiver application, and the other is a citizen of the United States or resident alien, a waiver will be requested for the exchange visitor if either spouse is found to meet the strict criteria given above.

§ 50.4 Procedure for submission of application to DHEW.

(a) The applicant institution (educational institution, hospital, laboratory, corporation, etc.) should send a completed application (HEW Form 426) to the Executive Secretary, Exchange Visitor Waiver Review Board, Department of Health, Education, and Welfare, Washington, D.C. 20201. Application forms and information may be obtained from the Executive Secretary. The application must be signed by an authorized official of the applicant institution. The information should describe in detail the circumstances of the case involved. This should include but not be limited to:

(1) A complete description of the program or activity in which the exchange visitor is engaged; including factual evidence of the way in which the program or activity serves the national or international public interest.

(2) His or her relationship to the program, particular contribution, and other responsibilities, if any.

(3) The probable future of the program if the waiver is not granted; including specific evidence showing how the loss of the exchange visitor's services would seriously restrain the initiation, continuation, completion, or success of the program or activity, or a major part thereof.

(4) The applicant institution's long-range plans for the exchange visitor, and ways in which the visitor will contribute in the future to the activities in which he or she is employed.

(5) Specific evidence of a demonstrated unique capability of the exchange visitor to make essential contributions to the program or activity over a long period of time.

(6) The exchange visitor's curriculum vitae, bibliography, data and place of

V 40 N 217 NOV 10 75 XUM

birth, present citizenship, date and port of entry and current address.

(7) Any other facts considered germane.

(b) Since the formal filing of an application for waiver with the Immigration and Naturalization Service automatically terminates the applicant's exchange visitor status, it is permissible to obtain the decision of the Exchange Visitor Waiver Review Board before filing with the Immigration and Naturalization Service.

§ 50.5 Personal hardship, persecution and visa extension considerations.

(a) The Department is not responsible for considering applications for waivers based on:

(1) Exceptional hardship to the exchange visitor's American or legally resident alien spouse or child; or

(2) The alien's unwillingness to return to the country of his/her nationality or last residence on the grounds that he/she or family members would be subject to persecution on account of race, religion or political opinion.

(b) Likewise, this Department is not responsible for considering requests for extension of visa.

(c) Inquiries concerning the above should be directed to the District Office of the Immigration and Naturalization Service which has jurisdiction over the exchange visitor's place of residence in the U.S.

§ 50.6 Release from foreign government.

The Department of State has the responsibility to consider applications for waivers which are based on a notification from the exchange visitor's country that it has no objection to a waiver (22 CFR 63.31).

Dated: October 31, 1975.

DAVID MATHEWS,
Secretary.

[Reg. No. 4, 10, and 16]

FEDERAL COAL MINE HEALTH AND SAFETY ACT OF 1969, TITLE IV—BLACK LUNG BENEFITS AND SUPPLEMENTAL SECURITY INCOME FOR THE AGED, BLIND, AND DISABLED

Investment of Payments by Representative Payee

Notice is hereby given, pursuant to the Administrative Procedure Act (5 U.S.C. 553), that the amendments to the regulations set forth in tentative form below are proposed by the Commissioner of Social Security, with the approval of the Secretary of Health, Education, and Welfare. The present regulations permit investment of payments made to a representative payee on behalf of a beneficiary or recipient in a bank or trust company or in a savings and loan association if the account is either federally insured or is otherwise insured in accordance with State law requirements. The proposed amendments reflect the policy of the Social Security Administration that payments made to a representative payee may also be conserved in a share-insured credit union to the extent that the rule and regulations governing such organization allow the establishment of fiduciary accounts along specified lines.

Consideration will be given to any data, views, or arguments pertaining thereto which are submitted in writing in triplicate to the Commissioner of Social Security, Department of Health, Education, and Welfare, P.O. Box 1585, Baltimore, Maryland 21203, on or before December 10, 1975. The regulations will be effective on final publication in the FEDERAL REGISTER.

Copies of all comments received in response to this notice will be available for public inspection during regular business hours at the Washington Inquiries Section, Office of Information, Social Security Administration, Department of Health, Education, and Welfare North Building, Room 4146, 330 Independence Avenue, SW, Washington, D.C. 20201.

The proposed amendments to the regulations are to be issued under the authority contained in sections 205, 1102, 1611(e), and 1631(a) of the Social Security Act; section 412(a) of the Federal Coal Mine Health and Safety Act of 1969; 53 Stat. 1368, as amended, 49 Stat. 647, as amended, 86 Stat. 1467, 1475; 83 Stat. 793, 30 U.S.C. 922(a), 42 U.S.C. 405, 1302, 1382(e), and 1383(a).

(Catalog of Federal Domestic Assistance Program Nos. 13.802-13.807, Disability Insurance, Retirement Insurance, Survivors Insurance, Coal Miners' Benefits, and Supplemental Security Income)

Dated: October 14, 1975.

J. B. CARDWELL,
Commissioner of Social Security.

Approved: November 3, 1975.

DAVID MATHEWS,
Secretary of Health, Education, and Welfare.

Parts 404, 410, and 416 of Chapter III of Title 20 of the Code of Federal Regulations are amended as follows:

PART 404—FEDERAL OLD-AGE, SURVIVORS AND DISABILITY INSURANCE (1950–)

1. Section 404.1605 is revised to read as follows:

§ 404.1605 Conservation and investment of payments.

Payments certified to a relative or other person on behalf of a beneficiary which are not needed for the current maintenance of the beneficiary except as they may be used pursuant to § 404.1607, shall be conserved or invested on the beneficiary's behalf. Preferred investments are U.S. Savings Bonds, but such funds may also be invested in accordance with the rules applicable to investment of trust estates by trustees. For example, surplus funds may be deposited in an interest- or dividend-bearing account in a bank or trust company, in a savings and loan association, or in a credit union, if the account is either federally insured or is otherwise insured in accordance with State law requirements. Surplus funds deposited in an interest- or dividend-bearing account in a bank or trust company, in a savings and loan association, or in a credit union, must be in a form of account which clearly shows that the representative payee has only a fiduciary, and not a personal, interest in the funds. The preferred forms of such accounts are as follows:

(Name of beneficiary)
by ---
(Name of representative payee)
representative payee; or

(Name of beneficiary)
by ---
(Name of representative payee)
trustee.

U.S. Savings Bonds purchased with surplus funds by a representative payee for a minor should be registered as follows:

(Name of beneficiary)
---, a minor, for whom
(Social Security No.)

(Name of payee)
is representative payee for social security benefits.

U.S. Savings Bonds purchased with surplus funds by a representative payee for an incapacitated adult beneficiary should be registered as follows:

(Name of beneficiary)
---, for whom
(Social Security No.)

(Name of payee)
is representative payee for social security benefits.

A representative payee who is the legally appointed guardian or fiduciary of the beneficiary may also register U.S. Savings Bonds purchased with funds from title II payments in accordance with applicable regulations of the U.S. Treasury Department (31 CFR 315.5 through 315.8). Any other approved investment of the beneficiary's funds made by the representative payee must clearly show that the payee holds the property in trust for the beneficiary.

PART 410—FEDERAL COAL MINE HEALTH AND SAFETY ACT OF 1969, TITLE IV—BLACK LUNG BENEFITS (1969–)

2. Section 410.585 is revised to read as follows:

§ 410.585 Conservation and investment of payments.

Payments certified to a relative or other person on behalf of a beneficiary which are not needed for the current maintenance of the beneficiary except as they may be used pursuant to § 410.587, shall be conserved or invested on the beneficiary's behalf. Preferred investments are U.S. Savings Bonds, but such funds may also be invested in accordance with the rules applicable to investment of trust estates by trustees. For example, surplus funds may be deposited in an interest- or dividend-bearing account in a bank or trust company, in a savings and loan association, or in a credit union, if the account is either federally insured or is otherwise insured in accordance with State law requirements. Surplus funds deposited in an interest- or dividend-bearing account in a bank or trust company, in a savings and loan association, or in a credit union, must be in a form of account which clearly shows that the representative payee has only a fiduciary, and not a personal, interest in the funds. The preferred forms of such accounts are as follows:

(Name of beneficiary)
by ---
(Name of representative payee)
representative payee; or

(Name of beneficiary)
by ---
(Name of representative payee)
trustee.

U.S. Savings Bonds purchased with surplus funds by a representative payee for a minor should be registered as follows:

(Name of beneficiary)
---, a minor, for whom
(Social Security No.)

(Name of payee)
is representative payee for black lung benefits.

U.S. Savings Bonds purchased with surplus funds by a representative payee for an incapacitated adult beneficiary should be registered as follows:

(Name of beneficiary)
---, for whom
(Social Security No.)

(Name of payee)
is representative payee for black lung benefits.

A representative payee who is the legally appointed guardian or fiduciary of the beneficiary may also register U.S. Savings Bonds purchased with funds from the payment of benefits under Part B of title IV in accordance with applicable regulations of the U.S. Treasury Department (31 CFR 315.5 through 315.8). Any other approved investment of the beneficiary's funds made by the representative payee must clearly show that the payee holds the property in trust for the beneficiary.

PART 416—SUPPLEMENTAL SECURITY INCOME FOR THE AGED, BLIND, AND DISABLED

3. Section 416.650 is revised to read as follows:

§ 416.650 Conservation and investment of payments.

A part of the monthly payment certified to a relative or other person on behalf of a recipient may be conserved for foreseeable needs, e.g., payment of annual taxes on a home, provided the current needs of the recipient are being reasonably met. (See Subpart L of this part for the effect of conserved payments on the amount of countable resources.) Conserved funds may be invested in accordance with the rules applicable to investment or trust estates by trustees. For example, these funds may be deposited in an interest- or dividend-bearing account in a bank or trust company, in a savings and loan association, or in a credit union, if the account is either federally insured or is otherwise insured in accordance with State law requirements. Funds deposited in an interest- or dividend-bearing account in a bank or trust company, in a savings and loan association, or in a credit union, must be in a form of account which clearly shows that the representative payee has only a fiduciary, and not a personal, interest in the funds. The preferred form of such account is as follows:

(Name of recipient)
by ---
(Name of representative payee)
representative payee; or

(Name of recipient)
by ---
(Name of representative payee)
trustee.

Any other conservation of the recipient's funds must clearly show that the payee holds the property in trust for the recipient.

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

[14 CFR Part 71]

[Airspace Docket No. 75-SO-138]

EXTENSION OF FEDERAL AIRWAYS

Proposed Rule Making

The Federal Aviation Administration (FAA) is considering an amendment to Part 71 of the Federal Aviation Regulations that would extend V-5 by adding a west alternate from Dublin, Ga., to the NELLO INT and extend V-154 from Macon, Ga., to Rome, Ga., by-passing Atlanta, Ga., on the east (V-5W) and on the west (V-154).

Interested persons may participate in the proposed rule making by submitting such written data, views or arguments as they may desire. Communications should identify the airspace docket number and be submitted in triplicate to the Director, Southern Region, Attention: Chief, Air Traffic Division, Federal Aviation Administration, P.O. Box 20636, Atlanta, Ga. 30320. All communications received on or before November 25, 1975, will be considered before action is taken on the proposed amendment. The proposal contained in this notice may be changed in the light of comments received.

An official docket will be available for examination by interested persons at the Federal Aviation Administration, Office of the Chief Counsel, Attention: Rules Docket, 800 Independence Avenue, SW., Washington, D.C. 20591. An informal docket also will be available for examination at the office of the Regional Air Traffic Division Chief.

The proposed amendment would:

A. Extend V-5 by establishing a west alternate from Dublin to NELLO INT via Macon, Ga.; INT MACON 349° (348°M) and Norcross, Ga. 150° (149°M) radials; Norcross; INT Norcross 336° (335°M) and Chattanooga, Tenn., 127° (126°M) radials.

B. Extend V-154 from Macon, Ga., to Rome, Ga., via the INT of Macon 301° (300°M) and Rome 167° (166°M) radials.

If designated, the proposed airways are expected to be used at 7,000 feet and below, to permit flights to operate below a portion of the Atlanta Terminal Control Area on the east by northbound traffic and on the west by southbound traffic. Designation of these by-pass routes would help to expedite the north/south traffic in this area.

This amendment is proposed under the authority of Sec. 307(a) of the Federal Aviation Act of 1958 (49 U.S.C. 1348 (a)) and Sec. 6(c) of the Department of Transportation Act (49 U.S.C. 1655(c)).

Issued in Washington, D.C., on November 3, 1975.

WILLIAM E. BROADWATER,
Chief, Airspace and Air Traffic Rules Division.

[14 CFR Part 75]

[Airspace Docket No. 75-WA-20]

ALTERATION OF AREA HIGH ROUTE

Proposed Rule Making

The Federal Aviation Administration (FAA) is considering an amendment to Part 75 of the Federal Aviation Regulations that would realign J-920R north of waypoint MILLE by relocating waypoint KRUMS to the INT of J-7/J-530 and the United States/Canadian boundary.

Interested persons may participate in the proposed rule making by submitting such written data, views or arguments as they may desire. Communications should identify the airspace docket number and be submitted in triplicate to the Director, Rocky Mountain Region, Attention: Chief, Air Traffic Division, Federal Aviation Administration, Park Hill Station, P.O. Box 7213, Denver, Colo. 80207. All communications received on or before December 10, 1945, will be considered before action is taken on the proposed amendment. The proposal contained in this notice may be changed in the light of comments received.

An official docket will be available for examination by interested persons at the Federal Aviation Administration, Office of the Chief Counsel, Attention: Rules Docket, AGC-24, 800 Independence Avenue, SW., Washington, D.C. 20591. An informal docket also will be available for examination at the office of the Regional Air Traffic Division Chief.

The proposed amendment would relocate waypoint KRUMS to Lat. 49°00'00" N., Long. 109°27'6" W., and J-920R between waypoints MILLE and KRUMS. A direct route from the present location of KRUMS to Swift Current, Canada, con-

V 40 N 217 10 NOV 75 XUM

flicts with the Moose Jaw Military Flying Area. For this reason, the Ministry of Transport, Canada, has requested that KRUMS be relocated to resolve that conflict.

This amendment is proposed under the authority of Sec. 307(a) of the Federal Aviation Act of 1958 (49 U.S.C. 1348(a)) and Sec. 6(c) of the Department of Transportation Act (49 U.S.C. 1655(c)).

Issued in Washington, D.C., on November 3, 1975.

WILLIAM E. BROADWATER,
Chief, Airspace and Air Traffic Rules Division.

ENVIRONMENTAL PROTECTION AGENCY

[40 CFR Part 52]

[FRL 453-5]

OHIO

Approval and Promulgation of State Implementation Plans, Sulfur Dioxide

On January 30, 1972, the Governor of Ohio submitted the "Implementation Plan for the Control of Suspended Particulate, Sufur Dioxide, Carbon Monoxide, Hydrocarbons, Nitrogen Dioxide, and Photochemical Oxidants in the State of Ohio" to the Administrator of the Environmental Protection Agency. The plan was adopted by the Ohio Air Pollution Control Board following public hearings held on January 18, 1972, in Columbus, Ohio. This plan was submitted pursuant to Section 110 of the Clean Air Act, as amended, which requires States to adopt implementation plans to achieve and maintain the national ambient air quality standards (40 CFR Part 50). On May 31, 1972 (37 FR 10842), the Administrator approved the Ohio plan with specific exceptions. Subsequently, amendments were submitted which permitted full approval of the plan on September 22, 1972 (37 FR 19806).

On June 28, 1973, the United States Court of Appeals for the Sixth Circuit decided the case of *Buckeye Power Company, et al.* v. *EPA*, 481 F.2d 162. The court vacated the Administrator's approval of the Ohio plan and remanded the case to the Agency for compliance with section 553 of the Administrative Procedure Act, as articulated in the court's opinion, *viz.*, to take comments, data or other evidence from interested parties, and to express the basis for ensuing administrative actions.

On August 27, 1973, the Governor of Ohio withdrew from the proposed Ohio plan the control strategy and regulations for control of sulfur dioxide. The remainder of the plan was proposed on November 15, 1973 (38 FR 31543) and was approved on April 15, 1974 (39 FR 13539), with specific exceptions. Because the Governor of Ohio withdrew the originally submitted control strategy and regulations for control of sulfur dioxide, the plan was disapproved in that respect.

On May 30, 1974, the Governor of Ohio submitted a proposed sulfur dioxide strategy and regulations to the Administrator to cure the defects in the Ohio Implementation Plan noted in the April 15, 1974 FEDERAL REGISTER, cited above. However, on September 13, 1974, the Ohio Environmental Board of Review overturned a portion of these regulations, thereby rendering same unenforceable. Since the plan for control of sulfur oxides could no longer be effectuated as designed by the State, the Administrator deemed it an ineffective submission and no further rulemaking action was taken. The Governor of Ohio formally withdrew the proposed regulations on July 16, 1975.

Where the Administrator determines that a State plan or portion thereof does not meet the requirements of the Clean Air Act, as amended, and 40 CFR Part 51, he is directed by section 110(c) of the Act to propose and subsequently promulgate regulations setting forth a substitute implementation plan or portion thereof. Set forth below are proposed substitute sulfur dioxide control regulations designed to attain and maintain ambient standards for SO_2 in Ohio thereby correcting the deficiency in the Ohio Implementation Plan noted above. The maintenance portion of the plan is based on projected growth over the next five years and the degree of control required of existing sources reflects the projected emission increase.

Because of the exceptional circumstances that surround this rulemaking, *i.e.*, the vacation of the Administrator's original plan approval and the inability of the State to thereafter submit an approvable SO_2 strategy, the rulemaking contemplated herein effectively constitutes the first federally operative plan for controlling SO_2 within the State. Consistent, therefore, with the Clean Air Act's injunction that primary ambient standards be attained within three years of plan approval (or such earlier time as may be practicable), the attainment date proposed herein is three years from the date of promulgation. Not all sources will require three years to attain compliance; in given cases "expeditious as practicable" compliance may require compliance far in advance of the attainment date.

The proposed regulations include categorical compliance schedules to be utilized by sources requiring the identified time period to attain compliance. Provision is made for alternate schedules to be submitted to the Administrator for approval in case a given source should desire to adjust the increments of progress within the proposed schedules. The Agency further reserves the right to specify shorter schedules for those sources which can comply more expeditiously than the three-year time frame.

Consistent with the recent Sixth Circuit decision (*Big Rivers Electric Corp. et al.* and *TVA* v. *EPA*, Nos. 74-2015, 74-2020, September 4, 1975), the proposed plan prohibits the operation of a source of pollutant emissions beyond three years from promulgation "without the application of one or more systems which control the 'kind and amounts' of its contaminant emissions." The Sixth Circuit Court of Appeals reasoned that, absent a showing that measures which qualify as emission limitations (see *Train* v. *NRDC*, 43 L. Ed. 2d 731, 745, 1975, defining emission limitations as "regulation of the composition of substances emitted into the ambient air") are unavailable, the Administrator cannot approve (or, therefore, promulgate) measures other than emission limitations. (Slip opinion, p. 11). Consistent with the Court's opinion, this proposed rulemaking contains only emission limitations since, in the Administrator's judgment, such limitations are not only capable of attaining national standards but are also achievable through application of available technology.

The control strategy proposed today to attain and maintain sulfur oxide ambient standards in Ohio was developed through a county by county analysis of air quality to determine the existence and severity of any sulfur dioxide problems. Where air quality problems were identified, county-specific control regulations were developed. Of the eighty-eight counties within the state, thirty-two counties were identified as possessing no existing or potential sulfur dioxide air quality problems due to existing sources inasmuch as existing sources do not adversely affect air quality standards. No control requirements are being proposed for sources located in these counties. However, it should be noted that, where applicable, sources in these counties will still be subject to state new source review requirements and federal new source performance standards and nondegradation requirements. For the remaining counties, the proposed control strategy establishes specific industrial process limitations as well as a general industrial process requirement. Fuel combustion sources are required to meet specified emission limitations depending on rated capacity and location.

INDUSTRIAL PROCESS REGULATIONS

In developing the industrial process regulations, the Administrator applied, whenever possible, the control requirements established by the State of Ohio in the originally approved Ohio Implementation Plan. The industrial process regulation contained in the original state plan (AP-3-13) included specific emission limitations for sulfuric acid manufacturing plants, sulfur recovery plants, non-ferrous smelters (copper, zinc and lead), and sulfite pulp mills; and a general process emission limitation expressed in terms of an allowable stack-gas sulfur dioxide concentration in parts per million.

The industrial process regulations in this proposed rulemaking include a sulfuric acid manufacturing plant emission limitation equivalent to the original state limitation (i.e. 6.5 pounds of sulfuric acid per ton of acid produced). Similarly, the emission limitation for sulfur recovery plants is equivalent to the original state limitation (i.e. 0.01 pounds of sulfur dioxide per pound of sulfur processed).

With regard to smelters, because there are no copper or lead smelters operating within the state at the present time, and any new facilities would be subject to Federal New Source Performance Standards (38 FR 37040, October 16, 1974), new source review and non-significant deterioration requirements (39 FR 42510, December 5, 1974), the proposed plan contains no existing source control requirements. However, an emission limitation for zinc smelters, identical to the original state control requirement, is being proposed.

For the first time, specific emission limitations for coke ovens prohibit the combustion of coke oven gas containing in excess of 50 grains of sulfurous gases per dry standard 100 cubic feet of coke oven gas. A similar emission limitation was developed for petroleum refineries.

The general industrial process emission limitation varies from the original state regulation in that it is based on process weight rather than stack gas concentration. After a careful study of similar regulations in various implementation plans across the country, it was determined that the process-weight rate limitations provided a more feasible basis from a technology and economics standpoint for establishing compliance.

FUEL COMBUSTION REGULATIONS

In developing the fuel combustion emission limitations, the Administrator examined the major fuel burning installations within each county in the state to assess the degree of control required, if any, to assure the attainment and maintenance of the sulfur dioxide ambient air quality standards.

Seven geographic areas were identified as possessing a significant population level, a significant overall sulfur dioxide emission level, or some combination of both, thus constituting "population-at-risk" areas. The seven areas identified were the metropolitan areas of Cleveland (Cuyahoga, Lake, and Lorain Counties); Toledo (Lucas County); Youngstown (Mahoning and Trumbull Counties); Steubenville (Jefferson County); Akron (Summit County); Dayton (Montgomery County); and Cincinnati (Hamilton and Butler Counties).

With the exception of the Tidd, Sammis and Painesville power plants (for which specific emission limitations are being proposed), sources in the Cleveland, Toledo, Akron, Youngstown and Steubenville areas will be required to comply with a sliding scale emission limitation of 1.2 to 6.0 pounds of sulfur dioxide per million BTU of heat input per hour. In Dayton, it is 1.6 to 3.0 pounds of sulfur dioxide per million BTU of heat input per hour. The Cincinnati area has a "sliding scale" ranging from 1.2 to 2.4 pounds of sulfur dioxide per million BTU of heat input per hour. Under the sliding scale approach, larger sources will be required to institute controls that are proportionally greater than smaller sources. This is because of the greater impact, in terms of continuous concentrated emissions, of large sources *vis a vis* their smaller counterparts. It is also in recognition of the fact that larger sources, especially those that are part of multi-source consortiums, benefit from economies of scale and technological know-how, frequently not available to smaller sources.

For each of the remaining counties other than the 32 counties identified as not having air quality problems, the Administrator developed a flat emission rate designed to meet the national ambient air quality standard for a single source or group of sources identified within each county. The emission rates selected by the Administrator for inclusion in this proposed rulemaking vary from a flat rate of 0.6 pounds of sulfur dioxide per million BTU of actual heat input per hour up to no required control (i.e. greater than approximately 8.0 pounds of sulfur dioxide per million BTU of heat input per hour).

The compliance schedule regulations provide for use of low sulfur content coal and/or scrubber technology. Where low sulfur coal is unavailable, the Administrator believes that scrubber technology has been developed to the point that work on the installation of such technology can begin immediately. For the Administrator's views on the disposal of sludge produced by non-regenerable scrubber systems, see discussion in the Notice published at 40 FR 42046 September 10, 1975).

MALFUNCTIONS

The Administrator recognizes that some of the sources subject to the proposed regulations may have to install highly sophisticated control equipment which, due to the advanced degree of technology and unique operating conditions (even when properly operated and maintained), may from time to time unavoidably cease to operate as designed, especially during the initial period of startup.

In the event that such conditions cause the equipment to become temporarily unavailable, the Administrator believes that any resultant violations of applicable emission limits can be resolved through enforcement discretion. Nevertheless, the Administrator is interested in receiving comments on how this problem may be otherwise addressed. Specifically, the Administrator is interested in information from sources covered by the proposal regarding the kind of control equipment they plan to install, why such equipment may become unavoidably inoperative, the circumstances that would necessitate continued source operation during the period when the control equipment ceases to operate, and alternative methods of controlling emissions to comply with the emissions regulations during such periods. The Administrator is also interested in suggestions as to the method of documenting control equipment downtime, documenting that the downtime was unavoidable, and documenting the use of appropriate interim controls.

TECHNICAL SUPPORT DOCUMENT

A technical support document has been prepared that discusses in depth the basis for the proposed limitations and the methodology used in developing same. Copies of the technical support document and detailed background material are available for public inspection during normal working hours at the Air Policy Branch, Air and Hazardous Materials Division, EPA, Region V, 230 South Dearborn, Chicago, Illinois 60604 and at the U.S. EPA, Public Information Reference Unit, Room 2922, 401 M Street, S.W., Washington, D.C. 20460. Copies of the technical support document are also available for public inspection in the State of Ohio at the following locations: (1) Cincinnati Division of Air Pollution Control, 2400 Beekman Street, Cincinnati, Ohio 45214; (2) Cleveland Division of Air Pollution Control, 2735 Broadway Avenue, Cleveland, Ohio 44115; (3) Akron Air Pollution Control Agency, 177 South Broadway, Akron, Ohio 44308; (4) Canton Air Pollution Control Division, City Hall, Canton, Ohio 44702; (5) Northeast District Office, Ohio Environmental Protection Agency, 2110 East Aurora Road, Twinsburg, Ohio 44087; (6) Ohio Environmental Protection Agency, 361 East Broad Street, Columbus, Ohio 43216; (7) Montgomery County Health Department Regional Air Pollution Control Agency, 451 West Third Street, Dayton, Ohio 45402; (8) Southwest District Office, Ohio Environmental Protection Agency, 7 East Fourth Street, Dayton, Ohio 45402; (9) Mansfield-Richland County Health Department, 600 West Third Street, Mansfield, Ohio 44906; (10) Marietta City Health Department, 304 Putnam Street, Marietta, Ohio 45750; (11) Southeast District Office, Ohio Environmental Protection Agency, RR #3 Box 603, Logan, Ohio 43138; (12) Allen County Health Department, 405 East Market Street, Lima, Ohio 45802; (13) Portsmouth City Health Department, 740 Second Street, Portsmouth, Ohio 45662; (14) Sandusky-Erie County Health Department, Municipal Building, East Meigs Street, Sandusky, Ohio 44870; (15) North Ohio Valley Air Authority, 814 Adams Street, Steubenville, Ohio 43952; (16) Toledo Pollution Control Agency, 26 Main Street, Toledo, Ohio 43605; (17) Northwest District Office, Ohio Environmental Protection Agency, 1035 Devlac Grove Drive, Bowling Green, Ohio 43402; (18) Ross County Health Department, Health Center-University East, 50 Pohlman Road, P.O. Box 465, Chillicothe, Ohio 45601; (19) Mahoning-Trumbull Air Pollution Agency, Central Tower Building, 11 Central Square, Room 404, Youngstown, Ohio 44503; and (20) Muskingum County Health Department, 736 Laurel Avenue, Zanesville, Ohio 43701.

The proposal of these regulations does not affect the ability of the State of Ohio to develop a control strategy and regulations for sulfur dioxide. In fact, the State is encouraged to do so. If Ohio submits an approvable control strategy and regulations before the final promulgation of the Federal regulations, the State control strategy and regulations will be approved and the Federal proposal with-

V 40 217 NOV 10 75 XUM

drawn. After promulgation of the Federal substitute regulations, if Ohio submits a control strategy and regulations and they are approved by the Administrator, these regulations will supersede the EPA substitute regulations.

UNION CARBIDE FACILITY, MARIETTA

On March 19, 1970, as amended on April 20, 1970, the Secretary of the Department of Health, Education and Welfare issued specific recommendations, pursuant to Section 108(d)(1)(C) of the Clean Air Act, as amended (1967) (the predecessor amendments to the Clean Air Act Amendments of 1970), regarding sulfur dioxide emissions as they pertain to the Union Carbide Corporation's Marietta, Ohio facility. The savings provision (Section 16(a)(2)) of the Clean Air Act, as amended (1967), continued in force and effect various pre-existing abatement conference recommendations (discussed below) as they pertain to the Union Carbide Corporation facility.

The Parkersburg, West Virginia-Marietta, Ohio abatement conference recommendations were issued to abate air pollutants endangering the health or welfare of persons in a State other than that in which the discharge(s) orignated. Similarly, Section 110 of the Clean Air Act, as amended (1970), requires States to submit or, in the alternative, the Administrator to promulgate implementation plans that contain emission limitations necessary to ensure attainment and maintenance of the primary (health related) and secondary (welfare related) national ambient air quality standards, within their respective boundaries as well as within portions of interstate air quality control regions that are located in adjoining States. Accordingly, absent some remedial action, the Union Carbide Corporation would still be subject to both the abatement conference recommendations and the sulfur oxide regulations the Administrator promulgates to attain and maintain the ambient standards.

To avoid such inequity, the Administrator will consider the abatement conference recommendations superseded by the final version of the regulations proposed herein but only to the extent that Union Carbide Corporation's Marietta, Ohio facility complies with the applicable sulfur dioxide regulations. To ensure that all participants in the Parkersburg, West Virginia-Marietta, Ohio air pollution abatement conference and all other interested parties have an opportunity to express their views on this proposed course of action, by this notice, comments are requested from the Ohio Air Pollution Control Board, State of Ohio; the West Virginia Air Pollution Control Commission, State of West Virginia; and to the air pollution control agencies of the following municipalities (as defined in section 302(f) of the Clean Air Act, as amended):

In the State of Ohio: Washington County; Belpre, Dunham, Fearing, Marietta, Muskingum, and Warren Townships, Washington County; and municipalities located within such townships.

In the State of West Virginia: Wood County, Clay, Lubeck, Parkersburg, Slate, Tygart, Union and Williams Magisterial Districts, Wood County; and municipalities located within such magisterial districts.

The Administrator requests that such participants and other interested parties express their comments at the public hearings, see below, or that within 60 days of publication of this Federal Register submit any comments to Region V's Air Policy Branch, Air and Hazardous Materials Division at the address listed below.

PUBLIC HEARINGS

Public hearings will be held on the proposed sulfur dioxides regulations for the State of Ohio in order to provide the general public the fullest opportunity to comment. Hearings will be held in Columbus, Cleveland, Steubenville and Cincinnati approximately 45 days after publication of this notice of proposed rulemaking. At least 30 days prior to the hearings, specific times and locations will be published in newspapers of general circulation throughout Ohio as well as in a forthcoming issue of the Federal Register.

A presiding officer will be designated for each hearing. He will have the responsibility for maintaining order; excluding irrelevant or repetitious material; scheduling presentations; and, to the extent possible, notifying the participants of time at which they may appear. The hearings will be conducted informally. Technical rules of evidence will not apply.

Interested persons wishing to make a statement at the hearing will be afforded the opportunity to do so. The time for making a statement will be limited. Such persons are requested to file a notice of their intent to make a statement no later than 10 days prior to the hearing, and, no later than 5 days prior to the hearing, if practicable, to submit five copies of the proposed statement to Ms. Loretta Barsamian, Compliance Section, Air Enforcement Branch, Enforcement Division, EPA, Region V, 230 South Dearborn, Chicago, Illinois 60604. All other inquiries and comments prior to and after the hearing should be addressed to the same.

Interested persons may also participate in this rulemaking by submitting written comments, preferably in triplicate, to Air Policy Branch, Air and Hazardous Materials Division, EPA, Region V, 230 South Dearborn, Chicago, Illinois 60604. All relevant comments received on or before January 9, 1975 will be considered. Receipt of comments will be acknowledged. Comments received will be available for inspection during normal working hours at Region V's Air Policy Branch, Air and Hazardous Materials Division. In addition, all relevant matters presented to EPA will be evaluated and the Agency will, as part of its final rulemaking process, prepare an evaluation report.

AUTHORITY: Section 110 of the Clean Air Act, as amended, 42 U.S.C. 1857c-5.

FRANCIS T. MAYO,
Regional Administrator.

NOVEMBER 4, 1975.

It is proposed to amend Part 52 of Chapter I, Title 40 of the Code of Federal Regulations as follows:

1. In § 52.1875 the attainment dates for sulfur oxides in the table are revised and additional NOTES are added as follows:

§ 52.1875 Attainment dates for national standards.

* * * * *

Air quality control region	Pollutant: Particulate Matter, Primary	Particulate Matter, Secondary	Sulfur Oxides [c], Primary	Sulfur Oxides [c], Secondary	Nitrogen dioxide	Carbon monoxide	Photochemical oxidants (hydrocarbons)
* * * *							
Greater Metropolitan Cleveland Intrastate.			(1)	(1)			
Huntington (West Virginia)-Ashland (Kentucky)-Portsmouth-Ironton (Ohio) Interstate.			(1)	(1)			
Mansfield-Marion Intrastate			(1)	(1)			
Metropolitan Cincinnati Interstate.			(1)	(1)			
Metropolitan Columbus Interstate.			(1)	(1)			
Metropolitan Dayton Interstate.			(1)	(1)			
Metropolitan Toledo Interstate			(1)	(1)			
Northwest Ohio Intrastate			(1)	(1)			
Northwest Pennsylvania-Youngstown Interstate.			(1)	(1)			
Parkersburg (West Virginia)-Marietta (Ohio) Interstate.			(1)	(1)

Wilmington-Chillicothe-Zanesville-Cambridge Intrastate.			(1)	(1)			
* * * *							

[1] 3 years from the date of promulgation.
[c] Notwithstanding the above, the following Ohio counties have already met the primary and secondary standards: Ashland, Brown, Carroll, Champaign, Clinton, Darke, Defiance, Fayette, Fulton, Geauga, Guernsey, Hardin, Harrison, Highland, Holmes, Logan, Madison, Medina, Monroe, Morrow, Noble, Paulding, Perry, Preble, Putnam, Shelby, Union, Van Wert, Warren, Williams, Wyandot, Jackson.

2. Section 52.1881(b) is amended as follows:

§ 52.1881 Control strategy: Sulfur oxides (sulfur dioxide).

* * * * *

(b) Regulations for the control of sulfur oxides (SO^2) in the State of Ohio.

(1) *Definitions.* All terms used in this section but not specifically defined below shall have the meaning given them in the Clean Air Act or Parts 51, 52, or 60 of this Chapter.

(i) "By-product coke oven gas" means the fuel gas produced during the production of metallurgical coke in slot-type, byproduct coke batteries.

(ii) "Flue gas desulfurization" means any pollution control installation which treats stationary source combustion flue gas to remove sulfur oxides.

(iii) "Fossil fuel" means natural gas, petroleum, coal, and any form of solid, liquid, or gaseous fuel derived from such materials.

(iv) "Fossil fuel-fired steam generating unit" means a furnace or boiler used in the process of burning fossil fuel for the purpose of producing steam by heat transfer.

(v) "Heat input" means the total gross calorific value (where gross calorific value is measured by ASTM Method D2015–66, D240–64, or D1826–64) of all fuels burned.

(vi) [Reserved]

(vii) "Owner or operator" means any person who owns, leases, operates, controls, or supervises a facility, building, structure, or installation which directly or indirectly results or may result in emissions of any air pollutant for which a national standard is in effect.

(viii) "Primary zinc smelter" means any installation engaged in the production, or any intermediate process in the production, of zinc or zinc oxide from the zinc sulfide ore concentrates through the use of pyrometallurgical techniques.

(ix) "Process" means any source operation including any equipment, devices, or contrivances and all appurtenances thereto, for changing any material whatever or for storage or handling of any materials, the use of which may cause the discharge of an air contaminant into the open air, but not including that equipment defined as fossil fuel fired steam generating units in these regulations. Duplicate or similar parallel operations within a structure, building, or shop shall be considered as a single process for purposes of this regulation.

(x) "Process weight" means the total weight of all materials and solid fuels introduced into any specific process. Liquid and gaseous fuels and combustion air will not be considered as part of the process weight unless they became part of the product. For a cyclical or batch operation, the process weight per hour will be derived by dividing the total process weight by the number of hours from the beginning of any given process to the completion thereof, excluding any time during which the equipment is idle. For a continuous operation, the process weight per hour will be derived by dividing the process weight for the number of hours in a given period of time by the number of hours in that period.

(xi) "Run" means the net period of time during which an emission sample is collected. Unless otherwise specified, a run may be either intermittent or continuous within the limits of good engineering practice.

(xii) "Source operation" means the last operation preceding the emission of an air contaminant, which operation (A) results in the separation of the air contaminant from process materials or in the conversion of the process materials into air contaminants, as in the case of combustion of fuel; and (B) is not primarily an air pollution abatement operation.

(xiii) "Stack" means any chimney, flue, conduit or duct arranged to conduct emissions to the ambient air.

(xiv) "Sulfur recovery plant" means any plant that recovers elemental sulfur from any gas stream, but not include facilities where sulfur recovery is utilized primarily as a means of preventing emissions to the atmosphere of sulfur dioxide or other sulfur compounds.

(xv) "Sulfuric acid production unit" means any facility producing sulfuric acid by the contact process by burning elemental sulfur, alkylation acid, hydrogen sulfide, organic sulfides and mercaptans, or acid sludge, but does not include facilities where conversion to sulfuric acid is utilized primarily as a means of preventing emissions to the atmosphere of sulfur dioxide or other sulfur compounds.

(xvi) "Total rated capacity" means the sum of the rated capacities of all fuel-burning equipment connected to a common stack. The rated capacity shall be the maximum guaranteed by the equipment manufacturer or the maximum normally achieved during use, whichever is greater.

(2) No owner or operator of any fossil fuel-fired steam generating unit(s) shall cause or permit, sulfur dioxide emissions, from any stack to exceed the rates specified below for sources in the following counties:

Pounds SO_2/10^6 Btu, actual heat input	*Counties*
0.6	Muskingum, Clermont.
1.2	Ashtabula, Greene, Richland.
1.6	Allen, Wood, Ottawa, Stark.
2.0	Adams.
2.4	Franklin, Washington, Morgan.
2.6	Miami, Wayne.
3.2	Athens, Hancock, Seneca, Tuscarawas, Licking.
3.6	Henry, Vinton.
4.0	Erie, Knox, Scioto, Marion, Coshocton.
4.4	Lawrence, Columbiana, Gallia.
4.8	Auglaize, Huron.
5.2	Clark, Pike, Ross.
5.6	Fairfield, Hocking, Portage, Mercer.
6.0	Delaware, Pickaway.
6.8	Crawford.

(3) In Trumbull, Mahoning, Jefferson, Belmont, Lorain, Cuyahoga Lake, Summit, and Lucas Counties, no owner or operator of the following types of facilities shall cause or permit emissions from any stack in excess of the rates specified below:

(i) For fossil fuel-fired steam generating unit(s) less than 22.5×10^6 BTU/hour total rated capacity of heat input, 6.0 lbs. $SO_2/10^6$ BTU actual heat input.

(ii) For fossil fuel-fired steam generating unit(s) greater than 3000×10^6 BTU/hour total rated capacity of heat input, 1.2 lbs. $SO_2/10^6$ BTU actual heat input.

(iii) For fossil fuel-fired steam generating units between 22.5 and 3000×10^6 BTU/hour total rated capacity of heat input, the emission rate in lbs. $SO_2/10^6$ BTU actual heat input shall be calculated by the following equation:

$$E=16.71Q_m^{-0.339}$$

where Q_m is the total rated capacity of heat input in 10^6 BTU/hour and E is the allowable emission rate in lbs. $SO_2/10^6$ BTU actual heat input.

(iv) Notwithstanding the above, the Ohio Power Company or any subsequent owner or operator of the Tidd Plant at Brilliant, Ohio shall not cause or permit the emission of sulfur dioxide from any stack at the Tidd Power Plant in excess of 0.8 lbs. $SO_2/10^6$ BTU of actual heat input.

(v) Notwithstanding the above, the Ohio Edison Company or any subsequent owner or operator of the W. H. Sammis Power Plant at Stratton, Ohio shall not cause or permit the emission of sulfur dioxide from any stack at the W. H. Sammis Power Plant in excess of 0.9 lbs. $SO_2/10^6$ BTU of actual heat input.

(vi) Notwithstanding the above, the City of Painesville or any subsequent owner or operator of the Painesville Municipal Power Plant shall not cause or permit the emission of sulfur dioxide at the Painesville Municipal Power Plant located at Painesville, Ohio, in excess of 1.6 lbs. $SO_2/10^6$ BTU of actual heat input.

(4) [Reserved]

(5) In Montgomery County no owner or operator of the following types of facilities shall cause or permit emissions in excess of the rates specified below:

(i) For fossil fuel-fired steam generating unit(s) less than 50×10^6 BTU/hour total rated capacity of heat input, 3.0 lbs. $SO_2/10^6$ BTU actual heat input.

(ii) For fossil fuel-fired steam generating unit(s) greater than 1500×10^6 BTU/hour total rated capacity of heat input, 1.6 lbs. $SO_2/10^6$ BTU actual heat input.

(iii) For fossil fuel-fired steam generating unit(s) between 50 and 1500×10^6 BTU/hour total rated capacity of heat input, the emission rate in lbs. $SO_2/10^6$ BTU heat input shall be calculated by the following equation:

$$E=6.18Q_m^{-0.188}$$

where Q_m is the total rated capacity of heat input in 10^6 BTU/hour and E is the allowable emission rate in lbs. $SO_2/10^6$ BTU actual heat input.

V 40 N 217 NOV 10 75 XUM

(6) In Hamilton and Butler Counties, no owner or operator of the following types of facilities shall cause or permit emissions in excess of the rates specified below:

(i) For fossil fuel-fired steam generating unit(s) less than 50×10^6 BTU/hour total rated capacity of heat input, 2.4 lbs. $SO_2/10^6$ BTU actual heat input.

(ii) For fossil fuel-fired steam generating unit(s) greater than 1500×10^6 BTU/hour total rated capacity of heat input, 1.2 lbs. $SO_2/10^6$ BTU actual heat input.

(iii) For fossil fuel-fired steam generating unit(s) between 50 and 1500×10^6 BTU/hour total rated capacity of heat input, the emission rate in lbs. $SO_2/10^6$ BTU actual heat input shall be calculated by the following equation:

$$E=5.33Q_m^{-.204}$$

where Q_m is the total rated capacity of heat input in 10^6 BTU/hour and E is the allowable emission rate in lbs. $SO_2/10^6$ BTU actual heat input.

(7) This paragraph contains no sulfur dioxide emission or hydrogen sulfide combustion limitations which apply to facilities in the following counties: Ashland, Brown, Carroll, Champaign, Clinton, Darke, Defiance, Fayette, Fulton, Geauga, Guernsey, Hardin, Harrison, Highland, Holmes, Jackson, Logan, Madison, Medina, Monroe, Morrow, Noble, Paulding, Perry, Preble, Putnam, Shelby, Union, Van Wert, Warren, Williams, Wyandot.

(8) Except as provided in paragraphs (b) (7), (9), (10), (11), (12), and (13) of this section, no owner or operator of any process equipment shall cause or permit the emission into the atmosphere of any process gas stream containing sulfur dioxide in excess of the amount prescribed by the following equation:

$$E=19.5p^{0.67}$$

where E is the allowable emission rate in lbs. SO_2/hour and p is the tons of process weight per hour.

(9) Except as provided in paragraph (b) (7) of this section no owner or operator of a petroleum refinery shall cause or permit the combustion of fossil fuel containing a total sulfur content expressed as hydrogen sulfide (H_2S) in excess of 50 grains per dry standard 100 cubic feet of fossil fuel combusted.

(10) No owner or operator of a primary zinc smelter shall cause or permit the emission of sulfur dioxide from the plant in excess of the amount prescribed by the following equation:

$$Y=0.564X^{0.85}$$

where X is the total sulfur feed expressed as elemental sulfur in the smelter input stream in lbs./hour and Y is the allowable sulfur dioxide emission rate in lbs./hour.

(11) No owner or operator of a sulfuric acid production unit shall cause or permit the emissions of sulfur dioxide from the unit in excess of 6.5 lbs. SO_2/ton of H_2SO_4 produced (expressed as 100% H_2SO_4). The provisions of this subparagraph shall not be applicable to processes operated in conjunction with the desulfurization of by-product coke oven gas, provided that the emission limitation set forth in paragraph (b) (12) of this paragraph has been complied with.

(12) No owner or operator of a by-product coke oven shall cause or permit the combustion of by-product coke oven gas containing a total sulfur content expressed as hydrogen sulfide (H_2S) in excess of 50 grains H_2S per dry standard 100 cubic feet of coke oven gas. Included in the permitted concentration of H_2S are emissions of sulfur dioxide emitted as off gas from the sulfur recovery system operated in conjunction with the sulfur removal equipment, and sulfur dioxide emitted due to the mixing, flaring, or distribution of by-product coke oven gas.

(13) No owner or operator of a sulfur recovery plant shall cause or permit the emission of sulfur dioxide from the plant in excess of .01 lbs. SO_2/lbs. of sulfur processed. The provisions of this subparagraph shall not be applicable to processes operated in conjunction with the desulfurization of by-product coke oven gas provided the emission limitation set forth in paragraph (b) (12) of this section has been complied with.

(14) Unless specified below, the test methods and procedures used for determining compliance with this paragraph shall be those prescribed in Part 60 of this chapter. Compliance tests shall be conducted under such conditions as the Administrator shall specify to the plant operator based on representative performance of the affected facility. Notification and recordkeeping procedures shall be those prescribed in § 60.7 of this chapter. The owner or operator shall make available to the Administrator such records as may be necessary to determine the conditions of the performance tests. A compliance test shall consist of at least three runs.

(i) The test methods and procedures used for determining compliance for any sulfur recovery plant subject to paragraph (b) (13) of this section shall be those prescribed in § 60.46 of this chapter with the exception that the maximum amount of sulfur dioxide sampled by Method 6 shall not exceed 50 percent of the stoichiometric amount of hydrogen peroxide absorbent.

(ii) The test methods and procedures used for determining compliance for any sulfuric acid production unit subject to subparagraph (11) of this paragraph or any primary zinc smelter subject to subparagraph (10) of this paragraph shall be those prescribed in § 60.85 of this chapter.

(iii) The test methods and procedures used to determine compliance of fossil fuel-fired steam generating units subject to paragraphs (b) (2), (3), (5), or (6) of this section shall be those prescribed in § 60.46 of this chapter. The test methods for determining the sulfur content of fuels shall be those specified in § 60.45 of this chapter.

(iv) The test methods and procedures used for determining compliance of any process subject to paragraph (b) (8) of this section shall be those prescribed in § 60.106 of this chapter.

(15) Compliance with this paragraph shall be in accordance with the schedules set forth in § 52.1882 of this chapter.

(16) [Reserved]

(17) *Severability.* If any provision of these regulations or the application thereof to any person or circumstances is held to be invalid, such invalidity shall not affect other provisions or application of any other part of these regulations which can be given effect without the invalid provisions or application, and to this end the provisions of these regulations and the various applications thereof are declared to be severable.

3. A new § 52.1882 is added as follows:

§ 52.1882 Compliance schedules.

(a) Federal compliance schedules.

(1) Except as provided in paragraph (a) (5) of this section, the owner or operator of any process equipment subject to § 52.1881(b) (8), (9), (10), (11), (12), or (13) of this chapter, shall comply with the compliance schedule in paragraph (a) (2) of this section.

(2) Any owner or operator of any process equipment subject to § 52.1881(b) (8), (9), (10), (11), (12), or (13) of this chapter shall take the following actions with respect to that source no later than the date specified:

(i) (25 weeks from the date of promulgation)—Submit final control plan to the Administrator.

(ii) (34 weeks from the date of promulgation)—Award contracts for emissions control systems or process modification, or issue orders for purchase of component parts to accomplish emission control or process modification.

(iii) (52 weeks from the date of promulgation)—Initiate on-site construction or installation of emission control equipment or process change.

(iv) (139 weeks from the date of promulgation)—Complete construction or installation of emission control equipment or process change.

(v) (154 weeks from the date of promulgation)—Complete shakedown operations and performance test on source, submit performance test results to the Administrator; achieve final compliance with § 52.1881(b) (8), (9), (10), (11), (12), or (13) of this chapter, as applicable.

(3) Except as provided in subparagraph (5) of this paragraph, the owner or operator of any fossil fuel-fired steam generating unit subject to § 52.1881(b) (2), (3), (5), or (6) of this chapter shall comply with the applicable compliance schedule in paragraph (a) (4) of this section.

(4) (i) The owner or operator of any fossil fuel-fired steam generating unit subject to § 52.1881(b) (2), (3), (5), or (6) of this chapter shall notify the Administrator no later than (four weeks after the date of promulgation) of his intent to utilize either low-sulfur fuel (including blended or washed coal) or flue gas desulfurization to comply with the requirements of said regulation.

(ii) Any owner or operator of a fossil fuel-fired steam generating unit subject to § 52.1881(b) (2), (3), (5), or (6) of this chapter who elects to utilize low sulfur fuel (including blended or washed coal) shall take the following actions with respect to that source no later than the date specified:

(A) (3 weeks from the date of promulgation)—Submit to the Administrator a projection for 10 years of the amount of fuel by types that will be substantially adequate to enable compliance with § 52.1881(b) (2), (3), (4), (5), or (6) of this chapter, as applicable.

(B) (32 weeks from the date of promulgation)—Sign contracts with fuel suppliers for fuel requirements as projected above.

(C) (36 weeks from the date of promulgation)—Submit a statement as to whether boiler modifications will be required. If modifications will be required, submit plans for such modifications.

(D) (50 weeks from the date of promulgation)—Let contracts for necessary boiler modifications, if applicable.

(E) (60 weeks from the date of promulgation)—Initiate on-site modifications, if applicable.

(F) (118 weeks from the date of promulgation)—Complete on-site modifications, if applicable.

(G) (122 weeks from the date of promulgation)—Achieve final compliance with the emission limitation of § 52.1881 (b) (2), (3), (5), or (6) of this chapter, as applicable.

(iii) Any owner or operator of a fossil fuel-fired steam generating unit subject to paragraph (a) (4) (i) of this section who elects to utilize flue gas desulfurization shall take the following actions with respect to the source no later than the date specified.

(A) (17 weeks from the date of promulgation)—Let necessary contracts for construction.

(B) (61 weeks from the date of promulgation)—Initiate on-site construction.

(C) (145 weeks from the date of promulgation)—Complete on-site construction.

(D) (156 weeks from the date of promulgation)—Complete shakedown operations and performance test on source, submit performance test results to the Administrator; achieve final compliance with § 52.1881(b) (2), (3), (5), or (6) of this chapter, as applicable.

(5) (i) None of the preceding subparagraphs of this paragraph shall apply to a source which is presently in compliance with applicable regulations and which has certified such compliance to the Administrator by (4 weeks from the date of promulgation). The Administrator may request whatever information he considers necessary to support such a certification.

(ii) Any owner or operator subject to a compliance schedule in this paragraph or who elects to achieve compliance by means not covered by this paragraph may submit to the Administrator no later than (6 weeks from the date of promulgation) a proposed alternative compliance schedule. For process equipment subject to § 52.1881(b) (8), (9), (10), (11), (12), or (13) of this chapter no such compliance schedule may provide for final compliance after the final compliance date in paragraph (a) (2) of this section. For fossil fuel-fired steam generating units subject to § 52.1881(b) (2), (3), (5), or (6) of this chapter, which will utilize low-sulfur fuel (including blended or washed coal) to comply with requirements of said regulations, no such compliance schedule may provide for final compliance after the final compliance date in paragraph (a) (2) of this section. For fossil fuel-fired steam generating units subject to § 52.1881(b) (2), (3), (5), or (6) of this chapter, which will utilize stack gas desulfurization to comply with requirements of said regulations, no such compliance schedule may provide for final compliance after the final compliance date in paragraph (a) (4) (iii) of this section.

(iii) Any owner or operator of any process equipment subject to § 52.1881 (b) (8), (9), (10), (11), (12), or (13) of this chapter who submits an alternative compliance schedule pursuant to § 52.1882(a) (5) (ii) of this chapter shall remain subject to the provisions of § 52.1882(a) (2) of this chapter until the alternative schedule is approved by the Administrator.

(iv) Any owner or operator of any fossil fuel-fired steam generating unit subject to § 52.1881(b) (2), (3), (5), or (6) of this chapter who submits an alternative compliance schedule pursuant to § 52.1882(a) (5) (ii) of this chapter shall remain subject to the provisions of § 52.1882(a) (4) of this chapter until the alternative schedule is approved by the Administrator.

(6) Nothing in this paragraph shall preclude the Administrator from promulgating a separate schedule for any source to which the application of the compliance schedules in paragraphs (a) (2) or (4) of this section fail to satisfy the requirements of § 51.15 (b) and (c) of this chapter.

CONTROL OF AIR POLLUTION FROM NEW MOTOR VEHICLES AND NEW MOTOR VEHICLE ENGINES

Emission Regulations for New Motorcycles

Correction

In FR Doc. 75-28178, appearing at page 49496, in the issue for Wednesday, October 22, 1975, make the following changes:

1. On page 49497, in the second column, the first paragraph:

a. In the third line, the figure now reading "ANPBM" should read "ANPRM".

b. In the tenth line, the figure now reading "NPBM" should read "NPRM".

2. On page 49498, in the third column, the first sentence of the 6th paragraph, should be changed to read "All comments received on or before the close of business on January 20, 1976, will be considered."

3. On page 49503, in § 85.478-5(a) (3) (i) (C) the word "and" should be inserted between the words "timing" and "method".

4. On page 49506, in the second column, the penultimate line of § 85.478-15(a) should read "tion air is similarly analyzed for hydrocarbons.".

5. On page 49507, in the second column, in § 85.478-16(d) (1) the figure in the second line of the table now reading "34 k.p.h." should read "45 k.p.h.".

6. On page 49509, in the third column, the equations should read as follows:

a. In § 85.478-23(a) (6) (vii):

$$\text{Percent efficiency}=[1+(v-vi)/(iii-iv)]\times100 \text{ percent} \qquad (A)$$

b. In § 85.478-23(a) (6) (viii):

$$\text{Percent efficiency}=[(v)-(iv)]/[(vi)-(iv)]\times100 \text{ percent} \qquad (A)$$

7. On page 49511, in the first column in § 85.478-26:

a. The formula in paragraph (a) should read:

$$Ym=0.43[(Yct+Ys)/(Dct+Ds)]+0.57[(Yht+Ys)/(Dht+Ds)]$$

b. Paragraph (b) (3) should read:

Carbon monoxide mass:

$$COmass=Vmix\times Density CO\times(COconc/1{,}000{,}000)$$

8. On page 49512:

a. In the first column in the sixth line of § 85.478-28(c) (1), the figure now reading "BC" should read "HC".

b. In the second column, in § 85.478-28(c) (1) (iii), a slash mark (/) should be inserted in each of the two combinations so that they each now read

factor = (exhaust emissions interpolated to 12,000 km)/(exhaust emissions extrapolated to 3500 km)

factor = (exhaust emissions interpolated to 12,000 km)/(exhaust emissions extrapolated to 2500 km)

CONTROL OF AIR POLLUTION FROM NEW MOTOR VEHICLES AND NEW MOTOR VEHICLE ENGINES

Appendices to Motor Vehicle Emission Regulations

Correction

In FR Doc. 75-28177, appearing at page 49517 in the issue for Wednesday, October 22, 1975, make the following changes:

1. On page 49518, in the second column, the entry now reading "215____76.5" should read "215____76.3".
2. On page 49523, in the second column, the entry now reading "1,356____32.0" should read "1,356____33.2".
3. On page 49524, in the second column, under paragraph 11, in the fourth and fifth equations, the figures now reading "70 k.p.k." and "60 k.p.k." respectively, should be changed to read "70 k.p.h." and "60 k.p.h." respectively
4. In the table at the top of page 49525, the figure in the fifth line under the heading "Tolerance" now reading "±0.01 kPa" should read "±0.001 kPa".
5. On page 49527, in the second column, second line of the third paragraph, the figure now reading "k.$.h." should read "k.p.h.".

PRESIDENT'S COMMISSION ON WHITE HOUSE FELLOWSHIPS

[1 CFR Part 425]

PRIVACY ACT OF 1974

Proposed Implementation

Notice is hereby given that Part 425 of Title I of the Code of Federal Regulations is proposed to be added as set forth below.

The proposed addition implements 5 U.S.C. 552a(f) by setting forth rules and procedures for notification of the existence of records, obtaining copies of records, and correction of records under the Privacy Act of 1974.

Public comment is invited on these proposed regulations and will be considered by the Commission if received no later than December 12, 1975. Comment should be submitted in writing to the Director, President's Commission on White House Fellowships, 1900 E Street, NW., Washington, D.C. 20415. Notwithstanding the foregoing, these regulations are effective on November 10, 1975, and shall remain in effect until and unless revised by the Commission.

PART 425—PRESIDENT'S COMMISSION ON WHITE HOUSE FELLOWSHIPS

Sec.

425.1 Purpose and scope.
425.2 Procedures for notification of existence of records pertaining to individuals.
425.3 Procedure for requests for access to or disclosure of records pertaining to individuals.
425.4 Correction of records.
425.5 Disclosure of records to agencies or persons other than the individual to whom the record pertains.

AUTHORITY: 5 U.S.C. 522a(f).

§ 425.1 Purpose and scope.

This part sets forth the President's Commission on White House Fellowships procedures under the Privacy Act of 1974 as required by USC 522a(f). Information to applicants regarding the implementation of this Act is contained in the White House Fellowships Application Instructions.

§ 425.2 Procedures for notification of existence of records pertaining to individuals.

(a) The system of records, as defined in the Privacy Act of 1974, maintained by the President's Commission on White House Fellowships is listed annually in the FEDERAL REGISTER as required by that Act. Any person who wishes to know whether a system of records contains a record pertaining to him or her may either appear in person at Room 1308, 1900 E Street, NW., on work days between the hours of 8:30 a.m. and 5 p.m. or may write to the President's Commission on White House Fellowships Administrative Officer, Washington, D.C. 20415 (Phone 202-382-4661). It is recommended that requests be made in writing.

(b) Requests for notification of the existence of a record should state, if the requester is other than the individual to whom the record pertains, the relationship of the requester to that individual. (Note that requests will not be honored by the Commission pursuant to the Privacy Act unless made (1) by the individual to whom the record pertains or (2) by such individual's legal guardian if the individual has been declared to be incompetent due to physical or mental incapacity or age by a court of competent jurisdiction.)

(c) The Commission will attempt to respond to a request as to whether a record exists within 10 working days from the time it receives the request or from the time any required identification is established, whichever is later.

§ 425.3 Procedure for requests for access to or disclosure of records pertaining to individuals.

(a) Any person may request review of records pertaining to him by appearing at Room 1308, 1900 E Street, NW., Washington, D.C. on work days between the hours of 8:30 a.m. and 5 p.m. or by writing to the Commission on White House Fellowships Administrative Officer, Washington, D.C. 20415. (See paragraph (b) of this section for identification requirements.) The Commission will strive either to make the record available within 15 working days of the request or to inform the requester of the need for additional identification.

(b) In the case of persons making requests by appearing at the Commission, reasonable identification such as employment identification cards, drivers licenses, or credit cards will normally be accepted as sufficient evidence of identity in the absence of any indications to the contrary.

(c) Charges for copies of records will be at the rate of $0.10 per photocopy of each page. No charge will be made unless the charge as computed above would exceed $3 for each request or related series of requests. If a fee in excess of $25 would be required, the requester shall be notified and the fee must be tendered before the records will be copied. Remittances shall be in the form either of a personal check or bank draft drawn on a bank in the United States, or a money order. Remittances shall be made payable to the order of the Treasury of the United States and mailed or delivered to the Administrative Officer, President's Commission on White House Fellowships, 1900 E Street, NW., Washington, D.C. 20415.

§ 425.4 Correction of records.

(a) Any individual is entitled to request amendments of records pertaining to him pursuant to 5 U.S.C. 552a (d)(2). Within 10 working days of the receipt of the request, the Administrative Officer will acknowledge receipt of the request.

(1) If the amendment is approved by the Administrative Officer, President's Commission on White House Fellowships, the requester will be notified in writing to what extent the record is amended.

(2) If the amendment or correction is denied in whole or in part by the Administrative Officer, President's Commission on White House Fellowships, the requester will be notified in writing of the determination and the reason for denial. He may appeal in writing to the Director, President's Commission on White House Fellowships. The Director will review the case, make final determination, and advise the requester in writing of the determination with the reasons therefor.

§ 425.5 Disclosure of records to agencies or persons other than the individual to whom the record pertains.

Records subject to the Privacy Act that are requested by any person other than the individual to whom they pertain will not be made available except under the following circumstances:

(a) Records may be circulated to appropriate officials incident to placing Fellows in work assignments for the Fellowship year.

For President's Commission on White House Fellowships.

BRUCE H. HASENKAMP,
Director.

[FR Doc.75-30114 Filed 11-7-75;8:45 am]

INTERSTATE COMMERCE COMMISSION

[49 CFR Part 1100]

[Ex Parte No. 55 (Sub-No. 19)]

PETITIONS FOR RECONSIDERATION

Revised Content Requirements and Page Limitations

At a General Session of the INTERSTATE COMMERCE COMMISSION, held at its office in Washington, D.C., on the 24th day of October 1975.

It is ordered, That based upon the reasons set forth in the attached notice, a proceeding be, and it is hereby, instituted pursuant to Section 17 of the Interstate Commerce Act, 49 U.S.C. 17, and Sections 553 and 559 of the Administrative Procedure Act, 5 U.S.C. 553 and 559, for the purpose of amending Rule 101(d) of the General Rules of Practice [49 CFR 1100.101(d)].

It is further ordered, That the attached notice be, and it is hereby, adopted and incorporated by reference into this order.

It is further ordered, That notice of the institution of this proceeding shall be given to the general public by depositing a copy of this order and the attached notice in the Office of the Secretary, Interstate Commerce Commission, Washington, D.C., for public inspection, and by delivering a copy of the notice to the Director, Office of the Federal Register as notice to interested persons.

By the Commission.

● Purpose: The purpose of this document is to give notice of a rule making proceeding instituted to amend Rule 101 (d) of the General Rules of Practice-Reconsideration. ●

Under the existing Rules of Practice, any party seeking rehearing, reargument, or reconsideration of a final decision by an employee board or a division must specify the matters claimed to have been erroneously decided and the alleged errors or relief sought with the particularly respecting exceptions as outlined in Rule 96(a). The present rule therefore requires that exceptions to statements of fact or matters of law and points relied upon to support exceptions to conclusions made in the prior decision must be stated and numbered separately. Further, when exception is taken to a statement of fact, reference must also be made to the page or part of the record relied upon to support the exception and a corrected statement must be incorporated. While generally petitions filed pursuant to this section of the rules have followed the noted requirements, such compliance has not been uniform, and it has become necessary to emphasize our intent strictly to enforce adherence and to preescribe revised requirements which will provide a simple and readily definable method of giving full effect to the present rule. Accordingly, it is proposed that petitioners now be required to set forth the necessary specifications of alleged error, relief sought, and argument in support thereof, in summary form, in a preface to the petition. Such preface shall be a succinct, but accurate and clear, condensation of the matters raised on petition. The preface shall not exceed 3 pages, except in extraordinary circumstances, and upon leave granted. It is anticipated that such waiver of the page limitation shall be granted only in those proceedings which involve novel or complex issues of fact or law. Replies to petitions shall, in no greater number of preface pages, address, point by point, the specifications set forth in the preface to the petition to which they are directed.

The proposed rule amendment is designed to encourage parties to organize their presentation better and to enable the Commission to identify the key issues in the case. A page limitation is necessary to give full effect to the requirement and to prevent the summary from becoming an extended discussion of the arguments which appear later.

In addition to the above amendment, the Commission proposes to impose a 10-page limitation upon petitions for reconsideration in those cases wherein a Division has already considered either exceptions or a prior petition for appellate review.

A Division should not be burdened in a successive petition for reconsideration with arguments already of record upon which it has already ruled on exceptions or a previous petition for reconsideration. Rather, the Division's consideration should be directed principally to new issues raised by its prior action taken in the case and major allegations of error in its prior rulings. By limiting the length of these essentially successive petitions for reconsideration, it is anticipated that most repetitive arguments will be eliminated. Moreover, the arguments which are received should be concise and to the point without inhibiting the members from reviewing more detailed presentations made earlier in those circumstances where sufficient doubt is raised.

On October 17, 1975, we transmitted to Congress proposed legislation that would, among other things, render the decision of the Commission or a division administratively final, and thus eliminate petitions of the type discussed in the preceding two paragraphs. The 10 page limitation on such successive petitions for reconsideration is being proposed on the possibility that the above Section 17 proposal may not be passed in this Congress.

Anyone wishing to present views and evidence, either in support of, or in opposition to, the action proposed in the said notice may do so by the submission of written data, views, or arguments. An original (and 15 copies whenever possible) of such data, views, or arguments shall be filed with this Commission on or before December 23, 1975.

This Notice of Proposed Rulemaking is issued under the authority of Section 17 of the Interstate Commerce Act (49 U.S.C. 17), and Sections 553 and 559 of the Administrative Procedure Act (5 U.S.C. 553 and 559).

Issued in Washington, D.C., this 24th day of October, 1975.

[SEAL] ROBERT L. OSWALD,
Secretary.

Accordingly, it is proposed that the present rule 1100.101(d) [49 CFR 1100.101(d)] be amended by adding the following:

§ 1100.101 Petitions for rehearing, reargument, or reconsideration. (Rule 101.)

(d) • • • "Such specifications of alleged error, relief sought, and argument in support thereof must be summarized, in a preface to the petition, suitably paragraphed, which shall be a succinct, but accurate and clear, condensation of the matters raised on petition. Except in extraordinary circumstances, and upon leave granted, the preface shall not exceed 3 pages. Replies to petitions shall also contain a preface of no more pages than permitted in the petition's preface, and shall address, point by point, the specifications of alleged error, relief sought, and argument in the preface to the petition. In proceedings in which a division reverses, changes, or modifies a prior decision by a hearing officer or an employee board, petitions for reconsideration addressed to the division in an appellate capacity, and replies thereto, shall not exceed 10 pages, in addition to the preface required by this paragraph."

RETROACTIVE AMENDMENTS OF EMPLOYEE PLANS

Extension of Time for Comments

The proposed amendment to the regulations under section 401(b) of the Internal Revenue Code of 1954, as amended by the Employee Retirement Income Security Act of 1974 (Public Law 93-406, 88 Stat. 829), relating to certain retroactive amendments of employee plans, appears in the FEDERAL REGISTER for October 7, 1975 (40 FR 46314).

Written comments or suggestions pertaining to the proposed amendment and requests for a public hearing by persons submitting written comments or suggestions were required to be submitted by November 6, 1975. The time for submission of written comments or suggestions pertaining to the proposed amendment and for requesting a public hearing is hereby extended to December 8, 1975.

JAMES F. DRING,
Director, Legislation and Regulations Division.

notices

This section of the FEDERAL REGISTER contains documents other than rules or proposed rules that are applicable to the public. Notices of hearings and investigations, committee meetings, agency decisions and rulings, delegations of authority, filing of petitions and applications and agency statements of organization and functions are examples of documents appearing in this section.

DEPARTMENT OF STATE

[PUBLIC NOTICE CM-5E/3]

Office of the Secretary

ADVISORY PANEL ON INTERNATIONAL LAW

Reestablishment of an Advisory Committee

In accordance with P.L. 92-463 the Department of State requested and has received approval from the Office of Management and Budget to reestablish the Advisory Panel on International Law. This Panel was originally established in October 1967 for the purpose of providing the Department with access to the divergent views and expertise of the legal profession. Then in 1974 the Department, in evaluating the essentiality of its advisory committees, decided to terminate this Panel inter alia in an effort to keep advisory panels at a minimum.

However, the Department has determined that it is in the public interest to reestablish the Advisory Panel on International Law in order to obtain the views and advice of members from this country's outstanding legal profession. The Panel will advise on various international legal matters having long-range significance including international pollution, the responsibility of states under international law, the effect of United States law upon the conduct of international relations, and treaties which would contribute to the development of international law.

The Panel will have twenty to twenty-five public members and will be chaired by the Legal Adviser of the Department of State. The members are drawn from the legal profession at large, including the private bar, the academic community, professional legal societies, and practitioners of public interest law. The membership is balanced in terms of points of view represented by different types of employment and the Advisory Panel's function.

A copy of the Charter of the Advisory Panel on International Law has been deposited with the Library of Congress (Chief, Exchange and Gift Division, Federal Advisory Committee Desk) Washington, D.C., for use by the public.

SUE M. MORELAND,
Advisory Committee, Management Officer.

October 24, 1975.

FIREARMS

Granting of Relief

Notice is hereby given that pursuant to 18 U.S.C. Section 925(c), the following named persons have been granted relief from disabilities imposed by Federal laws with respect to the acquisition, transfer, receipt, shipment, or possession of firearms incurred by reason of their convictions of crimes punishable by imprisonment for a term exceeding one year.

It has been established to my satisfaction that the circumstances regarding the convictions and each applicant's record and reputation are such that the applicants will not be likely to act in a manner dangerous to public safety, and that the granting of the relief will not be dangerous to the public interest.

Agbay, Donald Lee, 23309 Vance Street, Hazel Park, Michigan, convicted on or about January 12, 1960, in the Recorder's Court of Detroit, Michigan.

DEPARTMENT OF DEFENSE WAGE COMMITTEE

Closed Meetings

Pursuant to the provisions of section 10 of Public Law 52-463, the Federal Advisory Committee Act, effective January 5, 1973, notice is hereby given that a meeting of the Department of Defense Wage Committee will be held on Tuesday, December 2, 1975; Tuesday, December 9, 1975; Tuesday, December 16, 1975; Tuesday, December 23, 1975; and Tuesday, December 30, 1975 at 9:45 a.m. in Room 1E801, The Pentagon, Washington, D.C.

The Committee's primary responsibility is to consider and submit recommendations to the Assistant Secretary of Defense (Manpower and Reserve Affairs) concerning all matters involved in the development and authorization of wage schedules for Federal prevailing rate employees pursuant to Public Law 92-392. At this meeting, the Committee will consider wage survey specifications, wage survey data, local wage survey committee reports and recommendations, and wage schedules derived therefrom.

Under the provisions of section 19(d) of Public Law 92-463, the Federal Advisory Committee Act, meetings may be closed to the public when they are concerned with matters listed in section 552(b) of Title 5, United States Code. Two of the maters so listed are those related solely to the internal personnel rules and practices of an agency. (5 USC 552(b)(2)), and those involving trade secrets and commercial or financial information obtained from a person and privileged or confidential" (5 USC 552 (b)(4)).

Accordingly, the Deputy Assistant Secretary of Defense (Civilian Personnel Policy) hereby determines that this meeting will be closed to the public because the matters considered are related to the internal rules and practices of the Department of Defense (5 USC 552(b)(2)), and the detailed wage data considered by the Committee during its meetings have been obtained from officials of private establishments with a guarantee that the data will be held in confidence (5 USC 552(b)(4)).

However, members of the public who may wish to do so, are invited to submit material in writing to the Chairman concerning matters believed to be deserving of the Committee's attention. Additional information concerning this meeting may be obtained by contacting the Chairman, Department of Defense Wage Committee, Room 3D281, The Pentagon, Washington, D.C.

MAURICE W. ROCHE,
Director, Correspondence and Directives OASD(C).

PERMIT APPLICATION

The following information is provided in compliance with 50 CFR 13.12 (b):

(1–3) Applicant—Name: National Park Service, Chaneni Islands National Monument. Address: 1699 Anchors Way Drive, Ventura, California 93003 Telephone: (805) 644V8157.

Applicant is a field office of the National Park Service, United States Department of the Interior, charged with the management and protection of Federally owned lands, waters and resources within Channel Islands National Monument, California.

(4) Location: West Anacapa Island 34°01' North Latitude 119°25' West Longitude. Area consists of approximately 340 acres of land. Elevation 930' at highest point, sea level at lowest. Topography consists of sheer cliffs, steep marine terraces and ravines. Here upon is one of only two known places of the Western Coast of the United States that the California brown pelican nests. It is the sole nesting site which has displayed uninterrupted nesting in recent. years.

(5) Type of Permit: Application is being made for an Endangered Species Permit for habitat management and research purposes. The requirement for such a permit is stated in section 9(a) and is required to implement action necessary for the conservation of endangered species as stated in Section 7 of Public Law 93–205, the Endangered Species Act of 1973. The law prohibits the "taking" of an endangered species within the United States, where "take" means to harass, harm, pursue, hunt, shoot, wound, kill, trap, capture, or collect, or attempt to engage in any such conduct. (P.L. 93–205, Section 3(14). Application is made to lawfully permit habitat management and research activities by members of State and Federal Agencies for projects as follows:

a. Research of pelican populations at least annually including the gathering of specimens such as injured and crippled young, pelican carcasses, eggshell fragments, addled eggs, nesting materials and food substances. This continuing surveillance is to be performed by the United States Fish and Wildlife Service and California Department of Fish and Game, or under their supervision and in cooperation with personnel of the National Park Service. Collection of specimens will not include pelicans determined to be healthy, but may involve those debilitated or exhibiting abnormal behavior or are sick or injured.

b. Disturbance of pelicans on West Anacapa Island by authorized observers participating in continuing annual population censuses and bird banding as described in (a) above. Personnel involved are employees or contractees of the National Park Service, U.S. Fish and Wildlife Service and California Department of Fish and Game.

c. Unavoidable harassment of bird populations for purposes of monitoring populations, inspections and bird banding by personnel of the National Park Service, U.S. Fish and Wildlife Service and California Department of Fish and Game, or their contractees.

d. Entry to loafing areas at any time of the year, and entry into breeding area during the non-breeding season by Ventura County Public Health Department and representatives of the National Park Service doing research on removal of black rats may or may not cause unavoidable harassment of some birds.

e. Entry to habitat area and unavoidable harassment by any experts or consultants invited or contracted by State and Federal Agencies named above will be minimized by subjecting this population to as little disturbance as possible. No entry into colonys will occur during nest-site establishment, incubation, and brooding of small young; unless an emergency is determined to exist. Any work done on this population will be coordinated among all agencies involved (National Park Service, U.S. Fish and Wildlife Service and California Department of Fish and Game).

(6) Not Applicable.

(7) Certification: I hereby certify that I have read and am familiar with the regulations contained in Title 50, part 13, of the Code of Federal Regulations and the other applicable parts in Subchapter B of Chapter I of Title 50, and I further certify that the information submitted in this application for a permit is complete and accurate to the best of my knowledge and belief. I understand that any false statement hereon may subject me to the criminal penalties of 18 U.S.C. 1001.

(8) Desired effective Date of Permit: July 25, 1975

(9) Date: July 11, 1975

(10) William H. Ehorn, Superintendent, Channel Islands National Monument

(11) Additional information as requested in Form 50 CFR 17, Sections 17.23, "Zoological, educational, scientific, or propagations permits." (1) Description of wildlife to be covered in the permit. Scientific name: *Pelecanus occidentalis californicus*. Common names: California brown pelican, brown pelican.

SEPTEMBER 8, 1975.

Your Reference: FWS/LE PRT 8-313-B-C.

Mr. LYNN A. GREENWALT, *Director, Fish and Wildlife Service, Washington, D.C. 20240.*

DEAR MR. GREENWALT: Here is the additional information and answers needed to complete the Endangered Species Permit that you requested in your recent letter.

17.22(a) (5) and (a) (6) (i) and (ii) Facilities and Technical Expertise: We do not propose to collect injured and crippled pelicans. If the need should come in the future, we would contact the Fish and Wildlife Service in Davis, California, for their assistance and expertise. The birds would then be transferred in Fish and Wildlife containers and cared for by the Fish and Wildlife Service at the Davis Field Station.

17.22(a) (8): We fully understand the requirements of the application being published in the FEDERAL REGISTER and open for public comment for 30 days.

Conceivably the habitat management will involve the eradication of the Black Rats (*Rattus rattus*) and other plants and animals that are exotic species. This has to be done in conformance with the laws and policies of the National Park Service. There are no outstanding contracts at this time for conducting research. Before any contracts are approved in final, they will be reviewed and approved by the Fish and Wildlife Service and the California State Department of Fish and Game. We have always done this in the past under the terms of our cooperative agreements with them.

In summary, the National Park Service does not engage in any activities involving the California brown pelican without the consent, approval and assistance of Dr. Dan Anderson of the Fish and Wildlife Service in Davis, California, and Mr. Howard Leach of the California Department of Fish and Game in Sacramento, California.

As you are aware, the National Park Service has recently designated West Anacapa Island as a Research Natural Area which will prevent any development or activities that would adversely affect the brown pelican.

If you are in need of further information, please let me know.

Sincerely,

WILLIAM H. EHORN,
Superintendent.

Documents and other information submitted in connection with this application are available for public inspection during normal business hours at the Service's office in Suite 600, 1612 K Street, N.W., Washington, D.C.

Interested persons may comment on this application by submitting written data, views, or arguments, preferably in triplicate, to the Director (FWS/LE), U.S. Fish and Wildlife Service, Post Office Box 19183, Washington, D.C. 20036. All relevant comments received on or before December 10, 1975, will be considered.

Dated: October 31, 1975.

LOREN K. PARCHER,
Acting Chief, Division of Law Enforcement, U.S. Fish and Wildlife Service.

DEPARTMENT OF AGRICULTURE

Commodity Credit Corporation

UPLAND COTTON

Determination of 1976–Crop Loan Level

On July 18, 1975, the Commodity Credit Corporation published in the FEDERAL REGISTER (40 FR 30283) a notice that the Secretary of Agriculture was proposing to make a determination of the loan level with respect to the 1976 crop of upland lint cotton. Such determination would reflect for Middling 1-inch cotton (micronaire 3.5 through 4.9) at average location in the United States 90 percent of the average price of American cotton in world markets for the 3-year period August 1, 1972, through July 31, 1975. The determination is made pursuant to a regulation published in the Federal Register of August 22, 1973 (38 FR 22543) specifying the procedures and factors to be used in making the world price determination. Data involved in the determination of the preliminary 1976-crop loan level for upland cotton are contained in Tables 1 through 5 which follow:

Office of the Secretary

FEDERAL CROP INSURANCE CORPORATION

Organization, Functions, and Delegations of Authority

The notice of Organization, Functions, and Delegations of Authority of the Federal Crop Insurance Corporation appearing in 36 FR 23325 is superseded and the following is substituted therefor:

SUBPART A—ORGANIZATION

Sec.
1. Creation.
2. Stock.
3. Management.
4. Board of Directors.
5. Offices of the Corporation.
6. Availability of information and records.

SUBPART B—FUNCTIONS AND PROCEDURES

7. Crops insured.

SUBPART C—DELEGATIONS OF AUTHORITY

8. Delegations of authority affecting crop insurance contracts.

SUBPART A—ORGANIZATION

SECTION 1. *Creation.* The Federal Crop Insurance Corporation was created February 16, 1938, by the Federal Crop Insurance Act (7 U.S.C. 1501 et seq.) and is an agency within the U.S. Department of Agriculture.

SECTION 2. *Stock.* All capital stock of the Federal Crop Insurance Corporation is owned by the United States.

SECTION 3. *Management.* The Management of the Federal Crop Insurance Corporation is vested in the Board of Directors, subject to the general supervision of the Secretary of Agriculture. The Manager of the Corporation is its chief executive officer, and he is appointed by and holds office at the pleasure of the Secretary of Agriculture. Under the general supervision of the Board, the Manager is responsible for the general direction and supervision of all activities of the Corporation.

SEC. 4. *Board of Directors.* The Federal Crop Insurance Act provides that the Board of Directors shall consist of the Manager of the Corporation, two other persons employed in the Department of Agriculture, and two persons experienced in the insurance business who are not otherwise employed by the Government. The Board is appointed by and holds office at the pleasure of the Secretary of Agriculture.

SEC. 5. *Offices of the Corporation.* The principal office of the Federal Crop Insurance Corporation is composed of the Office of the Manager and seven division and staff offices. The Office of the Manager and other components of the principal office are located at Washington, D.C. 20250, in the South Agriculture Building, except that the National Service Office and the Actuarial Division are located at 8930 Ward Parkway, Kansas City, Missouri 64114.

(1) *Office of the Manager.* The Office of the Manager is composed of the Manager and his immediate staff, including a Deputy Manager. Within established policies and regulations, the Manager is responsible for the executive direction, coordination, and control of the Corporation's programs and activities, the determination of goals and objectives, and the approval of plans, methods and procedures proposed or used.

(2) *Research and Development Staff.* The Research and Development Staff collaborates with the Office of the Manager in devising and developing research studies on insured and uninsured crops and counties, the effects of changing climatological conditions and technological developments, and new insurance concepts and territories. It researches and develops proposed insurance programs, forms and related procedures. It collaborates with other agencies, commodity groups, handlers, and processors on proposed projects and research related to new crop insurance programs. It prepares and issues specific and periodic reports and coordinates material for the Board of Directors. It is also responsible for contract development and revision and preparation of insurance regulations and Federal Register notices. It participates in the preparation of legislative proposals and reports. It prepares the Annual Report to Congress.

(3) *Actuarial Division.* The Actuarial Division, which is located at 8930 Ward Parkway, Kansas City, Missouri 64114, formulates and advises management on actuarial/underwriting policies of the Corporation; establishes and revises insurance coverages and rates for crops insured by county; develops actuarial/underwriting formulas and techniques for measuring insurance risks; devises methods for accumulating statistical data for actuarial analyses; develops and issues actuarial/underwriting procedures, instructions and forms; develops production cost by crops and counties and restricts coverage to the cost of production; and directs four regional underwriting offices and areas comprising the regions are:

(i) *North Central Regional Underwriting Office,* Room 106, U.S. Post Office and Courthouse, Springfield, Illinois 62701—Serving Illinois, Indiana, Iowa, Michigan, Minnesota, Missouri (all counties except Barton, Bates, Butler, Cape Girardeau, Dade, Dunklin, Jasper, Lawrence, Mississippi, New Madrid, Pemiscot, Scott, Stoddard, and Vernon), Ohio, Erie County, Pennsylvania, and New York.

(ii) *Southeast Regional Underwriting Office,* Room M-116, U.S. Post Office and Federal Building, 401 North Patterson, Street, Valdosta, Georgia 31601—Serving Alabama, Arkansas, Delaware, Florida, Georgia, Kentucky, Louisiana, Maryland, Mississippi, Missouri (Butler, Cape Girardeau, Dunklin, Mississippi, New Madrid, Pemiscot, Scott, and Stoddard Counties only), North Carolina, Pennsylvania (all counties except Erie), South Carolina, Tennessee, and Virginia.

(iii) *Southwest Regional Underwriting Office,* 50th and North Pennsylvania, Suite 1210, 50 Penn Place, Oklahoma City, Oklahoma 73118—Serving Arizona, California (all counties except Modoc), Colorado, Kansas, Missouri (Barton, Bates, Dade, Jasper, Lawrence, and Vernon Counties only), New Mexico, Oklahoma, and Texas.

(iv) *Northwest Regional Underwriting Office,* Plaza West Building, 1537 Avenue D, Billings, Montana 59102—Serving California (Modoc County only), Idaho, Montana, Nebraska, North Dakota, Oregon, South Dakota, Washington, Wyoming, and Utah.

(4) *National Service Office.* The National Service Office is located at 8930 Ward Parkway, Kansas City, Missouri 64114. This office performs the accounting functions of the Corporation, including administrative and program cost accounts through use of automatic data processing, performs contract servicing and audit functions, develops statistical information and prepares statistical and financial reports; processes claims and computes and schedules indemnities for payment; and serves as the central supply and distribution center for forms and procedures.

(5) *Operations Division.* This office formulates and recommends policy and advises management on the development of operations programs, directs a coordinated Marketing and Contract Service program, including all phases of FCIC's sales, claims, loss adjustment, public relations, and field servicing activities. The two staffs and functions which they perform within established policies and regulations and subject to the direction of the Director, Operations Division, are as follows:

(i) *Contract Service Staff.* This staff plans and coordinates all Crop Insurance Contract Service activities, including developing programs, issuing procedures and instructions, and training personnel. It recommends policies, devises and installs systems, methods, procedures, instructions, forms, and techniques assuring consistent and equitable adjustment of losses and processing of claims for insured crops and inspection and/or review of applications or acreage reports involving high liability, transfers of interests, unit agreements or unusual or controversial claims. It develops and implements recruiting, training, supervision, career development and incentive programs, standards, and performance appraisal methods and techniques for loss adjusters. It advises and assists Regional Directors and Contract Service Branch Chiefs with plans, problems, training and recruiting. It serves as a support group in assisting the Director, Operations Division, in carrying out his supervisory functions. It also reviews and recommends proposed contract changes.

(ii) *Marketing Staff.* This staff develops overall marketing promotion and business retention plans, commodity sales plans, product lines, product mix, product quotas, and collection procedure. It reviews and recommends proposed contract changes. It develops overall sales training programs, methods, and techniques. It develops sales aids and promotional materials. It develops uniform reporting systems and sales performance evaluation techniques. It prepares procedures, instructions, and forms required. It develops sales incentive systems, qualification standards, and performance appraisal methods and techniques for sales personnel. It works with private insurance groups, communications media, other governmental and nongovernmental agencies, farm organizations, and business groups to promote better understanding and acceptance of the purpose and value of crop insurance. It advises and assists Regional Directors and Marketing Branch Chiefs with plans, problems, training, and recruiting. It also serves as Washington representative to close large and complex sales and to stimulate sales campaigns. It maintains continuous review of sales, programs, and activities procedures. It serves as a support group in assisting the Director, Operations Division, in carrying out his supervisory functions.

(iii) *Regional Offices.* There are 14 Regional Offices serving the states in which crop insurance is being offered. Each Regional Office is under the supervision of a Regional Director who is responsible for the general administration of the loss adjustment, claims, servicing programs, sales and collections in his assigned territory, recruiting and training personnel, advising management and recommending contract and other changes. The Regional Director conducts his activities through a Contract Service Branch, a Marketing Branch, and a Support Operations Branch. Claims specialists and assistants supervise and coordinate the loss adjustment and service work of fieldmen under the Contract Service Branch. District and area sales supervisors coordinate the sales and collection work of fieldmen in a specified group of counties under the Marketing Branch. Offices for the county are under the Support Operations Branch. Regional Offices with the territories which they serve are as follows:

North Dakota: Room 234, Federal Building, 220 East Rosser Avenue, Bismarck, North Dakota 58501.

Texas, Oklahoma, New Mexico: USDA Building, College Station, Texas 77840.

Georgia, Florida, South Carolina, and the following Alabama counties: Baldwin, Barbour, Coffee, Conecuh, Covington, Crenshaw, Dale, Escambia, Geneva, Henry, Houston, Pike: Room 303, 240 Stoneridge Drive, one Greystone West Building, Columbia, South Carolina 29210.

Iowa and the following Missouri counties: Adair, Andrew, Atchison, Audrain, Boone, Buchanan, Caldwell, Callaway, Carroll, Cass, Chariton, Clark, Clinton, Cooper, Daviess, DeKalb, Franklin, Gentry, Grundy, Harrison, Henry, Holt, Howard, Jackson, Johnson, Knox, Lafayette, Lewis, Lincoln, Linn, Livingston, Macon, Marion, Mercer, Monroe, Montgomery, Nodaway, Pettis, Pike, Platte, Ralls, Randolph, Ray, St. Charles, Saline, Scotland, Shelby, Sullivan, Worth: Federal Building, 210 Walnut Street, Des Moines, Iowa 50309.

Arizona and the following California counties: Fresno, Imperial, Kern, Kings, Madera, Merced, Riverside, San Joaquin, Stanislaus, Tulare: Room 4110, Federal Building, U.S. Courthouse, 1130 "O" Street, Fresno, California 93721.

Mississippi, Arkansas, Louisiana, and the following Alabama counties: Blount, Cherokee, Chilton, Colbert, Cullman, Dallas, DeKalb, Etowah, Hale, Jackson, Lauderdale, Lawrence, Limestone, Madison, Marshall, Morgan, Pickens, Shelby, Talladega, Tuscaloosa: Room 610 Milner Building, 200 South Lamar Street, Jackson, Mississippi 39201.

Montana and the following Wyoming counties: Big Horn, Park, Washakie: 613 N.E. Main Street, Lewistown, Montana 59457.

Nebraska, South Dakota, and the following Wyoming counties: Goshen, Laramie, Platte: Room 303, Federal Building, Lincoln, Nebraska 68508.

Kansas, Colorado, and the following Missouri counties: Barton, Bates, Dade, Jasper, Lawrence, Vernon: 2601 Anderson Avenue, Manhattan, Kansas 66502.

Tennessee, Kentucky, the following Missouri counties: Butler, Cape Girardeau, Dunklin, Mississippi, New Madrid, Pemiscot, Scott, Stoddard; and the following Virginia counties: Lee, Russell, Scott, Smyth, Washington: U.S. Courthouse, Room 508, Nashville, Tennessee 37203.

North Carolina, Delaware, Maryland, the following Pennsylvania counties: Adams, Chester, Cumberland, Dauphin, Franklin, Lancaster, Lebanon, Perry, York; and the following Virginia counties: Amelia, Appomattox, Brunswick, Campbell, Charlotte, Cumberland, Dinwiddie, Franklin, Greensville, Halifax, Isle of Wight, Lunenburg, Mecklenburg, Nansemond, Nottoway, Pittsylvania, Prince Edward, Prince George, Southampton, Surry, Sussex: Room 612 Federal Office Building, 310 New Bern Avenue, Raleigh, North Carolina 27601.

Illinois, Michigan, Ohio, Indiana, New York, and Erie County in Pennsylvania: Atkinson Square West, Suite 1501, 5610 Crawfordsville Road, Indianapolis, Indiana 46224.

Washington, Oregon, Idaho, Utah, and Modoc County in California: Room 369, U.S. Courthouse, West 920 Riverside Avenue, Spokane, Washington 99201.

Minnesota and Wisconsin: Room 222, Federal Building and U.S. Courthouse, 316 Robert Street, St. Paul, Minnesota 55101.

(A) *Office for the County.* Field offices serving one or more counties are established to administer the crop insurance program at the local level. Most of these offices are staffed by regular employees of the Corporation. These offices are charged with the responsibility of servicing crop insurance contracts. They receive, process and transmit applications for insurance, contract changes, acreage reports, premiums, notices of loss and notices of cancellation, and related forms to Regional and National Service Offices as required. Some counties are handled by agents under contract with the Corporation to only sell the insurance and in others to both sell and service the insurance. The county actuarial table, which shows the premium rates and coverages available and the insurable acreage in the county, is on file in the office for the county and available for public inspection. Changes in insurance contracts to be effective for a coming crop year are also filed in the office for the county and are available for public inspection. Forms which are required to be used in connection with crop insurance contracts may be obtained at the office for the county upon request. The location of the office serving any county may be obtained from the Regional Office.

(6) *Administrative Management Division.* This division formulates and recommends policy and advises management on the development of administrative programs. It directs a coordinated Budget, Finance, Administrative Services, and Personnel program. It plans, directs, and coordinates the fiscal, budget and accounting activities of the Corporation with respect to both capital and administrative funds. It plans, directs, performs and coordinates procurement, space, communications, records, and paperwork management functions. It plans, directs, performs, and coordinates personnel functions, including organization and manpower planning, recruiting, staffing, placement and utilization, position classification, employee development, Equal Employment Opportunity, employee and labor relations, safety, health, and disciplinary actions.

SEC. 6 *Availability of information and records.* Any person desiring information with respect to crop insurance may request such information from the office for his county, from the Regional Director for his State, or from the Manager, Federal Crop Insurance Corporation-United States Department of Agriculture, Washington, D.C. 20250. Records of the Corporation, including those maintained in the field offices, are currently available for examination in accordance with the rules issued by the Secretary of Agriculture (7 CFR 1.1 *et seq.*) and the Corporation (7 CFR 412.1 *et seq.*).

SUBPART B—FUNCTIONS AND PROCEDURES

SEC. 7. *Crops insured.*

(a) The Federal Crop Insurance Act, as amended (7 U.S.C. 1501 *et seq.*) authorizes the Corporation to insure crops against unavoidable losses for the purpose of determining the most practical plan, terms and conditions of insurance for agricultural commodities. Crop insurance may be offered in each year in not to exceed 150 counties in addition to the number of counties in which such insurance was offered in the preceding year. Insurance may be offered each year on not more than three agricultural commodities in addition to those previously insured, except that other agricultural commodities may be included in combined crop insurance (insurance on two or more agricultural commodities under one contract with a producer). Insurance within the limitation set forth above is now offered on wheat, cotton, flax, corn, tobacco, dry beans, citrus, soybeans, barley, peaches, grain sorghum, oats, rice, raisins, peanuts, peas, apples, tomatoes, sugar beets, sugarcane, grapes, and combined crops.

(b) Regulations governing current insurance programs may be found in the FEDERAL REGISTER and in Title 7, Code of Federal Regulations, Parts 401 through 404, 406, and 408 through 413.

SUBPART C—DELEGATIONS OF AUTHORITY

SEC. 8. *Delegations of authority affecting crop insurance contracts.* The authority delegated by this section to act on behalf of the Corporation in matters affecting crop insurance contracts shall be exercised in accordance with established policies and procedures and subject to the supervision and direction of the Manager. This delegation of authority shall not preclude the Manager from exercising the same authority whenever he deems it necessary under the circumstances.

(a) *Delegations to Regional Directors.* Each Regional Director, in the state or states served by his office, is authorized to: Reject applications for crop insurance; cancel crop insurance contracts in accordance with their terms (but the voidance of a contract for the misrepresentation or fraud of an insured is reserved to the Manager of the Corporation); accept or reject proposed agreements with insureds for the division of insured acreage in a county into two or more insurance units, where a crop insurance contract so provides; approve or reject a transfer of interest under an insurance contract; recommend approval or rejection of claims in accordance with administrative procedure; determine the insured acreage and interest or declare the insured acreage to the zero where the insured fails to timely file an acreage report or files an acreage report which is found to be erroneous; and determine when replanting of an insured crop is practical.

(b) *Delegations to Fieldman.* The fieldman (known as "adjuster") assigned to make an inspection of insured acreage, after notice of loss and a request by the insured for consent to put such acreage to another use, is authorized to give such consent in writing on behalf of the Corporation in accordance with the policy and the applicable endorsement and loss adjustment procedure.

(c) *Delegation to Director, National Service Office.* The Director of the National Service Office is authorized to accept applications for insurance, changes in elections, and contract reinstatements; to process, suspend, approve or reject claims for indemnity, and to adjust, cancel, or terminate or suspend collection action with respect to claims for premiums under Public Law 518 (12 U.S.C. 1150 and 1151 and the Federal Claims Collection Act of 1966 (31 U.S.C. 951-953).

Approved by the Board of Directors on September 18, 1975.

Issued this 4th day of November, 1975.

[SEAL] EARL L. BUTZ,
Secretary.

PETER F. COLE,
Secretary, Federal Crop Insurance Corporation.

three (3) California sea lions (*Zalophus californianus*) for public display.

The sea lions will be taken from the California Channel Islands by a professional collector during the period of November to April.

The animals will be maintained in a sloping kidney shaped pool measuring 32 feet at maximum width and depths varying from a minimum of 3 feet 8 inches to a maximum of 4 feet 5 inches. A four step riser leads to a covered grotto haul-out facility and a three step riser is located at a shallow end of the pool. A circular island, measuring six feet in diameter is centrally located at the deep end of the pool.

Health care of the animals will be performed by a staff member, a general curator and a resident veterinarian, all of whom have had prior experience with California sea lions.

The El Paso Zoological Park is a nonprofit institution which records approximately 200,000 visitors annually. Exhibited sea lions have been maintained for approximately 15 years prior to July 1973.

The arrangements and facilities for transporting and maintaining the marine mammals requested in the above application have been inspected by a licensed veterinarian, who has certified that such arrangements and facilities are adequate to provide for the well-being of the marine mammals involved.

Documents submitted in connection with the above application are available for review at the following locations:

Office of the Director, National Marine Fisheries Service, Department of Commerce, Washington, D.C. 20235, the Office of the Regional Director, National Marine Fisheries Service, Southwest Region, 300 South Ferry Street, Terminal Island, California 90731, and the Office of the Regional Director, National Marine Fisheries Service, Southeast Region, Duval Building, 9450 Gandy Boulevard, St. Petersburg, Florida 33702.

Concurrent with the publication of this notice in the FEDERAL REGISTER, the Secretary of Commerce is sending copies of the application to the Marine Mammal Commission and the Committee of Scientific Advisors.

Written views or data, or requests for a public hearing on this application should be submitted to the Director, National Marine Fisheries Service, Department of Commerce, Washington, D.C. 20235 on or before December 10, 1975. The holding of such hearing is at the discretion of the Director.

All statements and opinions contained in this Notice in support of this application are summaries based upon information supplied by the Applicant, and, therefore, do not necessarily reflect the views of the National Marine Fisheries Service.

HARVEY M. HUTCHINGS,
Acting Associate Director for Resource Management, National Marine Fisheries Service.

NOVEMBER 4, 1975.

Office of the Secretary

NATIONAL INDUSTRIAL ENERGY COUNCIL

Renewal

In accordance with the provisions of the Federal Advisory Committee Act, 5 USC App. I and Office of Management and Budget Circular A-63 of March, 1974, as amended, and after consultation with OMB, the Secretary of Commerce has determined that the renewal of the National Industrial Energy Council is in the public interest in connection with the performance of duties imposed on the Department by law.

First established on November 28, 1973, the National Industrial Energy Council (NIEC) was formed for the purpose of advising the Secretary of Commerce on achieving more efficient utilization of energy in the business sector and encouraging energy conservation practices, processes and products. While significant achievements have been made, the Secretary has determined that additional effort is required.

The NIEC has made important contributions to the development of more efficient manufacturing processes and the dissemination of information about this effort throughout the business community. It has given advice which has helped in the development and marketing of energy efficient products, has examined and proposed means of overcoming barriers to more efficient utilization of energy, and has made significant contributions to fostering greater awareness of energy problems and solutions in the business sector.

In renewing the NIEC, the Secretary has established for it a continuing role in the vital field of business use of energy. The advice and counsel of the NIEC members is not available on any organized basis through other advisory committees or from outside sources or from other sources within the Department of Commerce The NIEC will continue in its role with a balanced membership of approximately 25 members, will be chaired by the Secretary of Commerce and will operate in compliance with the provisions of the Federal Advisory Committee Act.

Copies of the Council's revised and renewed charter will be filed with appropriate committees of the Congress and with the Library of Congress 15 days after the date this notice appears.

The revised Charter of the Council, set forth below, differs from the present Charter in the following respects:

a. The statement of the membership level of the Council is changed from "approximately 20" to "approximately 25." Our experience in developing an appropriate roster of members indicates that "approximately 25" more accurately reflects the number of members needed to achieve a fairly representative sampling of industry viewpoints.

b. Provision for a regular Vice-Chairman for the Council is eliminated. Council activities have proven to be of such a nature that it is generally appropriate for the Secretary of Commerce personally to chair meetings of the Council.

c. The description of Council functions is revised to make clear that the energy conservation matters which are considered by the Council include general questions of energy utilization within the industrial and commercial segments of the economy.

d. Provision for administrative support of Council activities is changed from the Assistant Secretary for Domestic and International Business to the Office of Energy Programs.

e. Reflecting actual expenses, the estimate of annual Council operating costs and staff support is increased to $63,976.

GUY W. CHAMBERLIN, JR.,
Acting Assistant Secretary for Administration.

NOVEMBER 3, 1975.

[Docket No. 75N-0324]

LUTREXIN TABLETS AND TREXINEST TABLETS

Hynson, Westcott & Dunning, Inc.; Oral Argument on Exceptions to Tentative Findings of Fact and Conclusions of Law

The Commissioner of Food and Drugs will hear oral argument concerning new drug applications for Lutrexin (NDA 8-986) and Trexinest (NDA 10-144) tablets on January 16, 1976.

An evidentiary hearing concerning these drugs was held from June 17 to July 12, 1974, before Administrative Law Judge Irving Sommer, notice of which was published in the FEDERAL REGISTER of May 2, 1974 (39 FR 15341), (Docket FDC-D-123). On November 27, 1974, Judge Sommer issued tentative findings of fact and a tentative order withdrawing the new drug applications for Lutexin and Trexinest. Subsequently, the respondent Hynson, Westcott & Dunning, Inc., filed exceptions to Judge Sommer's findings and order, together with a supporting brief and a request for an opportunity for oral argument.

Oral argument will be held before the Commissioner at 2 p.m. Friday, January 16,1976, in Conference Rm. I, 5600 Fishers Lane, Rockville, MD. Argument will be heard on behalf of Hynson, Westcott & Dunning, Inc., and the Bureau of Drugs. Each party will be allowed a maximum of 1 hour to present its argument. Argument will be limited to the legal issues and to the factual evidence of record at the hearing, and no new factual material will be received. No additional briefs or memoranda will be permitted.

Dated: November 3, 1975.

SAM D. FINE,
Associate Commissioner for Compliance.

[Docket No. 75F-0303]

MONSANTO CO.

Filing of Petition for Food Additive

Pursuant to provisions of the Federal Food, Drug, and Cosmetic Act (sec. 409 (b)(5), 72 Stat. 1786 (21 U.S.C. 348(b)(5))), notice is given that a petition (FAP 6B3128) has been filed by Monsanto Co., 800 North Lindbergh Blvd., St. Louis, MO, proposing that § 121.2629 *Acrylonitrile/styrene copolymer* (21 CFR 121.2629) be amended to expand the permitted use of the copolymer, which is currently restricted to use with nonalcoholic beverages, to use as an article or a component of articles intended to contact all foods except those containing more than 8 percent alcohol.

It has been determined that the proposed uses, other than as bottles intended to hold beer and carbonated beverages, will not have a significant environmental impact. The use of plastic bottles for beer and carbonated beverages has been conviewed for a final environmental impact statement issued by the Food and Drug Administration on April 14, 1975. The notice of availability of the statement appeared in the FEDERAL REGISTER of April 14, 1975 (40 FR 16708). Comments on that statement are currently being reviewed for a final environmental impact statement, which is being prepared. The proposed use of this copolymer to include beer bottles is considered covered by the draft statement, and the final impact statement under preparation. The environmental impact analysis report and other material relevant to the use of the copolymer for purposes other than bottles for beer and carbonated beverages have been reviewed. It has been determined that these proposed uses of the additive will not have a significant environmental impact. Copies of the environmental impact analysis report may be seen in the office of the Assistant Commissioner for Public Affairs, Rm. 15B-42 or the office of the Hearing Clerk, Food and Drug Administration, Rm. 4-65, 5600 Fishers Lane, Rockville, MD 20852, during working hours Monday through Friday.

Dated: October 30, 1975.

HOWARD R. ROBERTS,
Acting Director, Bureau of Foods.

Office of Education

ADVISORY COUNCIL ON WOMEN'S EDUCATIONAL PROGRAMS

Public Meeting

Notice is hereby given, pursuant to Public Law 92-463, that the next meeting of the Advisory Council on Women's Educational Programs will be held from 8:30 a.m. to 5:00 p.m. on December 1 and 2, 1975, in the Turquoise Room of the Sheraton Old Town Inn at 800 Rio Grande Boulevard NW., Albuquerque, New Mexico, and that the full Council meeting will be preceded by a meeting of the Council's Executive Committee from 6:00 p.m. to 11:00 p.m. on November 30, 1975, at the Kachina Room in the Sheraton Old Town Inn at 800 Rio Grande Boulevard NW., Albuquerque, New Mexico.

The Advisory Council on Women's Educational Programs is esetablished pursuant to Public Law 93-380 Section 408 (f)(1). The Council is mandated to (a) advise the Commissioner with respect to general policy matters relating to the administration of the Women's Educational Equity Act of 1974; (b) advise and make recommendations to the Assistant Secretary concerning the improvement of educational equity for women; (c) make recommendations to the Commissioner with respect to the allocation of any funds pursuant to Section 408 of Public Law 93-380, including criteria developed to insure an appropriate distribution of approved programs and projects throughout the Nation; and (d) develop criteria for the establishment of program priorities.

The meetings of the full Council and of the Executive Committee shall be open to the public. The agenda for the full Council meeting will include: (1) discussion of Council operating procedures; (2) committee reports; (3) budget report; (4) staff report; (5) report from HEW regional office; (6) presentation by Indian education personnel; (7) statements from local community organizations.

The agenda for the Executive Committee meeting will include development of a committee statement of purpose and a tentative plan of action.

Records will be kept of all Council proceedings and will be available at the Council offices at Suite 710, 1325 G Street NW., Washington, D.C.

Signed at Washington, D.C. on November 5, 1975.

KATHLEEN MAURER,
Administrative Officer.

RESEARCH PROJECTS IN VOCATIONAL EDUCATION

Notice of Closing Date for Receipt of Applications for FY 76

Notice is hereby given, pursuant to the authority contained in section 131(a) of Part C of the Vocational Education Act of 1963, as amended (20 U.S.C. 1281(a)), that applications are being accepted for vocational education research project grants and contracts.

Applications must be received by the U.S. Office of Education Application Control Center on or before January 9, 1976.

A. *Application sent by mail.* An application sent by mail should be addressed as follows: U.S. Office of Education, Application Control Center, Washington, D.C. 20202, Attention: 13.489. An application sent by mail will be considered to be received on time by the Application Control Center if:

(1) The application was sent by registered or certified mail not later than January 5, 1976, as evidenced by the U.S. Postal Service postmark on the wrapper or envelope, or on the original receipt from the U.S. Postal Service; or

(2) The application is received on or before the closing date by either the Department of Health, Education, and Welfare, or the U.S. Office of Education mail room in Washington, D.C. In establishing the date of receipt, the Commissioner will rely on the time-date stamp of such mail rooms or other documentary evidence of receipt maintained by the Department of Health, Education, and Welfare, or the U.S. Office of Education.

B. *Hand delivered applications.* An application to be hand delivered must be taken to the U.S. Office of Education Application Control Center, Room 5673, Regional Office Building Three, 7th and D Streets SW., Washington, D.C. 20202. Hand delivered applications will be accepted daily between the hours of 8 a.m. and 4:00 p.m. Washington, D.C. time, except Saturdays, Sundays, or Federal holidays. Applications will not be accepted after 4:00 p.m. on the closing date.

C. *Program application information.* (1) Applications must be prepared and submitted in accordance with instructions and forms which may be obtained from the Division of Research and Demonstration, Bureau of Occupational and Adult Education, Office of Education, Room 5018, 7th and D Streets, SW., Washington, D.C.

(2) To be eligible for review by the Office of Education, an application from a local educational agency must be approved by the State board. In order to permit the consideration of an application for funding from a local educational agency by the Office of Education, the approval of the State board with respect to that application should be received by the Office of Education with the application by the deadline established above. In those instances where State Boards do not convene prior to the deadline date for receipt of applications, the applications must contain a statement indicating when the Board will convene to consider the application, and a statement indicating the date when the recommendation by the State Board may not be received by the Vocational Education Research program more than 50 calendar days after the closing date for receipt of applications. All applications from other than local educational agencies must be submitted in accordance with 45 CFR 103.13(a) of the program regulations (20 U.S.C. 1281(a)).

(3) *Duplication*—In order to assure that applications do not duplicate projects already undertaken in the State, the applicant shall (1) send a copy of the application to the State Director of Vocational Education, and (2) notify the Commissioner of Education of this action by attaching a copy of the letter that transmitted the application to the State Director of Vocational Education to each copy of the application transmitted to the Office of Education.

The State Director may advise the Commissioner of Education of applications considered to be a duplication of other projects in the State, within 30 days of receipt of the application. An application may only be considered to be a duplication of effort, if the objec-

V 40 N 217 NOV 10 75 XUM

tives, and procedures of the application are closely related to the objectives, and procedures of completed or on-going projects. A letter that indicates a dupli-cation of effort should document how the objectives, and procedures are so simi-lar that funding would not be warranted.

D. *Awards in States.* (1) Direct grants or contracts are awarded in each State up to the limit of funding available for the Commissioner of Education to use in that State as allotted under section 131 (a) of Part C of the Act. Subject to § 103.15 of the program regulations (45 CFR 103.15), the approximate allocations anticipated for initiating new grants during fiscal year 1976 are: Alabama $152,512; Alaska $10,980; Arizona $78,-402; Arkansas $82,978; California $639,-462; Colorado $92,797; Connecticut $83,-168; Delaware $17,559; Florida $261,020; Georgia $197,749; Hawaii $27,545; Idaho $32,985; Illinois $329,245; Indiana $195,-008; Iowa $104,779; Kansas $83,018; Kentucky $141,801; Louisiana $165,194; Maine $42,778; Maryland $132,450; Mas-sachusetts $183,292; Michigan $306,445; Minnesota $144,142; Mississippi $102,226; Missouri $171,348; Montana $29,874; Ne-braska $56,139; Nevada $16,079; New Hampshire $28,578; New Jersey $200,331; New Mexico $49,720; New York $492,477; North Carolina $227,868; North Dakota $28,092; Ohio $377,359; Oklahoma $107,-360; Oregon $82,079; Pennsylvania $405,-233; Rhode Island $34,132; South Caro-lina $124,163; South Dakota $30,142; Tennessee $172,182; Texas $470,504; Utah $52,288; Vermont $19,359; Virginia $188,492; Washington $122,030; West Virginia $74,215; Wisconsin $169,402; Wyoming $13,498; District of Columbia $20,673; American Samoa $1,169; Guam $3,738; Puerto Rico $117,652; Virgin Is-lands $2,462; Trust Territory $3,827.

(2) These projects should not exceed 18 months in duration.

E. *Authority.* The regulations appli-cable to this program include the U.S. Office of Education General Provisions Regulations (45 CFR Part 100a) and the regulations on Research and Training, Exemplary, and Curriculum Develop-ment Programs in Vocational Education (45 CFR Part 103), published in the FED-ERAL REGISTER on August 15, 1974 at 39 FR 29361 and the Additional Criteria for Selection of Applicants for Fiscal Year 1976 published in this issue of the FED-ERAL REGISTER.

(Catalog of Federal Domestic Assistance No. 13.498 Vocational Education—Research)

Dated: September 6, 1975.

T. H. BELL,
U.S. Commissioner of Education.

Health Resources Administration

NATIONAL ADVISORY PUBLIC HEALTH TRAINING COUNCIL

Meeting

In accordance with section 10(a)(2) of the Federal Advisory Committee Act (Pub. L. 92-463), announcement is made of the following National Advisory body scheduled to assemble during the month of November 1975:

Name: National Advisory Public Health Training Council.

Date and Time: November 24-25, 1975, 9:00 a.m.

Place: Conference Room 9, Building 31, National Institutes of Health, 9000 Rockville Pike, Bethesda, Maryland 20014.

Open for entire session.

Purpose: Advises the Secretary and the Administrator, Health Resources Ad-ministration on matters relating to De-partment programs and interests in sup-port training for professional public health personnel and related activities.

Agenda: Agenda items for the meet-ing will cover announcements, status of legislation, overview of programs, and consideration of program priorities.

The meeting is open to the public for observation and participation. Anyone wishing to obtain a roster, minutes of meeting, or other relevant information should contact Mr. Thomas D. Hatch, Building 31, Room 3C-02, 9000 Rockville Pike, Bethesda, Maryland 20014, Tele-phone (301) 496-6975.

Agenda items are subject to change as priorities dictate.

Dated: November 7, 1975.

JAMES A. WALSH,
Associate Administrator for Operations and Management.

Office of Education

STAFF MEMBERS OF ADVISORY COUNCILS

Compensation

Section 445(d)(3) of the General Edu-cation Provisions Act (GEPA) as amended, (20 U.S.C. 1233d(d)(3)), pre-scribes that the compensation of staff of the Presidential advisory councils (as de-fined in section 441 of GEPA; 20 U.S.C. 1233) subject to Part D of the GEPA shall be set in accordance with regulations promulgated by the Assistant Secretary for Education. The requirement of pub-lishing a proposed notice of rulemaking does not apply to personnel matters (5 U.S.C. 553(a)(2)), but a draft of this regulation was discussed with a repre-sentative of each of the affected groups and all participants were invited to sub-mit written comments within thirty (30) days. Two comments were received; one concurred with the draft and the other suggested that the regulations include provisions relating to termination of staff of these Presidential advisory councils. Staff termination was not included be-cause the requirement that the Assistant Secretary issue regulations concerns only compensation for the affected employees. (Sec. 445(d)(3) of the General Education Provisions Act as amended; (20 U.S.C. 1233d (d)(3)))

Dated: October 16, 1975.

VIRGINIA Y. TROTTER,
Assistant Secretary for Health, Education, and Welfare.

Approved: November 4, 1975.

DAVID MATHEWS,
Secretary of Health, Education, and Welfare.

COMPENSATION FOR STAFF MEMBERS OF ADVISORY COUNCILS

The compensation for employees of advisory councils, other than Executive Directors, who are appointed under 20 U.S.C. 1233d(a) and compensated pur-suant to 20 U.S.C. 1233d(d)(3), shall be determined on the same basis and under the same regulations and policies, in-cluding those relating to within-grade increases, as such compensation would be determined if the employees were being paid under the General Schedule; except that:

(a) A rate above the minimum rate of the appropriate level may be author-ized by the Chairperson or designee of the advisory council, for new appoint-ments, or for reappointments following a break in service of at least 90 days, from any prior Federal employment, other than under 5 U.S.C. 3109, upon written justification of the necessity for such higher rate to enable the advisory council to accomplish its purpose;

(b) In addition to the within-grade in-creases authorized for employees whose work is of an acceptable level of compe-tence, the Chairperson or designee of an advisory council may, within the limit of available appropriations, grant ad-ditional step increases in recognition of sustained high qualty performance (nor-mally of a six month period) above that ordinarily found among employees in the same or similar type of position, pro-vided that only one such additional step-increase may be granted to an employee within any 52-week period; and

(c) In order to avoid undue hardship or inequity in individual cases of meri-torious nature, the Chairperson or des-ignee of the advisory council may authorize in writing a waiver of the time-in-grade restrictions contained in Civil Service Regulations 300.601 and made applicable to staff members of advisory councils by these regulations.

(20 U.S.C. 1233d(d)(3))

[FR Doc.75-30124 Filed 11-7-75;8:45 am]

Office of the Assistant Secretary for Health

PHARMACEUTICAL REIMBURSEMENT ADVISORY COMMITTEE

Request for Nomination of Members

In the FEDERAL REGISTER of July 31, 1975 (40 FR 32284 et seq.), the Depart-ment of Health, Education, and Welfare published regulations entitled "Limita-tions on Payment or Reimbursement for Drugs" which were effective on that date.

Section 19.4 of the regulations calls for the establishment of a Pharmaceutical Reimbursement Advisory Committee in the Office of the Assistant Secretary for Health to advise the Pharmaceutical Reimbursement Board (to be composed of Department employees) on the appro-priateness of proposed Maximum Allow-able Cost determinations submitted by the Board and, upon request, to advise the Secretary and the Board on gen-eral policies and procedures of the De-partment in reimbursing or paying the cost of drugs used in Departmentally funded programs.

Pursuant to the Federal Advisory Committee Act of October 6, 1972 (Pub. L. 92-463, 86 Stat. 770-776 (5 U.S.C. App. I)), the Department of Health, Educa-tion, and Welfare, announces the estab-lishment by the Secretary, Department of Health, Education, and Welfare of the Pharmaceutical Reimbursement Advi-sory Committee on October 9, 1975.

The Assistant Secretary for Health requests nominations for membership on the Pharmaceutical Reimbursement Ad-visory Committee. The Committee will consist of 15 members not in the full time employ of the United States. Members shall be selected for terms of two years except that seven of the initial members shall serve for one year. Members will be selected to provide as full a range as pos-sible of knowledge, experience, and judg-ment in the areas of pharmacy, pharma-cology, medicine, pharmaceutical mar-keting, public health, and consumer af-fairs.

Any interested person may nominate one or more qualified persons for mem-bership. A complete curriculum vitae on the nominee shall be included. Nomina-tions shall state that the nominee is aware of the nomination and is willing to serve as a member of the Advisory Committee.

Nominations should be submitted to Dr. Mark Novitch, Office of Medical Af-fairs (HFM-1), Food and Drug Admin-istration, 5600 Fishers Lane, Rockville, Md., 20852 no later than December 10, 1975.

Date: November 5, 1975.

JAMES F. DICKSON,
Acting Assistant Secretary for Health.

NOCONA HILLS

Notice of Hearing

(Pursuant to 15 U.S.C. 1706(b) and 24 CFR 1720.155(b)).

Notice is hereby given that:

1. Lake Nocona Acres, Inc., Developer of Nocona Hills, its officers and agents, hereinafter referred to as "Respondent," being subject to the provisions of the In-terstate Land Sales Full Disclosure Act (Pub. Law 90-448) (15 U.S.C. 1701 et seq.), received a Notice of Suspension dated October 2, 1975, which was sent to the developer pursuant to 15 U.S.C. 1706 (b) and 24 CFR 1710.45(a) informing the developer that its amendment to the Statement of Record and Property Re-port submitted for Lake Nocona Acres, Inc., located in Montague County, Texas, was not effective pursuant to the Act, and the regulations contained in 24 CFR Part 1710 et seq.

2. The Respondent filed an answer dated October 17, 1975, in answer to the allegations of the Notice of Suspension dated October 2, 1975.

3. In said Answer the Respondent re-quested a hearing on the allegations contained in the Notice of Suspension.

4. Therefore, pursuant to the provi-sions of 15 U.S.C. 1706(b) and 24 CFR 1720.155(b), IT IS HEREBY ORDERED that a public hearing for the purpose of taking evidence on the questions set forth in the Notice of Suspension will be held before James W. Mast, Adminis-trative Law Judge, in Room 7146, De-partment of HUD Building, 451 7th Street, S.W., Washington, D.C., on No-vember 7, 1975, at 10 a.m.

5. The Respondent is HEREBY NOTI-FIED that failure to appear at the above scheduled hearing shall be deemed a de-fault and the suspension of the State-ment of Record, herein identified, shall continue until vacated by order of the Secrtary, pursuant to 24 CFR 1720.155.

This Notice shall be served upon the Respondent forthwith pursuant to 24 CFR 1720.440.

By the Secretary.

JAMES W. MAST,
Administrative Law Judge.

[Docket No. N-75-441]

STATUTORY AND REGULATORY EXEMP-TION FROM FULL DISCLOSURE

Guidelines; Correction

On October 8, 1975 (40 F.R. 47166), the Department published Guidelines for Statutory and Regulatory Exemptions from Full Disclosure. The following changes should be made to that docu-ment:

1. On page 47167, the second subpara-graph under paragraph II is corrected by changing the second sentence to read as follows:

The entire offering made pursuant to the common promotional plan must qualify for the exemption; otherwise, the exemption is not available for any of the lots; i.e., if a single lot in the subdivision is less than exactly five acres in size, none of the lots would qualify for this exemp-tion.

2. On page 47169, the third subpara-graph under REGULATORY EXEMP-TIONS paragraph I is corrected in the seventeenth line by changing the word "expressed" to "express".

3. On page 47170, the sixteenth line of the second column is corrected by changing the word "anyone" to "any one".

(Sec. 7(d), Department of Housing and Ur-ban Development Act, 79 Stat. 670 (42 U.S.C. 3535 (d), 1419, 82 Stat. 593), (15 U.S.C. 1718); Secretary's delegation of authority published at 37 FR 5071, March 9, 1972)

[Docket No. N–75–450]

Office of Interstate Land Sales Registration

RANCHOS DE PLACITAS

Hearing

In the matter of Ranchos de Placitas, OILSR No. 0–1827–36–87, Docket No. 75–211–IS. Pursuant to 15 U.S.C. 1706(d) and 24 CFR 1720.160(d).

Notice is hereby given that:

1. Equity Management Company, V. Karl Kortemeier, President and Director, its officers and agents, hereinafter referred to as "Respondent," being subject to the provisions of the Interstate Land Sales Full Disclosure Act (Pub. Law 90–448) (15 U.S.C. 1701 et seq.), received a Notice of Proceedings and Opportunity for Hearing issued September 23, 1975, which was sent to the developer pursuant to 15 U.S.C. 1701(d), 24 CFR 1710.45(b)(1) and 1720.125 informing the developer of information obtained by the Office of Interstate Land Sales Registration alleging that the Statement of Record and Property Report for Ranchos de Placitas, located in Sandoval County, New Mexico, contain untrue statements of material fact or omit to state material facts required to be stated therein or necessary to make the statements therein not misleading.

2. The Respondent filed an Answer received October 16, 1975, in response to the Notice of Proceedings and Opportunity for Hearing.

3. In said Answer the Respondent requested a hearing on the allegations contained in the Notice of Proceedings and Opportunity for Hearing.

4. Therefore, pursuant to the provisions of 5 U.S.C. 1706(d) and 24 CFR 1720.160(d), It Is Hereby Ordered that a public hearing for the purpose of taking evidence on the questions set forth in the Notice of Proceedings and Opportunity for Hearing will be held before Judge James W. Mast, in Room 7146, Department of HUD, 451 7th Street SW., Washington, D.C., on December 15, 1975, at 10:00 a.m.

The following time and procedure is applicable to such hearing: All affidavits and a list of all witnesses are requested to be filed with the Hearing Clerk, HUD Building, Room 10150, Washington, D.C., 20410 on or before December 1, 1975.

6. The Respondent is Hereby Notified that failure to appear at the above scheduled hearing shall be deemed a default and the proceedings shall be determined against Respondent, the allegations of which shall be deemed to be true, and an Order Suspending the Statement of Record, herein identified, shall be issued pursuant to 24 CFR 1710.45(b)(1).

This Notice shall be served upon the Respondent forthwith pursuant to 24 CFR 1720.440.

By the Secretary.

Dated: October 24, 1975.

JAMES W. MAST,
Administartive Law Judge.

Procedures for Consideration

Correction

In FR Doc. 75–28430 appearing at page 49383 in the issue for Wednesday, October 22, 1975, make the following changes:

1. On page 49386, the first column, the paragraph designated "(4)", the second line which currently reads "statement has expirted, prepare the final" should read: "statement is prepared, circulate it to Federal".

2. On page 49390, the middle column, the paragraph designated "5.", the fourth line which presently reads "environmental issues and take responsibility" should read "environmental statement for which the Coast".

Materials Transportation Bureau

Office of Hazardous Materials Operations

CALIFORNIA SEAL CONTROL CORP., ET AL.

Application for Exemptions or Renewals

In accordance with the procedures governing the application for, and the processing of, exemptions from the Department of Transportation's Hazardous Materials Regulations (49 CFR Part 107, Subpart B), notice is hereby given that the Office of Hazardous Materials Operations has received applications for exemptions and renewals of exemptions, that are described below. The modes of transportation requested are identified by a number in the "Nature of Application" portion of the table below as follows: 1—Motor Vehicle, 2—Rail Freight, 3—Cargo Vessel, 4—Cargo-only Aircraft, 5—Passenger-carrying Aircraft.

Complete copies of the applications are available for inspection and copying at the Public Docket Room, Office of Hazardous Materials Operations, Department of Transportation, Room 6213, Trans Point Building, 2100 Second Street SW., Washington, D.C.

Interested persons are invited to submit views or comments with respect to any one or more of the applications. Comments should refer to the application number and be submitted in duplicate to the Docket Section, Office of Hazardous Materials Operations, Department of Transportation, Washington, D.C. 20590. All comments received before the close of business on the specified comment closing date will be considered and will be available in the docket for inspection and copying, both before and after the closing date.

New exemptions

Application No.	Applicant	Regulation(s) affected—sections	Nature of application
75–1	California Seal Control Corp., San Pedro, Calif.	173.51 and 173.91.	To allow the classification of Seal Control products as class C explosives and to be transported in cell-type packages using DOT specification 12–B fiberboard boxes. (mode 1)
75–2	Brunswick Corp., Lincoln, Nebr.	173.302.	To allow transportation of compressed air in non-DOT specification fiberglass reinforced plastic containers. (modes 1, 2, 3)
75–3	Monsanto Co., St. Louis, Mo.	173.300.	To allow transportation of flammable compressed gas, n.o.s., in 16-oz glass bottles cushioned in packing foam and further overpacked in schedule 40 pipe and a strong wood box. (mode 1)
75–4	Unitek Corp., Monrovia, Calif.	173.286.	To allow the transportation of orthodontic direct bonding kits containing flammable liquids, and a corrosive, in plastic kits further overpacked in a plastic box, a sealed plastic bag, cushioned with absorbent material packed 8 to a corrugated box (modes 1, 2, 3, 4, 5)
75–5	Owens-Illinois, Toledo, Ohio.	173.136.	To allow the transportation of methyltriethoxilane, a flammable liquid, in DOT specification 57 portable tanks. (mode 1)
75–6	Waters Instruments, Inc., Rochester, Minn.	14 CFR, 103.31.	To allow the transportation of the MOX–107TM kidney transport module, containing a cylinder charged to 1800 psi with 85 percent oxygen and 15 percent carbon dioxide, in the passenger compartment of passenger-carrying aircraft. (mode 5)
75–7	Waste Research and Reclamation Co., Inc., Eau Claire, Wis.	173.28.	To allow the reuse of DOT specification 17E drums for the transportation of spent flammable liquids without reconditioning. (mode 1)
75–8	Matheson Gas Products, Lyndburst, N.J.	173.315.	To allow the use of a cargo tank, previously in liquid oxygen service, modified to transport liquid ethylene. (mode 1)
75–9	Carborundum Plastics, Inc., Avondale, Pa.	173.252 and 173.253.	To allow the transportation of elemental bromine, a corrosive liquid, in "Kynar" lined, 150-gallon steel tote tanks. (mode 1)

The comment period closing date for the above applications for new exemptions is December 10, 1975.

Renewals

Application No.	Applicant	Regulation(s) affected—sections	Nature of application
75–10	Stauffer Chemical Co., Westport, Conn.	173.154 and 178.118–10.	To reinstate SP 3766 and to allow the shipment of titanium trichloride in foreign drums, patterned after DOT specification 17H. (mode 1)
75–11	Varian, Palo Alto, Calif.	173.398.	To reinstate SP 6655 and to allow the shipment of an electron linear accelerator containing not more than a type A quantity of radioactive material. (mode 1)
75–12	Atlas Powder Co., Dallas, Tex.	173.239.	To reinstate SP 6917 and to allow the shipment of barium azide in DOT specification 21C fiber drum and inside glass bottles not over 1 lb capacity. (modes 1, 2)
75–13	FMC Corp., Philadelphia, Pa.	173.223 and 178.35a-2.	To renew SP 2650 and to allow transportation of peracetic acid in DOT specification 6D or 37M cylinder overpack with inside DOT 28L polyethylene containers. (modes 1, 2)
75–14	Do.	171.6 and 173.365 and 46 CFR 146.25–200.	To reinstate SP 5876 and to allow transportation of a class B poison solid in DOT specification 44D multiwall paper bags not over 50 pounds net weight. (modes 1, 2, 3)
75–15	E. F. Houghton and Co., Philadelphia, Pa.	173.224 and 46 CFR 146.22–200.	To reinstate SP 5954 and to allow the transportation of sodium nitrite mixtures in valeron cross-plastic polyethylene bags. (mode 1, 2, 3)
75–16	Foote Mineral Co., Exton, Pa.	173.206.	To renew SP 6682 and to allow the transportation of lithium metal foil in tin-coated steel cans, overpacked 4 to a DOT specification 21C fiber drum. (modes 1, 2)
75–17	Pennwalt Corp., Luciddol Div., Buffalo, N.Y.	173.154 and 173.158 and 178.205–16.	To renew SP 6122 and to allow the transportation of certain peroxides in specially designed DOT specification 12B fiberboard boxes. (modes 1, 2)

The comment period closing date for the above renewal applications is November 28, 1975.

J. R. GROTHE,

Office of the Secretary

[Docket No. 40]

INTERAGENCY TASK FORCE ON MOTOR VEHICLE GOALS BEYOND 1980

Request for Information and Public Comment

On March 21, 1975, Secretary Rogers Morton, Chairman of the Energy Resources Council, requested that the Secretary of Transportation lead a Federal Interagency Task Force to examine long-range energy goals of the motor vehicle fleet, compatible with environmental, safety and economic objectives. The members of the Task Force include representatives from Department of Transportation (DOT), Federal Energy Administration (FEA), Environmental Protection Agency (EPA), Energy Research and Development Administration (ERDA), National Science Foundation (NSF), and other agencies of the Federal Government.

As a means of accomplishing this study, panels have been convened to review data around specific areas relating to motor vehicles. The output of the panels will contribute to a comparative analysis of a number of competing considerations for reduced vehicle emissions and noise and enhanced safety and fuel economy. For each design, there will be a definition of strategies for implementing rational policies with respect to motor vehicles. The report will describe the merits and demerits of the design alternatives. The period of time being considered is model year 1981 through the following decade. The panels have considered the subjects of:

1. Automotive Design.
2. Automotive Manufacturing and Maintenance.
3. Marketing and Mobility.
4. Safety.
5. Fuels and Materials Resources.
6. Air Quality, Noise and Health.
7. National/Industry/Consumer Economics.
8. Alternative Implementation Strategies.

The purpose of this notice is to solicit advice contributing to the improvement of the panel reports which comprise the data base for the Interagency Task Force Study. The information and advice received by this solicitation will contribute to the final data for panel reports and the Task Force Report to be submitted to the Energy Resources Council on December 31, 1975. All comments received before December 1, 1975, will be given full consideration. Comments received after that date will be considered to the extent practicable.

This notice announces the availability for public review and criticism of limited numbers of draft copies of panel reports. Copies are available for inspection during normal working hours (9:00 a.m.–5:30 p.m.), except legal holidays, in the Department of Transportation, Office of the Assistant General Counsel for Regulation, Room 10424E, 400 Seventh Street, S.W., Washington, D.C. 20590, telephone (202) 426–4723. Requests for copies will be honored in accordance with provisions of the Freedom of Information Act and the regulations and fee schedules, thereunder.

HAMILTON HERMAN,
Assistant Secretary for Systems Development and Technology.

[Docket 25280; Agreement C.A.B. 25476 R–1 and R–2; Order 75–10–100]

INTERNATIONAL AIR TRANSPORT ASSOCIATION

Order Relating to Specific Commodity Rates

Correction

In FR Doc. 75–29329 appearing on page 50742 in the issue for Friday, October 31, 1975, make the following changes:

1. The second paragraph, the sixth line should be deleted and replaced with "foreign air carriers, and other carriers".

2. In the Table, the left column, the entry which reads "254/6" should read "25476".

[Order 75–11–13; Docket 28402]

AIR JAMAICA (1968) LTD.

Order Dismissing Complaint

Adopted by the Civil Aeronautics Board at its office in Washington, D.C. on the 5th day of November, 1975.

By a tariff filing dated October 1, 1975, Air Jamaica (1968) Limited (Air Jamaica) proposes round-trip Group Inclusive Tour (GIT) fares at discounts ranging from approximately 40 to 58 percent off applicable round-trip economy fares, effective November 5, 1975, between points in the U.S. and Kingston/Montego Bay, Jamaica and Nassau, Bahamas. The fares, set at levels higher for peak-season and week-end travel than for off-peak-season and midweek travel, would be subject to a 3/14-day minimum/maximum stay period; permit no stopovers; and involve varying minimum group sizes.[1] The fares are subject to purchase of a minimum of $39 in ground arrangements; require that the group travel together on each portion of the journey; and specify that application, accompanied with a 10 percent nonrefundable deposit,[2] and full payment be made no later than 15 days prior to departure.[3]

Eastern Air Lines, Inc. (Eastern) has filed a complaint requesting that the fares be suspended pending investigation, on grounds that they are unreasonably low since in a number of cases they undercut the normal one-way economy fare to Jamaica, and that Air Jamaica has not justified the reasonableness of the discount.

In answer, Air Jamaica maintains that the purpose of its GIT filing is to enable it to compete with One-stop inclusive Tour Charters (OTC) filed from U.S. points to Jamaica. Air Jamaica contends that Eastern has likewise filed low-fare tariffs with the Board in an effort to compete with OTC filings in Eastern's

[1] Groups of 75 or more to/from New York, 50 to/from Chicago and Philadelphia and 40 to/from Detroit.

[2] However, full refund will be made if cancellation results from death or illness, supported by a medical certificate, of a passenger or a member of his immediate family.

[3] John M. Sampson, Agent, Tariff C.A.B. No. 15, 48th Revised Page 274D and Rule No. 96-B, 1st Revised Page 80–B.

V 40 217 NOV 10 75 XUM

U.S.-Puerto Rican/Virgin Island market; that Eastern presently offers low-priced "no frills" fares in other markets; that these fares offer substantial reductions from the normal fares; and that the markets in which Eastern's fares are offered compete with Air Jamaica's markets as vacation destinations. Finally, Air Jamaica alleges that its GIT fares are not unduly low since their use is tied to large groups, ranging from 40 to 75 persons, and are subject to other conditions which will limit diversion.

Upon consideration of the complaint, Air Jamaica's response and all relevant factors, the Board has concluded to dismiss Eastern's complaint.

Contrary to Eastern's contentions, the proposed GIT fares would not, in our opinion, cause significant diversion from normal one-way fare travel. While the GIT fare itself is proposed at a level below the one-way normal economy fare in certain instances,[4] the required purchase of ground accommodations ($39) brings the total cost to the passenger above the one-way normal economy fare in every market. Therefore, there is no incentive to the one-way traveler to use the GIT fare in lieu of the normal economy fare and throw away the unused portion. Further, the large minimum group sizes and the stipulation that the group travel together throughout the trip should also significantly minimize any diversionary impact.

Finally, the yield to the carrier from the proposed GIT fares compares favorably with that derived from comparable as well as less restrictive fares available in Caribbean/Mexican-United States markets. For example, the average 5.65 cents per seat-mile yield of the proposed New York-Kingston GIT fare is 1.26 cents above that of the presently effective New York-Curacao GIT fare for minimum groups of 40, and is slightly higher than the average yield from the less restrictive New York-Curacao GIT fare for minimum groups of 10. It is also higher than that derived from the IATA-agreed New York-Mexico affinity fare for groups of 40.

Accordingly, pursuant to the Federal Aviation Act of 1958 and particularly sections 204(a) and 1002 thereof.

It is ordered, That: The complaint of Eastern Air Lines, Inc. in Docket 28402 be and hereby is dismissed.

This order will be published in the FEDERAL REGISTER.

By the Civil Aeronautics Board:

[SEAL] EDWIN Z. HOLLAND,
Secretary.

[FR Doc.75-30180 Filed 11-7-75;8:45 am]

[4] This is primarily limited to the midweek off-peak season. However, at Detroit the fares are proposed at levels below the one-way normal economy fare in the midweek peak and weekend off-peak seasons, as well as in the midweek off-peak season.

[Order 75-9-30; *Docket 28297]

AERONAVES DE MEXICO, S.A.

Order of Investigation and Suspension; Correction

Adopted by the Civil Aeronautics Board at its office in Washington, D.C. on the 28th day of August, 1975. U.S.-Mexico passenger fares proposed by: AERONAVES DE MEXICO, S.A.

On Page 3 correct paragraph 6 to read as follows:

6. Except to the extent granted herein, the complaints of Pan American World Airways, Inc., Eastern Air Lines, Inc., American Airlines, Inc., and Braniff Airways, Inc., in Dockets 28142, 28189, 28190, and 28197, respectively, be and hereby are dismissed.

By the Civil Aeronautics Board:

Dated: November 3, 1975.

[SEAL] EDWIN Z. HOLLAND,
Secretary.

[FR Doc.75-30182 Filed 11-7-75;8:45 am]

[Order 75-11-15; Docket 28378]

KODIAK-WESTERN ALASKA AIRLINES, INC.

Order To Show Cause

Adopted by the Civil Aeronautics Board at its office in Washington, D.C. on the 5th day of November, 1975.

On October 7, 1975, Kodiak-Western Alaska Airlines, Inc. (KWAA) filed a motion for leave to file an otherwise unauthorized document, accompanied by a petition requesting the Board to establish, pursuant to Section 406 of the Federal Aviation Act of 1958, as amended, a fuel surcharge applicable to mail transported by KWAA in its intra-Alaska service. KWAA does not desire to institute proceedings leading to a general reexamination of its service mail rates but only requests that a fuel surcharge be added to its present service mail rates.[1] The carrier's petition describes the substantial increases in fuel prices which have occurred since final service mail rates were established, based on fiscal year 1969 cost data, and seeks the establishment of a fuel surcharge based on fiscal year 1975 fuel costs. By answer filed October 17, 1975, the U.S. Postal Service indicates its support for the relief requested by KWAA and this action serves to open the carrier's rate.

In support of its petition, KWAA states that in the intervening six years since fiscal year 1969, the base year used in determining its current rate, fuel costs per revenue ton-mile have increased more than 34 percent and no relief from this increased fuel cost burden has been granted. Its wholly intra-Alaska system rates were not affected by the temporary fuel surcharge instituted for domestic service mail rates.[2] Based on the carrier's computations, this results in an increase of 18 cents per great-circle mail ton-mile.

Our review with the data submitted with KWAA's petition indicates that, consistent with the relief granted to Alaska Airlines, Inc.,[3] and Reeve Aleutian Airways, Inc.,[4] it is appropriate to base a fuel surcharge for KWAA on the percentage increase in fuel costs per great-circle mail ton-mile for fiscal year 1975 over those for the fiscal year 1969 base period. In our opinion, the fuel surcharge resulting from this computation is fair and reasonable and will not result in an overpayment to the carrier for the carriage of mail.

On the basis of the foregoing, the Board tentatively finds and concludes that:

1. The fair and reasonable final rate of compensation to be paid by the Postmaster General to Kodiak-Western Alaska Airlines, Inc., for the transportation of mail by aircraft over its entire system, the facilities used and useful therefor, and the services connected therewith, on and after October 17, 1975,[5] is a service mail rate consisting of the following:

(a) *Terminal charges* of 7.5 cents per pound for the first 400,000 originating mail pounds per year, of 5 cents per pound for the second 400,000 originating mail pounds per year, and of 2.5 cents per pound for any mail pounds in excess of 800,000 pounds originating during the year.

(b) *Line-haul charges* of $4.18 per ton-mile for the first 20,000 mail ton-miles per year, and of $2.18 per ton-mile for the additional mail ton-miles in excess of 20,000 ton-miles per year.

(c) The foregoing charges would be made payable to Kodiak-Western Alaska by 28-day postal accounting periods in accordance with the following formula:

PAYMENT FORMULA PER 28-D POSTAL ACCOUNTING PERIOD

	Unit rate
Terminal charges:	
1st 30,800 lb originated...cents...	7.5
2d 30,800 lb originated... do ...	5.0
All other lbs originated... do ...	2.5
Line-haul charges:	
1st 1,540 ton-miles...	$4.18
All other ton-miles...	2.18

2. The mail ton-miles used in computing the service mail payments at the

[1] Published at 40FR(42770) September 16, 1975.

[1] These rates were established by Order 73-2-6, February 1, 1973.

[2] Priority and Nonpriority Domestic Service Mail Rates—Phase 2, Order 74-10-94, October 18, 1974.

[3] Orders 75-5-63, May 16, 1975, and 75-6-7, June 3, 1975.

[4] Orders 75-4-34, April 8, 1975, and 75-4-115, April 24, 1975.

[5] The date the U.S. Postal Service filed its Answer in support of KWAA's petition. See Order 75-4-34, April 8, 1975.

foregoing rates shall be based upon the great-circle airport-to-airport mileage between points served for the carriage of mail.

3. The final service mail rate here fixed and determined is to be paid in its entirety by the Postmaster General.

Accordingly, pursuant to the Federal Aviation Act of 1958, and particularly sections 204(a) and 406 thereof and the Board's procedural Regulations, 14 CFR, Part 302,

It is ordered, That: 1. All interested persons, and particularly Kodiak-Western Alaska Airlines, Inc. and the Postmaster General, are directed to show cause why the Board should not amend Order 73-2-6, February 1, 1973, so as to adopt the foregoing proposed findings and conclusions effective on and after October 17, 1975, subject to the terms and conditions as set forth in Order 73-2-6;

2. Further procedures shall be in accordance with the Rules of Practice, 14 CFR, Part 302, and if there is any objection to the rates and charges or to the related findings and conclusions proposed herein, notice thereof shall be filed within 10 days, and if notice is filed, written answer and supporting documents shall be filed within 30 days after the date of service of this order;

3. If notice of objection is not filed within 10 days, or if notice is filed and answer is not filed within 30 days after service of this order, or if an answer timely filed raises no material issue of fact, all persons shall be deemed to have waived the right to a hearing and all other procedural steps short of an order fixing final service mail rates and the Board may enter an order incorporating the findings and conclusions proposed herein and fix and determine the rates herein specified;

4. If notice of objection and answer are filed presenting issues for hearing, issues going to the establishment of the fair and reasonable rates herein shall be limited to those specifically raised by such answers except as otherwise provided in 14 CFR, Section 302.307; and

5. This order shall be served upon Kodiak-Western Alaska Airlines, Inc. and the Postmaster General.

This order will be published in the FEDERAL REGISTER.

By the Civil Aeronautics Board:

[SEAL] EDWIN Z. HOLLAND,
Secretary.

Appendix

Service mail rates for Kodiak-Western Alaska Airlines, Inc.

COMMISSION ON FEDERAL PAPERWORK

PUBLIC MEETINGS

Pursuant to Public Law No. 92-463, notice is hereby given of the following field meetings of the Commission on Federal Paperwork.

Congressman Frank Horton will conduct the first national public meeting in Boston, Massachusetts on November 21, 1975 at the John F. Kennedy Federal Building, Suite E-226 (Executive Dining Room). The meeting will commence at 9:00 a.m. and continue until 12:30 p.m. An afternoon session will reconvene at 2:00 p.m.

Participating in the Boston meeting will be representatives from labor, small manufacturers, insurance, and higher education. These individuals will be addressing the areas in which they have or are experiencing a paperwork burden, as well as their recommendations for minimizing the amount of paperwork demanded by Federal, State, and local reporting requirements.

The second national meeting has been scheduled in San Francisco, California on November 25, 1975. It will be held in the GSA Federal Building, 525 Market Street, in the Arizona Room on the 28th Floor. The meeting will commence at 9:00 a.m. and continue until 12:30 p.m. The afternoon session will reconvene at 2:00 p.m.

Representatives from small business, public works, financial institutions, labor, and the medical profession will be addressing the various areas in which they are burdened by Federal, State, and local reporting requirements.

V 40 N 217 NOV 10 75 XUM

Testimony presented at these meetings will be used by the Commission on Federal Paperwork in making recommendations to the Congress and the President on changes which would ease the burden of the paperwork load.

The Commission on Federal Paperwork is located at 111 20th Street, N.W., Suite 200, Washington, D.C. 20036. The telephone number is (202) 254–6920.

HASSELL B. BELL,
Director.

COMMISSION OF FINE ARTS

PRIVACY ACT OF 1974

Notice of Systems of Records

On October 2, 1975, in accordance with section 3 of the Privacy Act of 1974 (5 U.S.C. 552a(e)), a proposed notice of records maintained by the Commission of Fine Arts was published in the FEDERAL REGISTER (40 FR 45740). Interested persons were invited to comment on the notice before October 30, 1975. No comments were received.

The proposed system of records is hereby adopted with the following additions:

System CFA–2: Categories of records in the system is amended to read: "These records may contain employee time and attendance records; annual and sick leave records; personnel grievances; EEO discrimination complaints; Privacy Act implementation records; and other personnel administrative records which are not part of the personnel data maintained by the Civil Service Commisson."

Retrievability is amended to read: "Records are arranged alphabetically by last name under the subheadings Time and Attendance Records; Annual and Sick Leave Records; Personnel Grievances; EEO Discrimination Complaint Records; Privacy Act Implementation Records; and, in all other cases, on the left side of the employee's Official Personnel Folder, also maintained alphebetically by last name in the office safe."

There are no other amendments and the proposed systems of records maintained by the Commission of Fine Arts under the Privacy Act of 1974 are hereby effective as set forth below.

Signed in Washington, D.C. on October 31. 1975 by:

CHARLES H. ATHERTON,
Secretary,
Commission of Fine Arts.

ENVIRONMENTAL PROTECTION AGENCY

[FRL 454–5; (OPP–180056)]

COLORADO DEPARTMENT OF AGRICULTURE

Crisis Exemption Using Carbaryl To Control Fleas Transmitting Bubonic Plague

Pursuant to the provisions of section 18 of the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA), as amended (86 Stat. 973; 7 U.S.C. 136), the Environmental Protection Agency (EPA) hereby gives notice that the Colorado Department of Agriculture (hereafter referred to as "Colorado") has availed itself of a crisis exemption. Colorado used the pesticide carbaryl to control fleas on rodents, specifically ground squirrels (*Spermophilus* spp.), wood ("pack") rats (*Neotoma* spp.), gophers (*Geomys; Thomomys* spp.), and deerfooted mice (*Peromyscus* spp.). It was determined that the fleas were the cause of a human death from bubonic plague; the flea genera constituting the major plague vectors are: *Diamanus, Foxella, Hoplopsyllus, Monopsyllus, Opisocrostis,* and *Orchopeas.* The location of the rodent-flea population was near the town of Wetmore in Custer County. This exemption is in accordance with, and is subject to, the provisions of § 166.2, 166.8, and 166.9 of 40 CFR Part 166. These regulations concerning the exemption of Federal and State agencies for the use of pesticides under emergency conditions were published in the FEDERAL REGISTER on December 3, 1973 (38 FR 33303). As required, Colorado has submitted in writing the following certified information.

During the latter part of September, 1975, the State of Colorado recorded one human death due to bubonic plague in a small community in Custer County. Plague would appear to be endemic in certain small areas of Colorado; therefore, the situation is carefully watched by the State health department. However, as a result of the human death, it was felt that an immediate rodent dusting program for flea control should be initiated.

Although there is a product registered for this particular use, the product appeared to be unavailable in the time frame required; the registered product also contained carbaryl as the active ingredient. Due to the human death and the high population of fleas on the rodents, there was no time to request either a specific or quarantine-public health exemption.

The rodent-flea population was located near the town of Wetmore in Custer County. Rodent burrows in and near the town were treated, as well as a 6 to 7 mile area up a small valley by Hardes Crabbie Creek. Approximately 250 pounds of 5% carbaryl dust was applied by hand and power dusters. The program was started on October 3, and concluded on October 5, 1975. Personnel were under the direct supervision of the State Sanitarian with the Vector Control Unit; a representative of the Communicable Disease Center from Fort Collins, Colorado, also assisted in the program.

Efforts were made to inform all personnel on the site of the potential adverse effects that could result from misuse of the pesticide. Only confined areas, for example, under houses, and burrows were treated; no broadcast treatments were made. Special efforts were made to keep the material as far away from any water source as possible, while still treating the burrows close to the creek. No problems were encountered during the program and none are anticipated.

The official file concerning this exemption is available for inspection in the Registration Division (WH–567), Office of Pesticide Programs, EPA, Room E–315, 401 M St., S.W., Washington, D.C. 20460.

Dated: November 4, 1975.

JOHN B. RITCH, Jr.,
Director,
Registration Division.

[FR Doc.75–30219 Filed 11–7–75;8:45 am]

[FRL 454–7; OPP–33000/334]

NOTICE OF RECEIPT OF APPLICATIONS FOR PESTICIDE REGISTRATION

Data To Be Considered in Support of Applications

On November 19, 1973, the Environmental Protection Agency (EPA) published in its interim policy with respect to the administration of Section 3(c)(1)(d) of the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA), as amended. This policy provides that EPA will, upon receipt of every application for registration, publish in the FEDERAL REGISTER a notice containing the information shown below. The labeling furnished by each applicant will be available for examination at the Environmental Protection Agency, Room EB–31, East Tower, 401 M Street, SW., Washington, DC 20460.

On or before January 9, 1976, any person who (a) is or has been an applicant, (b) believes that data he developed and submitted to EPA on or after October 21, 1972, is being used to support an application described in this notice, (c) desires to assert a claim for compensation under Section 3(c)(1)(D) for such use of his data, and (d) wishes to preserve his right to have the Administrator determine the amount of reasonable compensation to which he is entitled for such use of the data, must notify the Administrator and the applicant named in the notice in the FEDERAL REGISTER of his claim by certified mail. Notification to the Administrator should be addressed to the Information Coordination Section, Technical Services Division (WH–569), Office of Pesticide Programs, 401 M Street, SW., Washington, DC 20460. Every such claimant must include, at a minimum, the information listed in the interim policy of November 19, 1973.

Applications submitted under 2(a) or 2(b) of the interim policy will be processed to completion in accordance with existing procedures. Applications submitted under 2(c) of the interim policy cannot be made final until the 60 day period has expired. If no claims are received within the 60 day period, the 2(c) application will be processed according to normal procedure. However, if claims are received within the 60 day period, the applicants against whom the claims are asserted will be advised of the alternatives available under the Act. No claims will be accepted for possible EPA adjudication which are received after January 9, 1976.

Dated: November 3, 1975.

JOHN B. RITCH, Jr.,
Director,
Registration Division.

[FRL 456–6; OPP–42005]

STATE OF WYOMING

Submission of State Plan for Certification of Pesticide Applicators

In accordance with the provisions of section 4(a)(2) of the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA), as amended (86 Stat. 973; 7 U.S.C. 136) and 40 CFR Part 171, the Honorable Ed Herschler, Governor of the State of Wyoming, has submitted a State Plan for Certification of Commercial and Private Applicators of Restricted Use Pesticides to the Environmental Protection Agency (EPA) for approval on a contingency basis. Contingency approval is being requested pending promulgation of the content of regulations implementing existing legislation. Copies of the proposed implementing regulations are attached to the plan.

Notice is hereby given of the intention of the Regional Administrator, EPA Region VIII, to approve this plan on a contingency basis.

A summary of this plan follows. The entire plan, together with all attached appendices (except for examinations withheld at the State's request for reasons of confidentiality), may be examined during normal business hours at the following locations:

2219 Carey Avenue, Cheyenne, WY 82002 (Pesticides Section, Division of Plant Industry, Wyoming Department of Agriculture, tel. (307) 777–7321).

Room 6049, 1860 Lincoln Street, Denver, CO 80203 (Pesticides Branch, Air & Hazardous Materials Division, EPA Region VIII, tel. (303) 837–3926).

Room 401, East Tower, Waterside Mall, 401 M Street, S.W., Washington, D.C. 20460 (Federal Register Section, Technical Services Division (WH–569), Office of Pesticide Programs, EPA, tel. (202) 755–4854).

SUMMARY OF STATE PLAN

The Wyoming Department of Agriculture has been designated as the State lead agency for the administration of the pesticide applicator certification program, with the Division of Plant Industry responsible for the program's implementation and coordination.

Cooperating agencies include the Wyoming Agricultural Extension Service and the University of Wyoming. The Extension Service is responsible for conducting the applicator certification training courses, preparation of examinations, and development and distribution of the pesticide training manuals. The University of Wyoming staff is available for technical assistance. The Wyoming Chemical and Bacteriology Laboratory at the University of Wyoming will make analyses and examinations of pesticides.

The Wyoming Board of Certification prepared the proposed rules and regulations for the State certification of applicators of restricted use pesticides.

Legal authority for the program is contained in the Wyoming Environmental Pesticide Control Act of 1973 (WEPCA) §§ 35–262.1 through 35–262.23, inclusive, Wyoming Statutes 1957, as inclusive), and the proposed Applicator Certification Rules and Regulations (Chapter XXVIII).

The plan indicates that the State lead agency and cooperating agencies have sufficient qualified personnel and funds necessary to carry out the proposed program. The funding in support of this program for the fiscal year 1976 is $122,327. In addition, EPA has granted $7,812 to the Wyoming Cooperative Extension Service and $10,000 to the Wyoming

V 40 217 NOV 10 75 XUM

Vocation-Education Program for pesticide training.

Wyoming estimates that 466 commercial and 4,169 private applicators will need to be certified. The licenses to be issued to the applicators will indicate the type of certification and other limitations, name and address of the applicator, license number, and date of expiration. Applicators will be required to present their certification credentials to the dealer when they purchase a restricted use pesticide.

The Wyoming Department of Agriculture will submit an annual report to EPA on January 31 of each year, and special reports as required.

The commercial applicator categories proposed in the plan are those which are listed in 40 CFR 171.3. No new categories are proposed. New subcategories proposed are as follows:

(1) Agricultural Pest Control.
(a) Plant.
(i) Weed.
(ii) Insect.
(iii) Disease.
(b) Animal.
(3) Ornamental and Turf Pest Control.
(a) Weed.
(b) Insect.
(c) Disease.
(9) Regulatory.
(a) Predator Control.

The Agricultural Extension Service conducted a pesticides short course at six different locations in the State in January and February 1975. This course, based upon the general standards and anticipated needs by specific categories, as described in 40 CFR 171.4 and 171.6, was directed at commercial applicators, although several private applicators attended. An examination was held at the conclusion of the course. This course will be repeated in the fall or winter of 1975 at a central location. The State of Wyoming requests that persons passing the tests be accepted as certified by EPA without further examination.

The Extension Service will provide a series of short pesticides courses for private applicators, based upon the standards in 40 CFR 171.5 and 171.6. The course will be followed by a written examination based upon the standards, which will be given to any private applicator, regardless of whether he has or has not participated in the training. Two types of certification will be offered: general certification and crop specific/commodity/site certification.

The Single Purchase/Single Use Certification will be offered as an interim measure (and on an emergency basis, only after October 1978) to private applicators. The Agricultural Field Representative or his official designee (a public employee knowledgeable in the field of pesticides) will give a written or oral questionnaire to the applicant. In the future, if enabling legislation is enacted for the regulation of dealers, the questionnaire will be offered by registered, regulated pesticide dealers.

In the case where a person, at the time of testing for certification is unable to read a label, the issuing authority will administer the private applicator examination orally.

The State of Wyoming has presented its State plan to the Governing Body of the Wind River Indian Reservation for study; any cooperative agreements which may be made will be forwarded to EPA.

A statement concerning the Government Agency Plan (GAP) will be forwarded within 60 days after the approval of GAP by EPA.

Other Wyoming regulatory activities and authorities are registration, experimental use permits, cancellation, suspension, refusal to register, equipment inspection, disposal, storage, and enforcement.

Enforcement of the Wyoming certification program will be carried out by the Agricultural Field Representatives, and 2.9 man years will be devoted to monitoring and enforcement. A regular program of inspection and sampling products, and spot checking of operating applicators, will be conducted.

Commercial applicators will be required to attend at least one refresher training course every three years or else be reexamined. Private applicators will be required to attend at least one refresher training course every five years or be reexamined.

PUBLIC COMMENTS

Interested persons are invited to submit written comments on the proposed State plan for the State of Wyoming to the Chief, Pesticides Branch, Region VIII, Environmental Protection Agency, Room 6049, 1860 Lincoln Street, Denver, Colorado 80203. The comments must be received on or before December 10, 1975 and should bear the identifying notation OPP-42005. All written comments filed pursuant to this notice will be available for public inspection at the above mentioned locations from 8:30 a.m. to 3.30 p.m. Monday through Friday.

Dated: October 5, 1975.

JOHN A. GREEN,
Regional Administrator,
Region VIII.

FEDERAL MARITIME COMMISSION

TRANS-PACIFIC PASSENGER CONFERENCE

Agreement Filed

Notice is hereby given that the following agreement has been filed with the Commission for approval pursuant to Section 15 of the Shipping Act, 1916, as amended (39 Stat. 733, 75 Stat. 763, 46 U.S.C. 814).

Interested parties may inspect and obtain a copy of the agreement at the Washington office of the Federal Maritime Commission, 1100 L Street, N.W., Room 10126; or may inspect the agreement at the field Offices located at New York, N.Y., New Orleans, Louisiana, San Francisco, California, and San Juan, Puerto Rico. Comments on such agreements, including requests for hearing, may be submitted to the Secretary, Federal Maritime Commission, Washington, D.C., 20573, on or before November 20, 1975. Any person desiring a hearing on the proposed agreement shall provide a clear and concise statement of the matters upon which they desire to adduce evidence. An allegation of discrimination or unfairness shall be accompanied by a statement describing the discrimination or unfairness with particularity. If a violation of the Act or detriment to the Commerce of the United States is alleged, the statement shall set forth with particularity the acts and circumstances said to constitute such violation or detriment to commerce.

A copy of any such statement should also be forwarded to the party filing the agreement (as indicated hereinafter) and the statement should indicate that this has been done.

Notice of agreement filed for approval by:

Thomas E. Kimball, Esq., Lillick McHose & Charles, 2 Embarcadero Center, San Francisco, California 94111.

Agreement No. 131-264 is an amendment of the Trans-Pacific Passenger Conference Agreement to change its name to "Pacific Cruise Conference". All references to the name of the organization in Agreement No. 131, and the rules and regulations thereunder, shall be changed as appropriate.

By Order of the Federal Maritime Commission

Dated: November 5, 1975.

FRANCIS C. HURNEY,
Secretary.

FEDERAL POWER COMMISSION

[Docket No. CS76-144, et al.]

HAROLD C. LIDDELL, ET AL.

Notice of Applications for "Small Producer" Certificates[1]

OCTOBER 28, 1975.

Take notice that each of the Applicants listed herein has filed an application pursuant to section 7(c) of the Natural Gas Act and § 157.40 of the Regulations thereunder for a "small producer" certificate of public convenience and necessity authorizing the sale for resale and delivery of natural gas in interstate commerce, all as more fully set forth in the applications which are on file with the Commission and open to public inspection.

Any person desiring to be heard or to make any protest with reference to said applications should on or before November 19, 1975, file with the Federal Power Commission, Washington, D.C. 20426, petitions to intervene or protests in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 1.8 or 1.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Persons wishing to become parties to a proceeding or to participate as a party in any hearing therein must file petitions to intervene in accordance with the Commission's Rules.

Take further notice that, pursuant to the authority contained in and subject to the jurisdiction conferred upon the Federal Power Commission by Sections 7 and 15 of the Natural Gas Act and the Commission's Rules of Practice and Procedure, a hearing will be held without further notice before the Commission on all applications in which no petition to intervene is filed within the time required herein if the Commission on its own review of the matter believes that a grant of the certificates is required by the public convenience and necessity. Where a petition for leave to intervene is timely filed, or where the Commission on its own motion believes that a formal hearing is required, further notice of such hearing will be duly given.

Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for Applicants to appear or be represented at the hearing.

KENNETH F. PLUMB,
Secretary.

MARATHON OIL CO. AND UNION OIL COMPANY OF CALIFORNIA

Order Providing for Hearing on and Suspension of Proposed Changes in Rates, and Allowing Rate Changes To Become Effective Subject to Refund[1]

OCTOBER 29, 1975.

Respondents have filed proposed changes in rates and charges for jurisdictional sales of natural gas, as set forth below.

The proposed changed rates and charges may be unjust, unreasonable, unduly discriminatory, or preferential, or otherwise unlawful.

The Commission finds: It is in the public interest and consistent with the Natural Gas Act that the Commission enter upon hearings regarding the lawfulness of the proposed changes, and that the supplements herein be suspended and their use be deferred as ordered below.

The Commission orders: (A) Under the Natural Gas Act, particularly Sections 4 and 15, the Regulations pertaining thereto [18 CFR, Chapter I], and the Commission's Rules of Practice and Procedure, public hearings shall be held concerning the lawfulness of the proposed changes.

(B) Pending hearings and decisions thereon, the rate supplements herein are suspended and their use deferred until date shown in the "Date Suspended Until" column. Each of these supplements shall become effective, subject to refund, as of the expiration of the suspension period without any further action by the Respondent or by the Commission. Each Respondent shall comply with the refunding procedure required by the Natural Gas Act and § 154.102 of the Regulations thereunder.

(C) Unless otherwise ordered by the Commission, neither the suspended supplements, nor the rate schedules sought to be altered, shall be changed until disposition of these proceedings or expiration of the suspension period, whichever is earlier.

[SEAL] KENNETH F. PLUMB,
Secretary.

[1] Does not consolidate for hearing or dispose of the several matters herein.

FEDERAL RESERVE SYSTEM

ALLEN BANCSHARES, INC.

Formation of Bank Holding Company

Allen Bancshares, Inc., Allen, Oklahoma, has applied for the Board's approval under section 3(a)(1) of the Bank Holding Company Act (12 U.S.C. 1842(a)(1)) to become a bank holding company through acquisition of 90 percent or more of the voting shares of Farmers State Bank, Allen, Oklahoma. The factors that are considered in acting on the application are set forth in section 3(c) of the Act (12 U.S.C.1842(c)).

The application may be inspected at the office of the Board of Governors or at the Federal Reserve Bank of Kansas City. Any person wishing to comment on the application should submit views in writing to the Secretary, Board of Governors of the Federal Reserve System, Washington, D.C. 20551 to be received not later than December 3, 1975.

Board of Governors of the Federal Reserve System, November 3, 1975.

[SEAL] ROBERT SMITH III,
Assistant Secretary of the Board.

BANKAMERICA CORP.

Request for Determination and Order Providing Opportunity for Hearing

Notice is hereby given that a request has been made to the Board of Governors of the Federal Reserve System, pursuant to the provisions of section 2(g)(3) of the Bank Holding Company Act of 1956 (12 U.S.C. 1841(g)(3)), by BankAmerica Corporation, San Francisco, California ("BankAmerica"), for a determination that, following the proposed transfer of the receivables, all books and records in respect thereof, and all customer lists of GAC Finance West to ITT Financial Corporation, St. Louis, Missouri, a wholly-owned subsidiary of Consumer Services Corporation, a subsidiary of International Telephone and Telegraph, BankAmerica will not in fact be capable of controlling FAC Finance West or ITT Financial Corporation, notwithstanding the fact that a portion of the purchase price will be represented by two promissory notes, pursuant to which ITT Financial Corporation would become indebted to BankAmerica in the amount of $20 million.

Section 2(g)(3) of the Act provides in pertinent part: "shares transferred by any bank holding company directly or indirectly to any transferee that is indebted to the transferor shall be deemed to be indirectly owned or controlled by the transferor unless the Board, after opportunity for hearing, determines that the transferor is not, in fact, capable of controlling the transferee."

It is ordered, That, pursuant to section 2(g)(3) of the Act, an opportunity be and hereby is provided for filing a request for oral hearing. Any such request or written comments on the application should be submitted in writing (in duplicate) to the Secretary, Board of Governors of the Federal Reserve System, Washington, D.C. 20551, to be received no later than November 28, 1975. If a request for oral hearing is filed, each request should contain a statement of the nature of the requesting person's interest in the matter, like reasons for wishing to appear at an oral hearing, and a summary of the matters concerning which such person wishes to give testimony at such oral hearing. The Board subsequently will designate a time and place for any hearing ordered, and will give notice of such hearing to the transferor, the transferee, and all persons that have requested an oral hearing. In the absence of a request for an oral hearing, the Board will consider the requested determination on the basis of documentary evidence filed in connection with the application.

Board of Governors of the Federal Reserve System, October 31, 1975.

[SEAL] ROBERT SMITH, III,
Assistant Secretary of the Board.

[FR Doc.75-30153 Filed 11-7-75;8:45 am]

CENTRAL BANKING SYSTEM, INC.

Request for Determination and Order Providing Opportunity for Hearing

Notice is hereby given that a request has been made to the Board of Governors of the Federal Reserve System, pursuant to the provisions of section 2(g)(3) of the Bank Holding Company Act of 1956 (12 U.S.C. 1841(g)(3)), by Central Banking Systems, Inc., Oakland, California ("Central"), for a determination that, with respect to a sale by Central of shares of Peninsula National Bank, Burlingame, California, First National Bank of Fresno, Fresno, California, and Tahoe National Bank, South Lake Tahoe, California (herein collectively referred to as "the Banks") to Mr. Amos W. Dawe under an installment payment contract, Central is not in fact capable of controlling the Banks or Amos W. Dawe.

Section 2(g)(3) of the Act provides that shares transferred after January 1, 1966, by any bank holding company directly or indirectly to any transferee that is indebted to the transferor or has one or more officers, directors, trustees, or beneficiaries in common with or subject to control by the transferor, shall be deemed to be indirectly owned or controlled by the transferor unless the Board, after opportunity for hearing, determines that the transferor is not, in fact, capable of controlling the transferee.

It is ordered, That, pursuant to section 2(g)(3) of the Act, an opportunity be and hereby is provided for filing a request for oral hearing. Any such request or written comments on the application should be submitted in writing (in duplicate) to the Secretary, Board of Governors of the Federal Reserve System, Washington, D.C. 20551, to be received no later than December 5, 1975. If a request for oral hearing is filed, each request should contain a statement of the nature of the requesting person's interest in the matter, like reasons for wishing to appear at an oral hearing, and a summary of the matters concerning which such person wishes to give testimony at such oral hearing. The Board subsequently will designate a time and place for any hearing ordered, and will give notice of such hearing to the transferor, the transferee, and all persons that have requested an oral hearing. In the absence of a request for an oral hearing, the Board will consider the requested determination on the basis of documentary evidence filed in connection with the application.

Board of Governors of the Federal Reserve System, October 31, 1975.

[SEAL] ROBERT SMITH, III,
Assistant Secretary of the Board.

[FR Doc.75-30154 Filed 11-7-75;8:45 am]

FIRST BUFFALO HOLDING CO.

Order Approving Formation of Bank Holding Company

First Buffalo Holding Company, Buffalo, North Dakota, has applied for the Board's approval under section 3(a)(1) of the Bank Holding Company Act (12 U.S.C. 1842(a)(1)) of formulation of a bank holding company through acquisition of 90 percent of the voting shares of First State Bank of Buffalo, Buffalo, North Dakota ("Bank").

Notice of the application, affording opportunity for interested persons to submit comments and views, has been given in accordance with section 3(b) of the Act. The time for filing comments and views has expired, and the application and all comments received have been considered in light of the factors set forth in section 3(c) of the Act (12 U.S.C. 1842(c)).

Applicant, a nonoperating corporation with no subsidiaries, was recetly organized for the purpose of becoming a bank holding company through acquisition of Bank ($2.6 million in deposits).[1] Bank is the 136th largest banking organization in North Dakota and holds less than one-tenth of one percent of the total commercial bank deposits in the State. In the Casselton banking market,[2] Bank is the sixth largest of seven banking organizations with approximately 7.3 percent of the total deposits in commercial banks in the market.

Principals of Applicant are also principals in another registered one-bank holding company[3] with its banking subsidiary in Mayville, North Dakota, approximately 60 miles north of Buffalo. In addition, principals of Applicant are closely associated with six other banks in North Dakota, located from 17 to 130 miles from bank. Two of these banks, First State Bank of Arthur, Arthur ($4.8 million in deposits) and Page State Bank, Page $2.8 million in deposits) are located in the relevant banking market and hold in the aggregate approximately 21 percent of total market deposits. However, in view of the longstanding close relationships that have existed between the aforementioned banks, and the fact that the proposed transaction is essentially a reorganization of Bank's ownership from individuals to a corporation owned by the same individuals, it does not appear that consummation of the proposal would eliminate significant existing or potential competition, nor have an adverse effect on any other bank. Therefore, from the facts of record, it is concluded that competitive considerations are consistent with approval of the application.

The financial and managerial resources and future prospects of Applicant, which are dependent upon those same factors in Bank, are considered to be satisfactory. Bank's projected income should provide sufficient revenue to service the debt incurred by Applicant incident to this transaction without impairing the financial condition of either Applicant or Bank. Therefore, considerations relating to banking factors are consistent with approval of the application. Although consummation of the proposal would have no immediate effect on the banking services offered by Bank, considerations relating to the convenience and needs of the community to be served are consistent with approval of the application. It has been determined that the proposed transaction would be consistent with the public interest and that the application should be approved.

On the basis of the record, the application is approved for the reasons summarized above. The transaction shall not be made (a) before the thirtieth calendar day following the effective date of this Order, or (b) later than three months after the effective date of this Order, unless such period is extended for good cause by the Board or by the Federal Reserve Bank of Minneapolis pursuant to delegated authority.

By order of the Secretary of the Board, acting pursuant to delegated authority from the Board of Governors, effective November 3, 1975.

[SEAL] GRIFFITH L. GARWOOD,
Assistant Secretary of the Board.

[FR Doc.75-30155 Filed 11-7-75;8:45 am]

[1] All banking data are as of June 30, 1974.
[2] The Casselton banking market is approximated by the western two-thirds of Cass County.
[3] By Order dated April 7, 1975, the Board approved the application of Goose River Holding Company, Mayville, North Dakota, to become a bank holding company through the acquisition of The Goose River Bank, Mayville, North Dakota (40 FR 16884).

HARLAN NATIONAL CO.

Order Denying Formation of Bank Holding Company

Harlan National Company, Harlan, Iowa, has applied for the Board's approval under section 3(a)(1) of the Bank Holding Company Act (12 U.S.C. 1842(a)(1)) to become a bank holding company through acquisition of 98.2 percent of the voting shares of The Harlan National Bank, Harlan, Iowa ("Bank"). The factors that are considered in acting on the application are set forth in section 3(c) of the Act (12 U.S.C. 1842(c)).

Applicant has also applied, pursuant to section 4(c)(8) of the Bank Holding Company Act (12 U.S.C. 1843(c)(8)) and 225.4(b)(2) of the Board's Regulation Y (12 CFR 225.4(b)(2)), for permission to acquire voting shares of Bank Insurance Agency, Harlan, Iowa ("Agency"). Applicant would engage thereafter in the activities of acting as agent or broker in the sale of insurance, including credit life, credit accident and health insurance, and casualty insurance which is directly related to an extension of credit or other financial services by Bank and Applicant or is otherwise sold as a matter of convenience to the purchaser pursuant to § 225.4(a)(9)(ii) of Regulation Y. Such activities have been determined by the Board in § 225.4(a)(9)(ii) of Regulation Y as permissible for bank holding companies, subject to Board approval of individual proposals in accordance with the procedures of § 225.4(b).

Notice of the applications, affording opportunity for interested persons to submit comments and views on the public interest factors, has been duly published (40 FR 23934). The time for filing comments and views has expired, and the Board has considered the applications and all comments received in light of the factors set forth in sections 3(c) and 4(c)(8).

Applicant is a nonoperating corporation organized for the purpose of becoming a bank holding company through acquisition of Bank and of acquiring the insurance agency business of the principal shareholders of Bank. Bank, with deposits of approximately $22 million, representing .2 of 1 percent of the total commercial bank deposits in Iowa, is the largest of seven commercial banks operating in the Shelby County banking market.[1] Banks hold approximately 30

[1] All banking data are as of December 31, 1974.

V 40 N 217 NOV 10 75 XUM

percent of the total commercial bank deposits in this market. Inasmuch as the proposal represents merely a restructuring of Bank's ownership, the acquisition of Bank by Applicant would have no adverse effects on competition within the banking market. Accordingly, the Board concludes that competitive considerations are consistent with approval of the application.

The financial and managerial resources and prospects of Bank appear generally satisfactory and consistent with approval of the application. In regard to such considerations as they relate to Applicant, the Board is of the opinion that other commitments by present ownership of Applicant would adversely affect the servicing of the proposed acquisition debt. The owner of Applicant and Bank, Mr. Fred R. Horne, Jr., is also the sole owner of another one-bank holding company, the formation of which was approved by the Board in 1973.[3] Both the proposed formation and the 1973 formation involve a considerable amount of acquisition debt, and it does appear that Mr. Horne would be financially able, either personally or through the bank holding companies, to service both debts associated with both bank holding company formations without adversely affecting the resources of the subsidiary banks. Furthermore, even if Applicant's projections for the proposed acquisition are realized, the projected earnings of Bank and Agency would not, in the Board's view, provide Applicant with the necessary financial flexibility to meet its annual debt service requirements as well as any unforeseen financial problems that might arise at Bank. Accordingly, on the basis of the facts of record, the Board concludes that considerations relating to the financial aspects of Applicant's proposal lend weight toward denial of the application.

With respect to convenience and needs considerations, Applicant proposes to increase business and installment loans and to host local seminars for area farmers. These considerations relating to convenience and needs of the community to be served may be attained irrespective of Board approval of the application and, in any event, they do not, in the Board's view, outweigh the adverse findings with respect to the financial factors involved in Applicant's proposal.

On the basis of all of the circumstances of this case and the facts of record, the Board concludes that the acquisition debt involved in this proposal presents adverse circumstances bearing on the financial condition and prospects of Applicant and Bank. Such adverse factors are not outweighed by any procompetitive effects or by benefits to the convenience and needs of the communities to be served. Accordingly, it is the Board's judgment that approval of the application to become a bank holding company would not be in the public interest and the application should be denied.[3]

On the basis of the record, the application is denied for the reasons summarized above.

By order of the Board of Governors,[4] effective October 31, 1975.

[SEAL] GRIFFITH L. GARWOOD,
Assistant Secretary of the Board.

[FR Doc.75-30156 Filed 11-7-75;8:45 am]

[3] First National Company of Missouri Valley, Missouri Valley, Iowa (38 FR 6512, March 1, 1973).

[3] In view of the Board's action with respect to the application to become a bank holding company, consideration of the application to acquire the insurance agency becomes moot.

[4] Voting for this action: Vice Chairman Mitchell and Governors Holland, Wallich, Coldwell, and Jackson. Absent and not voting: Chairman Burns and Governor Bucher.

HUMBOLDT BANCSHARES, INC.

Formation of Bank Holding Company

Humboldt Bancshares, Inc., Humboldt, Kansas, has applied for the Board's approval under section 3(a)(1) of the Bank Holding Company Act (12 U.S.C. 1842(a)(1)) to become a bank holding company through acquisition of 90 percent or more of the voting shares of Humboldt National Bank, Humboldt, Kansas. The factors that are considered in acting on the application are set forth in section 3(c) of the Act (12 U.S.C. 1842(c)).

The application may be inspected at the office of the Board of Governors or at the Federal Reserve Bank of Kansas City. Any person wishing to comment on the application should submit views in writing to the Secretary, Board of Governors of the Federal Reserve System, Washington, D.C. 20551 to be received not later than December 5, 1975.

Board of Governors of the Federal Reserve System, October 31, 1975.

[SEAL] ROBERT SMITH III,
Assistant Secretary of the Board.

[FR Doc.75-30157 Filed 11-7-75;8:45 am]

REDWOOD BANCORP

Notice of Request for Determination and Order Providing Opportunity for Hearing

Notice is hereby given that a request has been made to the Board of Governors of the Federal Reserve System, pursuant to the provisions of section 2(g)(3) of the Bank Holding Company Act of 1956 (12 U.S.C. 1841(g)(3)), by Redwood Bancorp, San Francisco, California ("Redwood"), for a determination that following the transfer of all its stockholdings in three insurance companies ("Agencies") to Bowest, Inc., Los Angeles, California, ("Bowest"), Redwood will not in fact be capable of controlling Bowest, notwithstanding a sale agreement whereby the purchase price of Agencies will be paid to Redwood on an installment basis over the next five years.

Section 2(g)(3) of the Act provides that shares transferred after January 1, 1966, by any bank holding company (or by any company which but for such transfer, would be a bank holding company) directly or indirectly to any transferee that is indebted to the transferor or has one or more officers, directors, trustees, or beneficiaries in common with or subject to control by the transferor, shall be deemed to be indirectly owned or controlled by the transferor unless the Board, after opportunity for hearing, determines that the transferor is not in fact capable of controlling the transferee.

It is ordered, That, pursuant to section 2(g)(3) of the Act, an opportunity be and hereby is provided for filing a request for hearing. Any such request or written comments on the application should be submitted in writing (in duplicate) to the Secretary, Board of Governors of the Federal Reserve System, Washington, D.C. 20551, to be received not later than December 5, 1975. If a request for hearing is filed, such request should contain a statement of the nature of the requesting person's interest in the matter, his reasons for wishing to appear at an oral hearing, and a summary of the matters concerning which said person wishes to give testimony at such hearing. The Board subsequently will designate a time and place for any hearing ordered, and will give notice of such hearing to the transferor, the transferee, and all persons who have requested a hearing. In the absence of a request for a hearing, the Board will proceed with a consideration of the requested determination on the basis of documentary evidence filed in connection with the application.

Board of Governors of the Federal Reserve System, October 31, 1975.

[SEAL] ROBERT SMITH, III,
Assistant Secretary of the Board.

FEDERAL TRADE COMMISSION

CIGARETTE TESTING RESULTS

Tar and Nicotine Content

The Federal Trade Commission's laboratory has determined the "tar" (dry particulate matter) and total alkaloid (reported as nicotine) content of 135 varieties of domestic cigarettes. The laboratory utilized the Cambridge filter method with the specifications set forth in the Commission's announcement dated July 31, 1967 (32 F.R. 11178). The varieties are arranged in alphabetical order with tar values rounded to the nearest whole milligram and nicotine values rounded to the nearest tenth of a milligram.

NATIONAL ADVISORY COUNCIL ON THE EDUCATION OF DISADVANTAGED CHILDREN

COMMITTEE ON EARLY CHILDHOOD EDUCATION

Meeting of Committee on Early Childhood Education

Notice is hereby given, pursuant to PL 92-463, that the previously scheduled meeting of the Committee on Early Childhood Education of the National Advisory Council on the Education of Disadvantaged Children to meet in Clark County, Nevada on Thursday, November 13, and Friday, November 14, 1976, has been rescheduled for November 10–11, 1975, in West Chester, Pennsylvania.

The National Advisory Council on the Education of Disadvantaged Children is established under Section 148 of the Elementary and Secondary Act (20 U.S.C. 2411) to advise the President and the Congress on the effectiveness of compensatory education to improve the educational attainment of disadvantaged children.

This visit will include observing a Pre-School Program and reviewing and discussing the Draft Early Childhood Education Report to be included in the 1976 Annual Report.

Signed at Washington, D.C., on October 16, 1975.

ROBERTA LOVENHEIM,
Executive Director.

[FR Doc.75-30368 Filed 11-7-75;8:45 am]

NATIONAL ADVISORY COMMITTEE ON OCEANS AND ATMOSPHERE

MEETING

Addendum to Previous Notice

NOVEMBER 4, 1975.

The agenda for the meeting previously announced for November 17 and 18, 1975, in the FEDERAL REGISTER of October 16, 1975, will consist of the following:

Monday—Room 2318, Rayburn House Office Building

0900 Welcoming Remarks by Members of Congress.
0105 Plans of the Subcommittee on Oceanography of the House Merchant Marine and Fisheries Committee and the Ad Hoc Select Committee on Outer Continental Shelf.
1015 Issues of Coastal Zone Management.
1115 Issues of OCS Resource Development.
1330 Plans and objectives of the Subcommittee on the Environment and the Atmosphere of the House Science and Technology Committee.
1415 Issues of Atmospheric Research and Development.
1630 Other NACOA Business.
1630 Recess.

Tuesday—Room 6802, Department of Commerce Building

0900 Technical and Economic Feasibility of an Ocean Thermal Energy Conversion Plan.
0945 Industry view of Ocean Thermal Energy Conversion.
1045 The Ocean Food and Energy Farm.
1115 NACOA Energy Panel Work Plan.
1145 Other NACOA Business and Panel Reports.
1530 Adjournment.

Informal participation by interested Members of Congress in discussion of Monday's agenda items is expected. Additional information concerning this meeting may be obtained through the Committee's Executive Director, Dr. Douglas L. Brooks, whose mailing address is: National Advisory Committee on Oceans and Atmosphere, Department of Commerce Building, Room 5225, Washington, D.C., 20230. The telephone is: (202) 967-3343.

DOUGLAS L. BROOKS,
Executive Director.

NUCLEAR REGULATORY COMMISSION

[Docket 50-358-OL]

CINCINNATI GAS AND ELECTRIC CO.

Establishment of Atomic Safety and Licensing Board To Rule on Petitions

Pursuant to delegation by the Commission dated December 29, 1972, published in the *Federal Register* (37 F.R. 28710) and Sections 2.105, 2.700, 2.702, 2.714, 2.714a, 2.717 and 2.721 of the Commission's Regulations, all as amended, an Atomic Safety and Licensing Board is being established to rule on petitions and/or requests for leave to intervene in the following proceeding:

CINCINNATI GAS AND ELECTRIC COMPANY (WILLIAM H. ZIMMER NUCLEAR POWER STATION) DOCKET NO. 50-358-OL

This action is in reference to the "Notice of Receipt of Application for Facility Operating License; Availability of Applicant's Environmental Report; and Consideration of Issuance of Facility Operating License and Opportunity for Hearing", published by the Commission in the above matter (40 F.R. 43959—September 24, 1975).

The members of the Board are:

Samuel W. Jensch, Esq., Chairman, Atomic Safety and Licensing Board Panel, U.S. Nuclear Regulatory Commission, Washington, D.C. 20555.
Dr. John R. Lyman, Member, 404 Clayton Road, Chapel Hill, North Carolina 27514.
Mr. Glenn O. Bright, Member, Atomic Safety and Licensing Board Panel, U.S. Nuclear Regulatory Commission, Washington, D.C. 20555.

Dated at Bethesda, Maryland, this 3rd day of November 1975.

For Atomic Safety and Licensing Board Panel.

JAMES R. YORE,
Acting Chairman.

[Docket No. 50-263]

NORTHERN STATES POWER CO.

Issuance of Amendment to Provisional Operating License

Notice is hereby given that the U.S. Nuclear Regulatory Commission (the Commission) has issued Amendment No. 14 to Provisional Operating License No. DPR-22, issued to Northern States Power Company (the licensee), which revised Technical Specifications for operation of the Monticello Nuclear Generating Plant (the facility) located in Wright County, Minnesota. The amendment is effective as of its date of issuance.

The amendment revises the provisions in the Technical Specifications for the facility to authorize operation (1) with additional 8 x 8 fuel assemblies, (2) using modified operating limits based upon an evaluation of emergency core cooling system performance calculated in accordance with an acceptable evaluation model that conforms to the requirements of Section 50.46 of 10 CFR Part 50 of the Commission's regulations, and (3) using operating limits based on the General Electric Thermal Analysis Basis (GETAB).

The applications for the amendment comply with the standards and requirements of the Atomic Energy Act of 1954, as amended (the Act), and the Commission's rules and regulations. The Commission has made appropriate findings as required by the Act and the Commission's rules and regulations in 10 CFR Chapter I, which are set forth in the license amendment. Notice of Proposed Issuance of Amendment to Facility Operating License in connection with items (1) and (2) above was published in the FEDERAL REGISTER on September 3, 1975 (40 F.R. 40592) and Notice of Proposed Issuance of Amendment to Facility Operating License in connection with item (3) above was published in the FEDERAL REGISTER on April 27, 1975 (40 F.R. 10849). No request for a hearing or petition for leave to intervene was filed following notices of the proposed actions.

For further details with respect to this action, see (1) the applications for amendment dated March 12, 1975 and August 4, 1975 and supportive filings related thereto dated August 20, 1974, July 9, 1975, July 10 and 24, 1975, and September 16, 1975, (2) Amendment No. 14 to License No. DPR-22, with Change No. 22, (3) the Commission's concurrently issued related Safety Evaluation, and (4) the Commission's Negative Declaration dated October 23, 1975 (which is also being published in the FEDERAL REGISTER), and the associated Environmental Impact Appraisal. All of these items are available for public inspection at the Commission's Public Document Room, 1717 H Street, N.W., Washington, D.C., and at the Environmental Conservation Library, Minneapolis Public Library, 300 Nicollet Mall, Minneapolis, Minnesota 55401.

A single copy of items (2), (3) and (4) may be obtained upon request addressed to the U.S. Nuclear Regulatory Commission, Washington, D.C. 20555, Attention: Director, Division of Reactor Licensing.

Dated at Bethesda, Maryland, this 30th day of October, 1975.

For the Nuclear Regulatory Commission,

DENNIS L. ZIEMANN,
Chief, Operating Reactors Branch #2, Division of Reactor Licensing.

[FR Doc.75-30096 Filed 11-7-75;8:45 am]

[Docket No. 50-263]

NORTHERN STATES POWER CO., MONTICELLO UNIT 1

Negative Declaration Regarding Proposed Changes to the Technical Specifications of License DPR-22

The Nuclear Regulatory Commission (the Commission) has considered the issuance of changes to the Technical Specifications of Provisional Operating License No. DPR-22. These changes would authorize the Northern States Power Company (the licensee) to operate Monticello Nuclear Generating Plant, Unit 1 (located in Wright County, Minnesota) with changes to the limiting conditions for operation resulting from application of the Acceptance Criteria for Emergency Core Cooling System (ECCS). This change is being made in conjunction with core changeout Number 5 and refueling with 8 x 8 fuel.

The U.S. Nuclear Regulatory Commission, Division of Reactor Licensing, has prepared an environmental impact appraisal for the proposed changes to the Technical Specifications of License No. DPR-22, Monticello, Unit 1, referred to above. On the basis of this appraisal, the Commission has concluded that an environmental impact statement for the particular action is not warranted because there will be no environmental impact attributable to the proposed action other than that which has already been predicted and described in the Commission's Final Environmental Statement for Monticello, Unit 1, issued in November 1972. The environmental impact appraisal is available for public inspection at the Commission's Public Document Room, 1717 H Street, NW., Washington, D.C. and at the Environmental Conservation Library of Minnesota, 300 Nicollet Mall, Minneapolis, Minnesota.

Dated at Rockville, Maryland, this 23rd day of October, 1975.

For the Nuclear Regulatory Commission.

JAN A. NORRIS,
Acting Chief, Environmental Projects Branch, Division of Reactor Licensing.

[FR Doc.75-30097 Filed 11-7-75;8:45 am]

REGULATORY GUIDE

Issuance and Availability

The Nuclear Regulatory Commission has issued a new guide in its Regulatory Guide Series. This series has been developed to describe and make available to the public methods acceptable to the NRC staff of implementing specific parts of the Commission's regulations and, in some cases, to delineate techniques used by the staff in evaluating specific problems or postulated accidents and to provide guidance to applicants concerning certain of the information needed by the staff in its review of applications for permits and licenses.

Regulatory Guide 1.103, "Post-Tensioned Prestressing Systems for Concrete Reactor Vessels and Containments," identifies the post-tensioned prestressing systems that have been reviewed and approved by the NRC staff for use in concrete reactor vessels and containments and also describes qualifications acceptable to the NRC staff for new post-tensioned prestressing systems.

Comments and suggestions in connection with (1) items for inclusion in guides currently being developed (listed below) or (2) improvements in all published guides are encouraged at any time. Public comments on Regulatory Guide 1.103 will, however, be particularly useful in evaluating the need for an early revision if received by January 8, 1976.

Comments should be sent to the Secretary of the Commission, U.S. Nuclear Regulatory Commission, Washington, D.C. 20555, Attention: Docketing and Service Section.

Regulatory guides are available for inspection at the Commission's Public Document Room, 1717 H Street NW., Washington, D.C. Requests for single copies of issued guides (which may be reproduced) or for placement on an automatic distribution list for single copies of future guides should be made in writing to the Director, Office of Standards Development, U.S. Nuclear Regulatory Commission, Washington, D.C. 20555. Telephone requests cannot be accommodated. Regulatory guides are not copyrighted and Commission approval is not required to reproduce them.

Other Division 1 Regulatory Guides currently being developed include the following:

Fracture Toughness Class I Vessels Under Overstress Conditions.
Protection Against Postulated Events and Accidents Outside of Containment.
Fracture Toughness Requirements for Materials for Class 2 and 3 Components.
Maintenance of Water Purity in PWR Secondary Systems.
Criteria for Heatup and Cooldown Procedures.
Surveillance Testing and Inservice Inspection of Thermal Barrier and Steam Generator Materials in High-Temperature Gas-Cooled Reactors.
Surveillance and Postirradiation Examination of Fuel Rods in Lead Assemblies.
Design Load Combinations for Component Supports.
Interim Guide on Tornado Missiles.
Criteria for Plugging Steam Generator Tubes.
Structural Design Criteria for Fuel Assemblies in Light-Water-Cooled Reactors.
Overhead Crane Handling Systems for Nuclear Power Plants.
Recommended Procedure for Resintering Test to Monitor Densification Stability of Production Fuel.

V 40 217 NOV 10 75 XUM

Qualifications for Cement Grouting for Prestressing Tendons in Containment Structure.
Inservice Monitoring of Core and Core Support Structure Motion Via Neutron-Flux Measurement.
Loose Parts Monitoring Program for the Primary System.
Guidance for Content of Licensing Applications for Reload Fuel.
Nuclear Safety-Related Concrete Structures.
ASME Code Case Fiberglass Reinforced Plastic Piping.
Protection Against Low Trajectory Turbine Missiles.
Tornado Design Classification.
Overpressure Protection of Low-Pressure systems Connected to Reactor Coolant Pressure Boundary.
Protective Coatings for Light-Water Reactor Containment Facilities.
Quality Assurance Requirements for Installation, Inspection, and Testing of Mechanical Equipment and Systems.
Fire Protection Criteria for Nuclear Power Plants.
Requirements for Auditing of Quality Assurance Programs for Nuclear Power Plants.
Quality Assurance Requirements for Control of Procurement of Equipment, Materials, and Services for Nuclear Power Plants.
Instrumentation for Light-Water-Cooled Nuclear Power Plants to Assess Plant Conditions During and Following an Accident.
Quality Assurance Requirements for Lifting Equipment.
Maintenance and Testing of Batteries.
Qualification Test of Class IE Cables, Connections, and Field Splices for Nuclear Power Plants.
Seismic Qualification of Class I Electric Equipment.
Fuel Oil Systems for Standby Diesel Generators.
Quality Assurance Requirements for the Manufacture of Class IE Instrumentation and Electric Equipment for Nuclear Power Plants.
Assumptions Used for Evaluating the Potential Radiological Consequences of a Liquid Radioactive Waste System Accident.
Containment Isolation Provisions.
Initial Startup Testing Program for Facility Shutdown from Outside the Control Room.
Periodic Testing of Diesel Generators.
Qualification of Inspection, Examination, and Testing Personnel for Nuclear Facilities.
Quality Assurance Program Requirements for Nuclear Power Plant Fuels.
Testing of Nuclear Air Cleaning Systems.
Preoperational and Initial Startup Testing of Feedwater Systems for BWRs.
Design Criteria for Overload Protection of Motor-Operated Valves.
Identification of Materials, Parts, and Components for Nuclear Power Plants.
Emergency Planning for Nuclear Power Plants.
Control Room Manning.
Hydrologic Design Criteria for Water Control Structures Constructed for Nuclear Power Plants.
Spill Analysis—Dispersion and Dilution in Surface and Ground Water.
Design Objectives for LWR Spent Fuel Facilities.
Design Objectives for LWR Fuel Handling Systems.
Preoperational Testing of Diesel Generator Units Used as Onsite Emergency Power Sources at Nuclear Power Plants .
Periodic Testing of Class 1E Power and Protection Systems.
Assumptions Used for Evaluating the Potential Radiological Consequences of a BWR Radioactive Offgas System Failure.

(5 U.S.C. 552(a))

Dated at Rockville, Maryland this 3rd day of November 1975.

For the Nuclear Regulatory Commission,

ROBERT B. MINOGUE,
Director,
Office of Standards Development.

[FR Doc. 75-30100 Filed 11-1-75;8:45 am]

[Docket No. 50-244]

ROCHESTER GAS AND ELECTRIC CORP.

Issuance of Amendment to Provisional Operating License

Notice is hereby given that the U.S. Nuclear Regulatory Commission (the Commission) has issued Amendment No. 8 to Provisional Operating License No. DPR-18 issued to Rochester Gas and Electric Corporation which revised Technical Specifications for operation of the R. E. Ginna Nuclear Power Plant located in Wayne County, New York. The amendment becomes effective 30 days after the date of issuance.

This amendment modifies the Administrative Controls, Reporting Requirements, and Respiratory Protection Program of the Technical Specifications for the R. E. Ginna Nuclear Power Plant.

The application for the amendment complies with the standards and requirements of the Atomic Energy Act of 1954, as amended (the Act), and the Commission's rules and regulations. The Commission has made appropriate findings as required by the Act and the Commission's rules and regulations in 10 CFR Chapter I, which are set forth in the license amendment. Prior public notice of this amendment is not required since the amendment does not involve a significant hazards consideration.

For further details with respect to this action, see (1) the application for amendment dated December 2, 1974, (2) Amendment No. 8 to License No. DPR-18, with Change No. 17, and (3) the Commission's related Safety Evaluation. All of these items are available for public inspection at the Commission's Public Document Room, 1717 H Street, NW., Washington, D.C., and at the Lyons Public Library, 67 Canal Street, Lyons, New York and the Rochester Public Library, 115 South Avenue, Rochester, New York.

A copy of items (2) and (3) may be obtained upon request addressed to the U.S. Nuclear Regulatory Commission, Washington, D.C. 20555, Attention: Director, Division of Reactor Licensing.

Data at Bethesda, Maryland, this 3rd day of November 1975.

For the Nuclear Regulatory Commission.

ROBERT A. PURPLE,
Chief, Operating Reactors Branch #1, Division of Reactor Licensing.

WASHINGTON PUBLIC POWER SUPPLY SYSTEM

Reconstitution of Board

In the matter of Washington Public Power Supply System (WPPSS Nuclear Project Nos. 1 and 4).

Margaret M. Laurence, Esq., was Chairman of the Atomic Safety and Licensing Board for the above proceeding. Because of illness, Ms. Laurence is unable to continue her service on this Board.

Accordingly, Robert M. Lazo, Esq., whose address is Atomic Safety and Licensing Board Panel, U.S. Nuclear Regulatory Commission, Washington, D.C. 20555, is appointed Chairman of this Board. Reconstitution of the Board in this manner is in accordance with the Rules of Practice of the Commission.

Dated at Bethesda, Maryland this 3rd day of November 1975.

JAMES R. YORE,
Acting Chairman, Atomic Safety and Licensing Board Panel.

SECURITIES AND EXCHANGE COMMISSION

[Rel. No. 9020 (812-3868)]

E. I. DU PONT DE NEMOURS AND CO.

Filing of Application for Order Exempting Proposed Transaction

NOVEMBER 5, 1975.

Notice is hereby given that E. I. du Pont de Nemours and Company, Wilmington, Delaware, 19898 ("Applicant"), a Delaware corporation, has filed an application pursuant to Section 17(b) of the Investment Company Act of 1940 ("Act") for an order exempting from the provisions of Section 17(a) of the Act Applicant's proposed grant to Imperial Chemical Industries Limited ("ICI"), a United Kingdom ("U.K.") corporation, of (1) exclusive rights to use in the U.K. certain technical information and an exclusive license to related U.K. patents, and (2) nonexclusive rights to import, use and sell under Applicant's corresponding patents in the European Economic Community ("EEC"), with both grants including the right to sublicense. All interested persons are referred to the application on file with the Commission for a full statement of the representations therein which are summarized below.

Christiana Securities Company ("Christiana"), a registered closed-end investment company, owns approximately 27.8% of the outstanding common stock of Applicant. Applicant owns 63.75% of the outstanding common stock of Remington Arms Company, Inc. ("Remington"), which in turn owns 50.0% of the outstanding common stock of Companhia Brasileira de Cartuchos ("CBC"), a Brazilian company, with the remaining common stock outstanding of CBC owned by ICI. Under Section 2(a)(9) of the Act, Applicant, Remington and CBC are presumed to be controlled by

V 40 217 NOV 10 75 XUM

Christiana and under Section 2(a)(3) of the Act, Applicant, Remington and CBC are affiliated persons of Christiana, and ICI is an affiliated person of CBC.

Applicant states that ICI, a manufacturer of a diversified line of chemicals including agricultural products, general chemicals, industrial explosives, organic chemicals and dyes, pharmaceuticals, and synthetic fibers, seeks to acquire from Applicant (1) exclusive rights to technical information and an exclusive license to U.K. patents relating to the manufacture of hexamethylene diamine ("HMD") using an iron catalyst, and (2) non-exclusive rights to corresponding patents in the ECC to import, use and sell HMD made using such technology and patents, with both grants including the right to sublicense. Applicant and ICI have executed an agreement (the "Agreement") granting ICI such technical information and patent rights.

Section 17(a) of the Act, in pertinent part, provides that it shall be unlawful for any affiliated person of a registered investment company, or any affiliated person of such person, acting as principal, knowingly to sell to or purchase from such registered company or any company controlled by such company any security or other property.

Section 17(b) of the Act provides that the Commission, upon application, may exempt a proposed transaction from the provisions of Section 17(a) if evidence establishes that the terms of the proposed transaction, including the consideration to be paid or received, are reasonable and fair and do not involve overreaching on the part of any person concerned and that the proposed transaction is consistent with the policy of each registered investment company concerned and with the general purposes of the Act.

Under the Agreement, as consideration for such patent and technical information rights, ICI has agreed to pay Applicant a royalty of $0.0007 per pound of HMD produced by ICI and any ICI subsidiary, with minimum royalties of $4,960,000 consisting of $1,365,000 payable within thirty days of the effective date of grant of rights, $1,365,000 on each of the first and second anniversaries of such effective date, and $865,000 on the third anniversary. The minimum royalties are due regardless of the quantity of HMD produced by ICI and any ICI subsidiary and will be credited against the royalty payable per pound. ICI has further agreed to pay Applicant thirty-five percent of the consideration (if any) ICI receives from each sublicensee other than a subsidiary of ICI.

Applicant submits that the royalty rate grant of rights between Applicant and ICI were negotiated at arm's length and are fair to both parties. Applicant asserts that the royalties payable on HMD reasonably reflect the value of the patent rights and technical information conveyed by the Agreement.

Applicant states that the proposed transaction is consistent with the policies of Christiana and with the general purposes of the Act.

Notice is further given that any interested person may, not later than December 1, 1975 at 5:30 p.m., submit to the Commission in writing a request for a hearing on the matter accompanied by a statement as to the nature of his interest, the reason for such request, and the issues, if any, of fact or law proposed to be controverted, or he may request that he be notified if the Commission shall order a hearing thereon. Any such communication should be addressed: Secretary, Securities and Exchange Commission, Washington, D.C. 20549. A copy of such request shall be served personally or by mail (air mail if the person being served is located more than 500 miles from the point of mailing) upon Applicant at the address stated above. Proof of such service (by affidavit, or in case of an attorney-at-law, by certificate) shall be filed contemporaneously with the request. As provided by Rule 0–5 of the Rules and Regulations promulgated under the Act, an order disposing of the application will be issued as of course following said date unless the Commission thereafter orders a hearing upon request or upon the Commission's own motion. Persons who request a hearing, or advice as to whether a hearing is ordered, will receive any notices and orders issued in this matter, including the date of the hearing (if ordered) and any postponements thereof.

For the Commission, by the Division of Investment Management Regulation, pursuant to delegated authority.

[SEAL] GEORGE A. FITZSIMMONS,
Secretary.

OHIO CAPITAL FUND, INC.

Filing of Application for an Order Declaring That Company Has Ceased To Be an Investment Company

NOVEMBER 5, 1975.

Notice is hereby given that The Cardinal Fund, Inc., 51 North High Street, Columbus, Ohio, 43215 ("Cardinal"), registered under the Investment Company Act of 1940 ("Act") as an open-end management investment company, filed on behalf of Ohio Capital Fund, Inc. ("OCF"), also registered under the Act as an open-end management investment company, an application on July 23, 1975, pursuant to Section 8(f) of the Act for an order declaring that OCF has ceased to be an investment company as defined in the Act. All interested persons are referred to the application on file with the Commission for a statement of the representations contained therein, which are summarized below.

The application states that Cardinal was formed on September 16, 1966 as Knowledge Communication Fund, Inc., and that OCF, an open-end diversified, management investment company, was formed on January 24, 1961. OCF registered under the Act on February 3, 1961.

The application represents that OCF was merged with and into Cardinal on May 30, 1975, and that thereupon the corporate existence of OCF ceased and all of its assets and liabilities were transferred by operation of law to Cardinal.

Section 8(f) of the Act provides, in pertinent part, that when ever the Commission, upon application, finds that a registered investment company has ceased to be an investment company, it shall so declare by order and upon the taking effect of such order the registration of such company shall cease to be in effect.

Notice is further given that any interested person may, not later than December 1, 1975, at 5:30 p.m., submit to the Commission in writing a request for a hearing on the matter accompanied by a statement as to the nature of his interest, the reason for such request and the issues of fact or law proposed to be controverted, or he may request that he be notified if the Commission should order a hearing thereon. Any such communication should be addressed: Secretary, Securities and Exchange Commission, Washington, D.C. 20549. A copy of such request shall be served personally or by mail (air mail if the person being served is located more than 500 miles from the point of mailing) upon OCF at the address stated above. Proof of such service (by affidavit or in case of an attorney-at-law, by certificate) shall be filed contemporaneously with the request. As provided by Rule 0–5 of the Rules and Regulations promulgated under the Act, an order disposing of the application will be issued as of course following said date unless the Commission thereafter orders a hearing upon request or upon the Commission's own motion. Persons who request a hearing or advice as to whether a hearing is ordered will receive any notices and orders issued in this matter, including the date of the hearing (if ordered) and any postponements thereof.

For the Commission, by the Division of Investment Management Regulation, pursuant to delegated authority.

[SEAL] GEORGE A. FITZSIMMONS,
Secretary.

[Rd. No. 9019; (811-574)]

PRUDENTIAL FUND OF BOSTON, INC.

Application for an Order Declaring That Company Has Ceased To Be an Investment Company

NOVEMBER 5, 1975.

Notice is hereby given that on October 20, 1975, Boston Mutual Equity Growth Fund, Inc. c/o Boston Mutual Equity Growth Fund, Inc., 120 Royal Street, Canton, Massachusetts, 02021 (formerly called Boston Mutual Fund Inc.), registered under the Investment Company Act of 1940 ("Act") as an open-end investment company, filed an application on behalf of The Prudential Fund of Boston, Inc. ("Prudential"), also registered under the Act as an open-end investment company for an order pursuant to Section 8(f) of the Act declaring that the registration of Prudential under the Act shall cease to be in effect. All interested persons are referred to the application on file with the Commission for a statement of the representations contained therein which are summarized below.

Prudential was incorporated on December 21, 1949, under the laws of Massachusetts and registered under the Act on January 10, 1950, as an open-end diversified management investment company.

On December 31, 1974, Prudential merged into Boston Mutual Equity Growth Fund, Inc., and ceased its separate existence on that date. An order is, therefore, being sought providing that the registration of Prudential under the Act shall cease to be in effect.

Section 8(f) of the Act provides, in pertinent part, that when the Commission, upon application, finds that a registered investment company has ceased to be an investment company, it shall so declare by order, and upon the taking effect of such order the registration of such company shall cease to be in effect.

Notice is further given that any interested person may not later than December 1, 1975, at 5:30 p.m., submit to the Commission in writing a request for a hearing on the matter accompanied by a statement as to the nature of his interest, the reason for such request and the issues, if any, of fact or law proposed to be controverted, or he may request that he be notified if the Commission should order a hearing thereon. Any such communication should be addressed: Secretary, Securities and Exchange Commission, Washington, D.C. 20549. A copy of such request shall be served personally or by mail (air mail if the person being served is located more than 500 miles from the point of mailing) upon Prudential at the address stated above. Proof of such service (by affidavit, or in case of an attorney-at-law, by certificate) shall be filed contemporaneously with the request. As provided by Rule 0–5 of the Rules and Regulations promulgated under the Act, an order disposing of the application will be issued as of course following said date unless the Commission thereafter orders a hearing upon request or upon the Commission's own motion. Persons who request a hearing or advice as to whether a hearing is ordered, will receive any notices and orders issued in this matter, including the date of the hearing (if ordered) and any postponements thereof.

For the Commission, by the Division of Investment Management Regulation, pursuant to delegated authority.

Secretary.

CENTRAL POWER AND LIGHT CO.

Notice of Proposed Amendment to Articles of Incorporation Relating to Calculation of Earnings for Purposes of Issuing Preferred Stock; Request for Order To Pay Common Stock Dividends Out of Certain Restricted Earned Surplus; Order Authorizing Solicitation of Proxies

NOVEMBER 4, 1975.

Notice is hereby given, that Central Power and Light Company ("CPL"), P.O. Box 1221, Corpus Christi, Texas 78408, an electric utility subsidiary company of Central and South West Corporation ("CSW"), a registered holding company, has filed a declaration, and an amendment thereto, with this Commission pursuant to the Public Utility Holding Company Act of 1935 ("Act"), designating sections 6(a), 7, and 12(e) of the Act and Rules 62 and 65 promulgated thereunder as applicable to the proposed transactions. All interested persons are referred to the declaration, as amended, which is summarized below for a complete statement of the proposed transactions.

CPL proposes to amend its Restated Articles of Incorporation, as amended ("Articles") to change the computation of earnings for purposes of satisfying the earnings test for issuance of preferred stock without prior stockholder approval ("earnings test"). The earnings test requires, in general, that for CPL to issue additional preferred stock, its gross income for a period of 12 consecutive months prior to the issuance of the stock must be at least 1½ times the sum of CPL's interest charges on all its debt securities plus the annual dividend requirement on all shares of its preferred stock to be outstanding immediately after the issuance of the additional preferred stock. The computation is referred to as the "coverage ratio" for preferred stock.

In computing gross income for purposes of the earnings test, it is presently required that CPL deduct from the gross income as a provision for depreciation, retirements, renewals and replacements and/or amortization ("renewal fund") an amount equal to the greater of (i) 15% of its gross operating revenues, less costs of purchased power, or (ii) 2¼% of the average amount of its depreciable bondable property during the period for which gross income is being determined. CPL proposes to change this provision to eliminate the 15% of operating revenues deduction and changed the 2¼% figure to 3.2%.

The reason for the proposed amendment to the Articles is related to the impact of fuel adjustment clauses on CPL's revenues. It is stated that substantially all of CPL's rate schedules provide for adjustments in charges to customers to reflect changes in the cost of fuel. CPL's fuel costs have risen sharply in the last several years, and these costs have been passed through to customers by means of the fuel adjustment charges. CPL states that as a result, its gross operating revenues have been greatly inflated. CFL further states that fuel costs and related earnings test deductions may, under terms of the present Articles, increase to the point that CPL might be unable to meet the earnings test to issue additional preferred stock in late 1975 or 1976. Calculation of the earnings test under the proposed amendment to the Articles would result in a higher coverage ratio, thereby increasing the possibility that CPL could satisfy the earnings test.

CPL proposes to call a special meeting of the common and preferred stockholders to be held on or about December 24, 1975, to consider and vote upon the adoption of the proposed amendment. The affirmative vote of the holders of two-thirds of the shares of outstanding preferred stock, voting separately as a class, and, in addition, the affirmative vote of the holders of two-thirds of the total outstanding shares of preferred and common stock is required for the adoption of the proposed amendment. CSW, holder of all CPL's common stock, has stated its intention of voting in favor of the proposed amendment. It is stated that the outstanding shares of common stock represent more than two-thirds of the total outstanding shares of CPL. CPL proposes to solicit proxies from its preferred shareholders through the use of proposed soliciting material to obtain the requisite aproval of the proposed Articles amendment.

CPL has also requested an order from this Commission authorizing it to pay common stock dividends out of earned surplus earned after December 31, 1975, said earned surplus to be determined as provided in supplemental indentures to CPL's Indenture dated November 1, 1943, but with the following described change. CPL's supplemental indentures dated on and after February 1, 1958, prohibit the payment of common stock dividends (with stated exceptions) in excess of the sum of (a) earned surplus determined as provided in the supplemental indentures earned after a specified date, (b) a stated dollar amount of earned surplus at such specified date (equivalent to estimated dividends on common and preferred stocks for the 12 months beginning with the date of the supplemental indenture) and (c) "such additional amount as may be authorized or approved * * * by the Securities and Exchange Commission * * *"

In determining earned surplus, the respective supplemental indentures re-

V 40 N 217 NOV 10 75 XUM

quire a deduction from gross income for the renewal fund amounts equal to 15% of the gross operating revenues of CPL or 2¼% of bondable property. This deduction is for the same purposes described in connection with the proposed amendment to the Articles. For the reasons described above relating to the proposed Articles amendment, the 15% of gross operating revenues calculation has had the effect of imposing an increasingly high limitation on the payment of common stock dividends by CPL (to its parent, CSW).

Accordingly, CPL hasapplied for authority, pursuant to the indenture provision quoted above, to pay common stock dividends out of additional amounts of earned surplus earned after December 31, 1975. This additional earned surplus will be determined as provided in the supplemental indentures but after deducting as a minimum for the renewal fund 3.2% of bondable property rather than 15% of gross operating revenues or 2¼% of bondable property, as presently provided in the supplemental indentures. CPL states that it will accept a limitation upon such authorization to the effect that no common stock dividend payment can be made out of such additional earned surplus except to the extent that such dividend was made from surplus earned during the 12 calendar months immediately preceding the payment of such dividend.

Fees and expenses to be incurred in connection with the proposed transactions are estimated at $10,000, including legal fees of $4,500. It is stated that no state commission and no federal commission, other than this Commission, has jurisdiction over the proposed transactions.

Notice is further given, that any interested person may, not later than November 28, 1975 request in writing that a hearing be held on such matter, stating the nature of his interest, the reasons for such request, and the issues of fact or law raised by said declaration, as amended, which he desires to controvert; or he may request that he be notified if the Commission should order a hearing thereon. Any such request should be addressed: Secretary, Securities and Exchange Commission, Washington, D.C. 20549. A copy of such request should be served personally or by mail (air mail if the person being served is located more than 500 miles from the point of mailing) upon the declarant at the above-stated address, and proof of service (by affidavit or, in case of an attorney at law, by certificate) should be filed with the request. At any time after said date, the declaration, as amended, or as it may be further amended, may be permitted to become effective as provided in Rule 23 of the General Rules and Regulations promulgated under the Act, or the Commission may grant exemption from such rules as provided in Rules 20(a) and 100 thereof or take such other action as it may deem appropriate. Persons who request a hearing or advice as to whether a hearing is ordered will receive any notices and orders issued in this matter, including the date of the hearing (if ordered) and any postponements thereof.

It appearing to the Commission that the declaration, as amended, insofar as it proposes to solicitation of proxies from CPL's stockholders, should be permitted to become effective forthwith pursuant to Rule 62:

It is ordered, That the declaration, as amended, regarding the proposed solicitation of proxies of CPL's stockholders be, and it hereby is, permitted to become effective forthwith pursuant to Rule 62 and subject to the terms and conditions prescribed in Rule 24 under the Act.

For the Commission, by the Division of Corporate Regulation, pursuant to delegated authority.

[SEAL] GEORGE A. FITZSIMMONS,
Secretary.

[Rel. No. 9015; 812-3858]

E. I. DU PONT DE NEMOURS AND CO.

Notice of Filing of Application Pursuant to Section 17(b) of the Act for an Order Exempting Proposed Transaction From Section 17(a)

NOVEMBER 4, 1975.

Notice is hereby given, that E. I. du Pont de Nemours and Company ("Applicant"), Wilmington, Delaware 19898, a Delaware corporation, filed an application on September 8, 1975, pursuant to Section 17(b) of the Investment Company Act of 1940 ("Act") for an order exempting from the provisions of Section 17(a) of the Act Applicant's proposed sale of its 26% equity interest in Pigment-Chemie, GmbH ("PC") to Metallgesellschaft A. G. ("MG"), owner of the remaining 74% of the equity interest in PC, for 8,000,000 German marks ("DM"), equivalent to U.S. $3,200,000. All interested persons are referred to the application on file with the Commission for a complete statement of the representations therein, which are summarized below.

Christiana Securities Company ("Christiana"), a registered closed-end investment company, owns approximately 27.8% of the outstanding common stock of Applicant. Under Section 2(a)(9) of the Act, both Applicant and PC are presumed to be controlled by Christiana; under Section 2(a)(3) of the Act, both Applicant and PC are also affiliated persons of Christiana and MG is an affiliated person of PC. Therefore, it may be said that the proposed transaction would be in violation of Section 17(a) of the Act unless an order of exemption is issued under Section 17(b) of the Act.

In December 1959, Applicant and Sachtleben A. G. ("Sachtleben"), a 60%-owned German subsidiary of MG, organized PC to manufacture, distribute and sell commercial titanium dioxide pigments to the paint and lacquer industry. PC uses the sulfate process while Applicant in its domestic pigment operations uses the chloride process which Applicant believes is less costly. Applicant acquired a 26% equity interest in PC, representing a DM capital investment then equivalent to U.S. $2,723,000. In March 1972, the remaining 74%-equity interest in PC held by Sachtleben was transferred to MG through a merger of Sachtleben into MG. Since then no other changes in the ownership of PC have occurred.

Applicant states that it no longer considers continued investment in PC attractive and is investigating construction of a chloride process pigments plant which would supply European markets. Therefore, Applicant believes it desirable to withdraw from PC. As the owner of the remaining 74%, MG elected to acquire Applicant's interest. Accordingly, Applicant and MG have entered into an agreement ("Agreement") which provides for the sale of Applicant's interest in PC to MG.

Section 17(a) of the Act, in pertinent part, provides that it shall be unlawful for any affiliated person of a registered investment company, or any affiliated person of such person, acting as principal, knowingly to sell to or purchase from such registered company or any company controlled by such company any security or other property.

Section 17(b) of the Act provides that the Commission, upon application, may exempt a proposed transaction from the provisions of Section 17(a) if evidence establishes that the terms of the proposed transaction, including the consideration to be paid or received, are reasonable and fair and do not involve overreaching on the part of any person concerned and that the proposed transaction is consistent with the policy of each registered investment company concerned and with the general purposes of the Act.

Applicant believes that the agreed payment for Applicant's 26% interest in PC is fair and reasonable to all parties based on the past earnings record and future earnings outlook for PC. $3.2 million represents 7.9 times average annual earnings of PC over the past 5 years. According to the application, equity interests in the principal industrial companies in the Federal Republic of Germany (a group of more than 100 companies, traded on the stock exchanges in that country) typically have traded at prices in the range of 5 to 18 times earnings and prices for equity interests of such companies recently averaged 10.5 times earnings. The price earnings ratio for the proposed transaction with respect to Applicant's interest in PC is about 75% of such average for German industrial companies. Applicant believes this lower price-earnings ratio is appropriate in view of the unattractive competitive status of PC's costly and inefficient sulfate process and the probable need for additional non-productive investment to meet tighter pollution control requirements.

Applicant contends that the terms of the proposed transaction, are reasonable and fair and do not involve overreaching on the part of any person and it submits that the provisions of the Agreement between Applicant and MG were negotiated at arm's length and are fair to both parties. Applicant states that the proposed transaction is consistent with the investment policies of Christiana and with the general purposes of the Act.

Notice is further given that any interested person may, not later than November 28, 1975, at 5:30 a.m., submit to the Commission in writing a request for a hearing on the matter accompanied by a statement as to the nature of his interest, the reason for such request, and the issues, if any, of fact or law proposed to be controverted, or he may request that he be notified if the Commission shall order a hearing thereon. Any such communication should be addressed: Secretary, Securities and Exchange Commission, Washington, D.C. 20549. A copy of such request shall be served personally or by mail (air mail if the person being served is located more than 500 miles from the point of mailing) upon Applicant at the address stated above. Proof of such service (by affidavit, or in case of an attorney-at-law, by certificate) shall be filed contemporaneously with the request. As provided by Rule 0–5 of the Rules and Regulations promulgated under the Act, an order disposing of the application will be issued as of course following said date unless the Commission thereafter orders a hearing upon request or upon the Commission's own motion. Persons who request a hearing, or advice as to whether a hearing is ordered, will receive any notices and orders issued in this matter, including the date of the hearing (if ordered) and any postponements thereof.

For the Commission, by the Division of Investment Management Regulation, pursuant to delegated authority.

[SEAL] GEORGE A. FITZSIMMONS,
Secretary.

[File No. 500-1]

FALSTAFF BREWING CORP.

Suspension of Trading

OCTOBER 31, 1975.

It appearing to the Securities and Exchange Commission that the summary suspension of trading in the common stock of Falstaff Brewing Corporation, being traded otherwise than on a national securities exchange is required in the public interest and for the protection of investors;

Therefore, pursuant to Section 12(k) of the Securities Exchange Act of 1934, trading in such securities otherwise than on a national securities exchange is suspended, for the period from 4:15 p.m. (EST) on October 31, 1975 through midnight (EST) on November 9, 1975.

By the Commission.

Secretary.

[FR Doc.75-30168 Filed 11-7-75;8:45 am]

[Rel. No. 9014; 811-839, 811-857, 811-858]

LENNON CO. AETNA LIFE STOCK INVESTMENT PROGRAMS, ET AL.

Proposal To Terminate Registration Pursuant to Section 8(f) of the Act

NOVEMBER 4, 1975.

In the matter of Lennon Company Aetna Life Stock Investment Programs; Lennon Company Connecticut General Stock Investment Programs; Lennon Company Travelers Stock Investment Programs; c/o Fred W. Kawam, Trust Department, The Connecticut Bank and Trust Company, One Constitution Plaza, Hartford, Connecticut 06115.

Notice is hereby given, that the Commission proposes pursuant to Section 8(f) of the Investment Company Act of 1940 ("Act"), to declare by order upon its own motion that Lennon Company Aetna Life Stock Investment Programs ("Lennon Aetna"), Lennon Company Connecticut General Stock Investment Programs ("Lennon Connecticut") and Lennon Company Travelers Stock Investment Programs ("Lennon Travelers") (collectively referred to as "Trusts"), registered under the Act as unit investment trusts, have ceased to be investment companies as defined in the Act.

Lennon Aetna registered under the Act on October 21, 1958; Lennon Connecticut and Lennon Travelers registered on December 15, 1958. Information in the Commission's files indicates that Trusts offered and sold Investment Programs ("Plans") pursuant to an effective registration statement under the Securities Act of 1933 from 1959 until the latter part of 1965. On October 13, 1965, in an action brought by the Commission in the United States District Court, District of Connecticut, the Court issued an order enjoining the Trusts from the further sale of Plans except that they were permitted to fulfill existing contractual commitments on previously sold Plans.

The Trusts' sponsor, Jay Lennon Company, became inactive following the issuance of such Court Order and was subsequently dissolved. The Connecticut Bank and Trust Company ("Bank"), Custodian for the Trusts, assumed certain duties and obligations theretofore performed by the sponsor. The Bank continued to service the outstanding accounts for the terms of each Plan. It received monthly payments; purchased the stock of the respective insurance company for each Plan; maintained balances for each participant; provided statements and reinvested dividends until each Plan terminated. The last Plans terminated in 1969 or early 1970. Upon termination the Bank had stock certificates representing the accumulated full share balances issued in the names of the participants. The stock certificates were mailed together with a check in lieu of the fractional interests to each participant upon the surrender of the Plan Certificates.

Section 8(f) of the Act provides, in pertinent part, that when the Commission, on its own motion or upon application, finds that a registered investment company has ceased to be an investment company, it shall so declare by order, and, upon the effectiveness of such order, the registration of such company shall cease to be in effect.

Notice is hereby given, that any interested person may, not later than November 28, 1975, at 5:30 p.m., submit to the Commission in writing a request for a hearing on the matter accompanied by a statement as to the nature of his interest, the reason for such request and the issues, if any, of fact or law proposed to be controverted, or he may request that he be notified if the Commission shall order a hearing thereon. Any such communication should be addressed: Secretary, Securities and Exchange Commission, Washington, D.C. 20549. A copy of such request shall be served personally or by mail (air mail if the persons being served are located more than 500 miles from the point of mailing) upon the Trusts at the address stated above. Proof of such service (by affidavit or in case of an attorney-at-law by certificate) shall be filed contemporaneously with the request. As provided by Rule 0-5 of the Rules and Regulations promulgated under the Act, an order disposing of the matter will be issued as of course following said date unless the Commission thereafter orders a hearing upon request or upon the Commission's own motion. Persons who request a hearing or advice as to whether a hearing is ordered, will receive any notices and orders issued in this matter, including the date of the hearing (if ordered) and any postponements thereof.

For the Commission, by the Division of Investment Management Regulation, pursuant to delegated authority.

[SEAL] GEORGE A. FITZSIMMONS,
Secretary.

[Rel. No. 19233; 70-5759]

MIDDLE SOUTH UTILITIES, INC. AND ARKANSAS POWER AND LIGHT CO.

Notice of Proposed Issuance and Sale of Common Stock by Subsidiary Company to Holding Company

NOVEMBER 3, 1975.

Notice is hereby given, that Middle South Utilities, Inc. ("Middle South"), 225 Baronne Street, New Orleans, Louisiana 70112, a registered holding company, and Arkansas Power & Light Company ("Arkansas"), First National Building, Little Rock, Arkansas 72203, a public utility subsidiary company of Middle South, have filed an application with this Commission pursuant to the Public Utility Holding Company Act of 1935 ("Act"), designating Sections 6(b), 9(a), 10, and 12(f) of the Act and Rule 43 promulgated thereunder as applicable to the proposed transactions. All interested persons are referred to the application, which is summarized below, for a

V 40 N 217 NOV 10 75 XUM

complete statement of the proposed transactions.

Arkansas proposes to issue and sell to Middle South (the holder of all of the issued and outstanding shares of Arkansas' common stock $12.50 par value per share), and Middle South proposes to acquire, 1,200,000 additional shares of Arkansas' common stock for an aggregate purchase price of $15,000,000 in cash. Upon completion of the foregoing transactions, Arkansas will have issued an outstanding 26,990,000 shares of common stock, which will be stated in its capital common stock account at an aggregate of $337,375,000. Arkansas proposes to use the net proceeds from the sale of the additional common stock for its construction program, estimated at $180,000,000 for 1975 and for indebtedness incurred to finance construction.

It is stated that the Arkansas Public Service Commission and the Tennessee Public Service Commission have jurisdiction over the issuance and sale of the common stock by Arkansas and that no other State commission and no Federal commission, other than this Commission, has jurisdiction over the proposed transactions. It is further stated that expenses anticipated in connection with the proposed transactions are estimated at $6,000, including legal fees of $4,000.

Notice is further given, that any interested person may, not later than December 3, 1975, request in writing that a hearing be held on such matter, stating the nature of his interest, the reasons for such request, and the issues of fact or law raised by said application which he desires to controvert; or he may request that he be notified if the Commission should order a hearing thereon. Any such request should be addressed: Secretary, Securities and Exchange Commission, Washington, D.C. 20549. A copy of such request should be served personally or by mail upon the applicants at the above-stated addresses, and proof of service (by affidavit or, in case of an attorney at law, by certificate) should be filed with the request. At any time after said date, the application, as filed or as it may be amended, may be granted as provided in Rule 23 of the General Rules and Regulations promulgated under the Act, or the Commission may grant exemption from such rules as provided in Rules 20(a) and 100 thereof or take such other action as it may deem appropriate. Persons who request a hearing or advice as to whether a hearing is ordered will receive any notices and orders issued in this matter, including the date of the hearing (if ordered) and any postponements thereof.

For the Commission, by the Division of Corporate Regulation, pursuant to delegated authority.

[SEAL] GEORGE A. FITZSIMMONS,
Secretary.

NATIONAL MARKET ADVISORY BOARD

Meeting

This is to give notice pursuant to Section 10(a) of the Federal Advisory Committee Act, 5 U.S.C. App. I 10(a), that the National Market Advisory Board will conduct open meetings on November 17 and 18, 1975 at 500 North Capitol Street, Washington, D.C. 20549, Room 776 beginning at 9:30 a.m. on November 17 and 9 a.m. on November 18. Initial notice of this meeting was published in the FEDERAL REGISTER on October 7, 1975.

The Board has also announced it plans to hold open meetings on December 15 and 16, 1975 in Washington, D.C. and on January 19 and 20, 1976 in Los Angeles, California.

The summarized agenda for the November meeting is as follows

1. Identification and discussion of major question areas with regard to the implementation of a national market system.
2. Discussion of prior proposals for implementation of such a system.
3. Discussion of such other matters as may be properly brought before the Board.

Further information may be obtained by writing Andrew P. Steffan, Director of Economic and Policy Research, Securities and Exchange Commission, Washington, D.C. 20549.

[SEAL] GEORGE A. FITZSIMMONS,
Secretary.

[File No. 24D-3062]

TIMBERLINE MINERALS, INC.

Order Temporarily Suspending Exemption, Statement of Reasons Therefor and Notice of Opportunity for Hearing

OCTOBER 31, 1975.

I. Timberline Minerals, Inc. (Issuer) a Wyoming corporation, located at DuBois, Wyoming 82513, filed a notification and offering circular on Form 1-A on March 17, 1971, covering a proposed public offering of 3,170,000 shares of its $0.10 par value common stock at 15 cents per share for an aggregate offering price of $475,500.00 on a "best efforts," minimum-maximum basis, for the purpose of obtaining an exemption from the registration requirements of the Securities Act of 1933, as amended, pursuant to the provisions of Section 3(b) thereof and Regulation A promulgated thereunder. The offering originally commenced on or about November 15, 1971, was unsuccessful and the funds returned to investors. The filing thereafter was amended and the offering resumed on June 12, 1972 under the same terms. According to the Form 2-A filed by the issuer on May 15, 1973, the offering terminated March 12, 1973 with the sale of 3,121,974 shares for an aggregate dollar amount to $468,296.10.

II. Based upon information reported by the staff, the Commission has reason to believe that:

A. The notification and offering circular filed by the issuer contains untrue statements of material facts and omits to state material facts necessary to make the statements made, in the light of the circumstances under which they were made, not misleading, particularly with respect to:

1. The plan of distribution in that there was a failure to disclose that if the public failed to purchase enough shares to reach the minimum dollar amount required of the fund escrow agreement within the allotted time, insiders and underwriters would supply the necessary funds and resell shares so obtained during the offering.

2. The failure to disclose that arrangements would be made to amend the terms of the fund escrow agreement to provide for additional periods of time within which the minimum fund escrow amount had to be reached without the consent of persons whose funds were in the escrow.

3. The use of funds other than customers' funds to close the escrow prior to the required number of shares being sold.

4. The withholding of customers' funds from deposit into the escrow account.

5. The failure to disclose all underwriters of the offering.

6. The failure to disclose that proceeds from the offering would be used to repurchase shares of Timberline stock.

B. The terms and conditions of Regulation A were not complied with in that:

1. The offering circular failed to state adequately and accurately the method by which the securities were to be offered and failed to state the names and addresses of all underwriters, the amount of the participation of each such underwriter and the nature of any material relationship between the issuer and each underwriter, all as is required by Item 5 of Schedule I.

2. The offering circular failed to state adequately and correctly the arrangements for the return of funds to subscribers if all of the securities being offered were not sold, as is required by Item 6(b) of Schedule I.

3. The Form 2-A report failed to indicate that the distribution was continuing subsequent to the reported completion date of the Regulation A offering.

4. The Form 2-A reports inaccurately state the total number of shares sold and the total amount of money received from the public from commencement of the offering to the date of the report.

5. Offers and sales of the aforementioned securities of the issuer were made to individuals who were not furnished with an offering circular as required by Rule 256(a).

C. The offering was made in violation of Section 17(a) of the Securities Act of 1933, as amended, by reason of the activities described above.

III. It appearing to the Commission that it is in the public interest and for the protection of investors that the exemption of the issuer under Regulation A be temporarily suspended,

It is ordered, pursuant to Rule 261(a) of the General Rules and Regulations under the Securities Act of 1933, that the exemption of Timberline Minerals, Inc. under Regulation A be and it hereby is, temporarily suspended.

It is further ordered, pursuant to Rule 7 of the Commission's Rules of Practice, that the issuer file an answer to the allegations contained in this order within thirty (30) days of entry thereof.

Notice is hereby given that any person having any interest in the matter may file with the Secretary of the Commission a written request for a hearing within thirty (30) days after the entry of this order; that within twenty (20) days after the receipt of such request the Commission will, or at any time upon its own motion may, set the matter down for hearing at a place to be designated by the Commission, for the purpose of determining whether this order of suspension should be vacated or made permanent, without prejudice, however, to the consideration and presentation of additional matters at the hearing; and that notice of the time and place of said hearing will be promptly given by the Commission. If no hearing is requested and none is ordered by the Commission, the order shall become permanent on the thirtieth day after its entry and shall remain in effect unless it is modified or vacated by the Commission.

By the Commission.

[SEAL] GEORGE A. FITZSIMMONS,
Secretary.

SELECTIVE SERVICE SYSTEM

SELECTIVE SERVICE SYSTEM ADVISORY COMMITTEE ON THE SELECTION OF PHYSICIANS, DENTISTS AND ALLIED SPECIALISTS

Meeting

Pursuant to the Federal Advisory Committee Act (Public Law 92-463), notice is hereby given of a meeting of the Selective Service System Advisory Committee on the Selection of Physicians, Dentists and Allied Specialists, to be held at 9:00 a.m., December 5, 1975, in Room 2010 at the New Executive Office Building, 17th and H Streets, Northwest, Washington, D.C.

The committee will meet to discuss Standby Doctors Draft legislation that could be implemented in event an emergency should arise requiring a Doctors Draft.

Attendance is open to the interested public, but limited to the space available. Persons wishing to attend should notify this office at least one day in advance. The Committee Chairman may, if he deems it appropriate, permit members of the public to present oral statements at the meeting; any member of the public may file a written statement with the committee before, during or after the meeting.

For further information concerning this committee meeting, contact Mr. Glenn R. Bowles, Selective Service Operations Manager, Selective Service System, Telephone: 202-343-7154.

Minutes of the meeting will be available upon request.

BYRON V. PEPITONE,
Director.

NOVEMBER 5, 1975.

VETERANS ADMINISTRATION

ADVISORY COMMITTEE ON STRUCTURAL SAFETY OF VETERANS ADMINISTRATION FACILITIES

Meeting

The Veterans Administration gives notice pursuant to Public Law 92-463 that a meeting of the Advisory Committee on Structural Safety of Veterans Administration Facilities will be held in Room 442 at the Veterans Administration Central Office, 811 Vermont Avenue, NW, Washington, DC on November 24, 1975 at 10 a.m. The Committee members will review Veterans Administration construction standards and criteria relating to fire, earthquake, and other disaster resistant construction.

The meeting will be open to the public up to the seating capacity of the room. Because of the limited seating capacity, it will be necessary for those wishing to attend to contact Mr. James Lefter, Director, Civil Engineering Service, Office of Construction, Veterans Administration Central Office (phone 202-389-2868), prior to November 20, 1975.

Dated: November 4, 1975.

[SEAL] R. L. ROUDEBUSH,
Administrator.

[Notice No. 114]

MOTOR CARRIER BOARD TRANSFER PROCEEDINGS

NOVEMBER 10, 1975.

Synopses of orders entered by Division 3 of the Commission pursuant to Sections 212(b), 206(a), 211, 312(b), and 410(g) of the Interstate Commerce Act, and rules and regulations prescribed thereunder (49 C.F.R. Part 1132), appear below:

Each application (except as otherwise specifically noted) filed after March 27, 1972, contains a statement by applicants that there will be no significant effect on the quality of the human environment resulting from approval of the application. As provided in the Commission's General Rules of Practice any interested person may file a petition seeking reconsideration of the following numbered proceedings on or before December 10, 1975. Pursuant to Section 17(8) of the Interstate Commerce Act, the filing of such a petition will postpone the effective date of the order in that proceeding pending its disposition. The matters relied upon by petitioners must be specified in their petitions with particularity.

No. MC–FC–75844. By order of November 3, 1975 Division 3, acting as an Appellate Division, approved the transfer to Bojef Bulk Transportation, Inc., Temple, Pa., of Certificate No. MC 112541, issued by the Commission September 25, 1961, to Harvey F. Hoppes, Andreas, Pa., authorizing the transportation of coal from points in Schuylkill County, Pa., to Trenton, Freehold, and Palisades Park, N.J., and points in four named counties in New Jersey; from points in Mahonoy Township, Schuylkill County, Pa., to points in Somerset County, N.J.; from Hazelton, Pa., points in Luzerne County, Pa., within five miles of Hazelton, and points in Schuylkill County, Pa., to five named points in New Jersey; and from Hazleton, Pa., and points within five miles thereof, to points in four named counties in New Jersey, and four named points in New Jersey. Mr. Bert Collins, Practitioner, Suite 6193, 5 World Trade Center, New York, N.Y. 10048.

[SEAL] ROBERT L. OSWALD. *Secretary.*

[Notice No. 125]

MOTOR CARRIER TEMPORARY AUTHORITY APPLICATIONS

NOVEMBER 4, 1975.

The following are notices of filing of applications for temporary authority under Section 210a(a) of the Interstate Commerce Act provided for under the provisions of 49 CFR § 1131.3. These rules provide that an original and six (6) copies of protests to an application may be filed with the field official named in the FEDERAL REGISTER publication no later than the 15th calendar day after the date the notice of the filing of the application is published in the FEDERAL REGISTER. One copy of the protest must be served on the applicant, or its authorized representative, if any, and the protestant must certify that such service has been made. The protest must identify the operating authority upon which it is predicated, specifying the "MC" docket and "Sub" number and quoting the particular portion of authority upon which it relies. Also, the protestant shall specify the service it can and will provide and the amount and type of equipment it will make available for use in connection with the service contemplated by the TA application. The weight accorded a protest shall be governed by the completeness and pertinence of the protestant's information.

Except as otherwise specifically noted, each applicant states that there will be no significant effect on the quality of the human environment resulting from approval of its application.

A copy of the application is on file, and can be examined at the Office of the Secretary, Interstate Commerce Commission, Washington, D.C., and also in the I.C.C. Field Office to which protests are to be transmitted.

MOTOR CARRIERS OF PROPERTY

No. MC 11207 (Sub-No. 360TA), filed October 22, 1975. Applicant: DEATON, INC., 317 Ave., W., P.O. Box 938, Birmingham, Ala. 35201. Applicant's representative: G. E. Tickle (same address as applicant). Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Roofing and building materials*, from the plantsite and facilities of Bird & Son, Inc., Charleston, S.C., to points in Alabama and Florida (points west of the Apalachicola River), for 180 days. Applicant has also filed an underlying ETA seeking up to 90 days of operating authority. Supporting shipper: Bird & Son, Inc., Washington St., East Walpole, Mass. 02032. Send protests to: Clifford W. White, District Supervisor, Bureau of Operations, Interstate Commerce Commission, Room 1616, 2121 Bldg., Birmingham, Ala. 35203.

No. MC 30887 Sub-No. 224TA), filed October 28, 1975. Applicant: SHIPLEY TRANSFER, INC., 1550 E. Patapsco Ave., Baltimore, Md. 21225. Applicant's representative: William B. Eckels (same address as applicant). Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Molten liquid polypropylene*, in bulk, in rear unloading tank vehicles, capable of maintaining temperatures above 360°F during transit, from Severn, N.C., to Linden, N.J., and Newport, Del., for 180 days. Supporting shipper: Robert B. Huey, President, Texapol Corporation, 602 N. Tacoma St., Allentown, Pa. Send protests to: William L. Hughes, District Supervisor, Interstate Commerce Commission, 814–B Federal Bldg., Baltimore, Md. 21201.

No. MC 43248 (Sub-No. 22TA), filed October 23, 1975. Applicant: BUSKE LINES, INC., 123 W. Tyler Ave., Litchfield, Ill. 62056. Applicant's representative: Harold Buske (same address as applicant). Authority sought to operate as a *contract carrier*, by motor vehicle, over irregular routes, transporting: *Empty containers*, from Neosho, Mo., to Litchfield, Ill., under a continuing contract with Milnot Company, for 180 days. Applicant has also filed an underlying ETA seeking up to 90 days of operating authority. Supporting shipper: Robert E. Horneker, Manager, Milnot Company, 124 W. St. John St., Litchfield, Ill. 62056. Send protests to: Harold C. Joliff, District Supervisor, Interstate Commerce Commission, P.O. Box 2418, Springfield, Ill. 62705.

No. MC 44605 (Sub-No. 44TA), filed October 23, 1975. Applicant: MILNE TRUCK LINES, INC., 2200 South 400 West, Salt Lake City, Utah 84115. Applicant's representative: Henry A. Dahn (same address as applicant). Authority sought to operate as a *common carrier*, by motor vehicle, over regular routes, transporting: *Classes A and B explosives*, between Las Vegas, Nev., and Glendale, Nev., with right to tack with existing authority, from Las Vegas, Nev., via Interstate Highway 15 to Glendale, Nev., and return over the same routes, serving all intermediate points. Applicant intends to tack with present authority at Las Vegas and Glendale, Nev., and interline with other carriers at Las Vegas, Nev., for 180 days. Supporting shipper: Talley Industires of Arizona, Inc., 4551 E. McKellips Road, Mesa, Ariz. 85201. Send protests to: Lyle D. Helfer, District Supervisor, Interstate Commerce Commission, Bureau of Operations, 5301 Federal Bldg., 125 South State St., Salt Lake City, Utah 84138.

No. MC 61396 (Sub-No. 293TA), filed October 20, 1975. Applicant: HERMAN BROS., INC., 2656 St. Marys Ave., P.O. Box 189, Omaha, Nebr. 68101. Applicant's representative: John E. Smith II (same address as applicant). Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Liquid argon*, in bulk, in tank vehicles, from Arroyo (Chester), W. Va., to points in Kentucky, Indiana, Illinois, Missouri, Kansas and Iowa, for 180 days. Applicant has also filed an underlying ETA seeking up to 90 days of operating authority. Supporting shipper: W. K. Subala, Distribution Superintendent, Airco Industrial Gases, Box 300, Chessen Lane, East Alton, Ill. 62024. Send protests to: Carroll Russell, District Supervisor, Interstate Commerce Commission, Suite 620, 110 North 14th St., Omaha, Nebr. 68102.

No. MC 51146 (Sub–No. 448TA), filed October 24, 1975. Applicant: SCHNEIDER TRANSPORT, INC., 2661 South Broadway, Green Bay, Wis. 54304. Applicant's representative: Neil A. DuJardin, P.O. Box 2298, Green Bay, Wis. 54306. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Pelletized agricultural lime and gypsum*, in bags, from Irvington, Ky., to points in Nebraska, Kansas, Minnesota, Iowa, Missouri, Arkansas, Mississippi, Wisconsin, Michigan, Illinois, Indiana, Ohio, Tennessee, Alabama, Georgia, Florida, North Carolina, South Carolina, Virginia, Maryland, Delaware, West Virginia, Pennsylvania, New Jersey, New York, Maine, New Hampshire, Vermont, Massachusetts, Connecticut, Rhode Island and the District of Columbia, for 180 days. Applicant has also filed an underlying ETA seeking up to 90 days of operating authority. Supporting shipper: American Pelletizing Corp., P.O. Box 446, Dayton, Ohio 45459. Send protests to: John E. Ryden, Interstate Commerce Commission, Bureau of Operations, 135 West Wells St., Room 807, Milwaukee, Wis. 53203.

No. MC 95540 (Sub-No. 934TA), (Correction), filed October 15, 1975, published in the FEDERAL REGISTER issued of October 30, 1975, and republished as corrected this issue. Applicant: WATKINS MOTOR LINES, INC., 1144 West Griffin Road, Lakeland, Fla. 33802. Applicant's representative: Clyde W. Carver, Suite 212, 5299 Roswell Road, NE., Atlanta, Ga. 30342. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Meats, meat products, meat by products, and articles* distributed by meat packinghouses as defined in Sections A and C of Appendix I to the report in *Descriptions in Motor Carrier Certificates* 61 M.C.C. 209 and 766, from points in Fulton County, Ga., to points in Denver County, Colo., for 180 days. Applicant has also filed an underlying ETA seeking up to 90 days of operating authority. Supporting shipper: Cudahy Foods Co., a division of General Hosts, Inc., 6540 Powers Ferry Road, Suite 350, Atlanta, Ga. 30339. Send protests to: Joseph B. Teichert, District Supervisor, Interstate Commerce Commission, Bureau of Operations, Monterey Bldg., Suite 101, 8410 NW. 53rd Terrece, Miami, Fla. 33166. The purpose of this republication is to change Docket No. MC 95540 Sub-No. 934, in lieu of MC 9554 Sub-No. 934TA, which was previously published in error.

No. MC 103051 (Sub-No. 355TA), filed October 23, 1975. Applicant: FLEET TRANSPORT COMPANY, INC., 934 44th Ave., North, Nashville, Tenn. 37209. Applicant's representative: Russell E. Stone (same address as applicant). Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Vegetable oils*, animal fats and blends of vegetable oils and animal fats, in bulk, in tank vehicles, from Chattanooga, Tenn., to points Louisiana, for 180 days. Sodus, Mich., for 180 days. Supporting shipper: Robert E. Ryan, GTM, Jeno's, Inc., P.O. Box 6509, Duluth, Minn. 55806. Send protests to: Marie Spillars, Transportation Assistant, Interstate Commerce Commission, Bureau of Operations, Room 240 Old P.O. Bldg., 215 NW. Third, Oklahoma City, Okla. 73102.

No. MC 113828 (Sub-No. 232TA), filed October 28, 1975. Applicant: O'BOYLE TANK LINES, INC., P.O. Box 3006, Washington, D.C. 20014. Applicant's representative: William P. Sullivan, Federal Bar Bldg., West, 1819 H St. NW., Washington, D.C. 20006. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Liquefied petroleum gas*, in bulk, between points in York County, S.C., on the one hand, and, on the other, points in Tennessee and Georgia, for 180 days. Supporting shipper: Carolina Pipeline Company, P.O. Box 6317, Columbia, S.C. 29260. Send protests to: W. C. Hersman, District Supervisor, Interstate Commerce Commission, 12th and Constitution Ave. NW., Room B–317, Washington, D.C. 20423.

No. MC 114608 (Sub-No. 29TA), filed October 22, 1975. Applicant: CAPITAL EXPRESS, INC., 5635 Clay Ave., SW., Grand Rapids, Mich. 49508. Applicant's representative: Wilhelmina Boersma, 1600 First Federal Bldg., Detroit, Mich. 48226. Authority sought to operate as a *contract carrier*, by motor vehicle, over irregular routes, transporting: *Dishwashers and cooling boxes and parts thereof* when transported at the same and in the same vehicle with such dishwashers or cooling boxes, from Columbus, Ohio to points in Wyoming and Michigan, under a continuing contract with Kelvinator, Inc., Grand Rapids, Mich., for 180 days. Supporting shipper: Kelvinator, Inc., 1545 Clyde Park, SW., Grand Rapids, Mich. 49509. Send protests to: C. R. Flemming, District Supervisor, Interstate Commerce Commission, Bureau of Operations, 225 Federal Bldg., Lansing, Mich. 48933.

No. MC 117119 (Sub-No. 555TA), filed October 22, 1975. Applicant: WILLIS SHAW FROZEN EXPRESS, INC., P.O. Box 188, Elm Springs, Ark. 72728. Applicant's representative: L. M. McLean (same address as applicant). Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Foodstuffs*, (except in bulk), from the plantsites and warehouse facilities of Jeno's Inc., at or near Sodus, Mich., to points in Arizona, Arkansas, California, Colorado, Idaho, Kansas, Louisiana, Missouri, Montana, Nebraska, Nevada, New Mexico, Oklahoma, Oregon, Texas, Utah, Washington and Wyoming, restricted to traffic originating at the named origins and destined to points in the states named, for 180 days. Supporting shipper: Jeno's, Inc., 525 Lake Ave., South, Duluth, Minn. 55802. Send protests to: William H. Land, Jr., District Supervisor, 3108 Federal Office Bldg., 700 West Capitol, Little Rock, Ark. 72201.

No. MC 118142 (Sub-No. 105TA), filed October 21, 1975. Applicant: M. BRUENGER & CO., INC., 6250 N. Broadway, Wichita, Kans. 67219. Applicant's representative: Lester C. Arvin, 814 Century Plaza Bldg., Wichita, Kans. 67202. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Partially cured rubber* (except in bulk), moving in specialized temer controlled equipment, from the plantsite of Bandag, Inc., located at or near Oxford, N.C., to Chino, Calif., for 180 days. Applicant has also filed an underlying ETA seeking up to 90 days of operating authority. Supporting shipper: Bandag, Inc., 1056 Hershey Ave., Muscatine, Iowa 52761. Send protests to: M. E. Taylor, District Supervisor, Interstate Commerce Commission, 501 Petroleum Bldg., Wichita, Kans. 67202.

No. MC 119880 (Sub-No. 73TA), filed October 23, 1975. Applicant: DRUM TRANSPORT, INC., P.O. Box 2056, East Peoria, Ill. 61611. Applicant's representative: B. N. Drum (same address as applicant). Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Alcoholic liquors*, in bulk, in tank vehicles, in straight or mixed shipments, from Bardstown and Owensboro, Ky.; Atchison, Kans.; and Muscatine, Iowa, to Long Prairie, Minn., for 180 days. Applicant has also filed an underlying ETA seeking up to 90 days of operating authority. Supporting shipper: Minnesota Distillers, Inc., Terry J. Cavin, President, 609 6th St., NE., Long Prairie, Minn. 56347. Send protests to: Patricia A. Roscoe, Transportation Assistant, Interstate Commerce Commission, Everett McKinley Dirksen Bldg., 219 S. Dearborn St., Room 1086, Chicago, Ill. 60604.

No. MC 121306 (Sub-No. 11TA), filed October 28, 1975. Applicant: SUPERIOR MOTOR EXPRESS, INC., P.O. Box 98, Gold Hill, N.C. 28071. Applicant's representative: Francis J. Ortman, 1100 17th St., NW., Suite 613, Washington, D.C. 20036. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Steel pipe, tubing and conduit*, from the plantsite of Wheatland Tube Company, Wheatland, Pa., to points in South Carolina, Georgia and Florida, for 180 days. Applicant has also filed an underlying ETA seeking up to 90 days of operating authority. Supporting shipper: Wheatland Tube Company, Independence Square, Public Ledger Bldg., Philadelphia, Pa. 19106. Send protests to: Terrell Price, District Supervisor, 800 Briar Creek Road, Room CC516, Mart Office Bldg., Charlotte, N.C. 28205.

No. MC 123392 (Sub-No. 65TA), filed October 24, 1975. Applicant: JACK B. KELLEY, INC., Rt. 1, Box 400, Amarillo, Tex. 79106. Applicant's representative: Weldon M. Teague (same address as applicant). Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Liquid oxygen, liquid argon, and liquid nitrogen*, between points in Illinois, Michigan, Minnesota, North Dakota and Wisconsin. Applicant intends to tack its existing authority with MC 123392 Sub-31, for 180 days. Supporting shippers: Airco Industrial Gases, 575 Mountain Ave., Murray Hill, N.J. 07974. Liquid Air, Inc., P.O. Box 26230, San Francisco, Calif. 94126. Send protests to: Haskell E. Ballard, District Supervisor, Interstate Commerce Commission, Bureau of Operations, Box H–4395, Herring Plaza, Amarillo, Tex. 79101.

No. MC 124692 (Sub-No. 154TA), filed October 22, 1975. Applicant: SAMMONS TRUCKING, P.O. Box 4347, Missoula, Mont. 59801. Applicant's representative: James B. Hovland, 425 Gate City Bldg., Fargo, N. Dak. 58102. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Iron and steel articles*, from St. Paul, Minn., to the construction site of The Co-op Power Association and United Power Association, located approximately four miles south of Underwood, N. Dak., for 180 days. Applicant has also filed an underlying ETA seeking up to 90 days of operating authority. Supporting shipper: John Pakulski, Traffic Manager, Maxon Corporation, 500 Como Ave., St. Paul, Minn. 55165. Send protests to: Paul J. Labane, District Supervisor, Interstate Commerce Commission, Room 222, U.S. Post Office Bldg., Billings, Mont. 59101.

No. MC 126118 (Sub-No. 17TA), filed October 24, 1975. Applicant: GEORGE M. HILL, doing business as, HILL TRUCKING COMPANY, 928 W. Main St., Johnson City, Tenn. 37601. Applicant's representative: George M. Hill (same address as applicant). Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Malt beverages*, from Detroit, Mich., and its commercial zone to Appalachia and Bristol, Va., and Johnson City, Tenn., and their commercial zones, for 180 days. Supporting shippers: Boggs Distributing Company, 2210 Buffalo Road, Johnson City, Tenn. Good Luck Beverage, Inc., P.O. Box 85, Bristol, Va. 24201. Send protests to: Joe J. Tate, District Supervisor, Bureau of Operations, Interstate Commerce Commission, Suite A–422, U.S. Courthouse, 801 Broadway, Nashville, Tenn. 37203.

By the Commission.

WATER AND RELATED LAND RESOURCES; FEASIBILITY STUDIES

Policies and Procedures

V 40 217 NOV 10 75 XUM

Title 33—Navigation and Navigable Waters

CHAPTER II—CORPS OF ENGINEERS, DEPARTMENT OF THE ARMY

WATER AND RELATED LAND RESOURCES; FEASIBILITY STUDIES

Policies and Procedures

The Secretary of the Army, acting through the Chief of Engineers, hereby gives notice of the adoption of a series of regulations establishing guidance for conducting Corps of Engineers feasibility studies for water and related land resources, consistent with the planning requirements of the U.S. Water Resources Council Principles and Standards and related policies.

The Water Resources Council promulgated and published in the FEDERAL REGISTER, 10 September 1973, interagency guidelines for the planning of water and related land resources. These guidelines became effective 25 October 1973. Since that time, the Chief of Engineers has been developing a comprehensive series of regulations to implement those guidelines and other legislative authorities enacted by Congress during the last several years. These other authorities include, but are not limited to, the National Environmental Policy Act of 1969 (Pub. L. 91–190), the River and Harbor Act of 1970 (Pub. L. 91–611), the Federal Water Pollution Control Act Amendments of 1972 (Pub. L. 92–500), and the Water Resources Development Act of 1974 (Pub. L. 93–251).

Under procedures established by the Water Resources Council, the regulations adopted below were reviewed by the Council. In a letter dated 8 August 1975 to the Honorable Victor V. Veysey, Assistant Secretary of the Army (Civil Works), Mr. Warren D. Fairchild, Director, Water Resources Council, stated that the Council found the regulations to be generally consistent with the "Principles and Standards." Specific suggestions on various aspects of the regulations were also provided by the Council; these were incorporated into the final regulations as determined appropriate.

The Council also noted that the "Net Benefit Rule" (§ 290.11(c)(1), adopted by the Secretary of the Army as a decision criterion for the Corps of Engineers to recommend Federal (Corps) participation in proposed water and related land resources plans, is under consideration by the Council of Members (Alternates) as part of the study of the "Principles and Standards" authorized by Section 80(c), Pub. L. 93–251. The outcome of this study may affect this criterion.

The Water Resources Council provided member agencies a transition period during which reports substantially completed prior to 25 October 1973 could be forwarded to Congress with an addendum addressing the primary requirements of the "Principles and Standards." Studies initiated or completed by the Corps of Engineers since 25 October 1973, with funds appropriated by Congress, must comply fully with the Water Resources Council "Principles and Standards." Many of these studies are now nearing important decision points which require firm guidance from the Secretary of the Army on the implementation of the "Principles and Standards" and related legislative authorities. In view of these factors, and the favorable consistency review conducted by the Water Resources Council, the Secretary of the Army has decided to adopt the regulations in final form but to provide a one-year period for public comment and Corps of Engineers planning experience. After the one year period, the Chief of Engineers will review comments from the public and experience gained by Corps planners and recommend such adjustments as deemed necessary.

Comments and suggestions on the seven regulations adopted below are invited from interested parties and organizations and should be sent to the following address no later than 10 November 1976:

Chief of Engineers, ATTN: DAEN–CWP–A, Department of the Army, Washington, D.C. 20314

Single copies of a reprint of the seven regulations may be obtained from the above address. Meetings will be scheduled on these regulations as necessary, based on public response to this notice.

Effective Date: These regulations are effective 10 November 1975.

Dated: October 20, 1975.

RUSSELL J. LAMP,
Colonel,
Corps of Engineers Executive.

PART 290—PLANNING PROCESS: MULTIOBJECTIVE PLANNING FRAMEWORK [ER 1105–2–200]

Sec.

290.1 Purpose.
290.2 Applicability.
290.3 References.
290.4 Definitions.
290.5 Objective of the planning process.
290.6 Basic policies.
290.7 Planning process.
290.8 Essential planning considerations.
290.9 Functional planning tasks.
290.10 Plan development stages.
290.11 Plan selection and recommendation.
290.12 Effective date and applicability to planning programs.

AUTHORITY: Water Resources Council, *Principles and Standards for Planning Water and Related Land Resources*, 38 FR 24778–24869, 10 September 1973.

§ 290.1 Purpose.

This regulation establishes guidance for conducting feasibility studies for water and related land resources, consistent with the planning requirements of the WRC Principles and Standards (P&S) and related policies. It establishes a process under which alternative plans are formulated and evaluated.

§ 290.2 Applicability.

This regulation is applicable to all OCE elements and all field operating agencies having Civil Works responsibilities.

§ 290.3 References.

(a) Title I, Public Law 91–190, (83 Stat. 852), *National Environmental Policy Act*, 1 January 1970.

(b) Section 122, Public Law 91–611 (84 Stat. 1818), *River and Harbor and Flood Control Act of 1970*, 31 December 1970.

(c) Sections 201, 208, 209, and 303, Public Law 92–500 (86 Stat. 81), *Federal Water Pollution Control Act Amendments of 1972*, 18 November 1972.

(d) Section 73, Public Law 93–251 (88 Stat. 12), *Water Resources Development Act of 1974*, 7 March 1974.

(m) ER 1105–2–800, Public Involvement: General Policies (33 CFR 380).

(n) ER 1105–2–921, System of Accounts (33 CFR 393).

§ 290.4 Definitions.

(a) "Alternative Plans" are different ways for managing water and related land resources employing structural and/or non-structural measures.

(b) "Base Condition" is the existing economic, social, and environmental characteristics of the area under study.

(c) "Detailed Plans" are highly developed approaches for addressing different mixes of planning objectives, recognizing that additional efforts will be necessary to provide more detailed engineering design once a plan is selected for implementation.

(d) "Evaluation" is the process of analyzing plans against the "without condition" and against each other to determine and compare their beneficial and adverse contributions.

(e) "Impacts" (effects) are the economic, social, and environmental consequences expected to result from alternative plans.

(f) "Implementable Plans" are plans which can be transformed from concept to reality. This requires consideration of institutional and technological feasibility.

(g) "Most Probable Future" is the projection of basic demographic, economic, and social parameters, which is used as the basis for defining the "without condition" and the planning objectives for a particular study.

(h) "Measure" is any structural or non-structural means of resource management, and may be part of a plan or the entire plan.

(i) "Planning Objectives" are the national, state, and local water and related land resource management needs (opportunities and problems) specific to a given study area that can be addressed to enhance National Economic Development or Environmental Quality.

(j) "Planning Process" is a systematic approach to analyzing needs and problems, establishing planning objectives, and developing and evaluating alternative resource management plans.

(k) "Plan of Study" is a document prepared during the initial stage of planning containing a preliminary description of what the study will address and how it will be conducted.

(l) "Resource Management" involves the development, conservation, enhancement, preservation, or maintenance of water and related land resources to achieve the goals of society expressed nationally and locally.

(m) "Without Condition" is the detailed specification of the conditions which will prevail over the planning period in the absence of implementation of a plan to alter the management of water and related land resources. The description of the without condition covers all categories of impacts which are significant to the evaluation of alternative plans.

§ 290.5 Objective of the planning process.

The objective of the multiobjective planning framework is to guide planning for the conservation, development, and management of water and related land resources. The framework requires the systematic preparation and evaluation of alternative ways of addressing problems, needs, concerns, and opportunities under the P&S objectives of National Economic Development (NED) and Environmental Quality (EQ). This results in information necessary to make effective choices regarding resource management under existing and projected conditions. Alternative plans are to be formulated without bias to structural or non-structural measures. The appendices and references, particularly reference § 290.3(e), must be utilized for a full understanding of the multiobjective planning framework.

§ 290.6 Basic policies.

Corps policy on multiobjective planning is largely derived from several legislative and executive authorities, referenced in § 290.3. In major part, these authorities establish and define the national objectives for water resource planning, specify the range of impacts that must be assessed, and set forth the conditions and criteria which must be applied when evaluating plans.

(a) The P&S require that Federal and Federally-assisted water and related land planning be directed to achieve National Economic Development (NED) and Environmental Quality (EQ) as equal national objectives. NED is to be achieved by increasing the value of the nation's output of goods and services and improving national economic efficiency; EQ is to be achieved by the management, conservation, preservation, creation, restoration, or improvement of the quality of certain natural and cultural resources and ecological systems.

(b) The term "planning objectives" refers to water and related land resource management needs that are specific to each study. They are derived from analysis of the needs (opportunities and problems) of the study area that can be addressed to enhance the national objectives of P&S.

(c) The EQ objective in P&S should be interpreted as being the same as the definition of environmental quality contained in the National Environmental Policy Act of 1969 (NEPA). Thus, planning to achieve the EQ objective should address the broadest scope of concerns pertaining to the natural and cultural environment. EQ plans shall include only those measures which are concerned with management of water and related land resources. EQ plans shall address traditional water resources needs. Satisfaction of these needs to the degree accomplished by the NED plan is not necessary but the decision to forego satisfaction of these needs must be deliberate. For example a decision to continue to incur flood damages may be warranted in order to serve some conflicting planning objectives. If it becomes apparent in the course of a study that an economically justified plan to satisfy traditional water resource needs cannot be formulated, continued formulation of an EQ plan or other alternative plans is not warranted.

(d) P&S also requires that the impacts of a proposed action be measured and the results displayed or accounted for in terms of contributions to four accounts: National Economic Development (NED), Environmental Quality (EQ), Regional Development (RD), and Social Well-Being (SWB).

(1) Contributions to the NED and EQ accounts are the overall beneficial and adverse impacts of the proposed action on the components of the national objectives of P&S.

(2) Contributions to the RD account are determined by establishing a proposal's effects on a region's income, employment, population, economic base, environment, and social development.

(3) Contributions to the SWB account are determined by establishing a proposal's effects on real income, security of life, health and safety, education, cultural and recreational opportunities, emergency preparedness, and other factors.

(e) In addition to P&S, the River and Harbor and Flood Control Act of 1970 and the National Environmental Policy Act of 1969 require assessment of plan impacts. Section 122 of the 1970 Act specifies those impacts that, as a minimum, must be assessed for any proposed action, while Section 102(2)(c), of NEPA requires that the environmental impacts of any proposed action be fully assessed.

(f) The Federal Water Pollution Control Act Amendments of 1972 links water quality concerns to the more traditional aspects of resource management planning. Among other things, the Act, in Sections 201, 208, 209, and 303, places substantial emphasis on planning problems and complementarities falling within the broad scope of P&S.

§ 290.7 Planning process.

A representation of the planning process is provided as Figure 1.

a. Achievement of the planning process objective defined in § 290.5 requires the application of several essential planning considerations which are discussed more fully in § 290.8.

b. The four functional planning tasks of problem identification, formulation of alternatives, impact assessment, and evaluation, will be performed throughout a study. These planning tasks are explained in § 290.9 and other regulations in the 1105–2–200 series.

c. Plans will be developed in three separate stages: development of a Plan of Study (POS); development of intermediate plans; and development of detailed plans. These stages are explained in § 290.10 and Part 291 of this chapter.

§ 290.8 Essential planning considerations.

A number of essential considerations are requisite to successful planning: the interdisciplinary character of the planning team, planning flexibility, implementability of the final alternative plans, institutional analysis, and public involvement. Public involvement is discussed in Part 380 of this chapter; the others are discussed below:

(a) *Interdisciplinary Planning.* The requirements of the P&S, NEPA, and Section 122, among others, necessitate an interdisciplinary planning approach to identify and define planning objectives, develop creative alternative plans, and analyze a broad range of complex issues, including the likely economic, social, and environmental consequences of plan implementation. This is best accomplished by a planning team which employs a diversity of professional skills.

(1) The interdisciplinary team approach will be utilized throughout a study with all participants having equal opportunity to be involved. This requirement does not mean that all participants must be involved in each activity, task, or stage, only that they must be involved when their skills could have a material effect on study progress and output.

(2) The role of the study managers is pivotal to the successful accomplishment of interdisciplinary planning since they are responsible for coordinating and synthesizing the efforts of all involved.

(3) To the extent appropriate, consultants, members of citizen groups, representatives of other government agencies, and other segments of the public should also be included as a part of the planning team to draw from a wider variety of sources and provide different perspectives on the study and its direction.

V 40 217 NOV 10 75 XUM

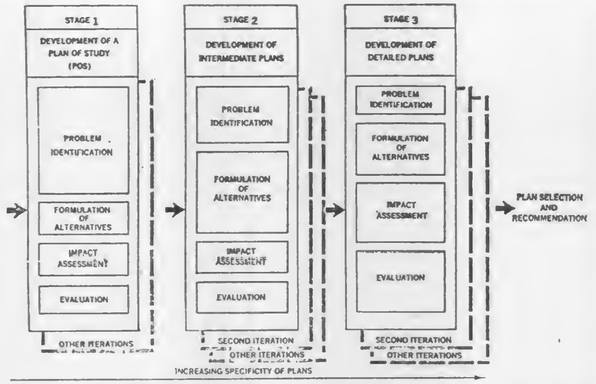

Figure 1: General Relationship of Plan Development Stages and Functional Planning Tasks

(b) *Flexibility.* Flexibility is obtained when each stage of the planning process, embracing problem identification, formulation of alternatives, impact assessment, and evaluation is repeated one or more times as necessary. In this manner, additional or increasingly precise information is introduced to guide the formulation and evaluation of alternative plans. Where conditions change significantly during the course of a study, subsequent iterations of the planning tasks can be altered to reflect and accommodate such change. Thus, the planner is provided a systematic, highly flexible means for taking the preliminary assumptions and data identified in Stage 1 and translating them into the more precise and detailed plans displayed at the completion of Stage 3. Figure 1 outlines the general relationships among the three plan development stages and the four functional planning tasks and suggests how the emphasis on the various tasks is likely to change as a study progresses.

(c) *Implementability.* The detailed plans presented at the conclusion of the planning process are to be management actions capable of being implemented based on their institutional and technological feasibility. Public involvement and institutional analysis shall be conducted throughout the study to aid in developing implementable plans. The alternatives presented at the end of Stage 3 must be fully developed with their appropriate management measures specified. Resource requirements, size and location, and resultant outputs of each detailed plan should be specified. Public and private sector expenditures or actions necessary to carry out each plan should also be identified.

(d) *Institutional Analysis.* An institution is an organization or political/social process that is generally structured, systematized, and stable. It may be a formal or informal body, group, or agency as well as one or a set of formalized practices, procedures, customs, or traditions. Political and social institutions play an essential role in the planning process, in that they can be critical determinants regarding implementability. Institutions are diverse and wideranging. State governments, bi-state agencies, local planning agencies, established tax structures, and general attitudes toward financial obligation are examples.

(1) *Analysis.* Analysis of institutions is one means of assuring the feasibility of alternative plans. As plans increasingly responsive to the planning objectives are developed, a parallel, yet critically related effort must be carried out to assure plan implementability. Analysis is made to determine the institutional requirements imposed by alternative plans and the capability of existing institutions to meet those requirements. This analysis starts with a preliminary survey of existing institutions relevant to the problems addressed by the study. This requires becoming acquainted with the political character of the area and identifying any widespread attitudes or local customs regarding the management or use of resources. As the study progresses, institutional base information is refined and expanded. Financing capabilities, legal authorities, programs, and policies are described with increasing precision. Simultaneously, the views and desires of potential project sponsors must be fully considered and integrated into the planning process. The result should be a clear picture of how various alternatives could be implemented and by whom, indicating both the capabilities of different institutions with respect to a total plan or components thereof, as well as possible constraints or impediments, existing or potential, to implementation.

(2) *Relation to Public Involvement.* An early and active program of public involvement and interagency coordination is essential to successful institutional analysis and, ultimately, to plan implementation. Appropriate organizations and agencies and other publics should be active participants in the planning process early in Stage 1 rather than viewed as outsiders who must subsequently be convinced of the worth of a plan and its implementation. Early participation and coordination may preclude or minimize later conflict or confrontation that could negate the validity of a plan that is otherwise economically, socially, and environmentally acceptable.

(3) *Implementation Arrangements.* The analysis will specify how, when, and by whom each plan may be implemented. The most socially and politically acceptable means available for the implementation of each final plan, incuding proposals for new organizations or financing methods or new roles for existing institutions of limited capability, will be specified. This could include broadening the Corps' responsibility. The Corps or a number of other Federal, state, regional, or local entities may implement a plan. However, lack of an existing capability for carrying out a plan, or component thereof, will not preclude the development of that plan or component provided that a realistic recommendation for a new implementing mechanism can be made. Finally, the rationale used to achieve the recommended implementation arrangements should be clearly and concisely incorporated in the report.

§ 290.9 Functional planning tasks.

Four functional planning tasks, each composed of specific activities, are to be carried out during each stage of the planning process. While emphasis may be on a particular activity at a given point in the process, successful accomplishment of each task, as well as the planning process in general, requires continuous integration of all activities. Each activity should reflect the result of previous activities and should complement the other activities required to carry out the study. The four planning tasks and their associated activities are described below and are discussed more fully in other regulations (reference Parts 292, 293, 294 and 295 of this chapter)

(a) *Problem Identification—Task 1.* Problem identification is the determination of the range of water and related land resource problems a study will address. It provides for establishing planning objectives which give direction to subsequent planning tasks. It is carried out by identifying resource management problems and public concerns, analyzing them to determine the physical area to be studied, surveying existing and projected resource conditions in the area, and synthesizing this information into specific planning objectives. Activities to be carried out in problem identification are as follows:

(1) *Identify public concerns.* This activity identifies the range of economic, social and environmental concerns that form the basis for detailing specific water and related land resource management problems to be addressed in the study. The general public, interest groups, and government agencies will be consulted to obtain their views regarding what the study should address.

(2) *Analyze resource management problems.* Based on requirements contained in national policies and the study authority, public concerns should be analyzed to more specifically determine the

range of water and related land resource management problems to be addressed. The full complement of issues, concerns, needs, constraints, opportunities, and desires expressed by the public in relation to the resources of the study are to be reflected. One element of this activity involves analyzing previously established water "needs" and priorities to confirm their relevance to the study situation. Conduct of this activity requires extensive professional analysis of available information, including that generated during previous and on-going studies, to validate current and likely future resource management problems.

(3) *Define the study area.* The range of identified resource management problems should be examined as a basis for defining the geographic area to be studied. Depending upon the character and range of resource management problems to be studied, the study area may or may not have the same boundaries as the area described in the study authority. Properly defining the study area is extremely important since it significantly influences the types of problems, needs, and opportunities to be considered in greater detail.

(4) *Describe the base condition.* The study area should be described in terms of its existing water and land uses, as well as its economic, social, and environmental characteristics. The description should summarize existing conditions in the study area and verify actual and potential resource management problems.

(5) *Project future conditions.* Drawing on the public concerns regarding existing and future problems and opportunities in the study area, including a thorough analysis of the base condition, a number of reasonable alternative future conditions should be projected. A range of these conditions which reflect alternative assumptions about the future will be presented to the public. From this range of alternative futures, the one that best reflects the public's desires and aspirations, consistent with the constraints imposed by the economic, environmental, social, and political systems, will serve as the basis for projecting future conditions and will represent the "most probable future".

(6) *Establish planning objectives.* Initially, establishing planning objectives involves analyzing the range of public and professional concerns expressed about the use of water and related land resources in the study area to translate them into specific objectives for the study. These needs must be net of outputs which will be obtained without any change in existing resource management plans or programs; i.e., the "without condition". These differences will be analyzed as a basis for translating needs, opportunities, concerns, and constraints into the planning objectives of the study. These objectives will be set forth and described as specifically as possible so as to provide a meaningful guide and focus for subsequent formulation activities.

(b) *Formulation of Alternatives—Task 2.* Formulation of alternatives is the development of different resource management plans to address planning objectives. The plans which are initially formulated will be assessed and evaluated. Plans which best address NED, EQ and a mix of the two will be identified. Candidates for NED plans are those which are likely to maximize net economic benefits and candidates for EQ plans are those likely to make significant contributions to preserving, maintaining, restoring, or enhancing cultural and natural resources. During subsequent iterations, candidate plans will be reformulated to insure that the best NED, EQ, and mixed plans are included in the final array of alternatives. Designation and reformulation of candidate plans requires substantial professional analysis and judgement and should reflect public preferences and desires. The NED and EQ plans are not intended to establish a polar condition, since plans which optimize NED and those which emphasize EQ must still meet a range of specific evaluation criteria and, therefore, could be similar or even the same plan. Where NED and EQ plans are significantly different, other alternatives reflecting significant trade-offs between them will be formulated so as not to overlook the best overall plan. If possible, an essentially "non-structural plan" should be carried through the planning process. Where relevant to addressing public concerns, "no development" plans may also be formulated. Activities to be carried out in formulation of alternatives are as follows:

(1) *Identify measures.* A broad range of technical and institutional measures, structural and non-structural, for potentially satisfying the planning objectives will be set forth. The identification and consideration of measures proposed or suggested by different interest groups is essential. The result is a preliminary identification and description of all the different management measures that might be applicable to a given study.

(2) *Categorize applicable management measures.* The range of measures should be analyzed in relation to the planning objectives to identify those which could address a number of the objectives and those which could address only one. Each applicable measure should then be compared to every other related measure to determine whether it is competitive or complementary thereto.

(3) *Develop plans.* Linking or combining the different applicable measures into alternative plans initially involves choosing a measure which addresses a number of objectives. To this, complementary measures which more fully address the objectives are added incrementally. This process will be repeated, adding complementary measures, until a number of management systems are developed. Plans will be developed by analyzing the complementary and competitive interactions among measures, to identify and minimize conflicts, to obtain consistency, and to insure completeness to the extent possible. Subsequent impact assessment and evaluation will narrow the range of alternatives and establish a basis for effective choice among plans.

(4) *Consider plans of others.* Other plans, proposed by governmental or non-governmental interests, will be identified and included in the planning process. These will include appropriate "non-Federal" plans that would likely be undertaken in the absence of the Corps plan. Such plans will be assessed and evaluated along with the alternative plans developed by the Corps.

(c) *Impact Assessment—Task 3.* Impact assessment is the identification, description, and, if possible, measurement of the effects of the different alternative plans on the base year condition. Consistent with the requirements of the P&S, Section 102(2)(c) of NEPA, and Section 122 of the River and Harbor and Flood Control of 1970, impact assessment provides for analyzing the significant effects of each alternative. These are the economic, social, or environmental consequences of an alternative which would be likely to have a material bearing on the decision-making process. Impact assessment requires forecasting where and when significant primary, and higher order effects could result from implementing a given alternative. This determination requires analyzing and displaying monetary and non-monetary changes in an objective manner based on professional and technical assessment of the resources. The absence of change or no net change from the base condition could also be a significant impact in certain instances and care must be taken to surface such information during this task. Describing impacts does not reflect societal preferences; these preferences are determined through subsequent evaluation. Activities to be carried out in impact assessment are as follows:

(1) *Determine sources of impacts.* The aspects of each alternative that could cause significant impacts will be identified and specified. This requires analyzing the inputs, measures, and outputs associated with the alternatives to determine causative factors that could impact on elements of the base condition.

(2) *Identify and trace impacts.* The causative factors related to each alternative should be compared to the elements of the base condition for the purpose of identifying impacts. Identifying impacts requires forecasting whether these factors could cause significant changes from the base. Accomplishing this requires cause and effect analysis to identify and trace through those impacts which are significant.

(3) *Specify incidence of impacts.* The geographical location of each impact should be identified. In addition, it will be necessary to establish when impacts are expected and their duration.

(4) *Measure impacts.* As precisely as possible, the magnitude of each impact should be determined. The impacts should be quantified using appropriate monetary or non-monetary units or concisely characterized in a written description.

(d) *Evaluation—Task 4.* Evaluation is the analysis of each plan's impacts against the "without condition" and against the other plans. Whereas impacts are identified through an objec-

V 40 217 NOV 10 75 XUM

tive undertaking largely on professional analysis, evaluation determines the subjective value of these changes. This is accomplished by conducting "with and without" analysis of the alternative plans and ascribing values to the impacts based on the public's perceptions of them. The process begins by establishing the contributions of each alternative in relation to the planning objectives and the NED, EQ, RD, and SWB accounts of the P&S. Then the response of the alternatives to specified evaluation criteria will be determined. From this information, judgments will be made concerning the beneficial and adverse nature of the contributions of an alternative to establish its overall desirability. After this has been done for each alternative, plans that do not result in an improvement over the without condition will be eliminated from further consideration. The first three activities listed below provide more explicit information on performing this aspect of evaluation. The relative merits of each remaining alternative in comparison with the other remaining alternatives will then be established. By so doing, evaluation will surface information which will be incorporated in succeeding iterations so as to more fully achieve beneficial contributions while reducing adverse contributions. Activities to be carried out in evaluation are as follows:

(1) *Appraise planning objective fulfillment.* The degree to which the alternative plans contribute to the planning objectives will be determined. This involves relating the significant impacts of each alternative to the planning objectives and determining if and how well the different alternatives contribute to the objectives.

(2) *Appraise System of Accounts contributions.* Each plan is valued in terms of its beneficial and adverse consequences on the four accounts. This involves analysis of each significant impact to determine the positive or negative contributions a plan will make in regard to NED, EQ, RD, and SWB. A fuller explanation regarding the content and use of the System of Accounts is contained in Part 393 of this chapter.

(3) *Apply specified evaluation criteria.* Other criteria which will be applied to provide a basis for choosing among alternative plans are acceptability, completeness, effectiveness, and efficiency, which are explicitly stated in the P&S, and certainty, geographical scope, NED benefit-cost ratio, reversibility, and stability which are derived from the first four. These criteria and their application are discussed more fully in Part 295 of this chapter. Determining certainty, stability, and reversibility requires the use of sensitivity analysis, alternative futures, and risk and uncertainty analysis as specified in the P&S.

(4) *Perform trade-off analysis.* Trade-off analysis is the actual comparison of plans, based upon perceptions of affected groups and the results of applying all the appropriate evaluation criteria. Its purpose is to identify plans which serve a wide range of interest, including the Federal Interest. Alternative plans must be compared in such a manner that impacts measured in dissimilar units may be traded-off in such a way that the public and decision-makers are provided a basis for effective choice.

(5) *Designate NED and EQ plans.* Based on the criteria specified in the P&S and discussed above, designate the alternative or alternatives which are the most likely NED and EQ plans.

(e) *Determine if Repeating the Planning Tasks is Necessary.* At the completion of evaluation, the results of carrying out the four planning tasks will be analyzed to establish the necessity for, or direction of, the next iteration. If reiteration is necessary, the planning tasks will be repeated to develop more precise and detailed plans that more fully address the planning objectives while minimizing adverse economic, social and environmental impacts. To aid in this, specific criteria listed in Part 295 of this chapter, will be applied for reformulating the plans designated as candidate NED plans, for those designated as candidate EQ plans, and for those candidates which provide a mix of NED and EQ contributions. When a satisfactory set of detailed, implementable plans result from an iteration, the plan selection and recommendation criteria described in para 11 will be applied.

§ 290.10 Plan development stages.

Developing plans in three stages provides for improving and increasing the level of detail and reliability of data and analyses, and for incrementally developing more precise alternative plans throughout a study. The three plan development stages are described below and are discussed more fully in Part 291 of this chapter.

(a) *Stage 1—Development of Plan of Study (POS).* During the initial stage, the four planning tasks are performed at a preliminary level of detail to define the scope and character of the study as a guide to subsequent planning. During this stage, principal emphasis will be on identification of the range of issues related to resource management in the study area. Because of the introductory nature of the planning tasks at this stage, the effort will generally involve analyzing a wide range of available data, which may be more qualitative than quantitative. The general purpose of this stage is to make an initial analysis of water and related land resource management problems and how they could be solved. The product will be a Plan of Study (POS) document describing the scope of the study and the broad management actions necessary to carry it out.

(b) *Stage 2—Development of Intermediate Plans.* The intermediate stage emphasizes identifying and analyzing the range of alternative ways for addressing the planning objectives. Considerable emphasis must be placed on more specifically defining these objectives. Based on a more definitive analysis of the objectives, alternatives will be outlined and refined without concentrating on detailed engineering or design considerations. Data should be sufficient to set forth and analyze alternative concepts of resource management. The potential impacts of these alternative plans are to be assessed, concentrating on their significant consequences. Preliminary evaluation will be then conducted. A high level of detail is not appropriate at this stage. The alternatives developed should provide initial choices as to the different viable resource management options available in the study area.

(c) *Stage 3—Development of Detailed Plans.* During the final stage, emphasis is on modifying and reducing in number the intermediate alternatives to produce detailed, implementable plans. Design, assessment, and evaluation at this stage require data that is specific and well defined. The alternative plans produced at its completion must be at a comparable level of detail so that an effective choice can be made among them and, if appropriate, a recommendation can be implemented. This stage should produce an array of alternative plans which specify the type and location of the measures involved, their significant impacts, and the beneficial and adverse contributions of each plan.

§ 290.11 Plan selection and recommendation.

The planning process described in §§ 290.07–290.10 forms the basis for selecting one of the detailed plans and, if appropriate, recommending it for authorization. Generally, only one plan should be selected for implementation regardless of whether or not it is within the existing general authority of the Corps. If the selected plan falls under the Corps authority, then it can be recommended by the District Engineer. If the selected plan is not within existing Corps authority, the reporting document should describe how it could be implemented.

(a) *General.* Plan selection is the designation of that alternative considered to be the most desirable, based on the results of the study. Plan recommendation is the act of proposing Corps participation in implementing the selected plan. Plan selection and recommendation occur after the last iteration of the planning process, at which point a range of detailed plans, any of which could be selected, will be displayed in the System of Accounts (Part 393 of this Chapter).

(b) *Plan Selection.* This District Engineer will select the plan in the best public interest. This selection will be based upon the public response to the detailed plans carried through the final stage. This response will include the views of those who participated in the study and will be obtained by formal and/or informal means. The product of evaluation will be clearly presented as a basis for public inputs to plan selection. The crucial considerations in the District Engineer's choice will be presented in the Statement of Findings.

(c) *Plan Recommendation.* There are two basic criteria for plan recommendation: the net benefits rule and Corps authority to implement. When both criteria are met, the District Engineer will follow established procedures for recommending Federal (Corps) participation in implementation.

(1) *Net Benefits Rule.* A recommended plan when considered individually on the basis of "with" vs. "without" comparison must be justified in the sense that total beneficial contributions (monetary and non-monetary) exceed total adverse contributions (monetary and non-monetary). Further, the recommended plan must have net NED benefits unless the deficiency is the result of NED benefits foregone or costs incurred to obtain positive EQ (non-monetary) contributions. This means that a recommended plan which has no net economic benefits must make positive contributions to the environment when evaluated against the without condition. Exceptions to the net benefit rule will be extremely rare and will be based upon prior approval by the Secretary of the Army; coordination will be through DAEN–CWP. Exceptions might include unique and overriding social considerations, such as extreme loss of life.

(2) *Corps Authority.* The Corps Civil Works authority has been established by various Acts of Congress since 1824. In the event a plan selected for implementation is not clearly within Corps authority, the following provisions apply:

(a) If the selected plan or a portion thereof is not within existing Corps implementation authority, but is responsive to the planning objectives established for the study, the reporting officer may recommend Federal (Corps) participation. The basis for and extent of such participation will be specified, including the precedent setting aspects of the recommendation. Such recommendations shall be fully coordinated through DAEN–CWP before any commitments are made to States or local interests.

(b) If the selected plan falls entirely within the authority of another Federal agency, no recommendation for Federal (non-Corps) implementation will be made. The other agency will be informed of the Corps' finding by the Chief of Engineers.

§ 290.12 Effective date and applicability to planning programs.

This regulation is effective November 10, 1975 as published in the FEDERAL REGISTER on that date and codified as 33 CFR 290.

(a) Applicability of this regulation to Water Resources Council Level A and B studies is determined on a case by case basis, in accordance with guidance provided by the Water Resources Council and dependent on the Corps role in the study (see Part 252 of this Chapter)

(b) This regulation is fully applicable to all level C preauthorization studies conducted after the effective date, including those initiated prior to the effective date.

(c) Applicability of this regulation to Phase I GDM studies is dependent on the date the project was authorized by Congress and the extent of changes recommended to the authorized project. The emphasis of the tasks and stages during a Phase I study will be different depending upon whether the survey scope study was conducted employing this regulation.

(d) This regulation is applicable to continuing authority studies, as discussed in Part 263 of this chapter.

(e) This regulation is generally applicable to other special or comprehensive planning studies funded under the Corps General Investigations appropriations title. Exceptions may be granted on a case-by-case basis by the Chief of Engineers.

PART 291—PLAN DEVELOPMENT STAGES [ER 1105–2–210]

Sec.
291.1 Purpose.
291.2 Applicability.
291.3 Reference.
291.4 General.
291.5 Stage 1—Development of plan of study.
291.6 Stage 2—Development of intermediate plans.
291.7 Stage 3—Development of detailed plans.
291.8 Effective date.

AUTHORITY: Water Resources Council, *Principles and Standards for Planning Water and Related Land Resources*, 38 FR 24778–24869, 10 September 1973.

§ 291.1 Purpose.

This regulation describes the nature and scope of the three plan development stages to be used in multiobjective planning, consistent with the WRC Principles and Standards (P&S) and related policies.

§ 291.2 Applicability.

This regulation is applicable to all OCE elements and all field operating agencies having Civil Works responsibilities.

§ 291.3 Reference.

ER 1105–2–200, Multiobjective Planning Framework (33 CFR 290).

§ 291.4 General.

Conducting a study in three stages facilitates overall management of the effort. The distinct, but related, stages allow for progressively narrowing assumptions and more precisely developing concepts of resource management into definitive plans presented for public choice at the conclusion of a study.

§ 291.5 Stage 1—Development of plan of study.

This stage has a twofold purpose. First, it provides for initial iterations of the four functional planning tasks to obtain a preliminary view of what the overall study will involve. Second, it is to determine how the study will be managed. It culminates in the preparation of a Plan of Study document (POS).

(a) This stage emphasizes problem identification. Every effort will be made to obtain a clear, initial definition of the planning objectives, realizing that they will be refined and modified during subsequent stages. The remaining tasks in this stage should be performed to indicate the kinds of alternative resource management programs that could potentially be undertaken in the study area. Dependence on detail data is not appropriate. However, information should be sufficient to develop a general statement of the broad range of planning objectives relevant to the study.

(b) Existing information specific to the study area will serve as the foundation for subsequent planning. However, this stage should also provide for appraising the adequacy of existing information and data and specify subsequent steps necessary to overcome any deficiencies.

(c) During this stage, a systematic program for conducting the study will be established. The management of the overall study effort will be specified, study participants identified, necessary coordination determined, and professional skills to carry out the study identified. Major work items will be outlined on a preliminary basis, and study costs estimated.

(d) Finally, a Plan of Study document will be prepared. The POS will set forth the justification for the study, document findings of the tasks undertaken to date, and establish a program for managing the study. As the study progresses, the POS is the basis for review and approval of completed and future study efforts by higher authority.

§ 291.6 Stage 2—Development of intermediate plans.

This stage explores the broad range of potential courses of action for managing resources in the study area. This will be accomplished by performing a minimum of one additional iteration of the planning tasks. Initially, planning during this stage involves analysis of highly conceptual information. As the tasks are repeated, alternatives not appropriate to the study will be screened out and a number of likely, feasible plans will be designated for further consideration.

(a) The emphasis in this stage is to formulate alternatives for searching out an array of realistic ways of managing the resources of the study area. To accomplish this, more detailed problem identification must be conducted to more precisely specify the planning objectives. In addition, steps should be taken to correct deficiencies in the data base. As these are accomplished, more specific technical and institutional measures for addressing the objectives can be more precisely set forth. This should not unduly constrain the breadth of the measures considered. Overdependence on design detail is not appropriate. Developing alternative plans which incorporate nonstructural measures should receive considerable attention during this stage.

(b) Impact assessment should be sufficient to identify major changes from the base condition. This is accomplished by developing a detailed information base and comparing it with the alternative plans. The level of detail will increase as this stage progresses and the ongoing assessment and evaluation screen out inappropriate alternatives, identifying those which appear to be feasible. This allows more precise focus in succeeding iterations.

V 40 N 217 NOV 10 75 XUM

(c) The alternatives to be carried into the final stage should be developed to a comparable level of detail, consistent with the character, scope, and progress of the study to date. The level of detail should be sufficient for the public and higher authority to review and understand the rationale used in developing and screening the alternatives.

(d) If the study has established that it would be desirable to pursue positive Regional Development (RD) and/or Social Well-Being (SWB) contributions, an exception from existing policy should be sought at the conclusion of this stage. The Secretary of the Army must approve any exceptions prior to the initiation of the final stage.

§ 291.7 Stage 3—Development of detailed plans.

During the final stage, alternatives are further refined and reduced in number to obtain a reasonable array of fully implementable plants. At least one iteration of the planning tasks will be carried out emphasizing detailed design of the remaining alternatives.

(a) Principal attention will be given to the formulation, assessment, and evaluation tasks to derive implementable plans. The conceptual alternatives considered earlier will be developed into precise management programs composed of complete technical systems and institutional arrangements. These programs will be defined and detailed. The resources necessary to carry out each management action and the results produced will also be detailed. Assessment will identify all significant economic, social, and environmental impacts, including the location and expected time of occurrence; evaluation will provide for further screening of alternatives. The resultant plans must be complete in every respect, which means that while all planning objectives do not have to be fully satisfied, every aspect of the plans needed to make them work will be specified.

(b) As a general guide, the alternatives carried through this stage should possess the following characteristics:

(1) Each detailed plan should be the most efficient and effective means for addressing its planning objectives.

(2) Detailed plans should be significantly different from each other; that is, each alternative plan should make unique contributions to the planning objectives not made by any of the other alternatives.

(3) Each detailed plan must be "justified" in the sense that its total beneficial contributions (monetary and non-monetary) are equal to or exceed its total adverse contributions (monetary and non-monetary).

(c) Final alternative plans presented to the public at the late stage public meeting will be at a comparable level of detail. Reactions of the public and other agencies throughout the planning process provide the means for determining which alternative will be selected for implementation. Recommendation for implementation by the Corps will be based upon the Corps authority to carry out the plan.

§ 291.8 Effective date.

This regulation is effective 10 November 1975, as published in the FEDERAL REGISTER on that date and codified as 33 CFR 291. The provisions of § 290.12 of this chapter are applicable to this regulation.

PART 292—PROBLEM IDENTIFICATION [ER 1105–2–220]

Sec.

292.1 Purpose.
292.2 Applicability.
292.3 References.
292.4 General.
292.5 Identify public concerns.
292.6 Analyze resource management problems.
292.7 Define the study area.
292.8 Describe the base condition.
292.9 Project future conditions.
292.10 Establish planning objectives.
292.11 Effective date.

AUTHORITY: Water Resources Council, *Principles and Standards for Planning Water and Related Land Resources*, 38 FR 24778–24869, 10 September 1973.

§ 292.1 Purpose.

This regulation provides guidance for carrying out the problem identification task of multiobjective planning, consistent with the WRC Principles and Standards and related policies.

§ 292.2 Applicability.

This regulation is applicable to all OCE elements and all field operating agencies having Civil Works responsibilities.

§ 292.3 References.

(a) ER 1105–2–200, Multiobjective Planning Frame work (33 CFR 290).

(b) ER 1105–2–291, System of Accounts (33 CFR 393).

§ 292.4 General.

This task is undertaken to define the physical area and the nature of water and related land resource management problems that the study will address. As outlined in Figure 1, the task of problem identification culminates in delineation of the planning objectives which guide the formulation of alternative plans. The following paragraphs discuss the activities included in problem identification.

§ 292.5 Identify public concerns.

Initially, problem identification involves eliciting information from the public about the range of needs (opportunities and problems) which the study could address. Properly accomplished, this directs subsequent activities to respond to public, rather than agency, perceptions. As such, from the start of a study, there should be a general attempt to distinguish between professional analysis and views about water and land resource management and publicly held goals and desires.

(a) The types of problems, concerns, and opportunities to be addressed are limited to issues related to water and related land resource management. Issues regarding regional population growth, economic development, and transportation policies; attitudes about ownership and use of land, community aesthetics, and significant environmental phenomena; and other similar concerns are also to be considered where relevant to the management of water and related land resources.

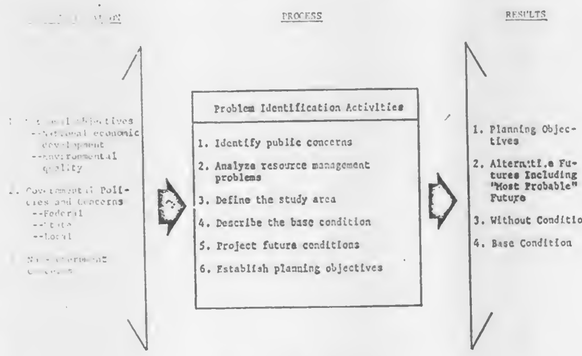

Figure 1: Problem Identification

(b) Concerns should be elicited through a public involvement program in which public officials, interest groups, governmental bodies and other segments of the public participate in a meaningful way. Figure 2 displays a representative list of information sources which should be consulted to identify public concerns. Planners knowledge unique to local and regional situations will result in the identification of additional sources. Meetings, news media presentations, brochures, citizen assistance committees, and the like are all useful tools that should be employed in obtaining this information. Public involvement, while necessary, is not sufficient to a successful outcome from the planning process. The planner is responsible for exercising the necessary professional judgment and analysis to insure that all issues, concerns, needs, opportunities, desires, and constraints related to the study effort are identified.

§ 292.6 Analyze resource management problems.

While many of the publics' concerns will be directly related to problems or issues that can be achieved through water and related land resources management, others will not. Careful professional analysis will be necessary to determine whether a link exists in the latter case. Considerable attention must be given to examining the relationship of the traditional water resources "needs" categories to the overall study effort. This is mandatory to update or confirm the authenticity of the needs in light of differing public perceptions and interim actions that may have been undertaken. For this reason, preestablished levels of resource development output should not constrain the analysis of the range of problems that could be addressed during the study. Public feedback should be sought when a tentative listing of problems have been identified to ascertain the relevance and completeness of the problems. Further refinement and clarification of perceived problems should be accomplished through extensive analysis and interaction with the public. This activity is critical to the planning process because it establishes the range of problems to be addressed and their validity from both public and professional viewpoints.

§ 292.7 Define the study area.

Determination and specification of the study area aids in establishing the scope and character of planning. To specify the area of the study, the previously identified resource management problems will be analyzed to identify their geographic distribution. This requires tracing out the problems and concerns to their ultimate physical location. Careful attention must be given to this activity to insure that the study area is appropriately defined based on the range of problems the study will address. In most instances, the concerns and problems will correspond geographically to the area specified in the study authority. However, in some cases, the study area that is defined may be different than that contained in the study authority.

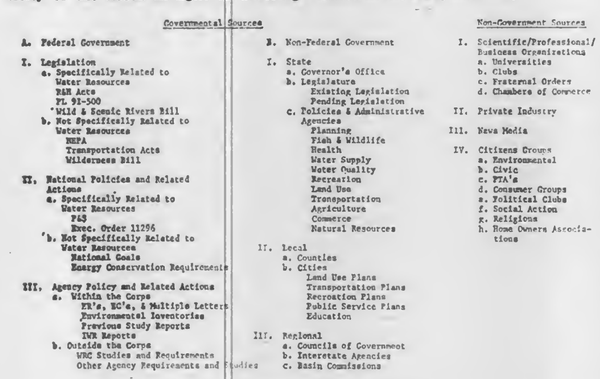

FIGURE 2 - Representative Information Sources

(a) For instance, the publicly expressed needs might not be capable of being addressed by resource management activities that could be undertaken in the study area. In addition, it might be determined that resource management activities in the study area could have a significant effect on areas outside that specified in the study authority and that they should also be included in the study. If analysis shows that the study area should be different than the area specified in the study authority, the desirability of seeking a new authority should be referred to HQDA (ATTN: DAEN–CWP) Washington, D.C. 20314.

(b) Another possibility that could occur is when a study will address only a small portion of the area designated in the authority or will consider a limited range of resource management problems. In the former case, it is the responsibility of the reporting officer to insure that the solution for the smaller area is consistent with broader concerns and that no solution has been overlooked due to the limited geographic scope of the study. In the latter case, the single purpose solutions should not overlook synergistic possibilities nor possible conflicts that could arise.

§ 292.8 Describe the base condition.

The base condition is a composite of existing economic, social, and environmental characteristics of the area under study. Describing the base condition of the study area should begin with an analysis of available local regional, and state-wide planning data. These planning data may be in a variety of forms, including land use plans, urbanization or industrialization data or projections, and completed transportation or public utility studies. Active involvement by non-Corps elements should be sought to assist in identification of the base condition of the study area. The type of base data gathered initially will be rather general. As the study progresses and alternatives are better detailed and locations more defined, more specific information on all aspects of the base condition will be required. The base condition should be described in terms of the existing land, air, and water use as well as economic, social, and environmental characteristics of the study area perceived to be important. The base condition of the study area related to water and related land resource management should include the following information identified and described according to geographical location, quantity, and quality as appropriate.

(a) A description of its resource base, including a brief and relevant summary of the climate, geology, and topography; human and natural resources, both physical and biological; demographic, cultural, and aesthetic characteristics; land use, particularly emphasizing uses within the flood plain as contrasted to uses outside the flood plain; transportation network; financial resources; and economic activity including manufacturing, trade, and agriculture.

(b) The description of significant environmental elements in the study area will locate and identify those characteristics deemed to be aesthetically, ecologically or culturally important. To identify significant environmental elements, factors should be analyzed such as soils, water, air, cities, plants and animals (including people and their culture); forces such as wind, tides, gravity, and human activities; conditions such as light, temperature, pollution, and humidity; and processes such as photosynthesis, mineral cycling, and decomposition. This involves inputs from the scientific/professional community as well as the public at large. The description must reflect that environmental elements are important to society in a present as well as future context. As part of this description, elements should

V 40 N 217 NOV 10 75 XUM

be explicitly identified which are critical in terms of their scarcity, fragility, or lack of resiliency, or which would otherwise be sensitive to change.

(c) The description of existing public and private programs for planning and managing resources in the study area will include a delineation of management systems and facilities in operation as well as those under construction, funded for construction, or approved for construction.

(d) The institutions dealing both directly and indirectly with resource management in the study area will also be identified. This should provide necessary information on existing jurisdictional, functional, and financial arrangements in the study region.

(e) Careful analysis must be made of information collected about the base condition to establish its adequacy for use throughout the study. If adequate information is not available for the purpose of the study, early efforts must be undertaken to correct the deficiencies. A sound, reasoned determination of needed data must be made early in the process to assure timely acquisition at reasonable cost.

§ 292.9 Project future conditions.

There are major uncertainties associated with projections of future conditions. The P&S require that alternative plans be examined to determine their sensitivity to data availability and to alternative assumptions as to future economic, demographic, environmental, and technological trends. In addition, the P&S requires that selected projections and assumptions of alternative futures that are reasonably probable and that, if realized, would appreciably affect plan design or scheduling be analyzed. To accommodate this requirement, it is necessary to examine expressed opinions and assumptions about the future of the study area and to designate what is considered to be the "most probable future". Derivation of planning objectives will reflect this "most probable future." Sensitivity analysis will be conducted during the evaluation task to establish the relationship of the alternative plans to all the different significant assumptions about the future conditions of the study area.

(a) The views of various segments of the public concerning their desires for the future of the study area as well as the views of the professional planner should form the basis for projecting future conditions. The process of seeking public expressions concerning the future and developing composites that reflect their views should continue until a workable projection for establishing planning objectives can be developed.

(b) Specification of future conditions should reflect projections currently used by Federal, state, and local planning agencies. OBERS Series E projections will be used as a basis for most studies. In certain instances, because of conditions unique to the study area or the limited size of the study area, OBERS may not be totally satisfactory. Deviation from OBERS is acceptable if adequately justified and explained. When the study area is very small in size, other projections will be needed to provide sufficiently detailed projections of those conditions which affect the definitions of planning objectives over time. Such projections may be prepared by a State or other non-Federal entity, other Federal entity, or independently by the Corps. The projections used must be adequate under the criteria of EM 1120–2–118, Economic Base Studies.

(c) The planner must exercise considerable judgment and guard against simply projecting current trends. Careful empirical work can define reasonable relationships between demands for the outputs of water resource plans and key economic parameters such as population, income, and production. Where appropriate, demand should be related to those variables contained in the OBERS projections. This analysis permits the planner to focus on the relationship between price and quantity demanded.

(d) One necessary component of projecting alternative futures is to describe what would most likely happen without changing existing programs for resource management. This "without condition" should be based upon sound professional analysis reflective of public expressions and historical trends. The without condition will be employed as one element in determining the planning objectives for the study and will also play a significant role in subsequent evaluation.

§ 292.10 Establish planning objectives.

Planning objectives are the national, state, and local water and related land resource management needs (opportunities and problems) specific to a given study area that can be addressed to enhance NED or EQ. However, planning objectives are not to be characterized as being specific to either national objective or related to any of the four P&S accounts (NED, EQ, RD, and SWB). Planning objectives should be stated in terms of resource management needs (problems and opportunities) and not as specific levels of resource management outputs that could be provided to satisfy the needs. Subsequent formulation will be carried out to establish if and how well the outputs of the plans address the objectives. Therefore, "increase open space in X county", "reduce urban flood damages along Y creek", and "maintain white-water boating on Z river" are appropriate statements of planning objectives. However, "provide 200 acres of open space in X county", "provide SPF protection on Y creek", and "provide 3,000 visitors days of white-water boating on Z river" are not appropriate planning objective statements because they predetermine the levels of outputs to be produced. Output levels are variable due to the nature and sizing of management measures and, as such, are a product of formulation and not a factor to be considered when establishing planning objectives.

(a) The components of the NED objective include:

(1) The value of increased outputs of goods and services resulting from a plan.

(2) The value of output resulting from external economies associated with a plan.

(b) The components of the EQ objective include:

(1) Management, protection, enhancement, or creation of areas of natural beauty and human enjoyment.

(2) Management, preservation, or enhancement of especially valuable or outstanding archeological, historical, biological, and geological resources and ecological systems.

(3) Enhancement of quality aspects of water, land, and air by control of pollution or prevention of erosion and restoration of eroded areas.

(4) Avoiding irreversible commitment of resources to future uses.

(5) Others not listed in paragraphs (b)(1)–(b)(4) of this section.

(c) Initially, establishing planning objectives involves analyzing the range of public and professional concerns expressed about the use of water and related land resources in the study area to translate them into specific objectives for the study. In addition, establishing the planning objectives involves determining those water resource needs (opportunities and problems) which must be addressed in relation to the "most probable" alternative future.

(d) Establishing planning objectives may reflect that given concerns, not necessarily directly related to either NED or EQ, could be so important as to impose absolute constraints on the planning process. These constraints may be of a legal, public policy nature or social, economic, or environmental factors of such importance that to violate them would compromise the validity of the entire planning effort. Where such constraints exist, they should be incorporated in the planning objectives. However, in specific cases, an existing legal constraint may be consciously overlooked if the study firmly proposes to recommend a change to modify it. Unless prior approval is obtained from HQDA (ATTN: DAEN-CWP) Wash., D.C. 20314, planning cannot be undertaken to provide positive distributional effects. This means that transfers to a region or social class will not be planned for; however, such effects may be displayed in the System of Accounts, Part 393 of this chapter.

(e) Early in the planning process, planning objectives are likely to be relatively large in number and general in nature. While the study authority may direct attention to specific concerns, the authority should not be interpreted as limiting consideration of any appropriate planning objective. In addition, planning objectives should not be eliminated from consideration early in the process merely because they do not relate directly to traditional outputs of water and related land resources management.

(f) As planning progresses, the planning objectives must be continuously reanalyzed in order that a manageable and well defined set is specified prior to developing the detailed plans. The final array of planning objectives must be defined narrowly enough to insure that all alternative means of meeting them have been examined in the study.

(g) The planning objectives should be specified to that level of detail sufficient to provide a precise description of each, including where and when it is to be achieved. Specific objectives may be in conflict, but the full range should be set forth as a basis for formulation. Subsequent planning tasks will establish whether the conflicts can be fully or partially accommodated by a resource management program or, if not, what tradeoffs must be made.

§ 292.11 Effective date.

The regulation is effective November 10, 1975, as published in the FEDERAL REGISTER on that date and codified as 33 CFR 292. The provisions of § 290.12 of this chapter are applicable to this regulation.

AUTHORITY: Water Resources Council, *Principles and Standards for Planning Water and Related Land Resources*, 38 FR 24778–24869, September 10, 1973.

§ 293.1 Purpose.

This regulation provides guidance on the formulation of alternative plans in multiobjective planning, consistent with the WRC Principles and Standards (P&S) and related policies.

§ 293.2 Applicability.

This regulation is applicable to all OCE elements and all field operating agencies having Civil Works responsibilities.

§ 293.3 Reference.

ER 1105–2–200, Multiobjective Planning Framework (33 CFR 290).

§ 293.4 General.

This task provides for developing alternative resource management systems that address planning objectives. To help insure that the best overall plan is developed, a range of alternative plans will be developed based on different sets of formulation and reformulation criteria. A plan to optimize national economic development and at least one plan which emphasizes environmental quality will be developed along with other plans which address mixes of NED and EQ. In practical terms, these will represent the "best" NED and EQ plans. It is required that all the plans presented at the conclusion of the study will be fully implementable and could be selected. The types of plans which are either required or should be considered are described in paragraph 7 below. Figure 1 outlines activities necessary in the formulation of alternatives. The following paragraphs discuss the activities included in formulation of alternatives.

§ 293.5 Identify management measures.

A wide variety of technical and institutional means exists for managing resources. As the basis for formulating alternative plans, a broad range of these means should be examined to identify those which can address one or more of the planning objectives. All appropriate measures should be identified without bias, including those proposed or suggested by different interest groups. Both structural and non-structural means will be given equal consideration. In addition, the range of management measures should not be constrained by considering only those traditionally used by the Corps. This activity should receive considerable attention during the initial iterations of the planning process. During the final iterations, this activity will be less critical because the range of measures applicable to the study will be reduced and more precise.

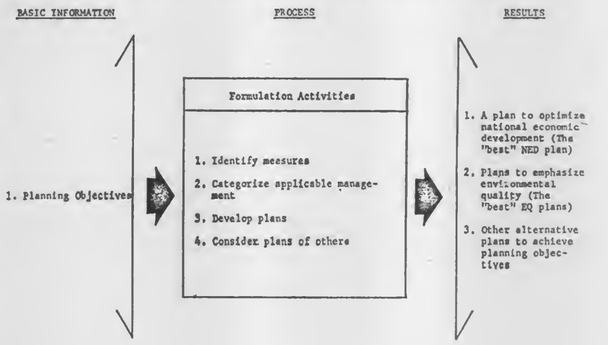

Figure 1: Formulation of Alternatives

§ 293.6 Categorize applicable management measures.

The range of measures will be analyzed to establish those which specifically could address the planning objectives. The term addressing is used in this context to connote that, while it may not be possible to completely satisfy one or all objectives, it may be possible that a measure would make a partial contribution to objective fulfillment. For this reason, different plans will make different contributions to each of the planning objectives. This is also due to the fact that the NED and EQ plans and the plans which address a mix of NED and EQ will be formulated according to different criteria which are discussed below. To accomplish the categorization, each measure should be examined to determine the objective or objectives to which it contributes. One aspect of this activity is to identify conflicts or complementarities that exist between the different measures.

§ 293.7 Develop plans.

This activity is crucial to each iteration since it is through combining different measures into resource management systems that alternatives are formulated to address the planning objectives. The "most probable future" employed to form the basis for establishing the planning objectives should be kept in mind during this process to aid in developing plans to complement it as well as serving as one basis for subsequently evaluating the alternative plans developed. During the initial iteration of planning, combining different measures will result in a preliminary range of alternatives for managing resources. During all subsequent iterations, more definitive systems made up by linking or combining a number of measures will be developed by applying the reformulation criteria discussed in this section:

(a) Combining the appropriate measures into alternative management systems should generally be sequenced as follows:

(1) Initially, measures that address more than one planning objective should be specified. This requires selecting a particular measure and determining the objectives it does and does not address. Care must be taken to identify conflicts between these measures and to enhance their compatibility to the extent possible. If irreconcilable conflicts between measures are apparent, the more desirable measure based on subsequent impact assessment and evaluation should be retained. After combining compatible measures that address a number of planning objectives, analysis should be conducted to establish those objectives that have not been fully or partially addressed and those for which additional measures should be considered.

V 40 217 NOV 10 75 XUM

(2) The second level of developing plans involves adding compatible measures which address only one planning objective. As a check, planning objectives which have not yet been fully or partially addressed will be identified.

(3) If appropriate, the third step involves reanalyzing the applicable measures to select and add ones that would be appropriate for more fully addressing the planning objectives.

(4) The purpose of this activity is to set forth a number of different resource management systems. The systems are to be composed of structural and nonstructural measures that, if implemented, would fully or partially satisfy the planning objectives.

(5) A major element in this development process is the necessity to modify, add, or delete measures in relation to addressing the planning objectives. The interactions among measures must be analyzed in relation to the criteria discussed in the evaluation task. As stated previously, the activity of developing plans must reflect the other activities involved in formulation of alternatives, as well as the inputs and outputs associated with problem identification, impact assessment, and evaluation. In addition, the formulation task must reflect the specific criteria established below for reformulating alternatives to develop the required NED and EQ plans as well as other plans which address a mix of NED and EQ. This means that while developing plans can be expressed as a single activity, it must be integrated with the other activities that together comprise the planning tasks.

(b) All of the alternative plans developed should attempt to address a broad range of planning objectives without bias as to the economic or environmental nature of the output. Traditional project outputs such as flood control, fish and wildlife, water supply, and recreation should be included in all alternatives if related to addressing the planning objectives.

(c) As a practical guide, the range of alternative plans should reflect a broad spectrum of publicly held concerns. Therefore, formulation should involve developing a broad mix of plans reflecting the full range of planning objectives rather than focusing on justifying a single alternative for recommendation. These alternative plans are to be guided by the criteria outlined in paragraphs d., e., and f., below, which describe the NED plan, the EQ plan, and plans which address a mix of objectives. It should be recognized that all alternative plans are to be subjected to the evaluation criteria specified in § 295.7 of this chapter, which may result in further modification of plans in the interest of meeting the criteria. For example, mitigation of the adverse effects of either an NED or EQ plan to meet the evaluation criteria may be greater than that which would be provided if incremental NED or EQ benefits alone are required to exceed incremental costs.

(d) The P&S require that a plan to optimize NED and at least one plan emphasizing EQ will emerge during the evaluation task as prescribed in Part 295 of this chapter. Since the outputs of alternative plans may have varying economic consequences, it may be necessary to consider a number of alternatives as possible candidates for the detailed plan to be called the NED plan. Because environmental consequences are not measured in a single standardized unit, it will be necessary to carry a number of plans emphasizing different environmental consequences through the planning process.

(1) An NED plan addresses the planning objectives in the way which maximizes net economic benefits. Net economic benefits are maximized when plan scale is optimized and the plan is efficient. Scale is optimized when the benefits of the last increment of output for each measure in the plan equals the economic costs of that increment. A plan is efficient when the outputs of the plan are achieved in a least cost manner. The P&S require that an NED plan have net economic benefits. Alternative measures considered in the formulation of an NED plan are to be evaluated according to economic criteria. However, the design of physical structures is to be done according to engineering criteria. As is true for all alternatives, sound design based upon the interdisciplinary inputs of the planning team is required for an NED plan. Because an NED plan includes all measures to address planning objectives whose incremental dollar benefits exceed dollar costs, mitigation, preservation, or enhancement measures should be included when they are economically justified. Examples of this would be buying additional land to mitigate for wildlife habitat inundated by a reservoir or replacement of a highway when the dollar benefits from the purchase or replacement exceed its dollar costs.

(2) Recognizing that environmental quality has both natural and human manifestations, an EQ plan addresses the planning objectives in the way which emphasizes aesthetic, ecological, and cultural contributions. Beneficial EQ contributions are made by preserving, maintaining, restoring or enhancing the significant cultural and natural environmental attributes of the study area. Determination of EQ benefits involves subjective analysis, underscoring the need for interdisciplinary planning with extensive public input, to place values on the environmental contributions of plans. Designating EQ plans involves measuring the environmental changes related to different plans and selecting those which, based on public input, contributes to or are most harmonious with environmental objectives. This means that EQ plans are those which make the "best" contributions to one or more of the components of the EQ account.

(3) Because the general criteria used in formulating NED and EQ plans are different, the measures contained in the plans will generally differ. There are cases, however, when the two plans will be similar if not identical. This may occur when the measures contained in an NED plan have little or no adverse environmental impact or, alternatively, they make important contributions to components of the EQ objective. Like an NED plan, an EQ plan may contain environmental preservation or enhancement measures which utilize the potential created by other measures to serve other component needs. Unlike an NED plan, however, such measures may be justified in terms of environmental benefits not measurable in dollar terms compared to their costs. The acquisition of an area for habitat mitigation, cited under the NED plan discussion, is also an appropriate example here. The justification for inclusion of such a measure in an EQ plan may be based upon benefits not measurable in dollars. An EQ plan is often thought of as being synonymous with a non-structural plan but, based on the discussion in paragraph (2) of this section, this need not be the case. Paragraph (g) below describes the role of plans developed primarily of non-structural measures. Also an EQ plan is not necessarily a "do nothing" plan or a plan to maintain existing conditions. Such a plan may be an EQ plan when all applicable measures have serious net detrimental effects on environmental quality and contributions to components of the EQ objective cannot be made at reasonable cost. Specific provisions are made for deriving "no development" plan below.

(e) In addition to the NED and EQ plans described above, additional plans which serve significantly different mixes of NED and EQ should be formulated so as to not overlook the best plan. When considering alternative plans which reflect major trade-offs between NED and EQ, the addition of complementary measures to serve other planning objectives may considerably enhance the plan. An example is adding measures which contribute to EQ without reducing the economic effectiveness of the plan, such as beautification of channel works through design modification and landscaping. These measures have often been found essential to make a structural solution to a problem acceptable to local interests. A basic question in formulating plans which address mixes of NED and EQ is the extent to which the planner should trade off economic benefits and incur additional economic costs to avoid adverse impacts on environmental quality or to provide environmental quality benefits. This is a difficult problem because environmental quality values are subjective and cannot be valued in explicit monetary terms. Yet when dollar costs or benefits are traded off for environmental considerations, an implicit evaluation is made that the net benefits are worth the dollar cost to obtain them. There will be uncertainty as to what the public consensus may be regarding trade-offs and, indeed, decisions cannot be reached until the range of trade-offs is shown to the public. Therefore, a variety of alternative plans should be initially developed which appear to represent the preferences of the various publics. During subsequent iterations, the alternatives can be refined and those which lack significant public support can be eliminated. The number of alternatives which address a mix of NED and EQ to be carried through to the end of the planning process is a function of both the diversity of public and professional expressions and the characteristics of the outputs possible for the measures available to address the planning objectives.

(f) It should be noted that the P&S also permit formulation of alternative plans "reflecting significant physical, technological, legal, or public policy constraints." This permits developing an alternative plan which provides a level of flood control protection greater than that which maximizes net benefits.

(g) Plans employing non-structural measures may be formulated, if they are economically and/or environmentally sound. While purely non-structural alternatives may not provide workable solutions, alternatives which place heavy emphasis on non-structural measures may be highly effective in meeting the planning objectives. As indicated elsewhere, non-structural measures should be considered without bias throughout the process and if a detailed plan is developed which primarily employs non-structural measures it may be labeled a "non-structural plan". Even if a "non-structural plan" is not developed, the report of the District Engineer will fully describe how non-structural measures were considered throughout the planning process and the role they played in the development and selection of the recommended plan.

(h) In formulating plans to increase beneficial contributions to the EQ account, consideration may be given to an alternative which explicitly precludes any significant forms of physical construction or development. Where such a "no development" alternative is considered, positive action normally will be required to assure that the no development concept can be realized. Environmental characteristics that the plan is designed to maintain or enhance through the "no development" alternative may change through time as a result of changing conditions within a planning setting. Positive actions, such as zoning or public land acquisition, may be necessary to accomplish the "no development" alternative.

§ 293.8 Consider plans of others.

Federal, State, regional, and local governmental agencies may have plans, or parts thereof, for addressing the planning objectives of the study area. Public and private organizations may also have proposals or fully developed alternatives that should be considered during the planning process. Such plans should be subjected to the same requirements as other alternative plans. Judgement must be exercised to determine which of these proposals are viable and if they should be carried forward in the planning process.

§ 293.9 Effective date.

This regulation is effective November 10, 1975, as published in the FEDERAL REGISTER on that date and codified as 33 CFR 293. The provisions of § 290.12 of this chapter are applicable to this regulation.

AUTHORITY: Water Resources Council, *Principles and Standards for Planning Water and Related Land Resources*, 38 FR 24778–24869, September 10, 1973.

Subpart A—General

§ 294.1 Purpose.

This regulation provides guidance on the assessment of impacts of alternative plans in multiobjective planning, consistent with the WRC Principles and Standards (P&S) and related policies.[1]

§ 294.2 Applicability.

This regulation is applicable to all OCE elements and all field operating agencies having Civil Works responsibilities.

§ 294.3 References.

(a) Title I, Pub. L. 91–190, *National Environmental Policy Act*, 1 January 1970 (83 Stat. 852).

(b) Section 122, Pub. L. 91–611, River and Harbor and Flood Control Act of 1970, 31 December 1970 (84 Stat. 1818).

(c) ER 1105–2–200, Multiobjective Planning Framework (33 CFR 290).

(d) ER 1105–2–507, Environmental Impact Statements (33 CFR 209.410).

§ 294.4 Relationship to guidelines for effect assessment pursuant to section 122, Public Law 91–611.

Guidelines developed to meet the requirements of Section 122, Pub. L. 91–611, as approved by the Secretary of the Army, were originally issued on 28 September 1972. These guidelines have been retained as Subpart B of this part and Appendixes A and B, and are applicable to all preauthorized feasibility reports, Phase I General Design Memoranda and Detailed Project Reports transmitted to the Chief of Engineers after 31 December 1972.

§ 294.5 Relationship to preparation of an environmental impact statement (EIS).

This regulation provides general guidelines which are to be utilized in conjunction with Part 209.410 of this chapter in the conduct of environmental assessments and preparation of EISs.

---

[1] This regulation supersedes ER 1105–2–105, 15 December 1972, and supersedes 33 CFR 209.400.

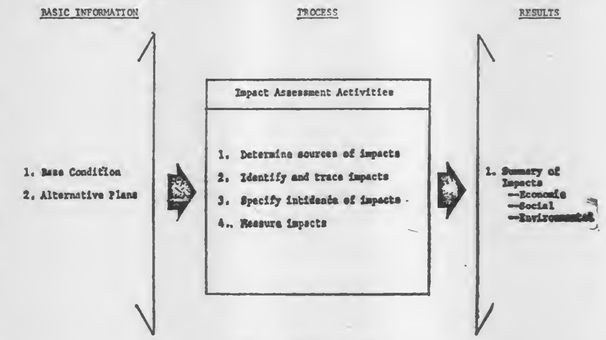

Figure 1: Impact Assessment

V 40 N 217 NOV 10 75 XUM

§ 294.6 General.

Impact assessment is an objective analysis conducted to identify and measure the likely economic, social, and environmental effects of each alternative plan. These effects, when analyzed, form the basis for evaluating the beneficial and adverse contributions of the plans. Each of the alternative plans resulting from the previous tasks as well as the impacts of the "without condition" will be analyzed in relation to the base year condition to determine expected changes. In the latter case, the assessment involved a further refinement of information gained during the Problem Identification task. For example, the "without condition" may have been described only in terms of population, economic, and employment conditions. During assessment, the land use, pollution, water supply and other economic, social, and environmental implications of the "without condition" will be analyzed. In this manner, a consistent concept of the "without condition" will be described for use during the subsequent evaluation. The assessment will be commensurate with the level of detail of the alternatives. Assessment reflects increasing precision as it is conducted during the later iterations of the planning tasks in Stage 2 and throughout Stage 3. The following paragraphs discuss the activities included in impact assessment, as depicted in Figure 1.

§ 294.7 Determine sources of impacts.

Each alternative and its component measures should be analyzed to determine potential sources of impacts. Impacts can be caused by the inputs required to carry out a measure, by the measure itself, or by the outputs resulting from it. Inputs generally include the natural resources, energy, labor, and capital that are necessary to implement a proposed management system. Outputs are the services or products such as water supply, recreation, flood control, open space, historic preservation, and the like, delivered by the plan, specified in terms of quantity and, if appropriate, quality. During this activity, particular attention must be given to identifying and categorizing all relevant sources of impact, especially in terms of the inputs and outputs associated with the measures. The information surfaced during this activity, specified by type, location, and size, forms the basis for assessment. Appendix A provides a suggestive source list of causative factors.

§ 294.8 Identify and trace impacts.

For each alternative plan, compare its inputs, measures, and outputs to the base condition established during the problem identification task to determine whether a change in any of the base condition elements can be forecasted as a consequence of the plan. This requires tracing each cause to determine all of its significant effects. Appendix B provides an illustrative listing of effects which could occur. In most instances the analysis will require a practicable tracing out of an intricate network of causes and effects. Tracing out causes and effects should be tempered so that only significant effects are ultimately considered. Cause-effect analysis should surface all significant impacts of the first, second, or subsequent order.

(a) Significance is established by determining if an effect could have a material bearing on decision-making. Care must be taken to include necessary information on the one hand but to avoid overloading the process on the other. The scarcity, fragility, or resiliency of the elements of the study area must also be reflected in establishing the significance of impacts. Even though impact assessment is essentially an objective undertaking, determining whether an impact is significant or not must also reflect publicly held values.

(b) Identifying impacts should also reflect that an alternative or component measure thereof may not result in changing the base condition. If no change from the base condition is projected, its significance should also be analyzed and the lack of change should be reflected in the subsequent assessment activities. It is particularly important for the analysis to specify instances when no net change occurs, especially in cases where the combined use of two measures, such as a dam and a fish ladder, produces a different impact than that which would otherwise be expected if only one of the measures were involved.

§ 294.9 Specify incidence of impacts.

The location, timing, and duration of each significant impact should be determined. These requirements are described below and defined in Part 393 of this chapter.

(a) Impacts should be described to establish their effect on the immediate planning area, within the rest of the study area, within a larger area affected by the plan, and on the nation as a whole, consistent with the System of Accounts tables prepared for the study.

(b) The timing of impacts should be identified to establish whether they are likely to occur prior to or during implementation of the plan, shortly after implementation, or in a longer time frame.

(c) The duration of impacts should be identified to establish whether they are reversible or irreversible and whether they are short-term or long-term.

§ 294.10 Measure impacts.

This activity involves describing the magnitude of each change that has been identified. This is a difficult task, since many of the changes can be described only in a highly qualitative manner. This is particularly the case for environmental and social impacts. An attempt to measure all impacts, even those of a less tangible nature, will be made by appropriately trained individuals. Change should be measured from the base condition, and should be described in an appropriate unit of measure or concisely characterized in a written statement. An overdependence on numerical measurement of impacts may result in misleading information which may be more appropriately and accurately related using other methods.

§ 294.11 Effective date.

This regulation is effective November 10, 1975, as published in the FEDERAL REGISTER on that date and codified as 33 CFR 294. The provisions of § 290.12 of this chapter are applicable to this regulation.

Subpart B—Guidelines for Assessment of Economic, Social and Environmental Effects of Civil Works Projects

§ 294.21 Purpose.

These guidelines are designed to ensure that all significant adverse and beneficial effects of proposed projects are fully considered.

§ 294.22 References.

Section 122, Public Law 91-611 (84 Stat. 1818).

§ 294.23 General.

Effect (impact) assessment is an integral part of the planning process. It serves as one test of the adequacy of that process and of any positive or negative recommendations resulting therefrom. It is fully compatible with multiobjective planning.

(a) Any alternatives developed in the planning process may produce unintended effects which are not responsive to the planning objectives and which are not included in benefit-cost analysis. Such effects are the subject of these guidelines.

(b) Effect assessment is an iterative process which consists of the following steps: identification of anticipated project-caused economic, social, and environmental effects; quantitative and qualitative description and display of the effects; evaluation of the effects, whether adverse or beneficial; and consideration of measures to be taken if a proposed project would cause adverse effects.

(c) The sequence of steps in effect assessment is described in § 294.24.

§ 294.24 Assemble a profile.

(a) Portray existing conditions in a profile describing the relevant economic, social, and environmental characteristics of the affected area. Judgment is of critical importance in determining what information will be needed.

(b) A tentative profile should be prepared early in the planning process. Subsequently, as alternatives are considered in greater detail, the profile should be made more precise and focused on identified significant effects.

(c) The boundary areas of the profile will vary depending upon whether the focus of an effect is local or regional; whether the area is defined by political jurisdiction or by hydrologic unit; and by the nature of the project effects.

(d) When completed, the profile should provide a clear understanding of the significant existing conditions, problems,

and needs of the affected area and of the rationale for any action, if proposed.

§ 294.25 Make projections of "without project" conditions.

(a) Extend the profile of existing conditions to portray future conditions without any project action. Projections should cover the expected life of each alternative considered over a reasonable range of probable future conditions.

(b) Utilize a range of values to compensate in part for the uncertainties of projecting the future.

(c) Projection of existing economic, social and environmental conditions should yield pertinent information about the conditions, problems, and needs of the affected area in the future and provide a basis or baseline for a comparison of the effects of alternative plans. The projection may suggest issues to be addressed in designing alternative "with project" plans.

§ 294.26 Make "with project" projections, identifying causative factors and tracing their effects for each alternative.

(a) Make projections of the "with project" conditions for each alternative being considered, including pre-construction, construction and operation periods through its expected life.

(b) Identify and list project-related causative factors (see Appendix A) and their likely economic, social, and environmental effects (see Appendix B) concurrently with the formulation of alternative plans.

(c) The causative factors and effect elements for each alternative should be set forth in sufficient detail to ensure that all significant interactive relationships are considered. The inter-relatedness of economic, social, and environmental aspects cannot be overlooked and must be considered regardless of the category in which any given effect is placed.

(d) Assessments initially should emphasize breadth rather than depth. Refinements should await later stages of plan formulation.

(e) Effect assessment at any stage should be carried to a degree of detail commensurate with the alternative it addresses.

§ 294.27 Identify significant effects.

(a) Examine causative factors and the effects they produce for each alternative. Select those effects which appear significant in view of the conditions, problems and needs of the affected area as projected for the "with" and "without" project conditions.

(b) A "significant" effect is one which would be likely to have a material bearing on the decision-making process.

(c) A determination regarding significance should be made at the earliest stage possible in the assessment process. The determination should be reconsidered at each stage, particularly in the light of public input and reaction.

(d) In the process of formulation, adjustments may be made in the alternative plans that avoid or reduce identified adverse effects. In such cases, only residual adverse effects should be identified for further analysis in the concurrent assessment process.

§ 294.28 Describe and display all significant effects.

(a) Describe the effects of the various alternative plans in quantitative terms to the extent possible. Where this cannot be done, effects should at a minimum be set forth in qualitative-descriptive terms.

(b) The effects should be described objectively, and tentatively designated as adverse or beneficial.

(c) Beneficial effects that are identified should be included, to the extent possible, in the benefit evaluation section of the survey report.

(d) Beneficial effects of one kind cannot be considered to cancel out an adverse effect of another kind.

(e) Display the effects of the alternative plans in a form that is easily understood, interpreted, and evaluated, and that clearly shows the differences among them. The display is to be used in consulting with State and Federal agencies and public groups with particular expertise. The display also provides one of the bases for assessing alternative plans, selecting a recommended plan, and assisting in public participation.

§ 294.29 Evaluate effects.

(a) Place values on the significant adverse and beneficial effects in monetary terms where applicable, quantitatively where possible, and qualitatively in any event.

(b) The assumptions or criteria on which a judgment is based should be made explicit, since segments of the public may perceive any single effect quite differently.

(c) Significant adverse effects must be sufficiently well displayed to facilitate the weighing of need and type of project modification, if any. No single method for determining relative value is generally accepted. Public policy, community preferences, and the magnitude and degree of severity of effect are factors to be considered.

(d) The aggregate or systems interaction of combined economic, social, and environmental effects should be considered along with evaluation of individual effects. In addition, the possibility of individual effects being part of a larger cumulative process should be investigated.

(e) Effects not significant, not relevant, or that can be adequately incorporated in benefit-cost evaluation should not be accommodated in the effect evaluation.

(f) An evaluation cannot be validated without obtaining the review and reaction of other agencies and the public.

§ 294.30 Consider project modifications where adverse effects are significant.

(a) For each significant adverse effect, investigate the possibility of:

(1) Eliminating the effect;

(2) Mitigating the effect by minimizing or reducing it to an acceptable level of intensity; or by compensating for it by including a counter-balancing positive effect.

(b) The costs of such measures, as well as any costs of reduced project performance, provide further bases for comparing alternatives and for deciding how or whether to modify them or to accept the adverse effects.

(c) If effect assessment has not proceeded in step with the formulation of alternatives, the possibility always exists that an identified adverse effect may be of such magnitude or character that it cannot be accepted in the best overall public interest, or be corrected by project modifications. In such a case, one or more new alternatives must be formulated to avoid an unacceptable adverse consequence. "No action" is always one of the alternatives to be considered.

(d) For each beneficial effect investigate the possibility of:

(1) Reflecting it in the benefit-cost analysis of the project formulation process; or

(2) Describing and displaying the effect for consideration by the public and in plan selection; or

(3) Considering it as an offset for a corresponding adverse effect.

§ 294.31 Seek assessment feedback from other sources.

(a) Effect assessment procedures require a variety of information sources and continuous feedback.

(b) Informal exchanges with Federal, State, and private groups and with individuals should be sought at the beginning of any investigation and maintained throughout planning. More formal discussion occurs in the course of initial, formulation and late-stage public meetings.

(c) Consultation with a wide range of interests tests the adequacy of identification of effects, validates their designation as beneficial or adverse, and provides commentary on measures considered for project modification.

(d) Response should be solicited to ensure that effects have not been overlooked or that the significance of effects has not been misjudged.

(e) Fully utilize all the public participation procedures of the planning process. For survey report investigations, effects and possible modifications will be introduced at the initial, formulation and late-stage public meetings at a level of detail commensurate with that with which the alternatives are presented.

(f) For continuing authority reports and Phase I General Design Memoranda, effect assessment will be tailored to the public participation requirements of existing regulations.

(g) Sections 294.24–294.30 should be taken before each public meeting to complete a formal iteration of the effect assessment process.

§ 294.32 Use effect assessment in making recommendations.

(a) More detailed assessment will be applied to the alternatives, including the tentatively selected proposal, by the time they are presented in the late-stage

V 40 217 NOV 10 75 XUM

public meeting. At this meeting, formal presentation of the alternatives and measures to overcome adverse effects will be made and the degree of public acceptance gaged.

(b) The reporting officer should recommend the alternative that is in the best overall public interest considering the planning objectives, the benefits and costs, and the significant economic, social, and environmental effects, including costs of treating those that are adverse.

(c) While assessment and appraisal from all sources influence the alternative recommended by the reporting officer, the burden of judgment and defense ultimately rests with him.

§ 294.33 Prepare a Statement of Findings.

(a) Include a summary of the completed effect assessment in the report immediately before the Statement of Findings.

(b) The Statement of Findings presents the rationale of the reporting officer for his conclusions and recommendations in accordance with the "best overall public interest."

§ 294.34 Use effect assessment in the Environmental Impact Statement.

The requirements of Section 122 supplement the requirements of PL 91-190 (NEPA). Consequently, the completed effect assessment for environmental effects should be used as input for the Environmental Impact Statement.

APPENDIX A

SAMPLE CAUSATIVE FACTORS

In order to identify and evaluate the effects of a project, describe aspects of the project in terms of factors likely to produce significant effects. Evaluation of effects should not be carried out in greater detail than the project alternative being considered. The list below is illustrative. It is not to be considered complete or limiting.

INPUT FACTORS

Natural Resources: Water; Land; Resources Products—Gravel, Sand, Coal, Timber, Crushed Rock; Wildlife and Fish; Aesthetics; Flora (Plant life).
Energy Resources.
Capital.
Labor.

SYSTEMIC FACTORS

Physical Alterations; Channelization; Excavation; Dredging; Draining.
Structures: Dam/Lake; Levee; Jetty; Channel; Barrier; Road and Utility Relocation.
Institutional: Acquisition; Easements; Relocation.

OPERATION AND MAINTENANCE FACTORS

Equipment Service.
Resource Management: Harvesting; Planting; Buffer Zone Maintenance; Grazing; Fencing.
Maintenance: Recreational areas; Water Quality Protection; Dredging Operations; Navigation Controls; Reservoir Controls and Procedures.

OUTPUT FACTORS

Hydro-power.
Flood Control.
Navigation.
Water Supply.
Recreation.
Irrigation.
Fish and Wildlife.
Water Quality.
Shoreline Protection.

APPENDIX B

SAMPLE PROJECT EFFECTS

All significant effects of projects should be identified and assessed. In some cases, a causative factor may result in only one significant effect. In other cases, the significant effects of a causative factor will be numerous and may require consideration in all three effect categories. (Example: a causative factor such as dredging may result in turbidity in the water for a brief period. This should be considered a predominantly environmental effect. Yet, because of the turbid water, a textile factory downstream may have to close down for a few days. This is an economic effect, and should be considered as a result of dredging even though it is a lesser effect than the environmental one. The increased turbidity may also have the effect of reducing water-recreation temporarily. This is a social effect of the dredging). Judgment must be used as to the limits of tracing out effects. Generally, the degree of detail involved in assessment should be no greater than that of the plan it addresses.

An asterisk denotes items specifically mentioned in Section 122. These must be identified and evaluated. If they are considered to be not significant, that should also be noted. Other effects should be identified and evaluated only if they are considered to be significant. The list below is an illustrative one. It is not to be considered complete or limiting.

SOCIAL EFFECTS

*Noise; Population, e.g.—Mobility, Density, *Displacement of people; *Esthetic values; Housing; Archeologic remains; Historic Structures; Transportation; Education opportunities; Leisure opportunities (recreation, active and passive); Cultural opportunities; *Community cohesion; *(Desirable) community growth; Institutional relationships; Health.

ECONOMIC EFFECTS

National Economic Development; Local government finance, e.g.—*Tax revenues, *Property values; Land use; *Public facilities; *Public services; Local/regional activity, e.g.—*(Desirable) regional growth, Relocation; Real income distribution; *Employment/labor force; *Business and industrial activity; Agricultural activity—*Displacement of farms, Food supply; National defense

ENVIRONMENTAL EFFECTS

*Man-made resources; *Natural resources; Pollution aspects: *Air—CO, Sulphur oxides, Hydrocarbons, Particulates, Photochemicals; *Water—Pathogenic agents, Nutrients N and P, Pesticides, herbicides, rodenticides, Organic materials, Solids, dissolved and suspended; Land—Soils; Animal and plant: Birds, Mammals, Amphibians, Fish, sport and commercial, Shellfish, Insects, Microfauna, Trees, shrubs and plants, Microflora; Ecosystems: Habitats, Food chains, Productivity, Diversity, Stability; Physical and Hydrologic aspects: Erosion, Erosion and sedimentation effects, Compaction and subsidence, Slope stability, Groundwater regime alteration, Surface flow effects, Micrometeorological effects, Physiologic changes (e.g., wetlands destruction).

AUTHORITY: Water Resources Council, *Principles and Standards for Planning Water and Related Land Resources*, 38 FR 24778-24869, September 10, 1973.

§ 295.1 Purpose.

This regulation provides guidance on the evaluation of alternative plans in multiobjective planning, consistent with the Principles and Standards (P&S) and related policies.

§ 295.2 Applicability.

This regulation is applicable to all OCE elements and all field operating agencies having Civil Works responsibilities.

§ 295.3 References.

(a) ER 1105-2-200, Multiobjective Planning Framework (33 CFR 290).
(b) ER 1105-2-210, Plan Development Stages (33 CFR 291).
(c) ER 1105-2-240, Impact Assessment (33 CFR 294).
(d) ER 1105-2-921, System of Accounts (33 CFR 393).

§ 295.4 General.

Evaluation involves determining the contributions, both beneficial and adverse, of each alternative plan. In evaluation, the impacts of each alternative and the impacts of the "without condition" are compared to determine the contributions each plan would make when compared with what would happen in the absence of carrying out any of the plans. Then the relative contributions of the alternative plans are ranked and traded-off based on professional analysis and the perceptions of the public. At the conclusion of the planning process, the results of the evaluation provide the basis for choosing the most desirable plan and, if appropriate, recommending its implementation. A system of Accounts which will be used for displaying the results of this activity throughout a study, is discussed in Part 393 of this chapter. The evaluation task is depicted in Figure 1.

The following paragraphs discuss the activities included in evaluation.

§ 295.5 Period of analysis and interest rate for evaluation.

(a) A 100-year period will be used for evaluation for plans associated with major reservoirs, main line agricultural levees, local flood control in urban areas, and hurricane protection. A 20-year period will be used for cost-effective analysis of wastewater collection and treatment facilities (see Part 275 of this chapter). A 50-year period of analysis will be used in all other cases. The period of analysis used for evaluation, however, will in no case exceed the estimated useful life of the plans being evaluated.

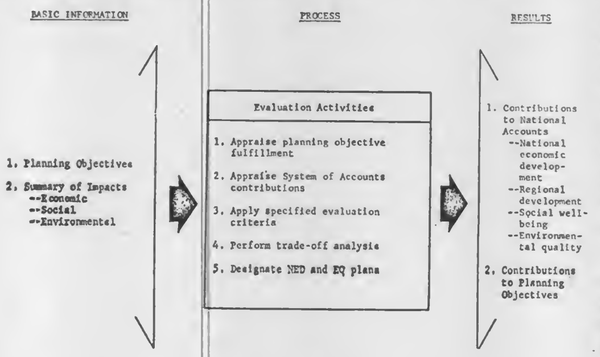

Figure 1: Evaluation

(b) Interest rates for evaluation are established annually by the Water Resources Council. Guidance on interest rates is published annually by DAEN-CWP in an Engineer Circular, following publication of the new rate in the FEDERAL REGISTER.

§ 295.6 Appraise planning objective fulfillment.

The first evaluation activity is to determine the relationship of the impacts of alternative plans to the planning objectives. Establishing the extent of which alternatives satisfy the objectives involves comparing the impacts of the plans and making a subjective judgment of the degree of satisfaction. Subjective judgments must reflect both professional analysis and public perceptions about how well the planning objectives are addressed. The purpose of this activity is to provide information about objective fulfillment as a basis for redirecting subsequent iterations to recast the objectives or to provide different measures to more adequately address the objectives.

(a) The appraisal of objective fulfillment initially involves comparing the significant impacts, both intended and unintended, of each alternative plan to the planning objectives. If an impact is related to an objective, then the degree of objective fulfillment should be determined. Possible methods for accomplishing this are by establishing a scale and measuring objective fulfillment in relation to it, by describing the degree of fulfillment or by making a subjective ranking of fulfillment. Then the net effect of the alternative in relation to the objective will be established by aggregating the separate impacts and subjectively determining the extent to which a net beneficial or adverse contribution will be made by the alternative. This process will be repeated for all objectives on which the alternative plan impacts and subsequently for each plan until the net effect of each plan on all the planning objectives is established.

(b) One aspect of the appraisal is to distinguish between what could be actual or potential contributions of the alternatives. An actual contribution is one that will occur as a result of a plan either under the auspices of a governmental agency or through the normal working of the economic system. A potential contribution is one that requires additional positive action by another agency or entity.

(c) Establishing the degree of net beneficial or adverse contributions does not necessarily involve a numerical measure. When appropriate, numbers may be used in measuring contributions. However, many contributions may be expressed only in terms of ordinal differences such as "high, medium, or low" or in terms of net effects such as "beneficial or adverse". An overdependence on numerical relationships is not necessary, although discretion must be exercised when using other forms of depicting objectives fulfillment.

§ 295.7 Appraise system of accounts contributions.

The significant impacts of each plan will also be evaluated to establish the plan's contributions to the NED, EQ, RD, and SWB accounts of the P&S. In general, the process followed in appraising planning objective fulfillment will be repeated to accomplish this activity. Identifying contributions to the four accounts involves a wide range of uncertainties which should be specified quantitatively or qualitatively, including who gains or loses, locational incidence, and time of occurrence. Because they are especially critical to the efficacy of the overall planning process, unintended contributions should also be identified. If the unintended contribution is significantly beneficial, it suggests the existence of previously unidentified concerns that reformulation could potentially address more fully. However, if the unintended contribution is sigificantly adverse, further reformulation is indicated.

§ 295.8 Apply specified evaluation criteria.

The third evaluation activity involves applying specified criteria to the alternative plans to test their responsiveness. These criteria are: acceptability, completeness, effectiveness, and efficiency, as explicitly stated in the P&S; and certainty, geographic scope, NED benefit-cost ratio, reversibility, and stability, which are derived from the first four.

(a) Acceptability of a plan is determined by analyzing its acceptance by concerned publics. A plan is acceptable if it is, or will likely be, supported by some significant segment of the public. However, during reiterations of the planning tasks, every attempt should be made to eliminate, to the extent possible, unacceptability to any significant segment of the public.

(b) The completeness of a plan is determined by analyzing whether all necessary investments or other actions necessary to assure full attainment of the plan have been incorporated.

(c) The effectiveness of a plan is determined by analyzing the technical performance of a plan and its contributions to the planning objectives and to the System of Accounts.

(d) The efficiency of a plan is determined by analyzing its ability to achieve the planning objectives and NED and EQ outputs in the least-cost way.

(e) The certainty of a plan is determined by analyzing in general terms the likelihood that if the plan is implemented the planning objectives and the contributions to the NED and EQ accounts will be attained.

(f) The geographic scope is determined by analyzing the relevancy of the geographic area encompassed by the plan; it must be large enough to encompass a full understanding of the problems and focused enough to make the proposed solutions effective.

(g) The NED benefit-cost ratio of a plan is determined by analyzing the eco-

V 40 217 NOV 10 75 XUM

nomic benefits in relationship to the economic costs.

(h) The reversibility of a plan is determined by analyzing the capability, as public needs and values change or should unusual future circumstances so warrant, of restoring the partially or fully implemented plan to approximate the without condition; "non-structural plans" may rate higher in this regard.

(i) The stability of a plan is determined by analyzing the range of alternative futures, data and/or assumptions which can be meaningfully accommodated within the recommended plan or minor modifications thereof. Greater stability generally indicates a more desirable plan.

§ 295.9 Perform trade-off analysis.

Subsequent to identifying the contributions of the alternative plans to the planning objectives and the System of Accounts and establishing their response to the specific evaluation criteria, trade-off analysis will be conducted to analyze the comparative contributions of the alternative plans. When this has been accomplished for each alternative, the resulting information should be compiled so that what is gained or foregone by choosing a given alternative over other alternatives is clearly set forth.

(a) To carry out this activity monetary units, numerical data, and qualitative information will be compared. Monetary relationships are only one part of the trade-off analysis; major aspects of the analysis will involve the consideration of qualitative information regarding the social and environmental values of each plan. Although more difficult to analyze, this information must be considered equally with the more tangible economic and engineering data.

(b) Trade-offs will involve subjective judgments and must therefore reflect public preferences. Through incorporation of public inputs, the trade-off analysis should surface the alternative or alternatives which appear to be the most acceptable to major segments of the public.

§ 295.10 Designate NED and EQ plans.

The alternatives which appear to best meet the criteria for the NED and EQ plans (as stated in Part 293 of this chapter) should be designated as a basis for subsequent iterations. This requires analyzing the overall economic and environmental contributions of each alternative when compared to the without condition. The plans that result in the greatest net economic return will be candidates for the NED plans. The plans that result in the most desirable environmental contributions will be candidates for EQ plans. The designation of NED plans can be made largely by drawing upon analysis of the economic returns to each alternative. The designation of EQ plans is highly subjective and must reflect societal preferences for the environmental contributions of the alternative plans. Particular note should be taken that the NED plan and an EQ plan could be similar in certain instances where both sets of criteria are met optimally by the same measures.

§ 295.11 Procedures to be followed when reiterating planning tasks.

The results of each iteration of the planning tasks will be analyzed to establish the necessity for, or direction of, the next iteration. If reiteration is to be undertaken, it will be necessary to establish which plans will be carried forward and the criteria that will be applied to their reformulation. This determination will be based on the results of the evaluation activities and the public's perceptions of the acceptability of the alternatives. Generally, reiteration will be undertaken for three reasons. Principally, reiteration will be undertaken to develop more precise and detailed plans that more fully address the planning objectives within the constraints of the study. Secondly, reiterations will be undertaken to attempt to reduce the significant adverse economic, social, and environmental impacts of the alternative plans. And thirdly, reiterations may be undertaken to increase the RD and SWB benefits of alternative plans, only in those specific cases when prior approval from the Secretary of the Army has been obtained.

(a) For all alternatives to be carried through to the next iteration, the specificity of the plans should be increased. This is accomplished by more precisely defining the planning objectives and by more fully exploring the range of means for addressing them. In addition, reiterating the planning tasks should be directed toward changing "potential" benefits into "actual" benefits, as well as reducing the uncertainties associated with the different alternatives. The following criteria will be applied to the reformulation of alternatives designated as NED and EQ plans, including those plans which address a mix of the two national objectives:

(1) For the alternatives designated as NED plans, add new measures or modify or delete those already employed to develop plans which are fully implementable and represent the best plans that can be formulated on the basis of economic criteria alone. To accomplish this, the following should be carried out in sequence during the subsequent formulation activity:

(i) Attempt to increase net NED benefits by analyzing the incremental benefits and costs of each measure and by making appropriate adjustments.

(ii) Without reducing the level of net NED benefits, attempt to increase net EQ benefits taking into consideration the full range of EQ costs.

(iii) Without reducing the level of either net NED or EQ benefits, seek the best combination of SWB and RD benefits possible.

(iv) Reduce adverse effects on RD and SWB to extent possible without incurring unreasonable losses in net NED or EQ benefits.

(2) For the alternatives designated EQ plans, add new measures, or modify or delete those already employed, to develop plans which are fully implementable and represent the best plans that can be formulated on the basis of environmental criteria alone. To accomplish this, the following should be carried out in sequence during the subsequent formulation activity:

(i) Attempt to increase net EQ benefits, taking into consideration the full range of EQ costs.

(ii) Without reducing net EQ benefits or incurring additional EQ costs, attempt to increase the net NED benefits.

(iii) Without reducing either the net EQ or the level of net NED benefits, seek the best combination of SWB and RD benefits possible.

(iv) Reduce adverse effects on RD and SWB to extent possible, without incurring unreasonable losses in net NED or EQ benefits.

(3) For the remaining alternatives that address a mix of the two national objectives, add new measures, or modify or delete those already employed, to develop plans which can be fully implemented and represent a viable mix of NED and EQ. To accomplish this, the following should be carried out in sequence during the subsequent formulation activity:

(i) Attempt to increase net EQ and/or net NED benefits.

(ii) Without reducing the level of either net EQ or net NED benefits, achieve the best combination of SWB and RD benefits possible.

(iii) Reduce adverse effects on RD and SWB to extent possible without incurring unreasonable losses in net NED and EQ benefits. This means that net EQ or NED benefits may be reduced to offset adverse RD or SWB effects only when the NED or EQ cost incurred, or benefits foregone, are less than the RD or SWB adverse effects reduced.

(b) As stated above, and discussed more fully in Part 291 of this chapter, positive RD and SWB effects can only be pursued when specifically approved by higher authority.

(c) When significant adverse impacts cannot be avoided, reiteration should surface viable mitigation measures. When mitigation is necessary, planners must take the following actions.

(1) For significant water-related adverse impacts which cannot be eliminated by further planning iterations, planners are directed to consider mitigation actions based on the Corps' initiative rather than waiting to respond to technical questions or concerns raised by another public entity. This action is required by § 294.8 of this chapter.

(2) For significant non-water related adverse impacts outside the normal range of Corps planning, assistance from other Federal, State and local agencies is to be sought regarding pertinent means to address or consider the adversity in question.

§ 295.12 Effective date.

This regulation is effective November 10, 1975, as published in the FEDERAL REGISTER on that date and codified as 33 CFR 295. The provisions of § 290.12 of this chapter are applicable to this regulation.

PART 393—FEASIBILITY REPORTS: SYSTEM OF ACCOUNTS [ER 1105–2–921]

393.28 Effective date.

AUTHORITY: Water Resources Council, *Principles and Standards for Planning Water and Related Land Resources*, 38 FR 24778–24869, 10 September 1973.

§ 393.1 Purpose.

This regulation provides guidelines for reporting the results of evaluating alternative plans, consistent with the requirements of the WRC Principles and Standards and related policies.

§ 393.2 Applicability.

This regulation is applicable to all OCE elements and all field operating agencies having Civil Works responsibilities.

§ 393.3 References.

(a) ER 1105–2–200, Multiobjective Planning Framework (33 CFR 290).

(b) ER 1105–2–220, Problem Identification (33 CFR 292).

(c) ER 1105–2–240, Impact Assessment (33 CFR 294).

(d) ER 1105–2–250, Evaluation (33 CFR 295).

§ 393.4 Objective of the system of accounts.

The System of Accounts (SA) is a display requirement of the P&S and is integral to the iterative planning process established by reference § 393.3. The SA is filled out with increasing refinement and detail as the study progresses. The planning process generates information, some of which is displayed as the content of an interim SA at the end of each iteration. The interim SA will be used to help determine what must be done on the next iteration to improve planning. §§ 393.5–393.26 detail the content requirements of the final SA displays; § 393.27 indicates the uses of the interim SA during ongoing planning.

§ 393.5 General.

The SA can display only a limited amount of the information derived during the planning process. Therefore, the interdisciplinary planning team will be allowed considerable latitude in the format and level of detail of the SA. Most of its content results from the evaluation of significant impacts. Thus, only significant beneficial and adverse contributions will be displayed. In addition, the SA must describe each alternative carried through the final planning stage; display the planning objectives; present each plan's performance against the specified evaluation criteria; and indicate the timing, geographical incidence, uncertainty, exclusivity, and actuality associated with the evaluation of significant impacts, as discussed in Part 295 of this chapter. Because the SA does not include all information, this ER does not affect display requirements established in other regulations. However, the SA satisfies the display requirements of Section 122 guidance (Part 294 of this chapter).

Planning Objective	*Contribution*
Reduce flood hazard in area X	Provides 100-yr. level of protection.
Address long-term irrigation needs	Provides 100,000 AF.
Increase riverbank preservation	Preserves 2 mi. of riverbanks.
Improve water quality of river X	Increases water quality to a level suitable for swimming.

§ 393.6 Suggested tables.

No rigid format is required. However, two suggested tables are presented. Table 1 will be very general and brief. It will present the crucial planning considerations underlying each alternative. This table will be attached to the Statement of Findings. Table 2 will be used to display the breadth and detail of the assessment and evaluation of alternative plans. It will normally be presented in the body of the main report in that section pertaining to assessment and evaluation.

§ 393.7 Final planning objectives displayed.

The SA will display each planning objective carried through the final iteration and the beneficial and adverse contributions thereto made by each alternative. Contributions will be indicated in essentially physical terms with considerable flexibility allowed the interdisciplinary planning team to choose an appropriate descriptive unit; e.g.

§ 393.8 Potential planning objectives — not displayed.

The feasibility report will identify resource management issues surfaced during the study but not carried through as final planning objectives. Explanations for not carrying through such issues include:

(a) Lack of public support.

(b) Lack of net positive contributions to the national objectives.

(c) Lack of technologically sound measures to obtain the desired outcome.

TABLE 1.—*Summary comparison of alternative plans*

	Plan A	Plan B	Plan N
			(To be typed as required)
A. Plan description			
B. Significant impacts.[1] (The significant economic, social, and environmental effects of each plan are to be listed.)			
C. Plan evaluation:			
1. Contributions to planning objectives. (The beneficial and adverse contributions of each plan to the planning objectives are to be listed.)			
2. Relationship to 4 national accounts. (The beneficial and adverse contributions to each of the 4 P. & S. accounts are to be listed.):			
NED			
EQ			
SWB			
RD			
3. Plan response to associated evaluation criteria[2].			
D. Implementation responsibility. (Federal, including both Corps and non-Corps requirements, State, local, and private actions necessary to implement each plan are to be listed.)			

[1] Significant impacts specified in sec. 122 of Public Law 91-611 will be noted with an *, pt. 294 of this chapter.

[2] Each plan's acceptability, completeness, effectiveness, efficiency, certainty, geographic scope, NED benefit/cost ratio, reversibility, and stability should be noted if crucial to plan selection.

TABLE 2.—*System of accounts*

Accounts	Plan description—location of impacts					
	Plan A				Plan B	Plan N
	Within the immediate planning area	Within the rest of the study area	Within a larger area affected by the plan	Within the rest of the Nation		
	(To be typed as required)					
1. National Economic Development.						
a. Beneficial impacts (specify separate benefits and source, if possible.)						
(1) Value of increased outputs of goods and services.						
(2) Value of output resulting from external economies.						
(3) Value of output from use of unemployed or underemployed resources in construction or installation.						
(4) Total NED benefits.						
b. Adverse impacts (specify separate costs and source, if possible.)						
(1) Project costs.						
(2) Loses resulting from external diseconomies.						
(3) Total NED costs.						
c. Net NED benefits						
2. Environmental quality						
a. Environmental quality enhanced (specify resources impacted and quantify as possible.)						
b. Environmental quality degraded (specify resources impacted and quantify as possible.)						
c. Environmental quality destroyed (specify resources impacted and quantify as possible.)						
3. Social well-being						
a. Beneficial impacts (specify and quantify as possible.)						
(1) Enhancement of health, safety, and community well being.						
(2) Educational, cultural, and recreation opportunities.						
b. Adverse impacts (specify and quantify as possible.)						
(1) Deterioration in quality of life, health, & safety.						
(2) Degraded educational, cultural, & recreational opportunities.						
(3) Injurious displacement of people & community disruption.						
4. Regional development						
a. Beneficial impacts (specify separate benefits & source if possible.)						
(1) Value of increased income						
(2) Quantity of increased employment.						
(3) Desirable population distribution.						
(4) Increased stability of regional economic growth.						
b. Adverse impacts (specify separate costs & source.)						
(1) Value of income lost						
(2) Quantity of jobs lost						
(3) Undesirable growth						

INDEX OF FOOTNOTES

TIMING

1. Impact is expected to occur prior to or during implementation of the plan.
2. Impact is expected within 15 years following plan implementation.
3. Impact is expected in a longer time frame (15 or more years following implementation.)

UNCERTAINTY

4. The uncertainty associated with the impact is 50% or more.
5. The uncertainty is between 10% and 50%.
6. The uncertainty is less than 10%.

EXCLUSIVITY

7. Overlapping entry; fully monetized in NED account.
8. Overlapping entry; not fully monetized in NED account.

ACTUALITY

9. Impact will occur with implementation.
10. Impact will occur only when specific additional actions are carried out during implementation.
11. Impact will not occur because necessary additional actions are lacking.

SECTION 122

*Items specifically required in Section 122 and Part 294 of this Chapter.

§ 393.9 Alternatives to be displayed.

While no specific number of alternatives is required for the SA, all alternatives carried through the final planning stage will be displayed in the final SA. This means that the NED plan and the EQ plan(s), as well as other plans which meet significantly different mixes of NED and EQ, will be displayed. Resource management measures associated with each alternative should be presented in the Plan Description portion of Tables 1 and 2.

§ 393.10 Reporting of alternatives not displayed.

All major alternative plans considered will be briefly described in the report. The basis for exclusion of certain alternatives from the final SA display will be stated; for instance, the alternative is similar to another alternative displayed but was found to be less acceptable or efficient. Any plan or element thereof, proposed by a significantly affected group and not carried through the final planning stage, will be appropriately noted in the presentation. However, plans will not be excluded from the final SA because of incidence of cost sharing or lack of Corps authority to implement.

§ 393.11 Display of significant impacts.

A summary of significant impacts will be presented; see, for example, Table 1 and Part 294 of this Chapter. Emphasis will be placed on describing environmental and social impacts in an appropriate manner since this task is highly qualitative. Economic changes should be quantified in dollar terms.

§ 393.12 Regions for display.

The SA will display information concerning the geographic regions in which a significant portion of any beneficial or adverse impact will occur. The P&S require, as a minimum, that at least one region and the rest of the nation be shown. The one region need not necessarily be an OBERS area. The regions suggested in Table 2 are examples of the likely geographical areas where impacts may occur. These regions are:

(a) *Within the immediate planning area.* This is the area where physical structures or land purchase are to be undertaken. This area will be specified, as appropriate, usually in terms of a county, city, or other local jurisdiction.

(b) *Within the rest of the study area.* This is the area where most of the significant physical impacts occur. This area will be specified as appropriate, usually in terms of a river basin, subbasin, metropolitan area, coastal area, harbor area, or other water and related land system. The planning area will normally be included within the study area.

(c) *Within a Larger Area Affected by the Plan.* In some instances significant impacts may occur beyond the study area. This is apt to be the case for studies involving interbasin transfers of power, water, or water pollutants, and for many navigation plans. Significant impacts on such areas are likely to occur primarily as a result of large scale plans either individually or as part of a system.

(d) *Within the Rest of the Nation.* This area should be used as an account balancing area. By definition, all impacts not included in previously designated regions accrue to the rest of the nation.

§ 393.13 Regionalization of NED and EQ accounts.

To aid in the display of beneficial and adverse impacts by regions, the following criteria should be followed:

(a) For the NED account, flood control benefits will be shown for the flood plain. Water supply, irrigation, and power benefits will be shown for the area receiving the water or power. In instances where the water or power goes into a common pool, the receiving area is that served by the common pool. Water quality benefits will be shown for the area where quality is improved. Fish and wildlife dollar benefits will be shown for the area where the improvement in habitat occurs. For recreation benefits, including lake recreation, beach erosion, and small boat harbors, the benefits will be shown for the area(s) where the recreationists reside. Navigation benefits will be shown for the origins and destinations of the commodities in transit.

(b) For the EQ account, the effect will generally be shown where the physical impact occurs.

(c) The fact that effects are assigned to a region can be misleading. Often the direct NED benefit is passed on to consumers throughout the nation. Similarly, preservation of the environment may benefit people throughout the nation. In those cases where the impact is traced to such consumers, it is acceptable to show it for the region where the ultimate beneficiary resides, rather than for the areas specified above.

§ 393.14 Components of accounts.

The P&S specify components of accounts which will be considered in filling out the SA. Only components to which a significant contribution occurs will be displayed; other components need not be shown. Sub-categorization of the components displayed will be used to further specify the source and nature of the contribution (see Table 2). For the EQ account it is recommended that § 393.12 form the basis for the SA display. The other two accounts need not be displayed by components if more appropriate means are established.

§ 393.15 Content of national economic development (NED) account.

Since this account is filled out in dollar terms, it should emphasize brevity. However, it should be complete in the sense that total dollar quantifiable benefits and costs will be displayed. Benefits and costs should be specified as average annual equivalents using the appropriate period of analysis and discount rate (Part 295 of this chapter). Price levels will be those current at the time of the study, updated periodically according to existing practice. WRC Guideline #2, *Agricultural Price Standards*, October 1974, as updated, will be used for agricultural price levels. The components of benefits and costs in the NED account are discussed below:

(a) *Value of Increased Outputs of Goods and Services.* These are the benefits calculated under established Corps procedures for benefit/cost analysis. No change in existing guidelines are made in this regulation. However, recreation unit day values are increased by the P&S. It is important that the source of NED benefits be specified; e.g., "flood control"; "open space"; "fish and wildlife"; "water quality", and so forth. Note that many of the benefit sources are oriented toward environmental outputs. This is because such benefit sources are often partially quantifiable in the NED account. Undue detail as to the source of benefits is not necessary. For example, "flood control" is a sufficient designation of source; sub-designations such as "existing flood damages reduced", "reduction of fill costs", and the like are not needed for the SA.

(b) *Value of Output Resulting From External Economies.* The NED benefits resulting from external economies, sometimes referred to as "indirect" or "secondary", are to be included in the NED account only in those cases where it can be positively shown that a net gain will accrue to the nation. These benefits have not been widely used in evaluating Corps projects becaues of the empirical difficulty of separating national aspects of external economies from regional or local transfers. However, their validity is clear and any language to the contrary in EM 1120–2–112, *Secondary Benefits in Flood Control Evaluation*, is unintended. Even where net national secondary benefits will accrue due to the outputs of a Corps plan, such benefits are not attributable to the plan if the outputs would be obtained by an alternative means. Examples of such benefits are water supply and power.

(c) *Value of Output From Use of Unemployed or Underemployed Resources in Construction or Installation.* This is a special category of benefits which relaxes the basic assumption of a "full employment" economy. As explained in the P&S, this component is conceptually an adjustment to the cost of a project because there is no economic cost associated with the use of an otherwise unemployed resource. Due to measurement difficulties, only unemployed labor resources will be considered as a project benefit in this category. ER 1165–2–6, *Evaluation of Area Redevelopment Effects*, is applicable with the following adjustments:

(1) *Direct payments.* The NED benefit is limited to payments to unemployed and underemployed labor resources directly employed in the construction and installation of the plan. Labor earnings without the Corps plan will be deducted for underemployed resources. The number of unemployed and underemployed laborers directly employed on similar water and land resources projects in comparable areas is an acceptable empirical method of establishing such benefits. Also acceptable is experience on plans similar to the Corps plan such as using urban mass transit system construction as a proxy for large reservoirs in urban areas. The SA will specify the range of uncertainty associated with the calculation of these benefits.

(2) *Maintenance.* The NED benefit is limited to the construction and installation phase of the plan. Maintenance related benefits and induced employment benefits may be shown in the regional account only.

(3) *Status of benefit.* The P&S elevates benefits to unemployed and underemployed labor resources to the same level as other NED benefits. This means that there will be only one NED benefit/cost ratio.

(d) *Project Costs.* These are all inputs, measured at market value, required for plan implementation. The measurement of such costs is well established. Losses in land productivity, mitigation costs, and loss of recreation opportunities at the new unit day values will be included.

(e) *Losses From External Diseconomies.* Such losses are measured in the same manner as computing the value of output resulting from external economies.

§ 393.16 Content of environmental quality (EQ) account.

Emphasis will be given to this account because, unlike the NED account, there is no common denominator readily available for comparing items within the EQ account. On the other hand, extensive listing of all perceived impacts may confuse rather than enlighten reviewers and the public. Hence, the challenge is one of providing an adequate, comprehensible display. One possible method is shown in Table 2, where the components of the EQ account are not the focus of the display; rather the focus is on the values of the impacts. The interdisciplinary planning team, reflecting public inputs and expert judgment, will indicate whether EQ is enhanced, degraded, or destroyed. Where there is no impact or where evaluation indicates that the impact is neutral or otherwise insignificant, no entry is made in Table 2 for the sake of brevity. However, in certain situations where there is no impact, the report will note the lack thereof (see Part 294 of this chapter). The judgment of the interdisciplinary planning team is based upon with and without analysis and the following definitions:

(1) *EQ Enhanced.* The environment is enhanced if a greater quantity or improved quality of environmental outputs is obtained with a plan than without it. Often, so called "preservation" measures are actually an enhancement because without the plan the environment would be degraded or destroyed over time. Frequently, the same plan may cause both beneficial and adverse outputs. Beneficial outputs will be displayed under EQ enhanced; adverse impacts will be displayed under EQ degraded or destroyed. However, EQ enhanced should be limited, where appropriate, by some notion of an optimum quantity of the EQ output. For example, the amount of

V 40 N 217 NOV 10 75 XUM

open space needed by a certain population size is the limit on the extent of EQ achieved by additional open space.

(2) *EQ Degraded.* The environment is degraded if a lesser quantity or reduced quality of environmental output is obtained with a plan than without it. Nevertheless, the environmental loss could be made up by actions outside the plan or by natural processes over a period of time.

(3) *EQ Destroyed.* In this case, environmental quality is reduced to the extent that it cannot be regenerated. Loss of a species of wildlife in a given area is an example. Pollution to the point where a river becomes anaerobic is another. While the line between degradation and destruction is rarely clear and precise, the distinction is important. "Irreversible commitments of resource to future uses" as specified by the P&S, will be a subcategory of the "EQ destroyed" category.

§ 393.17 Content of social well being account.

This account includes most of the benefits traditionally termed intangible under existing practice, especially for flood plain management plans.

(a) *General.* The following are the general requirements and considerations in filling out the SWB account in the SA.

(1) *Flood Control.* Based on paragraph 6, page 15 of the WRC Principles, intangible flood control benefits will be considered in plan formulation, selection and recommendation. Such effects will be presented briefly in the SA under "Enhancement of health, safety, and community well being", or comparable designation (see Table 2).

(2) *Adverse SWB.* Avoidance of adverse social contributions is a consideration of plan formulation. Beneficial contributions are treated in a much more constrained manner (see Part 295 of this Chapter). Therefore, Table 2 divides social impacts into those which are beneficial and those which are adverse. Although social benefits are not taken into account fully at the project planning level, planners should recognize that beneficial contributions may be important at the national program planning and budgeting level. Therefore, to the extent practicable, planners are encouraged to provide estimates of social contributions, both beneficial and adverse.

(3) *Monetary SWB.* Where a social contribution can be quantified (partially or totally) in dollar terms as a national benefit, it should be included as an NED benefit or cost.

(4) *Preferable Entry.* In general, as with all intangible factors, the preferable entry is a meaningful, quantified notation of the beneficial or adverse contribution. However, lack of either study funds or data may necessitate a verbal, descriptive entry.

(b) *Specifics.* The following expands on that already specified in the P&S.

(1) *Effects on Distribution of Real Income.* The beneficiaries of plans will be specified by family incomes into upper, middle, and lower third, based on the national average. At the planner's discretion, other classes of beneficiaries may be displayed for a given study, such as "farm", "urban", and so forth.

(2) *Effects on Health, Safety, and Community Well Being.* Generalized statements are to be avoided. If an impact is significant enough to be displayed, then it is important enough to be documented. This is particularly so where the contribution is used to formulate, select, or recommend a plan.

(3) *Effects on Educational, Cultural, and Recreation Opportunities.* These impacts generally can be shown as a function of mileage/time, distance, and numbers and kinds of population affected.

(4) *Injurious Displacement of People and Community Disruption.* This category is recognized as a recurrent problem in many plans. The display should indicate the effect of measures taken to avoid such problems; for example, betterments, early sale and leaseback, town relocation, and the like.

(5) *Other.* The social category is a broad one and unique aspects may be involved in any given plan or element thereof. The "other" category is intended to insure that all social contributions of significance are included.

§ 393.18 Content of regional development account.

General comments above, concerning the social account, are applicable to this account as well. Impacts should be quantified if possible. Avoidance of unreasonable adverse impacts is a consideration of plan formulation; thus adverse and beneficial impacts should be separately displayed. Certain "regional" contributions other than transfers may be dollar quantifiable on a national basis, particularly for external economies and diseconomies. If quantified, such contributions belong in the NED account. The following expands on that already discussed in the P&S:

(a) *Regional EQ and SWB.* These components are redundant for the type of format used in Table 2, which calls for display of EQ and SWB components by regions. Hence, there is no need for a regional EQ or SWB component.

(b) *Regional Income and Employment.* This discussion applies to location effects on regional income in the RD account. It also applies to employment associated with such income. This information will be displayed whenever the public has indicated a strong concern regarding regional income and employment effects. However, display is inappropriate where a competent, professional job cannot be done due to lack of time and funds. The following considerations should be reflected in Table 2. First, only when a complete accounting of all direct and indirect effects of a plan on regional income can be accomplished will the RD account be summed. Second, a qualitative description should be used whenever the assessment is limited, thereby avoiding misleading quantification. Third, when the accounting is incomplete, an entry similar to the following will be included in the display: "All other regional income and employment-not evaluated." Fourth, the uncertainty associated with the effect will be noted. And fifth, nothing in the above limits the need for a full assessment and display of adverse impacts on employment, business, and industrial activity pursuant to Section 122 requirements (Part 294 of this chapter). The following categorization defines a complete accounting for a given region and explains items 4a(1) and (2) of Table 2:

(1) *NED net benefits.* These are directly derived from the NED account.

(2) *Direct expenditures.* These are the net increases in expenditures made within the region. For example, where these are recreation expenditures, they include purchases for motel accommodations, bait, repairs, and so forth which would not be made in the region in the absence of the alternative. Where these are construction force expenditures, they include the amount of wages spent in the region over and above those which would be made in the absence of the alternative. Such construction expenditures exclude wages to residents of the region.

(3) *Subsequent impacts.* This category includes expenditures made after the NED and direct expenditures. For example, a reduction in agricultural flood losses may mean that farmers have more income which can be expended on additional farm equipment or house furnishings; obviously farm equipment and furniture retailers will, in turn, have increased income to spend; and so forth. Such second and third round economic impacts are generally referred to as "multiplier" effects. Their measurement is especially difficult, particularly for small regions. These subsequent impacts will be separately shown. The Bureau of Economic Analysis (BEA), U.S. Department of Commerce, has developed some preliminary tools for the estimation of multiplier effects. Whenever a planner decides to display multiplier effects for an area in which BEA is capable of making an estimate at reasonable cost, the BEA data will be obtained; deviations will be explained. In addition, WRC, in conjunction with BEA, is developing a set of regional multipliers. When these become available, they will be used.

(4) *Induced economic activity.* Exclusive of NED benefits, benefits to induced activities are properly included in the regional account. Care must be taken to exclude those benefits already implicitly or explicitly included above.

§ 393.19 Alternative futures.

The alternative future which reflects the without condition will be the basis for the SA display. There is no other SA display requirement associated with alternative futures. For further details on alternative futures and sensitivity analysis, see para 24 of this regulation, § 292.9 of this chapter, and § 295.8 of this chapter.

§ 393.20 Timing.

The timing of an effect is a critical variable in plan formulation. Therefore, the SA provides for the following notations:

(a) A "1" will be used to designate impacts expected to occur prior to or during plan implementation.

(b) A "2" will be used to designate impacts expected in a short time frame. These will generally be impacts estimated to occur in 15 years or less after implementation of a plan.

(c) A "3" will be used to designate impacts expected in a long time frame. These will generally be impacts estimated to occur later than 15 years after implementation of a plan.

§ 393.21 Uncertainty.

The concept of uncertainty is a broad one. It encompasses two of the specified evaluation criteria, certainty and stability, discussed in § 295.8 of this chapter. A rigorous statistical analysis to establish certainty or stability is not required. As used in this guidance, the concept represents a judgmental balancing of the following factors: the sensitivity of the impact on plan recommendation; the data limitations inherent in either the assessment or evaluation of the impact; and limitations inherent in the theoretical framework or methodology. Based upon these factors, the following notations will be made recognizing that the percent designations are suggestive and are not intended to imply statistical rigor.

(a) A "4" will be used to designate that the level of uncertainty associated with an impact in the judgment of the analyst is greater than 50%. Many components of the regional account, second, and third order effects, and external economies and diseconomies will often fall into this notation.

(b) A "5" will be used to designate an uncertainty range of 10%–50%.

(c) A "6" will be used to designate an uncertainty range of 0–10%, thus suggesting that the impact is virtually certain.

§ 393.22 Exclusivity.

The components of accounts are not mutually exclusive. There are two major areas where such non-exclusivity may distort the display of accounts.

(a) *Regional Development.* Regional components of the NED, EQ, and SWB accounts must sum to the national totals. This will avoid double counting of effects geographically.

(b) *Double Classification of Monetary and Non-Monetary Effects.* Some contributions are dollar quantifiable but deserve special handling as non-monetary contributions as well. For example, while elimination of land scour due to flood flows can be quantified in dollars and counted as an NED benefit, it should also be included as a positive contribution to the environmental account since it improves the quality of land resources. Therefore, the SA provides for the following notations:

(1) The designation "7" will be used when the SWB, EQ, or RD contribution has been fully monetized and counted as an NED beneficial or adverse contribution.

(2) The designation "8" will be used when the SWB, EQ, or RD contribution has been partially monetized.

§ 393.23 Actuality.

Many of the contributions of plans depends upon the actions of others. The SA will include notations indicating the proximity of cause between a plan and an impact. The following notation will be used in Table 2.

(a) A "9" will be used to designate that the contribution will likely occur without any action by any entity other than the proposed implementing agency, normally the Corps, or the required action is extremely likely to occur through the economic or natural physical systems.

(b) A "10" will be used to designate that the achievement of the beneficial contribution requires positive governmental action, other than cost sharing, by another agency. The adverse contribution associated with this action can and likely will be prevented by government action. This situation can be specified only when coordination indicates that the necessary action will be taken.

(c) An "11" will be used when coordination indicates that the action required by other agencies will not be forthcoming.

§ 393.24 Section 122 requirements.

Section 122 specifies kinds of effects which must be assessed. These are discussed in Part 294 of this chapter. These effects will be identified, assessed, and evaluated. If significant, they will be displayed in the SA. When displayed, they will be asterisked.

§ 393.25 Display of specified evaluation criteria.

Each plan's acceptability, completeness, effectiveness, efficiency, certainty, geographical scope, NED benefit/cost ratio, reversibility, and stability will be noted on Table 1, if critical to plan selection. Except for the NED benefit/cost ratio, most of these criteria will be useful primarily in the process of filling out the interim SA as part of the functional planning tasks. Therefore, for the final display, emphasis should be on brevity; the accompanying write-up may be used to expand on the display.

(a) *Acceptability.* For purposes of display, the planner should indicate whether or not the plan is supported by any significant segment of the local, state, or regional publics. In addition, strong opposition by a significant segment of the public should be noted.

(b) *Completeness.* A brief statement will be made as to which investments or actions necessary to obtain the outputs are not part of the plan. Notations "9", "10" and "11" will already have addressed the major aspects of completeness and further information will be supplied in relation to the "implementation responsibility" section of Table 1.

(c) *Effectiveness and Efficiency.* These two related criteria center on the concept of achieving maximum net outputs, where outputs and inputs are conceived broadly to include intangible factors. Effectiveness includes, in addition, the concept of technological feasibility. All plans described in the SA should be the least costly way of achieving the outputs. It will be sufficient for display purposes to indicate that the plan is the least costly means of obtaining the outputs of that plan, where cost includes intangible costs, and that the plan is technologically feasible.

(d) *Certainty.* A brief statement will be made as to the likelihood of the contributions in the SA being obtained. Notations "4", "5", and "6" will already have addressed the major aspects of uncertainty.

(e) *Geographical Scope.* This criteria is closely related to the choice of study area. For final display purposes, indicate those areas beyond the study area whose problems are solved by the plan, such as, by interbasin transfers of water. In addition, where a report concerns only a portion of study authority area, this fact will be noted.

(f) *NED Benefit/Cost Ratio.* This ratio will always be shown.

(g) *Reversibility.* A brief statement of the degree of reversibility will be made.

(h) *Stability.* A simple notation of high, low, or medium stability is sufficient. Since detailed analysis of each plan under each alternative future is not required, this criteria will usually involve considerable judgment. The concept of stability is also inherent in notations "4", "5", and "6". As a guide, plans which are highly sensitive to data or assumptions about which knowledgeable people might differ have low stability.

§ 393.26 Implementation responsibility.

Federal, including both Corps and non-Corps, state, regional, local, and private actions required to implement each plan are to be listed.

§ 393.27 Uses of SA.

The SA is to be used as an aid to the planning process established in Part 290 of this chapter. It is used at the end of each iteration as a check upon the thoroughness of carrying out the planning tasks. Also, the SA will assist in defining the additional work necessary for the subsequent iteration. The following paragraphs indicate suggested specific uses of the SA in conjunction with the planning process.

(a) *Problem identification.* There are four suggested uses of the SA to facilitate planning for subsequent iterations:

(1) *Planning Objectives.* The SA will assist the interdisciplinary planning team in observing when planning objectives have been overlooked, or are too numerous, general, or specific. When combined with the specified reformulation criteria, the SA provides a tool for honing or refining plans to insure that they are the best ones from an overall societal point of view.

(2) *Study Area.* Using the SA to observe the location of significant impacts, the interdisciplinary planning team can determine whether the study area has been appropriately identified. This activity is directly related to the geographical scope evaluation criteria. As with most of the specified evaluation criteria, the greatest utility is to the ongoing planning process rather than to the final SA display.

V 40 217 NOV 10 75 XUM

(3) *Data Gaps in Base Condition, Projections.* When the information in the SA is soft or uncertain, and the impact is crucial to reaching a decision, a data gap has been surfaced which may be remedied on subsequent iterations. Where remedying the data gap is not feasible, sensitivity analysis of alternative futures is helpful. The SA notations "4", "5", and "6" and the certainty and stability evaluation criteria are directly related to this activity. In addition, a high degree of uncertainty may imply that a plan with greater reversibility is desirable.

(4) *Alternative Futures, Sensitivity Analysis.* Analysis leading to the SA often involves assumptions, steps, techniques, or data about which knowledgeable people could differ. Hence, the SA will be used as a basis for checking the sensitivity of the analysis and data to the results. This activity is directly related to the certainty and stability evaluation criteria.

(b) *Formulation of Alternatives.* The relationship between plan outputs and plan measures lies at the heart of reformulation criteria. In filling out the SA, opportunities for increasing net outputs should become apparent. Hence, the interdisciplinary planning team should try to increase the quantity and quality of outputs, decrease costs, or both. This is done by adding, deleting, or modifying measures and assessing and evaluating outputs to see if greater net outputs can be obtained.

(c) *Assessment and Evaluation.* The display of the results of these two tasks are the main content of the SA. There are three major areas where the SA will assist in improving assessment and evaluation on the next iteration. These are:

(1) *Public Input to Evaluation.* Many of the impacts of a plan are viewed differently by various segments of the public and Corps planners. The SA provides a focus for periodic interaction with the public as to the values placed on outputs. In many cases this may change the evaluation during subsequent iterations.

(2) *Data Gap in Assessment.* The SA will surface data gaps in the assessment task. Thus, improved assessment should be sought on the next iteration. A similar statement can be made for evaluation techniques.

(3) *Unintended Effects.* One of the most productive uses of the SA lies in surfacing unintended impacts. For example, suppose plans are designed primarily for wastewater management. However, one plan uses small detention reservoirs, which also reduce flood problems. This impact will be noted in the SA. On reiteration, the potential of a system for joint outputs should be explored. Alternatively, significant unintended impacts may be adverse. In such cases, mitigation measures or revision of planning objectives is called for. For example, one solution to a flood problem may have adverse impacts on ground water recharge, not mentioned previously as a concern in problem identification. The interdisciplinary planning team should determine whether the lost recharge is serious, by professional analysis and public inputs. If it is serious, recharge ought to be incorporated into the planning objectives, thus directing attention toward solutions, including mitigation, which avoid loss of recharge.

§ 393.28 Effective date.

This regulation is effective November 10, 1975, as published in the FEDERAL REGISTER on that date and codified as 33 CFR 393. The provisions of § 290.12 of this chapter are applicable to this regulation.

DEPARTMENT OF TRANSPORTATION

Coast Guard

■

DEEPWATER PORTS

Regulations on Licensing Procedures and Design Construction, Equipment and Operations Requirements; and Proposal on Site Evaluation

V 40 217 NOV 10 75 XUM

Title 33—Navigation and Navigable Waters

CHAPTER I—COAST GUARD, DEPARTMENT OF TRANSPORTATION

SUBCHAPTER NN—DEEPWATER PORTS

[CGD 75-002]

LICENSING PROCEDURES AND DESIGN CONSTRUCTION, EQUIPMENT AND OPERATIONS

Requirements

● **Purpose. These regulations establish rules for the licensing, design, construction, equipment, and operation of deepwater ports beyond the territorial sea of the United States. They are promulgated under the Deepwater Port Act of 1974 (88 Stat. 2126, 33 USC 1501) whose purpose is to regulate commerce, promote efficiency of transportation, and protect the environment by establishing procedures for the location, construction and operation of deepwater ports off the coasts of the United States.** ●

Interested persons were given an opportunity to participate in this rulemaking by a notice that appeared in the May 7, 1975, issue of the FEDERAL REGISTER (40 FR 19956). The Coast Guard also mailed the proposed rules to all persons who indicated an interest in the rulemaking. In addition to receiving written comments, the Coast Guard held a public hearing on June 6, 1975, to receive oral and written comments on the proposed rules. Comments made at the public hearing and all written comments submitted were considered by the Coast Guard in promulgating these final rules. The public docket on this rulemaking contains correspondence from approximately 94 commenters, including those commenters who submitted after the closing date of June 23, 1975. From the data, views, or arguments submitted, the Coast Guard found over 1200 relevant matters to consider.

A substantial number of comments were adopted, in whole or in part, to the extent possible, and many were rejected. The issues raised run into the hundreds and a discussion of all of them is impracticable. Salient points are discussed below.

PART 148

§ 148.107. Section 148.107 (a)-(e) has been revised to require one copy of each license application to be submitted to the U.S. Army Corps of Engineers office having jurisdiction over the proposed port area. The Coast Guard considers this necessary to facilitate the District Engineer's review within the short period allowed.

§ 148.109. Several comments were received requesting that proposed § 148.109 contain a listing of all application requirements under the Act, so that an applicant could avoid submitting an incomplete application. The Coast Guard agrees with these comments, and accordingly § 148.109 now contains a complete listing of all application requirements.

Comments on § 148.109 (a), (b), and (c) are discussed below under "Antitrust Review."

Comments on proposed § 148.109(f) stated that in many cases consultants and employees of an applicant, rather than the applicant himself, would have offshore operations experience. Since the term "applicant" can generally apply to a group of owners, affiliates, consultants, or similar persons, § 148.109(f)(1) has been rewritten to include descriptions of the experience of the applicant, consultants, and, if the applicant desires, affiliates.

Many comments were received concerning proposed § 148.109(g) which requires submission of a State water quality certification that meets the requirements of § 401(a)(1) of the Federal Water Pollution Control Act Amendments of 1972 (33 U.S.C. 1341(a)(1)). Some commenters stated that § 401(a)(1) provides certification by a State, or in some circumstances, by the Administrator of the EPA. The Coast Guard agrees that in some instances a water quality certification may have to be obtained from the Administrator of the Environmental Protection Agency and has revised § 148.109(g) to allow for the submission of a request for the water quality certification with a deepwater port license application. Some commenters expressed the concern that there would be a delay in the license application process because certification may not be received before submission of a license application. The concern is unfounded because the Federal Water Pollution Control Act Amendments of 1972 and the deepwater port regulations require the certification not at the time of application but before a deepwater port license is granted.

Proposed § 148.109(g-1) requires submission of a certification only if the state involved is an adjacent coastal State. This proposal was not consistent with the Coastal Zone Management Act of 1972. Section 148.109(g-1) has been rewritten to require submission of each certification required by section 307 of the Coastal Zone Management Act of 1972.

Section 148.109(h) has been changed to require use of Department of Interior official forms for submitting information concerning the identification of each lease block established under the authority of the Outer Continental Shelf Lands Act (43 U.S.C. 1334) or the Submerged Lands Act (43 U.S.C. 1334). The requirement for the applicant to furnish copies of agreements with lease holders has been eliminated, but the lessee of each pipeline or other right-of-way must be identified, and detailed information concerning any interest that the applicant and others have in each block and the present and planned use of each block must be supplied to the Coast Guard.

Two commenters recommended that the qualifications for the person providing the soil analysis required in § 148.109(k) be stated. The section has been changed to require the opinion by a registered professional engineer specializing in soil mechanics.

One commenter recommended that proposed § 148.109(o) require an applicant to submit both a geophysical survey of the sea and subsea bottom and a description of the methods of pipeline corrosion protection and monitoring. This comment has been referred to the Materials Transportation Bureau, Office of Pipeline Safety Operations.

Proposed § 148.109(p) has been changed by adding petrochemical facilities and transshipment facilities to the onshore components data required in a license application because several commenters pointed out that the impacts from deepwater port development on these facilities are an important environmental consideration in the licensing process.

One comment stated that service craft in offshore operations can have considerable impact on onshore port and harbor areas. The commenter recommended that an applicant for a deepwater port license be required to describe his plans for shore based facilities to be provided for port service craft used at a deepwater port. This recommendation has been adopted in § 148.109(q)(5).

Comments were received stating that some of the information required for the draft Operations Manual may not be available at the time of its submission with the application. Proposed § 148.109(s) has been changed to allow submission of the information as it becomes available.

In response to numerous comments, proposed § 148.109(u) has been changed to require that only a general description of the proposed aids to navigation system be contained in the deepwater port application. It is recognized that detailed data may not be available at an early stage. This general information will be used for concept approval and § 149.707 has been added to allow later submission (180 days before commencement of transfer operations) of detailed descriptions of aids to navigation.

Two commenters stated that at the time of application, complete information required to obtain a Federal Communication Commission (FCC) license for the telecommunications equipment to be used in the construction and operation of the proposed port may not be available. Section 148.109(v) has therefore been changed to require submission in an application of a description of the radio station or other communications facilities and the proposed concept of operation during construction or operation of the port. An application for an FCC license may be submitted to the FCC when adequate technical information becomes available. A deepwater port license, if granted, will be conditional upon the receipt by the licensee of any necessary FCC licenses.

Section 148.109(z) is discussed below under "Antitrust Review."

§ 148.207. Several commenters suggested that all documents in the record of a proceeding should, as an administrative practice, be provided to adjacent coastal States. The Coast Guard changed proposed § 148.207(a) by including a procedural requirement based on this suggestion.

One commenter suggested that the rules should contain a clear statement

regarding the protection of confidential information. Section 148.207(c) has been added to require the identification of any material submitted that contains either trade secrets or commercial or financial information that is claimed to be privileged or confidential. Section 148.207(d) has been added to protect trade secrets and confidential material from public availability.

§ 148.211. Commenters on proposed § 148.211 requested that the FEDERAL REGISTER notices to announce filing of an application for a deepwater port license be mailed to adjacent coastal States and other States which might be affected by a proposed port. In addition, it was suggested that if a person submits comments on an application, he should receive from the Commandant notice of any amendments to that application. This suggestion was adopted by the Coast Guard and the procedural requirements are now contained in § 148.211.

§ 148.216. Commenters suggested that procedures for submitting a request under section 4(d) of the Act should be added to the proposed rules. Section 4(d) requires the Secretary to determine which project best serves the national interest or if both projects are warranted. The Coast Guard has adopted the suggestion and has added a procedural rule in a new § 148.216.

§ 148.217. Section 148.217 has been expanded to more fully describe the processes by which States become adjacent coastal States either by being so designated at the time a notice of application is published in the FEDERAL REGISTER or requesting to be so designated within 14 days thereafter. Only States that would be connected by pipeline or are within 15 miles of a proposed deepwater port would be declared adjacent coastal States in the notice. The list of required contents of a written request for designation of any other State has been modified to: (1) Reflect the statutory requirement that it be filed within 14 days after the notice of application is published; (2) require it to be signed by the Governor since it is he who personally exercises approval authority for the State under section 9(b)(1) of the Act; (3) provide supporting documentation describing the risk of damage to the coastal environment, of the requesting State, that could occur as the result of the establishment of a deepwater port; (4) require the requesting State to give its reasons why it believes the risk to its coastal environment is at least as great as to the adjacent coastal State to be connected by pipeline to the proposed deepwater port. In addition, a description of the statutory role performed by the National Oceanic and Atmospheric Administration in the processing of a request has been added.

§ 148.231/§ 148.251. Commenters questioned whether or not the notices of hearings under proposed §§ 148.231 and 148.251 would be published in the FEDERAL REGISTER. These commenters suggested that each notice be published in local newspapers in addition to any other notice given. Notices of hearings will not be published in the FEDERAL REGISTER but are sent to anyone who asks for them. In addition the Coast Guard will publicize each hearing in the locality where the hearing is to be held.

§ 148.211 / § 148.231 / § 148.251. Comments were received stating that notices of hearings issued under §§ 148.231 and 148.251 should be sent to adjacent coastal States and to other coastal States that are potentially affected by the proposed deepwater port. One commenter suggested that notice of application under § 148.211 be given to each adjacent coastal State. In response to these comments, §§ 148.231 and 148.251 have been changed to provide that the notice of public hearing is sent to each adjacent coastal State. Also, § 148.211 has been changed to provide that each notice of application is sent to each coastal State and to any other coastal State bordering on the body of water in which the proposed port would be located. Each potentially affected coastal State, once it has received notice of application and determined its interest in the proceeding, can obtain each notice sent to an adjacent coastal State by requesting to be put on the mailing list.

§ 148.263. Several commenters suggested that proposed § 148.263(a) be changed by allowing an answer to a petition to be filed within 10 days instead of 5 days. In addition, it was suggested that proposed § 148.263(b) be changed by allowing a petitioner to intervene within 20 days instead of 10 days. The Coast Guard does not agree that these time limits should be increased because the suggested changes are inconsistent with the statutory time frame for hearings.

§ 148.321/§ 148.323/§ 148.325/§ 148.327. Several commenters expressed the view that proposed § 148.321 concerning the Secretary's formal issuance or denial of an application did not adequately describe the criteria to be employed in making the decision. In response to those comments, a description of the procedures following the last public hearing has been added. As revised, § 148.321 reflects the 45 day period for formulation of recommendations by concerned Federal agencies and adjacent coastal States followed by the 45 days allowed for preliminary determinations and final action on the applications.

A new § 148.323 contains the criteria considered by the Secretary before approving an application. New § 148.325 contains the criteria to be applied when there is more than one application for a deepwater port license in a designated application area. Proposed § 148.323 has been renumbered § 148.327.

§ 148.405. A number of commenters suggested that the period of validity of a deepwater port license should be prescribed for a term of 20 years and that procedures should be established for suspension, termination, and revocation of a deepwater port license. Section 148.405 has been changed to provide that a license terminates 20 years after the date of issuance unless a shorter period is requested by the applicant. Rules for suspension, termination, revocation, and renewal of a license will be the subject of future rulemaking.

§ 148.407. In response to comments, a new § 148.407 has been added to allow an adjacent coastal State to consult with the application staff concerning license conditions that the application staff may have under consideration. The section also describes information that an adjacent coastal State should submit to the application staff if the State determines that an application is inconsistent with State programs relating to environmental protection, land and water use, or coastal zone management.

Subpart E. Proposed Subpart E has been omitted because of a number of comments received stating that the rules proposed for site evaluation and preconstruction testing were inadequate in scope and content. The Coast Guard agrees with these comments. All the comments received on site evaluation and preconstruction testing have been studied and the Department of the Interior, National Oceanic and Atmospheric Administration, and the Environmental Protection Agency have been consulted. A notice of proposed rulemaking on this subject is being issued for public comment on page 52581 of this issue of the FEDERAL REGISTER.

Subpart F. Commenters suggested that the procedures for granting exemptions should be changed to provide for extensive participation by the public and by Federal, State, and local agencies in the proceedings. Section 148.607 has been added. Each petition appearing to involve the interest of an adjacent coastal State will be referred to the Governor of the State for consideration and recommenadtion. Additional rulemaking is being studied.

General Comments. The Center for Law and Social Policy recommended that there should be specific procedures for the exercise of the Commandant's authority to grant exemptions to the regulations in Part 148. The new § 148.607 partially accommodates the comment. Additional rules are under study for future rulemaking.

PART 149

§ 149.203. Comments were received stating that the requirement in proposed § 149.203 for the submission of detailed plans 90 days prior to construction was too rigid. Setcion 149.203 has been rewritten for clarification and to allow more flexibility to the licensee in his contracting procedures by omitting the 90 day requirement. The licensee determines when he will submit drawings but he cannot begin construction until the plans and specifications are approved by the Coast Guard. Revisions to approved drawings are reviewed by the Coast Guard under the same standards as the original drawings, but the Coast Guard does not require construction to be halted while the revised plans are being reviewed.

§ 149.303. Louisiana Offshore Terminal Authority recommended that proposed § 149.303 be rewritten to require a pressure relief system that would prevent components of an OTS from exceeding

V 40 217 NOV 10 75 XUM

recommended working pressures. This recommendation was adopted with the exception that the lowest maximum pressure rating of any component of the OTS, rather than recommended working pressure, determines the pressure relief system activation. Section 149.303 now requires that each OTS have a pressure relief valve, that when activated, prevents any component of the OTS from exceeding its maximum rated pressure.

§ 149.305/§ 149.309. Several commenters suggested that the requirement in proposed § 149.309 for a manual shutoff valve on each SPM buoy should not apply to those not having OTS lines passing through the buoy. Section 149.309 now allows use of the Single Anchor Leg Mooring (SALM) buoy, which does not have any portion of the SPM–OTS directly attached to the buoy itself.

Section 149.305 has also been rewritten to require that each PLEM at an SPM buoy have a shutoff valve. This provides additional safety and environmental protection for SPM buoys exempt under § 149.309.

§ 149.311. The requirement in proposed § 149.311 for a malfunction detection system between the PLEM and the shore has been changed to require a detection system between the PPC and the shore. Automatic monitoring of the OTS between the PLEM and PPC is beyond the state of current technology. When the requisite technology has been developed, § 149.311 will be revised to require a detection system between the PLEM and the PPC.

§ 149.313. Several industry commenters recommended that the OTS alarm required in proposed § 149.313 not be audible in sleeping areas because the Cargo Transfer Supervisor could summon additional personnel as needed. This recommendation was not accepted because a prompt and effective response to a spill overrides concerns of comfort and relaxation. Furthermore, in most cases, the Cargo Transfer Supervisors's normal place of duty will be at the onshore terminal, many miles away from the PPC where personnel and equipment must be deployed. A general call-up by an alarm is the fastest and most effective means to get a prompt response.

§ 149.317. Several commenters requested clarification of the term "atmospheric conditions" in proposed § 149.317(b)(2). In order to eliminate any confusion, § 149.317(b)(2) has been reworded to require that portable means of communication must be certified and marked under 46 CFR 111.80–5.

§ 149.319/§ 149.321/§ 150.419. Two commenters stated that the proposal did not contain tanker onloading procedures pursuant to the Act. Coast Guard discussions with a potential applicant revealed that tanker onloading for transshipment is being considered for his proposed deepwater port. In consideration of the criticism and this discussion, certain rules in the proposal were changed to provide for onloading oil at a deepwater port, as follows:

1. A provision has been added to § 149.319(a) requiring a capability to contain and remove a discharge of 40,000 U.S. gallons where onloading operations are permitted pursuant to section 4(a)(3) of the Act. A greater capability than offload ports is required because there is a higher risk of discharge during onloading operations based on statistical records of actual spill histories at existing onloading SPM facilities.

2. Section 149.321 has been added to require that each deepwater port, where onloading is permitted, provide a means for reception of oily residues from vessels.

3. Section 150.419(b) has been added to require that the vessels' officer in charge of oil transfer advise the Cargo Transfer Supervisor of his intent to stop the flow of oil in an onloading operation before he stops the flow of oil. The purpose of this requirement is to prevent premature securing of cargo transfer pumps or valves on the receiving vessel while the OTS is still pumping oil.

§ 149.451. One commenter objected to proposed § 149.451, stating that water fire fighting systems may not be effective with oil fires. This comment was rejected because oil fires are not the only type that may occur on a PPC.

§ 149.483. One commenter recommended that regulations governing fire fighting systmes for helicopter pads be made consistent with the Federal Aviation Administration regulations. Proposed § 149.483 has been changed in view of this recommendation.

§ 149.723/§ 149.724/§ 150.607. One commenter stated that proposed § 149.723 does not provide a means of checking the focus of the lights, which is essential in meeting the requirements of paragraph (a) and (b) of that section. The Coast Guard agrees and added a new § 149.724 to require that each light using a lens must have a means to verify that the light source is at the focal point of the lens. Section 150.607 has been changed by adding a requirement that each light using a lens must be operated with the light source at the focal point of the lens by the means required in § 149.724.

§ 149.753. Several commenters suggested that the 70 foot spacing requirement for floating hose string obstruction lights in proposed § 149.753(a) would not improve visibility of the string for the mariner and would add to maintenance problems for the licensee. It was suggested that 210' spacing, instead of 70', would provide adequate illumination. The Coast Guard did not adopt this suggestion because a reduction in the number of lights on the string would increase the hazard for the various types of vessels that may navigate the safety zone. One extinguished light would create an unacceptably long interval of 420 feet between operating lights.

§ 149.759. Proposed § 149.759 was found confusing by a commenter who felt that it was unclear whether the requirement concerned the mounting hardware for the lantern or the device which shows the level. This commenter also proposed horizontal leveling standards. The Coast Guard agreed with this comment and changed § 149.759 to require that each obstruction light installed on a platform must have mounting hardware with devices for leveling the light, and with a leveling indicator accurate within ±0.25°.

General comments. One comment recommended that new regulations be developed to insure separation of helicopter landing areas and offloading tankers. This recommendation was rejected. Normal maneuvering room for VLCCs to approach an SPM provide adequate safety distances between helicopters operating near the PPC and the offloading tankers.

The Louisiana Offshore Terminal Authority submitted proposed rules for Subpart C covering SPM design and construction requirements, pipeline requirements, and vessel operating requirements for loading at deepwater ports. Some of the submitted rules were adopted and others will be considered for future rulemaking.

The Center for Law and Social Policy recommended the inclusion, in Subpart C, of detailed requirements for an automatic monitoring system in the OTS for automatic shutdown upon detection of a leak, measures for securing operations during spills and extreme wind or wave conditions, a pressure relief device for each OTS, quick disconnect hose couplings, hose standards, and SPM mooring standards. The automatic OTS monitoring system is required in § 149.311. The adequacy of each proposed system will be determined by the Coast Guard during the application review process. Automatic shutdown of the OTS upon detection of a leak is not always the proper response to minimize the quantity of oil spilled and the suggestion is not adopted. The measures for securing OTS operations during spills and extreme wind or wave conditions will be contained in each deepwater port operations manual. A pressure relief device for each OTS is now required in § 149.303. An approved quick disconnect hose coupling is allowed by § 150.415(b)(1)(ii). Hose standards and SPM mooring standards are contained in the ABS rules incorporated in § 149.209.

A comment on Subpart E stated that the proposed aids to navigation rules were too stringent and that aids to navigation for deepwater ports should be identical to those required for artificial islands and offshore fixed structures. This comment was rejected because deepwater ports, by the nature of their operation, will have more shipping traffic, larger vessels, and more hazardous cargoes than artificial islands or fixed structures.

The California State Lands Division recommended that the requirement for hoses specified in 33 CFR 154.500 be incorporated in Part 149. This recommendation was rejected because § 150.121(b) requires that the licensee have and maintain in class an ABS classification certificate for the SPM and attached hoses. Section 7/3 of the ABS "Rules for Building and Classing Single Point Moorings" requires that all SPM hoses comply with the "Buoy Mooring Forum Hose Standards", subject to survey and inspection by ABS. These hose standards provide technical specifications for hose design and construction, and testing standards for prototype hose approval.

One comment stated that no overall limit is placed on platform size. The Coast Guard believes that it would be acting arbitrarily if it established a size limitation. This comment also stated that no compartmentalization is required. Section 149.206 contains the construction requirements for the platform, which includes requirements for walls and decks.

Comments were received questioning whether the design, construction, and equipment requirements in Part 149 are consistent with section 4(c) of the Act which provides in part that the Secretary may issue a license if "he determines • • • that the applicant has demonstrated that the deepwater port will be constructed and operated using the best available technology so as to prevent or minimize adverse impact on the marine environment. . . ." One comment questioned whether Part 149, because it imposes specific requirements, will "deter the development of innovative approaches for the attainment of maximum safety and environmental protection benefits in the most cost effective manner." The comment specifically recommended that the requirements in Subparts B and C of Part 149 be deleted and replaced by flexible performance standards. Another comment received recommended that a rule be added to Part 149 to require the licensee of a deepwater port to use the best available technology in design, construction, and equipment.

The rules in Subparts B and C of Part 149 represent best technology available or require use of pollution prevention equipment that, if a license is to be issued, must represent best available technology. Design, construction, and pollution prevention equipment proposed in an application but not required by Part 149 must likewise represent best available technology if a license is to be issued. Section 148.323(a)(5) describes the procedure for considering the "best available technology" aspects of an application. As improved technology becomes available after Part 149 becomes effective, the Commandant, under the authority of section 10(a) of the Act will impose requirements concerning its use if the requirements are reasonable and if compliance with them will prevent or minimize adverse environmental impact from construction and operation of deepwater ports. (Section 10(a) of the Act requires the Secretary to adopt and enforce procedures for deepwater ports that include, but that are not limited to, "rules governing • • • the equipment, training, and maintenance required (A) to prevent pollution of the marine environment, (B) to clean up any pollutants which may be discharged, and (C) to otherwise prevent or minimize any adverse impact from the construction and operation of such deepwater port[s].")

Requirements to use improved technology will necessitate future revisions and additions to the regulations in Subpart B and C and will necessitate updating Operations Manuals of licensed ports. The Coast Guard anticipates, for example, that technology advancements will occur in the near future with respect to discharge containment and removal equipment that will necessitate additions or revisions to § 149.319 or to Operations Manuals for specific ports. The Coast Guard will review on an ongoing basis technology advancements that occur to determine whether rule changes or updating of Operations Manuals are necessary.

PART 150

§ 150.105. Several commenters were concerned about the status of an Operations Manual after its submission to the Coast Guard. Proposed § 150.105 has been rewritten to require that each port have an approved Operations Manual before it operates. Criteria for approval by the Coast Guard are included. One commenter felt that a public hearing should be held exclusively on the Operations Manual, and any amendments to it, before the Coast Guard determines whether or not to approve the Manual. The draft manual is subject to public comment during the application hearings.

§ 150.106. A new section, § 150.106 was added to require the licensee to provide 25 copies of the Operations Manual and subsequent amendments to the Coast Guard for distribution.

§ 150.107. A suggestion was made that States affected by the operation of a deepwater port should be permitted to petition for amendment to an Operations Manual. This suggestion was accepted by the Coast Guard and a new paragraph (d) has been added to § 150.107 that allows any licensee of a deepwater port and any adjacent coastal State connected directly by pipeline to a deepwater port to petition the Captain of the Port to amend the Operations Manual. In addition, the requirements contained in proposed §§ 150.111 and 150.113 are now in § 150.107.

One commenter suggested that the amendment process for the Operations Manual include approval by an adjacent coastal State before approval by the Captain of the Port. This suggestion was not adopted. The closest adjacent coastal State will be given opportunity to comment on the proposed amendment, but final approval remains in the Coast Guard.

One commenter recommended a requirement for controlling the use of service vessels at a deepwater port. Information concerning the use of service vessels must be in the Operations Manual for each port. If the number and type of service vessels in use are not adequate to ensure compliance with these regulations, requirements can be imposed, in accordance with the procedures in § 150.107, for amending the Operations Manual. Accordingly, the comment was not adopted.

§ 150.121. Several commenters felt that the SPM and SPM–OTS should be the subject of comprehensive testing and inspection rules in addition to those under § 150.121. Detailed requirements for testing and inspection of SPM and SPM–OTS components are contained in the "Rules for Building and Classing Single Point Moorings" published by the American Bureau of Shipping (ABS). Section 150.121(c) requires that the licensee maintain each SPM in class, which would include meeting the requirements in those ABS rules. The Coast Guard determined that no additional rules are necessary and the suggestion was not adopted.

§ 150.125. Because storms and hurricanes can alter depths, sediment movement can build around components and anchors, and propeller wash can cause depth variations in traffic lanes, a commenter suggested that the accuracy of chartered depths be checked periodically and after each major storm. The Coast Guard adopted this suggestion and added § 150.125 to require the licensee to monitor water depths in anchorage areas, mooring areas, maneuvering areas, and traffic lanes after the Captain of the Port has determined the following:

1. A severe storm has significantly altered water depths.

2. A gradual natural or man-induced process has significanlty altered water depths.

3. Users have reasons to believe that the chartered depths are no longer accurate.

§ 150.127. Several commenters recommended omitting the requirements for an environmental monitoring program from the Operations Manual. This recommendation, if accepted, would violate the purpose of the Act. A new § 150.127 was added to require the monitoring of the environment in accordance with the monitoring program in the Operations Manual.

Subpart B. It was recommended that on-the-job experience be allowed as qualification criteria for deepwater port personnel. The recommendation was accepted in part and certain requirements in Subpart B were changed to include experience criteria and training programs that allow the licensee flexibility in personnel selection and promotion.

A commenter recommended that a licensing system for deepwater port personnel, similar to the vessel personnel licensing system, be promulgated for deepwater ports. This recommendation was not adopted. The requirements as proposed are considered sufficient for the limited number of anticipated deepwater ports. If, in the future, there are a sufficient number of personnel involved to require a separate deepwater port licensing program, a licensing program will be proposed.

§ 150.205. Another commenter suggested that position title "Terminal Supervisor" be changed to "Port Supervisor" because the use of the word "terminal" might create confusion between the port and the onshore facility. Further, the oil industry generally uses the term "superintendent" to describe a person who performs the type of duties proposed for the "Terminal Supervisor". The title "Port Superintendent" has been adopted for these regulations.

V 40 217 NOV 10 75 XUM

§ 150.207. Proposed § 150.207 requires a Cargo Transfer Supervisor to hold a license as chief mate of ocean steam or motor vessels, or as master of a vessel, and have at least one year of experience in those capacities on board a tank vessel. A number of commenters questioned this requirement since performance of the duties of a Cargo Transfer Supervisor does not require a detailed knowledge of an officer's duties. Because the Coast Guard agrees that the proposed requirement is overly restrictive, the final rule does not require the Cargo Transfer Supervisor to hold a license as chief mate or master and experience criteria has been substituted.

§ 150.209. A requirement for experience with radar by a Vessel Traffic Supervisor has been substituted for the proposed requirement for a radar certificate because performance as a Vessel Traffic Supervisor does not involve service in a seaman's capacity aboard a vessel.

§§ 150.211/150.215. Recommendations were received to reduce the requirements for Mooring Master. These recommendations were rejected. Reduction in the qualifications of the Mooring Master is not possible without reducing the safe handling of the large tankers that will use deepwater ports. The experience requirements for the Assistant Mooring Master have been changed. A recommendation to require the Mooring Master to know the procedures involving rigging the transfer hose was rejected. Knowledge of these procedures is part of the qualification of the Cargo Transfer Assistant.

§ 150.213. Numerous comments were received recommending that the requirements for Cargo Transfer Observer be omitted because his functions are not clear. The title "Cargo Transfer Observer" was changed to "Cargo Transfer Assistant" and the appropriate requirements in Subpart D were rewritten for clarification of the Cargo Transfer Assistant's duties. A recommendation to remove the requirement for the Cargo Transfer Assistant to be certificated as a tankerman was accepted and experience criteria were added.

§ 150.217. A comment suggested that proposed § 150.217 specify the maximum continuous and the minimum off-duty time for each position listed. This suggestion was rejected. Section 10(b) of the Act follows the language of section 1333(e) of the Outer Continental Shelf Lands Act. The Coast Guard has not regulated hours of labor on the Outer Continental Shelf and, at the present, does not intend to regulate the hours of labor on deepwater ports.

Further comments on proposed § 150.217 suggested that each person employed at a deepwater port be a United States citizen. This recommendation was rejected. Merchant marine documents and port security cards can be obtained by resident aliens. At the present time, it appears to be unnecessary to require all employees of a deepwater port to be U.S. citizens.

Some commenters thought § 150.217 prohibited personnel from being employed in more than one position at any time. The intent of this requirement was to prohibit a person from performing in two capacities at the same time. Section 150.217 was rewritten for clarification.

Subparts C, D, and E. Shell Oil recommended that the "International Oil Tanker and Terminal Safety Guide" (I.O.T.T.S.G.) be used as a reference in the drafting of Subparts C, D, and E. Certain requirements in these Subparts are based on I.O.T.T.S.G., including § 150.405(b) and § 150.413(s).

A number of commenters recommended that proposed Subpart C apply to all vessels that navigate at a deepwater port. This recommendation has been adopted. Subpart C now applies to any vessel having business at a deepwater port, including service craft and line handling boats that assist in tanker operations and moorings, and vessels that bring supplies to the PPC.

Regulations concerning recreational boating and commercial fishing vessel activity at a deepwater port are expected to be included in the future proposal concerning safety zones of a port. It is the Coast Guard's intention, at this time, not to allow recreational boating in a deepwater port. Safety zones at a deepwater port will be charted when established and, as appropriate, cautionary notes will be placed on charts concerning any restrictions in a safety zone.

§ 150.309. Seven comments were received on proposed § 150.309 concerning the nature of the advisories to vessels and the amount of control over vessels permitted to be exercised by the Vessel Traffic Supervisor. Some commenters wanted positive controls exercised while other commenters criticized the proposed controls as excessive. No change was made since the advisory concept with the master of the vessel in ultimate command is universally accepted. One commenter suggested omitting the requirement that the Vessel Traffic Supervisor furnish the tanker with specified data on a vessel that may potentially interfere with the tanker's movement. This suggestion was partially adopted. The data that can be computed more accurately and timely on board the tanker than by the Vessel Traffic Supervisor is no longer required. Three commenters recommended omitting the requirements in proposed paragraph (a) for passing certain information at 10 minute intervals. This recommendation was rejected because the rule ensures the continuity of communications and the continuous presence of the Vessel Traffic Supervisor at his position.

§ 150.313/§ 150.339. Several commenters suggested that the requirement in proposed § 150.313 for the 2 mile minimum visibility for tanker operation and the requirement in proposed § 150.339 (redesignated § 150.337) for the 5-mile separation between tankers in a traffic lane be relaxed. This suggestion was rejected because of the stopping distance needed for VLCCs, even at slow speeds, and their poor maneuverability. The requirements in these two sections are considered reasonable since they provide an effective means of minimizing potential for collision.

§ 148.3/§ 150.339. A number of comments questioned the prohibition in proposed § 150.339(f) (redesignated § 150.337(f)) for a tanker to operate in the TSS or safety zones if the net under keel clearance of the tanker is less than 5 feet. It was the intent of this section to require a minimum of 5 feet between the keel and the seabed during the worst conditions of wind, wave, tide, and current. Most of the commenters felt that the proposed regulations did not clearly state this intention. Pursuant to these comments, "net under keel clearance" is defined in § 148.3 as "the distance between the ocean bottom and the portion of the tanker's hull closest to the ocean bottom when the tanker is underway, moored, or anchored, considering ship motion in responding to the combination of actual wind, wave, tide, and current conditions".

In response to comments, a new § 150.339 has been added that prohibits other vessels (defined in § 150.303) from mooring at or doing business at a deepwater port unless clearance has been obtained from a Vessel Traffic Supervisor. A new § 150.317 has been added containing procedures for clearances of other vessels. The regulations do not prohibit operations of these vessels around the port. However, operations of these vessels in the deepwater port safety zone may be prohibited or otherwise regulated in future rulemaking.

§ 150.313/§ 150.341. Sections 150.313(a)(2) and 150.341 were changed to require that the Mooring Master be aboard in the traffic lane within 5 miles of the entrance to the safety zone.

§ 150.342. Regulations for requiring the Assistant Mooring Master to be aboard the tanker were omitted in the proposal. Section 150.342 has been added requiring the Assistant Mooring Master to be aboard the tanker during mooring operations. The services of the Assistant Mooring Master are not considered necessary for unmooring or anchoring. His expertise is primarily needed to make the VLCC fast to a mooring device.

§ 150.415/§ 150.419. The Masters, Mates, and Pilots Association recommended that proposed § 150.415 apply to all blank flanges used in the OTS. In reviewing this recommendation, the Coast Guard concluded that requirements for the proper use of the blank flange and shutoff valve required under § 149.307 should be included to protect the marine environment. Accordingly, § 150.419 (c) and (d) add operating procedures concerning blank flanges and shutoff valves.

§ 150.415. The Coast Guard determined that proposed § 150.415 did not include requirements for adaptors to allow hose connections to the manifolds of any tanker calling at a port. This drafting oversight was corrected to allay any misconception that vessels not having manifolds compatible with ANSI standard flange couplings are excluded from calling at the port.

§ 150.423. Several commenters recommended that proposed § 150.423(a)(3) (redesignated § 150.423(c)) allow continuation of oil transfer operations during a fire because, under some circumstances, this would reduce the amount of fuel available to the fire. Adopting this rationale in principle, § 150.423(c) allows resumption of oil transfer operations during a fire if the Port Superintendent determines that to do so will enhance safety.

§ 150.425. One commenter requested amplification and clarification of the Coast Guard's role in regulating oil transfer operations during and immediately after an oil spill. In reviewing this comment, it was determined that a general rule governing Coast Guard authority with respect to oil transfer operations was necessary. Section 150.425 has been added to authorize the Captain of the Port to suspend oil transfer operations when necessary for safety or protection of the marine environment. Section 150.425 includes procedures for the licensee to petition the District Commander to reconsider the issuance of the suspension order.

Subpart E. One commenter recommended that Subpart E require that any material at a deepwater port be used in compliance with 46 CFR Part 147, which governs the use of dangerous articles as ships stores and supplies on board vessels. The applicability of 46 CFR Part 147 does not extend to platforms. The Coast Guard intends to propose regulations regarding the use of hazardous materials at a deepwater port in a future rulemaking actions.

§ 150.516. A new section, § 150.516, has been added to require that certain members of the crew be trained and present for fire fighting during aircraft operations on the PPC.

§ 150.607. Proposed § 150.607(a) was criticized because it appears to preclude the operation of the lights by automatic activation. Since this interpretation of the requirement was possible, the words indicating that the lights had to be operated thirty minutes before sunset and thirty minutes after sunrise have been omitted.

§ 150.709. Several commenters were concerned with the procedures for the notice of the discharge of oil in proposed § 150.709. North Carolina and Texas stated that the adjacent coastal State should be included among those to be notified of an oil spill. Section 150.709 has been changed to require that the Governor of the State directly connected to a deepwater port by pipeline be notified of a discharge of oil in order that he may quickly react to protect the State's marine environment.

General Comments. The State of Hawaii questioned the lack of procedures governing the monitoring and maintenance of deepwater port pipelines. Rules for design, construction, inspection, testing, operation, and maintenance of pipelines at a deepwater port will be promulgated in a separate rulemaking action of the Department of Transportation, Materials Transportation Bureau, Office of Pipeline Safety Operations.

Several commenters felt that proposed Part 150 was too detailed and was too close to being an Operations Manual in itself. In particular, the personnel requirements of Subpart B were apparently misunderstood. The Coast Guard believes that the regulations are not too detailed because certain operations, procedures, and standards are applicable to all potential deepwater ports and are important enough to be in the regulations rather than in the specific operations manual for each port.

One commenter questioned the lack of regulations governing the establishment of a safety zone. Information in an application for a deepwater port such as marine site component data, tanker operational information, and proposed aids to navigation data, will be studied by the deepwater ports staff. Based on the findings of this study, the safety zone will be established. Notification of the establishment of the safety zone will be made in the FEDERAL REGISTER.

A deepwater port, by definition, is located beyond the territorial sea; however, it is expected that part of the facility of a port will be located within the territorial seas as well as onshore. Transportation related onshore and offshore oil handling facilities located within the United States or on the navigable waters of the United States are regulated under 33 CFR Part 154. A review of Part 154 is being undertaken by the Coast Guard to determine whether or not the part is consistent with the requirements in this document. Any amendment to Part 154 would be subject to rulemaking procedures.

ANTITRUST REVIEW

In a comment dated June 24, 1975, by the Federal Trade Commission, it noted that draft regulations submitted by it "were incorporated substantially verbatim in the Notice of Proposed Rulemaking as § 148.109(y) (Antitrust Review Information)." Approximately 20 comments directed to those provisions were filed during the comment period, several from Government officials and the remainder from firms associated with proposals for construction of deepwater ports in the Gulf of Mexico. Subsequently, under cover of a letter dated August 8, 1975 from the Secretary of the Commission, recommended final regulations, a Report of the Federal Trade Commission, were filed in the record. That Report, together with the public comments on the antitrust review section were forwarded to the Assistant Attorney General, Antitrust Division, with a request for the views of the Department of Justice. He responded by letter dated August 21, 1975. The principal comments, as well as the views of the agencies, are summarized in the following discussion.

SCOPE OF ANTITRUST REVIEW

Many industry commentators argued that the scope of antitrust review under the Act should be circumscribed in some manner. Those arguments were based on one or more of several theories. First, it was argued by some that since under section 8 of the Act any licensee will be a common carrier by pipeline under Part I of the Interstate Commerce Act, no further consideration of anticompetitive effects is required. That argument is without merit. As discussed below, the licensing of a particular applicant could have anticompetitive effects even if the applicant subsequently operates in full compliance with its common carrier obligations. Secondly, some commentators observed that section 5(c)(2) of the Act sets forth extensive and fairly detailed requirements of inclusion in the application. From that they argued Congress intended that listing to be exclusive. The language of the Act itself plainly refutes that contention. Section 5(c)(2) states that the application "shall include such * * * information as the Secretary deems necessary or appropriate. Such information shall include, but not be limited to * * *" the information thereafter specified. Finally, some commentators argued that since section 7(b)(1) of the Act specifies that the Secretary "shall proceed as if he had" the views of the Attorney General and of the Federal Trade Commission even if those views are not received within the time period specified in section 7(a), the antitrust review was intended to be cursory. That argument also is without merit. In detailing in section 5(c)(2) the extensive (but not exclusive) list of information useful for antitrust review purposes, Congress intended that the antitrust reviews be based upon a full and adequate record. Moreover, it is an obligation of the Secretary to ensure that any grant of a license under the Act will be in full compliance with all requirements of law, national and international. Accordingly, in the absence of a report from either or both of the antitrust reviewing agencies, the Secretary remains charged with an obligation of ensuring against violation of the antitrust laws in the licensing process.

From the record and legislative history, applications may be anticipated from LOOP, Inc. and SEADOCK, Inc. Each appears to be, in essence, an incorporated joint venture of, principally, major integrated oil companies.[1] Of the eight largest companies named as respondents in *In the Matter of Exxon Corp.*, FTC Docket No. 8934, at least five were, and two are a member of both groups. Both the Department of Justice letter and the Federal Trade Commission submissions referred to above addressed themselves to the joint venture aspect of these prospective applicants.

[1] Dow Chemical Company is represented in Seadock. Dow's Brazos Oil & Gas Co. Division is operated for obtaining natural gas and currently supplies a substantial portion of the company's requirements. 1974 Moody's Industrial Manual, p. 545. Its listing in 1974 U.S.A. Oil Industry Directory (Pet. Pub. Co. 13th ed.) suggests broader petroleum interests. The Toronto Pipeline Company is a subsidiary of Gulf Oil Company.

V 40 I 217 NOV 10 75 XUM

The Commission relies heavily upon *United States* v. *Penn-Olin Chemical Co.*, 378 U.S. 158 (1964). It quotes language from that case (Commission comment pp. 5–6) which it says sets forth the factors the Commission "must apply in assessing the anticompetitive impact of a joint venture. * * *" In that case, two large industrial corporations proposed to form a joint venture to enter into a geographic and product market in which neither had been a significant factor. Conceivably either or both of the proposed venturers could have entered that market on its own. The District Court below found that it was unreasonable to believe that both firms on their own would have entered that market. Further, it held it unnecessary to determine whether one of the two firms might have entered the market by itself and the possible competitive effects of that event. In reversing, the Supreme Court discussed the considerable financial and technological capabilities of each of the two firms. Then, in a passage from which the Commission's Comment quotes, the Court said:

> * * * we have concluded that a finding should have been made as to the reasonable probability that either one of the corporations would have entered the market by building a plant, while the other would have remained a significant potential competitor. * * * [W]e reiterate that it is impossible to demonstrate the *precise* competitive effects of the elimination of either Pennsalt or Olin as a potential competitor. [Emphasis in text]. * * * We note generally the following criteria which the trial court *might* take into account in assessing the probability of a substantial lessening of competition: the number and power of the competitors in the relevant market; the background of their growth; the power of the joint venturers; the relationship of their lines of commerce; the competition existing between them and the power of each in dealing with the competitors of the other; the setting in which the joint venture was created; the reasons and necessities for its existence; the joint venture's line of commerce and the relationship thereof to that of its parents; the adaptability of its line of commerce to non-competitive practices; the potential power of the joint venture in the relevant market; an appraisal of what the competition in the relevant market would have been if one of the joint venturers had entered it alone instead of through Penn-Olin; the effect, in the event of this occurrence, of the other joint venturer's potential competition; and such other factors as might indicate potential risk to competition in the relevant market. (Emphasis supplied) 378 U.S. at 175–77.

Here there is not any suggestion that foreclosure from entry into the Deepwater Port market by one or more of the prospective co-venturers individually should be a matter of principal or even significant concern. As the Commission notes at pages 4–5 of its comment, the Congress, while concerned about oil company ownership and about the joint venture proposals, prohibited neither, because of the financial as well as technological requirements of deepwater port development. Instead, the Congress established priorities for an applicant who is a state agency, or a person who is neither engaged in production, refining or marketing of oil nor an affiliate of any such person. The application will set forth projected financial and other information from which the possibility of single firm entry may be evaluated. See § 148.109(e). Unless an application or other new information suggests a conclusion different from that of the Congress, foreclosure of single firm entry by the co-venturers is not a principal concern.

Rather, the principal concerns are: foreclosure of potential users from entry into the venture;[2] foreclosure from use by nonmembers (shippers and consignees) by selection of points to be served (site location) and facility design and operation; and discrimination against users and potential users by rates and other operational considerations, such as minimum tender and throughput requirements. Operation of the port might also have the effect of foreclosure or discrimination. However, the Commandant has adequate resources to determine whether vessels are being served in accordance with such common carrier obligations as the duty to receive vessels in the order of arrival and the obligation to serve all vessels without hindrance or delay (absent overriding health, safety or environmental considerations). The design review process (§ 149.205) will include examination of configuration, equipment and other features that could affect accessibility by the world's tanker fleet, which in pertinent respects is fairly well standardized. Section 150.415 requires port availability of standard flanges and adapters. Thus, there is not at the outset reason to engage in the extensive market power analysis suggested by the Supreme Court in the Penn-Olin case. Rather, the situation that must be anticipated here is more analogous to those in the cases cited in the Department of Justice letter, *United States* v. *Terminal Railroad Ass'n of St. Louis*, 224 U.S. 383 (1912); *Associated Press* v., *United States*, 326 U.S. 1 (1945). There, as here, the starting point is the market power of the co-venturers in those markets where non-owner users might be discriminated against, or potential users foreclosed.[3] The information requirements for this analysis are discussed below.

Much of the original and revised proposals of the Commission seem designed to permit and facilitate inquiry into motive and intent. To any such inquiry, most if not all comments filed by potential applicants and affiliates object. In its commentary letter, the Department of Justice observes:

> [I]t is simply not possible for the Attorney General to render the necessary advice without access at minimum to the working papers of the applicant and its owner companies. We must be able to judge motive and likely competitive impact on the basis of candid statements made in the regular course of business. * * * (p. 2)

Later, referring to the specific proposals of the Commission, the Department observes:

> We can conceive of circumstances in which the information and documents covered by such regulation might be required for adequate antitrust review. On the other hand we can also foresee situations where *less or different* information may be needed. (Emphasis supplied) (p. 4)

Both the Department of Justice and the Commission propose a two-step information gathering process. That is sound administrative procedure not only for antitrust review but for all aspects of application processing, and is adopted as set forth in § 148.109(z). Since, as the Department of Justice observes, not all of the information required in the Commission proposal would be required in every case, the application requirements should be designed to reach all information that will or probably will be required in every case. The procedure for gathering additional information can then be used if appropriate.

Regardless of procedures, there appears to be a considerable difference between the range of inquiry suggested by the Commission proposals and the more limited inquiry (or non-inquiry) suggested by the public commentators. Much of this apparent difference is resolved by a careful analysis of the mandatory requirements prescribed in section 5(c)(2) of the Act.

DEFINITION OF "AFFILIATE"

Before examining the statutory requirements of section 5(c)(2), the meaning of the statutory term "affiliate" must be understood. It is defined in section 3 as follows:

> "affiliate" means any entity owned or controlled by, any person who owns or controls, or any entity which is under common ownership or control with an applicant, licensee, or any person required to be disclosed pursuant to section 5(c)(2) (A) or (B).

That language is analyzed at length in a comment by Marathon Oil Company, dated June 20, 1975. It says, in part:

> The definition is confusing and unwieldy, and as demonstrated, results in situations irreconcilable with the intent of the Act. If the definition is viewed diagrammatically, it sets forth three classes of "affiliates":
>
> 1. any entity owned or controlled by an applicant, licensee or persons required to be disclosed pursuant to 5(c)(2) (A) or (B);
>
> 2. any person who owns or controls an applicant, licensee or person required to be disclosed pursuant to 5(c)(2) (A) or (B); and,
>
> 3. any entity which is under common ownership or control with an applicant, licensee or person required to be disclosed pursuant to 5(c)(2) (A) or (B);
>
> For purposes of simplification "a person required to be disclosed pursuant to 5(c)(2) (A) or (B)" shall hereinafter be referred to as an "excess 3% owner".
>
> Some persons view the definition as encompassing a fourth class of "affiliate"; that being, a "person required to be disclosed pursuant to § 5(c)(2) (A) or (B)" which would encompass an excess 3% owner and therefore, most shareholders of applicants or licensees. They view the last portion of the definition, "or any person required to be disclosed pursuant to § 5(c)(2) (A) or (B)" as disjunctive and a separate classification. From a grammatical standpoint this is not tenable.

That is a correct but not complete analysis. Similarly, the analysis of other commentators overlooks the significance of relationships with persons required to be disclosed under section 5(c)(2) (A) or (B). Mobil Oil Corporation, for example, states at page 1 of Comments filed by letter dated June 12, 1975:

> Under this definition, Mobil can be an affiliate of Seadock only if it is owned or controlled by Seadock or owns or controls Seadock.

Suppose O Corp. forms a wholly owned (directly or indirectly) subsidiary, ODWP Corp., to acquire an interest in DWP, an incorporated or unincorporated joint venture applicant. ODWP Corp. has an interest in DWP greater than three per cent, and is a person required to be disclosed under subparagraph (A) (an "A Person"). O Corp. is what Marathon calls a Class 2 affiliate. Every subsidiary of O Corp. will be a Class 1, 2 or 3 affiliate, depending on relative positions within the lines of ownership of subsidiaries. If ODWP Corp.'s interest is not greater than three per cent (after applying commonly used attribution principles), it, O Corp., or another subsidiary may nevertheless be required to be disclosed under section 5(c)(2)(B) (a "B Person").

While Congress may have been primarily interested in contracts for physical construction and operation, the language of subparagraph (B) is not so limited. It is interpreted to include significant contracts for financing construction, by equity or loan funding, by throughput agreements or other arrangements intended to secure obligations, by guarantees of loans or other agreements or arrangements, or otherwise. Similarly, agreements and arrangements intended to assure that operations will be financially self-sustaining are within the ambit of subparagraph (B).

Under the statutory definition the A Person or B Person is not an affiliate, but its parent, subsidiary and sister corporations are. If there are two A's and two B's or one of each within the corporate group, the A's and B's become affiliates.

The functions of subparagraph (C) are also important. Subparagraphs (G) and (H) require inclusion of information known to "C Persons" as to storage facilities, pipelines and refineries, both existing and proposed. Thus, if O Corp. is not an affiliate or an A or B Person after the analysis indicated above, its knowledge is reached by subparagraphs (G) and (H) if any of its affiliates is an A or B Person.

Finally, the Secretary's authority to require inclusion of information in addition to that specified in section 5(c)(2) includes authority to require information from persons other than applicants, statutory affiliates, and A, B or C Persons. Subparagraphs (G) and (H) specifically require inclusion of information known to persons required to be disclosed under subparagraphs (A), (B) or (C), but as noted above that specification is not exclusive. Moreover, the first sentence of section 5(c)(2) mandates the inclusion of information deemed necessary or appropriate, without any reference to sources.

The term affiliate does not have significance except in the context of information required in an application. Accordingly, in view of the foregoing, § 148.3(1) defines affiliate to include a statutory affiliate, an A, B or C Person, and any other person determined by the Secretary to have information required for processing or review of an application.

CONSOLIDATED STATEMENTS

Many comments objected to the proposed requirement of information as to each corporate entity within a corporate family; others suggested exclusion of foreign subsidiaries or assets. As indicated above and more fully discussed below, principal concerns are centered in PAD (Petroleum Administration for Defense) Districts I, II and III, but information as to other Districts or foreign subsidiaries and assets may be required. Any arbitrary exclusion is therefore inappropriate. Section 148.111(a) permits an applicant or affiliate to include required information consolidated in accordance with generally accepted accounting principles (a) if and to the extent consolidated reports are filed with the Interstate Commerce Commission, the Securities and Exchange Commission or the Federal Energy Administrator, but (b) if those filings are made or required to be made by line of business or other classifications, the application shall be prepared on the same basis and (c) the Secretary may require additional information, by single corporate entity or otherwise, determined to be required for processing or review of an application. Consolidating entities are treated as a single affiliate.

STATUTORY REQUIREMENTS IN SECTION 5(c)(2) (G) AND (H)

Among the public comments the one urged most insistently is basically an objection to inclusion of a requirement of information on proved reserves, followed closely by objection to inclusion of data on capacity and production. In response, the Federal Trade Commission revised its proposed regulations somewhat, but asserted its need for essentially the information on reserves, capacity, and production called for by the original proposals. LOOP, Inc. replied by repeating the substance of its comments on the original proposals. Since there is a common theme throughout the public comments on these proposals, all of the public comments on the original proposal are treated as having been made on the revised Commission proposal as well.

Many of the public comments argued that the proposed requirements would be unduly burdensome. None of the comments suggested what lesser or different information requirements might not be burdensome. Many of the commentators would appear to have expertise on compliance with investigative subpoenas as well as disclosure under the Federal Rules of Civil Procedure. None has ventured an estimate of the time or expense that would be required to furnish the information required by the proposed rule. Only a conclusory assertion is made that compliance would be burdensome. Also, most of the public comments suggested as the only alternative elimination of information, including information mandated by subparagraphs (G) and (H) of section 5(c)(2), necessary for any meaningful antitrust review. The comments consequently are of limited usefulness in fashioning the final rule.

Many of the public comments stress the fact that the proposed rule relates to a licensing process. From that the comments go on to imply or suggest that the probable effects of operations after a license is granted should be ignored. That would be impermissible under the Act. The Congress was well aware that the operation of a deepwater port after it is licensed might have the effect of foreclosing or discriminating against nonowner shippers. As the Department of Justice letter observes, certain consequences may be expected to flow from the grant of a license, and then "the competitive status quo is changed and perhaps irrevocably so." Moreover, the requirements of section 5(c)(2) (G) and (H) among others make clear the Congressional intent that probable effects of post-licensing operations must be considered in the application process.

The wisdom of those requirements, and the nature of additional information required for meaningful antitrust review, are evident from a review of some prominent features of petroleum transportation to and within the United States, in light of anticipated deepwater port development as reflected in the record and the legislative history.

Nearly all of the public comments came from firms associated with either a proposal to develop a deepwater port off the Louisiana Gulf Coast or a proposal to develop a deepwater port off the Texas Gulf Coast. (Two commentators, Exxon and Shell, are identified as being a member of both proposals; there appear to have been at least five major oil companies who were at one time associated with both proposals.)

[All data in the following portion of this text are taken from 1972 Minerals Yearbook, vol. I, Crude Petroleum and Petroleum Products (principally tables 7, 15, 16, 18, 21 and 36) (Bureau of Mines, Department of Interior, 1972). With the notable exception of crude inputs through Gulf ports, 1972 data is a reasonably reliable indicator of the main distribution patterns. Shipments in subsequent periods have been affected not only by the 1971 price freeze and subsequent price controls.]

Both the Louisiana Gulf Coast (see NOTE 1) refining district and the Texas

[2] If a joint venture of shippers is licensed, increasing the number of co-venturers tends to increase competition. See, *e.g. United States* v. *Terminal Railroad Ass'n. of St. Louis*, 224 U.S. 383 (1912); Joint Hearings, Special Joint Subcommittee on Deepwater Ports Legislation, Committees on Commerce, Interior and Insular Affairs, and Public Works, United States Senate, 93d Congress, 1st Sess., Pt. 1, (Hereinafter "Joint Hearings"), p. 685 (answers of James T. Halverson).

[3] It should be noted that it seems unlikely any applicant in either of the preferred categories would come forward without throughput agreements or other arrangements amounting to dependence on a number of substantial shippers. While the motives and incentives of a state agency or independently owned pipeline may vary from those of a joint venture owned by users, the same potential exists for foreclosure of and discrimination against non-backers.

V 40 N 217 NOV 10 75
XUM

Gulf Coast refining districts, together with their contiguous inland districts, are substantial crude producers. Figures are for 1972, in millions of barrels.

	Louisiana districts [1]	Texas districts
Crude petroleum:		
Gulf coast district	848	260
Inland district	44	1,042
	892	1,302
Refinery receipts of crude:		
Intrastate	427	861
Interstate	82	228
Foreign	4	24
	512	1,113

	Louisiana districts [1]	Texas districts
Crude available for shipment to other States	465	441

[1] The Louisiana gulf coast refining district extends eastward through Baldwin County, Ala. The contiguous inland zone is the North Louisiana-Arkansas refining district which includes Arkansas and those parts of Louisiana, Mississippi, and Alabama not included in the Louisiana gulf refining district.

The two states of Louisiana and Texas accounted for over 60% of total domestic production. Some of that crude moves between Louisiana and Texas, and some to other District III states; most of it goes to other Districts:

To—	Crude oil from— Louisiana	Texas	Other district III States	Total
Texas	159		[2] 64	223
Louisiana		65	[2] 16	81
Other district III States	[2] 53	3	5	80
Total	240	69	85	394
PAD district I	41	46	7	94
PAD district II	203	320	43	567
Total	484	435	136	

[1] Mostly New Mexico.
[2] Mostly Mississippi.

In addition, PAD District II refineries received 169 million barrels of foreign crude by pipeline, nearly all of it landed through the Gulf. Total foreign crude movements also included 28 million barrels of foreign oil refined in District III. Various estimates indicate that Gulf imports of crude may have tripled since 1972, and are still increasing.

Comments from LOOP, Inc. and its members indicate that some of them will jointly construct a pipeline from the shore landing facility of LOOP to St. Charles, La., the southern terminus of CAPLINE. It is a 40-inch crude oil pipeline running north to Patoka, Illinois. Its design capacity is in excess of one million barrels per day. Its northern terminus connections include CAPWOOD running west to the St. Louis area, CHICAP running northward into the Chicago metropolitan area, and a Marathon line running eastward which in turn connects with Buckeye Pipe Line at Lima, Ohio.

Several members of Seadock have joined with others in two new pipeline ventures. Texoma Pipe Line Company began construction in 1973, and Seaway Pipe Line in 1974, of a 30-inch line from the Texas Gulf District (Beaumont and Freeport). Both terminate at Cushing, Oklahoma. It and nearby Tulsa are refinery centers. Cushing is also the hub of crude lines serving Kansas and other Mid-continent refineries. Shell has a 22-inch and a 10-inch line to the St. Louis area, and Arco, Amoco, and a Texaco-Cities Service joint venture have lines to Chicago.

Mid-Valley Pipeline Company also serves this area. Its pipeline runs from Longview, Texas to Lima, Ohio, where it connects with a Buckeye Pipe Line serving refineries in northern Ohio. Mid-Valley's capacity is approximately 240 thousand barrels per day. Platte Pipe Line Company has a crude pipeline from the Bighorn Basin, in northwestern Wyoming, to Wood River, Illinois, just north of St. Louis. Its capacity is approximately 190 thousand barrels per day.

Canadian crude is brought east from Alberta and south into District II, by Interprovincial Pipe Line Ltd. and its U.S. subsidiary Lakehead Pipeline Co., Inc. to Toronto through Superior, Wisconsin and Sarnia, Ontario. Between those two points, one line goes via the Straits of Mackinac and one via Chicago. Major lateral lines serve St. Paul, Buffalo and Western Pennsylvania, and include a 16-inch Buckeye Pipe Line from Sarnia south into its service area. Total Interprovincial/Lakehead capacity exceeds one million barrels a day.

This network evidently supplies a major portion of the crude oil transportation on which District II relies. Interstate shipments of crude oil to or within District II were 774 million barrels by pipeline, 18 million barrels by tanker and barge, and a negligible amount by rail and truck. These shipments account for approximately two-thirds of all the oil refined within District II.

The largest concentrations of refineries are as follows (1972 crude runs to stills, in millions of barrels):

Illinois	300 [4]
Indiana	190
Western Ohio	163
Kansas	133

Of that list, only Kansas has intrastate crude production exceeding one-half of its refinery run.

Approximately three-fourths of the total refining in District I is found in eastern Pennsylvania and New Jersey.

Eastern Pennsylvania	192
New Jersey	173
Other	117
Total	482

The dependence on crude moving in by water is shown by the following 1972 figures:

	Domestic	Foreign
Tanker/Barge into:		
Pennsylvania	66	125
New Jersey	36	136
Other	6	53
Total district I	108	314

Pipeline crude movements to District I are much smaller. New York and western Pennsylvania received 40 million barrels of foreign oil by pipeline. A small amount of domestic crude (less than 15 million barrels per year) moved by pipeline to refineries in Western Pennsylvania and in West Virginia.

Both District I and II are refinery deficient. They are dependent upon importation of petroleum products from District III by pipeline and by tanker and barge as follows:

	By pipeline	By tanker/barge
District III to I:		
Gasoline	286	225
Jet fuel	41	45
Distillate fuel oil	156	131
District III to II:		
Gasoline	50	40
Jet fuel	3	5
Distillate fuel oil	12	11

Transportation patterns are not static. Changes must be anticipated both because of short- and long-term changes in supply and demand and as a result of investment decisions. Apart from Alaskan oil, domestic oil production is declining and declines are anticipated in importation of crude from Canada and Venezuela. Alaskan crude is expected to be landed on the west coast and proceed to refineries in District V. The extent to which Alaskan crude or derived products will move east of District V is a matter of some uncertainty. The flow of oil into the United States has been supported by the foreign exploration and production activities of United States firms in virtually every major producing area throughout the world. The petroleum exporting nations, however, have become increasingly active in the scheduling of production and exports and in setting prices of crude oil, and this can be expected to continue to impact domestic markets. Also, the possibility of deepwater ports on the other coasts cannot be overlooked. In a report from the Office of the Assistant Secretary for Policy, Plans and International Affairs, Special Projects Division, entitled Economic Aspects of Refinery and Deep-Water Port Location in the United States (NTIS 1974), it was concluded that the optimal refinery/deepwater port configuration would be one deepwater port on each coast—off Bayou Lafourche, Louisiana; Longbranch, New Jersey, and Monterey, California—with a greater increase in refining capacity in the East, and less in the Gulf, than is suggested by the comments.[5] The siting of deepwater ports themselves will be a change-producing force.

[4] About 40% of this is at Wood River, Illinois, just north of St. Louis, Missouri.

Subparagraphs (G) and (H) of section 5(c)(2) are well designed to determine many of the expected responses from applicants and affiliates to these changing forces. They require that each application shall include the following information:

(G) the location and capacity of existing and proposed storage facilities and pipelines which will store or transport oil transported through the deepwater port, to the extent known by the applicant or any person required to be disclosed pursuant to subparagraphs (A), (B) or (C) of this paragraph; and

(H) with respect to any existing and proposed refineries which will receive oil transported through the deepwater port, the location and capacity of each such refinery and the anticipated volume of such oil to be refined by each such refinery, to the extent known by the applicant or any person required to be disclosed pursuant to subparagraphs (A), (B) or (C) of this paragraph.

From the discussion above, it is clear that an application for a Gulf Coast port would directly and substantially affect persons in four categories:

1. District III crude producers who sell to others. Because of the vertical integration in the industry and the District III crude surplus, a license could deprive access to District III refineries. The siting of trunk pipelines and entry points, and the location and capacity of storage facilities affect the producers' access to District II refineries, as may tariffs and operating practices.

2. District II refiners who are not owners of accessible crude trunk lines. Some will need to replace domestic supplies that now move by other means. All should have an opportunity to compete on a nondiscriminatory basis for participation in market growth.

3. District I refiners, for the same reasons as in 2 above. Also, because of the more severe refinery deficiency the integrated refiner needs access to products from the Gulf districts.

4. Transportation and terminal companies, distributors, bulk users and others dependent upon nondiscriminatory access, in all three Districts.

[5] In the reported study, a computer model was constructed to test various scenarios. The difference between the computer selections and the investment decisions indicated by the public comments may be attributable to a number of factors. The computer model did not take into consideration factors such as differences in attitudes toward environmental risks and protection. Also, in costing out new refinery capacity, the model used historic refinery costs in the various refining districts without adjustment for any changes in costs attributable to increasing volumes of high sulphur content foreign oil and decreasing amounts of available domestic "sweet" crude.

This is not to suggest that other persons may not be substantially affected, nor that other anticompetitive effects may not be felt by persons in the above categories. Rather it is to demonstrate the need, contemplated in subparagraphs (G) and (H), for an application to show the total flow of crude and products of which deepwater port oil will be a part. It also demonstrates the need for including information on reserves in the impacted Districts so that changing patterns can be anticipated.

Accordingly, it is determined that the information specified in section 5(c)(2)(G) and (H) is required for the PAD District in which deepwater port oil is to be landed and, if it is a crude- or refinery-surplus District, for the crude- or refinery-deficient Districts to which the surplus moves. If a deficient District receives only minimal shipments, the applicant or an affiliate may instead supply industry total shipments, unless the Secretary determines under § 148.109 that further particular information is required for the District or any portion of it.

Subparagraphs (G) and (H) of section 5(c)(2) require that the information specified therein be included in the application "to the extent known by the applicant or any person required to be disclosed. * * *" The phrase "to the extent known" is both a limitation and a mandate. For example, if a pipeline is expected to be built in the future, but the exact location of entry points or pumping stations has not yet been determined, the Act does not require those determinations to be made before an application may be filed. On the other hand, if feasibility, cost or other considerations indicate ultimate selection from among identifiable alternatives, they are known and therefore must be included.

The term "known" is related to the word "proposed". See § 148.109(e)(6) through (10). The planning and development of facilities within the ambit of these requirements proceeds in several stages. Generally, there are long-term projections of demand and supply and of their various components. See *e.g.*, Joint Hearings, Special Joint Subcommittee on Deepwater Ports Legislation, Committees on Commerce, Interior and Insular Affairs, and Public Works, United States Senate, 93d Cong. 1st Sess., Pt. 1 (Serial No. 93–59) p. 343 (projections to the year 2000). Industry-wide projections are used by individual firms in making their own long-term analyses and projections. Long-term plans are formulated in a number of areas, such as marketing, design, and production engineering, and financing. A variety of techniques may be used for the coordination of these planning functions. At some point, a coordinated proposal for implementation of long-term plans or for meeting identified long-term objectives is reviewed by an interdisciplinary group, typically at a middle management level within a large firm, but sometimes at a senior level in smaller firms. Development of new capacity is considered to be "proposed" when it is reviewed for the first time by an interdisciplinary group who has, or whose presiding executive has, responsibility for making recommendations to senior management with respect to expansion or new construction. This is true regardless of whether at the first review the proposal is approved, rejected, modified in whole or in part, or returned for further study for analysis. See *United States* v. *Penn-Olin Chemical Co.*, 246 F. Supp. 917, 921–25 (D. Del 1965). The statutory specification of information on a proposed expansion or new facility requires inclusion in the application of all written studies, analyses and reports which have been communicated to any prospective co-venturer or any prospective lender or invester. Any discussion of possible joint facility development or expansion between officers or agents acting with actual or apparent authority for two or more unaffiliated firms constitutes a proposal known to each firm, regardless of its internal status within a firm.

Similarly, the requirement in subparagraph (H) of inclusion of information on "the anticipated volume" is more readily understandable than definable. In the development of projections, assumptions must always be made. The information required by § 148.109(b)(4) and (7) through (10) on "anticipated volume" must show the values derived from the assumptions considered most probable and the range of values used for planning and development purposes, together with a description or explanation of the assumptions that drive those values. The same is true for anticipated dollar amounts.

For each facility for which information on volume (capacity, production, shipments)[6] is required by § 148.109(b)(4) and (7) through (10), facility totals shall be included, separately for crude, for gasoline, for jet fuel, for distillate fuel oils, and for other products. While there are differences among the crudes in various domestic and foreign production areas, many characteristics of the crude market in a particular surplus or deficiency area are significantly affected by the totals. Different grades may sell at different prices, but the market tendency is toward prices moving together with fairly stable differentials. Entry is a function of the total supply-demand relationship as well as that within any particular grade. Similarly, refinery products vary—gasoline in octane and lead content, for example; but capacity and production totals significantly affect market characteristics. Possible diversions from existing supply routings require analysis of totals and change-over capabilities. Facilities that are capable of use interchangeably as between crude and products shall be reported on the basis of expected uses.

The foregoing discussion relates, as noted at the outset, to the analysis of probable effects in the markets that will be directly and substantially affected.

[6] Volumes should generally be shown by barrels of 42-gallons at atmospheric pressure and 60 degree farenheit.

V 40 N 217 NOV 10 75 XUM

(PAD Districts and Refining Districts are used only for convenience. Provision is made in § 148.109(z) for obtaining information on whatever is determined to be a relevant market). The Commission argues persuasively that total market power is relevant in the highly integrated oil industry. It is, to judge probable market actions in the markets primarily affected by a proposed deepwater port. Secondary effects might be important in some cases, but the Commission does not attempt to demonstrate that use of total market power in more remote markets should in every case be considered in a licensing proceeding. Analysis of market power in remote markets might add to analysis of total market power, in predicting effects in the immediate markets; but unless there is an identifiable nexus it is more an exercise in redundancy.[7] Accordingly, § 148.109(e) requires firm totals, domestic and worldwide.

Past anticompetitive actions might also be disclosed by some of the proposed requirements, but there is not any suggestion that denial of a license is the best or even an appropriate remedy. A propensity toward anti-competitive conduct might be material to consideration of a license request; but the forming of a joint venture does not itself justify a search for wrongful motive or intent because, as the Department of Justice observed, it is not a significant event in terms of opportunity for collusion among oil companies.[8]

Data is required by § 148.109(e) (7) through (10) for each of the applicable PAD Districts. In general, reporting areas defined by the Bureau of Mines are used, as follows: crude oil production and reserves shall be given for each State; in addition, separate crude reserves and production data shall be given for the portion of the Louisiana-Gulf refining district within the State of Louisiana, for each of the Texas producing districts, and for each of the two New Mexico producing districts. Refinery capacity and production shall be given by refining districts, as defined by the Bureau of Mines, but, in the East Coast refining district, data shall be given for designated New England, Middle Atlantic, and South Atlantic regions. Any further information required for review or processing of an application, such as data for a producing field or a particular market area, will be specified under the procedures provided in § 148.109(z).

With respect to pipelines on which information is required to be disclosed under subparagraph (G) and § 148.109 (p), analysis will require in every case information on crude trunk lines, on entry points, storage facilities, and major lateral lines and loops and other connections. Information on collector lines and intra-facility lines will not be required in every case, but may be required as additional information. Product lines from refineries to trunk lines are required to be included, showing in general the same information as for crude trunk lines. Product lines from refineries to trunk lines, tanks, and terminals, including intermodal terminals, are required to be included, regardless of ownership. Information on lines within a refinery or terminal area will not be required in every case, but may be required as additional information. Crude gathering charges are required under § 148.109 (e) (6).

In addition, the application is required to include information sufficient to permit analysis of the probable effect of operation of the pipeline facility, including financial and economic aspects of operation. Actual and proposed tariffs, joint rates, minimum tenders, and minimum or maximum throughput requirements must be included. If any element of information called for by the application requirement has not been fixed or determined, the application shall include a statement of the basis or bases on which it will be determined in sufficient detail to permit an analysis of reasonableness. It shall include an explanation of the manner in which tariffs, and of the manner in which minimum and maximum volumes will be determined, showing each significant element of cost or expense, with an explanation of how each element will be determined or estimated and capital costs amortized. For existing pipelines, historic information must be included with respect to post-construction connections and with respect to shipments by non-owners in their own name and in the name of an owner.

Provision is made in § 148.105(b) for incorporation by reference to any document filed with and available for public inspection at any of the Interstate Commerce Commission, the Securities and Exchange Commission, or the Federal Energy Administration.

Protection of proprietary information, and procedures for resolution of any issues regarding such matters, are discussed below.

PROCEDURAL CONSIDERATIONS

Many public comments objecting to the requirements of proposed § 148.109 (y) cited constitutional grounds, statutory language, Congressional intent, or basic considerations of fairness. One comment suggests that the proposal is an attempt to accomplish the purpose of the motion of counsel supporting the complaint in *In the Matter of Exxon Corp.*, Docket No. 8934, which the Commission denied in its Order dated March 4, 1975. The pendency and status of that proceeding are irrelevant. If any information is required to review or process an application, it must be included in the application. Section 14(b) of the Act recognizes that information included in an application may be useful to other Federal agencies and to state governments, and in judicial proceedings. The Congress did not prohibit such use but instead provided for preservation of confidentiality. It is also suggested that the Secretary does not have authority to require supplementary information from an applicant or its affiliates after an application is filed. The Commission comment answers that objection. If information may properly be required in the application itself, it is both a matter of convenience to the parties and a matter of administrative convenience to limit the initial application to only that information which will or probably will be required in all cases, reserving to a supplementary procedure those matters which will be required to review or process a particular application.

Many comments objected that the proposed procedure for obtaining additional information was fraught with possibilities of abuse, some of those comments relying particularly on the argument that the persons proposed to be authorized to conduct examinations, inspections and interviews would not be responsive to the source of their authority. That argument has merit. In response, the Federal Trade Commission in its comment suggests only that interviews might be conducted in the format of a deposition. That procedure would tend to curb abuse, but is of itself not an adequate safeguard. Moreover, a host of questions would be raised. Who would resolve differences as to time and place of deposition, order of witnesses, and the like? What would be the consequences if a witness, on instruction of counsel, declined to answer a question or to furnish a requested document? How would the Secretary determine the effect, if any, of such a refusal on the ultimate decision on an application? Those questions, and other issues raised by the public comments, could possibly be provided for in advance in a rule promulgated under the Act. Even then, however, when any dispute arose as to the application of any particular rule, there would remain debatable issues as to the authority and proper roles of the Attorney General, the Commission and the Secretary. Which of them would be responsible for the initiation of civil proceedings in the event of a failure to comply with an administrative determination? What would be the proper source of a request to the Attorney General for a grant of immunity under 18 U.S.C. §§ 6002, 6004.

Some of these problems might be dealt with by reference in the regulations to the Antitrust Civil Process Act and to the Federal Trade Commission's Procedures and Rules of Practice, 16 CFR Pt. 2, Subpart A. There would still remain the problems as to responsiveness to the Secretary, whom the Congress designated to exercise the authorities granted by it in the Act. It would be unwarranted and unwise to attempt to make an officer or employee of an independent agency, such as the Commission, responsible to the Secretary or any other officer of the Executive Branch. While there is precedent for an interagency agreement between this Department and the Department of Justice under which a law enforcement officer of one acts at the direction of the other, the better administrative practice is to limit such arrangements to the particular matters where they are deemed necessary or appropriate.

Accordingly, it is determined that the authority delegated by the Congress to the Secretary under the Act will be exercised by the Secretary or his designate.

One of the prominent features of the Act is the wide variety of interests to whom the application is distributed, and from whom reports or recommendations are either specifically required or implicitly invited. This process may be expected to produce requests or recommendations for further information from a variety of sources, including the adjacent state, industry members and analysts, and consumers, as well as the Department of Justice and the Federal Trade Commission. Accordingly, provision is made in § 148.109(z) for the receipt of requests and recommendations for supplementary information, for consideration by the Secretary.

As noted above, procedural safeguards for persons under investigation, and their officers, employees and agents are set out both in the Commission's Rules and in the Antitrust Civil Process Act.[9] The latter represents a comprehensive attempt by the Congress to deal with the competing and sometimes conflicting interests of the need for thorough investigation on the one hand, and on the other the need to afford the persons under investigation and others, the protections afforded by the Constitution and required by basic considerations of fairness. In general, its provisions are to the extent applicable or appropriate included in the rule, § 148.211.

In view of the foregoing, it is not necessary to summarize or discuss in detail the comments referred to in the first paragraph of this part.

ISSUES OF PRIVILEGE, CONFIDENTIALITY AND MATERIALITY

Much of the public comment seems to be founded essentially on concern about proprietary and other confidential information. Most if not all of the financial data and information on production and facilities is public information, except for proved reserves. The perceived concern is therefore understood to center about maintenance of confidentiality on proved reserves[10] and about requirements for identification of relevant documents and individual names.

Disclosure of proved reserves has been required by the Federal Energy Administration and its predecessors and provision made for protection of confidentiality, 10 CFR § 205.9(f). There is not any basis in the record for concluding that use of a similar procedure would work any hardship. Moreover, it is clear under the Act that the obligation of the Secretary is not to overlook confidential information that is required for meaningful review, but rather to implement section 14(b) of the Act and other provisions in a manner that will permit both meaningful review within the established time limits and fair and expeditious resolution of issues that arise in the process.

It is useful to note some differences in the three types of issues listed in the caption. Claims of attorney-client privilege must be anticipated, as well as claims from individuals of immunity from possible self-incrimination. In the first, the privilege attaches to the communication. In the latter, the immunity is from compulsion to disclose information. In neither does that privilege attach to the information itself. Accordingly, the sound practice is to seek the information itself, as opposed to communications of information, and to seek past or anticipated acts as opposed to identity of individual actors. This is particularly so because disclosure is a waiver of the privilege, and it must therefore be anticipated that receipt of required information would be at least delayed by any claim of privilege.

In the case of trade secrets and other proprietary information, disclosure of required information under any rule, procedure, or agreement prohibiting unauthorized disclosure is not a waiver of the claim. Thus, the most important considerations are that the authority requiring the information, and interested parties, be adequately advised of the claim and the basis or bases therefor, and that there be a fair and expeditious procedure for resolving any issues raised by the claim.

Issues of materiality may be raised by a person who believes that a requirement for information is harassing or oppressive.

It is expected that when any issues of the foregoing types are raised, as well as when there is any disagreement with respect to times and places for inspections and examinations, or for the interviews and testimony, that all parties in interest will in good faith attempt to narrow their differences.

Under the proposal in the Federal Trade Commission comment, any issues remaining would be heard by an administrative law judge designated by the Commandant. While that might be appropriate in some cases, in other cases reference to other sources of expertise might be more appropriate; and in many cases a less formal procedure may be fair and adequate and more expeditious. Accordingly, § 148.219 provides that the General Counsel of the Department of Transportation shall determine, or designate a person to determine, issues raised by any claim of the type discussed above. A designation by the General Counsel may specify procedures to be used in resolving the issue or may lease some or all of the procedural matters to the discretion of the designated person. The General Counsel may at any time receive and consider any request or recommendation as to procedure, including any request for evidentiary or argumentative hearing, or for *in camera* inspection. The General Counsel may act upon any such recommendation or request, or refer it to a person designated by him to determine the issue involved. Proceedings pursuant to a designation shall be reported to and subject to the approval of the General Counsel. Any determination by the General Counsel is subject to appeal to the Secretary for good cause.

The Commission proposal would require that all documents within the specified categories be assembled by the applicant in one central place. Many public comments observed that many of the required documents and much of the required information are proprietary not to the applicant but to an affiliate. Assemblage into a single depository would require some custodial system, with staffing. That would create an unreasonable risk that proprietary data of one affiliate might become known to another, with possible anticompetitive effects. Accordingly, § 148.109(z) modifies the proposal by requiring assemblage by each applicant and each affiliate. While it may generally seem desirable to have each applicant and affiliate assemble all documents and records in one place, in practice it may not work any administrative inconvenience for some documents to be assembled at the headquarters of a limited number of subsidiaries or divisions. Accordingly, § 148.109(z) permits that and other details of document and record inspection and copying to be left to informal agreement if possible, and to resolution by the General Counsel or his designate if necessary.

Because the Act specifies a rather rigid timetable for the processing of an application, paragraph (z)(6) of § 148.109 authorizes the setting of deadlines for meeting any supplemental information requirements that may arise under § 148.109(z) and for delivery of any deferred information not included in the application. In addition to recognizing the Secretary's authority to disapprove an application if information material to its processing is not provided in a timely manner, § 148.109(z)(6) provides for suspending the processing of the application as a more flexible administrative alternative.

OTHER MATTERS

Dow Chemical Co. suggested that, in place of the Commission's proposed procedures for the antitrust review process, each applicant be required to certify that it has applied for a business review by the Department of Justice and an advisory opinion from the Federal Trade Commission. In response, the Commission suggests that would be unsatisfactory because there would not be any assurance that the required information

[7] *Cf.*, H.R. Rep. No. 92-1617, 92d Cong. 2d Sess. p. 11 (quoting Robert Wright, former First Assistant, Antitrust Division).

[8] Joint Hearings, p. 695.

[9] These provisions, respectively, would be applicable if the Commission or the Assistant Attorney General were to issue an investigative subpena, even if triggered by information obtained in the application review process.

[10] While that concern may be heightened by a number of recent civil rulings on confidentiality of marketing and financial data, see, *e.g., United States* v. *International Business Machines Corp.*, BNA *Antitrust Trade and Regulation Report*, No. 713 at p. A-7 (May 13, 1975), No. 714 at p. A-24 (May 20, 1975), they are not necessarily controlling under § 14(b) of the Act, since it is tied to 18 U.S.C. § 1905.

V 40 217 NOV 10 75 XUM

would be forthcoming in a timely manner. That deficiency could possibly be provided for in the rule. The suggestion is rejected, however, as inappropriate. The procedures referred to would leave unanswered a great many of the questions discussed above, particularly with respect to proprietary information. See also Commission Rules, 16 CFR § 1.1.

It is noted in public comments that there is some duplication between proposed § 148.109 (e) and (y). In promulgating the proposed regulation, it was deemed useful to incorporate the proposal of the Federal Trade Commission as an integral part of the proposed rule. The purpose in doing so having now been served, the requirements of information for antitrust review purposes are incorporated in various provisions pertaining to the same or similar information. Also, as noted elsewhere, the rule now sets forth provisions of the Act which were not included in the proposed rule. These changes make a substantial change in appearance but not in substance.

Finally, note must be made of the complaint and final judgment in *United States v. Atlantic Refining Co.*, Civil Action No. 14060, United States District Court, District of Columbia, 1941, and subsequent proceedings reported at 360 U.S. 19 (1959). *Reduced Pipe Line Rates and Gathering Charges*, 243 I.C.C. 115 (1940), 272 I.C.C. 375 (1948); *Petroleum Rail Shippers' Ass'n v. Alton & S.R.R.*, 243 I.C.C. 589 (1941), which on any particular application proceeding might be pertinent to the Secretary's grant or conditioning of a license.

ENVIRONMENTAL REVIEW CRITERIA

Appendix A to Part 148 contains the environmental review criteria for deepwater ports. Authority for this action is derived from section 6(a) of the Deepwater Port Act of 1974 (Pub. L. 93-627; 33 USC 1505(a)), and 49 CFR 1.46(s). The criteria were developed in accordance with the recommendations of the Environmental Protection Agency and the National Oceanic and Atmospheric Administration. Although the criteria are not regulation, they are discussed here to inform the general public on their purpose and development and to respond to commenters on the earlier proposed version.

The development and availability of proposed environmental review criteria were announced in the FEDERAL REGISTER of June 11, 1975 (40 FR 24957) and an initial mailing of over 600 copies was made. Ultimately, over 800 copies of the proposed criteria were distributed to government agencies, States, and the general public. 27 Comments were eventually received. These comments may be examined in Room 6125 of the Department of Transportation, Nassif Building at 400 Seventh St., SW., Washington, D.C. Copies of comments will be furnished to interested persons upon request to the Commandant (G-WDWP/61) and payment of fees as prescribed in 49 CFR 7.95.

These criteria will serve two basic purposes in the review of an application for a deepwater port license:

1. *Environmental Review.* Section 6(a) of the Act specifies that criteria, consistent with the National Environmental Policy Act (42 U.S.C. 4321 et seq.), shall be used to evaluate each application. The criteria have been developed and will be revised as necessary to address matters which will be examined in detail in the environmental impact statements required by NEPA and by section 5(f) of the Act. The criteria cannot constitute an exhaustive outline of environmental concerns but are intended to provide guidance as to areas of essential environmental analysis by making those areas explicit to the extent feasible.

Information for environmental evaluation of a proposed deepwater port will be derived from the application, from the Federal environmental impact statement, and from comments of the public, Federal Agencies, and States. Documentation will be available for public review in accordance with provisions of the Act. While this Appendix A establishes the environmental review criteria required by section 6(a) of the Act, the Coast Guard intends to review and revise the criteria periodically, to the degree required by information that becomes available, working closely with EPA and NOAA according to the letter and spirit of section 5(b). Revisions will be subject to public review.

2. *Demonstration of Best Available Technology.* In addition, section 4(c)(5) of the Act requires a determination in accordance with these criteria that the applicant has demonstrated that a proposed deepwater port will be constructed and operated using best available technology so as to prevent or minimize adverse impact on the marine environment. Criteria will also be used in selecting among competing applications in the same application area (section 5(f)(3)(A)) and will be considered by the Secretary in conjunction with preparation of Federal environmental impact statements for deepwater ports (section 5(f)).

These criteria have accordingly been written in two parts. The first part is intended to provide a basis for examining the possible environmental impacts of proposed and alternate plans, procedures and technologies for deepwater port development. The second part is intended to provide guidance for decision makers on environmental considerations applicable to siting, design, construction, operation, and uses of land and of the coastal zone. The criteria broadly address known effects that may be associated with deepwater port development, in the form of performance measurements that are directed toward prevention or minimization of impacts.

COMMENTS ON PROPOSED CRITERIA

The first part of the proposed criteria contained a list of several applicable Federal environmental and conservation laws. The listing was intended to alert the public and potential applicants to those laws considered particularly relevant to proposed deepwater ports. Several commenters recommended expanding the list to include various other laws, such as State and local laws. Other commenters recommended deletion of the list since sections 4(c)(2) and 4(c)(6) of the Act specifically require a determination of compliance with applicable laws and regulations. The Coast Guard agrees with the latter reasoning, and this part has not been included in the final criteria.

Some respondents question whether the authority or need exists to evaluate certain aspects of deepwater port development, such as alternative uses of the territorial sea and the high seas or secondary impacts, especially with respect to human health and welfare, or land use and coastal zone management. The Coast Guard believes that compliance with the mandate of section 6 of the Act, particularly with regard to consistency with NEPA, requires that the environmental evaluation of a deepwater port encompass such considerations. Even in light of the Act's preference for State determination of the proposed port's consistency with land use, Section 9(b)(1) for example, the authority for an independent assessment by the Secretary is clearly contained in NEPA. Moreover, the fact that the Act provides for license conditioning as the Secretary "* * * deems necessary * * *" for the purposes of the Act (Section 4(e)(1)), reinforces the need to ensure that all facets of the proposal are in line with national environmental policy and goals.

Several commenters submitted lengthy arguments presenting their views on the purpose of the criteria and the form and content needed to fulfill that purpose. One suggested that the criteria's sole function was defined by section 4(c)(5) of the Act, namely, to determine if best available technology has been applied. Presumably the Federal environmental impact statement would suffice for the purposes of the environmental evaluation if this interpretation were to be accepted. Another commenter expressed the opposite view that the criteria must set forth comprehensive performance standards similar to effluent limitation guidelines and performance standards under the Federal Water Pollution Control Act. Such standards would, in part, offer detailed and specific engineering requirements and peremptory siting constraints. These views are addressed in the following three paragraphs.

The Coast Guard's interpretation of the purpose of the criteria was expressed earlier. That purpose is essentially twofold: (1) to evaluate the environmental soundness of a proposed deepwater port and (2) to determine if best available technology has been applied so as to prevent or minimize adverse impact on the marine environment. The evaluation extends to the development of conclusions and recommendations to assist in making the final decision on the application. The decision will reflect the balancing of

competing considerations to determine the national interest. The suggested interpretation of the basic function of the criteria as solely to assess an applicant's demonstration of use of best available technology would be unduly restrictive and would conflict with the Act and the mandate of NEPA. The Coast Guard will not arbitrarily limit the balancing process to arrive at a decision.

The requirement to develop environmental review criteria is unique compared to other environmental enactments by the Congress. Thus there are few similarities with other laws. The criteria are intended to be "basic guidelines" for determination of probable environmental impacts and the procedures and technology which can be used to prevent or minimize adverse impacts (Joint Report of the Senate Committees on Commerce, Interior and Insular Affairs; and Public Works, to accompany S. 4706 at 39 (1974). There is no basis for comparison of this provision of the Deepwater Port Act to the provisions of sections 304, 306 or 307 of the Federal Water Pollution Control Act. Comprehensive performance standards based on precisely defined water quality criteria, as specified by the Federal Water Pollution Control Act, are extrinsic to the environmental evaluation of a proposed port.

The guidelines presented in these criteria establish performance requirements for critical environmental aspects of deepwater ports (III, B of the criteria). Potential applicants must consider these guidelines in their planning, and the Secretary will consider them in his evaluation. A degree of performance is ascertained by a measurement of the proposal's critical factors against the guidelines, and in light of the project's probable net environmental impact. In this way, the use of best available technology is keyed to performance in preventing or minimizing adverse impact, not to mere compliance with detailed and peremptory equipment standards or constrictive siting requirements. The use of best available technology to augment environmental protection is not enhanced by preselection and rigidity. Best available technology must be defined for a specific project in its entirety and in consideration of the effects of that technology.

Most of those responding to the proposed criteria, made recommendations on its specific contents. Several of these suggestions were incorporated in the final criteria.

A few persons opined that the requirement of section 6(c) for "development of environmental review criteria in accordance with the provisions of section 5(a)" meant that proposed criteria should be published verbatim in the FEDERAL REGISTER rather than simply publishing notice of the availability of the criteria. Thus, they recommended that the proposed criteria be resubmitted for public review in that manner, and that perhaps a public hearing need be held. This procedure would indeed be effective. However, in light of the extensive distribution of the proposal (over 800 copies) to all parties who had ever indicated an interest in deepwater port matters in any context, including most major national environmental groups and particularly the Center for Law and Social Policy (which represents, in the case of deepwater ports, nine environmental organizations, with a total membership of over 659,000 persons), the reissuance of the proposed criteria verbatim in the FEDERAL REGISTER and the subsequent holding of a public hearing would serve little useful purpose. Nevertheless, Interested parties are invited to tender their comments and suggestions for consideration by the Coast Guard pursuant to the policy on revision of the criteria as stated above.

ENVIRONMENTAL AND INFLATIONARY IMPACT STATEMENTS

A final environmental impact statement, "Final Environmental Impact Statement for Deepwater Port Regulations", has been prepared on the regulations in this document, and was made available to the President's Council on Environmental Quality and the public on October 17, 1975. The statement contains additional and more detailed information than the preamble and was distributed to approximately 800 interested persons. Copies are available upon request to the Executive Secretary (G-CMC/82), U.S. Coast Guard, Washington, D.C. 20590.

The inflationary impact of the requirements in this document was evaluated in accordance with the criteria contained in the Department's Interim Guidance for the Preparation of Inflationary Impact Statements. Under the evaluation, these requirements are found not to be a major proposal and a Negative Declaration has been prepared. Copies are available upon request to the Executive Secretary, Marine Safety Council, (G-CMC/82), U.S. Coast Guard, Washington, D.C. 20590.

EXCEPTION TO THIRTY-DAY EFFECTIVE DATE RULE

I find that there is good cause for making these regulations effective in less than 30 days to enable the earliest possible implementation of these procedural rules, which furthers the purposes of the Act in the national interest. Since there are no deepwater ports in operation or under construction, no one is immediately affected by the construction or operating requirements in these rules.

Issuance. In consideration of the foregoing, Chapter I of Title 33, Code of Federal Regulations, is amended by adding Subchapter NN to read as follows:

PART 148—GENERAL

Subpart A—General

Sec.
148.1 Purpose.
148.3 Definitions.

Subpart B—Applications

148.101 Applicability.
148.103 Application staff address.
148.105 Preparation.
148.107 Copies: fees.
148.109 Contents of application for issuance of license.
148.111 Optional procedures.

Subpart C—Application Proceeding

GENERAL

148.201 Purpose.
148.203 Applicability.
148.205 Clerk: docket; record.
148.207 Availability of documents in the record.
148.211 Processing an application.
148.213 Changes to an application.
148.215 Withdrawal of application.
148.216 Request by port for determination.
148.217 Designation of adjacent coastal States.
148.219 Claims and objections.

INFORMAL PUBLIC HEARING

148.231 Notice of public hearing.
148.233 Testimony and argument.
148.235 Report of public hearing.

FORMAL HEARING

148.251 Determination to hold formal hearing: notice of formal hearing.
148.253 Assignment of administrative law judge: disqualification.
148.255 Jurisdiction of the administrative law judge.
148.257 Authority of the administrative law judge.
149.259 Ex parte communications.
148.261 Parties.
148.263 Intervention.
148.265 A person not a party.
148.267 Appearance and practice.
148.269 Requirements for documents.
148.271 Subscription.
148.273 Filing.
148.275 Service of document: other transmittal.
148.277 Conferences.
148.279 Motions.
148.281 Subpoenas.
148.283 Hearing date.
148.285 Reporter: transcript; corrections.
148.287 Order of procedure.
148.289 Evidence.
148.291 Rulings referred or appealed to the Commandant.

APPLICATION APPROVAL OR DENIAL

148.321 Decision process generally.
148.323 Criteria and considerations.
148.325 Multiple applications.
148.327 Termination of proceeding before approval or denial of an application.

Subpart D—Issuance of a License

148.400 Applicability.
148.403 Issuance of a license.
148.405 Term of license.
148.407 Consultation with adjacent coastal States.

Subpart E—Site Evaluation [Reserved]

Subpart F—Procedure for Exemption From Any Requirement in Deepwater Port Regulations

148.601 Applicability.
148.603 Petition for exemption.
148.605 Coordination with states.
148.607 Exemption criteria.

Appendix A—Environmental Review Criteria for Deepwater Ports.

AUTHORITY: Secs. 5(a), 5(b), Pub. L. 93-627, 88 Stat. 2131 (33 U.S.C. 1504(a), (b)); 49 CFR 1.46(s).

Subpart A—General

§ 148.1 Purpose.

This subchapter prescribes regulations for the licensing, construction, design and equipment, and operation of deepwater ports.

V 40 N 217 NOV 10 75 XUM

§ 148.3 Definitions.

The terms listed in sections 3 and 18 of the Act, whenever used in Parts 148, 149 and 150, have the same meaning they have in the Act, except as provided in this section for "Affiliate."

"Act" means the Deepwater Port Act of 1974.

"Affiliate" means each person—

(a) Having any direct or indirect ownership interest in the applicant of greater than three percent;

(b) With whom the applicant has made, or proposes to make, a significant contract for financing, managing or otherwise participating in the construction or operation of the deepwater port proposed to be licensed;

(c) Who owns or controls any person who is an affiliate by operation of paragraphs (a) or (b) of this definition, or who owns or controls the applicant;

(d) Owned or controlled by or under common ownership or control with an applicant or any person who is an affiliate by operation of paragraphs (a), (b) or (c) of this definition; or

(e) Who is determined by the Secretary to have information required to review or process the application.

"Barrel" means 42 U.S. gallons at atmospheric pressure and 60° Fahrenheit.

"Captain of the Port" means a Coast Guard Officer commanding a Captain of the Port Area described in Part 3 of this chapter.

"Crude oil" means a mixture of hydrocarbons that exist in the liquid phase in natural underground reservoirs and remains liquid at atmospheric pressure after passing through surface separating facilities and includes—

(1) Liquids technically defined as crude oil;

(2) Small amounts of hydrocarbons that exist in the gaseous phase in natural underground reservoirs but are liquid at atmospheric pressure after being recovered from oil well (casing head) gas in lease separators; and

(3) Small amounts of non-hydrocarbons produced with the oil.

"Deepwater port" means any fixed or floating manmade structures other than a vessel, or any group of such structures, located beyond the territorial sea and off the coast of the United States and which are used or intended for use as a port or terminal for the loading or unloading and further handling of oil for transportation to any State, except as otherwise provided in section 23 of the Act. The term includes all associated components and equipment, including pipelines, pumping stations, service platforms, mooring buoys, and similar appurtenances to the extent they are located seaward of the high water mark.

"Gross under keel clearance" means the distance between the keel of a tanker and the ocean bottom when the tanker is moored or anchored in calm water free of wind, wave, current, or tide conditions that would induce ship motion.

"Marine site" means the area in which the deepwater port is located, which includes the safety zone, the TSS, each anchorage area, and all areas seaward of the high water mark in which associated components and equipment of the deepwater port are located.

"Miles" means nautical miles.

"Net under keel clearance" means that distance between the ocean bottom and the portion of a tanker's hull closest to the ocean bottom when the tanker is underway, moored or anchored, considering ship motion in responding to the combination of actual wind, wave, tide, and current conditions.

"PAD District" means one of the five Petroleum Administration for Defense Districts defined by the Bureau of Mines, Department of the Interior.

"Platform" means a fixed structure which rests on or is embedded in the sea-bed that has floors or decks in which an activity or specific function may be carried out.

"Production District" means a State and each district within the State of Louisiana, New Mexico or Texas for which production of crude petroleum is separately reported by the Bureau of Mines, Department of the Interior.

"Pumping platform complex" (PPC) means a single platform or a series of interconnected platforms that have one or more of the following capabilities:

(a) Pumping oil between a vessel and the shore.

(b) Berthing and messing facilities for assigned personnel.

(c) Landing area for helicopters.

(d) Mooring and loading for small vessels.

"Refining District" means a refining district as defined by the Bureau of Mines, Department of the Interior, for reporting refining operations.

"SPM" means single point mooring buoy.

"Traffic separation scheme (TTS)" means the network of traffic lanes and separation zones or lines at a deepwater port.

"Year-end proved reserves of crude oil" means the estimated quantities of all liquids statistically defined as crude oil, which geological and engineering data demonstrate with reasonable certainty as of December 31 of the year concerned to be recoverable in future years from known reservoirs under existing economic and operating conditions. Reservoirs are considered proved if economic producibility is supported by either actual production or conclusive formation tests. The area of an oil reservoir considered proved includes—

(1) That portion delineated by drilling and defined by gas-oil or oil-water contacts, if any; and

(2) The immediately adjoining portions not yet drilled, but which can be reasonably judged as economically productive on the basis of available geological and engineering data.

In the absence of information on fluid contacts, the lowest known structural occurrence of hydrocarbons controls the lower proved limit of reservoir. Reserves of crude oil which can be produced economically through application of improved recovery techniques (such as fluid injection) are included in the "proved" classification when successful testing by a pilot project, or the operation of an installed program in the reservoir, provides support for the engineering analysis on which the project or program was based.

Subpart B—Applications

General

§ 148.101 Applicability.

This subpart prescribes rules that apply to each application, including competing applications described in § 5(d)(3) of the Act, for the issuance of a license for the ownership, construction, and operation of a deepwater port.

§ 148.103 Application staff address.

The address of the application staff is: Commandant (G-WDWP/61), U.S. Coast Guard, 400 Seventh Street, SW., Washington, D.C. 20590.

§ 148.105 Preparation.

(a) Any person may confer with the application staff concerning the preparation of an application.

(b) An applicant may incorporate by clear and specific reference in his application any:

(1) Standard reference material upon which he relies and which he knows to be readily available to Federal and State Agencies;

(2) Current information contained in previous applications or reports that he has submitted to the application staff; and

(3) Current information contained in a tariff, report or other document previously filed for public record with the Interstate Commerce Commission, the Securities and Exchange Commission, or the Federal Energy Administration, provided—

(i) A certified true and complete copy of the document is attached to each of 10 of the 60 copies of the application required by § 148.107(a);

(ii) Each copy filed with the application bears on its cover notation of the date of filing and the document number or other locator; and

(iii) Any verification or certification required for the original filing (other than from auditors or other independent persons) is brought current to a date not earlier than 30 days prior to the date of the application.

(c) If any required information is furnished pursuant to § 148.111(b), the application need only state with respect thereto, in the appropriate place or places: "Required information is being furnished by [named affiliate] [all affiliates] pursuant to § 148.111(b)."

§ 148.107 Copies: fees.

(a) Sixty copies of each license application must be submitted to the application staff.

(b) One copy of each license application must be submitted to the U.S. Army Corps of Engineers District office having jurisdiction over the proposed port.

(c) A nonrefundable application fee of $100,000 must be submitted with each application for issuance of a license. If additional information is necessary to make an application complete, no additional application fee is required.

(d) The costs incurred by the United States in processing an application will be charged to the application fee until it is exhausted. Reimbursement for additional processing costs, above the application fee, must be submitted to the application staff when assessed.

(e) Fees and costs assessed under this section must be made payable to the United States Treasury.

§ 148.109 Contents of application for issuance of license.

Each application must include the following:

(a) *Identity of application and affiliates.* (1) The name, address and principal business activity of the applicant and of each affiliate.

(2) A list of all domestic subsidiaries and a list of all foreign subsidiaries of each applicant and of each affiliate that elects under § 148.111(a) to furnish required information on a consolidated basis.

(3) The name, address and principal business activity of each subsidiary or division of an applicant or an affiliate which participated directly and substantially in the planning, evaluating or approving of participation in the construction, financing, or operation of a deepwater port.

(b) *Proof of citizenship and authority.* (1) If the applicant is an individual, group of individuals, a partnership or an association, an affidavit from each individual stating that he is a citizen of the United States of America.

(2) If the applicant is a corporation, one copy of its charter or instrument by which the corporation is formed and organized under general corporation laws, certified by the Secretary of State or other appropriate authority of the State in which incorporated, and a copy of its by-laws certified by its Secretary or an Assistant Secretary.

(3) If the applicant is a State, or combination of States, or any political subdivision, agency, or instrumentality of a State, including a wholly owned corporation, a copy of the laws authorizing the operations detailed in the application.

(c) *Address for service of documents.* The name and address of a person upon whom service may be made if a formal hearing is held on the application and the name and address of a person to whom documents not required to be served under § 148.275 of this part may be sent.

(d) *Verification.* A statement at the end of the application subscribed and sworn to before a notary public that the individual who signed the application has read it and that its contents are true to his best knowledge and belief.

(e) *Financial information.* (1) For each applicant and affiliate:

(i) Its most recent annual financial statement, including an income statement and a balance sheet, accompanied by an opinion of a certified public accountant; and

(ii) An interim income statement and balance sheet for each subsequent fiscal quarter-year ended prior to 30 days before submission of the application.

(2) The proposed location and capacity of the deepwater port, including all components thereof, together with a general description of the anticipated use of the deepwater port during the expected life of the project.

(3) An estimate of construction costs, by phases together with estimated dates or periods for completion of each phase, or annually, and a detailed estimate of the cost of removal of all marine components of the deepwater port, other than pipelines lying below the seabed.

(4) Annualized projections or estimates of each of the following, at reasonable intervals throughout the expected useful life of the deepwater port:

(i) Total oil throughput together with subtotals of throughput of oil owned by the applicant and affiliates and of throughput of oil owned by others.

(ii) Annual revenue.

(iii) Annual operating expenses, showing separately any anticipated management fee, payment, allowance, or credit to any affiliate for management or operation of the port or any component.

(5) A copy of every agreement or proposal relating to the ownership or management of a deepwater port or any of its components or to the financing of the construction or operation of the deepwater port or component, including those relating to throughputs, capital contributions, loans, guarantees, and commitment therefor.

(6) To the extent known to the applicant or any affiliate, every existing or proposed:

(i) Tariff or portion thereof to be filed with the Interstate Commerce Commission;

(ii) Rate or joint rate; and

(iii) Agreement, arrangement or understanding with respect to terms or conditions on which other persons may become an affiliate or with respect to minimum or maximum tenders or other economic restrictions on shipments by nonaffiliated persons.

If any item required by this subparagraph has not been determined, an explanation of the basis on which it will be determined must be included.

(7) To the extent known to the applicant or any affiliate, the anticipated:

(i) Total annual demand for crude oil; and

(ii) Total year-end proved reserves of crude oil for each Production District within the PAD District in which oil from the proposed deepwater port is to be landed, at reasonable intervals throughout the expected useful life of the deepwater port.

(8) To the extent known to the applicant or any affiliate, the anticipated:

(i) Total refinery capacity;

(ii) Total runs to stills; and

(iii) Total demand for gasoline, for jet aviation fuels, for distillate fuel oils, and for other refinery products, for each Refining District within the PAD District in which oil from the deepwater port is to be landed, at reasonable intervals throughout the expected useful life of the deepwater port.

(9) If the PAD District in which oil from deepwater port is to be landed has a surplus:

(i) Of crude oil production and imports over refinery capacity, the information required in paragraph (e)(7) of this section must also be set forth for each Production District within the PAD Districts to which surplus crude oil from the District in which oil from deepwater port is landed is expected to be transported; and

(ii) Of refinery capacity over demand for refinery products, the information required in paragraph (e)(8) of this section must also be set forth for each Refining District within the PAD Districts to which surplus refinery products from the PAD District in which oil from the deepwater port is landed is expected to be transported. If this includes the East Coast Refining District, the information for that district must be separately stated for the following three components:

(i) New England: The States of Massachusetts, Rhode Island, and Connecticut.

(ii) South-Atlantic: The States of Virginia, North Carolina, South Carolina, Georgia, and Florida.

(iii) Mid-Atlantic: The remaining area of the East Coast Refining District (Maine, Vermont, New Hampshire, New Jersey, Maryland, Delaware, District of Columbia, and the eastern parts of New York and Pennsylvania).

(10) From each applicant or affiliate which is engaged in producing, refining, or marketing oil, its estimate of its components of the totals required to be included under the provisions of paragraphs (e)(7), (8) and (9) of this section.

(11) From each applicant or affiliate engaged in producing, refining, or marketing oil, for each item it is required to supply under paragraph (e)(10) of this section, its actual data for each of the three calendar years immediately prior to the date of application.

(12) From each applicant or affiliate which has a significant interest in any refinery within any refinery district on which information is required to be disclosed under paragraphs (e)(8) or (9)(ii) of this section, for each refinery, its:

(i) Location;

(ii) Runs to still for each of the three calendar years prior to date of application; and

(iii) Production for each of the three calendar years prior to date of application of gasoline, jet aviation fuel, distillate fuel oils, and other products.

(13) From each applicant or affiliate engaged in producing, refining or marketing oil, for each of the three calendar years immediately prior to the date of application, its total domestic and total

V 40 217 NOV 10 75 XUM

worldwide: yearend proved reserves; annual production imports into the United States; and annual refinery runs to still and production of gasoline, jet aviation fuel, distillate fuel oils and other refinery products.

(f) *General technical information.* (1) A description of the experience of the applicant, each affiliate of the applicant that the applicant may want to provide, and each consultant of the applicant in offshore operations, with particular emphasis on involvement in offshore transfer and storage of liquid cargo and vessel loading and unloading operations.

(2) A listing and abstract of each study relied upon by the applicant and a listing and abstract of each ongoing or completed study pertaining to deepwater ports conducted by or for the applicant, later supplemented by data of particular environmental or operational concern from specific studies identified by the Coast Guard.

(3) The name, address, citizenship and telephone number of each affiliate of the applicant together with a description of the manner in which the affiliate is associated with the applicant.

(4) The name, address, citizenship, telephone number and qualifications of each engineering firm, if known, that will design the deepwater port, or any portion of the port.

(5) The ownership interest in the applicant of each affiliate having any ownership interest in the applicant of greater than 3 percent.

(6) For each affiliate with whom the applicant has made, or proposes to make a significant contract for the construction of any part of the deepwater port, a description of that affiliate's experience in construction of marine terminal facilities, offshore structures, underwater pipelines, seabed foundations or any other experience that would bear on his qualification to participate in the construction of a deepwater port.

(7) A copy of each contract made by the applicant for the construction of any component of the deepwater port or for the operation of the port.

(g) *Water.* (1) Evidence that the requirements of section 401(a)(1) of the Federal Water Pollution Control Act Amendments of 1972, 33 U.S.C. 1341(a)(1), will be satisfied, except that, in those cases where certification under section 401(a)(1) must be obtained from the Administrator of the United States Environmental Protection Agency, the request for such certification must accompany each application for a license under the Act.

(2) *Coastal zone management.* The certification, or certifications, required by section 307 of the Coastal Zone Management Act of 1972, as amended.

(h) *Lease block identification.* (1) Identification of each lease block established either by the Secretary of the Interior under section 5 of the Outer Continental Shelf Lands Act (43 U.S.C. 1334), or by a State under the authority of § 3 of the Submerged Lands Act (43 U.S.C. 1311), within which any part of the proposed deepwater port or its approaches are located. This identification should be made using Official Outer Continental Shelf Leasing Maps or Protraction diagrams where they are available. For each identified lease block, the following must be provided:

(i) A description of each pipeline, or other right-of-way crossing, in enough detail to allow plotting of rights-of-way and facilities to the nearest one-tenth of a second in latitude and longitude.

(ii) The identity of the lessee of each pipeline or other right-of-way.

(2) Detailed information concerning any interest that the applicant and others have in each block and concerning the present and planned use of each block.

(i) *Overall site plan.* Single-line drawings showing the location and type of each component of the proposed deepwater port and its necessary facilities, including floating structures, fixed structures, aids to navigation, manifold systems and onshore storage areas, pipelines, and refineries.

(j) *Site plan for marine components.* A site plan consisting of:

(1) The proposed size and location of:

(i) All fixed and floating structures;

(ii) SPM swing circles;

(iii) Maneuvering areas;

(iv) Recommended vessel traffic separation scheme for approaching the port and the proposed vessel traffic pattern in the port area;

(v) Recommended anchorage areas;

(vi) Recommended mooring area for support vessels;

(vii) Required and recommended aids to navigation; and

(viii) Pipelines and cables within the marine site;

(2) The charted water depth throughout the proposed marine site as verified by the reconnaissance hydrographic survey required by this subpart:

(3) A reconnaissance hydrographic survey of the proposed marine site.

NOTE: A requirement to submit an engineering hydrographic survey of the final marine site will be imposed as a license condition.

(k) *Soil data.* An analysis of the general character and condition of the ocean bottom and sub-bottom throughout the marine site and along the path of the pipeline to the shore, including an opinion by a registered professional engineer specializing in soil mechanics concerning:

(1) The suitability of the soil to accommodate the anticipated design load of each marine component that will be fixed to or supported on the ocean floor; and

(2) The stability of the seabed when exposed to the environmental forces resulting from severe storms, or to lesser forces that continue for an extended period, including any history of accretion or erosion of the coast line in proximity to the marine site.

(l) *Operational information.* (1) The maximum lengths, maximum drafts, and maximum deadweight tonnages of the tankers to be accommodated at each SPM.

(2) Calculations with supporting data and other documentation to show that the charted water depth at each proposed SPM location is sufficient to provide at least a 5 foot net under keel clearance for each tanker that the applicant expects to be accommodated at the SPM.

(3) A detailed description of the manner of forecasting the wind, wave, and current conditions described in the draft Operations Manual during which the following would occur:

(i) Shutdown of oil transfer operations.

(ii) Departure of the tanker from the mooring.

(iii) Prohibition on mooring to an SPM.

(iv) Shutdown of all operations and evacuation of the port.

(4) The speed limits proposed for tankers transiting the traffic lanes and safety zone.

(m) *Floating components data.* (1) A description and preliminary design drawing of each floating component, including the hoses and the anchoring or securing structure and navigation lights if the component is a mooring buoy.

(2) The design criteria, developed pursuant to Part 149 of this chapter, to which each floating component is to be designed and built.

(3) The design standards and codes to be used.

(4) The title of each recommended engineering practice to be followed.

(5) A description and the results of any design and evaluation studies performed by or for the applicant on a floating component.

(6) A description of safety, fire fighting, and pollution prevention equipment to be used on each floating component.

(7) A description of lighting to be used on floating hoses for night detection.

(n) *Fixed marine components data.* (1) A description and preliminary design drawing of each fixed marine component.

(2) The design criteria, developed pursuant to Part 149 of this chapter, to which each fixed marine component is to be designed and built.

(3) The design standards and codes to be used.

(4) The title of each recommended engineering practice to be followed.

(5) A description and the results of any design and evaluation studies performed by or for the applicant for any fixed marine component and utilized in the development of the application.

(6) A description of navigational lighting, safety, lifesaving, fire fighting, pollution prevention and removal, and waste treatment equipment to be installed.

(7) A description and preliminary design drawing of the oil pumping equipment, piping system, control and instrumentation system, and any associated equipment, including the oil throughput measuring equipment, leak detection equipment, alarm system, and emergency shutdown equipment.

(8) The personnel capacity of each PPC.

(o) *Offshore pipeline data.* (1) A description and preliminary design drawing of the marine pipeline, including size, throughput capacity, length, depth and protective devices.

(2) The design criteria to which the marine pipeline is to be designed and built.

(3) The design standards and codes to be used.

(4) The title of each recommended engineering practice to be followed.

(5) A description of the metering system to be used to measure flow rate.

(6) Information concerning all submerged or buried pipelines that will be crossed by the offshore pipeline and the manner in which the crossing will be made.

(p) *Onshore components data.* (1) A description of the location, capacity, and ownership of, and a preliminary design drawing for construction of new or expansion of existing onshore pipelines, storage facilities, refineries, petrochemical facilities, and transshipment facilities to be served by the deepwater port.

(2) Location, capacity, and ownership of existing onshore pipelines, storage facilities, refineries, petrochemical facilities, and transshipment facilities to be served by the deepwater port.

(3) A chart showing the location of all planned and existing onshore pipelines, storage facilities, refineries, and petrochemical facilities and transshipment facilities to be served by the deepwater port.

(4) From each applicant or affiliate which is engaged in producing, refining or marketing oil, throughput of crude oil, of gasoline, of jet aviation fuel, of distillate fuel oils and of other refinery products, for the calendar year preceding the date of application, and a copy of each existing or proposed throughput agreement.

(5) A facility is served by the deepwater port if it is within a PAD District for which information is required under paragraph (e)(7), (8) or (9) of this section and is either served by connection with a common carrier pipeline or a component of or appurtenant to a common carrier pipeline.

(6) Crude oil gathering lines and lines wholly within a facility must be included only if specifically required under paragraph (z) of this section. Entry points and major connections between lines and with bulk purchasers must be included.

(q) *Miscellaneous components data.* (1) A description of the communications systems to be used in operation of the deepwater port.

(2) A description of the radar navigation system to be used in operation of the deepwater port to include the type and characteristics of the radar and the antenna location.

(3) A description of plans and method of bunkering vessels using the deepwater port.

(4) Type, size and number of vessels to be used in bunkering, mooring, and servicing the vessels using the deepwater port.

(5) A description and exact location of any shore based support facilities to be provided for vessels described in paragraph (q)(4) of this section.

(r) *Construction procedures.* A description of the method and procedures to be used in constructing each component of the deepwater port and a description of each phase, including anticipated dates of completion for each of the specific components.

(s) *Draft Operations Manual.* A draft Operations Manual for the proposed port prepared in accordance with the "Guidelines for Preparation of a Deepwater Port Operations Manual". If required information is not available, an applicant should so state, show why, and state when the information can be expected to be provided.

(t) *Environmental analysis.* An environmental analysis prepared in accordance with "Guide to Preparation of Environmental Analyses for Deepwater Ports."

(u) *Aids to Navigation.* (1) For each proposed aid to navigation, the proposed position of the aid described by latitude and longitude coordinates to the nearest second or tenth of a second as determined from the largest scale chart of the area in which the aid is to be located. (Latitude and longitude should be specified to a level obtained by visual interpolation between the finest graduation of the latitude and longitude scales on the chart.)

(2) For each proposed obstruction light and the proposed rotating lighted beacon, the color, characteristic, effective intensity, height above water, and general description of illumination apparatus.

(3) For each proposed fog signal on a structure, a general description of the apparatus.

(4) For each proposed buoy, the shape, color, number or letter, and depth of water in which located, and a general description of any light or fog apparatus installed.

(5) For the proposed radar beacon (RACON), height above water and a general description of the apparatus.

(v) *Telecommunications equipment.* A description of the radio stations or other communications facilities and the proposed concept of operation to serve the deepwater port during construction or operation.

NOTE: Federal Communications Commission application for these facilities may be submitted directly to the Federal Communications Commission when sufficient technical information is available to meet the rules of that agency. The holding of appropriate Federal Communications Commission licenses will be made a condition on a deepwater port license.

(w) *National Pollutant Discharge Elimination System Information.* To the extent available, the information prescribed by, and submitted on, the "National Pollutant Discharge Elimination System (NPDES) Application for Permit to Discharge, Short Form "D" for applying for issuance of a discharge permit to the Administrator of the Environmental Protection Agency (EPA). If complete information is not available by the time the Secretary must either approve or deny the application for a designated application area, under section 5(i)(1) of the Act, the license is conditioned upon the applicant receiving the required discharge permit from the EPA prior to the commencement of any discharge requiring the same.

(x) *Discharge of dredged or fill material.* The information prescribed by, and submitted on, Form EP 1145–2–1 contained as Appendix B of "Application for Department of Army Permits for Activities in Waterways, EP 1145–2–1 of 1 October 1974" for each permit issued by the Secretary of the Army in compliance with:

(1) Section 10 of the Rivers and Harbors Act of 1899 (30 Stat. 1151; 33 U.S.C. 403);

(2) Section 404(b) of the Federal Water Pollution Control Act Amendments of 1972 (86 Stat. 816; 33 U.S.C. 1251); or

(3) Section 103 of the Marine Protection, Research, and Sanctuaries Act of 1972 (86 Stat. 1052; 33 U.S.C. 1401).

(y) *Additional Federal authorizations required.* All other applications for Federal authorizations required for ownership, construction, and operation of a deepwater port not listed elsewhere in this subpart.

(z) *Supplemental information.* (1) A designation of locations where the applicant and each affiliate has segregated and filed documents in its possession relating to deepwater ports which were prepared within four years of the date of application and which fall under one or more of the following categories:

(i) Prepared by or for, or submitted to, a Board of Directors or an executive, management or planning committee.

(ii) Concern the financing of construction or operation of a deepwater port, including throughout nominations and membership in and financing of any existing or proposed joint venture.

(iii) Concern existing or proposed or anticipated rates or joint rates.

(iv) Determined by the Secretary to be required to review and process the application.

(2) Documents referred to in paragraph (z)(1) of this section must be available during normal business hours to the Secretary or the General Counsel of the Department of Transportation or the designate of either of them, for inspection and copying, at the locations designated in the application unless the General Counsel requires consolidation of documents from two or more locations. If any claim of privilege or immunity is asserted with respect to any document or record designated for inspection or copying, the person making the claim shall furnish to the Secretary or the General Counsel or his designate as the case may be, in accordance with § 148.219(c), an identification of the document and statement of the claim.

(3) The Secretary may require an applicant or affiliate to make available for examination under oath or for interview

V 40 N 217 NOV 10 75 XUM

persons having, or believed to have, designated information. Interviews and examinations are conducted by or at the direction of the General Counsel.

(4) The Secretary may require an applicant or affiliate to file as a supplement to the application any analysis, explanation or detailing of information in the application or any other information determined by the Secretary to be required to review or process the application.

(5) Any Federal or State department or agency or other interested person may file with the clerk a request or recommendation for further information. Requests and recommendations received within 30 days after notice of the initial application has been published will be fully considered before any final determination is made under this paragraph (z). Requests and recommendations must include a brief statement of the purpose of any proposed requirement, including, if it relates to conduct, the nature of the conduct and the probable consequences, or if the proposed requirement relates to physical characteristics, the nature of any safety, health, environmental or economic concerns.

(6) In exercising the authority to require supplemental information under paragraph (z) (2), (3) or (4) of this section, the Secretary, the General Counsel, or the designate, as the case may be, may fix a time by which an applicant or affiliate must meet the requirement. If an application states that required information is not yet available but will be furnished at a later date, the Commandant may specify a time by which the information must be provided. If any requirement is not met by a time fixed in accordance with this subparagraph, the Secretary shall determine whether compliance with the requirement is material to processing of the application within the time prescribed in the Act. If the Secretary determines that it is material, he may disapprove the application, or may suspend the application pending a determination that processing can be resumed. The period of any suspension shall not be counted in determining the date prescribed by the time limit set forth in §§ 4(c)(6), 5(d)(3), 5(e)(2), 5(g), 7(b)(1) or 9(b)(1) of the Act.

§ 148.111 Optional procedures.

(a) *Consolidated statements.* Applicants and affiliates may elect to supply required information consolidated in accordance with generally accepted accounting principles, if and to the extent that consolidated statements or reports are filed with the Interstate Commerce Commission, the Securities and Exchange Commission, or the Federal Energy Administration, but if those filings are also made or required to be made by line of business or other classifications, the application shall be prepared on the same basis. An election under this paragraph is subject to the authority of the Secretary to require supplemental information, pursuant to § 148.109(z).

(b) *Direct submissions by affiliates.* If any affiliate has reason to believe that it or its business or property would be prejudiced by furnishing information required from it to the applicant, the affiliate may file the required information directly with the clerk. The information must be enclosed in a sealed envelope bearing on the outside the names of the applicant and affiliate and the date or anticipated date of the application. If any claim of privilege or confidentiality is asserted with respect to the contents, the procedure specified in § 148.219(c) or (d) must be followed.

Subpart C—Application Proceeding

General

§ 148.201 Purpose.

This subpart prescribes rules of procedure and practice for application proceedings.

§ 148.203 Applicability.

(a) Except as provided in paragraph (b) of this section, the rules in this subpart apply to each application proceeding.

(b) The rules for formal hearings in §§ 148.251–148.291 apply only to application proceedings in which the Commandant issues a notice of formal hearing under § 148.251. The rules for informal hearings in §§ 148.231–148.235 apply only to proceedings to consider applications for issuance, transfer, and renewal of a license.

§ 148.205 Clerk: docket; record.

(a) The mailing address for the clerk in each proceeding is Commandant (G-CMC/82), U.S. Coast Guard, Washington, D.C. 20590. The office of the clerk is located in the Nassif Building, 400 Seventh Street, SW., Room 8234, Washington, D.C.

(b) The clerk maintains a docket and the record for each proceeding. The docket lists each document in the record. The record contains all documents filed or issued in the proceeding that the clerk has received and any other documents in the proceeding that are docketed in accordance with this subpart.

§ 148.207 Availability of documents in the record.

(a) The procedure for inspecting and copying documents in the record of a proceeding is contained in 49 CFR Part 7 and section 14 of the Act. Copies of documents in the record of a proceeding are mailed to each adjacent coastal State unless their release is prohibited by 49 CFR 7 and section 14 of the Act.

(b) Comments submitted by Federal agencies and departments for each proceeding in accordance with sections 5(e)(2) and 7(b) of the Act are docketed when they are received. Copies of the draft and final environmental impact statements prepared in accordance with section 5(f) of the Act are docketed when they are transmitted to the Council on Environmental Quality.

(c) The applicant must designate any portions of the material submitted in an application that contain either trade secrets or commercial or financial information that is claimed to be privileged or confidential. Section 148.219 prescribes procedures for objecting to claims and resolving of disputed issues.

(d) A copy of the application, except trade secrets and confidential information, is available for inspection and copying at the document inspection facility of the Coast Guard District Office nearest the proposed deepwater port and at Commandant (G-WDWP/61), U.S. Coast Guard, Room 6125, Nassif Building, 400 Seventh Street, SW., Washington, D.C. 20590.

(e) The application staff will designate a custodian of all documents filed in a proceeding for which protection is claimed under section 14(b) of the Act. The custodian shall not make public for inspection documents for which protection is claimed nor otherwise disclose such information, unless the General Counsel is of the opinion that the disclosure is not inconsistent with the requirements of section 14(b) of the Act. The custodian shall keep a record of all officers and employees of the Department having custody of any copy or copies of undisclosed documents.

§ 148.211 Processing an application.

The Chief, Office of Marine Environment and Systems takes the action described in section 5(c)(1) of the Act for processing each application received in a proceeding and for issuing in the FEDERAL REGISTER the notices described in section 5(c)(1). If he issues notice of application pursuant to section 5(c)(1) of the Act, the application staff thereafter delivers the application described in the notice to the clerk for docketing and mails a copy of the notice to each:

(a) Party;

(b) Adjacent coastal State; and

(c) Other coastal State bordering on the body of water in which the proposed port would be located.

§ 148.213 Changes to an application.

If information in an application becomes materially inaccurate or incomplete after it is docketed in a proceeding but before the proceeding is terminated, the applicant must promptly file an amendment furnishing the corrected or additional information. Sixty copies of the amendment must be submitted to the application staff when the revisions are filed.

§ 148.215 Withdrawal of application.

An applicant may withdraw his application in a proceeding at any time before the proceeding is terminated by delivering or mailing notice of withdrawal to the clerk for docketing.

§ 148.216 Request by port for determination.

A port which applies for a determination under section 4(d) of the Act must submit a request in writing to the application staff within 30 days of the date that notice of application is published in the FEDERAL REGISTER. The request must:

(a) Be signed by the highest official of the port submitting the request;

(b) Contain a copy of existing plans for the construction of a deep draft channel and harbor;

(c) Certify that the port has an active study by the Secretary of the Army for the construction of a deep draft channel and harbor, or that the port has pending an application for a permit under § 10 of the Act of March 3, 1899 (30 Stat. 1121) for the construction;

(d) Provide any available documentation on—

(1) Initial costs, by phases if staged development, for the proposed onshore project, including dredging, ship terminal and attendant facilities;

(2) Estimated annual operating expenses by phases, if staged development, including labor, for thirty years for all elements of the project;

(3) Estimated time of completion of all elements of the proposed project;

(4) An estimate of the volume of ship traffic, the volume and variety of the tonnage, an assessment of the potential traffic congestion conditions in the port and an assessment of the capability of the port for controlling vessel traffic as a result of the proposed dredging project;

(5) An assessment of the economic benefits estimated to be derived from the project, including:

(i) Economic contribution to the local, and regional area;

(ii) Induced industrial development;

(iii) Increased employment;

(iv) Increases in tax revenues; and

(v) Any other factors; and

(6) An assessment of the environmental and social impact of the project on elements of the local and regional community; and

(e) Provide a statement of its views on whether it seeks a determination that the State port best serves the national interest or that both developments are warranted.

§ 148.217 Designation of adjacent coastal States.

(a) The Chief, Office of Marine Environment and Systems, in issuing a notice of application pursuant to section 5(c)(1) of the Act, designates as an adjacent coastal State each State which would be directly connected by pipeline to the deepwater port proposed in the application or which is within 15 miles of the proposed deepwater port. A State not designated as an adjacent coastal State in the notice of application may request to be so designated on the basis that the risk of damage to its coastal environment is equal to or greater than the risk posed to a State directly connected by pipeline to the proposed deepwater port.

(b) Each request submitted under paragraph (a) of this section must:

(1) Be submitted in writing to the application staff within 14 days after the date of publication of the notice of application in the FEDERAL REGISTER;

(2) Be signed by the Governor of the State;

(3) Set forth the facts and any available analyses in support of the request together with any available documentation concerning the risk of damage to the coastal environment of the requesting State that could occur as a result of the establishment of a deepwater port; and

(4) State why the requesting State believes the risk of damage to its coastal environment is equal to or greater than the risk posed to a State connected by a pipeline to the proposed deepwater port.

(c) The application staff transmits a copy of each request submitted in accordance with paragraph (b) of this section to the Administrator of the National Oceanic and Atmospheric Administration and requests his recommendations within a period of time that will allow the Secretary to determine the matter within 45 days after the date the request was received.

(d) If, after having received the recommendation of the Administrator of the National Oceanic and Atmospheric Administration, the Secretary determines that there is a risk of damage to the coastal environment of the requesting State equal to or greater than the risk posed to a State directly connected to the proposed deepwater port, he grants the request and designates the requesting State as an adjacent coastal State. If he determines that there is not such a risk, he denies the request and so notifies the Governor of the requesting State.

§ 148.219 Claims and objections.

(a) Any person required to furnish information may assert, as ground for relief from the requirement, any failure to comply with this part or any other constitutional or legal right or privilege.

(b) In general, claims relating to documents must be made on filing an application or on receiving a determination by the Secretary pursuant to § 148.109(z).

(c) If a person claims attorney-client privilege, he must identify the communication by date, type of communication, persons making and receiving the communication, and general subject matter. If the required information is in a separable part of a communication, such as an attachment to a letter, the separate part must be similarly identified. The identification must be filed with the clerk or as a document pursuant to § 148.269.

(d) Any document claimed to be protected by section 14(b) of the Act must be placed in a sealed envelope, containing the name of the person claiming the protection and of the applicant, and the date or anticipated date of the application. A brief statement of the basis of the claim must be included, either on the envelope or separately. If a number of documents are involved, they must be grouped according to nature of claim, and a self-explanatory numbering system used for envelopes and documents.

(e) Written objection to any claim may be made by any Federal or State department or agency, or any applicant, affiliate, party or other interested person. The objection shall include a brief statement of its basis and identify the documents to which it applies.

(f) Except as provided in paragraph (g) of this section, the General Counsel shall determine, or designate a person to determine, issues raised by any claim filed under this section. A designation by the General Counsel may specify procedures to be used in resolving the issue or may leave some or all of the procedural matters to the discretion of the designated person. The proceedings pursuant to a designation shall be reported to the General Counsel, who shall approve, modify or disapprove the reported findings and conclusions.

(g) Any person making or objecting to a claim, or other interested person, may at any time file with the General Counsel a request or recommendation as to procedures. The General Counsel may act upon it or refer it to a person designated to resolve the issue.

(h) At any formal or informal hearing the presiding officer may permit any person to assert any claim that could be filed under this section and may determine any issue raised by the claim or, in his discretion, refer it to the General Counsel for resolution pursuant to paragraph (f) of this section.

(i) The filing of any claim under this section, other than a claim of document protection under paragraph (d) of this section, shall stay the time for meeting any information required to which the claim relates, but shall not stay the periods for processing and review of an application unless the Secretary determines that compliance with the requirement is material to processing of the application within the time prescribed in the Act. If the Secretary determines that it is material, he may suspend the application pending a determination that processing can be resumed. The period of any suspension shall not be counted in determining the date prescribed by the time limit set forth in §§ 4(c)(6), 5(d)(3), 5(e)(2), 5(g), 7(b)(11) or 9(b)(1) of the Act.

(j) Any determination by the General Counsel under paragraph (f) of this section may be appealed to the Secretary for good cause shown.

Informal Public Hearing

§ 148.231 Notice of public hearing.

After all applications in a proceeding are docketed, the Commandant issues a notice of public hearing and mails or delivers it to any person who requests it and to each applicant and adjacent coastal state. The clerk dockets the notice when it is published. Each notice shows the time and place for the hearings, formulates the factual issues in the proceeding, procedural matters to govern the hearings, and designates the presiding officer assigned by the Commandant for the hearing.

§ 148.233 Testimony and argument.

Interested persons may attend any public hearing, present relevant material at the hearing, and submit briefs and oral argument at a time determined by the presiding officer during the hearing.

V 40 217 NOV 10 75 XUM

§ 148.235 Report of public hearing.

As soon as practicable after a public hearing is completed, the presiding officer forwards a report of the hearing to the clerk for docketing. The report at a minimum contains a summary of the materials presented and factual issues raised at the hearing and has attached to it a transcript of the hearing and all relevant materials and briefs submitted to the presiding officer. The presiding officer determines and announces to the participants during the course of the hearing what material will be attached to the report.

FORMAL HEARING

§ 148.251 Determination to hold formal hearing; notice of formal hearing.

(a) After the reports of public hearings are docketed in a proceeding, the Commandant determines whether there are specific and material factual issues concerning the applications that may be resolved by a formal hearing. If he determines that a formal hearing is necessary, he issues notice of formal hearing to the applicants, the application staff, and the administrative law judge.

(b) A notice of formal hearing lists the factual issues for resolution at the hearing, the applicants, and the administrative law judge assigned to conduct the hearing.

(c) The clerk mails or delivers a copy of the notice of formal hearing in a proceeding to each adjacent coastal state and to each person who requests notice of formal hearing.

§ 148.253 Assignment of administrative law judge; disqualification.

(a) The Commandant assigns the administrative law judge for a formal hearing.

(b) The administrative law judge may disqualify himself at any time after assignment by filing notice of withdrawal from the proceeding. If on motion of a party the administrative law judge does not disqualify himself, the party may appeal the ruling to the Commandant by filing notice of appeal within seven days after the ruling on the motion. A brief may be filed with the notice of appeal.

(c) If the assigned administrative law judge becomes unavailable during the proceeding, another administrative law judge is assigned.

§ 148.255 Jurisdiction of the administrative law judge.

(a) The jurisdiction of the administrative law judge over a proceeding begins when he is assigned. His jurisdiction ends 20 days after the transcript of the formal hearing is docketed or when he issues notice of withdrawal from the proceeding.

(b) The Commandant exercises the authority of an administrative law judge in a proceeding when no administrative law judge has jurisdiction.

§ 148.257 Authority of the administrative law judge.

The administrative law judge assigned to a formal hearing may:

(a) Administer oaths and affirmations;

(b) Issue subpoenas;

(c) Adopt procedures for the submission of evidence in written form;

(d) Rule on offers of proof and receive relevant evidence;

(e) Examine witnesses at the formal hearing;

(f) Dispose of procedural requests or similar matters;

(g) Convene, recess, reconvene, adjourn, and otherwise regulate the course of the formal hearing;

(h) Certify questions to the Commandant;

(i) If a party to a formal hearing fails to appear at a session of the hearing, proceed with the session without further notice to the party;

(j) Extend or shorten a time prescribed by this subpart to the extent consistent with the 240 days time limit prescribed in section 5(g) of the Act for completing public hearings in a proceeding;

(k) Prescribe a time for doing an act if the time is not prescribed in this subpart; and

(l) Take any other action authorized by or consistent with this subpart, the Act, or 5 U.S.C. 551–559.

§ 148.259 Ex parte communications.

If two or more applications have been filed in a proceeding, or if a person opposing an application has intervened in the proceeding, the administrative law judge may not consult any party on a fact in issue except on notice and opportunity for all parties to participate. The administrative law judge must prepare a summary of and have docketed each ex parte communication in the proceeding.

§ 148.261 Parties.

The parties to a formal hearing are the application staff, the applicants, and intervenors in the proceeding.

§ 148.263 Intervention.

(a) Any person may file a petition to intervene in a formal hearing, and any adjacent coastal state may intervene by filing a notice of intervention. The petition must be addressed to the administrative law judge, must identify the specific matters in the hearing on which he seeks to intervene and his interest in those matters, and must designate the name and address of a person upon whom service may be made if the petition is granted. A party to the formal hearing may file an answer to a petition within five days after the petition is filed.

(b) A petition to intervene must be filed within ten days after notice of formal hearing is issued.

(c) Intervention may be limited to particular matters or to particular times in the hearing if necessary to prevent repetitious evidence and argument or to control the course of the formal hearing.

(d) If the administrative law judge denies a petition in whole or part, the petitioner may appeal to the Commandant by filing notice of appeal within seven days after the denial is issued. A brief may be filed with the notice of appeal. A party may file a brief in support of or in opposition to the appeal within seven days after the notice of appeal is filed.

§ 148.265 A person not a party.

(a) At any time before a formal hearing, any person who is not a party may submit to the administrative law judge a petition to present evidence at the formal hearing. The petition must be sent to the administrative law judge or to the clerk who will forward it to the administrative law judge. The petition must contain a statement describing in detail the evidence to be presented and must show its relevancy to factual issues listed in the notice of formal hearing.

(b) If a petition is granted, the ruling delineates the evidence that may be presented at the formal hearing.

§ 148.267 Appearance and practice.

(a) Each party to a formal hearing, except an individual, must appear by his attorney. Each attorney must file a notice of appearance that states his name, address, telephone number, and the name of the person he represents. With his notice of appearance, each attorney must file a written authorization from his client.

(b) Each attorney representing a person in a proceeding must be admitted, and be in good standing, to practice before a court of the United States or the highest court of any State, territory or possession of the United States.

(c) The administrative law judge assigned to the formal hearing may suspend or bar an attorney from representing a person in the proceeding if he finds that the attorney has failed to conform to the standards of conduct required for attorneys in the Courts of the United States.

(d) The administrative law judge may exclude any person from a formal hearing or a conference if the person is contumacious at the hearing or conference.

§ 148.269 Requirements for documents.

(a) Each document, except an application, filed in a proceeding or submitted to the administrative law judge must:

(1) List the docket number of the proceeding; and

(2) Be signed in ink by the person filing or submitting the document and show the capacity of the person signing, his address, and the date of signing.

(b) Each document filed in a proceeding, except an application, must:

(1) Be accompanied by ten copies of the document;

(2) Show the name and address of each person upon whom a copy of the document has been served;

(3) Be accompanied by an affidavit showing proof of service if the person serving the process is not an attorney; and

(4) Contain the following certificate of service if the person serving the process is an attorney:

I hereby certify that I have this day served the foregoing document upon _____ in accordance with 33 CFR 148.275.

Dated at _____ this _____ day of _____, 19____.

_____
Signature

For _____
Name of Party or Petitioner

§ 148.271 Subscription.

The signature on a document filed, served, or submitted to the administrative law judge in a proceeding is certification by the person signing that he has full authority to sign the document, that he has read it and knows its contents, that to the best of his knowledge, information, and belief the statements made in it are true, and that it is not interposed for delay.

§ 148.273 Filing.

(a) A document is filed in a proceeding when it meets the requirements in § 148.269 and is deposited in the mail or, if not mailed, is received by the clerk.

(b) If the clerk receives a document that does not comply with § 148.269 he returns it to the person who submitted it with a statement of reasons for the return.

(c) Filing by mail must be by certified mail.

§ 148.275 Service of document; other transmittal.

(a) The clerk serves each order, ruling, decision, and notice upon all parties to a formal hearing when issued, except a document issued at the formal hearing or a prehearing conference.

(b) Each document before it is filed in a proceeding must be served upon:

(1) All parties, except the person filing the document; and

(2) The administrative law judge or if no administrative law judge has jurisdiction, the Commandant.

(c) Service of a document upon a party must be made upon the attorney representing the party or, for a party not represented by an attorney, upon the party.

(d) Service must be made by handing a copy of the document to the person to be served or depositing a copy of the document in the mail.

(e) This section does not apply to service of subpoenas. Rules for serving subpoenas are in § 148.281.

(f) The clerk mails to a person who is not a party, and who has submitted a petition or motion in the proceeding, a copy of the ruling on the petition or motion when issued and a copy of the action taken on any appeal of the petition. He mails a copy of the notice of the formal hearing, when the notice is issued, to each person whose petition to present evidence has been granted under § 148.265.

(g) The clerk provides the applicants and the administrative law judge with a copy of each application and report of public hearing docketed in the proceeding.

§ 148.277 Conferences.

(a) The administrative law judge may hold one or more prehearing conferences to give the parties an opportunity to present and consider facts and arguments, to exchange exhibits proposed to be offered in evidence, and to obtain stipulations, admissions, and agreements to produce documents and other tangible things. The administrative law judge may consider at a conference the procedure to be followed at the formal hearing, limitations on the number of witnesses at the hearing, and any other matters that may expedite the disposition of the proceeding.

(b) The administrative law judge may hold conferences during a formal hearing to expedite the disposition of the proceeding.

(c) If a prehearing conference is held, the administrative law judge issues a notice reciting the action taken at the conference and any agreements made between the parties.

§ 148.279 Motions.

(a) Any request for a ruling or relief in a proceeding, except a request for a subpoena or a petition to intervene or present evidence at a formal hearing, must be submitted by motion. Each motion must be addressed to the administrative law judge, state the ruling or relief sought and the grounds therefor, and be accompanied, if appropriate, by a proposed order. Each written motion must be filed. An oral motion may be made only at the formal hearing or a conference.

(b) Within seven days after service of a written motion, a party may file an answer supporting or oppposing the motion.

(c) Unless otherwise authorized by the administrative law judge, no oral argument is heard on a written motion. A brief may be filed with a written motion or an answer to a written motion.

(d) The administrative law judge issues a ruling and any appropriate order for each motion made.

(e) Except as otherwise provided in §§ 148.253 and 148.263, a ruling of the administrative law judge on a motion may not be appealed to the Commandant. The administrative law judge may refer any ruling to the Commandant for review if he determines that the ruling involves an important question of law or policy.

§ 148.281 Subpoenas.

(a) At any time before a formal hearing is completed, a party may submit a request to the administrative law judge for issuance of a subpoena. A request for issuance of a subpoena must show the general relevance and scope of the evidence sought.

(b) A proposed subpoena and fifteen copies, and witness fees for one day and mileage, must be submitted with each request. A proposed subpoena must contain:

(1) The docket number of the proceeding;

(2) The captions "Department of Transportation," "Coast Guard," and "Licensing of Deepwater Port for coastal waters off (*insert name of the coastal state closest to the proposed deepwater port and the docket number of the proceeding*)";

(3) The name and office of the administrative law judge;

(4) A statement commanding the person to whom the subpoena is directed to attend the formal hearing and give testimony or, for a subpoena to produce documentary evidence, a statement commanding the person to produce designated documents, books, papers, or other tangible things at a designated time or place; and

(5) Explanation of the procedure in § 148.279 and paragraph (e) of this section for quashing a subpoena.

(c) Unless otherwise authorized by the administrative law judge, a subpoena must be served in accordance with Rule 45 of the Federal Rules of Civil Procedure.

(d) A subpoenaed witness is paid the same fees and mileage paid to witnesses subpoenaed in District Courts of the United States. The person requesting a subpoena must pay the fees and mileage.

(e) Any motion to quash a subpoena must be submitted within seven days after service of the subpoena.

(f) If a person does not comply with a subpoena and the administrative law judge on motion rules that good cause has been shown for seeking judicial enforcement of a subpoena, he refers his ruling to the Commandant.

§ 148.283 Hearing date.

(a) The administrative law judge schedules the formal hearing by issuing a notice to the parties.

(b) The clerk mails or delivers a copy of the notice to any person who requests it.

§ 148.285 Reporter; transcript; corrections.

(a) The reporter for a formal hearing is arranged for by the clerk. The reporter prepares a verbatim transcript of the hearing under the supervision of the administrative law judge. Nothing may be deleted from the transcript unless ordered by the administrative law judge and noted in the transcript.

(b) After a formal hearing is completed, the administrative law judge certifies and forwards the transcript to the clerk for docketing.

(c) At any time within 20 days after the transcript is docketed, the administrative law judge may make corrections to the certified transcript. Corrections when filed are attached to the transcript

V 40 I 217 NOV 10 75 XUM

as appendices. Any motion to correct the transcript must be submitted within ten days after the transcript is docketed.

§ 148.287 Order of procedure.

The administrative law judge determines the order of procedure for each formal hearing.

§ 148.289 Evidence.

A party may present evidence and conduct cross-examination of witnesses at a formal hearing. Other persons may present evidence that they have been authorized to present under § 148.265.

§ 148.291 Rulings referred or appealed to the Commandant.

(a) The Commandant reviews each ruling referred or appealed to him under this subpart and issues a ruling and any appropriate order. Unless otherwise ordered by the Commandant or the administrative law judge, review of a ruling does not stay a formal hearing or extend a time period prescribed by this subpart.

(b) If the administrative law judge refers a ruling to the Commandant, he gives notice to the parties of the referral.

APPLICATION APPROVAL OR DENIAL

§ 148.321 Decision process generally.

(a) During the 45-day period immediately following the completion of the final public hearing on a proposed deepwater port license for a designated application area, opportunity is provided for the various Federal departments and agencies having expertise concerning, or jurisdiction over, any aspect of ownership, construction, or operation of deepwater ports or having a duty under the Act with respect thereto and the Governor of each adjacent coastal State to formulate and transmit to the Secretary their determinations, recommendations, opinions and approvals or disapprovals, as the case may be.

(b) Within 45 days after the expiration of the 45-day period described in paragraph (a) of this section, the Secretary approves or denies each application for a deepwater port license in the designated application area.

§ 148.323 Criteria and considerations.

(a) The Secretary approves an application only after he determines that:

(1) The applicant is financially responsible and will carry insurance or give evidence of other financial responsibility in the amount of $50,000,000 to cover the clean-up costs and damages that could result from a discharge of oil from the deepwater port concerned or from a vessel moored at the deepwater port;

(2) The applicant can and will comply with applicable laws, regulations, and license conditions;

(3) The construction and operation of the deepwater port will be in the national interest and consistent with national security and other national policy goals and objectives, including energy sufficiency and environmental quality;

(4) The deepwater port will not unreasonably interfere with international navigation or other reasonable uses of the high seas, as defined by treaty, convention, or customary international law;

(5) In accordance with the environmental review criteria set forth in Appendix A to this part, that the applicant has demonstrated that the deepwater port will be constructed and operated using the best available technology, so as to prevent or minimize adverse impact on the marine environment; and

(6) The adjacent coastal State to which the deepwater port concerned is to be connected by pipeline, has developed, or is making, at the time the application was submitted, reasonable progress toward developing an approved coastal zone management program pursuant to the Coastal Zone Management Act of 1972 in the area to be directly and primarily impacted by land and water development in the coastal zone resulting from the deepwater port or is receiving a planning grant under section 305 of the Coastal Zone Management Act.

(b) In deciding whether to approve or deny an application and in making the related preliminary determinations specified in paragraph (a) of this section, the Secretary considers:

(1) The information set forth in the application concerned and any other applications for licenses for the same application area submitted in accordance with section 5(d)(3) of the Act;

(2) The information developed during hearings held pursuant to §§ 148.231 through 148.291;

(3) the final environmental impact statement for the application area concerned;

(4) The views of the Secretary of the Army, the Secretary of State, and the Secretary of Defense on the adequacy of the application and its effects on programs within their respective jurisdictions;

(5) The views and recommendations of the heads of any other Federal departments or agencies having expertise concerning, or jurisdiction over, any aspect of the ownership, construction or operation of deepwater ports; and

(6) The opinions of the Federal Trade Commission and the Attorney General as to whether issuance of the license would adversely affect competition, restrain trade, promote monopolization or otherwise create a situation in contravention of the antitrust laws.

(c) The Secretary does not approve an application if, within the 45-day period immediately following the completion of the final public hearing:

(1) The Administrator of the Environmental Protection Agency determines that the proposed deepwater port will not conform with all applicable provisions of the Clean Air Act, as amended, the Federal Water Pollution Control Act, as amended, or the Marine Protection, Research and Sanctuaries Act, as amended; or

(2) The Governor of an adjacent coastal State disapproves the issuance of the license.

§ 148.325 Multiple applications.

(a) Except as provided in paragraph (b) of this section, in the case of more than one application for a deepwater port license in a designated application area, only one application may be approved according to the following order of priorities:

(1) An applicant that is an adjacent coastal State (or combination of States), any political subdivision thereof or agency or instrumentality, including a wholly owned corporation thereof.

(2) An applicant who is not:

(i) Engaged in producing, refining, or marketing oil;

(ii) An affiliate of any person who is engaged in producing, refining or marketing oil; or

(iii) An affiliate of such an affiliate.

(3) Any other applicant.

(b) Notwithstanding the order of priorities listed in paragraph (a) of this section, if the Secretary determines that one of the proposed deepwater ports will clearly best serve the national interest, he may approve the application for that port. In making this determination, the Secretary considers:

(1) The degree to which the proposed deepwater ports affect the environment as determined under the review criteria set forth in Appendix A to this Part;

(2) Any significant differences between anticipated completion dates for the proposed deepwater ports; and

(3) Any differences in costs of construction and operation of the proposed deepwater ports to the extent that such differential may significantly affect the ultimate cost of oil to the consumer.

§ 148.327 Termination of proceeding before approval or denial of an application.

The Commandant terminates a proceeding if:

(a) All applications are withdrawn before the decision approving or denying them is issued; or

(b) In a proceeding with one application that does not have all of the information required by Subpart B of this Part, the applicant after inquiry by the application staff does not provide adequate assurance that further information to make the application is forthcoming.

Subpart D—Issuance of a License

§ 148.400 Applicability.

This subpart prescribes rules that apply to the issuance of a license under the Act.

§ 148.403 Issuance of a license.

If an application under the Act is approved, a license is issued containing the following:

(a) The name and number or identification of the port.

(b) The name of the owner and operator of the port.

(c) Conditions to the ownership, construction, and operation of the deepwater port issued under section 4(e) of the Act.

§ 148.405 Term of license.

Each license is issued for a term of 20 years, unless a shorter period is requested in the application.

§ 148.407 Consultation with adjacent coastal States.

(a) The Governor of an adjacent coastal State may consult with the application staff concerning license conditions that the application staff may have under consideration.

(b) If the Governor of an adjacent coastal State notifies the Secretary that an application, which would otherwise be approved in a proceeding, is inconsistent with State programs relating to environmental protection, land and water use, or coastal zone management, the notification should include a description of:

(1) The State's environmental protection, land or water use, or coastal zone management program with which the application is inconsistent and how the application is inconsistent; and

(2) Conditions that if imposed on the license would make it consistent with the State program.

Subpart E—Site Evaluation [Reserved]

Subpart F—Procedure for Exemption From Any Requirement in Deepwater Port Regulations

§ 148.601 Applicability.

This subpart sets forth the procedures governing exemptions from any requirement in Parts 148, 149 and 150.

§ 148.603 Petition for exemption.

(a) Any person required to comply with any specific requirements in Parts 148, 149 and 150 may submit a petition to the Commandant for an exemption.

(b) A petition for exemption must be submitted in writing. It may be in any form, but it must be specific and it must contain all data necessary to evaluate its merits.

§ 148.605 Coordination with states.

A petition for exemption under this subchapter that appears to involve the interests of an adjacent coastal State will be referred to the Governor of that State for consideration and recommendation.

§ 148.607 Exemption criteria.

The Commandant grants an exemption if he determines that:

(a) Compliance with the regulations would be contrary to the public interest;

(b) Compliance would not enhance safety or the environment;

(c) Compliance is not practical because of local conditions or because the materials or personnel needed for compliance are unavailable;

(d) National defense or national economy justify a departure from the rules; or

(e) The alternative proposed in the petition would:

(1) Ensure comparable or greater safety; environmental protection; and quality of construction, maintenance and operation of a deepwater port; and

(2) Would be consistent with recognized principles of international law.

APPENDIX A: ENVIRONMENTAL REVIEW

CRITERIA FOR DEEPWATER PORTS

I *Authority.* The Deepwater Port Act of 1974, Pub. L. 93-627 (33 USC 1501 et seq.), authorizes the Secretary of Transportation to issue, transfer, amend, or renew a license for the ownership, construction, and operation of a deepwater port. Section 6 of the Act requires the Secretary to establish environmental review criteria which shall be used to evaluate a deepwater port as proposed in an application for a license. By amendment of Part 1 of Title 49, Code of Federal Regulations (49 CFR 1.46(t)), dated April 25, 1975, the Secretary delegated to the Commandant of the Coast Guard the responsibility to establish such criteria (40 FR 20088-20089).

Section 6 of the Act reads as follows:

Sec. 6. (a) The Secretary, in accordance with the recommendations of the Administrator of the Environmental Protection Agency and the Administrator of the National Oceanic and Atmospheric Administration and after consultation with any other Federal departments and agencies having jurisdiction over any aspect of the construction or operation of a deepwater port, shall establish, as soon as practicable after the date of enactment of this Act, environmental review criteria consistent with the National Environmental Policy Act. Such criteria shall be used to evaluate a deepwater port as proposed in an application, including—

(1) the effect on the marine environment;

(2) the effect on oceanographic currents and wave patterns;

(3) the effect on alternate uses of the oceans and navigable waters, such as scientific study, fishing, and exploitation of other living and nonliving resources;

(4) the potential dangers to a deepwater port from waves, winds, weather, and geological conditions, and the steps which can be taken to protect against or minimize such dangers;

(5) effects of land-based developments related to deepwater port development;

(6) the effect on human health and welfare; and

(7) such other considerations as the Secretary deems necessary or appropriate.

(b) The Secretary shall periodically review and, whenever necessary, revise in the same manner as originally developed, criteria established pursuant to subsection (a) of this section.

(c) Criteria established pursuant to this section shall be developed concurrently with the regulations in section 5(a) of this Act and in accordance with the provisions of that subsection.

II *Purpose.* A. Environmental review criteria shall be used to evaluate a deepwater port as proposed in an application for a license to own, construct and operate a deepwater port. The criteria shall be consistent with the National Environmental Policy Act, Pub. L. 91-190 (42 USC 4321 et seq.), which declares a national environmental policy. The Secretary of Transportation may issue a license in accordance with the provisions of the Act if, among other things, he determines:

—that the construction and operation of the deepwater port will be in the national interest and consistent with national security and other national policy goals and objectives, including energy sufficiency and environmental quality; and

—in accordance with the environmental review criteria established pursuant to section 6 of the Act, that the applicant has demonstrated that the deepwater port will be constructed and operated using the best available technology to prevent or minimize adverse impact on the environment. (§§ 4(c)(3) & (5) of the Act.)

These criteria are therefore intended to be used to evaluate the environmental soundness of a proposed deepwater port and to serve as basic guidelines for determining what environmental impacts could result from deepwater port development and the procedures and technology which can be used to prevent or minimize adverse impacts.

B. In accordance with section 5(f) of the Act, these criteria shall also be considered in the preparation of a single, detailed environmental impact statement for all timely applications covering a single application area. Additionally, section 5(i)(3) of the Act specifies that, in the event more than one application is submitted for an application area, the criteria shall be used, among other factors, in determining whether any one proposed deepwater port clearly best serves the national interest.

III. *Environmental review criteria.* The environmental review of a proposed deepwater port consists of two parts. The *first* part involves assessment of the probable negative and positive environmental impacts which will result from construction and operation of the port. The *second* part appraises the effort made by the applicant to prevent or minimize adverse environmental effects. Guidelines for such an effort are set forth and will be closely considered in the review.

The overall intent of this review is to arrive at a comprehensive evaluation of the significance of the discrete and cumulative environmental impacts, adverse and beneficial, of the project as proposed and to determine whether or not the applicant has demonstrated that the deepwater port will be constructed and operated using the best available technology, so as to prevent or minimize adverse impact on the marine environment.

A. The proposed deepwater port will be evaluated to assess the magnitude and importance of its probable negative and positive environmental impacts. This review will include comparison with reasonable alternative actions, such as: the no-action case (alternative transportation schemes for imported oil); alternative sites, designs, and systems; and other deepwater ports. The information necessary for such an evaluation will be provided by the Federal Environmental Impact Statement and other sources as necessary. A picture of the relative net environmental impact of the proposed project should be obtained. Also, identification of actions which might be taken with respect to procedures and technology to prevent or minimize probable adverse effects will be made. The following are the primary areas of concern:

1. *The Effect on the Marine Environment:* (NOTE: The term "marine environment" includes the navigable waters (including the lands therein and thereunder) and the adjacent shorelines (including the waters therein and thereunder); transitional and intertidal areas, bays, lagoons, salt marshes, estuaries, beaches, waters of the contiguous zone, waters of the high seas; the fish, wildlife and other living resources thereof; and the recreational and scenic values of such lands, waters and resources.)

a. The potential effects of surface and bottom disturbances and increased turbidity both directly on ecological habitats and on the life stages of biological populations and indirectly on such habitats and populations through modifications of the physical, geological, and/or chemical environment.

b. The potential effects of pollutants, especially oil, on ecological habitats and the life stages of biota.

c. The potential effects on threatened or endangered species and on ecosystems.

2. *The Effect on Oceanographic Currents and Wave Patterns:*

a. The potential primary effects of construction and operation on,

i. surface, midwater and bottom currents,

ii. waves,

iii. tides and tidal currents, especially in constricted coastal areas and estuaries,

iv. ice;

V 40 0217 NOV 10 75 XUM

b. The potential secondary impacts of changes to current and wave patterns on sand and sediment transport, turbidity, beach processes, salinity and sedimentation rates resulting from changes to current, wave and tide patterns; and, the resulting impacts on biological systems, on shorelines and beaches, and on their alternate uses.

3. *The Effects on Alternate Uses of the Oceans and Navigable Waters:*

a. Scientific study;
b. Fishing (commercial and recreational);
c. Exploitation of other living and nonliving resources;
d. Sanctuary maintenance;
e. Recreation;
f. Approved costal zone management plans;
g. Power generation;
h. Transportation;
i. Other commercial, industrial or public uses and the national defense.

4. *The Potential Environmental Dangers to a Deepwater Port;*

a. From waves, winds, weather, and geological conditions;

b. The steps which can be taken to minimize such dangers with respect to,

i. siting,
ii. design,
iii. construction,
iv. operations and procedures.

5. *The Effects of Land-Based Developments Related to Deepwater Port Development on:*

a. Stream and river flow, ground and surface water quality and supplies;
b. Marine water quality;
c. Air quality;
d. Alternate land and water uses,
i. wetlands,
ii. habitats,
iii. nurseries,
iv. recreation,
v. wilderness, preserves, and wild and scenic rivers,
vi. existing and proposed sanctuaries,
vii. historical and cultural areas,
viii. open and green space,
ix. agricultural and grazing,
x. residential and commercial,
xi. industrial,
xii. transportation,
xiii. power generation and transmission,
xiv. others.

6. *The Effect on Human Health and Welfare:*

a. Health—

i. the physiological effects of reduced or altered air and water quality or supply, of altered or increased noise levels or quality, of altered community density, etc., and the psychological effects of the above;

ii. the risk of human safety and life posed by a proposed project.

b. Welfare—the ultimate effects of dynamic economic and social change inflicted directly or induced upon the relevant communities, including but not limited to the projected changes in employment, population density, housing and public services, and tax base.

B. In this second part, the proposed project will be appraised for the effort made to prevent or minimize the probable adverse impacts on the environment. This appraisal is primarily concerned with the project as proposed and alternatives are relevant only insofar as they may represent a spectrum of possible actions against which the proposal will be judged. Areas of concern are: siting, design, construction, and operation; and, land use and coastal zone management. Specifically, the review will consider the degree of adherence to the following guidelines.

1. *Siting*—A proposed deepwater port should be sited in an optimum location in order to prevent or minimize possibly detrimental environmental effects. For example:

a. The deepwater port and all its components, including receiving terminals, inline transportation facilities and stations, ancillary and service facilities, and pipeline, should occupy the minimum space necessary for safe and efficient operation and should be located, as much as possible, in areas in which permanent alteration of wetlands is not necessary. Buffer zones should be provided to separate onshore facilities from incompatible adjacent land uses.

b. The deepwater port facility and its offshore components should be located in areas which have stable sea-bottom characteristics and, its onshore components should be located in areas in which a stable foundation can be developed and flood protection levees, if appropriate, can be constructed.

c. The deepwater port facility should be located in an area where existing offshore structures and activities will not interfere with its safe operation, and where the facility or navigation to and from that facility, will not interfere with the safe operation of existing offshore structures. Water depths and currents in and around the deepwater port and its approaches should pose no undue hazard to safe navigation. Extensive dredging or removal of natural obstacles such as reefs, should be avoided. The siting procedure should select an area where projected weather, wave conditions, and seismic activity minimize the probability that damage will occur to the deepwater port, tankers, pipeline, and component shoreside facilities from storms, earthquakes, or other natural hazards.

d. Selection of sites should maximize the permitted use of existing work areas, facilities and access routes for construction and operations activities. Where temporary work areas, facilities, or access routes must be used, they should be to the fullest extent possible, designed and constructed in such a manner to permit restoration to the preconstruction environmental conditions or better.

e. The deepwater port facility, navigational fairway(s) and pipelines should be sited where the interactions of facilities' requirements and natural environment are optimized to prevent adverse impacts or to produce minimal, acceptably low adverse effects. Key factors in assessments should include (but not necessarily be limited to) projected winds, waves, current, spill size and frequency, cleanup capability, shoreline/estuarine/bay sensitivity; biological resources, damage potential and recovery rate; facility design; and project economics.

f. The deepwater port, pipeline, and attendant facilities should be located as far as practicable from the vicinity of critical habitats for biota, including but not limited to commercial and sports fisheries and threatened and endangered species.

g. Sites should reflect negligible displacement of existing or potentially important uses such as the following:

i. fisheries,
ii. recreation,
iii. mining,
iv. oil and gas production,
v. transportation.

h. Siting should favor areas already allocated for similar use and the implications of density of such uses.

i. port facilities—existing tanker and barge traffic—existing ports which can be used for service vessels.

ii. pipelines—use of existing corridors.

iii. secondary facilities—use of (or expansion of) existing storage, refinery, and other support facilities.

iv. construction facilities—use of existing equipment and personnel staging yards.

i. The deepwater port, pipelines and other offshore facilities should be sited so as to not permanently interfere with the natural littoral process or to alter significantly any tidal pass or other part of the physical environment important to natural currents and wave patterns.

j. Pipelines, or other deepwater port components or facilities requiring dredging, should not be located where sediments with high levels of heavy metals, biocides, oil, or other pollutants or hazardous materials exist.

2. *Design, Construction and Operation*—Selection of design and procedures for construction and operation of a deepwater port must reflect use of best available technology. For example:

a. All oil transfer, transportation, and storage facilities, systems and equipment should include appropriate safeguards and backup systems and/or be operated under procedures to minimize both the possibility of pollution incidents resulting from personnel and equipment failures, natural calamities and casualties, such as tanker collisions or groundings, and the adverse effects of those pollution incidents which occur. These facilities, systems, and equipment, should be designed to permit safe operation, including appropriate safety margins, under maximum operating loads and the most adverse operating conditions to which each may be subjected.

b. All facilities should be provided with a safe, environmentally sound method for the collection, storage, and disposal of solid and liquid wastes generated by such facilities. When prescribed by law or regulation, the deepwater port may be required to be fitted with additional facilities for the collection and treatment of ship-generated liquid and solid wastes, such as oily bilge and oily ballast water, tank cleaning residues, sludge wastes, and sewage and garbage.

c. The proposed project should be designed, constructed and operated so as not to interfere permanently with natural littoral processes or other significant aspects of currents and wave patterns. Additionally, harmful erosion or accretion, both onshore and offshore, should be prevented. Groundwater drawdown or saltwater intrusion should not be permitted. Moreover, mixing of salt, brackish, and fresh waters should be minimized. Designs should not include factors which will disrupt natural sheetflow, water flow, and drainage patterns or systems.

d. The proposed project should not interfere with biotic populations. Potential effects on breeding habitats or migration routes should receive particular attention.

e. The proposed project should be designed, constructed and operated so as to make maximum feasible use of already existing local facilities such as roads, pipelines, docking facilities and communications facilities.

f. Disposal of spoil and refuse material should be effected only at disposal sites specifically selected and approved by competent authorities. Whenever and wherever possible, the proposal should provide for resource recovery, reclamation of affected areas, or enhancing uses of spoil and waste.

g. Personnel trained in oil spill prevention should be present at critical points at the deepwater port (as identified in the accident analysis). Personnel should also be trained in oil spill control to mitigate the effects of any spill which may occur.

3. *Land Use and Coastal Zone Management*—A deepwater port should not conflict with existing or planned land use including management of the coastal region. A measure of whether or not conflict exists will be made by the following means:

a. The proposed project should adhere closely to approved master plans or other plans of competent local or State authorities in designated adjacent coastal States or in other States where significant effects are likely to occur. A minimum of special exceptions or zoning variances should be required. Non-conforming uses should not be prolonged where reasonable alternatives are available.

b. The proposed project should conform with approved or planned coastal zone management programs of the relevant adjacent coastal States.

c. The proposed use of floodplains should not entail loss of wetlands nor should such use pose an undue risk of exposure of that use to flood damage, increase the potential need for Federal expenditures for flood protection or flood disaster relief, decrease the unique public value of the floodplain as an environmental resource, or provide an incentive for other uses of the floodplains having similar ultimate results.

(d) The use of or effect on wetlands should be considered in the following manner,

i. uses permanently altering or adversely affecting wetlands are to be avoided, or

ii. positive action must be taken to minimize adverse effects on wetlands.

ANNEX A

1. The following environmental criteria are expressly referred to in the Deepwater Port Act of 1974:

a. Compliance with the Clean Air Act (4(c)(6)).

b. Compliance with the Federal Water Pollution Control Act (4(c)(6)).

c. Compliance with the Marine Protection, Research and Sanctuaries Act (4(c)(6)).

d. Effect on the marine environment (6(a)(1)).

e. Effect on oceanographic currents and wave patterns (6(a)(2)).

f. Effect on alternate uses of the oceans and navigable water, such as scientific study, fishing, and exploitation of other living and nonliving resources (6(a)(3)).

g. The potential dangers to a deepwater port from waves, wind, weather and geological conditions, and the steps which can be taken to protect against or minimize such dangers (6(a)(4)).

h. Effects of land-based developments related to deepwater port development (6(a)(5)).

i. Effect on human health and welfare (6(a)(6)).

j. Consistency with adjacent coastal States' programs relating to environmental protection, land and water use, and coastal zone management (9(b)).

k. Development of an approved coastal zone management program pursuant to the Coastal Zone Management Act of 1972 in the area to be directly and primarily impacted by deepwater port land and water development in the coastal zone of that State directly connected by pipeline to the proposed deepwater port (9(c)).

l. Pursuant to section 102(c)(2) of the National Environmental Policy Act, prepare a single, detailed environmental impact statement for each application area (5(f)).

PART 149—DESIGN, CONSTRUCTION, AND EQUIPMENT

Subpart A—General

Sec.
149.101 Purpose.
149.105 Licensee.

Subpart B—Design and Equipment; General

149.201 Applicability.
149.203 Engineering drawings and specifications.
149.205 Design standards.
149.206 Construction.
149.209 SPM's.
149.211 Emergency equipment.
149.213 Helicopter fueling facilities.
149.215 Interference with helicopter operations.
149.217 First aid station.

Subpart C—Pollution Prevention Equipment

149.301 Applicability.
149.303 Overflow and relief valve.
149.305 Pipeline end manifold (PLEM) shutoff valve.
149.307 Blank flange and shutoff valve.
149.309 Manually operated shutoff valve.
149.311 Malfunction detection system.
149.313 Oil transfer system alarm.
149.315 Marking of oil transfer system alarm.
149.317 Communications equipment.
149.319 Discharge containment and removal material, and equipment.
149.321 Special requirement for onloading ports.

Subpart D—Safety Equipment

149.401 Applicability.
149.402 Equipment not required on a PPC.

CURBS, GUTTERS, DRAINS, AND RESERVOIRS

149.403 Curbs, gutters, drains, and reservoirs.

EMERGENCY POWER

149.411 Emergency power.

MEANS OF ESCAPE

149.421 Means of escape from platform.
149.423 Means of escape from helicopter landing pad.

PERSONNEL LANDINGS

149.431 Personnel landings.
149.433 Personnel landing illumination.

GUARD RAILS, FENCES, NETS, AND TOEBOARDS

149.441 Open sided deck, deck opening, catwalk, and helicopter pad protection.

FIXED FIRE MAIN SYSTEM FOR WATER

149.451 Fixed fire main system for water.
149.453 Fire pumps.
149.455 Fire pump location.
149.457 Fire hydrants.
149.459 Fire hydrant outlet.
149.461 Fire hydrant and control valve shutoff valve.
149.463 Fire hydrant access.
149.465 Spanner.
149.467 Fire hose rack.
149.469 Fire hose size.
149.471 Fire hose coupling.
149.473 Fire hose nozzle.
149.477 Spray applicator.
149.479 International shore connection.

OTHER FIRE EXTINGUISHING SYSTEMS

149.481 Other fire extinguishing systems.
149.483 Fire fighting system for helicopter pads.

FIRE DETECTION AND ALARM SYSTEMS

149.491 Fire detection and alarm systems.

PORTABLE AND SEMIPORTABLE FIRE FIGHTING EQUIPMENT

149.501 Portable and semiportable fire extinguishers.
149.503 Location of extinguishers.
149.505 Spare charges.
149.507 Marking.
149.511 Landing areas with no fueling facility.
149.513 Landing area with a fueling facility.
159.515 Fire axes.
149.517 Fireman's outfits.

LIFESAVING EQUIPMENT

149.521 Lifeboats and inflatable life rafts: general.
149.522 Lifeboats.
149.523 Inflatable life rafts.
149.524 Launching equipment for lifeboats.
149.525 Launching equipment for inflatable life rafts.
149.526 Type IV personal flotation devices (PFD's).
149.527 Portable radio apparatus.
149.529 Type I personal flotation devices (PFD's).
149.533 Litters.
149.535 Markings on lifeboats, life rafts, paddles, and oars.
149.537 Markings for personal flotation devices (PFD's).

MISCELLANEOUS

149.539 Portable lights.
149.541 General alarm system.
149.543 Marking of general alarm system.
149.545 Public address system.

Subpart E—Aids to Navigation at Deepwater Ports

GENERAL

149.701 Applicability.
149.703 Effective intensity: definition.
149.705 Applicability of other regulations.
149.707 Applications for aids to navigation.

SPECIFICATIONS FOR LIGHTS

149.721 Light source.
149.723 Intensity.
149.724 Focus.
149.725 Color.
149.727 Chromaticity.
149.729 Display of information.

OBSTRUCTION LIGHTS

149.751 Number and location on a platform and SPM.
149.753 Number and location on a floating hose string.
149.755 Characteristics.
149.757 Intensity.
149.759 Leveling.

BUOYS

149.771 Number and location.
149.773 Characteristics.
149.775 Intensity of lights.

MISCELLANEOUS

149.791 Identification of a platform and SPM.
149.793 Markings for piles and pile clusters.
149.795 Radar beacon.
149.797 Rotating lighted beacon.
149.799 Fog signal.

AUTHORITY: Secs. 10(a), 10(b), Pub. L. 93-627, 88 Stat. 2137-8 (33 U.S.C. 1509(a), (b)); 49 CFR 1.46(a).

Subpart A—General

§ 149.101 Purpose.

This part describes design, construction, and equipment requirements for each deepwater port.

§ 149.105 Licensee.

The licensee of a deepwater port shall ensure that the port meets the design and construction requirements in this part.

Subpart B—Design and Equipment; General

§ 149.201 Applicability.

This subpart prescribes requirements for design and equipment that apply to each deepwater port.

§ 149.203 Engineering drawings and specifications.

(a) The licensee of a deepwater port must submit to the Commandant (G-W) three copies of each construction drawing and specification necessary to show compliance with the requirements of the

V 40 N 217 NOV 10 75 XUM

Act and the regulations in this subchapter, a list of all drawings, and each revision to a construction drawing and specification of each:

(1) Fixed marine component; and

(2) Floating marine component.

(b) Each construction drawing and specification, and each revision required to be submitted by paragraph (a) of this section must bear the seal, or a facsimile imprint of the seal of the registered professional engineer responsible for the accuracy and adequacy thereof.

(c) The Coast Guard reviews and evaluates construction drawings and specifications to ensure compliance with the Act and Subchapter NN. The licensee of a deepwater port may not begin construction, or installation of prefabricated components, until the applicable drawings and specifications are approved by the Commandant (G–W). The Coast Guard makes periodic inspections at the construction site and at component construction sites to ensure compliance with approved drawings and specifications. As used in this paragraph, the term "approved" means that each drawing or specification meets the requirements of the Act and the regulations in this subchapter.

(d) When construction or installation of each component is complete, the licensee of a deepwater port must submit two complete sets of record drawings and specifications on 105 mm negatives to the Commandant (G–W). Each negative must be:

(1) Placed in a separate envelope, and

(2) Identified and indexed.

§ 149.205 Design standards.

(a) Each fixed marine and floating component of a deepwater port, except hoses, mooring lines, and aids to navigation buoys, must be designed to withstand at least the combined wind, wave, and current forces of the most severe storm that can be expected to occur in any period of 100 years at the port.

NOTE: "Recommended Procedure for Developing Deepwater Ports Design Criteria" describes a method to prepare the wind, wave, and current criteria for use in determining the forces of the storm described by this paragraph. This guide may be obtained from the Commandant (G–W).

(b) Each platform must be designed in accordance with the American Petroleum Institute "Recommended Practice for Planning, Designing, and Constructing Fixed Offshore Platforms" (API RP 2A) sixth edition, January 1975, and the codes and standards in API RP 2A, to the extent that the recommended practice, codes, and standards are consistent with this subchapter.

(c) Each electrical installation on a platform must be designed, to the extent practicable, in accordance with 46 CFR 110–113.

(d) Each boiler and pressure vessel on a platform must be designed in accordance with Sections I, IV, and VIII of the American Society of Mechanical Engineers "ASME Boiler and Pressure Vessel Code", 1974 edition, to the extent that the code is consistent with this subchapter.

(e) Main oil transfer piping on a platform must be designed in accordance with the American National Standards Institute (ANSI B 31.4) Liquid Petroleum Transportation Piping Systems.

§ 149.206 Construction.

(a) The following walls or decks on a platform must meet the requirements in 46 CFR 92.07–5(b) for "A" class bulkheads, except that each wall or deck must be made of steel:

(1) Each wall or deck that separates a galley, a paint and lamp locker, a space housing emergency power generating equipment, or a machinery space from any other space.

(2) Each wall or deck of an interior stairway connecting enclosed spaces on three or more decks.

(3) Each wall or deck of an elevator shaft, of a dumbwaiter shaft, and of any other shaft connecting two or more enclosed spaces.

(b) The following walls or decks on a platform must meet the requirements in 46 CFR 92.07–5 (b) or (c) for "A" or "B" class bulkheads:

(1) Each corridor wall or deck of a personal accommodation space.

(2) Each wall or deck of a stairway that connects two decks or each wall or deck of a structure enclosing an opening to the stairway.

(c) A platform wall or deck that is not described in paragraph (a) or (b) of this section must meet the requirements in 46 CFR 92.07–5(b), (c), or (d) for "A", "B", or "C" class bulkheads.

(d) Each deck and stairway on a platform must be made of steel and may have a deck covering.

(e) A space that is described in paragraphs (a)(2) or (a)(3) of this section must be enclosed by walls and decks.

(f) Each interior stairway that connects two enclosed spaces on a platform must be enclosed by walls and decks or an opening to the stairway must be enclosed by a structure.

(g) Each interior stairway that connects three or more decks on a platform must have access to each deck.

(h) Each opening in a wall or deck on a platform must have a closure that meets the requirements in this section for the wall or deck. Each door must:

(1) Be a self-closing type;

(2) Not have holdback hooks or other means of permanently holding the door open, except for magnetic holdbacks operated from a suitable remote control position; and

(3) Not have a louver or other opening, except that a door to a sleeping space may have a louver in the lower half of the door.

(i) Internal deck coverings, except those in washrooms and toilet spaces, must be of a type approved under 46 CFR Subpart 164.006. Overlays for leveling or finishing purposes which do not meet the requirements in 46 CFR Subpart 164.006 may be used in thicknesses not exceeding 3/8 of an inch.

(j) Each ceiling, sheathing, furring, and insulation on a platform, must be a noncombustible material of a type that is approved under 46 CFR 164.009.

(k) The interior finish on each wall and ceiling in a corridor or hidden space on a platform must be a type that is approved under 46 CFR 164.012. Walls within a room may have a combustible veneer not to exceed 1/28 inches in thickness.

(l) Nitrocellulose or other highly flammable or noxious fume-producing paints or lacquers may not be used.

§ 149.209 SPM's.

Each SPM must meet the "Rules for Building and Classing Single Point Moorings 1975" of the American Bureau of Shipping, to the extent that these Rules are consistent with this subchapter.

§ 149.211 Emergency equipment.

Each platform must have installed mountings for each item of:

(a) Lifesaving equipment; and

(b) Portable and semiportable fire fighting equipment.

§ 149.213 Helicopter fueling facilities.

Helicopter fueling facilities must comply with the requirements of the National Fire Protection Association, National Fire Code No. 407–1974, Part VI "Fueling on Elevated Heliports". For the purpose of this section, "ground level" as used in the National Fire Code means "below the lowest platform working level".

§ 149.215 Interference with helicopter operations.

Aids to navigation, communication, or radar equipment must be installed so as not to interfere with helicopter operations.

§ 149.217 First aid station.

Each PPC must have a first aid station that has an adjoining space for two beds.

Subpart C—Pollution Prevention Equipment

§ 149.301 Applicability.

This subpart prescribes requirements for pollution equipment that apply to each deepwater port.

§ 149.303 Overflow and relief valve.

(a) Each oil transfer system must include a relief valve, that, when activated, prevents pressure on any components of the OTS from exceeding maximum rated pressure.

(b) No oil transfer system overflow or relief valve may be installed so as to allow an oil discharge into the sea.

§ 149.305 Pipeline end manifold (PLEM) shutoff valve.

(a) Each pipeline end manifold (PLEM) at a single point mooring must have a shutoff valve.

(b) Each shutoff valve required by this section must be capable of operation from the Cargo Transfer Supervisor's normal place of duty.

(c) Each shutoff valve required by this section must be capable of manual operation.

§ 149.307 Blank flange and shutoff valve.

Each floating hose string must have a blank flange and a shutoff valve at the vessel manifold end.

§ 149.309 Manually operated shutoff valve.

Each oil transfer line passing through the SPM buoy must have a manual shutoff valve on the buoy.

§ 149.311 Malfunction detection system.

Each oil transfer system must have a system that can—

(a) Detect and locate all leaks and other malfunctions, between the PPC and the shore; and

(b) Be monitored at the Cargo Transfer Supervisor's normal place of duty.

§ 149.313 Oil transfer system alarm.

Each oil transfer system must have an alarm system to signal a malfunction or failure of the system that is—

(a) Capable of being activated at the Cargo Transfer Supervisor's normal place of duty;

(b) Audible in all parts of the PPC except in areas of high ambient noise levels where hearing protection is required under § 150.509(d) of this subchapter;

(c) Visible in areas of the PPC where hearing protection is required under § 150.509(d) of this subchapter by use of a high intensity flashing light; and

(d) Distinguishable from the general alarm.

§ 149.315 Marking of oil transfer system alarm.

(a) Each oil transfer alarm switch must be identified by the words "OIL TRANSFER ALARM" in red letters at least one inch high on a yellow background.

(b) Each audio and each visual oil transfer alarm signalling device under § 149.313 must have a sign with the words "OIL TRANSFER ALARM" in red letters at least one inch high on a yellow background.

§ 149.317 Communications equipment.

(a) Each deepwater port must have:

(1) A means that enables two-way voice communication among:

(i) The Cargo Transfer Supervisor;

(ii) The vessel's officer in charge of cargo transfer;

(iii) The Cargo Transfer Assistant;

(iv) The Port Superintendent;

(v) The master or person in charge of service craft operating at the deepwater port; and

(vi) The person in charge on the PPC;

(2) A means, which may be the communications system itself, that enables each of the persons listed in paragraph (a)(1) of this section to indicate his desire to communicate with another of those persons; and

(3) Communications equipment and facilities that must meet the requirements of 47 CFR 81 and 83.

(b) Each portable means of communication used to meet the requirements of this section must be:

(1) Certified under 46 CFR 111.80–5 to be operated in a Group D, Class 1, Division 1, Atmosphere; and

(2) Permanently marked with the certification required in paragraph (b)(1) of this section.

§ 149.319 Discharge containment and removal material, and equipment.

(a) Each deepwater port must have stored, on the pumping platform or a service craft operating at the deepwater port, oil discharge containment and removal material and equipment that, to the extent best available technology allows, can contain and remove an oil discharge of at least 10,000 U.S. gallons for offload-only ports, or 40,000 U.S. gallons for ports where onloading operations are permitted pursuant to section 4(a)(3) of the Act.

(b) Each deepwater port must have readily accessible additional containment and removal material and equipment for containing and removing oil discharges larger than those specified in paragraph (a) of this section. For the purpose of this paragraph, access may be by direct ownership, joint ownership, cooperative venture, or contractual agreement.

(c) The type of discharge containment and removal material and equipment that best meets the requirements of paragraphs (a) and (b) of this section must be determined on the basis of:

(1) Oil handling rates of the deepwater port;

(2) Volume of oil susceptible to being spilled;

(3) Frequency of oil transfer operations at the deepwater port;

(4) Prevailing wind and sea state condition at the deepwater port;

(5) Age, capability, arrangement of, and the licensee's experience with the oil transfer system equipment at the deepwater port; and

(6) Whether the discharge containment and removal material and equipment is shared, and the expected frequency of use and proability of availability.

§ 149.321 Special requirement for onloading ports.

Each deepwater port at which onloading operations are permitted, under section 4(a)(3) of the Act, must have a means for receiving oily residues from vessels.

Subpart D—Safety Equipment

§ 149.401 Applicability.

This subpart prescribes requirements for safety equipment that apply to each deepwater port.

§ 149.402 Equipment not required on a PPC.

Each item of lifesaving and fire fighting equipment on a PPC that is not required by this subpart must be approved under 46 CFR, Part 160 or Part 162.

CURBS, GUTTERS, DRAINS, AND RESERVOIRS

§ 149.403 Curbs, gutters, drains, and reservoirs.

Each platform must have enough curbs, gutters, drains, and reservoirs to collect all of the following discharges and wastes in the reservoirs:

(a) All discharges from equipment, maintenance shops, and refueling facilities.

(b) All laboratory, sanitary, galley, and deck cleansing wastes, and similar wastes. Sanitary waste includes the waste from baths, showers, sinks, wash bowls, laundry, toilets and urinals.

EMERGENCY POWER

§ 149.411 Emergency power.

(a) Each PPC must have emergency power equipment to provide power to operate all of the following simultaneously for a continuous period of eight hours:

(1) Emergency lighting circuits.

(2) Aids to navigation equipment.

(3) Communications equipment.

(4) Radar equipment.

(5) Alarm systems.

(6) Electrically operated fire pumps.

(7) Other electrical equipment designated in the Operations Manual by the licensee.

(b) No emergency power generating equipment may be located in any enclosed space on a platform that contains oil transfer pumping equipment or other power generating equipment.

MEANS OF ESCAPE

§ 149.421 Means of escape from platform.

(a) Each platform must have at least one fixed and one unfixed means of escape from the highest working level to the water level with an entry at each working level.

(b) Each platform with living spaces must have at least two fixed means of escape from the highest level with living spaces to the water with an entry at each level below. If the highest level of the PPC contains living spaces, the two fixed means of escape required by this paragraph satisfy the requirements in paragraph (a) of this section.

(c) Each platform must have at least one fixed or unfixed means of escape for every ten persons on board the platform, including the means of escape required under paragraphs (a) and (b) of this section.

(d) When two or more fixed means of escape are installed, at least two must be as far from each other as practicable.

(e) Each fixed means of escape required under this section must be a steel ladder or steel stairway.

V 40 217 NOV 10 75 XUM

(f) Each unfixed means of escape required under this section must be:
(1) A portable ladder;
(2) A flexible ladder; or
(3) A knotted man rope.
(g) Two exits must be provided from each space having over 300 square feet of floor area. Where practicable, the exits must give egress to different corridors, rooms, or spaces.
(h) Exits must provide egress to the external means of escape required in this section. Dead end corridors may not be longer than 40 feet.

§ 149.423 Means of escape from helicopter landing pad.

Each helicopter landing pad on the PPC must have at least two fixed means of escape that are independent of those required by § 149.421:
(a) From the pad to the first working level below the pad or the water; and
(b) As far from each other as practicable.

PERSONNEL LANDINGS

§ 149.431 Personnel landings.

Each PPC must have at least two personnel landings for access to the platform from the water unless:
(a) Personnel landings are not possible because of the PPC design; and
(b) The PPC has a personnel basket transfer system.

§ 149.433 Personnel landing illumination.

Each personnel landing must have at least 1 foot-candle of artificial illumination on its guard rails or fence and on its deck.

GUARD RAILS, FENCES, NETS, AND TOEBOARDS

§ 149.441 Open sided deck, deck opening, catwalk, and helicopter pad protection.

(a) Each open sided deck, deck opening, and catwalk on each PPC must have protection that meets the "Safety Requirements for Floor and Wall Openings, Railings, and Toeboards" of the American National Standards Institute (ANSI A12.1–1973), except each must have toeboards.
(b) Each open side of each helicopter landing pad on the PPC must have:
(1) Safety net; or
(2) A lowered walkway that is 48 inches wide, is not more than 42 inches below the level of the pad, and has guard rails that meet the requirements of ANSI A12.1–1973, except each must have toeboards.

FIXED FIRE MAIN SYSTEM FOR WATER

§ 149.451 Fixed fire main system for water.

Each PPC must have a fixed fire main system for water.

§ 149.453 Fire pumps.

(a) Each PPC must have at least two independently driven fire pumps that can deliver two streams of water at a continuous pitot tube pressure of at least 75 p.s.i. at each fire hose nozzle.
(b) Each fire pump must have:
(1) A relief valve on its discharge side that is set to relieve at 25 p.s.i. in excess of the pressure necessary to meet the requirement in paragraph (a) of this section;
(2) A pressure gauge on its discharge side; and
(3) Its own water source.
(c) Fire pumps may only be connected to the fire main system.

§ 149.455 Fire pump location.

The fire pumps required by § 149.453(a) may not be located in the same space.

§ 149.457 Fire hydrants.

(a) Each part of the PPC that is accessible to any person, except machinery spaces, must have enough fire hydrants so that it can be sprayed with at least two spray patterns of water. At least one spray pattern of water must be from one length of hose.
(b) Each PPC must have enough fire hydrants so that each machinery space can be sprayed with at least two spray patterns of water from separate hydrants. Each spray pattern of water must be from one length of hose.
(c) A single length of fire hose, with nozzle attached, must be connected to each fire hydrant at all times.

§ 149.459 Fire hydrant outlet.

The outlet on each fire hydrant must not point above the horizontal.

§ 149.461 Fire hydrant and control valve shutoff valve.

Each fire hydrant and control valve must have a shutoff valve.

§ 149.463 Fire hydrant access.

Any equipment that is in the same space as a fire hydrant must not interfere with access to that hydrant.

§ 149.465 Spanner.

Each fire hydrant must have at least one spanner at the fire hydrant.

§ 149.467 Fire hose rack.

(a) Each PPC must have a hose rack at each hydrant.
(b) Each fire hose rack must be visible.
(c) Each fire hose rack in an exposed location must be protected from weather.

§ 149.469 Fire hose size.

Each length of fire hose must be:
(a) 1½ or 2½ inch nominal hose size diameter;
(b) 50 foot nominal hose size length; and
(c) lined commercial fire hose that conforms to Underwriters Laboratories, Inc. Standard 19 or Federal specification ZZ–H–451D.

§ 149.471 Fire hose coupling.

Each fire hose coupling must:
(a) Be made of brass, bronze, or material that has strength and corrosion resistant properties at least equal to those of brass or bronze; and
(b) Have 9 threads per inch for 1½ inch hose or 7½ threads per inch for 2½ inch hose.

§ 149.473 Fire hose nozzle.

Each fire hose nozzle must be a combination solid stream and water spray fire hose nozzle that is approved under 46 CFR 162.027.

§ 149.477 Spray applicator.

Each PPC must have a low velocity spray applicator that is approved under 46 CFR 162.027 at each fire hydrant.

§ 149.479 International shore connection.

(a) The fixed fire main system of a PPC must have:
(1) At least two risers;
(2) A cutoff valve and check valve for each riser; and
(3) At least two international shore connections that meet the requirements in 46 CFR 162.034.
(b) Each riser must be in an accessible location to vessels alongside the PPC, and two of the risers must be on opposite sides of the PPC.

OTHER FIRE EXTINGUISHING SYSTEMS

§ 149.481 Other fire extinguishing systems.

(a) Each PPC must have a manually or automatically operated fire extinguishing system in addition to the fire main system required under § 149.451 that is approved by the Commandant and meets the National Fire Protection Association standards listed in paragraph (e) of this section in the following locations:
(1) Storerooms.
(2) Workrooms containing flammable liquids.
(3) Pump rooms.
(4) Machinery spaces.
(b) Each halogenated agent or CO_2 system in a compartment smaller than 6000 cubic feet, and each sprinkler system, must be automatic.
(c) Each halogenated agent or CO_2 system in a compartment larger than 6000 cubic feet, and each foam system, must be manual.
(d) The systems selected must match the hazard to be protected as follows:
(1) Storerooms must use water sprinklers or CO_2.
(2) Workrooms containing flammable liquids, pumprooms, and machinery spaces must use CO_2, halogenated agents, or high expansion foam.
(e) Each system required under paragraph (a) of this section must meet one of the following performance standards:
(1) Water sprinkler system—NFPA No. 13–1974.
(2) Carbon dioxide system—NFPA No. 12–1973.
(3) Halogenated agent system—NFPA No. 12A–1973.
(4) Foam system—NFPA No. 11A–1970.
(f) Arrangement requirements contained in 46 CFR 95.15–10, 15 and 20 must be complied with.
(g) Each system required under paragraph (a) of this section must activate the general alarm system when it operates.

(h) Spaces that are protected by a carbon dioxide system or halogenated agent system and are normally accessible to persons on board must be fitted with an approved audible alarm that sounds automatically 20 seconds before the extinguishing agent is admitted to the space. The alarm must be conspicuously and centrally located.
(i) To the extent practicable, materials in each item of equipment required by paragraph (a) of this section must have resistance to the adverse effects of the marine environment.

§ 149.483 Fire fighting system for helicopter pads.

(a) Each PPC helicopter landing pad must have the following:
(1) A fire extinguishing system designed to:
(i) Deliver a minimum of 200 g.p.m. of water at the pressure required to overcome friction in the piping and hose lines, and produce the nozzle discharge requirements in paragraph (a)(2)(ii) of this section for 15 minutes; and
(ii) Not interfere with the simultaneous operation of the fire main.
(2) Shutoff type nozzles designed:
(i) For use with a foam concentrate listed or approved by a recognized testing agency for fire extinguishing agents;
(ii) To discharge water-foam concentrate solution or water fog at a rate of 100 g.p.m. at a pressure that will provide a foam discharge pattern at a 20 foot range with 15 foot width variable to a solid stream of foam with a minimum 50 foot range; and
(iii) To produce foam having a minimum expansion of eight, with a 25 percent drainage time of at least 5 minutes when protein base foam is used.
(3) Nozzles located so as to provide complete coverage of the helicopter landing area.
(4) A means of activating the general alarm system required by § 149.541.
(b) Aqueous film forming foam (AFFF) may be substituted for protein base foam. Generally, the quantity of water may be reduced by 30 percent from that specified for use with protein base foam. This reduction will be authorized by the Commandant on a case by case basis.
(c) Other extinguishing agents that would provide an equivalent fire fighting capability may be substituted with the approval of the Commandant.

FIRE DETECTION AND ALARM SYSTEMS

§ 149.491 Fire detection and alarm systems.

(a) Each PPC must have the following fire detection systems that activate the general alarm system:
(1) An ionization type automatic smoke detection system in each sleeping space.
(2) A combination fixed-temperature and rate-of-rise heat detector system in each non-sleeping space that does not have an automatic fire extinguishing system unless the space is subject to a 15°F or greater per minute rate of rise.
(3) A fixed-temperature detector system in each nonsleeping space that does not have an automatic fire extinguishing system and that is subject to a 15°F or greater per minute rate of rise.
(b) To the extent practicable, materials in each item of equipment required by this section must have resistance to the adverse effects of the marine environment.

PORTABLE AND SEMIPORTABLE FIRE FIGHTING EQUIPMENT

§ 149.501 Portable and semiportable fire extinguishers.

(a) Each PPC must have portable or semiportable fire extinguishers that are approved by the Coast Guard under 46 CFR 162.028 or 162.039.
(b) Each semiportable fire extinguisher must be fitted with hose and nozzle or other apparatus so that the entire space in which the extinguisher is located may be protected.

§ 149.503 Location of extinguishers.

(a) Fire extinguishers must be installed in accordance with Table 145.10(a) in § 145.10 of this chapter.
(b) Each fire extinguisher must be located so it can easily be seen.

§ 149.505 Spare charges.

(a) Spare charges must be carried for at least 50 percent of each size and variety of hand portable fire extinguisher required in § 149.503. If an extinguisher is of such variety that it cannot be readily recharged by PPC personnel, one spare extinguisher of the same classification must be carried in lieu of a spare charge.
(b) Spare charges must be packed to minimize the hazards to personnel while recharging extinguishers. Acid must be contained in a crown stopper type of bottle.

§ 149.507 Marking.

Each hand portable extinguisher and its station must be numbered in accordance with 46 CFR 97.37–23.

§ 149.511 Landing area with no fueling facility.

In addition to the requirements in § 149.483 of this subchapter each helicopter landing area on a PPC with no fueling facility must have at least two USCG type B:C, size IV dry chemical extinguishers.

§ 149.513 Landing area with a fueling facility.

In addition to the requirements in § 149.483 of this subchapter each helicopter landing area on the PPC with a fueling facility must have:
(a) At least two USCG Type B:C, size II dry chemical extinguishers and at least one USCG Type B:C, size V dry chemical extinguisher; and
(b) A USCG Type B:C, size II dry chemical extinguisher at the emergency control station.

§ 149.515 Fire axes.

(a) Each PPC must have at least 8 fire axes.
(b) Fire axes must be distributed so as to be readily available in an emergency.
(c) Each fire axe must be located:
(1) In the open;
(2) Behind glass; or
(3) In an enclosure with a fire hose.

§ 149.517 Fireman's outfits.

(a) Each platform must have at least 2 fireman's outfits.
(b) Each fireman's outfit must consist of:
(1) A self contained breathing apparatus approved under 49 CFR 160.011 with a complete recharge.
(2) A three-cell, intrinsically safe flashlight with the Underwriters' Laboratories, Inc., label and a set of spare batteries for the flashlight.
(3) An oxygen and combustible gas indicator with the Underwriters' Laboratories, Inc., label, or Factory Mutual Testing Laboratories, Inc., label.
(4) Boots and gloves that are made of rubber or other electrically nonconductive material.
(5) A helmet that meets the requirements in Section 5 of the United States of America Standard Safety Code (Z2.1–1959).
(6) Clothing that protects the skin from scalding steam and the heat of fire and that has a water resistant outer surface.
(c) Equipment must be stowed in a convenient, readily accessible location.

LIFESAVING EQUIPMENT

§ 149.521 Lifeboats and inflatable life rafts: general.

(a) Each PPC must have enough lifeboats or inflatable life rafts, or a combination of both, for 200% of the maximum number of personnel to be quartered or employed on the PPC, except that each PPC must have at least two lifeboats. The Commandant may reduce this requirement to a minimum of 150% under § 148.607 when it can be shown that the specific arrangements and separation of equipment provides sufficient redundancy.
(b) Each lifeboat and launching equipment for an inflatable life raft on a platform must be mounted on the outboard side of the platform in a location that is easily accessible to persons on board and that is as far apart as practicable from each other lifeboat.
(c) No lifeboat and no launching equipment for an inflatable life raft may be mounted next to a discharge opening on a platform unless the opening has a baffle or a remotely controlled device to close the opening.
(d) Each lifeboat and life raft launching station must be provided with emergency lighting to illuminate the entire launching process from the stowed position until the craft is waterborne.

§ 149.522 Lifeboats.

(a) Each lifeboat on a platform must be approved under 46 CFR 160.035 and have the equipment required by 46 CFR 94.20–10 for a lifeboat on lakes, bays, sounds, and rivers. Except for boathooks, the equipment must be securely attached to the lifeboat.
(b) Each lifeboat on a platform must be motor propelled and have an installed

V 40 217 NOV 10 75 XUM

cover that provides protection from exposure and from fire during operation of the lifeboat.

§ 149.523 Inflatable life rafts.

Each inflatable life raft on a platform must be approved under 46 CFR 160.051 as an inflatable life raft intended for an ocean service vessel.

§ 149.524 Launching equipment for lifeboats.

(a) Each PPC must have the following launching equipment for each lifeboat required by § 149.521 of this subpart:

(1) A winch that is approved under 46 CFR 160.015 and that has a grooved drum with only one layer of wire.

(2) Mechanical disengaging apparatus that is approved under 46 CFR 160.033.

(3) Davits that are approved under 46 CFR 160.032.

(4) Load bearing components that meet the requirements in 46 CFR 94.33–5 (a), (c), (d), and (e) and 46 CFR 94.-33–10.

(b) If a lifeboat is mounted more than 30 feet above mean low water, the launching equipment for the lifeboat must be capable of operation from the lifeboat and from the PPC.

§ 149.525 Launching equipment for inflatable life rafts.

(a) Each PPC must have enough of the following inflatable life raft launching equipment to launch all of the life rafts required by § 149.521 within 20 minutes:

(1) Winches that are approved by the Commandant.

(2) Mechanical disengaging apparatus that is approved by the Commandant.

(3) Davits that are approved by the Commandant.

(4) Load bearing components that meet the requirements in 46 CFR 94.33–5 (a), (c), (d), and (e) and 46 CFR 94.-33–10.

(b) Launching equipment for an inflatable life raft must be capable of being operated from the life raft and from the PPC.

(c) No more than two rafts may be launched from each launching station.

§ 149.526 Type IV personal flotation devices (PFD's).

(a) Each PPC must have at least 8 Type IV PFD's and mounting racks.

(b) The PFD's and mounting racks required in paragraph (a) of this section must be distributed about the perimeter of the platform.

(c) Each Type IV PFD required by this section must be the 30-inch size approved under 46 CFR 160.009 or 160.-050 and must be international orange in color.

(d) Fifty percent of the Type IV PFD's required by this section must have an electric water light approved under 46 CFR 161.010.

(e) At least one Type IV PFD on each side of each platform must have a buoyant line attached to the buoy that is 1½ times the distance from the buoy to the mean low water line of the platform or 15 fathoms in length, whichever is greater.

(f) Each Type IV PFD required by this section must be easily accessible to persons on board.

§ 149.527 Portable radio apparatus.

Each PPC must have portable radio apparatus that meets the requirements in 46 CFR 94.55–1.

§ 149.529 Type I personal flotation devices (PFD's).

(a) Each PPC must have enough adult Type I PFD's for 100 percent of the port personnel. Each PFD must be stowed in the living spaces.

(b) Enough additional Type I PFD's for 50 percent of the port personnel must be stowed near working spaces in well ventilated and accessible lockers marked "life preservers."

§ 149.533 Litters.

Each platform must be equipped with at least one Stokes litter that is placed in a location that is accessible to persons on board.

§ 149.535 Markings on lifeboats, life rafts, paddles, and oars.

(a) Each lifeboat, and life raft must be marked in letters and numbers at least 1½ inch high with:

(1) The identification of the deepwater port; and

(2) The personnel capacity.

(b) Each inflatable life raft must be marked as required under 46 CFR 160.051.

(c) Each paddle and each oar must be marked with the identification of the deepwater port.

§ 149.537 Markings for personal flotation devices (PFD's).

Each PFD must be marked with the identification of the deepwater port.

MISCELLANEOUS

§ 149.539 Portable lights.

(a) Each portable light on a PPC must be listed by Underwriters' Laboratories, Inc., as suitable for Class I, Group D hazardous locations.

(b) Each supply cord of the portable lighting units must have receptacles with plugs, or receptacles with plugs interlocked with snap switches, that are listed by Underwriters' Laboratories, Inc., as suitable for Class I, Group D hazardous locations.

§ 149.541 General alarm system.

(a) Each PPC must have a general alarm system.

(b) Each general alarm system must be:

(1) Capable of being activated by the automatic fire detection systems required under § 149.491 and manually by use of alarm boxes located in accordance with the National Fire Protection Association Standard No. 72A–1974;

(2) Audible in all parts of the PPC except in areas of high ambient noise levels where hearing protection is required under § 150.509(d) of this subchapter; and

(3) Visible in areas of the PPC where hearing protection is required under § 150.509(d) of this subchapter by use of a high intensity flashing light.

§ 149.543 Marking of general alarm system.

(a) Each general alarm box must be marked with the words "GENERAL ALARM" in red letters at least one inch high on a yellow background.

(b) Each audio and each visual general alarm signalling device under § 149.541 must have a sign with the words "GENERAL ALARM" in red letters at least one inch high on a yellow background.

§ 149.545 Public address system.

Each PPC must have a public address system operable from two locations on the PPC to allow an announcement of fires, oil transfer system failure or malfunction, and other emergencies.

Subpart E—Aids to Navigation at Deepwater Ports

GENERAL

§ 149.701 Applicability.

This subpart prescribes the minimum requirements for aids to navigation at the marine site.

§ 149.703 Effective intensity: definition.

For the purpose of this subpart, "effective intensity" is the intensity of a flashing light calculated by using equation [3–27] for effective intensity in the Illumination Engineering Society Lighting Handbook, Fifth Edition, 1972, p. 3–36.

§ 149.705 Applicability of other regulations.

Sections 66.01–5, 66.01–25 (a) and (c), 66.01–50, and 66.01–55 of this chapter also apply to aids to navigation at a deepwater port. For the purpose of § 66.01–25 (a) and (c) of this chapter, aids to navigation at a deepwater port are Class I aids to navigation.

§ 149.707 Applications for aids to navigation.

(a) 180 days before the installation of any structure at the deepwater port site the licensee must submit applications for obstruction lights and such other private aids to navigation appropriate for the particular construction site.

(b) 180 days before the commencement of oil transfer operations or changing the mooring facilities at the deepwater port the licensee must submit applications for private aids to navigation.

(c) Applications for private aids to navigation for deepwater ports must be submitted in accordance with § 66.01–5 of this chapter except that the applications must be submitted to the Commandant (G–W).

SPECIFICATIONS FOR LIGHTS

§ 149.721 Light source.

Each light must have a tungsten-incandescent light source.

§ 149.723 Intensity.

(a) Each light on a buoy, hose string, and SPM must:

(1) Have at least the effective intensity required by this subpart for the light at all angles, the origin of which is the focal point of the light, that are included within ±1° from the focal plane of the light; and

(2) Have at least 50% of the effective intensity required by this subpart for the light at all angles, the origin of which is the focal point of the light, that are included within ±2° from the focal plane of the light.

(b) Each light on a platform, including the rotating lighted beacon, must:

(1) Have at least the effective intensity required by this subpart at all angles within ±0.5° of the horizontal plane that includes the focal point of the lens; and

(2) Have at least 50% of the effective intensity required by this subpart for the light at angles within ±1° of the horizontal plane that includes the focal point of the lens.

§ 149.724 Focus.

Each light using a lens must have a means to verify that the light source is at the focal point of the lens.

§ 149.725 Color.

The transparent cover of each light, including, where applicable, the top of the cover, must be uniform in color.

§ 149.727 Chromaticity.

The color emitted by a light at all angles, within the 50% effective intensity angle under § 149.723 must have chromaticity coordinates lying within the boundary defined by the corner coordinates in Table 149.727 when plotted on the International Commission on Illumination (CIE) 1931 Standard Observer Diagram.

TABLE 149.727.—*Chromaticity coordinates*

Color	Chromaticity coordinates	
	x axis	*y* axis
White	0.285	0.332
	.453	.440
	.500	.440
	.500	.382
	.440	.382
Green	.285	.264
	.009	.720
	.284	.520
	.207	.397
	.013	.494
Red	.665	.335
	.645	.335
	.680	.300
	.700	.300
Yellow	.560	.440
	.555	.435
	.612	.382
	.618	.382

§ 149.729 Display of information.

(a) The following information must be displayed on each light:

(1) The manufacturer's name and date of manufacture.

(2) The model designation.

(3) The name of the manufacturer of the lamp to be used, and the manufacturer's ordering code for the lamp.

(4) The minimum voltage, measured at the input terminals of the lighting apparatus with the lamp burning, needed to operate the light in compliance with the intensity requirements of this subpart.

(b) The following information must be displayed on each rotating lighted beacon:

(1) The information prescribed in paragraph (a) of this section.

(2) The operating speed of the rotating apparatus.

(3) The type and level of electrical input required to maintain the operating speed.

OBSTRUCTION LIGHTS

§ 149.751 Number and location on a platform and SPM.

(a) A platform that is 30 feet or less on any side, or in diameter, must have at least one obstruction light.

(b) An SPM must have at least one obstruction light.

(c) A platform that is more than 30 feet but less than 50 feet on any side, or in diameter, must have at least two obstruction lights that are installed as far apart from each other on the platform as possible.

(d) A platform that is more than 50 feet on any one side must have one obstruction light installed on each corner.

(e) A circular platform that has a diameter of more than 50 feet must have at least 4 obstruction lights that are installed as far apart from each other on the platform as possible.

(f) At least one of the obstruction lights on each platform and SPM must be visible from the water regardless of the angle of approach to the structure.

(g) If a platform or SPM has more than one obstruction light, the lights must all be installed in the same horizontal plane.

(h) Each obstruction light on a platform must be installed at least 20 feet above mean high water.

(i) Each obstruction light on an SPM must be installed at least 10 feet above the water.

§ 149.753 Number and location on a floating hose string.

A floating hose string must have omnidirectional obstruction lights that are:

(a) Installed at equally spaced intervals of not more than 70 feet along the length of the hose string, except that the two sections of hose furthest from the SPM need not have lights; and

(b) Installed all at the same height and at no less than 2 nor more than 5 feet above the surface of the water.

§ 149.755 Characteristics.

(a) Each obstruction light on a platform or SPM must:

(1) Be white; and

(2) Flash 50 to 70 times per minute.

(b) If a platform or SPM has more than one obstruction light, the lights must flash simultaneously.

(c) Each obstruction light on a hose string must:

(1) Be yellow; and

(2) Flash 50 to 70 times per minute.

§ 149.757 Intensity.

(a) Each obstruction light on a platform must have an effective intensity of at least 75 candela.

(b) Each obstruction light on an SPM must have an effective intensity of at least 15 candela.

(c) Each obstruction light on a hose string must have an effective intensity of at least 1 candela.

§ 149.759 Leveling.

Each obstruction light installed on a platform must have:

(a) Mounting hardware incorporating devices that facilitate horizontal leveling of the light; and

(b) A leveling indicator, or indicators, each with an accuracy of ±0.25 degrees, permanently attached to the light.

BUOYS

§ 149.771 Number and location.

Each lateral boundary of a traffic lane at a deepwater port must be marked with buoys that are no more than 5 miles apart.

§ 149.773 Characteristics.

(a) Each buoy at a deepwater port must:

(1) Meet the requirements in § 62.25 of this chapter for buoys in United States waters; and

(2) Have:

(i) A radar reflector; and

(ii) A light installed at least 8 feet above the water.

(b) For each traffic lane, the buoy that is furthest from the safety zone must have a fog signal of a type described in Subpart 62.45 of Part 62 of this chapter.

§ 149.775 Intensity of lights.

(a) Each fixed light on a buoy must have an intensity of at least 75 candela.

(b) Each flashing light on a buoy must have an effective intensity of at least 75 candela.

MISCELLANEOUS

§ 149.791 Identification of a platform and SPM.

(a) Each platform and SPM must display the name of the port, and the name or number or both identifying the structure, so that the information is visible:

(1) From the water at all angles of approach to the structure; and

(2) If the structure is equipped with a helicopter pad, from aircraft on approach to the structure.

(b) The information required in paragraph (a) of this section must be displayed in numbers and letters that are:

(1) At least 12 inches high;

(2) In vertical block style; and

(3) Displayed against a contrasting background.

§ 149.793 Markings for piles and pile clusters.

(a) Each pile and pile cluster that is within 100 yards of a platform or SPM must be marked with white reflective tape.

V 40 217 NOV 10 75 XUM

(b) Each pile and pile cluster that is more than 100 yards from a platform or SPM must meet the obstruction lighting requirements in this subpart for a platform.

§ 149.795 Radar beacon.

The tallest platform must have an FCC accepted radar beacon (RACON) that:

(a) When triggered, periodically sweeps the frequency band from 9320 to 9500 MHz, using a continuous saw-tooth sweep, and a sweep rate not greater than 3 MHz per second;

(b) Transmits a signal of at least 250 milliwatts radiated power that is omnidirectional in the horizontal plane, is polarized at an angle of 45° to the horizontal plane, and is delayed from the incident radar signal by no more than 250 nanoseconds;

(c) Transmits a 2-element or 3-element Morse coded pulse signal, with the overall signal length adjustable to about 20 microseconds; and

(d) Is installed at a minimum height of 15 feet above the highest deck of the platform and where the structure of the platform, or equipment mounted thereon, does not obstruct the signal propagation in any direction.

§ 149.797 Rotating lighted beacon.

The tallest platform must have a rotating lighted beacon that:

(a) Has an effective intensity of at least 15,000 candela;

(b) Flashes at least once every 20 seconds;

(c) Has a white light;

(d) Is installed:

(1) At least 60 feet above mean high water;

(2) Where the structure of the platform, or equipment mounted thereon, does not obstruct the propagation of the light in any direction; and

(3) So as to be visible all around the horizon;

(e) Operates in wind up to 100 knots at a speed that is within 6% of the operating speed displayed on the beacon.

(g) Has a leveling indicator, or indicators, each with an accuracy of ±0.25 degrees, permanently attached to the light.

§ 149.799 Fog signal.

(a) Each PPC must have a Coast Guard approved fog signal that has a 2 mile range.

NOTE: A list of Coast Guard approved fog signals may be obtained from the Commandant (G–W).

(b) Each fog signal on a PPC must:

(1) Be installed at least 10 feet but not more than 150 feet above mean high water; and

(2) Be installed where the structure of the platform, or equipment mounted thereon, does not obstruct the propagation of sound in any direction.

PART 150—OPERATIONS

Subpart A—General

Sec.
150.101 Applicability.
150.103 Licensee.
150.105 Operations Manual: general.
150.106 Operations Manual: copies.
150.107 Operations Manual: amendment.
150.109 Compliance with Operations Manual.
150.113 Deviations.
150.115 Emergency deviations.
150.117 Notification to the District Commander.
150.119 Notification to the Commandant.
150.121 ABS classification.
150.123 Weather monitoring.
150.125 Water depth measurements.
150.127 Environmental monitoring.

Subpart B—Personnel

150.201 Applicability.
150.203 General.
150.204 Definitions.
150.205 Port Superintendent.
150.207 Cargo Transfer Supervisor.
150.209 Vessel Traffic Supervisor.
150.211 Mooring Master.
150.213 Cargo Transfer Assistant.
150.215 Assistant Mooring Master.
150.217 Limitation on service.

Subpart C—Vessel Navigation

150.301 Applicability.
150.303 Definitions.
150.305 Traffic separation scheme (TSS).
150.307 Radar surveillance.
150.309 Advisories to tankers.
150.311 Radio listening watch.
150.313 Clearances for tankers.
150.315 Clearances for support vessels.
150.317 Clearances for other vessels.
150.333 Advance notice of arrival.
150.335 Report before entering inbound traffic lane.
150.337 Navigation of tankers in the TTS, safety zone and anchorage area.
150.338 Navigation of support vessels in the TTS, safety zone and anchorage area.
150.339 Navigation of other vessels in the TTS, safety zone and anchorage area.
150.341 Mooring Master.
150.342 Assistant Mooring Master.

Subpart D—Oil Transfer Operations

150.400 Applicability.
150.403 Definitions.
150.405 Periodic tests and inspections: OTS components.
150.407 Periodic tests and inspections: discharge containment equipment.
150.409 Periodic tests and inspections: removal material and equipment.
150.411 Repair or replacement of equipment.
150.413 Requirements for oil transfer.
150.415 Requirements for connections.
150.417 Declaration of inspection.
150.419 Stopping transfer operations.
150.421 Displacement of oil in an SPM–OTS with water.
150.423 Limitations.
150.425 Suspension of oil transfer operations.

Subpart E—Operations

150.500 Applicability.
150.503 Maintenance of equipment.
150.504 Fire main system.
150.505 Fire pump.
150.507 Firehose: connection and stowage.
150.508 Lifesaving equipment.
150.509 Use of personal protection equipment.
150.511 Maintenance of personal protection equipment.
150.513 Sanitation.
150.515 Refueling for aircraft.
150.516 Aircraft operations.
150.517 Station bill.
150.519 Emergency drills.
150.521 Housekeeping.
150.523 Illumination.
150.525 Emergency Medical Technician.
150.527 First aid station.

Subpart F—Aids to Navigation at Deepwater Ports

150.601 Applicability.
150.603 Applicability of other regulations.
150.605 Aids to navigation: power supply.
150.607 Lights.
150.611 Fog Signals.

Subpart G—Reports and Records

150.701 Applicability.

REPORTS

150.703 Maintenance of ABS classification.
150.705 Aids to navigation discrepancy.
150.707 Oil throughput; payment to Deepwater Port Liability Fund.
150.709 Discharge of oil.
150.711 Casualty or accident.
150.713 Sabotage or subversive activity.

RECORDS

150.751 General.
150.753 Key personnel: designations and qualifications.
150.755 Port inspection records.
150.757 Oil throughput log.
150.759 Declaration of inspection.

AUTHORITY: Secs. 10(a), 10(b), Pub. L. 93–627, 88 Stat. 2137–8 (33 U.S.C. 1509 (a), (b)); 49 CFR 1.46(a).

Subpart A—General

§ 150.101 Applicability.

The rules in this part apply to the operation of each deepwater port.

§ 150.103 Licensee.

(a) No licensee of a deepwater port may cause or authorize operations contrary to the rules in this part.

(b) The licensee shall ensure that the port meets the equipment requirements in Part 149 of this chapter.

§ 150.105 Operations Manual: general.

(a) The licensee of a deepwater port may not operate the port unless the port has an Operations Manual that:

(1) Is prepared in accordance with the "Guidelines for Preparation of a Deepwater Port Operations Manual"; and

(2) Has been approved by the Commandant.

(b) For the purpose of this section, "approved" means only that the Operations Manual meets the requirements of the Act and the regulations in this subchapter.

NOTE: The "Guidelines for Preparation of a Deepwater Port Operations Manual" may be obtained from the Commandant (G–W).

§ 150.106 Operations Manual: copies.

The licensee shall furnish 25 copies of the approved Operations Manual and each subsequent amendment to Commandant (G–W).

NOTE: The Commandant will distribute copies of the approved Operations Manual and subsequent amendments within the Coast Guard and to the Governor of the adjacent coastal State connected directly by pipeline to the deepwater port.

§ 150.107 Operations Manual: amendment.

(a) The Captain of the Port may require the licensee to amend the Operations Manual if he finds that the Operations Manual does not comply with § 150.105 of this part.

(b) When the Captain of the Port determines that an amendment to an operations manual is necessary, he notifies the licensee in writing of a date not less than 14 days from the date of the notice, on or before which the licensee may submit written information, views, and arguments on the amendment. After considering all relevant material presented, the Captain of the Port notifies the licensee of any amendment required or he rescinds the notice. The amendment becomes effective not less than 30 days after the licensee receives the notice unless the licensee petitions the Commandant to reconsider the amendment, in which case its effective date is stayed pending a decision by the Commandant. Petitions to the Commandant must be submitted in writing to the Captain of the Port.

(c) If the Captain of the Port finds a situation that requires immediate action to prevent the discharge or risk of discharge of oil or to protect the safety of life and property that makes the procedure in paragraphs (a) and (b) of this section impracticable or contrary to the public interest, he may issue an amendment effective, without stay, on the date the licensee receives notice of it. In such a case, the Captain of the Port includes a brief statement of the reasons for his finding in the notice, and the licensee may petition the District Commander, in any manner, to reconsider the amendment.

(d) Adjacent coastal States connected by pipeline to the deepwater port and licensees may petition the Captain of the Port to amend the Operations Manual. The Captain of the Port, when in receipt of a proposed amendment, will solicit comments on the proposed amendment. The petition and comment should include sufficient relevant information to enable the Captain of the Port to reach a decision to adopt or reject the proposed amendment. The Captain of the Port may approve amendments to the Operations Manual if he finds that the proposed alternative procedure, method, or equipment will ensure equivalent or improved protection, safety, or quality level and is in compliance with this subchapter.

§ 150.109 Compliance with Operations Manual.

Each licensee shall use and require his personnel to use the procedures in the Operations Manual.

§ 150.113 Deviations.

The Captain of the Port may authorize a deviation in writing upon request, if he finds that the proposed alternative procedure, method or equipment would ensure equivalent protection, safety, or quality level.

§ 150.115 Emergency deviations.

In an emergency, for the protection of life or property, or to avoid danger to the environment, any person may deviate from the Operations Manual or any requirement of deepwater port regulations. As soon as practicable, the person shall report the nature, extent, and duration of each deviation orally or in writing to the Captain of the Port.

§ 150.117 Notification to the District Commander.

(a) At least 30 days before construction of a pipeline, platform, or SPM at a deepwater port begins, the licensee shall give notice of construction in writing to the District Commander.

(b) On the date construction of a pipeline, platform or SPM at a deepwater port begins, the licensee shall give written notice to the District Commander within 24 hours of the lights and fog signals in use at the construction site.

(c) Whenever lights or fog signals are changed during construction of a pipeline, platform, or SPM at a deepwater port, the licensee shall give written notice of such change to the District Commander within 24 hours.

(d) When lights or fog signals used during construction of a platform, buoy, or SPM at a deepwater port are replaced with lights or fog signals required by Part 149 of this subchapter, the licensee shall give written notice of replacement to the District Commander within 24 hours.

(e) At least 60 days before the first oil transfer operation begins at a deepwater port, the licensee shall give written notice of the operation to the District Commander.

(f) At least 60 days before the first oil transfer operation begins at a deepwater port, the licensee shall give notice of the operation to the District Commander.

§ 150.119 Notification to the Commandant.

The licensee shall give notice, in writing, to the Commandant upon receipt of the American Bureau of Shipping:

(a) "Interim Class Certificate"; and

(b) "Classification Certificate" for an SPM at a deepwater port.

§ 150.121 ABS Classification.

(a) No licensee may operate an SPM unless he has an American Bureau of Shipping (ABS) "Interim Class Certificate" or a "Classification Certificate" for the SPM.

(b) A certificate must classify the SPM and attached hoses.

(c) The licensee shall maintain in class each SPM having a Classification Certificate.

§ 150.123 Weather monitoring.

The terminal supervisor shall continuously monitor the wind, wave, current, and visibility conditions at the port.

§ 150.125 Water depth measurements.

(a) The licensee shall measure water depth in the marine site if the Captain of the Port notifies the licensee that:

(1) A severe storm may have significantly altered water depths;

(2) Gradual natural or man-induced processes may have significantly altered water depths; or

(3) User experience indicates that charted water depths may no longer be accurate.

(b) The accuracy and adequacy of water depth measurements must be sufficient for nautical chart maintenance purposes.

§ 150.127 Environmental monitoring.

The licensee shall monitor the environment in accordance with the environmental monitoring program set forth in the approved Operations Manual for the port.

Subpart B—Personnel

§ 150.201 Applicability.

This subpart prescribes personnel qualifications that apply to each deepwater port.

§ 150.203 General.

No person may serve and the licensee may not use the services of a person in the following capacites unless that person reads, writes and speaks English.

(a) Port Superintendent.
(b) Cargo Transfer Supervisor.
(c) Cargo Transfer Assistant.
(d) Vessel Traffic Supervisor.
(e) Mooring Master.
(f) Assistant Mooring Master.

§ 150.204 Definitions.

As used in this subpart:

(a) "license" means a Coast Guard license issued under 46 CFR 10; and

(b) "licensee" means the licensee of a deepwater port.

§ 150.205 Port Superintendent.

No person may serve, and the licensee may not use the services of a person, as a Port Superintendent at a deepwater port unless—

(a) That person has enough experience at an oil transfer facility to enable the licensee to determine that that person is capable of managing the deepwater port;

(b) The licensee determines that that person knows:

(1) The hazards of each product to be transferred; and

(2) The port operating procedures described in the Operations Manual; and

(c) The licensee designates that person as Port Superintendent and advises the Captain of the Port in writing of that designation.

§ 150.207 Cargo Transfer Supervisor.

No person may serve, and the licensee may not use the services of a person, as a Cargo Transfer Supervisor at a deepwater port unless:

(a) That person has enough experience in operating oil transfer equipment to enable the licensee to determine that that person is capable of operating the oil transfer equipment of the deepwater port;

(b) That person has:

(1) Had continuous employment for at least one year as supervisor at an oil transfer facility in charge of offloading tank vessels of 70,000 deadweight tons or larger;

V 40 217 NOV 10 75 XUM

(2) Supervised at least 25 cargo transfer evolutions from tankers of 70,000 deadweight tons or larger; or

(3) Served in a trailing capacity for Cargo Transfer Supervisor at a United States deepwater port for at least one year;

(c) The licensee determines that that person knows—

(1) The rules in Subpart D of this part;

(2) The oil transfer procedures and transfer control systems, in general, of tankers serviced at the facility;

(3) The special handling characteristics of each product to be transferred; and

(4) The procedures described in the Operations Manual for:

(i) Oil transfer;

(ii) Spill prevention, containment, and cleanup;

(iii) Accidents and emergencies;

(iv) Voice communications; and

(d) The licensee designates that person as Cargo Transfer Supervisor and advises the Captain of the Port in writing of that designation.

§ 150.209 Vessel Traffic Supervisor.

No person may serve, and the licensee may not use the services of a person, as a Vessel Traffic Supervisor at a deepwater port unless—

(a) That person presents evidence of:

(1) Having performed for one year within the last five years in a capacity requiring radar plotting and analysis of vessel movement; or

(2) Satisfactory completion of a marine radar operators school acceptable to the Commandant;

(b) The licensee determines that that person knows:

(1) The procedures for utilizing the port's radar equipment; and

(2) The procedures described in the Operations Manual for:

(i) Vessel control; and

(ii) Voice radiotelecommunications; and

(c) The licensee designates that person as Vessel Traffic Supervisor and advises the Captain of the Port in writing of that designation.

§ 150.211 Mooring Master.

No person may serve, and the licensee may not use the services of a person, as a Morning Master at a deepwater port unless:

(a) That person holds a current United States Coast Guard issued license as:

(1) Master of ocean steam or motor vessels of any gross tons, endorsed as radar observer, and has one year experience as:

(i) Master on tankers of 70,000 DWT or larger and satisfactory completion of a very large crude carrier (VLCC) shiphandling course acceptable to the Commandant; or

(ii) A mooring master at any deepwater port servicing tankers of 70,000 DWT or larger; or

(2) Master of ocean steam or motor vessels of limited tonnage, endorsed as radar observer, and endorsed as first-class pilot of vessels of any gross tons for at least one port in the area of the deepwater port, and has one year experience:

(i) Piloting ocean going vessels, including tankers of 70,000 DWT or larger; or

(ii) As assistant mooring master at the facility and satisfactory completion of a very large crude carrier (VLCC) shiphandling course acceptable to the Commandant;

(b) The licensee determines that the person knows the procedures described in the Operations Manual for:

(1) Vessel control;

(2) Vessel responsibilities;

(3) Spill prevention, containment, and cleanup;

(4) Accidents and emergencies; and

(5) Voice radiotelecommunications;

(c) The licensee designates that person as Mooring Master and advises the Captain of the Port, in writing, of the designation; and

(d) In addition to the foregoing requirements, after two years of operation of the facility, the licensee shall require new applicants for Mooring Master to have observed 20 mooring evolutions at that facility.

§ 150.213 Cargo Transfer Assistant.

No person may serve, and the licensee may not use the services of a person, as a Cargo Transfer Assistant at a deepwater port unless:

(a) That person presents evidence that he has one year experience, or performed 15 cargo transfer evolutions at an oil transfer facility servicing tankers of 70,000 deadweight tons or larger in a capacity involving connection and disconnection of the tankers to a single point mooring floating hose string;

(b) The licensee determines that that person knows—

(1) The rules in Subpart D of this part;

(2) The oil transfer procedures and transfer control systems, in general, of tankers serviced at the port;

(3) The special handling characteristics of each product to be transferred;

(4) The procedures described in the Operations Manual for:

(i) Oil transfer;

(ii) Spill prevention, containment, and cleanup;

(iii) Accidents and emergencies; and

(iv) Voice radiotelecommunications; and

(c) The licensee designates that person as Cargo Transfer Assistant and retains written evidence of that designation at the deepwater port.

§ 150.215 Assistant Mooring Master.

No person may serve, and the licensee may not use the services of a person, as an Assistant Mooring Master at a deepwater port unless:

(a) That person holds a current United States Coast Guard issued license as:

(1) Master of ocean steam or motor vessels of any gross tons, endorsed as radar observer, and has six months experience as master or chief mate on tankers of 70,000 DWT or larger; or

(2) Master of ocean steam or motor vessels of limited tons, endorsed as radar observer, and endorsed as first-class pilot of vessels of any gross tons for at least one port in the area of the deepwater port;

(b) The licensee determines that that person knows the procedures described in the Operations Manual for:

(1) Vessel control;

(2) Vessel responsibilities;

(3) Spill prevention, containment, and cleanup;

(4) Accidents and emergencies; and

(5) Voice radiotelecommunications; and

(c) The licensee designates that person as Assistant Mooring Master and advises the Captain of the Port, in writing, of the designation.

§ 150.217 Limitation on service.

No person may perform in more than one of the following capacities at any one time:

(a) Port Superintendent.

(b) Cargo Transfer Supervisor.

(c) Cargo Transfer Assistant.

(d) Vessel Traffic Supervisor.

(e) Mooring Master.

(f) Assistant Mooring Master.

Subpart C—Vessel Navigation

§ 150.301 Applicability.

This subpart prescribes rules that apply to the navigation of all vessels in the safety zone, anchorage area, or traffic separation scheme at a deepwater port.

§ 150.303 Definitions.[11]

As used in this subpart—

"Other vessel" means a vessel other than tankers or support vessels as defined in this subpart.

"Separation zone or line" means a zone or line in the TSS located between two traffic lanes to keep tankers proceeding in opposite directions a safe distance apart.

"Support vessel" means a tug, line-handling boat, crewboat, workboat, supply vessel, bunkering vessel, barge, or other similar vessel working for the licensee in connection with the operation of the deepwater port or cleared by the licensee to service a tanker calling at the deepwater port.

"Tanker" means a vessel that enters a deepwater port to onload or offload oil at an SPM.

"Traffic lane" means an area of the TSS in which all tankers ordinarily proceed in the same direction.

§ 150.305 Traffic separation scheme (TSS).

No licensee may operate a deepwater port unless the port has a TSS that conforms to Part 1 of the recommendations of the Intergovernmental Maritime Consultative Organization contained in Annex I to IMCO Assembly Resolution A. 284 (VIII) of November 20, 1973.

NOTE: A copy of Annex I may be obtained from the Commandant.

§ 150.307 Radar surveillance.

The Vessel Traffic Supervisor shall maintain radar surveillance of the TSS, safety zone and anchorage area:

(a) Whenever a tanker is proceeding to a traffic lane after submitting the report required in § 150.335; and

(b) Whenever a tanker is in the TSS, safety zone, or anchorage area.

§ 150.309 Advisories to tankers.

(a) The Vessel Traffic Supervisor shall advise the master of each tanker underway in the TSS, safety zone, or anchorage area of its position and track at 10 minute intervals.

(b) Whenever the Vessel Traffic Supervisor determines that a vessel may potentially interfere with the movement of a tanker in the TSS, safety zone, or anchorage area, he shall keep the master of the tanker informed of position and estimated track and speed of the vessel and shall update the information at times he considers necessary to assist the tanker in navigation of the TSS and safety zone.

(c) Whenever a tanker enters a traffic lane inbound to the safety zone or anchorage area, the Vessel Traffic Supervisor shall advise the tanker of the position of each other vessel moored, anchored, or underway in the TSS, safety zone, or anchorage area.

§ 150.311 Radio listening watch.

Whenever a tanker is in the TSS, safety zone, or anchorage area, the Vessel Traffic Supervisor and the master of the tanker shall each continuously monitor the radio frequency designated in the Operations Manual for use by tankers and support vessels underway at the port, except when transmitting on that frequency.

§ 150.313 Clearances for tankers.

(a) The Vessel Traffic Supervisor may not clear a tanker to enter a traffic lane unless:

(1) Each other tanker in the traffic lane is at least 5 miles from the entrance to the traffic lane; and

(2) A Mooring Master is on board or ready to board at a position in the traffic lane no closer than 5 miles to the entrance to the safety zone.

(b) The Vessel Traffic Supervisor may not clear a tanker to moor at an SPM unless:

(1) There is an SPM berth available and he has assigned that berth to the tanker;

(2) The visibility in the safety zone is at least two miles;

(3) All operating conditions prescribed in the Operations Manual for mooring to an SPM have been met; and

(4) A Mooring Master and an Assistant Mooring Master are on board.

(c) The Vessel Traffic Supervisor may not clear a tanker to depart an SPM unless the visibility is at least two miles and a Mooring Master is on board.

(d) No tanker may enter a traffic lane or moor at or depart from an SPM, unless the master of the tanker has obtained clearance from the Vessel Traffic Supervisor, except as permitted by paragraph (e) of this section.

(e) The master of a tanker may, in an emergency, for the protection of life or property, depart from an SPM without clearance from the Vessel Traffic Supervisor if the master advises the Vessel Traffic Supervisor of the circumstances, by radio, at the earliest possible moment.

§ 150.315 Clearances for support vessels.

(a) The Vessel Traffic Supervisor shall direct support vessel movements within the TSS and safety zone.

(b) The Vessel Traffic Supervisor may direct movements of support vessels rendezvousing with tankers contrary to the traffic separation scheme to facilitate operations with a tanker in a traffic lane.

(c) The Vessel Traffic Supervisor may clear support vessels to enter the safety zone or TSS at any point.

§ 150.317 Clearances for other vessels.

(a) When requested by the master of an other vessel, the Vessel Traffic Supervisor shall furnish information concerning tankers, support vessels, and all other vessels underway or moored in the safety zone, TSS, or anchorage area.

(b) If the Vessel Traffic Supervisor determines that an other vessel may be standing into danger with respect to any vessel or part of the deepwater port installation in the safety zone or TSS, he shall attempt to inform the master of that vessel by radio or other means.

(c) Except in situations involving force majeure, the Vessel Traffic Supervisor shall not clear other vessels to call at the deepwater port for any purpose that would interfere with the purpose of the deepwater port; endanger the safety of life, property, or the environment; or be otherwise prohibited by regulation.

§ 150.333 Advance notice of arrival.

(a) The master of a tanker bound for a deepwater port shall report the following information to the Captain of the Port and the Vessel Traffic Supervisor of the port at least 24 hours before entering the TSS, safety zone, or anchorage area at the port:

(1) The name, gross tonnage, and draft of the tanker.

(2) The type and amount of cargo on board.

(3) Any condition on the vessel that may impair its navigation, such as fire, defectively propulsion machinery, defective steering equipment, or limitations on navigational or radio telephone capabilities because of equipment or material defects.

(4) Any leaks, structural damage, or machinery defects that may impair cargo transfer operations or cause a discharge of oil.

(b) If the information reported in paragraph (a) (3) or (a) (4) of this section changes at any time before entering the TSS, safety zone, or anchorage area, or while the tanker is in the TSS, safety zone, or anchorage area, the master of the tanker shall report the changes to the Captain of the Port and Vessel Traffic Supervisor as soon as possible.

§ 150.335 Report before entering inbound traffic lane.

The master of a tanker bound for a deepwater port shall notify the Vessel Traffic Supervisor of the port when the tanker is 20 miles from the entrance of an inbound traffic lane.

§ 150.337 Navigation of tankers in the TSS, safety zone and anchorage area.

(a) No tanker may enter a traffic lane except at the entrance to the lane.

(b) A tanker proceeding in a traffic lane shall keep the separation zone or line to port.

(c) No tanker may enter or depart a safety zone except via a traffic lane.

(d) No tanker may anchor in the TSS of safety zone, except in a designated anchorage area.

(e) A tanker in a traffic lane shall keep at least 5 miles behind any other tanker ahead of him in the traffic lane.

(f) No tanker may operate, anchor, or be moored in any area of the TSS, safety zone, or anchorage area in which the net under keel clearance of the tanker would be less than 5 feet.

§ 150.338 Navigation of support vessels in the TSS, safety zone and anchorage area.

(a) No support vessel may enter or move within the TSS safety zone, or anchorage area unless the movement is cleared by the Vessel Traffic Supervisor.

(b) No support vessel may anchor in the TSS or safety zone, except in an anchorage area or for maintenance operations cleared by the Vessel Traffic Supervisor.

§ 150.339 Navigation of other vessels in the TSS, safety zone and anchorage area.

Other vessels may not call at a deepwater port unless clearance has been obtained from the Vessel Traffic Supervisor.

§ 150.341 Mooring Master.

No tanker may be underway in the safety zone, or in that part of the TSS that is within five miles of the safety zone, unless a Mooring Master is on board.

NOTE: The Mooring Master advises the vessel's master on operational and ship control matters that are peculiar to the specific deepwater port, such as navigational aids, depth and current characteristics of the maneuvering area, mooring equipment and procedures, and the port's vessel traffic control procedures.

[11] Section 3(16) of the Act provides that "safety zone" means the "safety zone established around a deepwater port as determined . . . in accordance with § 10(d) of the Act". Section 10(d) further provides that a safety zone is to be established within 30 days after notice of an application is published in the FEDERAL REGISTER for the purpose of navigational safety and is to be of an appropriate size that accomplishes this purpose. The Commandant designates the safety zone at each deepwater port.

V 40 217 NOV 10 75 XUM

§ 150.342 Assistant Mooring Master.

No tanker may moor at an SPM unless an Assistant Mooring Master is on board.

NOTE: The Assistant Mooring Master is stationed on the forecastle of the tanker during mooring operations to assist the Mooring Master by reporting position approach data relative to the SPM and to advise the tanker personnel in the handling of mooring equipment peculiar to the deepwater port.

Subpart D—Oil Transfer Operations

§ 150.400 Applicability.

This subpart prescribes rules that apply to the transfer of oil at a deepwater port.

§ 150.403 Definitions.

As used in this subpart:

"Hose string", both floating and float/sink type, means that portion of an SPM–OTS consisting of flexible hose which connects the vessel's manifold to the SPM.

"OTS" means an oil transfer system of a deepwater port and includes the SPM–OTS and the undersea pipeline running from the PLEM to the onshore terminal.

"PLEM" means pipeline and manifold at the SPM.

"Single Point Mooring" (SPM) means an offshore berth which provides a link between the undersea pipeline and a moored vessel for the transfer of oil and to which the vessel can be secured and can weathervane during the oil transfer.

"SPM–OTS" means that portion of an OTS from the PLEM to the end of the hose string that connects to the manifold on the vessel.

§ 150.405 Periodic tests and inspections: OTS components.

No person may transfer oil through an OTS at a deepwater port unless:

(a) The SPM–OTS of the OTS has been tested and inspected as required for maintenance of class in accordance with the Rules for Building and Classing Single Point Moorings published by the American Bureau of Shipping;

(b) Each oil transfer hose in the SPM–OTS of the OTS in which the maximum pressure rating of the manufacturer has been exceeded, except when exceeded for testing required by this section, has, since the pressure was exceeded, been:

(1) Removed;

(2) Hydrostatically tested to 1.5 times its maximum working pressure; and

(3) Visually examined externally and internally for evidence of leakage, loose covers, kinks, bulges, soft spots, and gouges, cuts, or slashes that penetrate the hose reinforcement;

(c) Within the 23 months immediately preceding the month during which oil transfer operations are to be conducted, each submarine hose in the SPM–OTS of the OTS has been removed from the ends of each submarine coupling, surfaced, and visually examined externally and internally for evidence of flaws as described in paragraph (b)(3) of this section and hydrostatically tested to 1.5 times its maximum working pressure; and

(d) Each submarine hose in the SPM–OTS of that OTS has been visually examined in place for evidence of external flaws as described in paragraph (b)(3) of this section since the last time sea conditions at the deepwater port required shutdown of oil transfer operations.

§ 150.407 Periodic tests and inspections: discharge containment equipment.

No person may transfer oil at a deepwater port unless the discharge containment equipment required by Part 149 of this chapter is tested and inspected as follows:

(a) Within the five months immediately preceding the month during which oil transfer operations are to be conducted at a deepwater port, a visual examination must have been performed to determine whether there existed any conditions that might impair the effectiveness of the equipment in performing its intended function. This visual examination must include the condition of such items as fabric and fabric coatings, seams and boding points, metal hardware parts, shackles, fittings, towing and other lines, cables, flotation devices, inflation mechanisms, and any other components integral to the equipment.

(b) Within the 11 months immediately preceding the month during which oil transfer operations are to be conducted at a deepwater port, representative pieces or sections of the containment equipment must:

(1) Have been deployed under simulated discharge conditions and the integrity of equipment strength members, containment skirt, flotation devices, and any other design performance factors of the equipment tested; or

(2) Have been deployed under actual discharge conditions.

§ 150.409 Periodic tests and inspections: removal material and equipment.

No person may transfer oil at a deepwater port unless the removal material and equipment required by Part 149 of this chapter is tested and inspected as follows:

(a) Within the two months immediately preceding the month during which oil transfer operations are to be conducted at a deepwater port, any machinery, pumps, hydraulic parts, and other operating features of removal equipment must have been visually examined and operated in accordance with the instructions of the manufacturer.

(b) Within the 11 months immediately preceding the month during which oil transfer operations are to be conducted at a deepwater port, the removal equipment must have been tested in conjunction with the containment equipment deployment required by § 150.407(b).

§ 150.411 Repair or replacement of equipment.

(a) Whenever any component of a deepwater port that affects the safety or integrity of the oil transfer operation is found to be inoperative or otherwise defective, the licensee shall replace or repair the component before further oil transfer operations are undertaken using the affected OTS. The repaired or replaced component must meet or exceed the original specifications.

(b) Whenever an item of discharge containment and removal material or equipment required by § 149.319 of this chapter is found to be inoperative or otherwise defective, the licensee shall replace or repair the item before further oil transfer operations are undertaken. The repaired or replaced item must meet or exceed the original specifications.

§ 150.413 Requirements for oil transfer.

No person may transfer oil through an OTS unless:

(a) Before connecting the hose string to the vessel manifold at the start of each oil transfer operation, it is determined by in-place visual examination that the hose string in use for that transfer operation has no leakage, loose covers, kinks, bulges, soft spots, and no gouges, cuts, or slashes that penetrate the hose reinforcement;

(b) During each oil transfer operation, it is determined by visual examination that the hose string in use for that transfer operation has no leakage;

(c) The vessel's mooring attachment to the SPM is strong enough to hold in all expected conditions of surge, current, and weather;

(d) Oil transfer hoses are long enough to allow the vessel to move to the limits of its mooring attachment to the SPM without placing strain on the hoses;

(e) Each oil transfer hose is supported in a manner that prevents strain on its coupling;

(f) Each part of the OTS necessary to allow the flow of oil is lined up for the transfer;

(g) Each part of the OTS not necessary for the transfer operation is securely blanked or shut off;

(h) Except when used to receive or discharge ballast, each overboard discharge or sea suction valve that is connected to the vessel's oil transfer, ballast, or cargo tank systems is sealed, lashed, or locked in the closed position;

(i) Each connection in the OTS meets the requirements of § 150.415;

(j) The discharge containment and removal material and equipment required by § 149.319 of this chapter is in place;

(k) Each scupper and overboard drain on the vessel is closed;

(l) Any continuing loss of oil from the coupling at the vessel manifold does not overflow the drip pan under the manifold;

(m) The communications equipment required by § 149.317 of this chapter is operative for the transfer operation;

(n) The emergency means of shutdown required by Part 149 of this chapter is in position and operative;

(o) The Cargo Transfer Supervisor, Cargo Transfer Assistant, and any other designated personnel are on duty and present to conduct the transfer operations in accordance with the Operations Manual and with the oil transfer procedures that apply to the vessel during the transfer operation;

(p) The vessel's officer in charge of cargo transfer and the Cargo Transfer Assistant have held a conference and each understands the following details of the transfer operations:

(1) The identity of the product to be transferred.

(2) The sequence of transfer operations.

(3) The transfer rate.

(4) The name or title and location of each person participating in the transfer operation.

(5) Particulars of the transferring and receiving systems.

(6) Critical stages of the transfer operation.

(7) Federal regulations that apply to the transfer of oil.

(8) Emergency procedures.

(9) Discharge containment procedures.

(10) Discharge reporting procedures.

(11) Watch or shift arrangement.

(12) Transfer shutdown procedures;

(q) The vessel's officer in charge of cargo transfer and the Cargo Transfer Assistant agree to begin the transfer operation;

(r) Flame screens are structurally sound and securely fastened in place in all cargo tank vents and ullage holes on the vessel; and

(s) The declaration of inspection required by § 150.417 is executed.

§ 150.415 Requirements for connections.

(a) The licensee shall provide suitable adaptors, to allow connection of the hose string to a vessel manifold, that meet any one of the following flange standards:

(1) American National Standards Institute (ANSI).

(2) British Standard (BS).

(3) German Standard (DIN).

(4) Japanese Industrial Standard (JIS).

(5) Universal Metric Standard.

(b) Each temporary connection between the hose string and a vessel manifold must:

(1) Be made using either:

(i) A bolted coupling; or

(ii) A quick-connect coupling approved under § 156.130(c)(2) of this chapter;

(2) Have suitable materials in joints and couplings to make a tight seal;

(3) If using an American National Standards Institute (ANSI) standard bolted flange coupling, have a bolt in at least every other hole of the coupling and in no case less than four bolts;

(4) If using a bolted coupling other than an ANSI standard bolted flange coupling, have a bolt in each hole of the coupling;

(5) Have bolts in each bolted coupling that are all:

(i) The same size;

(ii) Tightened so as to uniformly distribute the load around the coupling; and

(iii) Free of any signs of strain, elongation or deterioration; and

(6) Be made and broken in the presence of and under the direct supervision of the Cargo Transfer Assistant.

§ 150.417 Declaration of inspection.

(a) No person may transfer oil at a deepwater port unless a declaration of inspection has been executed before the start of each oil transfer operation by the Cargo Transfer Assistant and the vessel's officer in charge of cargo transfer.

(b) The declaration of inspection required by paragraph (a) of this section may be in any form but must contain:

(1) The name of the tanker and berth to which moored;

(2) The date the oil transfer operation will start;

(3) Certification by the Cargo Transfer Assistant and the vessel's officer in charge of cargo transfer that the requirements for oil transfer specified in § 150.413, and the pre-transfer procedures described in the Operations Manual, have been followed; and

(4) The signatures of the Cargo Transfer Assistant and the vessel's officer in charge of cargo transfer.

§ 150.419 Stopping transfer operations.

(a) Before stopping the flow of oil during an offloading operation at a deepwater port, the Cargo Transfer Supervisor shall advise the vessel's officer in charge of oil transfer of the intent to do so.

(b) Before stopping the flow of oil during an onloading operation at a deepwater port, the vessel's officer in charge of oil transfer shall advise the Cargo Transfer Supervisor of the intent to do so.

(c) Before disconnecting the hose string from the vessel manifold, the Cargo Transfer Assistant shall ensure that the shut-off valve described in § 149.307 of this chapter is secured in the closed position.

(d) Before returning the hose string to the water after disconnection, the Cargo Transfer Assistant shall ensure that the blank flange described in § 149.307 of this chapter is secured in place and has:

(1) Suitable material in the coupling to make a tight seal;

(2) A bolt in each hole of the coupling; and

(3) Bolts in the coupling that are all:

(i) The same size;

(ii) Tightened so as to uniformly distribute the load around the coupling; and

(iii) Free of any signs of strain, elongation, or deterioration.

§ 150.421 Displacement of oil in an SPM–OTS with water.

The Port Superintendent shall ensure that the oil in an SPM–OTS is displaced with water, and the valve at the PLEM closed, whenever:

(a) A storm warning has been received forecasting weather conditions that will exceed the design operating criteria listed in the Operations Manual for the SPM–OTS;

(b) A vessel is about to depart the SPM because of storm conditions; or

(c) The SPM is not scheduled for use in an oil transfer operation within the next 7 days.

§ 150.423 Limitations.

No person may transfer oil at a deepwater port:

(a) Unless a Port Superintendent is on duty at the port;

(b) During a severe electrical storm in the vicinity of the deepwater port;

(c) During a fire at the deepwater port, receiving terminal on shore, or aboard a vessel berthed at the deepwater port, unless it is determined by the Port Superintendent that an oil transfer should be resumed as a safety measure;

(d) Unless there are personnel and equipment at the port, not presently engaged in discharge containment and removal operations, sufficient to contain and remove the discharges specified in § 149.319(a);

(e) By lighterage, except in bunkering operations, unless otherwise authorized by the Captain of the Port; or

(f) Unless the weather conditions at the port meet the minimum operating conditions prescribed in the Operations Manual for transferring oil at the port.

§ 150.425 Suspension of oil transfer operations.

(a) The Captain of the Port may order the licensee to suspend oil transfer operations if the Captain of the Port finds that there is a condition requiring immediate action to prevent the discharge or threat of discharge of oil or to protect the safety and life and property.

(b) An order of suspension may be made effective immediately.

(c) The order of suspension states each condition requiring immediate action.

(d) The licensee may petition the District Commander, in writing or in any manner if the order of suspension is effective immediately, to reconsider the order of suspension. The decision of the District Commander is final agency action.

Subpart E—Operations

§ 150.500 Applicability.

The rules in this subpart apply to operations at a deepwater port.

§ 150.503 Maintenance of equipment.

(a) The licensee shall maintain each item of equipment required under this subchapter in operative condition or shall replace it with an item in good condition.

(b) The licensee shall maintain each excess item of equipment required under this subchapter in operative condition or shall remove it from service.

§ 150.504 Fire main system.

The licensee may use the fire main system only for firefighting and deckwashing.

V 40 217 NOV 10 75 XUM

§ 150.505 Fire pump.

The licensee shall keep at least one of the fire pumps required by this subchapter ready for use on the fire main system at all times.

§ 150.507 Firehose: connection and stowage.

(a) Except as otherwise provided in paragraph (c) of this section, the licensee shall keep at least one length of firehose with a combination nozzle connected to each fire hydrant at all times.

(b) The licensee shall stow each firehose connected to a fire hydrant on a hose rack when not in use.

(c) A firehose in an exposed location may temporarily be removed from an exposed location to protect the firehose from damage during heavy weather.

(d) If the edge of a platform deck is in an exposed location, the licensee shall keep enough lengths of fire hose connected to the hydrant nearest the edge to allow 10 feet of hose, when pressurized, to curveover the edge.

§ 150.508 Lifesaving equipment.

(a) The licensee shall stow each inflatable life raft required by § 149.521 of this subchapter as near as practicable to launching equipment for the life raft.

(b) The licensee shall test lifeboat launching equipment required by § 149.524 of this subchapter immediately after installation in accordance with 46 CFR 94.35–5.

§ 150.509 Use of personal protection equipment.

(a) When any person is in a work area, the licensee shall ensure that such person wears:

(1) Safety shoes that meet the specifications prescribed by the American National Standard Institute (ANSI) Requirements for Men's Safety-toe Footware, Z41.1(1967); and

(2) Protective hats that meet the specifications prescribed by the ANSI Safety Requirements for Industrial Head Protection, Z89.1(1969).

(b) When an eye hazard from flying particles or heavy dust exists, the licensee shall ensure that each person in the area of the hazard is wearing eye protection equipment that meets the specifications prescribed by the ANSI Practice for Occupational and Educational Eye and Face Protection, Z87.1(1968).

(c) When hazardous work is being performed, the licensee shall ensure that any person who wears corrective eye glasses wear eye protection equipment that can be worn over eye glasses, or prescription ground safety lenses that meet the specifications prescribed by the ANSI Practice for Occupational and Educational Eye and Face Protection, Z87.1 (1968), if these lenses provide protection against the hazard involved.

(d) When handling hazardous materials the licensee shall ensure that all personnel in the area are wearing suitable protective clothing and equipment.

(e) When any person is exposed to combinations of sound levels and durations exceeding those listed in Table 150.509(e) the licensee shall ensure that the person is wearing ear protection equipment that reduces sound levels to or below the listed levels.

(f) When any person is working over or near the water, the licensee shall ensure that the person wears either a unicellular plastic foam work vest that meets the requirements of 46 CFR 160.053 or a life preserver that meets the requirements of 46 CFR 160.002, 160.005, or 160.055.

TABLE 150.509 MAXIMUM PERMISSIBLE NOISE EXPOSURES [1]

Duration per day/hours:	Sound level [2] decibel Angstrom slow response
8	90
6	92
4	95
3	97
2	100
1½	102
1	105
½	110
¼	115

[1] When the daily noise exposure is composed of two or more periods of noise exposure of different levels, their combined effect must be considered rather than the individual effect of each. If the sum of the fractions

$$\frac{(C_1+C_2+\ldots C_n)}{T_1\ T_2\ \ T_n}$$

is more than one, then, the mixed exposure exceeds the limit value. (C_n) is the total time of exposure at a specified noise level. (T_n) is the total time of exposure permitted at that level.

Exposure to impulsive or impact noise should not exceed 140 dB peak sound pressure level.

[2] Measured on the A scale of a standard sound level meter at slow response.

§ 150.511 Maintenance of personal protection equipment.

(a) The licensee shall clean and disinfect eye protection equipment that has been used before it is reissued.

(b) The licensee shall clean and disinfect protective hats that have been worn before they are reissued.

§ 150.513 Sanitation.

The licensee shall ensure that garbage is covered and that no person is working in the vicinity of uncovered garbage or of overboard discharges from sanitary lines that are not protected by a baffle or splash boards.

§ 150.515 Refueling for aircraft.

If the PPC is not equipped with a permanent fueling facility for aircraft, no person may fuel or cause or authorize the fueling of aircraft unless he has received the permission of the Captain of the Port.

§ 150.516 Aircraft operations.

The licensee shall ensure that appropriately clothed and sufficiently qualified fire fighting and rescue personnel to man equipment and effect a rescue are present during aircraft operations.

§ 150.517 Station bill.

(a) The licensee shall post copies of a station bill on each PPC.

(b) The licensee shall designate in writing on the station bill, by title and in order of succession, each person on the PPC who is a person in charge of the PPC for purposes of supervision in an emergency.

(c) The station bill must set forth:

(1) The special duties and duty stations of each person, by name, on the PPC for each emergency listed in the Operations Manual that involves the use or application of equipment required by Part 149 of this chapter; and

(2) The signals for calling persons to their emergency stations and for abandoning the PPC.

§ 150.519 Emergency drills.

The licensee shall conduct each emergency drill specified in the Operations Manual at least once every 30 days.

§ 150.521 Housekeeping.

(a) The licensee shall keep walking and working areas clear of all loose hazards that could cause tripping or stumbling.

(b) The licensee shall store portable equipment when it is not in use.

(c) The licensee shall eliminate slippery conditions on the platform as soon as practicable.

(d) No person may suspend a portable light by its cord unless the means of attachment of the cord to the light prevents the light from being suspended by the electrical connections.

(e) The licensee shall keep each area near a lifeboat, inflatable life raft, or means of escape described in §§ 149.421 and 149.423 of this chapter clear of obstructions that would interfere with immediate use of the lifeboat, life raft, or means of escape.

§ 150.523 Illumination.

(a) The licensee shall illuminate each walking and working area.

(b) No person may enter any dark place that does not have installed illumination unless he has a flashlight or other suitable portable light.

(c) No person may use matches or open flame lights as illumination.

§ 150.525 Emergency Medical Technician.

The licensee shall ensure that at least one person who holds a certificate of completion of the Department of Transportation, National Highway Traffic Safety Administration Basic Training Course (81 hours), from a state or from the National Registry of Emergency Medical Technicians, is on the PPC at all times.

§ 150.527 First aid station.

(a) The licensee shall ensure each first aid station on a PPC has enough medical supplies and equipment for the Emergency Medical Technician to provide emergency medical care.

(b) The first aid station may not be used for any purpose that prevents its immediate use as a first aid station.

Subpart F—Aids to Navigation at Deepwater Ports

§ 150.601 Applicability.

The rules in this subpart apply to the operation of aids to navigation at a deepwater port.

§ 150.603 Applicability of other regulations.

Section 66.01–20 of this chapter also applies to aids to navigation at a deepwater port.

§ 150.605 Aids to navigation: power supply.

The licensee shall maintain:

(a) Voltage at every operating lamp of each light at or above the operating voltage listed on the light; and

(b) The input power to the fog signal at or above the minimum input power listed on the fog signal.

§ 150.607 Lights.

(a) The licensee shall display each light required in Part 149 of this subpart between sunset and sunrise local time.

(b) During construction of a platform or SPM, the licensee shall mark the structure with at least one of the following:

(1) The obstruction lights required in Part 149 of this chapter for the structure.

(2) The fixed lights of a vessel attending the structure.

(3) General illumination lights on the structure that meet or exceed the intensity requirements for the obstruction lights required in Part 149 of this chapter for the structure.

(c) The licensee shall ensure that each light using a lens is operated with the light source at the focal point of the lens as determined by the means required in § 149.724.

(d) The licensee shall ensure that the focal plane of each platform obstruction light when operated, and of the rotating lighted beacon when operated, is always coincident with the horizontal plane passing through the light source.

§ 150.611 Fog signals.

(a) The licensee shall operate the fog signal on each PPC whenever the visibility in any horizontal direction from the structure is less than 5 miles.

(b) During construction of a platform, compliance with paragraph (a) of this section is not required if the PPC is attended by a vessel moored alongside the platform and the vessel sounds a 2 second whistle blast every 20 seconds whenever the visibility in any horizontal direction from the vessel is less than 5 miles.

Subpart G—Reports and Records

§ 150.701 Applicability.

This subpart prescribes reports to be submitted by the licensee and records and other information to be maintained by the licensee.

REPORTS

§ 150.703 Maintenance of ABS classification.

Whenever the licensee submits a report to the American Bureau of Shipping (ABS) that is required for maintenance of SPM class in accordance with ABS Rules for Building and Classing Single Point Moorings, 1975, he shall submit a copy of the report to the Commandant, U.S. Coast Guard.

§ 150.705 Aid to navigation discrepancy.

The licensee shall report promptly to the District Commander, by the fastest means of communications available, any discrepancy affecting the proper operation or characteristics of any aid to navigation at the deepwater port, whenever a discrepancy exists. Correction of the discrepancy shall also be reported promptly. The initial discrepancy report must include:

(a) Name or designation of aid;

(b) Location of aid;

(c) Nature of discrepancy; and

(d) Estimated time of correction.

§ 150.707 Oil throughput; payment to Deepwater Port Liability Fund.

(a) The licensee shall report to the District Commander, on a quarterly basis, beginning the first day of the calendar quarter immediately following the commencement of oil transfer operations, the oil cargo throughput of the deepwater port. The report must contain the following information:

(1) The oil cargo throughout during the previous calendar quarter measured in barrels.

(2) Calculated payment to the Deepwater Port Liability Fund as required by section 18(f)(3) of the Act.

(b) The payment must be enclosed unless the District Commander advises the licensee that collections have been suspended.

§ 150.709 Discharge of oil.

(a) The licensee, for purposes of notification of a discharge of oil required by section 18(b) of the Act, shall immediately report a discharge by telephone, radio telecommunications, or similar rapid means of communication to one of the following listed in order of priority:

(1) Duty officer, National Response Center, U.S. Coast Guard, 400 Seventh Street, SW., Washington, D.C. 20590, toll free telephone number 800–424–8802.

(2) The government official predesignated in the applicable Regional Contingency Plan as the On-Scene Coordinator for the geographic area in which the discharge occurs.

NOTE: Regional Contingency Plans are available at Coast Guard District Offices and Environmental Protection Agency (EPA) Regional Offices, as listed in 33 CFR 153.

(3) Commanding Officer or Officer-in-Charge of any Coast Guard unit in the vicinity of the discharge.

(4) Commander of the Coast Guard District in which the discharge occurs.

(b) In addition to the notice required by paragraph (a) of this section, the licensee shall immediately notify the Governor of the adjacent coastal State directly connected by pipeline to the deepwater port.

§ 150.711 Casualty or accident.

(a) The licensee shall submit to the Officer-in-Charge, Marine Inspection a report of casualty or accident whenever any of the following occur:

(1) Any component of the deepwater port is hit by a vessel and damage to property is in excess of $1,500.

(2) Damage to the deepwater port in excess of $25,000.

(3) Material damage affecting the usefulness of lifesaving or fire fighting equipment.

(4) Loss of life.

(5) Injury causing any person to remain incapacitated for more than 72 hours, arising from or directly connected with the use or employment of any emergency equipment described in Part 149 of this chapter.

(b) The deepwater port casualty or accident report, written in narrative form, must contain the following information:

(1) Name, number, or other designation of the deepwater port.

(2) Names and addresses of the owner, his agent, operator and the person in charge.

(3) Nature and probable cause of the casualty or accident.

(4) Date and time the casualty or accident occurred, if known, otherwise approximately when it occurred.

(5) Details of damage, especially with respect to lifesaving and fire fighting equipment.

(6) Nature and extent of injury to any person.

(7) Names and addresses of persons involved.

(8) Other comments, especially with respect to use or need for emergency equipment.

(c) In the investigations of casualties and accidents occurring at deepwater ports, the procedures in 46 CFR 4 for marine casualties apply.

§ 150.713 Sabotage or subversive activity.

The licensee shall report to the Captain of the Port any evidence of sabotage or subversive activity involving or endangering any vessel at the deepwater port or the deepwater port, immediately, by the fastest possible means of communication upon discovery. Written confirmation must follow.

RECORDS

§ 150.751 General.

(a) The licensee shall maintain copies of all reports, records, test and inspection results, and operating data required by these rules in a manner siutable for Coast Guard inspection at the deepwater port or an adjacent onshore facility.

(b) Except as specified in §§ 150.753–150.759 of this subpart, these copies must be maintained for three years.

§ 150.753 Key personnel: designations and qualifications.

The licensee shall retain documentation of the designation and qualifications of key port personnel for the duration of each individual's employment at the port. The documentation must include:

(a) Designations required by §§ 150.205–150.215; and

(b) Qualifications of personnel required by §§ 150.205–150.215.

§ 150.755 Port inspection records.

(a) The licensee shall maintain a record of all machinery, both fixed and portable,

V 40 217 NOV 10 75 XUM

such as generators, cargo pumps, fire pumps, and discharge containment and removal systems. This record must contain, for each piece of machinery:

(1) Nameplate and general descriptive data;

(2) Serial number;

(3) Location and purpose; and

(4) Record of tests and inspections.

(b) The licensee shall maintain a record of all fire fighting, lifesaving, and other emergency equipment, such as fire hoses, nozzles, applicators, fire extinguishers, life rafts, life preservers, and alarm systems. This record must contain, for each piece of emergency equipment:

(1) Nameplate and general descriptive data;

(2) Serial number;

(3) Location and purpose; and

(4) Record of tests and inspections.

(c) The licensee shall retain for one year a record of each monthly emergency drill required by § 150.519. The record must contain the date, time, and signature of the person in charge at the time of the drill.

(d) The licensee shall retain for three years a record of each test and inspection performed by port personnel. The record must contain the date and results of the test or inspection and the signature of the person conducting the test or inspection. These tests and inspections include, but are not limited to, those required in §§ 150.405–150.409 for oil transfer systems, discharge containment equipment, and discharge removal material and equipment, and those required for maintenance of ABS Classification, as specified in the "Rules for Building and Classing of Single Point Moorings, 1975" published by the American Bureau of Shipping.

§ 150.757 Oil throughput log.

The licensee shall maintain an oil throughput log, from which the report of oil throughput required by § 150.707 is prepared. Records in this log must be retained for three years, and must specify for each oil transfer operation:

(a) Vessel name, nationality, owner, and date of arrival;

(b) Country of origin of crude oil; and

(c) Total quantity in barrels of oil transferred.

§ 150.759 Declaration of inspection.

The licensee shall retain signed copies of the declaration of inspection forms required by § 150.417 for one month from date of signature.

(Secs. 5 and 10, 88 Stat. 2131, 2137 (33 U.S.C. 1501); 49 CFR 1.46(z)).

Effective date: These regulations shall become effective on November 17, 1975.

It is hereby certified that the economic and inflationary effects of this proposal have been carefully evaluated in accordance with Executive Order No. 11821.

Dated: October 31, 1975.

O. W. SILER,
Admiral,
U.S. Coast Guard Commandant.

DEPARTMENT OF TRANSPORTATION

Coast Guard

[33 CFR Part 148]

[CGD 75–194]

DEEPWATER PORT SITE EVALUATION

Proposed Requirements

● Purpose. The Coast Guard is considering an amendment to the deepwater port regulations which would add requirements relating to those activities involved in site evaluation and preconstruction testing at potential deepwater port locations. ●

Written comments. Interested persons are invited to participate in this proposed rulemaking by submitting written data, views, arguments, objections, and comments to the Executive Secretary, Marine Safety Council (G–CMC/82), Room 8234, U.S. Coast Guard, 400 Seventh Street, S.W., Washington, D.C. 20590. Each person submitting written comments should include the docket number of this notice (CGD 75–194), the name and address of the person submitting the comments, the specific section of the proposal to which each comment is addressed, and the reason for any recommendation.

Closing date for comments. All relevant communications received on or before December 26, 1975 will be fully considered before final action is taken on this proposal. This proposal may be changed in light of the comments received; however, acknowledgement of individual comments will not be made.

Availability of comments. Copies of all written comments received will be available for examination in Room 8234. Copies of comments will be furnished interested person upon request to the Executive Secretary (G–CMC/82) and payment of the fees prescribed in 49 CFR 7.95.

On page 52540 of this issue of the FEDERAL REGISTER, the Coast Guard promulgates an amendment to Chapter 1 of Title 33, Code of Federal Regulations which aids requirements governing the construction, design, equipment, and operation of deepwater ports off the coasts of the United States, under the provisions of the Deepwater Port Act of 1974 (the Act). This amendment was proposed in the May 7, 1975 issue of the FEDERAL REGISTER (40 FR 19956). That proposal included requirements governing site evaluation and preconstruction testing, proposed as Subpart E in Part 148.

Commenters on proposed Subpart E generally found the requirements inadequate in scope and content. The Coast Guard has carefully studied all the comments received and concluded that there is a valid need for site evaluation regulations more comprehensive than those originally proposed. After consulting with the Department of the Interior and the National Oceanic and Atmospheric Administration, as required by the Act, and the U.S. Environmental Protection Agency, comprehensive regulations are being proposed.

Section 5(b) of the Act prescribes the issuance of regulations relating to those activities involved in site evaluation and preconstruction testing at potential deepwater port locations that may—(1) adversely affect the environment; (2) interfere with authorized uses of the Outer Continental Shelf; or (3) pose a threat to human health and welfare. Under section 5(b), the Coast Guard proposes to amend 33 CFR Part 148 by adding a new Subpart E. This subpart would provide procedures for receiving, reviewing, and, if merited, authorizing plans for field activities to be performed in the area of potential deepwater port sites. The proposal includes the following key provisions:

1. Specifications for the contents of an application for authorization.

2. The general conditions which are to be imposed on all authorizations.

3. The delineation of types of activities which will normally be authorized.

4. Descriptions of reports which are to be submitted pursuant to an authorization.

5. Rules governing the suspension, revocation, or cancellation of authorization or activities.

Persons subject to this amendment would be affected as follows: They will have to prepare an application containing all the required information; and, if authorization is received, they will have to comply with the conditions imposed and submit required reports.

Within sixty days of receipt of an application, the Coast Guard would review the application, consult with appropriate Federal agencies, prepare an environmental assessment, and render a decision. Due to the limited nature of the activities involved in site evaluation and preconstruction testing activities, the Coast Guard anticipates no general need for public hearings or environmental impact statements on each application; however, the Coast Guard environmental assessment for each application received will serve to identify the appropriate action to be taken in the way of a public hearing and an environmental impact statement.

Violation of any provision in this amendment would subject the violator to the penalties in Section 15 of the Act. Any person who willfully violates a provision is subject to fines of not more than $25,000 for each day of violation or be imprisoned for not more than 1 year, or both. The Secretary may issue orders requiring compliance by persons in violation of the regulations, or he may bring a civil action for appropriate relief, including a permanent or temporary injunction or a civil penalty not to exceed $25,000 for each day of the violation.

The environmental impacts of this proposal have been assessed and are discussed in Chapter 3, § 3.4 of the "Final Environmental Impact Statement for the Deepwater Ports Regulations." This environmental impact statement was made available to the President's Council on Environmental Quality and the public on October 17, 1975. Copies are available upon request to the Executive Secretary (G–CMC/82), U.S. Coast Guard, Washington, D.C. 20590.

In consideration of the foregoing, it is proposed to amend Part 148 of Title 33, Code of Federal Regulations, by adding a new Subpart E, to follow Subpart D, to read as follows:

Subpart E—Site Evaluation

Sec.
148.501 Purpose.
148.503 Applying for site evaluation.
148.505 General conditions of authorization.
148.507 Reports.
148.509 Supervision, revocation, or cancellation of authorization.

AUTHORITY: Sec. 5(b), 88 Stat. 2131 (33 U.S.C. 1504(b)); 49 CFR 1.46(s).

Subpart E—Site Evaluation

§ 148.501 Purpose.

(a) This subpart prescribes requirements for site evaluation and preconstruction testing at potential deepwater port locations.

(b) For the purpose of this subpart, "site evaluation and preconstruction testing" means all field studies performed at potential deepwater port locations, including:

(1) Preliminary studies to determine site feasibility;

(2) Detailed studies of the topographic and geologic structure of the ocean bottom to determine its ability to support offshore structures and appurtenances; and

(3) Studies involved with the preparation of the environmental analysis required under § 148.109(t).

§ 148.503 Applying for site evaluation.

(a) Any person desiring to apply for an authorization to conduct site evaluation and preconstruction testing at potential deepwater port sites must submit an application and four copies of the application to the Commandant (G–W), U.S. Coast Guard, Washington, D.C. 20590, at least 60 days prior to the commencement of any activities contemplated under the application.

(b) Applications for authorization to conduct site evaluations and preconstruction testing at potential deepwater port locations must include the following:

(1) the identification of persons or agencies participating in the proposed activities.

(2) The type of activities and the manner in which they will be conducted.

(3) Chartlets showing the location where the proposed activities are to be conducted and locations of all offshore structures, including pipelines and cables, in or proximate to the area of proposed activity.

(4) The specific purpose of the activities.

(5) The dates on which the activities will be commenced and completed.

(6) The environmental data on and an assessment of, the environmental consequences of the activities.

(7) A preliminary report of the historic and archeological significance of the area where the proposed activities are to take place, including a report of each

V 40 217 NOV 10 75 XUM

contact made with any appropriate State liaison officer for historic preservation.

(8) Any additional information that the Coast Guard requires.

(c) The Coast Guard will advise and coordinate with appropriate Federal agencies and States concerning authorization under this subpart.

§ 148.505 General conditions of authorization.

(a) No person may conduct activities to which this subpart applies except in compliance with the terms and conditions of the authorization, the regulations in this part, and all other applicable laws and regulations.

(b) Separate authorization is required for each site.

(c) Each authorization is subject to terms and conditions including, but not limited to, requirements necessary to prevent or minimize the effect of those activities that may:

(1) Adversely affect the environment;

(2) Interfere with authorized uses of the Outer Continental Shelf or navigable waters; or

(3) Pose a threat to human health and welfare.

(d) The applicant must notify the Coast Guard before commencing activities under the authorization.

(e) The Coast Guard usually authorizes the following activities:

(1) Gravity and magnetometric measurements.

(2) Bottom and sub-bottom acoustic profiling without the use of explosives.

(3) Sediment sampling of a limited nature using either core or grab samplers if geological profiles indicate no discontinuities that may have archeological significance.

(4) Water and biotic sampling, if the sampling does not adversely affect shellfish beds, marine mammals, or an endangered species, or if permitted by another Federal agency.

(5) Meteorological measurements, including the setting of instruments.

(6) Hydrographic and oceanographic measurements, including the setting of instruments.

(7) Small diameter core sampling to determine foundation conditions.

§ 148.507 Reports.

Each person authorized to conduct site evaluation and preconstruction testing at potential deepwater port locations shall:

(a) Notify the Coast Guard of any evidence of objects of cultural, historical, or archeological significance immediately upon their discovery;

(b) Notify the Coast Guard immediately of any:

(1) Adverse affects on the environment;

(2) Interference with authorized uses of the Outer Continental Shelf;

(3) Threat to human health and welfare; and

(4) Adverse affects to any site, structure, or object or historical or archeological significance; and

(c) Submit a final written report to the Coast Guard within 30 days after the completion of activity that contains:

(1) A narrative description of the activities performed;

(2) Charts, maps, or plats for the area where the activities were conducted and referencing the narrative description required in paragraph (c)(1) of this section;

(3) The dates on which the activities were performed;

(4) Information on any adverse effects on the environment, other uses of the area where the activities were conducted, human health or welfare, or any site, structure, or object of historical or archeological significance;

(5) Data on the historical or archeological significance of the area studies, including the report of an underwater archeologist, if physical data indicate the need for such expertise as related to the activities undertaken; and

(6) Any additional information that may be required by the Coast Guard.

§ 148.509 Suspension, revocation, or cancellation of authorization.

(a) The Commandant may order, either in writing or orally with written confirmation, the immediate suspension, for a period not to exceed 30 days, of any activity conducted pursuant to an authorization issued in accordance with the regulations in this subpart, when, in his judgment, such activity threatens immediate, serious, and irreparable harm to human life, biota, property, cultural resources, any valuable mineral deposits, or the environment.

(b) The Commandant may suspend or revoke an authorization under which the activities are being conducted, or are proposed to be conducted, because the activity:

(1) Threatens immediate, serious, and irreparable harm to life, including biota, property, cultural resources, any valuable mineral deposits, or the environment; or

(2) Violates applicable laws, regulations, or the terms and conditions of the authorization, including the timely submission of reports and analyses.

(Sec. 5(b), 86 Stat. 2131 (33 U.S.C. 1504(b)); 49 CFR 1.46(s))

Dated: October 31, 1975.

D. J. RILEY,
Captain, U.S. Coast Guard, Acting Chief, Office of Marine Environment and Systems.

Title 3—The President

PROCLAMATION 4409

American Education Week, 1975

By the President of the United States of America

A Proclamation

Our schools are no better than we make them. They can provide a solid educational foundation for our children. They can provide a training ground for leadership development. They can offer an opportunity for expanded technical knowledge and cultural enrichment through continued education. They can become a center for community involvement. But the future our schools provide is in large measure dependent upon our involvement.

We must be concerned for our sake, for our children's sake and for the future of our Republic. This Nation's greatness depends upon the enlightenment of each generation.

Although we can be justly proud of our system of American education, we must not become complacent. What we teach our children in school and what adults continue to learn through advanced courses and community educational opportunities will affect our own future—and our Nation's future.

It is particularly appropriate, therefore, as we celebrate our 200 years of history, to emphasize the importance of American education in the lives of every American.

NOW, THEREFORE, I, GERALD R. FORD, President of the United States of America, do hereby designate the week beginning November 16, 1975, as American Education Week.

I urge parents to visit their children's schools, to learn what their children are learning and to join with teachers and administrators in providing an enriching environment for their children's educational experience.

I urge all students to recognize the unique opportunity they have in this great Republic to reach out for greater knowledge and deeper understanding of man and his environment.

I urge students, teachers and administrators to plan appropriate activities which encourage participation in student government.

I urge everyone, either informally or in the classroom setting, to take advantage of the growing opportunities for adult education in technical skills, employment skills and cultural and intellectual pursuits.

V 40 I 218 NOV 11 75 XUM

During American Education Week, I urge every American to recommit himself to the process of continuing education for every man, woman and child.

IN WITNESS WHEREOF, I have hereunto set my hand this tenth day of November, in the year of our Lord nineteen hundred seventy-five, and of the Independence of the United States of America the two hundredth.

Gerald R. Ford

[FR Doc.75-30587 Filed 11-10-75;12:07 pm]

rules and regulations

This section of the FEDERAL REGISTER contains regulatory documents having general applicability and legal effect most of which are keyed to and codified in the Code of Federal Regulations, which is published under 50 titles pursuant to 44 U.S.C. 1510.
The Code of Federal Regulations is sold by the Superintendent of Documents. Prices of new books are listed in the first FEDERAL REGISTER issue of each month.

Title 7—Agriculture

CHAPTER IV—FEDERAL CROP INSURANCE CORPORATION, DEPARTMENT OF AGRICULTURE

PART 401—FEDERAL CROP INSURANCE

Subpart—Regulations for the 1969 and Succeeding Crop Years

CHAPTER VII—AGRICULTURAL STABILIZATION AND CONSERVATION SERVICE (AGRICULTURAL ADJUSTMENT), DEPARTMENT OF AGRICULTURE

SUBCHAPTER B—FARM MARKETING QUOTAS AND ACREAGE ALLOTMENTS

PART 728—WHEAT

Wheat Program for Crop Years 1975–1977

On May 20, 1974, a notice of proposed rulemaking regarding determinations with respect to the 1975 crop of wheat was published in the FEDERAL REGISTER (39 FR 17767). Interested persons were invited to submit written data, views, and recommendations regarding the determinations within 30 days. The comments and recommendations received have been duly considered.

This subpart, which is issued pursuant to the Agricultural Act of 1949, as amended by the Agricultural Act of 1970, Public Law 91-524, 84 Stat. 1358, and by the Agriculture and Consumer Protection Act of 1973, Public Law 93-86, 87 Stat. 224, and Public Law 93-226, 87 Stat. 944, supersedes for the crop years 1975–1977 the regulations governing the Wheat Program for crop years 1974–1977, 39 FR 26707, as amended. This subpart, which incorporates the provisions of the existing regulations with the following principal changes, sets forth the conditions under which wheat producers may qualify for program benefits:

(1) No intention to participate in the program is filed. Producers report disasters when they occur, report crop acreages as necessary for program administration, and apply for any applicable payments.

(2) All acreage planted to wheat is defined as wheat acreage and considered to be nonconserving. There is provision for excluding part of the acreage for low yield disaster payment purposes, in such instances as when the acreage is planted solely for pasture, or nonfeed use, or is in excess of the allotment and is timely destroyed without feed benefit.

(3) Allotments are adjusted for low yield payment purposes to reflect underplanting and the substitution of wheat for feed grains.

(4) Wheat payments are computed separately from feed grain and upland cotton payments.

(5) Disaster payments are made for wheat only when wheat has suffered a production loss and are computed on the bushels lost.

Subpart—Wheat Program for Crop Years 1975–1977

Sec.

728.1	General.
728.2	Definitions.
728.3	Administration.
728.4	1975 national wheat allotment.

728.24	Supervisory authority of State committee.
728.25	Delegation of authority.

AUTHORITY: Sec. 107, 87 Stat. 224 (7 U.S.C. 1445a); sec. 379c, 87 Stat. 227 (7 U.S.C. 1379c); sec. 375(b), 52 Stat. 66 (7 U.S.C. 1375 (b)).

Subpart—Wheat Program for Crop Years 1975–1977

§ 728.1 General.

(a) The regulations in this subpart provide terms and conditions for the wheat program for the 1975 through 1977 crops of wheat, respectively, under which producers on farms for which an allotment is established may qualify for payments authorized under the program.

(b) Producers who meet the eligibility requirements in § 728.13(c) may qualify for payments.

(c) In accordance with section 101 of the Agricultural Act of 1970, as amended, and the regulations in Part 795 of this chapter, as amended, the total amount of payments which a person shall be entitled to receive annually under the wheat program, the feed grain program, and the upland cotton program shall not exceed $20,000.

(d) In accordance with the regulations in Part 796 of this chapter, payments are prohibited to program participants who harvest or knowingly permit to be harvested for illegal use marihuana or other such prohibited drug-producing plants on any part of the lands owned or controlled by them.

(e) The program is applicable throughout the United States except Alaska and Hawaii.

§ 728.2 Definitions.

In the regulations in this subpart and in all instructions, forms, and documents in connection therewith, the words and phrases defined in this section shall have the meaning assigned to them herein unless the content or subject matter otherwise requires.

(a) "Annual nonconserving crop" means any annual crop intended for harvest or utilized in any feed form, except for the following:

(1) Grasses regardless of use, including sweet sorghum, millet, and sudan grass.

(2) Legumes, other than peas or beans produced for seed, grain, or processing.

(3) Immature small grains (other than wheat or barley) destroyed by any means or used for other than grain.

(b) "Cropland Adjustment Program" (herein called CAP) means the program authorized under Title VI of the Food and Agriculture Act of 1965, as amended, Part 751 of this chapter, as amended.

(c) "Cropland Conversion Program" (herein called CCP) means the program authorized under section 16(e) of the Soil Conservation and Domestic Allotment Act, as amended, Part 751 of this chapter, as amended.

(d) "Current year" means the calendar year in which the wheat crop with respect to which payment may be made under this subpart would normally be harvested.

(e) "Feed Grain Program" means the program authorized under Title V of the Agricultural Act of 1970, Part 775 of this chapter, as amended.

(f) "Upland Cotton Program" means the program authorized under Title VI of the Agricultural Act of 1970, Part 722 of this chapter, as amended.

(g) "Wheat acreage" means:

(1) Any acreage planted to wheat, and any acreage of volunteer wheat which is harvested as grain.

(2) Any acreage devoted to a mixture of crops if the county committee determines that the predominant crop is wheat and such acreage meets the requirements of paragraph (g)(1) of this section as being wheat acreage.

(h) "Wheat planted and considered planted acreage" means the wheat acreage as defined in paragraph (g) of this section and:

(1) Any acreage which the county committee determines was not planted to wheat because of drought, flood, or

V 40 N 218 NOV 11 75 XUM

other natural disaster or condition beyond the control of the operator;

(2) Any acreage credited as wheat (except for new farms) under the provisions of Part 719 of this chapter, as amended;

(3) Any acreage which is planted and considered planted to feed grains under Part 775 of this chapter, as amended, in excess of the allotment and which is not credited to cotton: *Provided*, That feed grains in excess of the allotment shall not be considered as planted to wheat for purposes of § 728.7(b)(4)(iii);

(4) Any acreage which is planted and considered planted to cotton under Part 722 of this chapter, as amended, in excess of the allotment and which is not credited to feed grains: *Provided*, That cotton in excess of the allotment shall not be considered as planted to wheat for purposes of § 728.7(b)(4)(iii);

(5) Any other acreage which is planted to annual nonconserving crops or which the county committee determines was not planted because of drought, flood, or other natural disaster or condition beyond the control of the operator, excluding acreage of allotment crops within the applicable allotment and which is not credited to cotton or feed grains: *Provided*, That such nonconserving crops shall not be considered as planted to wheat for purposes of § 728.7(b)(4)(iii); and

(6) An acreage (except for new farms) equal to the amount that the wheat allotment is reduced for the current year as provided in § 728.7(c)(2).

(i) In the regulations in this subpart and in all instructions, forms, and documents in connection therewith, all other words and phrases shall have the meanings assigned to them in the regulations governing reconstitution of farms and allotments, Part 719 of this chapter, as amended.

§ 728.3 Administration.

(a) The program will be administered under the general supervision of the Administrator, Agricultural Stabilization and Conservation Service (ASCS), and shall be carried out in the field by Agricultural Stabilization and Conservation State and county committees (herein called "State and county committees") and the ASCS Data Systems Field Office.

(b) State and county committees, the ASCS Data Systems Field Office, and representatives and employees thereof do not have authority to modify or waive any of the provisions of the regulations in this subpart, as amended or supplemented.

§ 728.4 1975 national wheat allotment.

NOTE: The 1975 wheat allotment is set out in 39 FR 13869.

§ 728.4a 1976 national wheat allotment.

NOTE: The 1976 wheat allotment is set out in 40 FR 16831.

§ 728.4b 1977 national wheat allotment [Reserved]

[To be issued as an amendment to this subpart.]

§ 728.5 Apportionment of the 1975–1977 national wheat allotments among the several States.

The national allotment of wheat is distributed each year on a pro rata basis to the States on the basis of each State's allotment for the preceding year, adjusted for (a) the administrative transfer of farms between States, (b) decreases resulting from farms no longer engaged in agricultural production, farms dropped from the eminent domain pool, farms losing allotment for failure to plant, and farms voluntarily relinquishing their allotment, and (c) established crop-rotation practices in the States of Colorado, Oregon, Utah, and Washington. State allotments are available for inspection in State and county ASCS offices.

§ 728.6 Apportionment of the 1975–1977 State allotments of wheat among their respective counties.

The State allotment for wheat, less reserves for new farms, appeals and corrections, is apportioned each year among the counties in the State on the basis of each county's allotment for the preceding year, adjusted for:

(a) The administrative transfer of farms between counties,

(b) Acreage allocated to new farms from the State reserve,

(c) Acreage removed from farms no longer engaged in agricultural production, farms dropped from eminent domain pool, farms losing allotment for failure to plant, and farms voluntarily relinquishing their allotment, and

(d) Such other relevant factors as determined necessary by the State committee to establish a fair and equitable apportionment base for the county. County allotments are available for inspection in the county ASCS office.

§ 728.7 Farm wheat allotment.

(a) *How obtained.* Except as otherwise provided in this section, the farm wheat allotments for each crop of wheat shall be determined by the county committee by apportioning the county wheat allotment among farms in the county on the basis of the farm wheat allotment for the preceding crop, adjusted to reflect established crop-rotation practices and such other factors as the Deputy Administrator determines should be considered for the purpose of establishing a fair and equitable allotment. Allotments determined as set forth in this paragraph shall be approved by a representative of the State committee.

(b) *New farm allotment*—(1) *Written application.* Each year, the county committee, with the approval of the State committee, shall establish a wheat allotment (herein called "new farm allotment") for each eligible farm for which an allotment is requested in writing by July 1 of the year immediately preceding the current year in the winter wheat area, and by February 15 of the current year in the spring wheat area. The spring wheat area shall include any area where spring wheat is normally grown, even though winter wheat is also grown in such area. Each request shall be made by the farm owner or operator on Form MQ–25, Application for New Farm or Producer Allotment or Quota, which shall contain statements as to location and identification of the farm, name and address of the farm operator, and other data necessary to enable the county committee to determine whether the conditions of eligibility prescribed in paragraph (b)(2) of this section have been met.

(2) *Eligibility requirements for owner or operator.* Eligibility for a new farm allotment shall be conditioned upon the following:

(i) *Allotment for farm.* The farm does not otherwise qualify for a wheat allotment.

(ii) *Interest in another farm.* Neither the farm owner nor the farm operator owns, has an ownership interest in, or operates any other farm in the United States for which a wheat allotment is established for the current year.

(iii) *Previous experience.* The applicant has produced wheat in any year prior to the year for which the request is made for a new farm allotment.

(iv) *Availability of equipment and facilities.* The operator has adequate equipment and other facilities readily available for the successful production of the crop on the farm.

(v) *Income requirement.* The operator expects to obtain during the current year more than 50 percent of his income from the production of agricultural commodities or products from farming.

(a) *Computing operator's income.* The following shall be considered in computing operator's income:

(1) *Income from farming.* Income from farming shall include the estimated return from the production of the requested allotment and from home gardens, livestock and livestock products, poultry, or other agricultural products produced for home consumption or other use on the farm(s), but shall exclude payments authorized under the wheat program.

(2) *Income from nonfarming.* Nonfarming income shall include but shall not be limited to salaries, commissions, pensions, social security payments and unemployment compensation.

(3) *Spouse's income.* The spouse's farm and nonfarm income shall be used in the computation.

(b) *Operator a partnership.* If the operator is a partnership, each partner must expect to obtain more than 50 percent of his current year income from farming.

(c) *Operator a corporation.* If the operator is a corporation, it must have no major corporate purpose other than ownership or operation of the farm. Farming must provide its officers and general manager with more than 50 percent of their expected income. Salaries and dividends from the corporation shall be considered as income from farming.

(d) *Special provision for low-income farmers.* The county committee may

waive the income provisions in this section provided the county committee determines that the farm operator's income, from both farm and nonfarm sources, will not provide a reasonable standard of living for the operator and his family, and a State committee representative approves such action. In waiving the income provisions the county committee must exercise good judgment to see that such determination is reasonable in the light of all pertinent factors, and that this special provision is made applicable only to those who qualify. In making such determination, the county committee shall consider such factors as size and type of farming operations, estimated net worth, estimated gross family farm income, estimated family off-farm income, number of dependents, and other factors affecting the individual's ability to provide a reasonable standard of living for himself and his family.

(3) *Eligibility requirements for the farm.* The eligibility requirements for a new farm allotment for the farm are as follows:

(i) *Available land, type of soil, and topography.* The available land, type of soil, and topography of the land on the farm must be suitable for wheat production, and continuous production must not result in an undue erosion hazard.

(ii) *Allotment reduced to zero at the farm owner's request.* At least 3 years must have elapsed from the date the farm wheat allotment is reduced to zero at the farm owner's request, as authorized in paragraph (c) of this section, to the date the request for a new farm allotment is considered.

(iii) *Eminent domain.* A farm which includes land acquired by an agency having the right of eminent domain for which the entire wheat allotment was pooled pursuant to Part 719 of this chapter, as amended, which is subsequently returned to agricultural production, shall not be eligible for a new farm allotment for a period of 3 years from the date the former owner was displaced.

(iv) *Entire allotment designated by owner for a reconstitution.* A farm which includes land which has no allotment because the owner did not designate an allotment for such land when the parent farm was reconstituted pursuant to Part 719 of this chapter, as amended, shall not be eligible for a new farm allotment for a period of 3 years beginning with the year in which the reconstitution became effective.

(4) *Limitations.* (i) *Wheat acreage planned.* The county committee shall limit the wheat allotment to the smaller of the allotment requested or the wheat acreage planned for the farm for the first year to which the allotment would be applicable.

(ii) *Reserve.* The total new farm wheat allotments approved in a State in the current year shall not exceed a reserve established by the State committee of not more than 1 percent of the total wheat allotments for all farms in the State. No part of that 1 percent shall be allocated to a farm to reflect new cropland brought into production after November 30, 1970.

(iii) *Current year wheat acreage.* Notwithstanding any other provision of this subpart, if the wheat planted and considered planted acreage for the year a new farm allotment is established is less than 90 percent of the allotment, the allotment for such year shall be reduced to the acreage planted and considered planted to wheat and payments computed on the basis of such reduced allotment.

(5) *Cancellation of new farm allotment for misrepresentation.* If a new farm allotment is established and it is later determined by the county committee that the applicant unknowingly furnished incomplete or inaccurate information the allotment shall be cancelled effective for the next crop year. If it is determined that the applicant knowingly furnished incomplete or inaccurate information and the State committee concurs in the county committee determination, the allotment shall be cancelled as of the date issued.

(c) *Reduced allotments.* Notwithstanding any other provisions of this subpart, wheat allotments shall be reduced as follows:

(1) *Permanent reductions.*

(i) The allotment shall be reduced:

(a) To the extent requested in writing by the farm owner not later than the date established by the State committee, and

(b) To the extent acreage of cropland on the farm is permanently removed from agricultural production, as determined by the county committee.

(ii) If the current year's wheat planted and considered planted acreage is less than 90 percent of the allotment, the allotment for the succeeding year shall be reduced by the percentage by which the planted and considered planted acreage is less than the allotment for the current year, but such reduction shall not exceed 20 percent of the allotment. If the wheat planted and considered planted acreage is zero for three consecutive years, the allotment shall be reduced to zero. However, no allotment shall be reduced or lost through failure to plant if all producers elect by September 1 of the current year to limit the acres for deficiency payment to the wheat planted and considered planted acreage as provided in § 728.15(f).

(2) *Reductions for current year.* The following reductions shall be made by reducing the smallest allotment first and continuing in order of the size of the allotment, unless the operator requests in writing that the reduction be in a different order.

(i) Reduce feed grain, wheat, and upland cotton allotments each year to the extent the sum of allotments for all commodities exceeds the cropland for the farm.

(ii) Reduce feed grain and wheat allotments each year to the extent the sum of feed grain and wheat allotments exceeds the cropland which, under normal conditions, could reasonably be expected to produce an allotment crop.

(iii) In the case of a farm participating in the CAP or CCP, reduce feed grain, wheat, and upland cotton allotments that are not partially or completely diverted under the CAP or CCP, to the extent they total more than the number of acres of nonconserving crops permitted under the CAP or CCP.

§ 728.8 County yields.

County yields for the current year are determined for each wheat-producing county in the United States except for counties in Alaska and Hawaii, and New Hampshire, for which no apparent need for such yields exists. The county yield for the current year was determined on the basis of the average yields per harvested acre of wheat for the county for the five-year period immediately preceding the year in which such county yield was determined. Such yield is determined by the Statistical Reporting Service and adjusted as applicable for abnormal weather conditions affecting such yields, for trends in yields, and for any significant changes in production practices. The county yields for the current year are available for inspection in the county ASCS office.

§ 728.9 Farm yields.

(a) *Determining yields.* The per acre farm yield shall be the county yield, adjusted to reflect the farm productivity for the commodity and established in accordance with instructions issued by the Deputy Administrator.

(b) *Provable yields.* Notwithstanding the provisions of paragraph (a) of this section, if reliable records of the actual yield in bushels per acre on the farm for each of the five years immediately preceding the year in which the yield is determined are available to the county committee, the yield established for the farm shall not be less than the average of such yields, with such adjustment as determined necessary to provide a fair and equitable yield. If the actual yield in any one of the five years immediately preceding the year in which the yield is determined is less than two-thirds of the average of the actual yields for the other four years, the operator or other affected producer furnishes a signed and dated statement that the low yield is the result of a natural disaster, and the county committee makes no determination that something other than a natural disaster caused the yield to be low, 93 percent of the average for the other four years shall be used in lieu of the average for the five years in establishing a yield. The operator or other affected producer shall report current year wheat acreage by filing a Report of Acreage (herein called "Form 580") if the foregoing provisions are to apply to any program year for which the five year period includes the current year.

(c) *Yield reduction.* For the purpose determining eligibility for and amount of low yield payment as provided in § 728.17(b), the established yield for the farm shall be reduced in accordance with instructions issued by the Deputy Administrator to reflect any reduction in the current year yield which is due to causes other than a natural disaster or condition beyond the control of the producer, such as a change in farming practices.

V 40 218 NOV 11 75 XUM

§ 728.10 Payment rates.

Payment rates shall be established separately for deficiency payments and for disaster payments.

(a) *Deficiency payment rates.* The per bushel deficiency payment rate for each crop of wheat shall be the amount by which the higher of

(1) The national weighted average market price received by farmers for wheat during the first five months of the marketing year for such crop beginning July 1 or

(2) The national average loan rate established for such crop is less than the established price of $2.05 per bushel in the case of the 1975 crop, $2.05 per bushel adjusted to reflect any change during the calendar year 1975 in the index of prices paid by farmers for production items, interest, taxes, and wage rates in the case of the 1976 crop, and the established price for the 1976 crop adjusted to reflect any change during the calendar year 1976 in such index in the case of the 1977 crop: *Provided,* That any increase that would otherwise be made in the established price to reflect a change in the index of prices paid by farmers shall be adjusted to reflect any change in:

(i) The national average yield per acre of wheat for the three calendar years preceding the year for which the determination is made, over

(ii) The national average yield per acre of wheat for the three calendar years preceding the year previous to the one for which the determination is made.

(b) *Disaster payment rates.* The per bushel disaster payment rate shall be equal to the larger of the deficiency payment rate or one-third of the established price. The disaster payment rate for the 1975 program year is $.68 per bushel.

§ 728.11 Notice of allotments and yields.

Each operator interested in the wheat crop on a farm for which a wheat allotment is established shall be notified in writing of the allotment and established yield per acre: *Provided,* That the notice shall not be mailed to any producer who has filed a written request that he not be furnished the notice but it shall be filed with the producer's request in the county office. The producer may withdraw his request at any time; however, during the period a request is in effect, the producer shall be considered as having been timely and correctly notified of the contents of this notice. Such notices will be on Form ASCS–476, Notice of Allotments and Yields (herein called "Form 476").

§ 728.12 Reconstitution of farms.

Farms shall be reconstituted and wheat allotments established therefor in accordance with Part 719 of this chapter as amended. Yields for farms which are reconstituted after yields are originally established shall be determined as follows:

(a) *Combination.* Multiply the allotment by the yield for each parent farm, and divide the sum of the results for all parent farms by the sum of allotments on the parent farms.

(b) *Division.* Determine a yield in accordance with § 728.9. The weighted average yields for all the farms resulting from the division are limited to the yield for the parent farm, except for rounding.

§ 728.13 Requirements for program participation.

(a) *General.* A person is eligible for the program if he is a producer on a farm which meets the requirements of paragraph (b) of this section and he fulfills the requirements of paragraph (c) of this section.

(b) *Farm requirements.* (1) For disaster payments, a Form 580 and an Application for Disaster Credit (herein called "Form 574") shall be filed by the operator of an eligible farm with the office of the county committee having jurisdiction over the county where the farm is located. He shall also file a Record of Acreages, Production, and Disposition (herein called "Form 658") when the information thereon is needed for program determinations. These forms shall be filed within the period authorized by the Deputy Administrator.

(2) In the case of any farm participating in the CAP or CCP, the acreage of wheat and other nonconserving crops shall not exceed the number of acres of nonconserving crops permitted under the CAP or CCP.

(3) Land owned by the Federal Government shall be ineligible for participation in the program if it is occupied without a lease, permit, or other right of possession.

(4) Producers on a farm acquired for future development for purposes other than agricultural production shall not be eligible for participation in the program, unless the county committee determines that the farm is actively engaged in the production of crops for harvest other than hay, sod, ornamentals, or timber.

(c) *Producer eligibility requirements.* (1) The producer must be a person who as landowner, landlord, tenant, or sharecropper, shares in the wheat produced in the current year (or the proceeds therefrom) on a farm meeting the requirements of paragraph (b) of this section or would have shared if wheat had been produced on such farm in the current year.

(2) A minor will be eligible to participate in the program only if:

(i) The right of majority has been conferred on him by court proceedings;

(ii) A guardian has been appointed to manage his property and the applicable documents are signed by the guardian; or

(iii) A bond is furnished under which a surety guarantees to protect the Commodity Credit Corporation from any loss incurred for which the minor would be liable had he been an adult. Notwithstanding the foregoing, payment may be made to a minor after December 31 of the current year upon a determination by the county committee that the minor has met the requirements of the program.

§ 728.14 Determination of compliance.

(a) Determination of the acreage devoted to wheat and other annual nonconserving crops shall be made in accordance with Part 718 of this chapter, as amended.

(b) A representative of the county committee or the State committee or any authorized representative of the Secretary shall have the right at any reasonable time to enter a farm, concerning which representations have been made on any forms filed under the program, in order to measure the acreage planted to wheat and other annual nonconserving crops, to examine any records pertaining thereto, and otherwise to determine the accuracy of a producer's representation and the performance of his obligations under the program.

§ 728.15 General payment provisions.

(a) *Issuance.* Payments of any amounts due the producers on a farm shall be made only after they sign an Application for Payment (herein called "Form 516"), and the payments are approved by the county committee or by an authorized representative thereof. A Form 516 signed after May 1 of the year following the current year shall not be accepted by the county committee unless prior approval of the State committee is obtained.

(b) *Failure to fully comply.* Except as otherwise provided herein and in Part 791 of this chapter, as amended, payment shall not be made for a farm or to a producer when there is failure to comply fully with the regulations contained in this subpart, and in Part 718 of this chapter.

(c) *Payment due producer.* Subject to the provisions of the payment limitation regulations in Part 795 of this chapter, as amended, the total earned payment due each eligible producer under the program shall be determined by multiplying the total earned payment for the farm by the producer's share of such payment.

(d) *Payment declined.* If a producer declines to accept all or any part of his share of the payment computed for a farm in accordance with the provisions of this section, such payment or portions thereof shall not become available for any other producer on the farm.

(e) *Idle farms.* Producers on a farm not used for the commercial production of crops or livestock on cropland, or from which only sod, ornamentals, or timber are harvested, shall not be eligible for program payments when the wheat allotment is preserved with vegetative cover as authorized by the regulations in Part 719 of this chapter, as amended.

(f) *Allotment protection.* Producers otherwise eligible for payment may elect by September 1 of the current year to limit the acres for deficiency payment to the wheat planted and considered planted acreage in order to protect the wheat allotment from reduction due to failure to plant.

(g) *Unearned payments.* Payments to any producer which exceed the total payment he earns under the program with respect to any farm shall be refunded to the Commodity Credit Corporation and, if for any reason such earned payment is zero, he shall pay interest at the rate of 6 percent per annum on the amount of the refund from the issue dates of the sight drafts to the date the payments are refunded. The provisions of the foregoing sentence requiring the payment of interest when no payment is earned shall not apply if the producer earns any feed grain or upland cotton payments for the farm or receives an unearned payment through no fault of his.

§ 728.16 Deficiency payments.

(a) Deficiency payments shall be terminated by multiplying the allotment by the farm yield established as provided in § 728.9 and by the per bushel rate determined in accordance with § 728.10 (a): *Provided,* That no deficiency payment shall be made for any part of the allotment times the yield for which a disaster payment is made.

(b) Deficiency payments will be made to producers as soon as practicable after December 1 of the current year.

§ 728.17 Disaster payments.

Producers may qualify for disaster payments only when the county committee determines that prevented planting or a low yield as hereinafter described in this section occurs because of drought, flood, or other natural disaster or condition beyond the control of the producer. Disaster payments shall be made as soon as practicable after the disaster is reported, the extent of crop loss is determined, and payment is approved.

(a) *Prevented planting.* (1) The acreage for prevented planting payments shall be determined by grouping the farm's wheat and feed grain allotments together and shall equal the smaller of:

(i) The acreage of annual nonconserving crops the producer is prevented from planting, or

(ii) The amount that the sum of feed grain and wheat allotments exceeds the total acreage of annual nonconserving crops, excluding acreage within the applicable allotment of commodities other than feed grains and wheat, acreage disregarded for low yield purposes according to paragraph (b) (1) (i) thru (iii) of this section, and failed upland cotton acreage which could have been replanted but was not.

(2) Prevented planting payments shall be determined by:

(i) Crediting the acreage for payment first to the underplanting of the allotment for the crop with the highest per acre payment rate and continuing in order of the size of the payment rate, but limiting the acreage credited to feed grains to the total feed grain underplanting.

(ii) Reducing the acreage otherwise credited to each crop by the acreage of that crop disregarded for low yield purposes according to paragraph (b) (1) (i) thru (iii) of this section.

(iii) Multiplying the acreage credited to each feed grain by the applicable yield established as provided in § 775.9 and by the applicable per bushel rate determined in accordance with § 775.10(b).

(b) *Low yields.* (1) For the purpose of determining eligibility for low yield payments and the total acreage on which such payments will be made, the "disaster allotment" for wheat means the effective allotment for wheat adjusted downward to the extent it is underplanted or adjusted upward to the extent it is overplanted as a substitute for underplanted feed grain allotment established for the farm: *Provided,* That such adjustment shall disregard

(i) Barley or wheat acreage designated solely for grazing or non-feed use in accordance with instructions issued by the Deputy Administrator, (ii) failed feed grain or wheat acreage which could have been replanted but was not, (iii) barley or wheat acreage planted to a variety bred to produce no grain, and (iv) feed grain or wheat acreage designated solely for wildlife use in accordance with instructions issued by the Deputy Administrator.

(2) For low yield payment purposes, the county committee shall disregard the production from the disregarded acreage as well as production from acreage in excess of the disaster allotment which is mechanically destroyed without feed benefit prior to the time most of the wheat in the area has headed.

(3) A farm shall not be deemed to have suffered a loss which qualifies it for a low yield payment unless the current year production of wheat is less than the disaster allotment multiplied by the yield established as provided in § 728.9 and by a factor determined by dividing the 10-year average county yield by the county yield referred to in § 728.8 and multiplying the result by two-thirds: *Provided,* That if county yields are available for less than 10 years the factor shall be based on the number of years available. No county factor shall exceed 0.6667. A farm may qualify for a low yield payment even though it does not qualify under the foregoing provision if (i) the provisions of § 728.9(c) do not result in a reduction in the established yield and (ii) the current year production is less than two-thirds of what the production would be if computed by multiplying the disaster allotment by one of the following:

(i) The smaller of the yield established as provided in § 728.9 or the actual unadjusted average yield for the preceding five years.

(ii) The yield established as provided in § 728.9 and:

(a) There is convincing proof that the loss was due to a sudden and identifiable destruction of the crop.

(b) Part of the acreage is substantially unaffected by the disaster, all of which averages at least two-thirds of the established yield, and the county committee determines that but for the disaster the per acre yield for the farm would have been at least two-thirds of the established yield, and

(c) Payment is approved in writing by a representative of the State committee.

(4) The wheat production from acreage not harvested shall be appraised and added to the actual production for the purpose of determining eligibility for and amount of low yield payments, in accordance with instructions issued by the Deputy Administrator.

(5) Any wheat acreage destroyed without opportunity for appraisal for which the production was not excluded in paragraph (b)(2) of this section shall be charged with the larger of the established yield or the per acre yield from the harvested acres.

(6) Low yield payments shall be determined by multiplying the disaster allotment by the yield established as provided in § 728.9, subtracting the determined production therefrom, and multiplying the result by the applicable per bushel rate determined in accordance with § 728.10(b).

§ 728.18 Division of payments and additional provisions relating to tenants and sharecroppers.

The regulations relating to the division of payments and additional provisions relating to tenants and sharecroppers are set forth in Part 794 of this chapter, as amended.

§ 728.19 Successors-in-interest.

(a) In the case of the death, incompetency, or disappearance of any producer whose name appears on Form 516, the payment due him shall be made to his successor as determined in accordance with the regulations in Part 707 of this chapter, as amended.

(b) When any person who had an interest as a producer of wheat or would have had an interest as a producer if wheat had been produced (herein called "predecessor") is succeeded on the farm by another producer (herein called "successor") after Form 516 has been filed, the payment to the predecessor and successor shall be divided between them on such basis as they agree is fair and equitable. If such persons are unable to agree to a division of the payment, a fair and equitable division shall be determined by the county committee.

(c) In any case where any payment due any successor producer has previously been paid to the producer who filed Form 516, such payment shall not be paid to the successor producer unless it is recovered from the producer to whom it has been paid or payment is authorized by the Deputy Administrator.

§ 728.20 Misrepresentation and scheme or device.

(a) A producer who is determined by the county committee or the State committee to have erroneously represented any fact affecting a program determination shall not be entitled to payments under the program for the farm with respect to which the representation was made and shall refund to the Commodity Credit Corporation the payments received by him with respect to such farm.

(b) A producer who is determined by the State committee, or the county committee with the approval of the State committee, to have knowingly (1) adopted any scheme or device which tends to defeat the purpose of the program, (2) made any fraudulent representation, or (3) misrepresented any fact affecting a program determination shall not be entitled to payments for any farm under the program and shall refund to the

V 40 N 218 NOV 11 75 XUM

Commodity Credit Corporation all payments received by him with respect to the program.

(c) The provisions of this section shall be applicable in addition to any liability under criminal and civil fraud statutes.

§ 728.21 Setoffs and assignments.

(a) *Producer indebtedness.* The regulations issued by the Secretary governing setoffs and withholdings, Part 13 of this chapter, as amended, shall be applicable to this program.

(b) *Assignments.* Payments may be assigned only to the Farmers Home Administration in accordance with instructions issued by the Deputy Administrator.

§ 728.22 Appeals.

A producer may obtain reconsideration and review of determinations made under this subpart in accordance with the Appeal Regulations, Part 780 of this chapter, as amended.

§ 728.23 Performance based upon advice or action of county or State committee.

The provisions of Part 790 of this chapter, as amended, relating to performance based upon action or advice of an authorized representative of the Secretary shall be applicable to this subpart.

§ 728.24 Supervisory authority of State committee.

The State committee may take any action required by these regulations which has not been taken by the county committee. The State committee may also (a) correct, or require a county committee to correct, any action taken by such county committee which is not in accordance with the regulations of this subpart, or (b) require a county committee to withhold taking any action which is not in accordance with the regulations of this subpart.

§ 728.25 Delegation of authority.

No delegation herein to a State or county committee shall preclude the Administrator, ASCS, or his designee, from determining any question arising under the program or from reversing or modifying any determination made by a State or county committee.

Effective date. It is essential that the foregoing regulations governing the Wheat Program for Crop Years 1975–1977 be made effective as soon as possible. It is hereby found and determined that compliance with the notice and public procedure provisions of 5 U.S.C. 553 is impracticable and contrary to the public interest. Accordingly, these regulations shall become effective November 11, 1975.

Signed at Washington, D.C., on November 3, 1975.

E. J. PERSON,
Acting Administrator, Agricultural Stabilization and Conservation Service.

[FR Doc.75-30378 Filed 11-10-75;8:45 am]

SUBCHAPTER C—SPECIAL PROGRAMS

PART 775—FEED GRAINS

Feed Grain Program for Crop Years 1975–1977

On July 17, 1974, a notice of proposed rulemaking regarding determinations with respect to the 1975 crop of feed grains was published in the FEDERAL REGISTER (39 FR 26159). Interested persons were invited to submit written data, views, and recommendations regarding the determinations within 30 days. The comments and recommendations received have been duly considered.

This subpart, which is issued pursuant to the Agricultural Act of 1949, as amended by the Agricultural Act of 1970, Public Law 91-524, 84 Stat. 1358, and by the Agriculture and Consumer Protection Act of 1973 Public Law 93-86, 87 Stat. 230, and Public Law 93-228, 87 Stat. 944, supersedes for the crop years 1975–1977 the regulations governing the Feed Grain Program for Crop Years 1974–1977, FR 25633, as amended. This subpart, which incorporates the provisions of the existing regulations with the following principal changes, sets forth the conditions under which feed grain producers may qualify for program benefits:

(1) No intention to participate in the program is filed. Producers report disasters when they occur, report crop acreages as necessary for program administration, and apply for any applicable payments.

(2) All acreage planted to feed grains is defined as feed grain acreage and considered to be nonconserving. There is provision for excluding part of the acreage for low yield disaster payment purposes in such instances as when the acreage is planted solely for pasture or nonfeed use or is in excess of the allotment and is timely destroyed without feed benefit.

(3) Allotments are adjusted for low yield payment purposes to reflect underplanting and the substitution of feed grains for wheat.

(4) Feed grain payments are computed separately from wheat and upland cotton payments.

(5) Disaster payments are made for feed grains only when feed grains in total have suffered a production loss and are computed on the bushels lost.

Subpart—Feed Grain Program for Crop Years 1975–1977

Sec.

775.1 General.
775.2 Definitions.
775.3 Administration.
775.4 1975 national feed grain allotment.
775.4a 1976 national feed grain allotment [Reserved]
775.4b 1977 national feed grain allotment [Reserved]
775.5 Establishment of the 1975–1977 State feed grain allotments.
775.6 Establishment of the 1975–1977 county feed grain allotments.
775.7 Farm feed grain allotment.
775.8 County yields.
775.9 Farm yields.
775.10 Payment rates.
775.11 Notice of allotments and yields.
775.12 Reconstitution of farms.
775.13 Requirements for program participation.
775.14 Determination of compliance.
775.15 General payment provisions.
775.16 Deficiency payments.
775.17 Disaster payments.
775.18 Division of payments and additional provisions relating to tenants and sharecroppers.
775.19 Successors-in-interest.
775.20 Misrepresentation and scheme or device.
775.21 Setoffs and assignments.
775.22 Appeals.
775.23 Performance based upon advice or action of county or State committee.
775.24 Supervisory authority of State committee.
775.25 Delegation of authority.

AUTHORITY: The provisions of this subpart issued under sec. 105, 87 Stat. 230, 7 U.S.C. 1441 note.

§ 775.1 General.

(a) The regulations in this subpart provide terms and conditions for the feed grain programs for the 1975 through 1977 crops of feed grains, respectively, under which producers on farms for which an allotment is established for corn, grain sorghum, or barley (herein called "feed grains") may qualify for payments authorized under the program.

(b) Producers who meet the eligibility requirements in § 775.13(c) may qualify for payments.

(c) In accordance with section 101 of the Agricultural Act of 1970, as amended, and the regulations in Part 795 of this chapter, as amended, the total amount of payments which a person shall be entitled to receive annually under the feed grain program, the wheat program, and the upland cotton program shall not exceed $20,000.

(d) In accordance with the regulations in Part 796 of this chapter, payments are prohibited to program participants who harvest or knowingly permit to be harvested for illegal use marihuana or other such prohibited drug-producing plants on any part of the lands owned or controlled by them.

(e) The program is applicable throughout the United States except Alaska and Hawaii.

§ 775.2 Definitions.

In the regulations in this subpart and in all instructions, forms, and documents in connection therewith, the words and phrases defined in this section shall have the meaning assigned to them herein unless the content or subject matter otherwise requires.

(a) "Annual nonconserving crop" means any annual crop intended for harvest or utilized in any feed form except for the following:

(1) Grasses, regardless of use, including sweet sorghum, millet, and sudan grass.

(2) Legumes, other than peas or beans produced for seed, grain, or processing.

(3) Immature small grains (other than barley or wheat) destroyed by any means or used for other than grain.

(b) "Barley acreage" means:

(1) Any acreage planted to barley, and any acreage of volunteer barley which is harvested as grain.

(2) Any acreage devoted to a mixture of crops if the county committee determines that the predominant crop is barley and such acreage meets the requirements of subparagraph (1) of this paragraph as being barley acreage.

(c) "Corn acreage" means:

(1) Any acreage planted to field corn or sterile high-sugar corn.

(2) Any acreage devoted to a mixture of crops if the county committee determines that the predominant crop is corn and such acreage meets the requirements of subparagraph (1) of this paragraph as being corn acreage.

(d) "Conservation Reserve Program" (herein called CRP) means the program authorized under the Soil Bank Act, as amended, Part 750 of this chapter, as amended.

(e) "Cropland Adjustment Program" (herein called CAP) means the program authorized under Title VI of the Food and Agriculture Act of 1965, as amended, Part 751 of this chapter, as amended.

(f) "Cropland Conversion Program" (herein called CCP) means the program authorized under section 16(e) of the Soil Conservation and Domestic Allotment Act, as amended, Part 751 of this chapter, as amended.

(g) "Current year" means the calendar year in which the feed grain crop with respect to which payment may be made under this subpart would normally be harvested.

(h) "Feed grain acreage" means the sum of the corn, grain sorghum, and barley acreages on the farm.

(i) "Feed grain planted and considered planted acreage" means the sum of the corn, grain sorghum, and barley acreages as defined in paragraphs (b), (c), and (j) of this section, and:

(1) Any acreage which the county committee determines was not planted to feed grains because of drought, flood, or other natural disaster or condition beyond the control of the operator;

(2) Any acreage credited as feed grain acreage (except for new farms) under the provisions of Part 719 of this chapter, as amended;

(3) Any acreage which is planted and considered planted to wheat under Part 728 of this chapter, as amended, in excess of the allotment and which is not credited to cotton: *Provided*, That wheat in excess of the allotment shall not be considered as planted to feed grains for purposes of § 775.7(d)(4)(iii);

(4) Any acreage which is planted and considered planted to cotton under Part 722 of this chapter as amended, in excess of the allotment and which is not credited to wheat: *Provided*, That cotton in excess of the allotment shall not be considered as planted to feed grains for purposes of § 775.7(d)(4)(iii);

(5) Any other acreage which is planted to annual nonconserving crops or which the county committee determines was not planted because of drought, flood, or other natural disaster or condition beyond the control of the operator, excluding acreage of allotment crops within the applicable allotment, and which is not credited to cotton or wheat: *Provided*, That such nonconserving crops shall not be considered as planted to feed grains for purposes of § 775.7(d)(iii); and

(6) An acreage (except for new farms) equal to the amount that a feed grain allotment is reduced for the current year as provided in § 775.7(e)(2).

(j) "Grain sorghum acreage" means:

(1) Any acreage planted to grain sorghums of a feed grain or dual purpose variety (including any cross which, at all stages of growth, has most of the characteristics of a feed grain or dual purpose variety).

(2) Any acreage devoted to a mixture of crops if the county committee determines that the predominant crop is grain sorghums and such acreage meets the requirements of subparagraph (1) of this paragraph as being grain sorghum acreage.

(k) "Great Plains Conservation Program" means the program authorized under section 16(b) of the Soil Conservation and Domestic Allotment Act, as amended, Part 601 of this title, as amended.

(l) "Total feed grain allotment" means the sum of the feed grain allotments established for corn, grain sorghums, and barley for the farm, except that each allotment shall be excluded that is partially or completely diverted under the CAP or CCP.

(m) "Upland Cotton Program" means the program authorized under Title VI of the Agricultural Act of 1970, Part 722 of this chapter, as amended.

(n) "Wheat Program" means the program authorized under Title IV of the Agricultural Act of 1970, Part 728 of this chapter, as amended.

(o) In the regulations in this subpart and in all instructions, forms and documents in connection therewith, all other words and phrases shall have the meanings assigned to them in the regulations governing reconstitution of farms and allotments, Part 719 of this chapter, as amended.

§ 775.3 Administration.

(a) The program will be administered under the general supervision of the Administrator, Agricultural Stabilization and Conservation Service (ASCS), and shall be carried out in the field by Agricultural Stabilization and Conservation State and county committees (herein called "State and county committees") and the ASCS Data Systems Field Office.

(b) State and county committees, the ASCS Data Systems Field Office, and representatives and employees thereof do not have authority to modify or waive any of the provisions of the regulations in this subpart, as amended or supplemented.

§ 775.4 1975 national feed grain allotment.

The 1975 national feed grain allotments are set out in 39 FR 44403.

§ 775.4a 1976 national feed grain allotment [Reserved]

[To be issued as an amendment to this subpart.]

§ 775.4b 1977 national feed grain allotment [Reserved]

[To be issued as an amendment to this subpart.]

§ 775.5 Establishment of the 1975–1977 State feed grain allotments.

The 1975–1977 State feed grain allotments are established each year by apportioning the national feed grain allotment to the States on the basis of each State's feed grain allotment established for the preceding year, adjusted for (a) the administrative transfer of farms between States, (b) decreases resulting from farms no longer engaged in agricultural production, farms dropped from the eminent domain pool, farms losing allotment for failure to plant, and farms voluntarily relinquishing their allotment, and (c) increases resulting from acreage allocated to old feed grain farms from the national feed grain pool. State feed grain allotments are available for inspection in State and county ASCS offices.

§ 775.6 Establishment of the 1975–1977 county feed grain allotments.

The 1975–1977 county feed grain allotments are established each year by apportioning each State's feed grain allotment (less reserves of not to exceed 1 per centum of the State feed grain allotment for new farms and reserves for appeals and corrections) among the counties in the State on the basis of each county's feed grain allotment established for the preceding year, adjusted for (a) the administrative transfer of farms between counties, (b) acreage allocated to new farms from the State reserve, (c) acreage removed from farms no longer engaged in agricultural production, farms dropped from the eminent domain pool, farms losing allotment for failure to plant, and farms voluntarily relinquishing their allotment, and (d) such other relevant factors as determined necessary by the State committee to establish a fair and equitable apportionment base for the county. County feed grain allotments are available for inspection in the county ASCS offices.

§ 775.7 Farm feed grain allotment.

(a) *How obtained.* Except as otherwise provided in this section, the farm allotment for each crop of the commodities—corn, grain sorghums, and barley—shall be the average of the 1959 and 1960 acreages of the commodity produced on the farm, based upon information available to the county committee, as adjusted by the county committee to correct for abnormal factors affecting production, and to give due consideration to tillable acreage, crop-rotation practices, types of soil, soil and water conservation measures, and topography. On farms with recognized history or irrigated and nonirrigated feed grain acreage in the base period for establishing yields, the allotment

V 40 I 218 NOV 11 75 XUM

for each applicable commodity shall be established separately for the irrigated acreage and for the nonirrigated acreage. Separate allotments for irrigated acreage and for nonirrigated acreage shall not be established for farms where irrigation is used only in drier years. Allotments determined as set forth in this paragraph shall be approved by a representative of the State committee.

(b) *Adjustment authorized by Administrator.* The Administrator, ASCS, may, upon request of the State committee, authorize the State committee to adjust any feed grain allotment for farms within the State to the extent necessary to establish fair and equitable feed grain allotments within such State.

(c) *Farms with no 1959 and 1960 history.* A farm shall not qualify for payments under the program if there was no feed grain acreage on the farm in 1959 and 1960 unless (1) cropland on the farm was in the conservation reserve program or the great plains conservation program during one or both of the years 1959 and 1960 and either the conservation reserve program contract or the great plains conservation program contract is no longer in effect for all or part of such land, (2) one or more feed grains were grown in 1957 or 1958 and a feed grain allotment was established in accordance with § 775.212(c)(2) of the 1963 feed grain program regulations, or (3) a new farm allotment is established for the current year in accordance with paragraph (d) of this section or in a previous year under a comparable provision of the feed grain program regulations.

(d) *New farm allotment.*—(1) *Written application.* Each year, the county committee, with the approval of the State committee, shall establish a feed grain allotment (herein called "new farm allotment") for each eligible farm for which an allotment is requested in writing by February 15 of the current year. Each request shall be made by the farm owner or operator on Form MQ–25, Application for New Farm or Producer Allotment or Quota, which shall contain statements as to location and identification of the farm, name and address of the farm operator, and other data necessary to enable the county committee to determine whether the conditions of eligibility prescribed in paragraph (d) (2) of this section have been met.

(2) *Eligibility requirements for owner or operator.* Eligibility for a new farm allotment shall be conditioned upon the following:

(i) *Allotment for farm.* The farm does not otherwise qualify for a feed grain allotment.

(ii) *Interest in another farm.* Neither the farm owner nor the farm operator owns, has an ownership interest in, or operates any other farm in the United States for which a feed grain allotment is established for the current year.

(iii) *Availability of equipment and facilities.* The operator has adequate equipment and other facilities readily available for the successful production of the crop on the farm.

(iv) *Income requirement.* The operator expects to obtain during the current year more than 50 percent of his income from the production of agricultural commodities or products from farming.

(a) *Computing operator's income.* The following shall be considered in computing operator's income:

(1) *Income from farming.* Income from farming shall include the estimated return from the production of the requested allotment and from home gardens, livestock and livestock products, poultry, or other agricultural products produced for home consumption or other use on the farm(s), but shall exclude payments authorized under the feed grain program.

(2) *Income from nonfarming.* Nonfarming income shall include but shall not be limited to salaries, commissions, pensions, social security payments and unemployment compensation.

(3) *Spouse's income.* The spouse's farm and nonfarm income shall be used in the computation.

(b) *Operator a partnership.* If the operator is a partnership, each partner must expect to obtain more than 50 percent of his current year income from farming.

(c) *Operator a corporation.* If the operator is a corporation, it must have no major corporate purpose other than ownership or operation of the farm. Farming must provide its officers and general manager with more than 50 percent of their expected income. Salaries and dividends from the corporation shall be considered as income from farming.

(d) *Special provision for low-income farmers.* The county committee may waive the income provisions in this section provided the county committee determines that the farm operator's income, from both farm and nonfarm sources, will not provide a reasonable standard of living for the operator and his family, and a State committee representative approves such action. In waiving the income provisions the county committee must exercise good judgment to see that such determination is reasonable in the light of all pertinent factors, and that this special provision is made applicable only to those who qualify. In making such determination, the county committee shall consider such factors as size and type of farming operations, estimated net worth, estimated gross family farm income, estimated family off-farm income, number of dependents, and other factors affecting the individual's ability to provide a reasonable standard of living for himself and his family.

(3) *Eligibility requirements for the farm.* The eligibility requirements for a new farm allotment for the farm are as follows:

(i) *Available land, type of soil, and topography.* The available land, type of soil, and topography of the land on the farm must be suitable for the production of the commodity, and continuous production must not result in an undue erosion hazard.

(ii) *Allotment reduced to zero at the farm owner's request.* At least 3 years must have elapsed from the date the farm feed grain allotment is reduced to zero at the farm owner's request, as authorized in paragraph (e) of this section, to the date the request for a new farm allotment is considered.

(iii) *Eminent domain.* A farm which includes land acquired by an agency having the right of eminent domain for which the total feed grain allotment was pooled pursuant to Part 719 of this chapter, as amended, which is subsequently returned to agricultural production, shall not be eligible for a new farm allotment for a period of 3 years from the date the former owner was displaced.

(iv) *Entire allotment designated by owner for a reconstitution.* A farm which includes land which has no allotment because the owner did not designate an allotment for such land when the parent farm was reconstituted pursuant to Part 719 of this chapter, as amended, shall not be eligible for a new farm allotment for a period of 3 years beginning with the year in which the reconstitution became effective.

(4) *Limitations*—(i) *Feed grain acreage planned.* The county committee shall limit the new feed grain allotment to the smaller of the allotment requested or the feed grain acreage planned for the farm for the first year to which the allotment would be applicable.

(ii) *Reserve.* The total new farm feed grain allotments approved in a State in the current year shall not exceed a reserve established by the State committee of not more than 1 percent of the total feed grain allotments for all farms in the State. No part of that 1 percent shall be allocated to a farm to reflect new cropland brought into production after November 30, 1970.

(iii) *Current year feed grain acreage.* Notwithstanding any other provision of this subpart, if the feed grain planted and considered planted acreage for the year a new farm allotment is established is less than 90 percent of the allotment, the allotment for such year shall be reduced to the acreage planted and considered planted to feed grains and payments computed on the basis of such reduced allotment. Allotments by commodities for the succeeding year shall be established in proportion to the acreage devoted to each feed grain in the prior year.

(5) *Cancellation of new farm allotment for misrepresentation.* If a new farm allotment is established and it is later determined by the county committee that the applicant unknowingly furnished incomplete or inaccurate information the allotment shall be canceled effective for the next crop year. If it is determined that the applicant knowingly furnished incomplete or inaccurate information and the State committee concurs in the county committee determination, the allotment shall be canceled as of the date issued.

(e) *Reduced allotments.* Notwithstanding any other provisions of this subpart, feed grain allotments shall be reduced as follows:

(1) *Permanent reductions.* (i) The allotment shall be reduced:

(A) To the extent requested in writing by the farm owner not later than the date established by the State committee, and

(B) To the extent acreage of cropland on the farm is permanently removed from agricultural production, as determined by the county committee.

(ii) If the current year's feed grain planted and considered planted acreage is less than 90 percent of the total feed grain allotment, the feed grain allotment for the succeeding year shall be reduced by the percentage by which the planted and considered planted acreage is less than the total feed grain allotment for the current year, but such reduction shall not exceed 20 percent of the total feed grain allotment. In making any such reduction, commodity allotments shall be reduced proportionately. If the feed grain planted and considered planted acreage is zero for three consecutive years, the total feed grain allotment shall be reduced to zero. However, no feed grain allotment shall be reduced or lost through failure to plant if all producers elect by September 1 of the current year to limit the acres for deficiency payment to the feed grain planted and considered planted acreage as provided in § 775.15 (f).

(2) *Reductions for current year.* The following reductions shall be made by reducing the smallest allotment first and continuing in order of the size of the allotment, unless the operator requests in writing that the reduction be in a different order.

(i) Reduce feed grain, wheat, and upland cotton allotments each year to the extent the sum of allotments for all commodities exceeds the cropland for the farm.

(ii) Reduce feed grain and wheat allotments each year to the extent the sum of feed grain and wheat allotments exceeds the cropland which, under normal conditions, could reasonably be expected to produce an allotment crop.

(iii) In the case of a farm participating in the CAP or CCP, reduce feed grain, wheat, and upland cotton allotments that are not partially or completely diverted under the CAP or CCP to the extent they total more than the number of acres of nonconserving crops permitted under the CAP or CCP.

(f) *National pool.* Allotments eliminated from farms under the provisions of paragraph (e) of this section and acreage removed from the eminent domain pool pursuant to Part 719 of this chapter, as amended, shall be placed in a national pool for distribution and adjustments in accordance with instructions issued by the Deputy Administrator.

§ 775.8 County yields.

County yields for the current year are determined for each feed grain producing county in the United States, except for counties in Alaska and Hawaii. They are determined on the basis of the yields established for the county for the preceding crop with such adjustments as are determined necessary to provide fair and equitable yields. The county yields for the current year are available for inspection in the county ASCS office.

§ 775.9 Farm yields.

(a) *Determining yields.* The per acre farm yield for corn, grain sorghums, and barley shall be the county yield for the commodity, adjusted to reflect the farm productivity for the commodity and established in accordance with instructions issued by the Deputy Administrator.

(b) *Yield reduction.* For the purpose of determining eligibility for and amount of low yield payment as provided in § 775.17(b), the established yield for the farm shall be reduced in accordance with instructions issued by the Deputy Administrator to reflect any reduction in the current year yield which is due to causes other than a natural disaster or condition beyond the control of the producer, such as a change in farming practices.

§ 775.10 Payment rates.

Payment rates shall be established separately for deficiency payments and for disaster payments.

(a) *Deficiency payment rates.* The per bushel deficiency payment rate for each crop of corn shall be the amount by which the higher of (1) the national weighted average market price received by farmers for corn during the first five months of the marketing year for such crop beginning October 1 or (2) the national average loan rate established for such crop is less than the established price of $1.38 per bushel in the case of the 1975 crop, $1.38 per bushel adjusted to reflect any change during the calendar year 1975 in the index of prices paid by farmers for production items, interest, taxes, and wage rates in the case of the 1976 crop, and the established price for the 1976 crop adjusted to reflect any change during the calendar year 1976 in such index in the case of the 1977 crop: *Provided,* That any increase that would otherwise be made in the established price to reflect a change in the index of prices paid by farmers shall be adjusted to reflect any change in (i) the national average yield per acre of feed grains for the three calendar years preceding the year for which the determination is made, over (ii) the national average yield per acre of feed grains for the three calendar years preceding the year previous to the one for which the determination is made. Per bushel rates shall be established in like manner for grain sorghum and barley based on marketing years beginning October 1 for grain sorghum and July 1 for barley, and on prices established each program year. The established prices for the 1975 program year are $1.31 per bushel for grain sorghum and $1.13 per bushel for barley.

(b) *Disaster payment rates.* The per bushel disaster payment rate for each feed grain shall be equal to the larger of the deficiency payment rate or one-third of the established price. Disaster payment rates for the 1975 program year are $.46 per bushel for corn, $.44 per bushel for grain sorghums, and $.38 per bushel for barley.

§ 775.11 Notice of allotments and yields.

Each operator interested in the feed grain crop on a farm for which a feed grain allotment is established shall be notified in writing of the allotment and established yield per acre for corn, grain sorghums, and barley, as applicable: *Provided,* That the notice shall not be mailed to any producer who has filed a written request that he not be furnished the notice but it shall be filed with the producer's request in the county office. The producer may withdraw his request at any time; however, during the period a request is in effect, the producer shall be considered as having been timely and correctly notified of the contents of this notice. Such notices will be on Form ASCS–476, Notice of Allotments and Yields, (herein called "Form 476").

§ 775.12 Reconstitution of farms.

Farms shall be reconstituted and feed grain allotments established therefor in accordance with Part 719 of this chapter, as amended. Yields for farms which are reconstituted after yields are originally established shall be determined as follows:

(a) *Combination.* Multiply the commodity allotment by the yield for each parent farm, and divide the sum of the results for all parent farms by the sum of allotments for the commodity on the parent farms.

(b) *Division.* Determine a yield in accordance with § 775.9. The weighted average yields for all the farms resulting from the division are limited to the yield for the parent farm, except for rounding.

§ 775.13 Requirements for program participation.

(a) *General.* A person is eligible for the program if he is a producer on a farm which meets the requirements of paragraph (b) of this section and he fulfills the requirements of paragraph (c) of this section.

(b) *Farm requirements.* (1) For disaster payments, a Report of Acreage (herein called "Form 580") and an Application for Disaster Credit (herein called "Form 574") shall be filed by the operator of an eligible farm with the office of the county committee having jurisdiction over the county where the farm is located. He shall also file a Record of Acreages, Production and Disposition (herein called "Form 658") when the information thereon is needed for program determinations. These forms shall be filed within the period authorized by the Deputy Administrator.

(2) In the case of any farm participating in the CAP or CCP, the acreage of feed grains and other nonconserving crops shall not exceed the number of acres of nonconserving crops permitted under the CAP or CCP.

(3) Land owned by the Federal Government shall be ineligible for participation in the program if it is occupied without a lease, permit, or other right of possession.

V 40 N 218 NOV 11 75 XUM

(4) Producers on a farm acquired for future development for purposes other than agricultural production shall not be eligible for participation in the program, unless the county committee determines that the farm is actively engaged in the production of crops for harvest other than hay, sod, ornamentals, or timber.

(c) *Producer eligibility requirements.* (1) The producer must be a person who as landowner, landlord, tenant, or sharecropper shares in the corn, grain sorghums, or barley produced in the current year (or the proceeds therefrom) on a farm meeting the requirements of paragraph (b) of this section or would have shared in one or more of these commodities if feed grains had been produced on such farm in the current year.

(2) A minor will be eligible to participate in the program only if (i) the right of majority has been conferred on him by court proceedings; (ii) a guardian has been appointed to manage his property and the applicable documents are signed by the guardian; or (iii) a bond is furnished under which a surety guarantees to protect the Commodity Credit Corporation from any loss incurred for which the minor would be liable had he been an adult. Notwithstanding the foregoing, payment may be made to a minor after December 31 of the current year upon a determination by the county committee that the minor has met the requirements of the program.

§ 775.14 Determination of compliance.

(a) Determination of the acreage devoted to feed grains and other annual nonconserving crops shall be made in accordance with Part 718 of this chapter, as amended.

(b) A representative of the county committee or the State committee or any authorized representative of the Secretary shall have the right at any reasonable time to enter a farm, concerning which representations have been made on any forms filed under the program, in order to measure the acreage planted to feed grains and other annual nonconserving crops, to examine any records pertaining thereto, and otherwise to determine the accuracy of a producer's representation and the performance of his obligations under the program.

§ 775.15 General payment provisions.

(a) *Issuance.* Payments of any amounts due the producers on a farm shall be made only after they sign an Application for Payment (herein called "Form 516"), and the payments are approved by the county committee or by an authorized representative thereof. A Form 516 signed after May 1 of the year following the current year shall not be accepted by the county committee unless prior approval of the State committee is obtained.

(b) *Failure to fully comply.* Except as otherwise provided herein and in Part 791 of this chapter, as amended, payment shall not be made for a farm or to a producer when there is failure to comply fully with the regulations contained in this subpart, and in Part 718 of this chapter.

(c) *Payment due producer.* Subject to the provisions of the payment limitation regulations in Part 795 of this chapter, as amended, the total earned payment due each eligible producer under the program shall be determined by multiplying the total earned payment for the farm by the producer's share of such payment.

(d) *Payment declined.* If a producer declines to accept all or any part of his share of the payment computed for a farm in accordance with the provisions of this section, such payment or portions thereof shall not become available for any other producer on the farm.

(e) *Idle farms.* Producers on a farm not used for the commercial production of crops or livestock on cropland, or from which only sod, ornamentals, or timber are harvested, shall not be eligible for program payments when the feed grain allotment is preserved with vegetative cover as authorized by the regulations in Part 719 of this chapter, as amended.

(f) *Allotment protection.* Producers otherwise eligible for payment may elect by September 1 of the current year to limit the acres for deficiency payment to the feed grain planted and considered planted acreage in order to protect the feed grain allotment from reduction due to failure to plant. The acres of each feed grain on which payment will be made shall be proportionate to the allotment for each such feed grain.

(g) *Unearned payments.* Payments to any producer which exceed the total payment he earns under the program with respect to any farm shall be refunded to the Commodity Credit Corporation, and, if for any reason such earned payment is zero, he shall pay interest at the rate of 6 percent per annum on the amount of the refund from the issue dates of the sight drafts to the date the payments are refunded. The provisions of the foregoing sentence requiring the payment of interest when no payment is earned shall not apply if the producer earns any wheat or upland cotton payments for the farm or receives an unearned payment through no fault of his own.

§ 775.16 Deficiency payments.

(a) Deficiency payments shall be determined by multiplying the allotment for each commodity by the applicable farm yield established as provided in § 775.9 and by the applicable per bushel rate determined in accordance with § 775.10(a): *Provided*, That no deficiency payment shall be made for any part of the allotment times the yield for which a disaster payment is made.

(b) Deficiency payments will be made to producers as soon as practicable after March 1 following the current year.

§ 775.17 Disaster payments.

Producers may qualify for disaster payments only when the county committee determines that prevented planting or a low yield as hereinafter described in this section occurs because of drought, flood, or other natural disaster or condition beyond the control of the producer. Disaster payments shall be made as soon as practicable after the disaster is reported, the extent of the crop loss is determined, and payment is approved.

(a) *Prevented planting.* (1) The acreage for prevented planting payments shall be determined by grouping the farm's feed grain and wheat allotments together and shall equal the smaller of:

(i) the acreage of annual nonconserving crops the producer is prevented from planting; or

(ii) the amount that the sum of feed grain and wheat allotments exceeds the total acreage of annual nonconserving crops, excluding acreage within the applicable allotment of commodities other than feed grains and wheat, acreage disregarded for low yield purposes according to paragraph (b)(1)(i) thru (iii) of this section, and failed upland cotton acreage which could have been replanted but was not.

(2) Prevented planting payments shall be determined by:

(i) Crediting the acreage for payment first to the underplanting of the allotment for the crop with the highest per acre payment rate and continuing in order of the size of the payment rate, but limiting the acreage credited to feed grains to the total feed grain underplanting.

(ii) Reducing the acreage otherwise credited to each crop by the acreage of that crop disregarded for low yield purposes according to paragraph (b)(1)(i) thru (iii) of this section.

(iii) Multiplying the acreage credited to each feed grain by the applicable yield established as provided in § 775.9 and by the applicable per bushel rate determined in accordance with § 775.10(b).

(b) *Low Yields.* (1) For the purpose of determining eligibility for low yield payments and the total acreage on which such payments will be made, the "disaster allotment" for each feed grain means the effective allotment for such feed grain adjusted downward to the extent it is underplanted or adjusted upward to the extent it is overplanted as a substitute for an underplanted feed grain or wheat allotment established for the farm: *Provided*, That such adjustment shall disregard:

(i) Barley or wheat acreage designated solely for grazing or nonfeed used in accordance with instructions issued by the Deputy Administrator,

(ii) Failed feed grain or wheat acreage which could have been replanted but was not,

(iii) Barley or wheat acreage planted to a variety bred to produce no grain, and

(iv) Feed grain or wheat acreage designated solely for wildlife use in accordance with instructions issued by the Deputy Administrator.

(2) For low yield payment purposes, the county committee shall disregard the production from the disregarded acreage as well as production from acreage in excess of the disaster allotment which is mechanically destroyed without feed benefit prior to the time most of the crop in the area has reached the following stage of growth:

(i) *Barley.* Headed.

(ii) *Corn.* Ear shoots begin to emerge.

(iii) *Grain Sorghum.* Early boot stage.

(3) A farm shall not be deemed to have suffered a loss which qualifies it for a low yield payment unless the current year production of feed grains totals less than the disaster allotments multiplied by the applicable yields established as provided in § 775.9 and by a factor determined by dividing the 10-year average county yield by the county yield referred to in § 775.8 and multiplying the result by two-thirds: *Provided*, That if county yields are available for less than 10 years the factor shall be based on the number of years available. No county factor shall exceed 0.6667. A farm may qualify for a low yield payment even though it does not qualify under the foregoing provision if (i) the provisions of § 775.9(b) do not result in a reduction in the established yield and (ii) the current year production is less than two-thirds of what the production would be if computed by multiplying the disaster allotment by one of the following:

(*a*) The smaller of the applicable yield established as provided in § 775.9 or the actual unadjusted average yield for the preceding five years.

(*b*) The applicable yield established as provided in § 775.9 and:

(*1*) There is convincing proof that the loss was due to a sudden and identifiable destruction of the crop,

(2) Part of the acreage is substantially unaffected by the disaster, all of which averages at least two-thirds of the established yield, and the county committee determines that but for the disaster the per acre yield for the farm would have been at least two-thirds of the established yield, and

(3) Payment is approved in writing by a representative of the State committee.

(4) The feed grain production from acreage not harvested shall be appraised and added to the actual production for the purpose of determining eligibility for and amount of low yield payments, in accordance with instructions issued by the Deputy Administrator.

(5) Any feed grain acreage destroyed without opportunity for appraisal for which the production was not excluded in paragraph (b)(2) of this section shall be charged with the larger of the established yield or the per acre yield from the harvested acres.

(6) Low yield payments shall be determined for each feed grain by multiplying the disaster allotment by the applicable yield established as provided in § 775.9, subtracting the determined production therefrom, and multiplying the result by the applicable per bushel rate determined in accordance with § 775.10(b): *Provided*, That any production of a feed grain in excess of its disaster allotment times established yield shall reduce the bushels for payment by the same amount for another feed grain, beginning first with the feed grain with underproduction that has the highest per bushel payment rate.

§ 775.18 Division of payments and additional provisions relating to tenants and sharecroppers.

The regulations relating to the division of payments and additional provisions relating to tenants and sharecroppers are set forth in Part 794 of this chapter, as amended.

§ 775.19 Successors-in-interest.

(a) In the case of the death, incompetency, or disappearance of any producer whose name appears on Form 516, the payment due him shall be made to his successor as determined in accordance with the regulations in Part 707 of this chapter, as amended.

(b) When any person who had an interest as a producer of feed grains or would have had an interest as a producer if feed grains had been planted (herein called "predecessor") is succeeded on the farm by another producer (herein called "successor") after Form 516 has been filed, the payment to the predecessor and successor shall be divided between them on such basis as they agree is fair and equitable. If such persons are unable to agree to a division of the payment, a fair and equitable division shall be determined by the county committee.

(c) In any case where any payment due any successor producer has previously been paid to the producer who filed Form 516, such payment shall not be paid to the successor producer unless it is recovered from the producer to whom it has been paid or payment is authorized by the Deputy Administrator.

§ 775.20 Misrepresentation and scheme or device.

(a) A producer who is determined by the county committee or the State committee to have erroneously represented any fact affecting a program determination shall not be entitled to payments under the program for the farm with respect to which the representation was made and shall refund to the Commodity Credit Corporation the payments received by him with respect to such farm.

(b) A producer who is determined by the State committee or the county committee with the approval of the State committee, to have knowingly (1) adopted any scheme or device which tends to defeat the purpose of the program, (2) made any fraudulent representation, or (3) misrepresented any fact affecting a program determination shall not be entitled to payments for any farm under the program and shall refund to the Commodity Credit Corporation all payments received by him with respect to the program.

(c) The provisions of this section shall be applicable in addition to any liability under criminal and civil fraud statutes.

§ 775.21 Setoffs and assignments.

(a) *Producer indebtedness.* The regulations issued by the Secretary governing setoffs and withholdings, Part 13 of this chapter, as amended, shall be applicable to this program.

(b) *Assignments.* Payments may be assigned only to the Farmers Home Administration in accordance with instructions issued by the Deputy Administrator.

§ 775.22 Appeals.

A producer may obtain reconsideration and review of determinations made under this subpart in accordance with the Appeal Regulations, Part 780 of this chapter, as amended.

§ 775.23 Performance based upon advice or action of county or State committee.

The provisions of Part 790 of this chapter, as amended, relating to performance based upon action or advice of an authorized representative of the Secretary shall be applicable to this subpart.

§ 775.24 Supervisory authority of State committee.

The State committee may take any action required by these regulations which has not been taken by the county committee. The State committee may also (a) Correct, or require a county committee to correct, any action taken by such county committee which is not in accordance with the regulations of this subpart, or (b) Require a county committee to withhold taking any action which is not in accordance with the regulations of this subpart.

§ 775.25 Delegation of authority.

No delegation herein to a State or county committee shall preclude the Administrator, ASCS, or his designee, from determining any question arising under the program or from reversing or modifying any determination made by a State or county committee.

Effective date. It is essential that the foregoing regulations governing the Feed Grain Program for Crop Years 1975–77 be made effective as soon as possible. It is hereby found and determined that compliance with the notice and public procedure provisions of 5 U.S.C. 553 is impracticable and contrary to the public interest. Accordingly, these regulations shall become effective November 11, 1975.

Signed at Washington, D.C. on November 3, 1975.

E. J. PERSON,
Acting Administrator, Agricultural Stabilization and Conservation Service.

CHAPTER IX—AGRICULTURAL MARKETING SERVICE (MARKETING AGREEMENTS AND ORDERS; FRUITS, VEGETABLES, NUTS), DEPARTMENT OF AGRICULTURE

[Docket No. AO-267-A8]

PART 911—HANDLING OF LIMES GROWN IN FLORIDA

Order Amending Order

FINDINGS AND DETERMINATIONS

The findings and determinations hereinafter set forth are supplementary and

V 40 N 218 NOV 11 75 XUM

in addition to the findings and determinations previously made in connection with the issuance of the aforesaid order and each previously issued amendment thereto; and all of said previous findings and determinations are hereby ratified and affirmed, except insofar as such findings and determinations may be in conflict with the findings and determinations set forth herein.

(a) *Findings upon the basis of the hearing record.* Pursuant to the provisions of the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601 *et seq.*), and the applicable rules of practice and procedure governing the formulation of marketing agreements and marketing orders (7 CFR Part 900), a public hearing was held upon a proposed amendment of the marketing agreement, as amended, and Order No. 911, as amended (7 CFR Part 911), regulating the handling of limes grown in Florida.

Upon the basis of the record it is found that:

(1) The marketing agreement and order, as amended, and as hereby further amended, and all of the terms and conditions thereof, will tend to effectuate the declared policy of the act;

(2) The marketing agreement and order, as amended, regulate the handling of limes grown in the production area in the same manner as, and are applicable only to persons in the respective classes of commercial and industrial activity specified in, the marketing agreement and order upon which hearings have been held;

(3) The marketing agreement and order, as amended, and as hereby further amended, are limited in their application to the smallest regional production area which is practicable, consistently with carrying out the declared policy of the act, and the issuance of several orders applicable to subdivisions of the production area would not effectively carry out the declared policy of the act;

(4) There are no differences in the production and marketing of limes grown in the production area which make necessary different terms and provisions applicable to different parts of such area; and

(5) All handling of limes grown in the production area as defined in the marketing agreement and order, as amended, and as hereby further amended, is in the current of interstate or foreign commerce or directly burdens, obstructs, or affects such commerce.

(b) *Determinations.* It is hereby determined that:

(1) The "Marketing Agreement, as Amended, Regulating the Handling of Limes Grown in Florida" upon which the aforesaid public hearing was held has been signed by handlers (excluding cooperative associations of producers who are not engaged in processing, distributing, or shipping limes covered by the said order, as amended, and as hereby further amended) who, during the period April 1, 1974, through March 31, 1975, handled not less than 50 percent of the volume of such limes covered by the said order, as amended, and as hereby further amended, and

(2) The issuance of this amendatory order, amending the aforesaid order, as amended, is favored or approved by at least two-thirds of the producers who participated in a referendum on the question of its approval and who during the period April 1, 1974, through March 31, 1975 (which has been deemed to be a representative period), have been engaged within the production area, in the production of limes for market, such producers having also produced for market at least two-thirds of the volume of such commodity represented in the referendum.

ORDER RELATIVE TO HANDLING

It is therefore ordered, That on and after the effective date hereof, the handling of limes grown in Florida, shall be in conformity to and in compliance with the terms and conditions of the said order, as amended, and as hereby further amended, as follows:

1. Revise paragraphs (b) (1), (2), and (3) of § 911.22 *Nomination* to read as follows:

§ 911.22 Nomination.

* * * * *

(b) *Successor members.* (1) The committee shall hold or cause to be held a meeting or meetings of growers and handlers in each district to designate nominees for successor members and alternate members of the committee, or the committee may conduct nominations by mail in District 2 in a manner recommended by the committee and approved by the Secretary. Such nominations shall be submitted to the Secretary by the committee not later than February 15 of each year. The committee shall prescribe procedural rules, not inconsistent with the provisions of this section, for the conduct of nominations.

(2) Only growers may participate in the nomination and election of nominees for grower members and their alternates. Each grower shall be entitled to cast only one vote for each nominee to be elected in the district in which he produces limes. No grower shall participate in the election of nominees in more than one district in any one fiscal year.

(3) Only handlers may participate in the nomination and election of nominees for handler members and their alternates. Each handler shall be entitled to cast only one vote for each nominee to be elected in the district in which he handles limes, which vote shall be weighted by the volume of limes shipped by such handler during the immediately preceding twelve month period January through December. No handler shall participate in the election of nominees in more than one district in any one fiscal year.

2. Revise § 911.41(b) *Assessments* to read as follows:

§ 911.41 Assessments.

* * * * *

(b) The Secretary shall fix the rate of assessment not in excess of 20 cents per 55 pounds of fruit to be paid by each such person. At any time during or after a fiscal year, the Secretary may, subject to the limitations in this paragraph, increase the rate of assessment in order to secure sufficient funds to cover any later finding by the Secretary relative to the expense which may be incurred. Such increase shall be applied to all fruit handled during the applicable fiscal year. In order to provide funds for the administration of the provisions of this part, the committee may accept the payment of assessments in advance.

3. Revise § 911.45 *Marketing research and development* to read as follows:

§ 911.45 Production research, marketing research and development.

The committee may, with the approval of the Secretary, establish or provide for the establishment of production research, marketing research and development projects designed to assist, improve, or promote the marketing, distribution, and consumption or efficient production of limes. Such projects may provide for any form of marketing promotion, including paid advertising. The expenses of such projects shall be paid from funds collected pursuant to the applicable provisions of § 911.41.

4. Amend § 911.48 *Issuance of regulation* as follows:

Renumber paragraphs (a) (3), (a) (4), and (a) (5), as paragraphs (a) (4), (a) (5), and (a) (6), and insert a new paragraph (a) (3) to read as follows:

§ 911.48 Issuance of regulation.

* * * * *

(a) * * *

(3) Limit the shipment of the total quantity of limes by prohibiting the shipment thereof: *Provided*, That no such prohibition shall be effective during any fiscal period other than for four periods not exceeding six days each immediately prior to, including, or following July 4, Labor Day, Thanksgiving Day, and Christmas Day.

* * * * *

5. Revise § 911.57 *Overshipments* to read as follows:

§ 911.57 Overshipments.

During any week for which the Secretary has fixed the total quantity of limes which may be handled, any person who has received an allotment including any handler who received zero allotment computed pursuant to §§ 911.55 and 911.56 may handle, in addition to the total allotment available to him, an amount of limes equal to 50 bushels or two percent of such total allotment, whichever is the greater, except that during two weeks of each regulatory period any handler may overship his total allotment by more than such amount: *Provided*, That such overshipment shall not exceed an amount equal to 10 percent of such total allotment: *And provided, further*, That each handler who intends to so overship notifies the committee of his intended overshipment no later than the close of business on Thursday during the week of such intended overshipment.

(Secs. 1–19, 48 Stat. 31, as amended; 7 U.S.C. 601–674)

Effective date: December 22, 1975.

Signed at Washington, D.C., on November 5, 1975.

RICHARD L. FELTNER,
Assistant Secretary.

[FR Doc.75-30311 Filed 11-10-75;8:45 am]

[Docket No. AO–254–A7]

PART 915—HANDLING OF AVOCADOS GROWN IN SOUTH FLORIDA

Order Amending Order

FINDINGS AND DETERMINATIONS

The findings and determinations hereinafter set forth are supplementary and in addition to the findings and determinations previously made in connection with the issuance of the aforesaid order and each previously issued amendment thereto; and all of said previous findings and determinations are hereby ratified and affirmed, except insofar as such findings and determinations may be in conflict with the findings and determinations set forth herein.

(a) *Findings upon the basis of the hearing record.* Pursuant to the provisions of the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601 *et seq.*), and the applicable rules of practice and procedure governing the formulation of marketing agreements and marketing orders (7 CFR Part 900), a public hearing was held upon a proposed amendment of the marketing agreement, as amended, and Order No. 915, as amended (7 CFR Part 915), regulating the handling of avocados grown in South Florida.

Upon the basis of the record it is found that:

(1) The marketing agreement and order, as amended, and as hereby further amended, and all of the terms and conditions thereof, will tend to effectuate the declared policy of the act;

(2) The marketing agreement and order, as amended, and as hereby further amended, regulate the handling of avocados grown in the production area in the same manner as, and are applicable only to persons in the respective classes of commercial and industrial activity specified in, the marketing agreement and order upon which hearings have been held;

(3) The marketing agreement and order, as amended, and as hereby further amended, are limited in their application to the smallest regional production area which is practicable, consistently with carrying out the declared policy of the act, and the issuance of several orders applicable to subdivisions of the production area would not effectively carry out the declared policy of the act;

(4) The marketing agreement and order prescribe, so far as practicable, such different terms applicable to different parts of the production area as are necessary to give due recognition to the difference in the production and marketing of avocados grown in the production area; and

(5) All handling of avocados grown in the production area as defined in the marketing agreement and order, as amended, and as hereby further amended, is in the current of interstate or foreign commerce or directly burdens, obstructs, or affects such commerce.

(b) *Determinations.* It is hereby determined that:

(1) The "Marketing Agreement, as Amended, Regulating the Handling of Avocados Grown in South Florida" upon which the aforesaid public hearing was held has been signed by handlers (excluding cooperative associations of producers who are not engaged in processing, distributing, or shipping avocados covered by the said order, as amended, and as hereby further amended) who, during the period April 1, 1974, through March 31, 1975, handled not less than 50 percent of the volume of such avocados covered by the said order, as amended, and as hereby further amended, and

(2) The issuance of this amendatory order, amending the aforesaid order, as amended, is favored or approved by at least two-thirds of the producers who participated in a referendum on the question of its approval and who during the period April 1, 1974, through March 31, 1975 (which has been deemed to be a representative period), have been engaged within the production area, in the production of avocados for market, such producers having also produced for market at least two-thirds of the volume of such commodity represented in the referendum.

ORDER RELATIVE TO HANDLING

It is therefore ordered, That on and after the effective date hereof, the handling of avocados grown in South Florida, shall be in conformity to and in compliance with the terms and conditions of the said order, as amended, and as hereby further amended, as follows:

1. Revise paragraphs (b) (1), (2) and (3) of § 915.22 *Nomination* to read as follows:

§ 915.22 Nomination.

* * * * *

(b) *Successor members.* (1) The committee shall hold or cause to be held a meeting or meetings of growers and handlers in each district to designate nominees for successor members and alternate members of the committee; or the committee not later than February 15 mail in District 2 in a manner recommended by the committee and approved by the Secretary. Such nominations shall be submitted to the Secretary by the committee not later than February 15 of each year. The committee shall prescribe procedural rules, not inconsistent with the provisions of this section, for the conduct of nomination.

(2) Only growers may participate in the nomination and election of nominees for grower members and their alternates. Each grower shall be entitled to cast only one vote for each nominee to be elected in the district in which he produced avocados. No grower shall participate in the election of nominees in more than one district in any one fiscal year.

(3) Only handlers may participate in the nomination and election of nominees for handler members and their alternates. Each handler shall be entitled to cast only one vote for each nominee to be elected in the district in which he handles avocados, which vote shall be weighted by the volume of avocados shipped by such handler during the immediately preceding twelve month period January through December. No handler shall participate in the election of nominees in more than one district in any one fiscal year.

2. Amend § 915.41(b) *Assessments* to read as follows:

§ 915.41 Assessments.

* * * * *

(b) The Secretary shall fix the rate of assessment not in excess of 20 cents per 55 pounds of fruit to be paid by each such person. At any time during or after a fiscal year, the Secretary may, subject to the limitation in this paragraph, increase the rate of assessment in order to secure sufficient funds to cover any later finding by the Secretary relative to the expense which may be incurred. Such increase shall be applied to all fruit handled during the applicable fiscal year. In order to provide funds for the administration of the provisions of this part, the committee may accept the payment of assessments in advance.

3. Revise § 915.45 *Marketing research and development* to read as follows:

§ 915.45 Production research, marketing research and development.

The committee may, with the approval of the Secretary, establish or provide for the establishment of production research, marketing research and development projects designed to assist, improve, or promote the marketing, distribution, and consumption or efficient production of avocados. Such projects may provide for any form of marketing promotion, including paid advertising. The expenses of such projects shall be paid from funds collected pursuant to the applicable provisions of § 915.41.

4. The following new section is added immediately following § 911.45:

§ 915.49 Marketing policy.

Each season prior to making any recommendations pursuant to § 915.50, the committee shall submit to the Secretary a report setting forth its marketing policy for the ensuing season. Such marketing policy report shall contain information relative to (a) the estimated total production of avocados within the

V 40 N 218 NOV 11 75 XUM

production area; (b) the expected general quality and maturity of avocados in the production area and in competing areas; (c) the expected demand conditions for avocados in different market outlets; (d) the expected shipments of avocados produced in the production area and competing areas; (e) supplies of competing commodities; (f) trend and level of consumer income; (g) other factors having a bearing on the marketing of avocados; and (h) the type of regulations expected to be recommended during the season. In the event it becomes advisable, because of changes in the supply and demand situation for avocados, to modify substantially such marketing policy, the committee shall submit to the Secretary a revised marketing policy report setting forth the information prescribed in this section. The committee shall publicly announce the contents of each marketing policy report and copies thereof shall be maintained in the offices of the committee where they shall be available for examination by growers and handlers.

5. Amend § 915.51 *Issuance of regulations* as follows:

Renumber paragraphs (a)(3), (a)(4), and (a)(5) as paragraphs (a)(4), (a)(5), and (a)(6), and insert a new paragraph (a)(3) to read as follows:

§ 915.51 Issuance of regulations.

* * * * *

(a) * * *

(3) Limit the shipment of the total quantity of avocados by prohibiting the shipment thereof: *Provided*, That no such prohibition shall be effective during any fiscal period, other than for four periods not exceeding six days each immediately prior to, including, or following July 4, Labor Day, Thanksgiving Day, and Christmas Day.

* * * * *

(Secs. 1–19, 48 Stat. 31, as amended; 7 U.S.C. 601–674)

Effective date: December 22, 1975.

Signed at Washington, D.C., on November 5, 1975.

RICHARD L. FELTNER,
Assistant Secretary.

[FR Doc.75-30312 Filed 11-10-75;8:45 am]

CHAPTER XIV—COMMODITY CREDIT CORPORATION, DEPARTMENT OF AGRICULTURE

[CCC Grain Price Support Regulations, 1970 and Subsequent Crops Grain Sorghum Supplement, Amendment 4]

PART 1421—GRAINS AND SIMILARLY HANDLED COMMODITIES

Subpart—1970 and Subsequent Crops Grain Sorghum Loan and Purchase Program

ADJUSTMENT IN SUPPORT RATES FOR SHIPMENT

The regulations issued by the Commodity Credit Corporation (CCC), published in the FEDERAL REGISTER at 35 FR 10745, as amended, containing provisions for price support loans and purchases applicable to the 1970 and subsequent crops grain sorghum are further amended as follows:

1. Section 1421.214(d) is revised to delete "at not to exceed the USGA rates", to read as follows:

§ 1421.214 Warehouse receipts.

* * * * *

(d) LIENS. Warehouse receipts and sorghum represented thereby stored in an approved warehouse operating under the Uniform Grain Storage Agreement (UGSA) may be subject to liens only for warehouse handling charges. However, in no event shall a warehouseman be entitled to satisfy the lien by sale of the sorghum when CCC is holder of the warehouse receipt.

* * * * *

2. Since storage is no longer on a uniform-rate basis, it is desirable to delete all references to UGSA rates and insert "truck receiving and rail loading-out charges in effect for the shipping warehouse". Accordingly § 1421.218(b) is revised to read as follows, and § 1421.218 (c)(2) is revised to increase the add-on rate for grain stored within the switching limits of designated terminal markets, to read as follows:

§ 1421.218 Support rates.

* * * * *

(b) *Basic support rates for warehouse-stored grain sorghum received by rail or utilizing combination barge-rail rates—*(1) *When shipped by rail and stored in-transit at interior locations.* The applicable basic support rate for warehouse-storage loans on grain sorghum which was received by rail and stored in an approved warehouse at other than a port terminal market shall be determined by adding to the basic support rate established for the county from which the grain sorghum was shipped, the amount of freight charges per hundred weight actually paid in and an amount equal to the truck receiving and rail loading-out charges in effect for the shipping warehouse, computed on a hundredweight basis to the nearest one-half cent. The freight rate paid into the storage point shall not exceed the lowest rate which will permit the storage intransit privilege and protect the lowest single car rate applying from origin through point of storage to a terminal market designated in paragraph (c)(2) of this section that would be used in commercial channels of trade. If the grain sorghum is stored in an approved warehouse at a transit point which takes a penalty by reason of backhaul or out-of-line movement when destined to a designated terminal market that would be used in commercial channels of trade, such penalty or cost by reason of such movement shall be deducted from the support rates as determined in this paragraph.

(2) *When shipped by rail and stored at designated port terminal market locations.* The applicable basic support rate for warehouse-storage loans on grain sorghum which was received by rail and stored in an approved warehouse at a port terminal market designated in paragraph (c)(2)(iii) of this section shall be determined by adding to the basic support rate established for the county from which the grain sorghum was shipped, the amount of freight charges per hundredweight actually paid in and an amount equal to the truck receiving and rail loading-out charges in effect for the shipping warehouse computed on a hundredweight basis to the nearest one-half cent. The freight rate paid into the storage point shall not exceed the lowest applicable freight rate to the port terminal market that would be used in commercial channels of trade.

(3) *When shipped utilizing combination barge-rail rates.* The applicable basic support rate for warehouse-storage loans on grain sorghum which was shipped utilizing combination barge-rail freight rates which are published and on file with the Interstate Commerce Commission and stored in an approved warehouse shall be determined by adding to the basic support rate established for the county from which the grain sorghum was shipped, the amount of freight charges per hundredweight actually paid in and an amount equal to the truck receiving and rail loading-out charges in effect for the shipping warehouse, computed on a hundredweight basis to the nearest one-half cent. The freight rate paid into the storage point shall be a rate which will permit the storage intransit privilege and protect the lowest single car or barge freight rate applying from origin point through point of storage to one of the interior or port terminal markets designated in paragraph (c)(2) of this section that would be used in commercial channels of trade. If the grain sorghum is stored in an approved warehouse at a transit point which takes a penalty by reason of backhaul or out-of-line movement when destined to the designated interior or port terminal market that would be used in commercial channels of trade, such penalty or cost by reason of such movement shall be deducted from the support rates as determined in this paragraph.

(4) *When shipped by rail through an unapproved warehouse.* The applicable basic support rate for warehouse storage loans on sorghum which was received by rail, shipped through an unapproved warehouse and stored in an approved warehouse at a terminal market designated in paragraph (c)(2)(iii) of this section shall be determined by adding to the basic support rate established for the county from which the sorghum was shipped, the amount of freight charges per hundredweight actually paid in and truck receiving and rail loading-out charges. The county office shall determine receiving and loading-out charges by obtaining the truck receiving and rail loading-out charges from approved warehouses in the local area from which the sorghum was shipped. An average of these charges shall become the truck receiving and rail loading-out charge to be added on. The freight paid into the storage point shall be the lowest applicable freight rate to the port terminal market that would be used in commercial channels of trade.

(c) *Basic support rates for warehouse-stored grain sorghum received by truck or nontariff barge.* * * *

(2) *Stored within the switching limits of designated terminal markets.* (i) The applicable basic county support rate for warehouse-storage loans on grain sorghum which was received by truck or by barge not utilizing combination barge-rail freight rates, and stored in an approved warehouse located within the switching limits of a terminal market designated in subdivision (ii) or (iii) of this subparagraph shall be determined by adding 14.25 cents per hundredweight to the basic county support rate established for the county (or city) in which the terminal market is located.

* * * * *

Since grain sorghum is currently being harvested in many parts of the sorghum-producing area and the provisions of this amendment are needed to carry out the loan program more effectively, compliance with the notice of proposed rulemaking would be impractical and contrary to the public interest. Therefore, this amendment is issued without following such procedure.

(Secs. 4 and 5, 62 Stat. 1070, as amended (15 U.S.C. 714b and c); secs. 105, 401, 63 Stat. 1051, as amended (7 U.S.C. 1411 Note and 1421))

Effective date: November 11, 1975.

Signed at Washington, D.C., on November 3, 1975.

E. J. PERSON,
Acting Executive Vice President, Commodity Credit Corporation.

CHAPTER XVIII—FARMERS HOME ADMINISTRATION, DEPARTMENT OF AGRICULTURE

SUBCHAPTER C—LOANS PRIMARILY FOR PRODUCTION PURPOSES

[FmHA Instruction 441.1]

PART 1831—OPERATING LOANS

Subpart A—Operating Loan Policies and Authorizations

YOUTH LOAN PROGRAM

On June 5, 1975, there was published in the FEDERAL REGISTER (40 FR 24204) a notice of proposed rulemaking to revise §§ 1831.4(e), 1831.5(h), and 1831.12 (g) of Subpart A of Part 1831, Title 7, Code of Federal Regulations. Interested persons were invited to submit written comments, suggestions or objections regarding the proposed amendment. All comments submitted with respect to the proposed revisions were given due consideration.

As a result of the comments received, certain proposed changes published in the FEDERAL REGISTER notice of proposed rulemaking of June 5, 1975 (40 FR 24204) are being adopted without change, except § 1831.5 was changed to grant an exception to recipients of youth loans from the general eligibility requirement for operating loans that the recipient must be operating not larger than the equivalent of a family farm as an owner or tenant and § 1831.12 was changed to require a cosigner for all youth loans greater than $2,500.

Accordingly, with this change the proposed revisions are adopted as set forth below:

Effective date. This revision is effective November 11, 1975.

Dated: November 4, 1975.

It is hereby certified that the economic and inflationary effects of this proposal have been carefully evaluated in accordance with Executive Order 11821.

FRANK W. NAYLOR, JR.,
Acting Administrator, Farmers Home Administration.

1. Sections 1831.4(e), 1831.5(h), and 1831.12(g), are revised to read as follows:

§ 1831.4 Definition of a family farm.

* * * * *

(e) *Rural youths.* Applicants who have reached the age of 10 years but have not reached the age of 21 and who do not reside in any area in any city or town which has a population in excess of ten thousand inhabitants.

* * * * *

§ 1831.5 Eligibility requirements.

* * * * *

(h) Loans may be made to rural youths without regard to the requirements of paragraphs (c) and (f) of this section. All youth projects must be recommended by their project advisor. In addition, youths who have not reached their majority, as set forth by State regulations will obtain their parent's or guardian's favorable recommendation for the loan. All recommendations will be in writing and filed with the application in the County Office case file.

* * * * *

§ 1831.12 Security policies.

* * * * *

(g) The security requirements for loans to rural youths will be the same as required for other Operating loans. In addition, all youth loans greater than $2,500 will be cosigned. In exceptional cases the loan approval official may require a cosigner for loans of $2,500 and less if he determines such action is necessary to assure repayment of the loan.

(7 U.S.C. 1989; delegation of authority by the Sec. of Agri., 7 CFR 2.23; delegation of authority by the Asst. Sec. for Rural Development, 7 CFR 2.70.)

Title 14—Aeronautics and Space

CHAPTER I—FEDERAL AVIATION ADMINISTRATION, DEPARTMENT OF TRANSPORTATION

[Docket No. 75-NW-36-AD; Amdt. 39-2421]

PART 39—AIRWORTHINESS DIRECTIVES

Boeing Model 707-300, -300B, -300C, and -400 Series Airplanes

Amendment 39-2074 (40 FR 3287) AD 75-03-01 requires inspections of the upper wing skin splice plate at W.S. 360 on Boeing 707-300, -300B, -300C, and -400 series airplanes, with more than a specified number of landings since new, or since fastener holes were oversized. After issuing Amendment 39-2074, two six foot cracks and a 13 inch crack were found after the required inspections failed to detect these cracks. A telegraphic AD was issued on October 17, 1975, to require a one time inspection in accordance with improved inspection techniques on airplanes with more than the specific hours since new. This telegraphic AD included airplanes previously exempted from Amendment 39-2074 because of fastener hole oversizing. Accordingly, Amendment 39-2074 which requires repetitive inspections of the upper wing skin splice plate is being amended to require the improved inspection techniques on 707-300/400 with 13,000 or more landings since new, on 707-300B with 11,000 or more landings since new and on 707-300C with 8,000 or more landings since new. Airplanes which had fastener holes oversized per Boeing Service Bulletin No. 2510, Part IV will no longer be exempted.

Since a situation exists that requires immediate adoption of this regulation, it is found that notice and public procedure hereon are impracticable and good cause exists for making this amendment effective in less than 30 days.

In consideration of the foregoing, and pursuant to the authority delegated to me by the Administrator (31 FR 13697) § 39.13 of the Federal Aviation Regulations, Amendment 39-2074, AD 75-03-01 is amended by superseding the applicability block, paragraph A and B with the following. Paragraphs C, D, and E of Amendment 39-2074 remain unchanged.

BOEING: Applies to all Boeing Model 707-300, -300B, -300C, and -400 series airplanes listed in Boeing Service Bulletin No. 3157, Revision 4, or later FAA approved revisions upon the accumulation of the following number of landings since new:

Models: 707-300, -400, 13,000 or more landings; 707-300B, 11,000 or more landings; 707-300C, 8,000 or more landings.

Compliance required as indicated.

To detect cracks in the upper wing skin splice plate at W.S. 360, accomplish the following:

A. Within the next 50 landings, unless accomplished with the last 350 landings, and at intervals thereafter not to exceed 400 landings, inspect the upper wing splice plate at station 360 in accordance with (1), (2), or (3) below. Special attention should be focused in the area of stringer 11 as it is in the high stressed area of the splice plate. If cracks are found, repair prior to further flight in accordance with paragraph B below.

(1) X-ray inspect per Boeing Service Bulletin No. 3157, Revision 3 and visually inspect the splice plate by removing the aerodynamic sealant between the wing skins from front to rear spar. This inspection method is acceptable for only two successive inspections after the effective date of this amendment.

(2) Low frequency eddy current inspect as specified in Boeing Service Bulletin No. 3157, Revision 4, or later FAA approved revisions.

(3) Inspect in a manner approved by the Chief, Engineering and Manufacturing Branch, FAA Northwest Region.

B. If cracks are found, repair prior to further flight in accordance with Boeing Serv-

V 40 N 218 NOV 11 75 XUM

ice Bulletin No. 2510, Revision 3, or later FAA approved revisions, or in a manner approved by the Chief, Engineering and Manufacturing Branch, FAA Northwest Region. The repetitive inspections of paragraph A must be accomplished in areas not covered by repairs per Part VII of Boeing Service Bulletin No. 2510, Revision 3, or later FAA approved revisions.

The manufacturer's specifications and procedures identified and described in this directive are incorporated herein and made a part hereof pursuant to 5 U.S.C. 552(a)(1).

All persons affected by this directive, who have not already received these documents from the manufacturer, may obtain copies upon request to Boeing Commercial Airplane Company, P.O. Box 3707, Seattle, Washington 98124. The documents may also be examined at FAA Northwest Region, 9010 East Marginal Way South, Seattle, Washington.

This amendment becomes effective December 4, 1975.

(Secs. 313(a), 601, and 603, Federal Aviation Act of 1958 (49 U.S.C. 1354(a), 1421, and 1423); sec. 6(c), Department of Transportation Act (49 U.S.C. 1655(c)))

J. H. TANNER,
Acting Director,
Northwest Region.

(The incorporation by reference provisions in the document were approved by the Director of the FEDERAL REGISTER on June 19, 1967.)

Issued in Seattle, Washington, November 3, 1975.

[FR Doc.75-30249 Filed 11-10-75;8:45 am]

[Docket No. 75-NW-35-AD; Amendment 39-2420]

PART 39—AIRWORTHINESS DIRECTIVES

Boeing 747-200C and 747-200F Series Airplanes

Pursuant to the authority delegated to me by the Administrator a telegraphic airworthiness directive was adopted on October 23, 1975, and made effective 24 hours after receipt of the AD. The directive requires a visual inspection of the latch condition on the nose cargo door after each door operation.

Since it was found that immediate corrective action was required, notice and public procedure thereon was impracticable and contrary to the public interest and good cause existed for making the airworthiness directive effective immediately. These conditions still exist, and the airworthiness directive is hereby published in the FEDERAL REGISTER as an amendment to Section 39.13 of the Federal Aviation Regulations. This amendment contains the provisions for terminating action which was not available at time of the telegraphic AD.

BOEING: Applies to all Boeing 747-200C and 747-200F series airplanes certificated in all categories. Compliance required as indicated.

In addition to the door warning light procedures in Boeing B-747 Operations Manual Bulletin 74-13, the following procedures are required to provide assurance of latch system integrity. Before further flight, and thereafter following each nose cargo door operation, accomplish the following:

A. Close door electrically or manually until each latch pin is extended and the green, latches closed, light is illuminated on the nose door control panel at the loadmaster's station.

B. Pull and collar circuit breakers C1407/28V DC "control nose cargo door." Circuit breakers are located on the P15 panel on the right hand side of the electronics bay. Access to this area is either from the ground through the electronics bay hatch or through the main deck floor. Optional to pulling and collaring C1407 and C1572 circuit breakers, pull and collar C1629, C1630, C1631, C1632, C1633, and C1634 circuit breakers on the H122 cargo door power panel.

C. Placard the nose door control panel H121 and the nose wheel well control panel P37, "POWER REMOVED PER AD—CIRCUIT BREAKERS C1407 AND C1572 PULLED:" If optional circuit breakers procedure is used, placard the H122 cargo door power panel, "POWER REMOVED—CIRCUIT BREAKERS PULLED."

D. Verify that all 16 latches are closed for dispatch by noting that each latch pin is fully extended into the latch fitting, per Boeing B-747 Dispatch Deviation Procedures Guide, Document D6-33391, page 2.52.6B, View B.

Boeing Service Bulletin 747-52-2117 will be released in the near future which will give instructions for the modification of the nose cargo door latch and lock system. Incorporation of this FAA approved modification will constitute terminating action under the inspection provisions of this AD.

The manufacturer's specifications and procedures identified and described in this directive are incorporated herein and made a part hereof pursuant to 5 U.S.C. 552(a)(1).

All persons affected by this directive who have not already received these documents from the manufacturer may obtain copies upon request to Boeing Commercial Airplane Company, P.O. Box 3707, Seattle, Washington 98124. The documents may also be examined at FAA Northwest Region, 9010 East Marginal Way South, Seattle, Washington.

This amendment becomes effective upon publication in the FEDERAL REGISTER for all persons except those to whom it was made effective immediately by telegram dated October 23, 1975.

(Secs. 313(a), 601, and 603, Federal Aviation Act of 1958 (49 U.S.C. 1354(a), 1424, and 1423); sec. 6(c), Department of Transportation Act (49 U.S.C. 1655(c)))

Issued in Seattle, Washington, November 3, 1975.

J. H. TANNER,
Acting Director,
Northwest Region.

(The incorporation by reference provisions in the document were approved by the Director of the FEDERAL REGISTER on June 19, 1967.)

[FR Doc.75-30250 Filed 11-10-75;8:45 am]

[Airspace Docket No. 75-GL-38]

PART 71—DESIGNATION OF FEDERAL AIRWAYS, AREA LOW ROUTES, CONTROLLED AIRSPACE, AND REPORTING POINTS

Designation of Transition Area

On page 23765 of the FEDERAL REGISTER dated June 2, 1975, the Federal Aviation Administration published a notice of proposed rule making which would amend § 71.181 of Part 71 of the Federal Aviation Regulations so as to designate a transition area at Cambridge, Minnesota.

Interested persons were given 30 days to submit written comments, suggestions or objections regarding the proposed amendment.

No objections have been received and the proposed amendment is hereby adopted without change and is set forth below.

This amendment shall be effective 0901 G.m.t., December 11, 1975.

(Sec. 307(a), Federal Aviation Act of 1958 (49 U.S.C. 1348); sec. 6(c) of the Department of Transportation Act (49 U.S.C. 1655(c)))

Issued in Des Plaines, Illinois on October 24, 1975.

R. O. ZIEGLER,
Acting Director, Great Lakes Region.

In § 71.181 (40 F.R. 441), the following transition area is added:

CAMBRIDGE, MINNESOTA

That airspace extending upward from 700 feet above the surface within a 5-mile radius of the Cambridge Municipal Airport (latitude 45°33'35" N., longitude 93°15'49" W.); and within 3 miles each side of the 173° bearing from the airport, extending from the 5 mile radius area to 8 miles south of the airport.

[FR Doc.75-30252 Filed 11-10-75;8:45 am]

Title 21—Food and Drugs

CHAPTER I—FOOD AND DRUG ADMINISTRATION, DEPARTMENT OF HEALTH, EDUCATION, AND WELFARE

SUBCHAPTER B—FOOD AND FOOD PRODUCTS

[Docket No. 75F-0189]

PART 121—FOOD ADDITIVES

Subpart F—Food Additives Resulting From Contact With Containers or Equipment and Food Additives Otherwise Affecting Food

RESINOUS AND POLYMERIC COATINGS FOR POLYOLEFIN FILMS

The Commissioner of Food and Drugs is amending the food additive regulations in § 121.2569 *Resinous and polymeric coatings for polyolefin films* (21 CFR 121.2569) to provide for an increase in the permitted level of petroleum alicyclic hydrocarbon resins for use as a component of coatings on polyolefin fabrics intended for bulk packaging of fruits and vegetables; effective November 11, 1975; objections by December 11, 1975. The amendment increases the permitted use level of the additive from 25 percent to 30 percent by weight of coating solids.

Notice was given by publication in the FEDERAL REGISTER of August 18, 1975 (40 FR 34623) that a petition (FAP 6B3123) had been filed by Exxon Corp., P.O. Box 45, Linden, N.J. 07036, proposing that § 121.2569 (21 CFR 121.2569) be amended to provide for an increased use level of petroleum alicyclic hydrocarbon resins as a component of coatings on polyolefin fabrics intended for the bulk packaging of fruits and vegetables.

The Commissioner, having evaluated the data in the petition, and other relevant material, concludes that § 121.2569 should be amended, as set forth below, to provide for the safe use of up to 30 percent by weight of coating solids of petroleum alicyclic hydrocarbon resins blended with butyl rubber. The additive is to be used as a component of coatings on polyolefin fabrics intended for bulk packaging of fruits and vegetables.

Therefore, pursuant to provisions of the Federal Food, Drug, and Cosmetic Act (sec. 409(c)(1), 72 Stat. 1786 (21 U.S.C. 348(c)(1)) and under authority delegated to the Commissioner (21 CFR 2.120), § 121.2569 is amended in paragraph (b)(3)(i) by revising the listing for petroleum alicyclic hydrocarbon resins as follows:

§ 121.2569 Resinous and polymeric coatings for polyolefin films.

* * * * *

(b) * * *

(3) * * *

List of substances	*Limitations*
(i) Resins and polymers: Petroleum alicyclic hydrocarbon resins.	As defined in § 121.2526. Blended with butyl rubber for use as a component of coatings on polyolefin fabric for bulk packaging of raw fruits and vegetables and used at a level not to exceed 30 percent by weight of the total coating solids.

* * * * *

Any person who will be adversely affected by the foregoing order may at any time on or before December 11, 1975, file with the Hearing Clerk, Food and Drug Administration, Rm. 4-65, 5600 Fishers Lane, Rockville, MD 20852, written objections thereto. Objections shall show wherein the person filing will be adversely affected by the order, specify with particularity the provisions of the order deemed objectionable, and state the grounds for the objections. If a hearing is requested, the objections shall state the issues for the hearing, shall be supported by grounds factually and legally sufficient to justify the relief sought, and shall include a detailed description and analysis of the factual information intended to be presented in support of the objections in the event that a hearing is held. Six copies of all documents shall be filed and should be identified with the Hearing Clerk docket number found in brackets in the heading of this order. Received objections may be seen in the above office during working hours, Monday through Friday.

Effective date. This order shall become effective November 11, 1976.

(Sec. 409(c)(1), 72 Stat. 1786 (21 U.S.C. 348(c)(1)).)

Dated November 5, 1975.

SAM D. FINE,
Associate Commissioner for Compliance.

[FR Doc.75-30268 Filed 11-10-75;8:45 am]

SUBCHAPTER E—ANIMAL DRUGS, FEEDS, AND RELATED PRODUCTS

[Docket No. 75N-0288]

PART 514—NEW ANIMAL DRUG APPLICATIONS

Submission of Applications

The Commissioner of Food and Drugs is amending the regulations (21 CFR Part 514) concerning submission of new animal drug applications (NADA's) to delete the provision for the distribution, by the Food and Drug Administration, of folders intended for the binding and submission of NADA's and to add a new provision prescribing certain procedures for numbering the pages of NADA's, effective December 11, 1975.

In a notice published in the FEDERAL REGISTER of November 4, 1974 (39 FR 39009), the Commissioner proposed these amendments to the new animal drug regulations concerning NADA's submitted to the Food and Drug Administration pursuant to section 512(b) of the Federal Food, Drug, and Cosmetic Act. The proposal allowed for filing of comments by January 3, 1975.

The two comments received in response to the proposal and the Commissioner's conclusions are as follows:

1. One comment, while agreeing with the proposal in principle, stated that the amendment was unnecessarily restrictive and suggested that it be revised "To eliminate the problem of illegible page numbers without restricting the flexibility that is desirable and sometimes necessary * * *."

The Commissioner agrees and has amended the final regulation to permit the numbering of pages in locations other than in the upper right hand corner if such numbering is clearly legible following binding of the NADA.

2. One comment stated that the provision for sequential numbering of the pages of an NADA should be broadened to permit, in the case of multivolume NADA's, sequential numbering of the pages in each volume.

The Commissioner agrees and has amended the final regulation to permit sequential numbering of pages either on the basis of the entire NADA or on a volume-by-volume basis.

For clarity, the Commissioner has also made some editorial changes in the final regulation.

Therefore, under the Federal Food, Drug, and Cosmetic Act (secs. 512, 701(a), 52 Stat. 1055, 82 Stat. 343 et seq. (21 U.S.C. 360b, 371(a))) and under authority delegated to the Commissioner (21 CFR 2.120), Part 514 is amended by revising § 514.1(b)(15) to read as follows:

§ 514.1 Applications.

* * * * *

(b) * * *

(15) *Assembling and binding the application.* Assemble and bind an original and two copies of the application as follows:

(i) Bind the original or ribbon copy of the application as copy No. 1.

(ii) Bind two identical copies as copy No. 2 and copy No. 3.

(iii) Identify each front cover with the name of the applicant, new animal drug, and the copy number.

(iv) Number each page of the application sequentially in the upper right hand corner or in another location so that the page numbers remain legible after the application has been bound, and organize the application consistent with paragraph (b)(1) through (14) of this section. Each copy should bear the same page numbering, whether sequential in each volume or continuous and sequential throughout the application.

(v) Include complete labeling in each of the copies. It is suggested that labeling be identified by date of printing or date of preparation.

(vi) Submit separate applications for each different dosage form of the drug proposed. Repeating basic information pertinent to all dosage forms in each application is unnecessary if reference is made to the application containing such information. Include in each application information applicable to the specific dosage form, such as labeling, composition, stability data, and method of manufacture.

(vii) Submit in folders amendments, supplements, and other correspondence sent after submission of an original application. The front cover of these submissions should be identified with the name of the applicant, new animal drug, copy number, and the new animal drug application number, if known.

* * * * *

Effective date. This regulation is effective December 11, 1975.

(Secs. 512, 701(a), 52 Stat. 1055, 82 Stat. 343 et seq. (21 U.S.C. 360b, 371(a)).)

Dated: November 4, 1975.

SAM D. FINE,
Associate Commissioner for Compliance.

[FR Doc.75-30267 Filed 11-10-75;8:45 am]

CHAPTER II—DRUG ENFORCEMENT ADMINISTRATION, DEPARTMENT OF JUSTICE

PART 1308—SCHEDULES OF CONTROLLED SUBSTANCES

Librax and Menrium; Excepted From Schedule IV

On May 29, 1975, the Administrator of the Drug Enforcement Administration issued an order placing chlordiazepoxide (Librium) into Schedule IV of the Comprehensive Drug Abuse Prevention and Control Act of 1970. (40 FR 23998, June 4,

V 40 N 218 NOV 11 75 XUM

1975). Application of this order was reserved in part as to the prescription products Librax and Menrium, which contain chlordiazepoxide. (40 FR 26675–76, June 25, 1975).

In addition to the May 29, 1975 order controlling chlordiazepoxide, the Administrator also issued on that date a notice of proposed rulemaking to amend section 1308.32(b) of Title 21 of the Code of Federal Regulations (CFR) by adding Librax and Menrium to the list of excepted prescription drugs. (40 FR 24216–17, June 5, 1975). In that notice, the Administrator set forth his determinations and findings justifying the proposed rulemaking, and invited all interested persons to submit comments or objections in response thereto, no later than July 15, 1975. One comment was received. It was submitted by the Pharmacy Examining Board, Department of Regulation & Licensing, State of Wisconsin, which stated that it supports the proposed rulemaking regarding Librax and Menrium. No other comments, and no objections, were received in response to the notice.

Therefore, having determined and found that Librax and Menrium are preparations which contain chlordiazepoxide, a depressant listed in 21 CFR 1308.14(b) as amended, and other ingredients in such combinations, quantity, preparation or concentration so as to vitiate the potential for abuse of chlordiazepoxide, by virtue thereof, and in accordance with and pursuant to section 202(d) of the Comprehensive Drug Abuse Prevention and Control Act of 1970, and under the authority vested in the Attorney General by sections 301 and 501(b) of the Act (21 U.S.C. 821, 871(b)) and delegated to the Administrator of the Drug Enforcement Administration by § 0.100 of Title 28 of the Code of Federal Regulations (See 38 FR 18380, July 2, 1973), and redelegated to the Deputy Administrator of the Drug Enforcement Administration by 28 CFR § 0.104 [Appendix to Subpart R] Sec. 6(g), the Deputy Administrator of the Drug Enforcement Administration hereby orders that Part 1308 of Title 21 of the Code of Federal Regulations be amended as follows:

Section 1308.32(b) is amended by adding, in appropriate alphabetical order, the following excepted prescription drugs:

§ 1308.32 Excepted compounds.

. . . . . .

(b) . . .

Excepted prescription drugs

Trade name or other designation	Composition	Manufacturer or suppliers
. . . . .	. . . . .	. . . . .
Librax	Capsule: Chlordiazepoxide hydrochloride 5 mg and clidinium bromide 2.5 mg	Roche Laboratories.
. . . . .	. . . . .	. . . . .
Menrium 5-2	Tablet: Chlordiazepoxide 5 mg and water-soluble esterified estrogens 0.2 mg	Do.
Menrium 5-4	Tablet: Chlordiazepoxide 5 mg and water-soluble esterified estrogens 0.4 mg	Do.
Menrium 10-4	Tablet: Chlordiazepoxide 10 mg and water-soluble esterified estrogens 0.4 mg	Do.
. . . . .	. . . . .	. . . . .

This order is effective on November 28, 1975.

Dated: October 24, 1975.

JERRY N. JENSON,
Deputy Administrator,
Drug Enforcement Administration.

[FR Doc.75-30314 Filed 11-10-75;8:45 am]

Title 25—Indians

CHAPTER I—BUREAU OF INDIAN AFFAIRS, DEPARTMENT OF THE INTERIOR

PART 221—OPERATION AND MAINTENANCE CHARGES

San Xavier Indian Irrigation Project, Arizona

On page 43513 of the FEDERAL REGISTER of September 22, 1975, there was published a notice of proposal to modify §§ 221.170 and 221.171 of Title 25, Code of Federal Regulations, dealing with operation and maintenance assessments and excess water charges on the San Xavier Indian Irrigation Project, Arizona.

Interested persons were given 30 days within which to submit written comments, suggestions or objections with respect to the proposed amendments. No comments, suggestions, nor objections were received, and the proposed revisions are hereby adopted without changes, as set forth below.

The revised sections will read as follows:

§ 221.170 Charges.

The annual basic operation and maintenance assessment rate for land to which water can be delivered under the San Xavier Indian Irrigation Project, Arizona, is hereby fixed at $60.00 per acre whether the water is used or not. Non-Indian owned land and Indian owned land leased to non-Indians shall pay the full assessment rate. Indian owned and operated land and Indian land leased and operated by Indians shall pay a minimum rate determined by the Superintendent based on the Indian owner's financial ability to pay but not to exceed the established basic assessment rate and shall be fixed prior to the beginning of the calendar year for which it is effective. The payment of the assessment rate shall entitle the water user to his pro-rated share of the water as determined by the production capacity of the wells and/or the availability of funds available to pay the pumping operation and maintenance costs. The foregoing assessment rates shall become effective for the calendar year 1976 and continue in effect thereafter until further notice.

§ 221.171 Payments.

The annual basic water charge fixed in § 221.170 shall become due and payable on or before March 1 of each year, and any unpaid charges shall stand as a first lien against the land without penalty until paid.

CHARLES D. WORTHMAN,
Assistant Area Director.

[FR Doc.75-30337 Filed 11-10-75;8:45 am]

Title 29—Labor

CHAPTER V—WAGE AND HOUR DIVISION, DEPARTMENT OF LABOR

PART 870—RESTRICTION ON GARNISHMENT

Disposable Earnings Subject to Garnishment

By the Fair Labor Standards Amendments of 1974 (P.L. 93–259) section 6(a)(1) of the Fair Labor Standards Act was amended to provide a minimum rate of $2.30 per hour, commencing January 1, 1976. By the Consumer Credit Protection Act (§ 303, P.L. 90–321, 80 Stat. 837; 15 U.S.C. 1673) the minimum amount of disposable earnings which is exempt from garnishment is increased with each increase in the minimum wage rate set forth in section 6(a)(1) of the Fair Labor Standards Act. Accordingly, it is necessary to revise § 870.10 to include in our regulations the revised dollar amounts of disposable earnings exempted from garnishment.

Inasmuch as these changes are made to conform our regulations to the Fair Labor Standards Act as amended by the Fair Labor Standards Amendments of 1974, no notice of proposed rule making nor delay in the effective date is required. Accordingly, these regulations shall be effective on January 1, 1976.

In § 870.10, paragraphs (b) through (d) are revised to read as follows and paragraphs (e)–(f) are deleted.

§ 870.10 Maximum part of aggregate disposable earnings subject to garnishment.

. . . . . .

(b) *Weekly pay period.* The statutory exemption formula applies directly to the aggregate disposable earnings paid or payable for a pay period of 1 workweek, or a lesser period. Its intent is to protect from garnishment, and save to an individual earner, the specified amount of compensation for his personal services rendered in the workweek, or a lesser period. Thus, so long as the Federal minimum wage prescribed by section 6(a)(1) of the Fair Labor Standards Act of 1938 is $2.30 an hour—

(1) If an individual's disposable earnings for a workweek or lesser period are $69 (30×$2.30) or less his earnings may not be garnished in any amount.

(2) If an individual's disposable earnings for a workweek or lesser period are more than $69, but less than $92 only the amount above $69 is subject to garnishment.

(3) If an individual's disposable earnings for a workweek or lesser period are $92 or more, 25 percent of his disposable earnings is subject to garnishment.

(c) *Pay for a period longer than 1 week.* In the case of disposable earnings which compensate for personal services rendered in a pay period longer than 1 workweek, the weekly statutory exemption formula must be transformed to a formula applicable to such earnings providing equivalent restrictions on wage garnishment.

(1) The 25 percent part of the formula would apply to the aggregate disposable earnings for all the workweeks or fractions thereof compensated by the pay for such pay period.

(2) The "multiple" of the Federal minimum hourly wage equivalent to that applicable to the disposable earnings for 1 week is represented by the following formula: The number of workweeks, or fractions thereof (x) ×30× the applicable Federal minimum wage ($2.30). For the purpose of this formula, a calendar month is considered to consist of 4⅓ workweeks. Thus, so long as the Federal minimum hourly wage is $2.30 an hour, the "multiple" applicable to the disposable earnings for a 2-week period is $138 (2×30×$2.30); for a monthly period, $299 (4⅓×30×$2.30); and for a semimonthly period, $149.50 (2⅙×30×$2.30). The "multiple" for any other pay period longer than 1 week shall be computed in a manner consistent with section 303(a) of the Act and with this paragraph.

(d) *Date wages paid or payable controlling.* The date that disposable earnings are paid or payable, and not the date the Court issues the garnishment order, is controlling in determining the amount of disposable earnings that may be garnished. Thus, a garnishment order issued in September, 1975, providing for withholding from wages over a period of time, based on exemptions computed at the minimum rate then in effect, would be modified by operation of the change in the law so that wages paid after January 1, 1976, would be subject to garnishment only to the extent described in paragraphs (b) and (c) of this section which are based on a $2.30 minimum wage.

(Sec. 303, 82 Stat. 163 (15 U.S.C. 1673); Sec. 2, Pub. L 93–259, 84 Stat 55)

Signed at Washington, D.C., on this 5th day of November, 1975.

WARREN D. LANDIS,
Acting Administrator, Wage and Hour Division, U.S. Department of Labor.

Title 36—Parks, Forests and Public Property

CHAPTER II—FOREST SERVICE, DEPARTMENT OF AGRICULTURE

PART 212—ADMINISTRATION OF THE FOREST DEVELOPMENT

Transportation System

INGRESS AND EGRESS

This is an amendment to Part 212 making minor changes in § 212.8 to clarify the meaning.

The last sentence of paragraph (a) has been deleted and a new sentence substituted which states more clearly the requirement for written authorization in order to construct, reconstruct or maintain a road or highway on lands and easements administered by the Forest Service.

The words "forest development" have been inserted between the words "existing" and "roads" in the first sentence of paragraphs (b) and (c). The revision makes clear that permission to use roads applies to existing forest development roads and not to all existing roads.

The revision does not constitute a substantive change in the regulations. In accordance with exceptions to rulemaking procedures in 5 U.S.C. 553 and USDA policy (36 FR 13804) it has been found and determined that advance notice and request for comments would be unnecessary.

Part 212 is amended by revising § 212.8 to read as follows:

§ 212.8 Ingress and egress.

(a) *Policy in acquiring and granting access.* To assure effective protection, management, and utilization of lands administered by the Forest Service and intermingled and adjacent private and public lands, and for the use and development of the resources upon which communities within or adjacent to the National Forests are dependent, the Chief shall as promptly as is feasible obtain needed access thereto and shall grant appropriate access across National Forest and other lands and easements administered by the Forest Service to intermingled or adjacent landowners. Construction, reconstruction or maintenance of a road or highway without written authorization is prohibited.

(b) *Actual settlers and other persons residing within the National Forests and other areas administered by the Forest Service.* Actual settlers and other persons residing within the National Forests and other areas administered by the Forest Service shall be permitted ingress and egress over the same and use of existing forest development roads and trails in order to reach their homes and to utilize their property: Provided, such ingress and egress or use shall conform to rules and regulations governing the protection and administration of the lands and the roads or trails to be used.

(c) *Others.* Entering upon the National Forests and other lands administered by the Forest Service and use of existing forest development roads and trails shall be permitted for all proper and lawful purposes, subject to compliance with rules and regulations governing the lands and the roads or trails to be used.

(25 Stat. 357, 26 Stat. 1103, 30 Stat. 35–36, 1233 38 Stat. 430, 46 Stat. 1421, 64 Stat. 82, 72 Stat. 885, as amended, 74 Stat. 215, 78 Stat. 1089; 16 U.S.C. 471, 478, 498, 525, 528–531, 532, 538, 551, 572, 23 U.S.C. 101, 205, 40 U.S.C. 257, 258a et seq.; 42 Atty. Gen. Op. No. 7; Comp. Gen. B–65972, May 19, 1947; 40 Comp. Gen. 372; 41 Comp. Gen. 1; 41 Comp. Gen. 576, and 42 Comp. Gen. 590)

Effective date. This revision takes effect November 11, 1975.

ROBERT W. LONG,
Assistant Secretary.

Title 49—Transportation

CHAPTER X—INTERSTATE COMMERCE COMMISSION

SUBCHAPTER A—GENERAL RULES AND REGULATIONS

[S.O. No. 1224]

PART 1033—CAR SERVICE

Distribution of Grain Cars

NOVEMBER 6, 1975.

At a Session of the Interstate Commerce Commission, Railroad Service Board, held in Washington, D.C., on the 5th day of November, 1975.

It appearing, That there is an acute shortage of cars for transporting shipments of grain, grain products, and soybeans; that certain tariff provisions require minimum shipments of 180,000 lbs. or more; that many carriers are unable to furnish sufficient cars to transport shipments of such weights; that cars of lesser capacity are available; that such cars cannot be used because of certain tariff provisions; that there is immediate need to use every available car for transportation of grain; that the inability of the carriers to furnish sufficient grain cars results in great economic loss; and that present regulations and practices with respect to the use, supply, control, movement, and distribution of grain cars are ineffective. It is the opinion of the Commission that an emergency exists requiring immediate action to promote car service in the interest of the public and the commerce of the people. Accordingly, the Commission finds that notice and public procedure are impracticable and contrary to the public interest, and that good cause exists for making this order effective upon less than thirty days' notice.

It is ordered, That:

§ 1033.1224 Service Order 1224.

(a) *Distribution of grain cars.* Each common carrier by railroad subject to the Interstate Commerce Act may furnish not more than two cars of smaller capacity for each car of 180,000 lbs. or

V 40 N 218 NOV 11 75 XUM

greater capacity ordered by any shipper for loading with grain, grain products, soy beans or soy bean products subject to the conditions and exceptions provided in paragraphs (e) and (f) of this section.

(b) *Rates and minimum weights applicable.* The rates to be applied and the minimum weights applicable to shipments of two smaller cars furnished and loaded as authorized by paragraph (a) of this section shall be the rate and minimum weight applicable to the larger single car ordered.

(c) *Billing to be endorsed.* The carrier substituting two smaller cars for one larger car as authorized by paragraph (a) of this section shall place the following endorsement on the bill of lading and on the waybills authorizing movement of the car:

"Car of 180,000 lbs, or greater capacity ordered. Two smaller cars furnished authority ICC Service Order No. 1224."

(d) *Concurrence of shipper required.* Two smaller cars shall not be furnished in lieu of a single car of 180,000 lbs. or greater capacity without the consent of the shipper.

(e) *Cars subject to Service Order No. 1223 excluded.* This order shall not apply to cars used in unit-grain-train services subject to the provisions of Service Order No. 1223.

(f) *Exceptions.* Exceptions to this order, including extension of its application to elevators located in other states, may be authorized to railroads by the Railroad Service Board, Washington, D.C. 20423. Requests for such extension must be submitted in writing, or confirmed in writing, and must clearly state the points at which such exceptions are requested and the reason therefor.

(g) *Rules and regulations suspended.* The operation of all rules, regulations, or tariff provisions is suspended insofar as they conflict with the provisions of this order.

(h) *Application.* The provisions of this order shall apply to intrastate, interstate, and foreign commerce.

(i) *Effective date.* This order shall become effective at 11:59 p.m., November 6, 1975.

(j) *Expiration date.* This order shall expire at 11:59 p.m., February 29, 1976, unless otherwise modified, changed, or suspended by order of this Commission.

(Secs. 1, 12, 15, 17(2), 24 Stat. 379, 383, 384, as amended; 49 U.S.C. 1, 12, 15, 17(2). Interprets or applies Secs. 1(10–17), 15(4), and 17(2), 40 Stat. 101, as amended, 54 Stat. 911; 49 U.S.C. 1(10–17), 15(4), and 17(2).)

It is further ordered, That a copy of this order and direction shall be served upon the Association of American Railroads, Car Service Division, as agent of all railroads subscribing to the car service and car hire agreement under the terms of that agreement, and upon the American Short Line Railroad Association; and that notice of this order be given to the general public by depositing a copy in the Office of the Secretary of the Commission at Washington, D.C., and by filing it with the Director, Office of the Federal Register.

By the Commission, Railroad Service Board.

[SEAL] ROBERT L. OSWALD,
Secretary.

Title 50—Wildlife and Fisheries

CHAPTER I—U.S. FISH AND WILDLIFE SERVICE, DEPARTMENT OF THE INTERIOR

PART 33—SPORT FISHING

Lake Ilo National Wildlife Refuge, N. Dak.

The following special regulation is issued and is effective on November 11, 1975.

§ 33.5 Special regulation; sport fishing, for individual wildlife refuge areas.

NORTH DAKOTA

LAKE ILO NATIONAL WILDLIFE REFUGE

Winter Sport Fishing on the Lake Ilo National Wildlife Refuge, Dunn Center, North Dakota is permitted in accordance with all applicable State regulations through March 28, 1976. The area open to fishing comprises 1050 acres, and is delineated on maps available at refuge headquarters, 1 mile west of Dunn Center, North Dakota and from the Area Manager, U.S. Fish and Wildlife Service, Post Office Box 1897, Bismarck, North Dakota 58501. Sport fishing shall be in accordance with all applicable State regulations, subject to the following conditions.

(1) Fishing at all times shall be limited to daylight hours only.

The provisions of this special regulation supplement the regulations which govern fishing on wildlife refuge areas generally which are set forth in Title 50, Code of Federal Regulations, Part 33, and are effective through March 28, 1976.

ROLLAND J. KRIEGER,
Asst. Refuge Manager,
Lake Ilo National Wildlife Refuge.

NOVEMBER 3, 1975.

proposed rules

This section of the FEDERAL REGISTER contains notices to the public of the proposed issuance of rules and regulations. The purpose of these notices is to give interested persons an opportunity to participate in the rule making prior to the adoption of the final rules.

DEPARTMENT OF THE TREASURY

Bureau of Alcohol, Tobacco, and Firearms

[27 CFR Parts 4, 5, 7]

[Notice No. 285]

INGREDIENT LABELING OF MALT BEVERAGES, DISTILLED SPIRITS AND WINE

Withdrawal of Notices of Proposed Rulemaking

The purpose of this document is to announce that FEDERAL REGISTER notices 74–17720, 75–3719 and 75–3720 (39 FR 27812, 40 FR 6354 and 40 FR 6349 respectively) in which the Bureau of Alcohol, Tobacco and Firearms (ATF) published proposed amendments to 27 CFR Parts 7, 5 and 4, respectively, regarding ingredient labeling of malt beverages, distilled spirits and wine are hereby withdrawn. All of the oral representations received during the three public hearings held on the ingredient labeling proposals and all of the written comments, numbering in excess of 1,000, received by the Bureau of Alcohol, Tobacco, and Firearms regarding the proposals have been considered.

From these representations it was determined, first, that it appears the cost of ingredient labeling to the industry, and ultimately to the consumer, would be excessive in relation to the benefit received. While the evidence presented at these hearings did not conclusively establish the ultimate cost that would have been borne by the industry, there would without doubt have been substantial costs involved had the proposals been implemented. We do not feel that the benefits to be derived from ingredient labeling are significant enough to warrant imposition of the added costs upon the general consumer.

Second, the content of alcoholic beverages is extensively regulated at the present time. Currently the Bureau will approve no additive to an alcoholic beverage unless the Food and Drug Administration first authorizes its use.

Third, the uniqueness of manufacturing processes of alcoholic beverages is such that it makes labeling of their ingredients of little value and, in certain cases, even misleading. For example, the ingredient listing for malt beverages would have contained yeast, even though that substance is not present in the finished product. As brewers yeast is commonly sold as a health product, some consumers might have erroneouly been led to think that malt beverages were healthy for that reason. Similarly, the term "cereal grains" in a distilled spirits ingredient list might have led some consumers to believe that they were getting more nourishment than is actually available in this product.

Fourth, representations were made that ingredient labeling requirements would hinder the on-going multilateral trade negotiations in expanding international trade. In fact, the Deputy Special Representative for Trade Negotiations (of the U.S.) formally stated his objection to the proposal on this basis. Testimony at the hearings indicated that if the proposals were implemented, the United States would be the only country in the world to require ingredient labeling of alcoholic beverages, even though a few (e.g., Canada) have formally considered and rejected such a requirement.

Finally, ingredient labeling is supported by only a small segment of the public. Although numerous comments were received from consumers and consumer advocate groups, we have not found any strong indication that the average consumer of alcoholic beverages is in favor of ingredient labeling.

In view of the foregoing, we have concluded that the public interest would not be served by the adoption of the proposed amendments at this time.

Signed: November 3, 1975.

REX D. DAVIS,
Director.

Approved: November 4, 1975.

DAVID R. MACDONALD,
Assistant Secretary of the Treasury.

DEPARTMENT OF AGRICULTURE

Agricultural Stabilization and Conservation Service

[7 CFR Part 729]

PEANUTS

Proposed Proclamation of 1976 National Marketing Quota

The Secretary of Agriculture is required by § 358(a) of the Agricultural Adjustment Act of 1938, as amended (7 U.S.C. 1358(a)), to proclaim, between July 1 and December 1 of each calendar year, the amount of the national marketing quota for peanuts for the crop produced in the next succeeding calendar year. The amount of such quota is the total quantity of peanuts which will make available for marketing a supply of peanuts from the crop with respect to which the quota is proclaimed equal to the average quantity of peanuts harvested for nuts during the five years immediately preceding the year in which such quota is proclaimed, adjusted for current trends and prospective demand conditions.

Section 358(a) of the act further provides that the national marketing quota for peanuts shall be converted to a national acreage allotment by dividing such quota by the normal yield per acre of peanuts for the United States determined by the Secretary on the basis of the average yield per acre of peanuts in the five years preceding the year in which the quota is proclaimed, with such adjustment as may be found necessary to correct for trends in yields and for abnormal conditions of production affecting yields.

Section 358(a) of the act also requires that the national marketing quota be a quantity of peanuts sufficient to provide a national acreage allotment of not less than 1,610,000 acres.

Section 358(c)(1) of the act (7 U.S.C. 1358(c)(1) provides that the national acreage allotment for any year shall be apportioned among the States on the basis of their shares of the national acreage allotment for the most recent year in which such apportionment was made. Pursuant to this provision of the Act, the national acreage allotment for the 1976 crop of peanuts will be apportioned to States on the basis of their shares of the 1975 national acreage allotment.

The subjects and issues involved in the proposed determinations are:

1. The amount of the national marketing quota.

2. The amount of the national acreage allotment.

Consideration will be given to data, views, and recommendations pertaining to the proposed determinations covered by this notice which are submitted in writing to the Director, Tobacco and Peanut Division, Agricultural Stabilization and Conservation Service, United States Department of Agriculture, Washington, D.C., 20250. All written submissions made pursuant to this notice will be made available for public inspection in Room 6753–South Building, U.S. Department of Agriculture, 14th and Independence Avenue, S.W., Washington, D.C., Monday through Friday from 8:15 a.m. to 4:45 p.m. (7 CFR 1.27(b)). All submissions must, in order to be sure of consideration, be postmarked not later than November 26, 1975.

Signed at Washington, D.C. on: November 7, 1975.

E. J. PERSON,
Acting Administrator, Agricultural Stabilization and Conservation Service.

V 40 N 218 NOV 11 75 XUM

Animal and Plant Health Inspection Service

[9 CFR Parts 318, 381]

Nitrates, Nitrites, and Salt

NOTICE OF PROPOSED RULEMAKING

● **Purpose: The purpose of this document is to propose modifications in the use of nitrates, nitrites, and salt in meat and poultry products. It will also advise that work must continue on the removal of preformed nitrosamines from bacon and that the extent of progress will be reviewed during and after the end of 1 year.** ●

Notice is hereby given in accordance with the administrative procedure provisions in 5 U.S.C. 553 that the Animal and Plant Health Inspection Service is considering amending the Federal meat inspection regulations, pursuant to the Federal Meat Inspection Act (21 U.S.C. 601 *et seq.*), and the poultry products inspection regulations, pursuant to the Poultry Products Inspection Act (21 U.S.C. 451 *et seq.*), for the purposes set forth above.

Statement of considerations. As used in the opening paragraph of this document, and in this statement of considerations, unless otherwise noted, the term "nitrate" shall mean sodium nitrate, the term "nitrite" shall mean sodium nitrite, and the term "salt" shall mean sodium chloride (common table salt).

The curing of meat and poultry products today is based partly on the art as practiced over thousands of years and partly on sound scientific principles developed within the last 80 years. Meat was first preserved with salt as the curing agent in the saline deserts of Hither Asia and coastal areas. These desert salts contained nitrates as impurities. Even in Homer's time (900 B.C.), curing meat with salt, followed by smoking, was an established practice. Cato (234–149 B.C.) wrote careful instructions for dry-curing hams. It included rubbing with salt, overhauling with salt, rubbing with oil, smoking, and rubbing the ham again with a mixture of oil and vinegar. However, it was not until Roman times that the reddening effect now attributed to nitrite was mentioned. The Romans had learned from the Greeks the technique of curing pork and fish with salt, and they were probably the first to establish a trade market for cured meats. Meat cured with salt containing nitrate, and even nitrite impurities, developed a characteristic cured flavor and color, as well as the properties of a preserved product. In time, the cured flavor and color became highly desirable to many people.

Reference to the use of nitrate itself can be traced back several hundred years. Its use continued after passage of the Federal Meat Inspection Act of 1906.

Chemists and meat scientists in the early 1900's determined that the active agent responsible for the color and flavor changes was nitric oxide, which was formed from nitrate during the curing process. Nitrite, in turn, is formed from nitrate, but the formation process is difficult to control. Therefore, once this mechanism was understood, the Department in 1925, formally authorized the direct addition of nitrite, permitting no more than 200 parts per million (ppm) of residual nitrite in finished product. This limit has been in force unchanged since then.

In the late 1960's, questions were raised as to the use of nitrites in food and their combination with other compounds in the food or in the body to form nitrosamines. The Federal Food and Drug Administration (FDA), Department of Health, Education, and Welfare, and the Department of Agriculture organized a scientific study group to carefully review information and data concerning the matter. This group has met regularly since its organization in 1970. In 1971, the House Intergovernmental Relations Subcommittee conducted hearings on the issue of nitrosamine formation and the possible involvement of nitrite in cured foods. The matter was widely discussed by the public and the media, and further studies were carried out by the scientific community. Numerous conferences were held during 1972, to discuss available information on the role of nitrite in curing and preserving, and to determine what new information was needed. Again, further research was scheduled cooperatively among industry, FDA, and the Department.

Early in 1972, the Department was petitioned to ban, or greatly reduce the amount of nitrite used in the curing process. The Department denied the petition, indicating additional information was needed on the chemistry associated with nitrosamine formation. Another factor associated with the problem, and one which could not be ignored, was the recognized role of nitrite in inhibiting the growth of *Clostridium botulinum*. These bacteria, under favorable conditions, can produce the deadly toxin responsible for the food poisoning known as botulism. Information in literature indicates that in the 1920's, scientists were demonstrating the antimicrobial effect of nitrite, and further investigation continued through the years. In the early 1970's, concentrated research studies were begun to learn more precisely the antimicrobial role of nitrite in modern forms of meat products. In a short time, sufficient data were gathered to satisfactorily confirm the inhibitory action of nitrite to the growth of *Clostridium botulinum*, as well as the levels required to accomplish the desired effect. The studies clearly showed that the amount of nitrite needed to inhibit botulinal toxin formation was dependent upon the quantity of nitrite introduced into the product, rather than the residual level of nitrite in the finished product. It has been necessary for the Department to act carefully and deliberately in this matter, since it recognizes that, in the desire to reduce levels to eliminate the possibility of nitrosamine formation, the very real public health hazard of botulism cannot be ignored.

Late in 1973, the Secretary of Agriculture appointed an Expert Panel on Nitrites and Nitrosamines to advise him on this difficult and controversial subject. The Panel consisted of six well-qualified scientists who represent various disciplines considered most important to the evaluation of the problem. The first three meetings were devoted to presentations by scientists to help the Panel build the proper foundation for its deliberations. Papers were presented on the occurrence of nitrite and nitrate in various foods, and a detailed report given on the meat curing process and its chemistry. The Panel also heard discussions on the toxicology, chemistry, and microbiology of nitrite, and on the toxicology and chemistry of nitrosamines. In addition, the role of ascorbates (salts of Vitamin C) in curing was discussed. Notice of time and place of each meeting was published in the Federal Register at least 15 days prior to the meeting. The meetings were open to the public and were attended by a large number of participants from industry, the research community, and the media. All persons in attendance were given an opportunity to ask questions and participate in the deliberations. Copies of all papers presented and the minutes of the meetings were distributed, upon request, and are now on file with the Hearing Clerk of the Department and available for inspection during regular hours of business.

At its fourth meeting, the Panel formulated three recommendations. After review and approval of these recommendations at the fifth Panel meeting, a report was made to the Secretary. The recommendations of the Panel were:

"1. That use of nitrite salts in the curing process be discontinued in all meat and poultry products with two exceptions, dry-cured products and fermented sausage products. These two product categories will be addressed at a later date when additional data are available.

"2. That the level of nitrite salt permitted to be added for curing of meat and poultry be limited to 156 parts per million (ppm) in all processed products, with the exception of bacon and dry-cured products. Recommendation for these latter products will be deferred, pending availability of further research data.

"3. That the current permitted 200 ppm residual nitrite salt level be reduced in various product categories to reflect what is achievable with current technology. The Panel believes that 100 ppm in cooked sausage products, 125 ppm in canned cured and pickle cured products, and 50 ppm in canned cured sterile product would be sufficient to maintain product safety. Action on bacon, fermented sausage products, and dry-cured products is deferred until additional research data being developed become available.

"It is the consensus of the Panel members that these recommendations are consistent with all safety considerations. Levels of nitrate and nitrite are decreased, thus reducing the consumers' exposure to the potential hazards of nitrosamines, nitrosamides, and related chemicals; at the same time, sufficient levels of nitrite are maintained to protect the consumer against the very real hazard of botulinal poisoning."

To date, no substitute for nitrite has been discovered. No compound or treatment has been found that will produce the characteristic product and that possesses nitrite's antibotulinal properties. Researchers are still trying to find a replacement.

The work of the Expert Panel is not concluded at this point. The Panel will continue to review pertinent research findings, such as will be developed in current studies on dry-cured products and fermented sausages, and they will determine whether to recommend further changes in permitted levels of nitrate or nitrite. The Expert Panel will meet again during the comment period on this proposal. The Panel's comments on those portions of this proposal which go beyond their present recommendations will become part of the record and will receive consideration.

As recognized by the Panel, a special problem exists with bacon. The fact that a nitrosamine is formed during its frying is apparently unique to this product. The levels found have been decreasing steadily and are now in the range of 10 to 20 parts per billion. The meat industry has furthered this reduction through its research efforts and through voluntary adjustments in curing procedures.

The Department, however, recognizes that greater efforts need to be directed toward the removal of nitrosamines from bacon. The problem has been discussed with the meat industry and the Food and Drug Administration. The meat processing industry has already begun studies designed to develop a possible solution to the problem and has indicated its intent to commit additional resources to the work. New processing procedures are, and will be, explored which are directed toward preventing the formation of nitrosamines in bacon during frying. An assessment of the need for further action will be carried out both during and at the termination of a 1-year period. Also, the Department is considering the establishment of maximum levels of nitrite and minimum levels of ascorbate or erythorbate in the curing of bacon. Data available to the Department indicates that the proposed levels lead to reduced amounts of preformed nitrosamines in bacon.

As a result of the Panel's recommendations, the Department proposes that other related matters warrant discussion. Thus far, most of the attention with respect to nitrates and nitrites has been directed toward red meat products. However, for several years, a considerable number of products have been developed, using poultry in lieu of red meat. Such products have the same basic characteristics as the red meat items, and have comparable need for protection from botulinal toxin formation. Therefore, the Department believes it is necessary to make the same proposal with respect to poultry products as that set forth for meat products.

The Department is aware that some consumers have expressed a desire to purchase products cured solely with salt. This should be considered, and every person should be given an opportunity to comment. Accordingly, the Department is proposing that salt (sodium chloride) be included in the list of approved curing agents. Such use would be for salt-cured products, with sufficient brine concentration, or a water activity level such that *Clostridium botulinum* will not grow. Based upon current information, the Department believes the finished product should have a minimum brine concentration of 10 percent, or a maximum water activity of 0.92. This brine concentration can usually be attained by using 7 pounds of salt per 100 pounds of meat. It is determined in the finished product by analyzing for salt and moisture, and dividing the salt content by the moisture content. Water activity (usually abbreviated A_w) refers to the available water in a product which microorganisms depend on for growth, since their nutrients must be in solution. The A_w for fresh meat is 0.99 or above, as compared to an A_w of 1.0 for pure water. This A_w for meat is near the optimum for many varieties of microorganisms, although many can grow with a lower A_w. As the A_w decreases, the conditions favoring microbial growth also decrease. An A_w of 0.92 or lower will provide ample assurance that *Clostridium botulinum* will not grow.

An additional consideration of this proposed rulemaking relates to the use of curing agents in foods for babies. The greater toxicity of nitrite to infants in relation to adults has been recognized for several years. For that reason, the addition of nitrite to baby foods has not been practiced for some time, although some products generally marketed as toddler foods do contain some cured product as ingredients. Therefore, to clarify this matter, the Department is proposing to deny the use of nitrates or nitrites, or meat ingredients containing nitrates or nitrites, in meat and poultry food products intended for very small children. These are usually marketed as infant (strained) and junior (chopped) foods.

To this point, this document has discussed sodium nitrate or nitrite. However, potassium nitrate and nitrite are used on a limited basis. These agents produce the same results as their sodium counterparts. Because the potassium nitrate and potassium nitrite salts are heavier than their sodium counterparts, it is necessary to permit greater amounts of the potassium salts in order to obtain the same amount of nitrate and nitrite. This proposal makes a distinction in quantities permitted on that basis.

In establishing the required levels of nitrite to be introduced into product, the wording of the Panel's recommendations imply a concern that the maximum quantities not be exceeded. While this is true, it is not the only point of interest. The Secretary cannot ignore the bacteriostatic properties of nitrite and the amount necessary to inhibit the growth of *Clostridium botulinum*, since, in the absence of nitrites, it appears that certain meat and poultry products could become adulterated. What those exact levels are will vary, depending on the product and its microflora, method of preparation, packaging and other handling practices. Processors need to exercise special care in keeping with good manufacturing practices to assure adequate introduction of nitrite into product. This means that careful control will be necessary in cases where pickle is recirculated, cleaned, and reused, so that it will not be diluted. Pickle solutions held for several hours will also require special attention by the processor to determine the extent of nitrite dissipation. Further considerations by the Panel or Department, or both, may be necessary in this connection.

Another consideration with respect to this proposal concerns the level of nitrite introduced into pickle cured products. For the purpose of determining compliance with the requirements, the quantity of curing agent introduced into product would be determined on the quantity of curing pickle injected into the product, regardless of the quantity which may subsequently drain out.

Because of the necessity to maintain strict control over the quantity of curing agents introduced into product, it would no longer be permissible to submerge injected product in curing pickle (cover pickle), or to totally pickle cure product by submerging it in curing pickle. However, processors could use brine solutions provided the finished product is in compliance with other requirements. A prohibition on curing by submerging in pickle could affect some small processors of cured products who live in cold regions of the country. The temperature of their facilities is influenced considerably by external temperatures. Because product may freeze and not cure, it has been necessary to employ the use of pickle in the curing process to successfully cure product. This processing procedure would have to be changed.

This proposal, for purposes of defining permissible levels of residual nitrite, makes a distinction between shelf stable canned cured product and commercially sterile canned cured product. The shelf stable product depends upon a mixture of nitrite, salt, and heat pasteurization to prevent the germination of *Clostridium botulinum* spores. Commercially sterile product receives heat treatments sufficient to destroy *Clostridium botulinum* spores.

Based on the data and information available to the Department at this time, it is proposed to implement the Expert Panel's recommendations by limiting the use of sodium and potassium nitrite and nitrates as follows:

A limit would be established of 2183 part per million (ppm) of sodium nitrate or 2597 ppm of potassium nitrate (3.5 oz. sodium nitrate or 4.2 oz. of potassium nitrate per 100 lbs. of meat) to be added

V 40 218 NOV 11 75 XUM

in dry cured products; and 1716 ppm of sodium nitrate or 2042 ppm of potassium nitrate (2.75 oz. sodium nitrate or 3.3 oz. potassium nitrate per 100 lbs. of meat) to be added in fermented sausages;

A limit would be established of 624 ppm of sodium nitrite or 768 ppm of potassium nitrite (1 oz. sodium nitrite or 1.23 oz. potassium nitrite per 100 lbs. of meat) to be added in dry cured products and 156 ppm of sodium nitrite of 192 ppm of potassium nitrite (0.25 oz. of sodium nitrite or 0.31 potassium nitrite in 100 lbs. of meat) to be added in fermented sausages;

Whether nitrate, nitrite, or a combination of both are used in dry cured and fermented sausage products, the residual nitrite calculated as sodium nitrite would be limited to 200 ppm; and

In canned cured product, whether perishable, shelf stable, or sterile; in cooked sausages; and other cured perishable products (other than bacon), a limit would be established of 156 ppm of sodium nitrite or 192 ppm of potassium nitrite introduced by pumping of solid pices of meat or otherwise incorporated into comminuted products. Canned cured sterile products would be limited to a residual nitrite of 50 ppm calculated as sodium nitrite; all other canned cured products, and products prepared with curing solutions, to 125 ppm; and cooked sausage products to 100 ppm.

In addition to the above which are in connection with the Expert Panel's recommendations, the following also are being proposed by the Department:

Use of sodium or potassium nitrites and nitrates would not be permitted in meats used in the commercial preparation of infant (strained) or junior (chopped) foods;

The maximum amount of nitrite permitted to be added to bacon would be limited to 125 ppm and a requirement would be established that ascorbate or erythorbate be used at the maximum rate currently permitted by regulation:

Salt would be permitted as a preservative when added to products in an amount sufficient so that the finished product has a minimum brine concentration of 10 percent or a water activity (A_w) no greater than 0.92;

The foregoing requirements with respect to nitrates, nitrites, and salt would also apply to poultry and poultry products which are prepared in a manner similar to those prescribed for red meats.

As stated previously, it is recognized that a special problem exists with bacon. In this regard, the Department has been assured by the meat industry that it is accelerating studies underway concerning processing procedures which are directed toward preventing nitrosamine formation in fried bacon. At the same time, the hazard of botulism will have to remain an important consideration throughout. The Department will continue to cooperate with the industry and FDA in developing this needed information. This work should be substantially completed within 1 year's time from the date of publication of this document (on or before November 11, 1976). Both during and at the end of this period progress on achieving a nitrosamine-free product will be evaluated and a determination as to need for further action will be made. The Department recognizes that 1 year may not be adequate to resolve this matter entirely, but believes that sufficient information can be developed to better define what further steps might be necessary.

Any person wishing to submit written data, views, or arguments concerning the proposed amendment may do so by filing them in duplicate with the Hearing Clerk, U.S. Department of Agriculture, Washington, D.C. 20250, by January 12, 1976.

Any person desiring opportunity for oral presentation of views should address such request to the Product Standards Staff, Scientific and Technical Services, Meat and Poultry Inspection Program, Animal and Plant Health Inspection Service, U.S. Department of Agriculture, Washington, D.C. 20250, so that arrangements may be made for such views to be presented prior to the date specified in the preceding paragraph. A record will be made of all views orally presented.

All written submissions and records of oral views made pursuant to this notice will be made available for public inspection in the Office of the Hearing Clerk during regular hours of business, unless the person makes the submission to the Staff identified in the preceding paragraph and requests that it be held confidential. A determination will be made whether a proper showing in support of the request has been made on grounds that its disclosure could adversely affect such person by disclosing information in the nature of trade secrets or commercial or financial information obtained from any person and privileged or confidential. If it is determined that a proper showing has been made in support of the request, the material will be held confidential; otherwise, notice will be given of denial of such request and an opportunity afforded for withdrawal of the submission. Requests for confidential treatment will be held confidential (7 CFR 1.27(c)).

Comments on the proposal should bear a reference to the date and page number of this issue of the FEDERAL REGISTER.

Done at Washington, D.C., on: October 30, 1975.

F. J. MULHERN,
Administrator, Animal and Plant Health Inspection Service.

[FR Doc.75-30331 Filed 11-10-75;8:45 am]

DEPARTMENT OF HEALTH, EDUCATION, AND WELFARE

Food and Drug Administration

[21 CFR Part 102]

[Docket No. 75P-0250]

FRUIT FLAVORED SWEETENED SPREADS

Proposed Common or Usual Name

The Food and Drug Administration is proposing a common or usual name for fruit flavored sweetened spreads not conforming to the definitions and standards of identity established for fruit jams and jellies because of the absence of fruit or the use of less fruit than is required by a standard. The common or usual name proposed is "sweetened spread," accompanied by a declaration of the characterizing flavor. A statement of the percentage of fruit content would also be required. Interested persons have until January 12, 1976, to submit comments.

The Commissioner of Food and Drugs has received a petition on behalf of the National Preservers Association (NPA), Atlanta, GA, as well as a subsequent clarifying letter, proposing that a new regulation be issued under the provisions of 21 CFR Part 102 establishing a common or usual name for such fruit flavored spreads not conforming to the standards of identity for fruit jams and jellies. The petitioner's proposed regulation is as follows:

§ 102. ____ *Fruit flavored spreads.*

The common or usual name for a fruit flavored spread not conforming to the standards of identity for jams and jellies shall be:

(a) When the spread contains no fruit, '_____ Spread: Contains No Fruit.'—the blank being filled in with the name of the flavor of the spread in accordance with section 1.12 of this chapter.

(b) When the spread contains fruit, '_____ Spread: Contains _____ percent ('%') less fruit than _____.'—The initial blank shall be filled in with the name of the flavor of the spread in accordance with section 1.12 of this chapter; the second blank shall be filled in with the appropriate numerical percent, in 5 percent increments, that is not less than the percentage determined in accordance with the formula in paragraph (c) of this section; and the last blank shall be filled in with the word 'jam' or 'jelly' as applicable.

(c) For purposes of this section, the percent reducton in fruit content shall be determined by the formula:

PR=[.50−(FI−Y)]×200 where—

(1) PR=percent reduction in fruit content;

(2) FI=fruit input in part by weight;

(3) Y=finished batch yield in parts by weight;

(4) 0.50 is deemd the percent fruit content of standardized jams and jellies on a finished basis at 65% soluble solids, expressed as a decimal."

As grounds in support of the proposal, NPA set forth the following:

Both NPA and FDA recognize that nonstandard fruit flavored spreads are marketed, although standards do exist for jams, jellies and preserves. FDA has, however, with the adoption of 21 CFR 1.8(e) changed its regulatory position on the conditions under which non-standard products can be marketed. Recently, by letters to Orleans, Ltd., FDA has confirmed that non-standard spreads may be sold if properly labeled as "spread" with a declaration of fruit content, but that imitation labeling is not required.

NPA does not urge that these spreads be barred from the marketplace., We believe, however, that it is crucial, in order to protect the existing standards for preserves, jams and jellies, that non-conforming products be clearly labeled to indicate their nonconformity. The promulgation of a common or usual name regulation governing these products will assure their differentiation from the standardized products which they purport to resemble.

Although 21 CFR 102.1(b) envisages a declaration of the total percentage content of the characterizing ingredient, conformity with the procedure would, in this instance, be uninformative rather than beneficial to the consumer. A total percentage declaration can only convey the needed information if the optimal percentage involved is 100 percent; in such a case, the declaration of, for example, 61 percent of the characterizing ingredients tells the consumer that the product contains 39 percent less than optimal. In the case of jams and jellies, of course, the input fruit content percentage is fixed at 45 or 47 parts by weight of fruit per 55 parts by weight of sweetner solids. The consumer, however, is unlikely to know this. Thus, to tell the customer, for example, that a spread product contains 39 percent fruit does not convey the information desired and needed. Of key importance to the consumer is knowledge of how much less of an ingredient than optimal the product contains.

Section 102.1(b) foresees that a different approach may well be needed under certain circumstances and, therefore, provides for modification by a specific regulation in Subpart B. NPA believes that the proposal which we make here will convey the maximum information to the consumer and will also afford needed protection to the existing standards for jams and jellies. Any other approach would denigrate the existing standards, and indeed suggest the lack of need for any standard or benchmark of excellence.

The Commissioner has also received correspondence from two manufacturers (members of NPA) who did not agree with the suggestion in the petition that such spreads be labeled, "_____ Spread: Contains _____% less fruit than _____." These manufacturers stated that this requirement "would have a negative effect on the shelf-appeal of the product . . . when such a product could contain more whole fruit and more fresh flavor than the standardized product." Both of the manufacturers contended that the statement "_____% fruit," based on the actual weight of input fruit, would be a more meaningful qualifying statement.

The petition from NPA, the subsequent clarifying letter, and the correspondence from the two manufacturers are available for inspection in the office of the Hearing Clerk, Food and Drug Administration, Rm. 4-65, 5600 Fishers Lane, Rockville, MD 20852.

The Commissioner does not agree that the name proposed by the petitioner describes the nonstandardized product adequately to differentiate it from the standardized product. The Commissioner proposes that the common or usual name for the nonstandardized product be "sweetened spread" followed by a qualifying statement concerning the amount of fruit present or the absence thereof. In addition, the product would be required to be labeled in accordance with the provisions in 21 CFR 1.12(i), which concerns the labeling of products for which direct or indirect representations are made about flavor. In applying the provisions of § 1.12(i)(1)(i), the proposed regulation provides that the nonstandardized spread will be considered as having an amount of characterizing ingredient insufficient independently to characterize the food. This determination is appropriate to distinguish the nonstandardized food from the standardized food because the nonstandardized spread has less characterizing fruit ingredient than is currently expected to be present in a standardized jam or jelly. The effect of this determination is to require the word "flavored" to be part of the flavor declaration, e.g., "grape flavored sweetened spread," when additional flavor is added to the product.

Furthermore, inclusion of the term "sweetened" in the proposed common or usual name is appropriate because the reduction of the fruit ingredient necessarily results in the sweetener ingredient becoming a characterizing component of the food. Since the fruit ingredient constitutes about 50 percent of the product in the standardized food, reduction of the fruit ingredient results in the sweetener becoming predominant compared to the fruit, which would otherwise be the characterizing ingredient.

The Commissioner does not agree with the petition than the method prescribed in § 102.1(b) for declaration of the percentage of a characterizing ingredient would be inappropriate for this product. The Commissioner is of the opinion that the percentage declaration of a characterizing ingredient should be the same for all nonstandardized foods made to resembled standardized foods; the use of different methods of declaration in similar situations would lead to consumer confusion. For several reasons, the preferable method is that prescribed in § 102.1(b), rather than the method recommended by the petition.

First, a consumer who wishes to compare fruit flavored swetened products containing varying amounts of fruit would receive little guidance from a declaration such as "contains 20 percent less fruit than jam" in determining which product was the better value. The value of a product labeled "contains 20 percent less fruit than jam" cannot be easily compared to a product that is labeled "contains 10 percent less fruit than jam" because the amount of fruit actually present cannot be ascertained. Although the approach suggested by the petitioner does adequately distinguish the nonstandardized product from the standardized food, its lack of usefulness in comparing one nonstandardized product with another, an equally important factor, makes the approach unacceptable. When the ingredient proportions required by standards no longer apply, information about the content of the product must be easily understandable.

Second, the comparative statement requested by the petition erroneously implies that the standardized product enjoys a higher legal status than a nonstandardized spread because a similar comparative statement would not be required to appear on the standardized food.

Third, a statement comparing a nonstandardized product to a standardized food would often be inaccurate because standards ordinarily establish minimum required proportions of characterizing ingredients and marketed products often exceed the established minimum. A manufacturer of a standardized product containing more characterizing ingredient than is required by the standard of identity may wish voluntarily to declare the percentage of characterizing ingredient present in his product; in which case, the percentage of fruit actually present in the nonstandardized product should be stated to permit accurate comparison.

The manufacturer of a standardized food who believes that consumers are not adequately informed about the fruit content of his product compared to nonstandardized products may declare the fruit content. A proposal to establish a uniform method for such declarations was published in the FEDERAL REGISTER of June 14, 1974 (39 FR 20885).

The Commissioner therefore proposes that the method established in § 102.1(b) of the regulations be used without modification for the declaration of the percentage of fruit ingredient in the final product.

The Commissioner is also of the opinion that the qualifying statement, "_____% fruit," as suggested by the two manufacturers discussed above, would be misleading if the percentage were based solely on the actual weight of input fruit, ignoring any processing necessary to achieve the finished product, e.g., concentration or dilution. In such cases, the actual weight of input fruit would have to be adjusted for the percentage declaration accurately to reflect the percentage of fruit in the finished product.

The Commissioner proposes that the percentage of fruit in the final product be determined by using the following formula which is based on the weight of the fruit ingredient used (weight of input fruit or weight of fruit based on the juice used) divided by the weight of the finished batch (yield weight). Thus, the formula proposed is as follows:

$$\frac{\text{Weight of fruit ingredient (or equivalent)} \times \text{Percent soluble solids in the finished product}}{\text{Total weight of soluble solids before concentration or dilution} \times 100\text{—Percentage of fruit ingredient in finished product}}$$

Products that meet the requirements of the standards of identity for jams and jellies, 45 parts fruit plus 55 parts sweetener ingredient, will contain about 50 percent fruit when the percentage of fruit in the finished product is calculated by the proposed formula, based on the soluble solids content of the fruit and finished product.

The Commissioner advises that this proposed formula is useful only for determining the percentage of fruit in the finished product and cannot be applied to both fruit and nonfruit ingredients.

V 40 I 218 NOV 11 75 XUM

Since the calculation of the percentage of fruit is based on the ratio of the weight of input fruit (based on a constant soluble solids content for the fruit) to yield weight (based on the adjustment of the total soluble solids of the mix to a specific soluble solids content in the final product), the application of the formula to the calculation of the percentage of each ingredient in the finished product would result in an apparent total of more than 100 percent when the mix is concentrated and less than 100 percent when the mix is diluted to achieve the final product.

The Commissioner also proposes that the percentage declaration of the fruit content should be stated in 10-percent increments, i.e., "less than 10 percent", "10 percent", "20 percent", etc., expressed as a multiple of 10 not greater than the percentage of fruit in the product.

Utilization of 10-percent increments based on an average soluble solids content of the fruit ingredient allows for natural variations in the actual soluble solids content of the fruit ingredients and for analytical limitations. The Commissioner is of the opinion that manufacturers, using reasonable controls and operating in accordance with good manufacturing practices, will be able to label their products accurately using the 10-percent increments.

The Commissioner is aware that the percentage declaration for those products for which a common or usual name is prescribed presents a problem of enforcement, in that analytical means alone may not be sufficient to determine the accuracy of such a percentage declaration. However, such analytical problems have existed for years, and experience suggests that through the use of a combination of establishment inspections and product analyses, it will be possible to enforce this regulation in the same manner as are the requirements for a particular fruit content of standardized jams and jellies.

A food that substitutes for and resembles another food is required to be labeled as an imitation of that food, in accordance with section 403(e) of the act (21 U.S.C. 343(e)) and § 1.8(e) of the regulations (21 CFR 1.8(e)), unless it is nutritionally equivalent to the food for which it substitutes and which it resembles. However, in accordance with § 1.8 (e)(4) a nonstandardized fruit flavored sweetened spread would not be nutritionally inferior to a standardized jam, jelly, or preserve because the standardized foods do not contain measurable amounts of any essential nutrient, i.e., at least 2 percent of the U.S. Recommended Daily Allowance. Therefore, no requirements are established in this proposed regulation to define nutritional equivalence to standardized jams, jellies, or preserves.

The Commissioner proposes to make the regulation effective for products shipped in interstate commerce after December 31, 1977.

The Commissioner has carefully considered the environmental effects of the proposed regulation and, because the proposed action will not significantly affect the quality of the human environment, has concluded that an environmental impact statement is not required. The Commissioner has also carefully considered the inflation impact of the proposed regulation and no major inflation impact has been found, as defined in Executive Order 11821, OMB circular A–107, and interim guidelines issued April 1, 1975 by the Department of Health, Education, and Welfare. Copies of the FDA environmental and inflation impact assessments are on file with the Hearing Clerk, Food and Drug Administration.

Therefore, under the Federal Food, Drug, and Cosmetic Act (secs. 201(n), 403, 701(a), 52 Stat. 1041 as amended, 1047–1048 as amended, 1055 (21 U.S.C. 321(n), 343, 371(a))) and under authority delegated to him (21 CFR 2.120), the Commissioner proposes that Part 102 be amended in Subpart B by adding a new section to read as follows:

§ 102.24 Fruit flavored sweetened spreads.

(a) The common or usual name of a fruit flavored sweetened spreadable food that fails to conform to a definition and standard of identity established in Part 29 of this chapter and that contains no fruit or less fruit than is required by the standard of identity shall be "sweetened spread."

(b) The characterizing flavor of the food shall be declared in accordance with § 1.12(i) of this chapter. For purposes of § 1.12(i)(1)(i) of this chapter, such a food is considered to have an amount of characterizing ingredient insufficient to characterize the food independently. If a generic term is used pursuant to § 1.12 (i)(3)(iii) of this chapter in lieu of naming each flavor, the term used shall be "mixed fruit."

(c) The common or usual name of a food described in paragraph (a) of this section that contains fruit shall include a statement of the percentage of the fruit ingredient(s) in the manner set forth in § 102.1(b). The percentage of each fruit ingredient, which shall be identified by its common or usual name, shall be declared in 10-percent increments, expressed as a multiple of 10 not greater than the actual percentage of the fruit ingredient in the product, except that the percentage of a fruit ingredient constituting less than 10 percent of the product shall be declared in the statement as "less than 10" percent.

(1) Products containing more than one fruit ingredient and declaring the characterizing flavor as "mixed fruit" pursuant to paragraph (b) of this section shall declare the percentage of the total fruit content.

(2) Products containing more than one fruit ingredient and declaring each characterizing flavor separately shall declare the percentage of the total fruit content, which shall be followed in parentheses by a statement of the percentage of each fruit ingredient, identified by its common or usual name.

(d) The common or usual name of a food described in paragraph (a) of this section that contains no fruit shall include the statement required by § 102.1 (c)(1) if the color of the food creates the impression that fruit is present or if the labeling of the food represents, suggests, or implies that fruit may be present, e.g., the product label bears the name or a variation of the name or any pictorial representation of any fruit. The blank in the statement required by § 102.1(c)(1) shall be filed in with the common or usual name of the appropriate fruit, or with the word "fruit" where the presence of more than one fruit is represented, suggested, or implied.

(e) For purposes of paragraph (c) of this section, the percentage of the fruit ingredient in the finished product is calculated by multiplying the weight of the fruit ingredient or equivalent used (if fruit juice is used, the equivalent weight of the fruit ingredient is determined by the method prescribed in paragraph (e)(3) of this section) by the percentage of soluble solids in the finished product (as determined by the method prescribed in paragraph (e)(1) of this section), dividing the product by the total weight of soluble solids before concentration or dilution (as determined by the method prescribed in paragraph (e)(2) of this section) and multiplying the quotient by 100, as follows:

$$\frac{\text{Weight of fruit ingredient (or equivalent)} \times \text{Percent soluble solids in the finished product}}{\text{Total weight of soluble solids before concentration or dilution}} \times 100 = \text{Percentage of fruit ingredient in finished product.}$$

(1) The soluble solids content of the finished product shall be determined by the method prescribed in the "Official Methods of Analysis of the Association of the Official Analytical Chemist" 12th Ed., 1975, section 22.019, "Insoluble Matter Absent."

(2) The total weight of the soluble solids in the product before concentration or dilution shall be the sum of the weight of the soluble solids contributed by the saccharine ingredient, the weight of the soluble solid contributed by the fruit ingredient, and the weight of soluble solids contributed by any other ingredients. The weight of soluble solids contributed by the fruit ingredient shall be the soluble solids content of the specified fruit calculated as the reciprocal of the factor given for that fruit in § 29.2 (c) of this chapter. For example, the average solids content of strawberries is 0.08, or 8 percent (the reciprocal of 12.5 as given in § 29.2(c) of this chapter); thus, 5 pounds of strawberries are equivalent to 0.40 pound of soluble solids.

(3) The equivalent weight of fruit ingredient when such ingredient is a fruit juice, whether concentrated, unconcentrated, or diluted, shall be determined by the following method: Determine the percentage of soluble solids in the fruit juice ingredient by the method for soluble solids referred to in paragraph (e)(2) of this section; multiply the percentage of soluble solids so found by the weight of the fruit juice ingredient; from the product, subtract the weight of any added sugar or other added solids; and multiply the remainder by the factor for such fruit ingredient as given in § 29.2 (c) of this chapter. The result is the weight of fruit ingredient equivalent to the amount of fruit juice used. For example: [(percent soluble solids in fruit juice × weight of fruit juice used) − (weight of nonfruit soluble solids)] × [factor from § 29.2(c) of this chapter] = equivalent weight of the fruit ingredient.

Interested persons may, on or before January 12, 1976, submit to the Hearing Clerk, Food and Drug Administration, Rm. 4–65, 5600 Fishers Lane, Rockville, MD 20852, written comments (preferably in quintuplicate and identified with the Hearing Clerk docket number found in brackets in the heading of this document) regarding this proposal. Received comments may be seen in the above office during working hours, Monday through Friday.

It is hereby certified that the economic and inflationary effects of this proposal have been carefully evaluated in accordance with Executive Order No. 11821.

Dated: November 5, 1975.

SAM D. FINE,
Associate Commissioner for Compliance.

[FR Doc.75–30269 Filed 11–10–75;8:45 am]

[21 CFR Parts 600, 610, 640]

[Docket No. 75N–0312]

BIOLOGICAL PRODUCTS

Additional Standards for Single Donor Plasma (Human) Products

The Commissioner of Food and Drugs is proposing to amend Part 640—Additional Standards For Human Blood and Blood Products (21 CFR Part 640) by adding a new Subpart D, which prescribes standards for single donor plasma products. Interested persons have until January 12, 1975, to submit comments.

Pursuant to section 351 of the Public Health Service Act, each manufacturer of single donor plasma products used for the prevention, treatment, and cure of diseases or injuries of man must be licensed before marketing the products in interstate commerce. Licenses for establishments manufacturing the plasma may be issued only upon a showing that the particular establishment will produce plasma that is safe, pure, potent and effective. Currently, licensing for the production and distribution of single donor plasma products is guided primarily by uncodified standards originally developed in 1954, and published by the Department of Health, Education, and Welfare as "Minimum Requirements: Single Donor Plasma (Human)."

The Bureau of Biologics, Food and Drug Administration, has been reviewing licenses for plasma products for the purpose of revising older standards of production and testing. The proposed additional standards, set forth below, include many of the provisions of the uncodified standards together with changes and additions that reflect more recent experience and scientific knowledge in the field.

Single Donor Plasma (Human) is the fluid portion of one unit of human blood intended for intravenous use which, in a closed system, has been collected, stabilized against clotting and separated from the cells. The manner in which Single Donor Plasma (Human) is processed determines the uses and names by which it is known. Single Donor Plasma (Human) may be used for the treatment of hypovolemia. When plasma is fresh frozen to preserve coagulation factors V, VIII (antihemophilic factor) and IX, it is known as Single Donor Plasma (Human) Fresh Frozen and may be used for treatment of specific clotting factor deficiencies. Plasma that is platelet rich is known as Single Donor Plasma (Human) Platelet Rich and is used in the treatment of thrombocytopenia, a condition in which the number of platelets may be inadequate to prevent bleeding. In addition, plasma that is processed to remove the antihemophilic factor, the platelets, or both is known as Single Donor Plasma (Human) AHF Removed, Single Donor Plasma (Human) Platelets Removed, and Single Donor Plasma (Human) Platelets and AHF Removed, respectively, which also may be used in the treatment of hypovolemia. Proposed § 640.34 prescribes nomenclature and requirements for these single donor plasma products.

Presently, Single Donor Plasma (Human) may be collected in an open system in which the blood and plasma containers are entered during processing, provided that a continuing check on sterile technique is conducted to reduce the risk of contamination. However, due to technological advances and increased availability of equipment, most blood-banking establishments have voluntarily converted to a closed system in which the blood and plasma containers are not entered during processing except for performance of the phlebotomy. The closed system all but eliminates the possibility of environmental contamination, thereby negating the need for a continuing check on sterile technique, and yields a product less likely to be contaminated than that collected and prepared in an open system.

To promote the manufacture of a consistently safe and effective product, proposed § 640.30, concerning the proper name and definition of the product, requires that blood collection, stabilization against clotting, and separation of plasma be conducted in a closed system.

Occasionally, Single Donor Plasma (Human) may be collected in excess of thereapeutic needs or may become outdated as a result of the need for blood banks to maintain sufficient inventory to cover emergency needs. Such outdated plasma must be disposed of, or it may be used for the manufacture of blood derivatives and reagents. Accordingly, proposed § 640.36 prescribes labeling requirements for such plasma known as Recovered Plasma (Human) from single donor plasma, i.e., plasma diverted for further manufacture into blood derivaties and reagents. The proposed standards for Single Donor Plasma (Human) do not otherwise apply to Recovered Plasma (Human) for which standards will be proposed at another time.

The Commissioner also proposes to amend § 600.15 *Temperatures during shipment* (21 CFR 600.15) and § 610.53 *Dating periods for specific products* (21 CFR 610.53) to prescribe shipping temperatures and dating periods for single donor plasma products, including Recovered Plasma (Human) from single donor plasma. The Commissioner has concluded that single donor plasma products will retain their safety, purity, potency and effectiveness for the entire length of their respective dating periods when the products are maintained at the temperatures proposed in §§ 600.15 and 610.53.

The Commissioner has carefully considered the environmental effects of the proposed regulation and, because the proposed action would not significantly affect the quality of the human environment, has concluded that an environmental impact statement is not required. The Commissioner has also carefully considered the inflation impact of the proposed regulation and no major inflation impact has been found, as defined in Executive Order 11821, OMB Circular A–107, and interim guidelines issued April 1, 1975, by the Department of Health, Education, and Welfare. Copies of the FDA environmental and inflation impact assessments and other pertinent background data on which the Commissioner relies in proposing this regulation are on file with the Hearing Clerk, Food and Drug Administration.

Therefore, under the Public Health Service Act (sec. 351, 58 Stat. 702, as amended (42 U.S.C. 262)) and under authority delegated to him (21 CFR 2.120), the Commissioner proposes that Chapter I of Title 21 of the Code of Federal Regulations be amended as follows:

PART 600—BIOLOGICAL PRODUCTS: GENERAL

1. In § 600.15(a) by deleting the item "Single Donor Plasma (Human), Frozen" and adding alphabetically seven new items to read as follows:

§ 600.15 Temperatures during shipment.

* * * * * *

(a) *Products.*

Product	*Temperature*
* * *	* * *
Single Donor Plasma (Human).	−18° C or colder.
Single Donor Plasma (Human) AHF Removed.	Do.
Single Donor Plasma (Human) Fresh Frozen.	Do.

V 40 N 218 NOV 11 75 XUM

Product	*Temperature*
Single Donor Plasma (Human) Platelets Removed.	Do.
Single Donor Plasma (Human) Platelets and AHF Removed.	Do.
Single Donor Plasma (Human) Platelet Rich.	1° to 10° C or 20° to 24° C.
Recovered Plasma (Human) from single donor plasma.	—5° or colder.

• • • • • • • • • • •

Single donor plasma (human)	5 years (—18° C or colder). § 610.51 does not apply.
Single donor plasma (human) AHF removed.	Do.
Single donor plasma (human) fresh frozen.	1 year (—18° C or colder). § 610.51 does not apply.
Single donor plasma (human) platelets removed.	5 years (—18° C or colder). § 610.51 does not apply.
Single donor plasma (human) platelets and AHF removed.	Do.
Single donor plasma (human) platelet rich.	72 hours (20° to 24° C or within a 2° range between 1° and 6° C). § 610.51 does not apply.
Recovered plasma (human) from single donor plasma.	In lieu of an expiration date, the collection date shall appear on the label. The product shall be stored at —18° C.

PART 640—ADDITIONAL STANDARDS FOR HUMAN BLOOD AND BLOOD PRODUCTS

3. In Part 640 by adding a new Subpart D, consisting of seven new sections, to read as follows:

Subpart D—Single Donor Plasma (Human)

Sec.
640.30 Single Donor Plasma (Human).
640.31 Suitability of donors.
640.32 Collection of source material.
640.33 Testing the blood.
640.34 Processing.
640.35 Labeling.
640.36 Plasma diverted for further manufacture.

Subpart D—Single Donor Plasma (Human)

§ 640.30 Single Donor Plasma (Human).

(a) *Proper name and definition.* The proper name of this product shall be Single Donor Plasma (Human). The product is defined as the fluid portion of one unit of human blood intended for intravenous use, which, in a closed system, has been collected, stabilized against clotting, and separated from the cells.

(b) *Source.* (1) Single Donor Plasma (Human) shall be obtained by plasmapheresis or by separating plasma from blood collected from whole blood donors.

(2) Single Donor Plasma (Human) may be obtained from a unit of Whole Blood (Human) collected by another licensed establishment.

§ 640.31 Suitability of donors.

(a) Whole blood donors shall meet the criteria for donor suitability prescribed in § 640.3.

(b) Plasmapheresis donors shall meet the criteria for donor suitability prescribed in § 640.63, excluding the phrase "other than malaria" in paragraph (c) (9) of that section. Informed consent shall be required as prescribed in § 640.61.

(c) Donors shall not be suitable if they are known to have been immunized by injection with human red blood cells or blood group substances.

§ 640.32 Collection of source material.

(a) Whole blood shall be collected as prescribed in § 640.4, except that paragraphs (d) (2) and (h) of that section shall not apply. Whole blood intended for Single Donor Plasma (Human), Single Donor Plasma (Human) Fresh Frozen, and Single Donor Plasma (Human) AHF Removed shall be maintained within a 2-degree range between 1° and 6° C until the plasma is removed. Whole blood intended for Single Donor Plasma (Human) Platelet Rich, Single Donor Plasma (Human) Platelets Removed and Single Donor Plasma (Human) Platelets and AHF Removed shall be maintained as prescribed in § 640.24 until the platelets are removed. The red blood cells shall be placed in storage at a 2-degree range between 1° and 6° C immediately after the platelets are separated.

(b) Plasma obtained by plasmapheresis shall be collected as prescribed in §§ 640.62, 640.64 (except that paragraph (c) (3) of that section shall not apply), and 640.65.

§ 640.33 Testing the blood.

(a) Blood from which plasma is separated shall be tested as prescribed in § 610.40 of this chapter and § 640.5(a), (b), (c), and (e).

(b) Pilot samples shall be collected as prescribed in § 640.69(d) and shall accompany the final product.

(c) Manufacturers of Single Donor Plasma (Human) collected by plasmapheresis shall have testing and recordkeeping responsibilities equivalent to those prescribed in § 640.69(f) and (g).

§ 640.34 Processing.

(a) *Single Donor Plasma (Human).* Single Donor Plasma (Human) shall be separated from the red blood cells within 26 days after phlebotomy, and shall be stored at —18° C or colder within 4 hours after transfer to the final container.

(b) *Single Donor Plasma (Human) Fresh Frozen.* Single Donor Plasma (Human) Fresh Frozen shall be prepared from blood collected by a single uninterrupted venipuncture with minimal damage to and minimal manipulation of the donor's tissue. The plasma shall be separated from the red blood cells, frozen within 6 hours after phlebotomy, and stored at —18° C or colder.

(c) *Single Donor Plasma (Human) Platelet Rich.* Single Donor Plasma (Human) Platelet Rich shall be prepared from blood collected by a single uninterrupted venipuncture with minimal damage to and minimal manipuation of the donor's tissue. The plasma shall be separated from the red blood cells by centrifugation within 4 hours after phlebotomy. The time and speed of centrifugation shall have been shown to produce a product with at least 250,000 platelets and no more than 20,000 red blood cells per cubic milliliter. The plasma shall be stored between 20° and 24° C, or within a 2-degree range between 1° and 6° C, immediately after filling the final container.

(d) *Single Donor Plasma (Human) Platelets Removed.* Single Donor Plasma (Human) Platelets Removed shall be the plasma product remaining after Platelet Concentrate (Human) has been removed as prescribed in Subpart C of this Part 640. Immediately after removal of the Platelet Concentrate (Human), the plasma shall be stored at —18° C or colder.

(e) *Single Donor Plasma (Human) AHF Removed.* Single Donor Plasma (Human) AHF Removed shall be the plasma product remaining after Cryoprecipitated Antihemophilic Factor (Human) has been removed as prescribed in Subpart F of this Part 640. Immediately after removal of the Cryoprecipitated Antihemophilic Factor (Human), the plasma shall be stored at —18° C or colder.

(f) *Single Donor Plasma (Human) Platelets and AHF Removed.* Single Donor Plasma (Human) Platelets and AHF Removed shall be the plasma product remaining after Platelet Concentrate (Human) and Cryoprecipitated Antihemophilic Factor (Human) have been removed as prescribed in Subparts C and F, respectively, of this Part 640. Immediately after removal of the Platelet Concentrate (Human) and the Cryoprecipitated Antihemophilic Factor (Human), the plasma shall be stored at —18° C or colder.

(g) *The final container.* (1) The final container shall be colorless and transparent to permit visual inspection of the contents; any closure shall maintain a hermetic seal and prevent contamination of the contents.

(2) The final container material shall not interact with the contents, under the customary conditions of storage and use, in such a manner as to have an adverse effect upon the safety, purity, potency and effectiveness of the product.

(3) Prior to filling, the final container shall be identified by number so as to relate it to the donor.

(h) *The final product.* (1) The final product shall be inspected immediately after separation of the plasma and shall not be issued for transfusion if there is (i) any abnormality in color or physical appearance, (ii) any indication of contamination, or (iii) more than 25 milligrams hemoglobin per 100 milliliters of plasma as determined by gross inspection.

(2) With the exception of Single Donor Plasma (Human) Platelet Rich, the final product shall be stored in a manner that will show evidence of thawing and shall not be issued if at the time of issue there is any evidence of thawing of the product or breakage of the container during storage.

(3) The final product shall not contain a preservative.

§ 640.35 Labeling.

In addition to the applicable labeling requirements of § 610.62 of this chapter and in lieu of the requirements of §§ 610.60 and 610.61 of this chapter, the container labels for Single Donor Plasma (Human) products shall bear the following information:

(a) The proper name of the product, using the nomenclature as set forth in § 640.34.

(b) The volume of source blood and plasma and the volume and type of anticoagulant present in the source blood from which the product was prepared.

(c) Blood group designations of the source blood.

(d) Donor number.

(e) Expiration date.

(f) Type of serologic test for syphilis used and the results.

(g) Type of test for hepatitis B surface antigen used and the results.

(h) Type of test for unexpected antibodies, if performed, and the results.

(i) Instructions to store the product as prescribed in § 610.53 of this chapter.

(j) A warning against further processing of frozen product if there is evidence of breakage or thawing.

(k) Instructions to thaw frozen product at a temperature between 30° and 37° C.

(l) Instructions to use the product within 2 hours after thawing.

(m) Instructions to use a filter in the administration equipment.

(n) Recommendation for administration to group compatible recipients.

(o) When applicable, a statement that the product should not be used in the treatment of coagulation defects requiring labile plasma factors.

(p) A statement to see the instruction circular for directions for use.

(q) The statement, "Caution: Federal Law prohibits dispensing without prescription."

(r) Name, address, and license number of the manufacturer.

(s) Where plasma has been prepared from whole blood processed by another licensed establishment, such fact, and the name, address, and license number of the establishment.

§ 640.36 Plasma diverted for further manufacture.

Single Donor plasma (Human) products conforming to the requirements of this subpart and outdated Single Donor Plasma (Human) products may be used for further manufacture into blood derivatives or reagents: *Provided*, That

(a) The final container has not been entered since the product was prepared.

(b) The product has been stored continuously at the temperature prescribed in § 610.53 of this chapter, except that within 72 hours from the time of phlebotomy, Single Donor Plasma (Human) Platelet Rich shall be stored at —18° C or colder.

(c) The original label is covered with a permanent paste-on label containing:

(1) The proper name of the product, Recovered Plasma (Human) from single donor plasma.

(2) The volume of the source blood and plasma and the volume and type of anticoagulant present in the source blood from which the product was prepared.

(3) Donor number.

(4) Collection date of source blood.

(5) Type of test for hepatitis B surface antigen used and the results.

(6) The statement, "Do not Administer—For Manufacturing Use Only," prominently displayed.

(7) When applicable, a statement indicating that Cryoprecipitated Antihemophilic Factor has been removed.

(8) Name, address, and license number of the manufacturer.

Interested persons may, on or before January 12, 1976, submit to the Hearing Clerk, Food and Drug Administration, Rm. 4–65, 5600 Fishers Lane, Rockville, MD 20852, written comments (preferably in quintuplicate and identified with the Hearing Clerk docket number found in brackets in the heading of this document) regarding this proposal. Received comments may be seen in the day through Friday.

It is hereby certified that the economic and inflationary effects of this proposal have been carefully evaluated in accordance with Executive Order No. 11821.

Dated: November 5, 1975.

SAM D. FINE,
Associate Commissioner for Compliance.

BIOLOGICAL PRODUCTS

Additional Standards for Reagent Red Blood Cells

The Commissioner of Food and Drugs is proposing to amend Parts 610 and 660 (21 CFR Parts 610 and 660), by amending § 610.53 *Dating periods for specified products* (21 CFR 610.53) and by adding a new Subpart D, which prescribes standards for Reagent Red Blood Cells, to Part 660. Interested persons have until January 12, 1976, to submit comments.

Reagent Red Blood Cells (Human) is a preparation of human red blood cells used to detect or identify human blood group antibodies. Section 351 of the Public Health Service Act (58 Stat. 702 (42 U.S.C. 262)) requires that each manufacturer of Reagent Red Blood Cells (Human) be licensed before marketing it in interstate commerce. Licenses for establishments manufacturing the reagents are issued only after the particular establishment has demonstrated that it is capable of manufacturing a product that is safe, pure, potent, and efficacious. Currently, licensing for the production and distribution of Reagent Red Blood Cells (Human) is guided by uncodified standards published in 1961 by the Department of Health, Education, and Welfare, as "Tentative Control Procedures: Reagent Red Blood Cells (Human)."

The Bureau of Biologics of the Food and Drug Administration has been reviewing many licensed products, including Reagent Red Blood Cells (Human), to revise and update older standards of production and testing for publication as formal codified additional standards in the Code of Federal Regulations. The proposed additional standards below for red blood cells prepared as diagnostic reagents include many of the provisions of the published uncodified standards; they also contain changes and additions that reflect more recent scientific experience and developments.

Before a transfusion is given, precautions must be taken to ensure that the blood of the donor and that of the recipient are compatible, i.e., there are no antibodies in the plasma of the recipient that are reactive with the equivalent antigens on the donor's red blood cells. The effect of an incompatible transfusion upon the recipient varies, but a severe or even fatal reaction may result. Transfusion of an ABO incompatible unit of blood is particularly dangerous to the recipient, since the antibodies in the recipient's plasma are usually capable of causing the rapid destruction of transfused red blood cells containing the corresponding antigens. A person having Rh negative blood, on the other hand, may be sensitized, i.e., stimulated to produce antibodies, by an initial transfusion with Rh positive blood; or in the case of a pregnant Rh negative woman, by bearing an Rh positive fetus, but she would suffer no apparent ill effects at the time of transfusion or during the first pregnancy. However, any subsequent transfusion with Rh positive blood could cause a severe or even fatal reaction. Serious reactions due to incompatibility of other blood group systems are less common.

For these reasons, the blood of a donor and recipient must be tested to ensure the proper selection of compatible blood for transfusion. The tests include ABO

V 40 218 NOV 11 75 XUM

and Rh grouping tests and screening tests for unexpected antibodies. Unexpected antibodies may occur in persons who, through pregnancy or previous transfusion, have been exposed to immunogens that their own red blood cells do not possess, or such antibodies may appear in individuals whose antibody-producing process has been affected so that antibodies are produced that react with the body's own tissue.

Reagent Red Blood Cells (Human) is a preparation of red blood cells prepared from human peripheral blood or human umbilical cord blood, which has been obtained from one or more donors known either to possess or lack certain blood group antigens. The product is used as an in vitro diagnostic reagent to detect and identify antibodies in human serum or plasma as determined by the agglutination or hemolysis resulting when unknown serum antibodies react with the corresponding known antigens on the red blood cells contained in the reagent. The reagent product may be prepared and packaged in the form of a cell panel, which is a group of vials of red blood cell suspensions, each vial containing distinctive cell types. The cell panel is used to identify one or more presently known antibodies, depending upon the diversity of the different cell types represented in the cell panel.

Licensed Reagent Red Blood Cells (Human) is usually marketed in small containers with labels containing information prescribed under Chapter I of Title 21 of the Code of Federal Regulations, in addition to the information prescribed in proposed § 660.35 *Labeling* (21 CFR 660.35). Therefore, to provide additional space on the container label for the information required, the Commissioner proposes to delete reference to the source "(Human)" from the proper name of the product. The Commissioner concludes that such change of the proper name will not affect the safe use of the product, since it is consistent with a clear understanding of the identity of the reagent that the source of the reagent is human red blood cells.

The labeling of Reagent Red Blood Cells must accurately identify the presence or absence of antigens for which identity tests have been performed, so that laboratory personnel are able to determine the presence and identity of unknown antibodies in the serum being tested. In the past, manufacturers of the reagents have been permitted to identify on the labeling certain antigens based on inferential evidence, such as concluding on the basis of experience that "e" antigen is present when a related antigen, "E" antigen, is absent. This practice has, for the most part, been voluntarily abandoned by the industry and replaced with more definitive serological testing, since conclusions from inferential evidence have been shown to be unreliable. Accordingly, the proposed standards require in § 660.33 *Testing of source material* (21 CFR 660.33) that a test for all antigens specified in the labeling be conducted by the manufacturer to confirm identification of all blood group antigens.

Different lots of reagents intended for determining the presence and identification of antibodies of the same blood group systems may contain different combinations of cell types. To facilitate identification of antibodies during a testing procedure, it is necessary that the cell types in each lot of product be identified by an antigenic constitution matrix corresponding to the cell types in the reagent. Accordingly, in addition to a package insert, which relates to the product in general, § 660.35 *Labeling* (21 CFR 660.35) also requires in paragraph (f) that manufacturers include an antigenic constitution matrix, which is intended to identify the specific lot of product and the blood group antigens specified present or absent.

The determining factor for detecting and identifying the presence of antibodies in blood serum by the use of Reagent Red Blood Cells is the agglutination or hemolysis, which results when the unknown antibodies in the serum react with the corresponding known antigens on the red blood cells of the reagent. This reaction becomes less distinct as the product becomes older and loses potency. As a matter of good blood-banking practice, quality control tests should be periodically conducted to asses the ability of the reagent cells to distinctly react with weak antibodies. In light of the short dating period for Reagent Red Blood Cells, the Commissioner has determined that it would be impractical to require the submission of a representative sample of each lot of Reagent Red Blood Cells to the Director of the Bureau of Biologics for approval before marketing each lot. Instead, proposed § 660.36(a) *Samples and protocols* (21 CFR 660.36 (a)) requires that samples and protocols be submitted to the Bureau after each annual inspection, as required by § 600.21 (21 CFR 600.21). Such samples will be tested by the Bureau to confirm the accuracy of testing by the manufacturer, as well as to confirm the continued ability of the product to consistently and effectively perform in accordance with its label claims. Additionally, proposed § 660.36(b) requires that a copy of the antigenic constitution matrix be submitted for each lot of product to the Director, Bureau of Biologics, to inform him of the composition and availability of the subject products on the market at any given time.

It is also proposed that § 610.53 be amended to (1) change the item "Reagent Red Blood Cells (Human)" to "Reagent Red Blood Cells," to be consistent with the proper name in the proposed additional standards, and (2) to extend the prescribed dating period of 21 days to 35 days, since licenses have been issued for such products in response to data, which has been confirmed by the Bureau of Biologics, reflecting that the reagents maintain their safety, purity, potency, and efficacy when stored at 2° to 8° C for 35 days.

The Commissioner has carefully considered the environmental effects of the proposed regulation and, because the proposed action would not significantly affect the quality of the human environment, has concluded that an environmental impact statement is not required. The Commissioner has also carefully considered the inflation impact of the proposed regulation and no major inflation impact has been found, as defined in Executive Order 11821, OMB circular A–107, and interim guidelines issued April 1, 1975 by the Department of Health, Education, and Welfare. Copies of the FDA environmental and inflation impact assessments and other pertinent background data on which the Commissioner relies in proposing this regulation are on file with the Hearing Clerk, Food and Drug Administration.

Therefore, under the Public Health Service Act (sec. 351, 58 Stat. 702, as amended (42 U.S.C. 262)) and under authority delegated to him (21 CFR 2.120), the Commissioner proposes to amend Subchapter F of Chapter I of Title 21 of the Code of Federal Regulation in Parts 610 and 660 as follows:

1. Part 610 is amended in § 610.53 by revising the listing "Reagent Red Blood Cells (Human)" to read as follows:

§ 610.53 Dating periods for specified products.

* * * * *

Reagent Red Blood Cells, 35 days. § 610.51 does not apply.

* * * * *

2. Part 660 is amended as follows:

a. By adding to the table of contents the following entries:

Subpart D—Reagent Red Blood Cells

Sec.
660.30 Reagent Red Blood Cells.
660.31 Suitability of the donor.
660.32 Collection of the source material.
660.33 Testing of source material.
660.34 Processing.
660.35 Labeling.
660.36 Samples and protocols.

b. By adding a new Subpart D to read as follows:

Subpart D—Reagent Red Blood Cells

§ 660.30 Reagent Red Blood Cells.

(a) *Proper name and definition.* The proper name of the product shall be Reagent Red Blood Cells, which shall consist of a preparation of human red blood cells used to detect or identify human blood group antibodies.

(b) *Source.* Reagent Red Blood Cells shall be prepared from human umbilical cord blood or human peripheral blood meeting the criteria of §§ 660.31 and 660.32.

§ 660.31 Suitability of the donor.

Reagent Red Blood Cell donors shall meet the criteria for donor suitability prescribed under § 640.3 of this chapter, except that paragraphs (b) (5) and (6), (d), and (e) of § 640.3 shall not apply.

§ 660.32 Collection of source material.

Blood for Reagent Red Blood Cells shall be collected as prescribed under § 640.4 of this chapter, except that paragraphs (d), (g), and (h) of § 640.4 shall not apply.

§ 660.33 Testing of source material.

A sample of each blood incorporated in the Reagent Red Blood Cell product shall be individually tested to confirm identification of all blood group antigens specified as present or absent in the labeling.

§ 660.34 Processing.

(a) *Processing method.* The processing method shall be one that has been shown consistently to yield a product that is capable of detecting antibodies corresponding to all blood group antigens specified as present in the labeling throughout the dating period.

(b) *Red blood cell concentration.* Each lot of final product shall have a red blood cell concentration of not less than 2 percent.

(c) *Products prepared from pooled red blood cells.* At least 50 percent of the red blood cells in a final product prepared from pooled red blood cells shall be positive for the antigens claimed on the labeling.

(d) *Absence of antibodies.* Each lot of final product shall be free of demonstrable antibodies.

(e) *Final containers.* The final containers used for each lot of product shall be sterile, colorless, and transparent. Color coding of the product, labels, and container caps or droppers supplied with the product shall not be used.

(f) *Date of manufacture.* The date of manufacture of the product shall be the date that the blood with withdrawn from the donor. If the product consists of red blood cells from two or more donors, the date of manufacture of the final product shall be the date of withdrawal of blood from the donor of the oldest constituent blood. When a product consists of more than one vial, e.g., cell panel, the date of manufacture of each vial of the product shall be the earliest date that blood was withdrawn from the donor for any vial in the product.

(g) *Retention samples.* Retention samples shall be maintained as required by § 600.13 of this chapter, except that samples may be retained only throughout the dating period of the product.

§ 660.35 Labeling.

In addition to the items required by § 328.10 of this chapter and other applicable labeling provisions of this chapter, the following information shall be included in the labeling:

(a) The container and package labels shall indicate the percentages of red blood cells in the suspension either as a discrete figure or as a range, the extremes of which differ by no more than 2 percent.

(b) The words "pooled cells" shall appear on the container and package labels of products prepared from pooled cells. The number of donors contributing to the pool shall be specified in the package insert.

(c) The package label shall state the blood group antigens specified present or absent, or refer to such information in an accompanying antigenic constitution matrix.

(d) The package label and package insert shall bear the cautionary statement, "The reactivity of the product may decrease during the dating period."

(e) The package insert shall provide adequate instructions for use.

(f) An antigenic constitution matrix for each lot of product shall specify all blood group antigens present or absent in each vial of the package.

(g) When a package contains more than one vial, e.g., a cell panel, the package label and the label of each vial contained in the package shall be assigned the same identifying lot number, and shall also bear a number or symbol to distinguish one vial from another. Such number or symbol shall also appear on the antigenic constitution matrix.

§ 660.36 Samples and protocols.

(a) The following shall be submitted to the Director, Bureau of Biologics, Food and Drug Administration, 800 Rockville Pike, Bethesda, MD 20014, within 30 days after each annual inspection by the Bureau of Biologics personnel.

(1) A sample of each size vial of each product manufactured and packaged as for distribution. The sample shall have at least 14 days remaining on the dating period when shipped.

(2) A protocol consisting of the date of manufacture of the samples and the results of all tests performed before distribution of the lot from which the samples were taken.

(b) A copy of the antigenic constitution matrix specifying the antigens present or absent shall be submitted to the Director, Bureau of Biologics, at the time of initial distribution of each lot of panel cells. Products designed exclusively to identify anti-A, anti-A$_1$ and anti-B, as well as products composed entrely of umbilical cord cells, are excluded from this requirement.

Interested persons may, on or before January 12, 1976, submit to the Hearing Clerk, Food and Drug Administration, Rm. 4–65, 5600 Fishers Lane, Rockville, MD 20852, written comments (preferably in quintuplicate and identified with the Hearing Clerk docket number found in brackets in the heading of this document) regarding this proposal. Received comments may be seen in the above office during working hours, Monday through Friday.

It is hereby certified that the economic and inflationary effects of this proposal have been carefully evaluated in accordance with Executive Order No. 11821.

Dated: November 5, 1975.

SAM D. FINE,
Associate Commissioner for Compliance.

[21 CFR Part 660]

[Docket No. 75N—0313]

BIOLOGICAL PRODUCTS

Additional Standards for Blood Grouping Serum

The Commissioner of Food and Drugs is proposing to amend the biologics regulations to provide additional standards governing the manufacture of Blood Grouping Serum. The proposed effective date of the amendment is 30 days after publication of the final regulations in the FEDERAL REGISTER, except that the proposed effective date for the labeling requirements is 10 months after publication of the final regulations. Interested persons have until January 12, 1976, to comment.

The Commissioner proposed regulations, published in the FEDERAL REGISTER of November 13, 1973 (38 FR 31312), governing the manufacture of Blood Grouping Serum. Blood Grouping Serum, which consists of a sterile preparation of serum containing one or more blood grouping antibodies, is used to detect ABO, Rh-Hr, and other red blood cell antigens in blood. Interested persons were given 60 days to file written comments on the proposal.

Fifteen letters of comment were received from manufacturers and other interested persons, were carefully evaluated, and most were accepted in part or in their entirety, resulting in substantive revision of the 1973 proposed regulations. In addition, the revised regulations include requirements reflecting advances in technology and knowledge, which were not included in the 1973 proposal. Since the revised regulations are substantively different from the proposed regulations, the Commissioner has determined that the regulations should be published again as a proposal so that the final regulation will reflect the best current knowledge of all persons in the field. Accordingly, there would be little value in discussing in this preamble the comments on the 1973 proposal in great detail. The Commissioner will discuss only very briefly those substantive comments addressed to the 1973 proposal, and the new requirements concerning advances in technology and knowledge will also be highlighted.

Shortly after publication of the proposed regulations under Part 273 (21 CFR Part 273), the biologics regulations were recodified under Subchapter F, Parts 600 to 680 (21 CFR Parts 600 to 680) and the proposed regulations below reflect the recodification.

1. The Commissioner has prescribed new potency titer values in proposed § 660.25(a)(5) (21 CFR 660.25(a)(5) formerly proposed as § 273.5032(d)) concerning products for which Reference Blood Grouping Sera are not available. The new values are derived from an analysis of potency titer values of sera submitted by manufacturers to the Bureau of Biologics after publication of the 1973 proposal. These potency titer values reflect the existing capability of manufacturers to produce each specific

V 40 N 218 NOV 11 75 XUM

antiserum at a potency equal to or exceeding the proposed required potencies.

2. The 1973 proposal simplified the labeling of all blood grouping sera final containers by (i) eliminating the requirement that the proper name of the product appear on the final container label, and (ii) providing that the source of the antiserum need not appear on the final container label, unless the source is other than human. Simplification reduces the amount of printing required on the final container label so that the antibody designations can be printed in large type, thereby reducing the chance that a technologist may select the wrong container of antiserum because of difficulty in reading the small print.

Many comments lauded the Commissioner's proposal to reduce the amount of printing on the final container label. However, three comments suggested that labels be further simplified by requiring that only the Fisher-Race nomenclature for Rh antisera appear on the label, rather than both the Wiener and Fisher-Race nomenclatures, as presently required. Another six comments suggested that the antibody designations of various antisera, such as "Anti-Fy^a Serum (Anti-Duffy)," be simplified by either removing the redundant "anti" notation from the parenthetical expression or by removing the parenthetical expression entirely.

The Commissioner agrees that simplification of the antibody designation of Blood Grouping Serum will reduce the amount of printing required on the final container label without confusing the user in distinguishing one product from another. Since the Fisher-Race nomenclature for Rh antisera generally requires less space than the Wiener nomenclature, the Commissioner is of the opinion that only the Fisher-Race nomenclature for Rh antisera should be used on final container labels of Blood Grouping Sera. The Commissioner also agrees that the redundant parenthetical phrase of a blood grouping designation should be entirely deleted on such final container labels. Accordingly, proposed § 660.28 *Labeling* (21 CFR 660.28) prescribes in paragraph (d) simplified antibody designations for final container labels of Blood Grouping Sera.

3. Four comments objected to prohibiting color coding of labels since it has been safely used for over 20 years for anti-C, anti-E, anti-CD, anti-DE, and anti-c̄ sera.

The Commissioner agrees that color coding of labels for the products suggested by the comments should be permitted. The primary purpose of the proposal to prohibit color coding of labels was to discourage the identification of a product solely by the color of its label rather than by the information on the label. However, except for blood grouping sera used in automated equipment, all blood grouping sera are packaged in volumes of 10 milliliters or less—small containers providing little space for all the necessary labeling. As indicated in item 2 of this preamble, the Commissioner proposed that certain information be removed from the container label so that the antibody designations may be printed in large type. The Commissioner is of the opinion that the type for antibody designations on blood grouping sera containers as proposed under § 660.28(a)(3) eliminates the likelihood that the product will be identified solely by the container label color. Moreover, color coding of Blood Grouping Sera container labels will serve as a practical aid to the technologist to identify expeditiously the container contents. Accordingly, proposed § 660.28(a)(1) permits color coding of certain Blood Grouping Sera final container labels.

4. The Commissioner is proposing a new provision under § 660.24(a)(2) and (c) (21 CFR 660.24(a)(2) and (c) formerly proposed as §.273.5032(a)(2) and (c)) to require the use of AB serum or bovine albumin in the prepaartion of ABO antisera and anti-D intended for potency testing by the saline tube test. The AB serum or bovine albumin is needed to retard adherence of red blood cells to the test tube during performance of the potency test, especially at higher serum dilutions.

5. In the performance of the test for nonspecific qualities, prescribed in § 660.26(b) (21 CFR 660.26(b) formerly proposed as § 273.5033(b)) the undiluted Blood Grouping Serum and the cell suspension are usually added to the test tubes with a Pasteur pipette. Since it is not critical to use exactly 0.25 milliliter, proposed § 660.26(b)(1)(i) and (ii) identify the required volumes as drops rather than as the precisely measured volume of 0.25 milliliter. Additionally, in § 660.26(b)(1)(ii), the percent concentration of cell suspension in saline is changed from 2 percent to the percentage recommended in the product package insert. The change is made to approximate testing conditions with actual conditions of use.

6. The avidity test in proposed § 660.27(a) and (b) (21 CFR 660.27(a) and (b) formerly proposed as § 273.5034(a) and (b)) has been revised to require the use of a 40-percent suspension of red blood cells for ABO and Rh test procedures, respectively. The concentration is changed from 10 percent for ABO and 50 percent for Rh-Hr prescribed in the 1973 proposal, to approximate testing conditions with actual conditions of use.

7. Since the concentration of red blood cells has been increased from 10 percent to 40 percent for the ABO test procedure, the test may be conducted in 2 minutes, rather than in 3 minutes as proposed under § 273.5034(a)(4). Accordingly, § 660.27(a)(4) requires that at the end of 2 minutes the size of the clumps shall be recorded. To simplify the measurement of the size of the clumps, § 660.27(c)(2) requires the clump size to be no less than 1 millimeter in diameter, rather than 1 square millimeter as required in § 273.5034(c)(2).

8. The Commissioner has added a new paragraph (b)(2) to § 660.26 to require that all antisera recommended for use by the antiglobulin technique be negative for the presence of anti-Bg^a, Bg^b and Bg^c antibodies. The provision is added because serum intended for antiserum production obtained from an individual sensitized by blood transfusion may contain some leukocyte antibodies, anti-HL-A7, anti-W17 or anti-W28 which are interreactive wih red blood cell antigens Bg^a, Bg^b and Bg^c, respectively. Consequently, antiserum containing anti-HL-A7, anti-W17 or anti-W28 antibodies may yield a false positive result if the blood being tested contains the Bg^a, Bg^b and Bg^c antigens.

The Commissioner has carefully considered the environmental effects of the proposed regulation and, because the proposed action would not significantly affect the quality of the human environment, has concluded that an environmental impact statement is not required. The Commissioner has also carefully considered the inflation impact of the proposed regulation and no major inflation impact has been found, as defined in Executive Order 11821, OMB circular A-107, and interim guidelines issued April 1, 1975 by the Department of Health, Education, and Welfare. Copies of the FDA environmental and inflation impact assessments and other pertinent background data on which the Commissioner relies in proposing this regulation are on file with the Hearing Clerk, Food and Drug Administration.

Therefore, pursuant to the provisions of the Public Health Service Act (sec. 351, 58 Stat. 702 as amended (42 U.S.C. 262)) and under authority delegated to him (21 CFR 2.120), the Commissioner proposes to amend Part 660 as follows:

1. By amending the table of contents by adding the following:

Subpart C—Blood Grouping Serum

Sec.
660.20 Blood Grouping Serum.
660.21 Processing.
660.22 Reference preparations.
660.23 Red blood cell preparations.
660.24 Potency test with reference preparations.
660.25 Potency test without reference preparations.
660.26 Specificity test.
660.27 Avidity test.
660.28 Labeling.
660.29 Samples; protocols; official release.

2. By adding a new Subpart C as follows:

Subpart C—Blood Grouping Serum

§ 660.20 Blood Grouping Serum.

(a) *Proper name and definition.* The proper name of this product shall be Blood Grouping Serum which shall consist of a sterile preparation of serum containing one or more blood grouping antibodies as set forth in § 660.28(d).

(b) *Source.* The source of this product shall be blood, plasma or serum.

§ 660.21 Processing.

(a) *Processing method.* (1) The processing method shall be one that has been shown to consistently yield a specific, potent, final product, free of properties

that would affect the product for its intended use throughout the dating period.

(2) Only that material which has been fully processed, sterile-filtered into a single vessel and thoroughly mixed in that vessel shall constitute a lot.

(3) A lot may be subdivided into clean, sterile vessels. Each subdivision shall constitute a sublot. If lots are to be subdivided, the manufacturer shall include this information in the license application. The manufacturer shall describe the test specifications to verify that each sublot is identical to other sublots of the lot and that each sublot is sterile as specified in § 610.12 of this chapter.

(4) Each lot of Blood Grouping Serum shall be identified by a lot number. Each sublot shall be identified by that lot number to which a distinctive prefix or suffix shall be added. Final container and package labels shall bear the lot number and all distinctive prefixes and suffixes that have been applied to identify the sublot from which filling was accomplished.

(b) *Color coding of antisera.* Blood Grouping Sera shall not be colored, except that anti-A may be colored blue, and anti-B may be colored yellow.

(c) *Color coding of dropper bulbs.* Dropper bulbs may be color coded to match the color of the label of each antiserum. If the dropper bulb is not color coded, it shall be black.

(d) *Final containers and dropper assemblies.* Final containers and dropper assemblies shall be sterile. For antisera for manual use, final containers and dropper pipettes shall be colorless and transparent. For antisera for automated use, final containers shall be colorless and transparent or translucent.

(e) *Volume of final product.* A final container of Blood Grouping Serum for manual use shall not contain more than 10 milliliters of the product. A final container of product for use in automated equipment shall not contain more than:

(1) 150 milliliters of product for those sera that are to be used undiluted, or

(2) 10 milliliters of product for those sera that are to be diluted for use.

(f) *Date of manufacture.* The date of manufacture shall be the date of initiation by the manufacturer of the last valid potency test reported on a protocol and submitted to the Director, Bureau of Biologics, Food and Drug Administration.

§ 660.22 Reference preparations.

The following reference Blood Grouping Sera shall be obtained from the Bureau of Biologics, Food and Drug Administration, 8800 Rockville Pike, Bethesda, MD 20014, and shall be used as described in the accompanying package insert for determining the potency of Blood Grouping Sera.

Anti-A
Anti-B
Anti-D for rapid tube test
Anti-CD for saline tube test for Anti-D only
Anti-C for rapid tube test
Anti-E for rapid tube test
Anti-c̄ for rapid tube test

§ 660.23 Red blood cell preparations.

Fresh or frozen red blood cells may be used for preparing cell suspensions for the testing of all Blood Grouping Sera under the following conditions:

(a) Fresh red blood cells shall be used within 7 days of withdrawal from the donor.

(b) Frozen red blood cells not exceeding 3 years old may be used in the preparation of cell suspensions for testing antisera for which Reference Blood Grouping Sera are available. The period of time in which frozen red blood cells may be used in the preparation of cell suspensions for testing of antisera for which no reference Blood Grouping Sera are available shall be determined on the basis of stability data submitted to the Director, Bureau of Biologics, Food and Drug Administration, demonstrating retention of antigenic reactivity and red blood cell integrity for those antigens to be used in control testing. The method of freezing, storing and thawing red blood cells, including a description of the cryoprotective medium, shall be described in detail. Frozen red blood cells shall be used on the day of thawing.

(c) Each time frozen blood cells are thawed for use in testing antisera with Anti-Human Globulin Serum, the thawed cells shall first be tested by the direct antiglobulin technique. Only those cells found negative by thhe direct antiglobulin technique shall be used in testing antisera with Anti-Human Globulin Serum.

§ 660.24 Potency test with reference preparations.

Products for which Reference Blood Grouping Sera are available shall be tested as follows:

(a) *Test procedures for ABO Blood Grouping Serum.*—(1) *Cell suspension.* (i) A 2-percent suspension of red blood cells in isotonic saline shall be prepared on the day of use. The red blood cells used shall have been washed with isotonic saline at least twice and shall result in a clear supernate.

(ii) As a minimum, the following cells shall be used:

Blood grouping serum	*Cells*
Anti-A	A_1, A_1B (A_1B cells from 3 different donors shall be used).
Anti-A, B	A_1, A_2, B.
Anti-B	B.

(2) *Serum dilutions.* (i) Beginning with undiluted serum, separate two-fold dilutions (1:2, 1:4, etc.) of the test serum and the reference serum shall be prepared using isotonic saline containing 1 to 2 percent AB serum or bovine albumin.

(ii) A separate clean pipette shall be used for each dilution to avoid carryover of higher serum concentrations.

(iii) For anti-A, B serum, unpooled Reference Blood Grouping Sera anti-A and anti-B shall be used.

(3) *The test.* Using cells listed in paragraph (a)(1)(ii) of this section, Reference Blood Grouping Sera anti-A and anti-B shall be tested in parallel with the test serum.

(i) Place 0.1 milliliter of each serum dilution in a separate clean test tube approximately 10x75 millimeters. Add 0.1 milliliter of the appropriate 2 percent cell suspension to each test tube.

(ii) Mix contents of each test tube thoroughly and centrifuge immediately for 1 minute at approximately 150 relative centrifugal force (rcf) or 20 seconds at approximately 1,000 rcf.

(4) *Interpretation of the test.* (i) The cell buttons of each test tube shall be gently dislodged and observed macroscopically. The reactions shall be graded as follows:

4+ Cell button remains in one clump.
3+ Cell button dislodges into several clumps.
2+ Cell button dislodges into many small clumps of equal size.
1+ Cell button dislodges into finely granular, but definite, small clumps.

(ii) Any doubtful reaction shall be recorded as negative. The potency titer value is the reciprocal of the greatest serum dilution for which the reaction is graded as 1+. The dilution caused by the addition of the cells shall not be considered as contributing to the dilution of the antiserum.

(b) *Test procedures for anti-D, anti-CD, anti-DE, anti-CDE, anti-C, anti-E and anti-c̄ for slide test or rapid tube test.*—(1) *Cell suspensions.* (i) A 2 percent suspension of red blood cells in 11 to 15 percent bovine albumin shall be prepared on the day of use. The red blood cells used shall have been washed with isotonic saline at least twice and shall result in a clear supernate.

(ii) As a minimum, the following cells shall be used:

Blood grouping serum	*Cells (A, B, AB, or O)*
Anti-D	ccDee.
Anti-C	Ccdee and CcDEE or CCDEE or CCdEE.
Anti-E	ccddEe.
Anti-c̄	CcDEe.
Anti-CD	ccDee, Ccddee.
Anti-DE	ccDee, ccddEe.
Anti-CDE	ccddEe, ccDee, Ccddee.

(2) *Serum dilutions.* (i) beginning with undiluted serum, separate two-fold dilutions (1:2, 1:4, etc.) of the test serum and the reference serum shall be prepared using 20 to 22 percent bovine albumin.

(ii) A separate clean pipette shall be used for each dilution to avoid carryover of higher serum concentrations.

(iii) for test sera containing multiple antibodies, e.g., anti-CDE, the corresponding unpooled Reference Blood Grouping Sera shall be used.

(3) *The test.* Using cells listed in paragraph (b)(1)(ii) of this section, Reference Blood Grouping Sera shall be tested in parallel with the test sera.

(i) Place 0.1 milliliter of each serum dilution in a separate clean test tube approximately 10 x 75 millimeters. Add 0.1 milliliter of the appropriate 2 percent cell suspension to each test tube.

V 40 N 218 NOV 11 75 XUM

(ii) Mix contents of each test tube thoroughly and incubate test tubes at 37° C for 1 hour.

(iii) Centrifuge test tubes for 2 minutes at approximately 150 relative centrifugal force (rcf) or for 45 seconds at approximately 1,000 rcf.

(4) *Interpretation of the test.* The interpretation of the test shall be the same as described in paragraph (a) (4) of this section.

(c) *Test procedure for anti-D for saline tube test.* The test procedure shall be the same as that described in paragraph (b) (1) through (4) of this section except that the 2 percent suspensions of red blood cells and the two-fold serum dilutions shall be made in isotonic saline containing 1 to 2 percent AB serum or bovine albumin.

(d) *Potency requirements.* Products for which Blood Grouping Sera are available shall have a potency titer value at least equal to that of the reference sera.

§ 660.25 Potency test without reference preparations.

Products for which Reference Blood Grouping Sera are not available shall be tested as follows:

(a) *Products recommended for tube tests*—(1) *Cell suspensions.* (i) A 2 percent suspension of red blood cells in isotonic saline or in AB serum shall be prepared on the day of use. The red blood cells used shall have been washed with isotonic saline at least twice and shall result in a clear supernate.

(ii) As a minimum, two group O red blood cells that are heterozygous for the antigen corresponding to the test antibody shall be used. If heterozygous phenotypes are not available, other cells may be used as described in the manufacturer's license application.

(2) *Serum dilutions.* (i) Beginning with undiluted serum, separate two-fold dilutions (1:2, 1:4, etc.) of the test serum and the reference serum shall be prepared using isotonic saline or AB serum.

(ii) A separate clean pipette shall be used for each dilution to avoid carryover of higher serum concentrations.

(3) *The test.* (i) Place 0.1 milliliter of each serum dilution in a separate clean test tube approximately 10x75 millimeters. Add 0.1 milliliter of the appropriate cell suspension to each test tube.

(ii) Mix contents of each test tube thoroughly and incubate test tubes at the temperature and for the length of time recommended in the manufacturer's package insert for the product.

(iii) Perform antiglobulin test, if required in the manufacturer's package insert for the product.

(iv) Centrifuge test tubes according to the instructions in the manufacturer's package insert.

(4) *Interpretation of the test.* The interpretation of the test shall be the same as described in § 660.24(a)(4).

(5) *Potency requirements.* Blood Grouping Sera recommended for the test tube methods, including the indirect antiglobulin test, shall have the following potency titer value when tested by all methods recommended in the manufacturer's package insert using red blood cells which are heterozygous for the corresponding antigen.

(i) For anti-K, anti-$\bar{k}$, anti-Jk^a, anti-Fy^a, anti-$\bar{c}$ (rapid tube and slide and saline) and anti-C^w, at least a 1+ reaction with a 1:8 dilution of the antiserum.

(ii) For anti-S, anti-$\bar{s}$, anti-P_1, anti-M, anti-Kp^a, anti-Kp^b, anti-I, anti-C (saline), anti-E (saline), anti-$\bar{e}$ (saline), anti-U, anti-Js^a, anti-A, and anti-Fy^b, at least a 1+ reaction with a 1:4 dilution of the antiserum.

(iii) For anti-N, anti-Le^a, anti-Le^b, anti-Di^a, anti-M^g, anti-Jk^b and anti-Xg^a, at least a 2+ reaction with undiluted serum.

(b) *Products recommended for slide tests.* Blood Grouping Serums recommended for slide test methods shall produce clumps of agglutinated cells at least 1 millimeter in diameter when both undiluted serum and a 1:2 dilution of serum are tested by all methods recommended in the manufacturer's package insert using red blood cells heterozygous for the corresponding antigen. The dilution shall be made with an equal volume of group compatible serum or AB serum.

(c) *Products recommended for use in automated system.* Blood Grouping Serum recommended for use in an automated system shall be sufficiently potent that a two-fold dilution will produce the same qualitative test result as the undiluted product tested in accordance with the manufacturer's package insert. This shall be demonstrated by preparing the two-fold dilution of the antiserum with an appropriate diluent and testing it against red blood cells which are heterozygous (except for A or B or D) for the corresponding antigen by the method described in the manufacturer's package insert.

§ 660.26 Specificity test.

The product shall be specific for the antibody or antibodies indicated on the label and shall be free of nonspecific qualities.

(a) *Test procedures.* Specificity shall be demonstrated by testing the product according to all test methods described in the manufacturer's package insert. Cells selected for the test shall include both positive and negative cells for the corresponding antigen.

(1) As a minimum, the following cells shall be used when testing the specificity of Blood Grouping Sera:

Blood grouping serum	*Cells*
Anti-A	A_1, A_2B, B, O.
Anti-B	A_1, B, O.
Anti-A,B	A_1, A_2, B, O.
Anti-A_1	A_1, A_2, A_2B, A_2B, O.
Anti-D	ccDee, Ccddee, ccddEe, A_1 ccddee, B ccddee, O ccddee.
Anti-C	ccDee, Ccddee, ccddEe, A_1 ccddee, B ccddee, O ccddee.
Anti-E	ccDee, Ccddee, ccddEe, A_1 ccddee, B ccddee, O ccddee.
Anti-CD	ccDee, Ccddee, ccddEe, A_1 ccddee, B ccddee, O ccddee.
Anti-DE	ccDee, Ccddee, ccddEe, A_1 ccddee, B ccddee, O ccddee.
Anti-CDE	ccDee, Ccddee, ccddEe, A_1 ccddee, B ccddee, O ccddee.
Anti-$\bar{c}$	Ccddee, A_1, CCDee, B CCDee, O CCDee.
Anti-$\bar{e}$	ccddEe, A_1 ccDEE, B ccDEE, O ccDEE.

(2) For all other Blood Grouping Sera, cells of any ABO group which are heterozygous for the corresponding antigen, and group A_1, B, and O cells which are negative for the corresponding antigen shall be used. A,B cells may be substituted for A or B cells when either or both are unavailable.

(b) *Additional tests for nonspecific qualities.* (1) Group O cells which are negative for the antigen corresponding to the antibody in the serum under test shall be used for testing all Blood Grouping Sera in the following test procedure:

(i) Place two drops of undiluted Blood Grouping Serum into each of three clean test tubes approximately 10x75 millimeters.

(ii) To each tube add one drop of at least once-washed cell suspension in saline in the percentage recommended for use with the antiserum in the package insert.

(iii) Incubate the tubes as follows:

Tube No. 1—37° C for 1 hour.
Tube No. 2—20° o 25° C for 1 hour.
Tube No. 3—2° to 8° C for 1 hour.

(iv) Centrifuge tubes at 150 relative centrifugal force (rcf) for 2 minutes or 1,000 rcf for 45 seconds and examine each tube for agglutination, rouleaux and hemolysis.

(v) The product is satisfactory when there is no agglutination, hemolysis or rouleaux in any of the tubes.

(2) All antisera recommended for use by the antiglobulin technique shall be tested and found negative for the presence of anti-Bg^a, anti-Bg^b and anti-Bg^c using strongly reactive Bg(a+), Bg(b+), and Bg(c+) red blood cells. If strongly reactive Bg(a+), Bg(b+) or Bg(c+) cells lacking the antigen corresponding to the antibody in the serum under test are not available, the antibody may be removed from the serum under test by absorption prior to testing for anti-Bg^a, anti-Bg^b and anti-Bg^c.

§ 660.27 Avidity test.

Blood Grouping Sera recommended use by a slide method shall be tested for avidity by the appropriate test established in this section. Such sera shall be sufficiently avid that beginning agglutination occurs within 60 seconds. Agglutinated cells shall remain visible for the period of time required in this section for each serum, and at that time the aggregates shall be no less than 1 millimeter in diameter.

(a) *Test procedure for ABO Blood Grouping Serum.* (1) A 40 percent suspension of red blood cells in either AB serum or group compatible serum or plasma shall be used.

(2) One drop of undiluted test serum shall be mixed with one drop of the 40 percent cell suspension over an oval area of approximately 20x40 millimeters on an unheated glass side.

(3) The time required for agglutination to begin shall be recorded.

(4) At the end of 2 minutes the size of the clumps shall be recorded.

(5) As a minimum, the following cells shall be used:

Blood grouping serum	*Cells*
Anti-A	A_1, A_2B.
Anti-B	B.
Anti-A,B	A_1, A_2 B.

(b) *Test procedure for anti-D, anti-CD, anti-DE, anti-CDE, anti-C, anti-E, anti-$\bar{c}$ and anti-$\bar{e}$.* (1) A 40 percent suspension of red blood cells in either AB serum or group compatible serum or plasma shall be used.

(2) One drop of undiluted test serum shall be mixed with 2 drops of the 40 percent cell suspension over an oval area of approximately 20 millimeters × 40 millimeters on a glass slide continuously heated at 40° C to 50° C.

(3) The time required for agglutination to begin shall be recorded.

(4) At the end of 2 minutes, the size of the clumps shall be recorded.

(5) As a minimum, the following cells shall be used:

Blood grouping serum	*Cells (A, B, AB or O)*
Anti-D	ccDee.
Anti-C	Ccddee.
Anti-E	ccddEe.
Anti-$\bar{c}$	Ccddee.
Anti-$\bar{e}$	ccddEe.
Anti-CDE	ccDee, Ccddee, ccddEe.
Anti-CD	ccDee, Ccddee.
Anti-DE	ccDee, ccddEe.

(c) *Test procedure for other Blood Grouping Sera.* All Blood Grouping Sera recommended for the slide test, except those listed in paragraphs (a) and (b) of this section, shall be tested for avidity following instructions in the manufacturer's package insert for performing the slide test with the following provisions:

(1) Cells of any ABO group which are heterozygous for the corresponding antigen shall be used.

(2) At the end of the maximum observation period recommended in the manufacturer's package insert, the clump size shall be no less than 1 millimeter in diameter.

§ 660.28 Labeling.

In addition to the applicable labeling requirements of §§ 610.62 and 328.10 of this chapter, and in lieu of the requirements in §§ 610.60 and 610.61 of this chapter, the following requirements shall be met:

(a) *Final container label*—(1) *Color coding.* The paper of the final container label of all Blood Grouping Sera shall be completely white, except that the paper of the final container label of the following antisera may be color coded with a visual match of the specific color samples identified below and in the Standard Ink Book, for sale by the Superintendent of Documents, U.S. Government Printing Office, Washington, DC 20402. Printing on all final container labels shall be in solid black.

Blood grouping serum	*Color of label paper*
Anti-A	Blue, GP 251–B—70.
Anti-B	Yellow, GP 201–Y—100.
Slide and rapid tube test tera sera only:	
Anti-C	Pink, GP 218–R—70.
Anti-D	Grey, GP 296–GR—70.
Anti-E	Brown, GP 283–BR—70.
Anti-CDE	Orange, GP 204–Y—100.
Anti-$\bar{c}$	Green, GP 270–G—70.
Anti-$\bar{e}$	Lavender, GP 234–P—40.

(2) *Required information.* The proper name "Blood Grouping Serum" need not appear on the final container label if the final container is packaged in such a manner that all of the information required in paragraph (b) of this section is included on a package label or is otherwise visible. The final container label shall bear the following information:

(i) Name of the antibody or antibodies present as set forth in paragraph (d) of this section.

(ii) Name and license number of the manufacturer.

(iii) Lot number, including sublot designations.

(iv) Expiration date.

(v) Source of product if other than human.

(vi) Test method(s) recommended.

(vii) Recommended storage temperature.

(viii) Volume of product if a liquid, or equivalent volume for a dried product if it is to be reconstituted.

(ix) If a dried product, the statement "Reconstitution date ————. Expires 1 year after reconstitution date."

(3) *Lettering size.* The type size for the antibody designation on the labels of a final container with a capacity of less than 5 milliliters shall be not less than 12 point. The type size for the antibody designations on the label of a container with a capacity of 5 milliliters or more shall be not less than 18 point.

(4) *Visual inspection.* When the label has been affixed to the final container, a sufficient area of the container shall remain uncovered for its full length or no less than 5 millimeters of the lower circumference to permit inspection of the contents.

(b) *Package label.* The package label shall bear the following information:

(1) Proper name of the product.

(2) Name of the antibody or antibodies present as set forth in paragraph (d) of this section.

(3) Name, address (including ZIP code) and license number of the manufacturer.

(4) Lot number, including sublot designations.

(5) Expiration date.

(6) Preservative used and its concentration.

(7) Number of containers, if more than one.

(8) Volume or equivalent volume for dried products when reconstituted, and precautions for adequate mixing when reconstituting.

(9) Recommended storage temperature.

(10) Source of the product if other than human.

(11) Reference to enclosed package insert.

(12) If a dried product, a statement indicating the period within which the product may be used after reconstitution.

(13) The statement: "In Vitro Diagnostic Reagent. For professional use only."

(14) The statement "Meets FDA potency requirements."

(15) The statement "Source material from which this product was derived was found (nonreactive) (reactive) for HB_sAg when tested with licensed reagents. No known test method can offer assurance that products derived from human blood will not transmit hepatitis."

(16) A statement of an observable indication of an alteration of the product, e.g., turbidity, color change, precipitate.

(c) *Package insert.* Each final container of Blood Grouping Serum shall be accompanied by a package insert meeting the requirements of § 328.10 of this chapter.

(d) *Names of antibodies.*

Blood group designation for container label	*Optional synonym for package label and package insert*
Anti-A	None.

§ 660.29 Samples; protocols; official release.

(a) *Samples and protocols.* For each lot of product, the following material shall be submitted to the Director, Bureau of Biologics, Food and Drug Admin-

V 40 218 NOV 11 75 XUM

istration, Building 29A, 8800 Rockville Pike, Bethesda, MD 20014.

(1) *Liquid products.* (i) Randomly selected final container samples of the product which have been filled in one continuous operation and packaged and labeled as for distribution, or

(ii) If a lot of fully processed product is divided into sublots, randomly selected final container samples filled in one continuous operation and packaged and labeled for distribution shall be considered representative of the entire lot.

(iii) Not less than the following quantities shall be submitted:

Liquid products

Final container size (in milliliters)	Number of final containers to be submitted for serum recommended for—	
	Manual use	Automated use
1	5	.....
2	3	.....
5	2	.....
10	2	3
>10	.....	2

(2) *Dried products.* (i) Randomly selected final container samples of the dried product from each oven of each drying operation.

(ii) Not less than the following quantities shall be submitted:

Dried products

Final container size (in milliliters)	Number of final containers to be submitted for serum recommended for—	
	Manual use	Automated use
0.5	12	.....
1.0	6	.....
2.0	4	.....
5.0	3	.....
10.0	3	3
>10.0	.....	3

(iii) At least 200 milligrams of dried product shall be submitted for a test to determine moisture content. Samples for moisture testing may be either (*a*) final container material of the product, or (*b*) dummy samples of material with the same protein concentration as the product, filled in the same size vials, with the same volume as the product. Such samples shall be appropriately labeled before drying and placed in random locations throughout the drying equipment.

(3) *Protocol.* A protocol which shall consist of a summary of the history of manufacture of the lot. The history shall include: (i) Results of all tests which are required by these regulations; and (ii) a listing of each lot of reprocessed material incorporated into the lot including the lot number, date of manufacture, and the proportion of each reprocessed lot in the final product.

(b) *Official release.* A lot of Blood Grouping Serum shall not be issued by the manufacturer until notification of official release of the lot is received from the Director, Bureau of Biologics, Food and Drug Administration.

Interested persons may, on or before January 12, 1976, submit to the Hearing Clerk, Food and Drug Administration, Rm. 4–65, 5600 Fishers Lane, Rockville, MD 20852 written comments (preferably in quintuplicate and identified with the Hearing Clerk docket number found in brackets in the heading of this document) regarding this proposal. Received comments may be seen in the above office during working hours Monday through Friday.

It is hereby certified that the economic and inflationary effects of this proposal have been carefully evaluated in accordance with Executive Order No. 11821.

Dated: November 5, 1975.

SAM D. FINE,
Associate Commissioner for Compliance.

Office of Education

[45 CFR Part 121k]

REGIONAL EDUCATION PROGRAMS

Notice of Proposed Rulemaking

Pursuant to the authority contained in Section 625 of the Education of the Handicapped Act (20 U.S.C. 1421a), notice is hereby given that the Commissioner of Education, with the approval of the Secretary of Health, Education, and Welfare, proposes to amend Title 45 of the Code of Federal Regulations by adding a new Part 121k to read as set forth below.

The proposed regulation would set forth rules and criteria governing the award of grants and contracts to institutions of higher education, including junior and community colleges, vocational and technical institutions, and other appropriate nonprofit educational agencies for the development and operation of specially designed or modified programs of voactional, technical, postsecondary, or adult education for deaf or other handicapped persons.

The proposed regulation would apply to all grant and contract awards made with funds appropriated pursuant to Section 625.

(a) *Summary of proposed regulation.* 1. *Organization.* The proposed regulation is divided into two subparts: Subpart A contains general provisions and Subpart B contains provisions covering application requirements, criteria, priorities, and the types of activities which will be supported.

2. *Subpart A—General.* (i) The purpose of assistance under Part 121k as set forth in § 121k.3 is for the development and operation of specially designed or modified programs of vocational, technical, postsecondary, or adult education for deaf or other handicapped persons.

(ii) Section 121k.4 covers the parties eligible for assistance, which are institutions of higher education, including junior and community colleges, vocational and technical institutions, and other appropriate nonprofit educational agencies.

3. *Subpart B—Applications; activities.* (i) Section 121k.5 sets forth application requirements. All applications must, among other things, contain a plan for the provision of an integrated comprehensive range of services and resources which will assist in integrating handicapped persons into the school's regular educational program and in enabling them to compete academically with nonhandicapped students.

(ii) Section 625 of the Act (repeated in § 121k.17) provides that priority consideration for funds under this program must be given to:

(A) Programs serving multistate regions or large population centers;

(B) Programs adapting existing programs of vocational, technical, postsecondary or adult education to the special needs of handicapped persons; and

(C) Programs to serve areas where a need for these services is clearly demonstrated.

(iii) Section 121k.19 sets forth a list of activities, services, and resources which are illustrative of the types of activities which will be supported. These are all aimed at helping the handicapped student integrate successfully into a nonhandicapped school environment. Services such as auditory training, interpreters, notetakers, and readers, and preparatory and orientation services may be supported. Funds cannot be used for tuition payments.

(b) *Citation of legal authority.* As required by section 431(a) of the General Education Provisions Act, a citation of statutory or other legal authority for each section of the regulation has been placed in parentheses on the line following the text of the section.

On occasion, a citation appears at the end of a subdivision of the section. In that case, the citation applies to all that appears in that section between the citation and the immediately preceding citation. When the citation appears only at the end of the section, it applies to the entire section.

(c) *Other applicable regulations.* The proposed legislation does not contain provisions relating to general fiscal and administrative matters. Requirements of this nature with respect to assistance under this part are covered by the Office of Education General Provisions Regulations (45 CFR Part 100a), which include rules on direct and indirect costs. Federal procurement contracts are covered by 41 CFR chapters 1 and 3.

(d) *Notice to prospective applicants.* This first publication is not the final regulation. It is followed by a thirty-day period which allows interested members of the public to submit comments and recommendations. Each comment will be given careful consideration and will be responded to in substance in the preamble to the final regulation.

Following this review, the regulation will be published in final form, with any appropriate changes, in the FEDERAL REGISTER.

In the meantime, in addition to providing comments on the proposed regulation, prospective applicants may wish at this early stage to reflect upon the scope and nature of the projects they may later propose for awards in the light of the criteria set forth in this notice.

(e) *Submission of comments.* All interested parties are invited to submit written comments and recommendations concerning the proposed rule to Mr. Melvin R. Ladson, Jr., Program Development Branch, Room 2018, ROB–3, Bureau of Education for the Handicapped, USOE, 400 Maryland Ave., SW., Washington, D.C. 20202. Comments and recommendations will be available for public inspection at the above address on Mondays through Fridays between 8:30 a.m. and 4 p.m. All relevant material must be received not later than December 11, 1975.

Dated: September 24, 1975.

T. H. BELL,
U.S. Commissioner of Education.

Approved: October 30, 1975.

DAVID MATHEWS,
Secretary of Health, Education, and Welfare.

(Catalog of Federal Domestic Assistance No. 13.560, Regional Education Program for Deaf and other Handicapped Persons)

PART 121k—REGIONAL EDUCATION PROGRAMS

Subpart A—General

Sec.
121k.1 Scope.
121k.2 Definition of handicapped persons.
121k.3 Purpose.
121k.4 Eligible parties.

Subpart B—Applications; Activities

121k.15 Application requirements.
121k.16 Initial year application.
121k.17 Priorities.
121k.18 Criteria for evaluation of applications.
121k.19 Services, activities, and resources to be supported.
121k.20 Auxiliary activities.

AUTHORITY: Section 625 of Pub. L. 91-230, as amended, 88 Stat. 584 (20 U.S.C. 1424a), unless otherwise noted.

Subpart A—General

§ 121k.1 Scope.

(a) This part applies to programs funded under section 625 of the Act.

(b) Programs funded under this part are subject to applicable provisions contained in subchapter A of this chapter (relating to fiscal, administrative, property management, and other matters) and Part 121 of this chapter.

(20 U.S.C. 1421a)

§ 121k.2 Definition of handicapped persons.

For the purposes of this part, the term "handicapped persons" means persons who are mentally retarded, hard of hearing, deaf, speech impaired, visually handicapped, emotionally disturbed, crippled, or in other ways health impaired and by reason thereof require special education programming and related services.

(20 U.S.C. 1424a(c))

§ 121k.3 Purpose.

Payment of Federal funds under this part may be made to eligible parties for the development and operation of specially designed or modified programs of vocational, technical, postsecondary, or adult education for deaf or other handicapped persons.

(20 U.S.C. 1424a(a))

§ 121k.4 Eligible parties.

Parties eligible to receive Federal funds under this part are institutions of higher education, including junior and community colleges, vocational and technical institutions, and other appropriate nonprofit educational agencies.

(20 U.S.C. 1424a(a))

Subpart B—Applications; Activities

§ 121k.15 Application requirements.

Applications for funds under this part shall be submitted to the Commissioner in accordance with Subparts B and C of Part 100a of this chapter and shall contain the following additional information:

(a) A description of the handicapping conditions of the persons to be served;

(b) Specification of the resources and services needed by the handicapped persons to be served which will assist in the successful integration of those handicapped persons into a nonhandicapped school population and regular educational program;

(c) A plan for provision of an integrated comprehensive range of services and resources specified in paragraph (b) of this section to assist handicapped participants in competing academically with nonhandicapped students;

(d) Provision for a survey covering the geographical area from which potential participants in the program will be drawn, and assessment of the needs of such participants;

(e) A description of the procedures and resources which will be used to determine and provide the services necessary to meet the special individual needs of each handicapped person who will participate in the program;

(f) A description of the objectives of the program in relation to the specific services which will be provided for the handicapped persons to be served; and

(g) A description of the procedures which will be used for evaluation of the programs as required under § 100a.276 of this chapter, including the evaluation of:

(1) The services to be provided;

(2) The resources to be used;

(3) The progress of the handicapped persons to be served;

(4) The strategies for followup of the handicapped persons participating; and

(5) The needs assessment carried out under paragraph (d) of this section.

(20 U.S.C. 1424a)

§ 121k.16 Initial year application.

An initial year application for funds under this part shall contain, in addition to the information required under § 121k.15, the following:

(a) A description of the geographical region or regions or population centers to be served, including the demographic characteristics;

(b) The anticipated number of handicapped participants to be served in the program who currently are not being provided with an appropriate and/or adequate education program;

(c) The estimated number of handicapped persons to be served annually under the program;

(d) The criteria which will be used to determine whether a person is handicapped for purposes of participating in the program;

(e) A description of sources of support and supplementary services such as housing, health care, and recreation, which will be available for use in the program;

(f) A description of how the requirement under § 100a.275 of this chapter for coordination with other agencies will be met; and

(g) A plan for long range funding which includes strategies for increasing the amount of funds for the program from sources other than under this part.

(20 U.S.C. 1424a)

§ 121k.17 Priorities.

Priority consideration for Federal funds under this part will be given to:

(a) Programs serving multistate regions or large population centers;

(b) Programs adapting existing programs of vocational, technical, postsecondary, or adult education to the special needs of handicapped persons; and

(c) Programs designed to serve areas where a need for these services is clearly demonstrated.

(20 U.S.C. 1424a(b))

§ 121k.18 Criteria for evaluation of applications.

In addition to the criteria set forth in § 100a.26(b) of this chapter, applications will be evaluated on the basis of the following factors:

(a) Whether the program under this part will be carried out in facilities easily accessible to physically handicapped persons;

(b) Whether the program will be located in an area in which public transportation is readily available, or transportation will be provided at reasonable cost to handicapped persons participating in the program;

(c) Whether the program will serve handicapped persons for whom other appropriate education programs are not readily available; and

(d) The likelihood that the services provided under the proposed program will be continued by the applicant following the expiration of Federal funding under this part as measured by evidence of financial and other commitment of the applicant to the program and other funds available to the program.

(20 U.S.C. 1424a)

§ 121k.19 Services, activities, and resources to be supported.

(a) *Illustrative services.* The following is an illustrative list of the types of resources, services, and activities which

V 40 218 NOV 11 75 XUM

may be supported (in whole or in part) under this part:

(1) Interpreters;
(2) Tutors;
(3) Notetakers and readers;
(4) Wheelchair attendants;
(5) Guidance counselors;
(6) Auditory training;
(7) Job placement and followup;
(8) Preparatory and orientation services;
(9) Supplementary learning experiences;
(10) Instructional media;
(11) Inservice training relating to the handicapped participants in the program, for teachers and other educational staff;
(12) Administrative expenses such as employment of a director, administrator, or coordinator for the program; and
(13) Planning and evaluation activities.

(20 U.S.C. 1424a)

(b) *Tuition.* Federal funds provided under this part shall not be used for the payment of tuition or subsistence allowances.

(c) *Construction and remodeling.* Federal funds provided under this part shall not be used for costs of construction (as defined in § 121.2 of this chapter), except for the costs of minor remodeling (as defined in § 100.1 of this chapter) which, for the purposes of this part, may include the acquisition, installation, modernization, or replacement of equipment.

(20 U.S.C. 1404, 1424a)

§ 121k.20 Auxiliary activities.

(a) Applications for Federal funds under this part shall specifically state any activities which an applicant intends to undertake pursuant to section 624 of the Act.

(b) Research activities under section 624(a)(1) of the Act are subject to applicable requirements contained in §§ 121h.1(b), 121h.4, and 121h.7 of this chapter, as well as applicable provisions contained in Part 121e of this chapter.

(20 U.S.C. 1424, 1424a)

Office of the Secretary

[45 CFR Part 1501]

SUPPORT FOR IMPROVEMENT OF POSTSECONDARY EDUCATION

Notice of Proposed Rule Making

Pursuant to the authority contained in Section 404 of the General Education Provisions Act (20 U.S.C. 1221d), "Support for improvement of postsecondary education," notice is hereby given that the Secretary of Health, Education, and Welfare proposes to amend the existing regulations for this program as set forth below. The proposed amendments to the regulations, reflected in sections 1501.7-10, would: (a) redefine the Comprehensive Program objectives to incorporate concerns addressed by special focus and national projects competitions in the past years; (b) revise the Comprehensive Program objectives into more specific problem statements; and (c) eliminate one of the previous four general criteria utilized in reviewing proposals, due to its lack of specificity. These amendments are proposed to improve the implementation of Section 404 as the result of program operating experience. The amendments would revise the regulations published in 40 FR 12266-9 (March 18, 1975).

Interested persons are invited to submit written comments, suggestions, or objections regarding the proposed amendments to the office administering this program, the Fund for the Improvement of Postsecondary Education, Department of Health, Education, and Welfare, 400 Maryland Avenue, S.W., Room 3141, Washington, D.C. 20202. All relevant material must be received not later than December 11, 1975. Comments received will be available for public inspection at the above office Monday through Friday between 9:00 a.m. and 5:30 p.m.

(Catalog of Federal Domestic Assistance No. 13.538; Fund for the Improvement of Postsecondary Education)

Dated: NOVEMBER 3, 1975.

DAVID MATHEWS,
Secretary of Health, Education, and Welfare.

It is proposed that 45 CFR Part 1501 be amended as follows:

1. Section 1501.7, paragraphs (b) (1) and (6) are revised as follows:

§ 1501.7 Criteria for evaluating applications.

* * * * * *

(b) * * *

(1) Has the potential for advancing one or more of the following general goals of the Fund:

(i) To increase the cost-effectiveness of educational services;

(ii) To achieve far-reaching improvements in postsecondary education;

(iii) To promote learner-centered improvements in postsecondary education;

* * * * *

(6) Meets one or more of the objectives of the Comprehensive Program set forthin section 1501.8.

(20 U.S.C. 1221d)

2. Section 1501.8 is revised to read as follows:

§ 1501.8 Comprehensive program objectives.

The Fund will accept preapplications and applications (from those applicants whose preapplications are approved) directed toward one or more of the following objectives, in the context of postsecondary education:

(a) Reducing costs and stretching the educational dollar;

(b) Extending effective educational opportunity to those still not adequately served by the educational system;

(c) Meeting individual needs in a mass educational system;

(d) Improving programs, personnel, and instruction for more effective education;

(e) Creating and applying more meaningful standards of excellence for education beyond high school;

(f) Making better use of educational resources beyond colleges and universities;

(g) Helping people make better choices about whether, when, and where to enroll for education beyond high school;

(h) Increasing flexibility throughout postsecondary education to permit greater responsiveness to changing social and economic needs.

(20 U.S.C. 1221d)

§ 1501.9 [Removed]

3. Section 1501.9 is deleted and reserved.

§ 1501.10 [Amended]

4. In section 1501.10, paragraph (1) is amended by deleting the phrase "or § 1501.9(a)".

[FR Doc.75-30263 Filed 11-10-75;8:45 am]

AMERICAN REVOLUTION BICENTENNIAL ADMINISTRATION

[36 CFR Part 606]

TERMINATION OF AREA LICENSES FOR OFFICIAL COMMEMORATIVES IN CERTAIN PRODUCT CATEGORIES

Notice of Proposed Rulemaking

Notice is hereby given that the American Revolution Bicentennial Administration (ARBA) proposes to amend Part 606 of Title 36 of the Code of Federal Regulations to terminate the issuance of licenses for officially recognized commemoratives of the American Revolution Bicentennial Administration in product categories licensed on or before January 31, 1976. The proposed change would authorize the Administrator to continue to issue licenses subsequent to January 31, 1976, in product categories not previously licensed. Both the regulations establishing the initial licensing program and these revisions are pursuant to the provisions of Public Law 93-179, as amended.

Purpose. At its meeting of August 22, 1974, the American Revolution Bicentennial Board established policies for an ARBA official commemorative licensing program. In implementation of these policies, the ARBA established regulations set forth in 36 CFR 606. To date ARBA has issued 96 licenses in 30 product categories.

At its meeting of October 30, 1975, and upon recommendation of the Administrator, the Board authorized the Administrator to publish a notice of a proposed revision in the ARBA licensing program establishing a date beyond which additional licenses in product categories already licensed would not be further licensed but authorizing the Administrator subsequent to such date to issue licenses in product categories not theretofore licensed.

These revisions are proposed to assure an appropriate selection of official commemoratives and to encourage licensees to provide maximum distribution of all licensed products to the American public.

Interested persons are invited to submit written comments to the General Counsel, American Revolution Bicentennial Administration, 2401 E Street NW., Washington, D.C. 20276. Comments received on or before December 11, 1975, will be considered before final action is taken on the proposal. Copies of all written comments will be available for examination by interested parties in Room 7240, Columbia Plaze Office Building, 2401 E Street NW., Washington, D.C. .

It is proposed to amend 36 CFR Part 606 by the deletion of § 606.105 "Initial product areas and categories" and by the revision of § 606.101 "Non-exclusive licenses" as follows:

§ 606.101 ARBA Licenses.

ARBA licenses may be issued for product categories not already licensed which are determined to be commemorative, historical, educational, and informational in nature, as relating to our Nation's heritage, the present commemoration of the Bicentennial, and our future. ARBA licenses may also be issued for educational or commemorative premium campaigns where the end result is the free or low-cost dissemination of Bicentennial information or keepsake materials to the general public, including premiums in connection with fresh or processed food products.

JOHN W. WARNER,
Administrator.

NOVEMBER 5, 1975.

FEDERAL MARITIME COMMISSION

[46 CFR Part 536]

[General Order 13; Docket No. 75-28]

COMMON CARRIERS, CONFERENCES, AND MEMBER CARRIERS OF RATE AGREEMENTS

Submission of Revenue and Cost Data, Concerning General Rate Increases and Certain Subcharges; Further Enlargement of Time To Comment

Noticed of proposed rulemaking in this proceeding was published August 11, 1975, (40 FR 33688). Time for filing comments was set for September 5, 1975, and subsequently enlarged by 60 days to November 5, 1975. With this seemingly ample amount of time having been afforded for preparation of comments we are now presented, on the very eve of the due date, with a request for additional time on behalf of six different counsel representing numerous conferences and carriers.

While we have determined to grant the request for additional time, it should be pointed out that it is done with reluctance because of the disservice that grant of a last minute request does to the more diligent counsel who meets a deadline before notice of extension can be published.

Time within which comments may be filed in response to the notice of proposed rulemaking in this proceeding is enlarged to and including November 18, 1975. Reply of Hearing Counsel shall be filed on or before December 18, 1975. Answers to Hearing Counsel shall be filed on or before January 5, 1976.

By the Commission.

[SEAL] FRANCIS C. HURNEY,
Secretary.

[FR Doc.75-30875 Filed 11-10-75;8:45 am]

FEDERAL TRADE COMMISSION

[16 CFR Part 450]

ADVERTISING FOR OVER-THE-COUNTER DRUGS

Notice of Proposed Rulemaking; Public Hearings

Notice is hereby given that the Federal Trade Commission, pursuant to the Federal Trade Commission Act, as amended, 15 U.S.C. 41, et seq., the provisions of Part I, Subpart B of the Commission's Procedures and Rules of Practice, 16 CFR 1.7, et seq., and section 553 of Subchapter II, Chapter 5, Title 5, U.S. Code (Administrative Procedure), has initiated a proceeding for the promulgation of a trade regulation rule concerning advertising for over-the-counter drugs.

In accordance with the above notice, the Commission proposes to amend Subchapter D, Trade Regulation Rules, of 16 CFR Chapter I by adding a new Part 450 to read as follows:

PART 450—ADVERTISING FOR OVER-THE-COUNTER DRUGS

Sec.
450.1 The rule.
450.2 Definitions.

AUTHORITY: The provisions of this Part 450 issued under 38 Stat. 717, as amended, 15 U.S.C. 41, et seq.

§ 450.1 The rule.

It is

(a) An unfair or deceptive act or practice in violation of Section 5 of the Federal Trade Commission Act, and

(b) The dissemination or causing to be disseminated of a false advertisement in violation of section 12 of the Federal Trade Commission Act, to disseminate or cause to be disseminated (by United States mails, or in or affecting commerce by any means, for the purpose of inducing, or which is likely to induce, the purchase of the advertised product) an advertisement for any over-the-counter drug in any drug category for which an applicable final monograph has been established by the Food and Drug Administration, pursuant to 21 CFR Part 330, which advertisement makes any claim, directly or by implication, which the Commissioner of Food and Drugs has determined, in a final order accompanying such monograph, may not appear in the labeling of such drug.

§ 450.2 Definitions.

For the purpose of this part, the following definitions shall apply:

(a) **"Advertisement"** shall mean any written or verbal statement, illustration or depiction, other than a label or in the labeling, which is designed to promote the sale of a product, whether the same appears in a television or radio broadcast, newspaper, magazine, leaflet, circular, mailer, book insert, catalog, sales promotional material, other periodical literature, billboard, public transit card, or in any display intended for use at the point of purchase of the product.

(b) "Commerce" shall mean commerce as it is defined in the Federal Trade Commission Act.

(c) "Over-the-counter drug" shall mean any drug as defined in Section 15 (c) of the Federal Trade Commission Act, excluding all prescription drugs as described in Section 503(b)(1) of the Federal Food, Drug and Cosmetic Act.

(d) "Drug category" shall mean any of those categories designated by the Commissioner of Food and Drugs at 21 CFR 330.5.

STATEMENT OF REASONS FOR THE PROPOSED RULE

The Food and Drug Administration is presently engaged in a comprehensive evaluation of the safety and efficacy of all over-the-counter (non-prescription) (OTC) drugs. Under procedures set forth at 21 CFR 330.10, the Commissioner of Food and Drugs is establishing conditions under which all over-the-counter drugs will be classified in one of three ways:

(a) Category I: Generally recognized as safe and effective and not misbranded;

(b) Category II: Not generally recognized as safe and effective; or,

(c) Category III: Data are insufficient for classification and further testing is therefore required. Marketing of products with ingredients placed in Category II is prohibited. Marketing of products with a Category III ingredient is allowed for a specified period, if the manufacturer or distributor undertakes adequate testing to prove that the ingredient is in fact safe and effective. Product claims placed in Category II are forbidden to appear in labeling, while Category III claims may continue for a designated period if testing is begun.

The Commission has reason to believe that:

(a) The determination by the Commissioner of Food and Drugs that a drug product is not safe or effective for a condition for which it is being advertised is a material fact that would have a most serious effect upon a consumer's determination of whether or not to purchase the drug;

(b) A substantial portion of the consuming public assumes that drugs could not be marketed unless the Food and Drug Administration has found them safe or effective for their intended use;

(c) The practice of advertising a drug for conditions for which the Commissioner of Food and Drugs has determined the drug is not safe or is not effective is deceptive within the meaning of Section 5 of the Federal Trade Commission Act (15 U.S.C. 45, as amended) and such advertisements are "false" within the

V 40 N 218 NOV 11 75 XUM

meaning of Sections 12 and 15 of the Federal Trade Commission Act (15 U.S.C. 52, 55 as amended);

(d) Section 450.1 is necessary to prevent the use of such deceptive practices and the dissemination of such false advertisements.[1]

The Commission's authority, however, is not limited to preventing deceptive acts or practices or false advertisements. The Commission can proceed on the theory that a practice is unfair where it offends public policy. The Commission has reason to believe that:

(e) The making of claims in advertising for drugs which the Food and Drug Administration has determined may not lawfully be made would nullify important public policies basic to the regulatory scheme which Congress has enacted for the protection of the public health. A critical element of the regulatory scheme adopted by Congress in the 1962 Drug Amendments to the Federal Food, Drug and Cosmetic Act, 70 Stat. 780, amending 21 U.S.C. 301, *et seq.*, is that a "new drug" as therein defined may not be lawfully marketed until FDA has affirmatively concluded that the drug is effective for its intended use. Whether such claims are ultimately shown to be valid is not controlling. A determination by the FDA Commissioner, under the monograph program, that a drug is not "generally recognized as safe and effective" for a particular use (i.e. category II) for a particular condition is a finding that such a drug, when marketed for that use is a "new drug" that may not lawfully be marketed without formal FDA approval, in the form of an effective new drug application. Moreover, Congress has established criminal penalties for any such unlawful marketing of unapproved "new drugs" 21 U.S.C. 301(d), 303. The Supreme Court has recognized that the Commissioner is uniquely qualified to make such a determination, subject only to judicial review.[2] To permit drug advertising claims to be made for a use for which the drug may not lawfully be marketed would nullify the strict scheme of premarketing control which Congress has determined is necessary for public protection.

(f) There is in addition a public policy, embodied in the Federal Food, Drug and Cosmetic Act, that the labeling of a drug be a comprehensive source of information about that drug and provide adequate directions for use for all uses of the drug intended by the manufacturer. For a manufacturer to promote the product through media advertising for a use not mentioned in the labeling and for which no labeling directions are given would conflict with an express statutory command that the label contain adequate directions for use, and clearly would violate public policy.[3]

Therefore, the Commission proposes to adopt a trade regulation rule prohibiting the making of any product claim in advertising which FDA has prohibited, in an applicable final order, in labeling.

The Commission has concluded that the proposed rule is not a "major Federal action significantly affecting the quality of the human environment", within the meaning of Section 102(c) of the National Environmental Policy Act of 1969, and consequently, the Commission need not make a detailed environmental impact assessment. The proposed rule would not require or prohibit the sale of any over-the-counter drug, but is designed simply to eliminate the dissemination of false, deceptive or unfair product claims. Any effect that the promulgation of this regulation might have upon over-all consumption of over-the-counter drugs or demand for specific OTC drugs or upon the use of materials in manufacturing such drugs, and the consequent effect upon the environment, is entirely speculative and would be extremely remote. At this time, the Commission envisions no significant environmental impact from this rule.

INVITATION TO PROPOSE ISSUES OF FACT FOR CONSIDERATION IN PUBLIC HEARINGS

All interested persons are hereby given notice of opportunity to propose any disputed issues of fact. The Commission or its duly authorized presiding official shall, after reviewing submissions hereunder, identify any such issues in a notice which will be published in the FEDERAL REGISTER. Such issues shall be considered in accordance with Section 18(c) of the Federal Trade Commission Act as amended by Public Law 93-637, and rules promulgated thereunder. Proposals shall be accepted until January 12, 1976, by the Special Assistant Director for Rulemaking, Federal Trade Commission, Washington, D.C. 20580. A proposal should be identified as a "Proposal Identifying Issues of Fact—OTC Drug Advertising Rule" and furnished, when feasible and not burdensome, in five copies. The times and places of public hearings will be set forth in a later Notice which will be published in the FEDERAL REGISTER.

INVITATION TO COMMENT ON THE PROPOSED RULE

All interested persons are hereby notified that they may also submit to the Special Assistant Director for Rulemaking, Federal Trade Commission, Washington, D.C. 20580, data, views or arguments on any issue of fact, law or policy which may have some bearing upon the proposed rule. Written comments, other than proposed disputed issues of fact, will be accepted until forty-five days before commencement of public hearings, but at least until Jan. 12, 1976. To assure prompt consideration of a comment, it should be identified as an "OTC Drug Advertising Rule Comment" and furnished, when feasible and not burdensome, in five copies.

Issued: November 11, 1975.

By direction of the Commission.

CHARLES A. TOBIN,
Secretary.

[FR Doc.75-30256 Filed 11-10-75;8:45 am]

[1] The Commission believes that the mere disclosure of the fact that the FDA had concluded that the product is not efficacious for the claimed use will not sufficiently remedy the deceptions heretofore described. Such a disclosure could well be susceptible to conflicting interpretations by consumers, including the false interpretation that the FDA's findings were merely preliminary, or were just one opinion to be balanced against other contrary opinions. In fact, however, a finding by FDA as a result of the OTC review that a product is ineffective for a claimed use means that the product is not generally recognized as effective for such use. Accordingly, absent formal FDA approval such product may not, under Section 505 of the Federal Food, Drug and Cosmetic Act, 21 U.S.C. 355, lawfully be sold for that use at all. To permit the advertising of a drug for such a use as long as it is accompanied by a disclosure that the drug may not be lawfully sold for such use would be to permit two basically contradictory messages to remain in the advertisement. It is well established that in fashioning a remedy for deceptive advertising the Commission need not permit ambiguity and confusion. VETERANS ADMINISTRATION

[41 CFR Parts 8–1, 8–4, 8–16]

ARCHITECT-ENGINEER SERVICES

Proposed Regulatory Development

The Veterans Administration proposes regulatory revision of Part 8–4, Title 41, Code of Federal Regulations, to revise and relocate material on the procurement of architect-engineer services to conform with the arrangement of Federal Procurement Regulations, and to add material formerly contained in internal agency regulations.

Interested persons are invited to submit written comments, suggestions, or objections regarding these proposals to the Administrator of Veterans Affairs (271A), Veterans Administration, 810 Vermont Avenue, NW., Washington, DC 20420. All relevant material received before December 11, 1975 will be considered. All comments received will be available for public inspection at the above address only between the hours of 8 am and 4:30 pm Monday through Friday (except holidays), during the mentioned 30-day period and for 10 days thereafter. Any person visiting Central Office for the purpose of inspecting any such comments will be received by the Central Office Veterans Assistance Unit in room 132. Such visitors to any VA field station will be informed that the records are available for inspection only in Central Office and furnished the address and the above room number.

It is proposed to amend Chapter 8, Title 41, Code of Federal Regulations as follows:

1. A new Subpart 8–1.10 is added to read as follows:

Subpart 8–1.10—Publicizing Procurement Actions

Sec.
8–1.1003 Synopses of proposed procurement.
8–1.1003–3 Special areas of negotiation.

Subpart 8–1.10—Publicizing Procurement Actions

§ 8–1.1003 Synopses of proposed procurements.

§ 8–1.1003–3 Special areas of negotiation.

To facilitate the use of alternative procedure in FPR 1–1.1003–3 for publicizing a proposed procurement of architect-engineer services in a daily newspaper circulated in the local area, contracting officers are hereby delegated authority to procure such paid advertising (see § 8–16.301–50).

2. A new Subpart 8–4.10 is added to read as follows:

Subpart 8–4.10—Architect-Engineer Services

Sec.
8–4.1001 General policy.
8–4.1004 Selection.
8–4.1004–1 Establishment of architect-engineer evaluation boards.
8–4.1004–2 Functions of the evaluation boards.
8–4.1004–3 Evaluation criteria.
8–4.1004–4 Action by agency head or his authorized representative.
8–4.1004–5 Procedure for procurements estimated not to exceed $10,000.
8–4.1005 Negotiation Procedures.
8–4.1005–1 General.
8–4.1005–4 Architect-engineer's proposal.
8–4.1005–5 Contract price.
8–4.1050 Application of 6-percent architect-engineer fee limitation.

Subpart 8–4.10—Architect-Engineer Services

§ 8–4.1001 General policy.

The provisions of this subpart pertain to the general policies and procedures for the procurement of professional architect-engineer services as set forth in FPR 1–4.10, and are not applicableto contracts entered into pursuant to the authority of 38 U.S.C. 1820.

§ 8–4.1004 Selection.

§ 8–4.1004–1 Establishment of architect-engineer evaluation boards.

In the case of Central Office contracts, selection will be made by the board appointed by the Assistant Administrator for Construction. Selections made by field stations will be by a board appointed by the station head.

(a) The evaluation board appointed by the Assistant Administrator for Construction will be composed of four or more qualified professional architects or engineers including the Director of Architecture and Engineering of the Office of Construction who will act as Chairman. Membership of the board will also include the appropriate project director and technical service directors most involved in the project for which the selection is being made. Additional members from other departments and staff offices will be designated for special type projects when appropriate.

(b) The evaluation board for a Veterans Administration field station will consist of no less than two members, one of whom will be the senior contracting officer, and the other the Engineer Officer. Where a station has two or more engineers on its staff, an additional engineer will be appointed to the board. The chairman of the board will be the senior engineer.

§ 8–4.1004–2 Functions of the evaluation boards.

(a) The evaluation board will review the data submitted by the firms and from that file will preselect the firms which have the basic qualifications for performing the services needed. The factors stated in the announcement publicizing the proposed procurement (see FPR 1–1.1003–7) will be used in determining whether a firm is qualified for inclusion on the preselection list.

(b) In the evaluation of the qualifications of the firms on the preselection list, the board will perform the functions as outlined in FPR 1–4.1004–2, applying the evaluation criteria set forth in FPR 1–4.1004–3 and that established in § 8–4.1004–3, and will recommend no less than three firms (to the Assistant Administrator for Construction in the case of Central Office contracts, and to the head of the field station in the case of station contracts) for interviews.

(c) After approval (by the Assistant Administrator for Construction or by the station head) of the list of selected firms recommended for interviews, the board will arrange discussions with each firm for the purpose of obtaining information, supplementing that already available, from which to develop, in order of preference, not less than three firms considered the most highly qualified. This recommended listing will be submitted (to the Assistant Administrator for Construction or to the station head, as appropriate) for consideration and approval before the contracting officer enters into negotiations with the top-rated firm.

§ 8–4.1004–3 Evaluation criteria.

In addition to the evaluation criteria set forth in FPR 1–4.1004–3, the board will consider the factors set forth in this section as they apply to the project or purpose of the selection. Values will be assigned to each factor in determining the relative qualifications of the firms identified as qualified through the preselection process. The values may be confirmed or adjustments may be made as a result of the discussions.

(a) Reputation and standing of the firm and its principal officials with respect to professional performance, general management, and cooperativeness.

(b) Record of significant claims against the client because of improper or incomplete architectural and engineering services.

(c) Geographic location and facilities of the working office which would provide the professional services.

(d) Specific experience and qualifications of personnel proposed for assignment to the project, and record of working together as a team.

§ 8–4.1004–4 Action by agency head or his authorized representative.

The Assistant Administrator for Construction (for Central Office contracts) and the station head (for field station contracts), or persons acting in that capacity, are designated as the approving officials for the recommendation of the evaluation boards.

§ 8–4.1004–5 Procedure for procurements estimated not to exceed $10,000.

Either of the procedures provided in FPR 1–4.1004–5 may be used on authorization of the Assistant Administrator for Construction or the station head.

§ 8–4.1005 Negotiation procedures.

§ 8–4.1005–1 General.

Application of the 6-percent fee limitation cited in FPR 1–4.1005–1 is set forth in § 8–4.1050. The policy set forth in that section provides all the available latitude in the negotiation of the contract price. The policy does not, however, relieve the contracting officer of the responsibility to determine that the fee negotiated is consistent with the services to be performed and the nature of the project. The contract ordinarily will cover all services to be rendered by the firm. To assure that the fee limitation is not violated, the contracting officer will maintain suitable records to be able to isolate the amount in the total fee to which the 6-percent limitation applies.

§ 8–4.1005–4 Architect-engineer's proposal.

VA Form 08–6298, Architect-Engineer Fee Proposal, prescribed in § 8–16.701, is mandatory for obtaining the proposal and supporting cost or pricing data in the negotiation of all architect-engineer contracts for design services when the contract price is $50,000 or over. The use of VA Form 08–6298 for design contracts less than $50,000 is at the discretion of the contracting officer. In obtaining architect-engineer services for research study, seismic study, master planning study, construction management and other related services contracts, VA Form 08–6298 shall also be used but supplemented or modified as needed for the particular project type.

§ 8–4.1005–5 Contract price.

Where negotiations with the top-rated firm are unsuccessful, the contracting officer will terminate the negotiations and undertake negotiations with the firm next in order of preference after authorization by the Assistant Administrator for Construction or by the station head to do so. Recommendation for award of the contract at the negotiated fee will be submitted with a copy of the negotiation report (see FPR 1–4.1005–6) to the Assistant Administrator for Construction or to the station head, as appropriate.

V 40 218 NOV 11 75 XUM

§ 8–4.1050 Application of 6-percent architect-engineer fee limitation.

(a) The 6-percent fee limitation on architect or engineer services set forth in section 304(b) of the Federal Property and Administrative Services Act of 1949, as amended, applies to those services generally required in preparing working drawings and specifications which form the basis for bidding and for the award of construction contract. The fixed fee limitation does not apply to the following architect or engineer services:

(1) Investigative services including but not limited to:

(i) Determination of program requirements including schematic or preliminary plans and estimates.

(ii) Determination of feasibility of proposed project.

(iii) Preparation of measured drawings of existing facility.

(iv) Subsurface investigation.

(v) Structural, electrical, and mechanical investigation of existing facility.

(vi) Surveys: Topographic, boundary, utilities, etc.

(2) Special consultant services not normally available in organizations of architects or engineers not specifically applied to the actual preparation of working drawings or specifications of the project for which the services are required.

(3) Other:

(i) Reproduction of approved designs through models, color rendering, photographs, or other presentation media.

(ii) Travel and per diem allowances other than those required for the development and review of working drawings and specifications.

(iii) Supervision or inspection of construction, review of shop drawings or samples and other services performed during the construction phase.

(iv) All other services that are not integrally a part of the production and delivery of plans, designs, and specifications.

(4) The cost of reproducing drawings and specifications for bidding and their distribution to prospective bidders and plan file rooms.

(b) The total cost of the architect or engineer services contracted for may not exceed 6 percent of the estimated cost of the construction project plus the estimated cost of related services and activities such as those shown in paragraph (a) of this section. To support project submissions, VA Form 10–6031, Application for Construction Project and Initial Equipment, or VA Form 10–1193, Minor Improvement, Building Service Equipment Replacement, and Nonrecurring Maintenance and Repair Proposal, and VA Form 08–6238, Construction Cost Estimate, will be used and the applicable proposed technical services shown in detail.

Subpart 8–4.50 [Revoked]

3. Subpart 8–4.50 §§ 4.5001 through 8–4.5003–4) is revoked.

4. In Subpart 8–16.7, § 8–16.701 is added to read as follows:

§ 8–16.701 Forms prescribed.

VA Form 08–6208, Architect-Engineer Fee Proposal, will be used in obtaining the proposal and supporting cost or pricing data in negotiated architect-engineer contracts as required by § 8–4.1005–4.

Approved: November 5, 1975.

By direction of the Administrator:

[SEAL] ODELL W. VAUGHN,
Deputy Administrator.

USAF SCIENTIFIC ADVISORY BOARD

Meeting

NOVEMBER 3, 1975.

The USAF Scientific Advisory Board Guidance and Control Panel will hold meetings on December 3 and 4, 1975, from 9 a.m. to 5 p.m. both days, at the Charles Stark Draper Laboratory, Cambridge, Massachusetts.

The Panel will receive classified briefings and hold classified discussions on current and future technology, programs, equipment and activities related to the guidance and control area.

The meetings concern matters listed in Section 552(b) of Title 5, United States Code, specifically subparagraph (1) thereof, and that accordingly the meetings will be closed to the public.

For further information contact the Scientific Advisory Board Secretariat at (202) 697–8845.

DEPARTMENT OF JUSTICE

Drug Enforcement Administration

2-5 DIMETHOXYAMPHETAMINE

Controlled Substances in Schedules I and II; Final 1975 Aggregate Production Quota

Section 306 of the Comprehensive Drug Abuse Prevention and Control Act of 1970 (21 U.S.C. 826) requires the Attorney General to establish aggregate production quotas for all controlled substances in Schedules I and II each year. This responsibility has been delegated to the Administrator of the Drug Enforcement Administration pursuant to § 0.100 of Title 28 of the Code of Federal Regulations.

On August 27, 1975, a notice of the proposed aggregate production quota for 1975 for 2-5 Dimethoxyamphetamine was published in the FEDERAL REGISTER (40 FR 38173). All interested parties were invited to comment or object to the proposed aggregate production quota on or before October 3, 1975. No comments or objections were received.

Therefore, under the auhority vested in the Attorney General by Section 306 of the Comprehensive Drug Abuse Prevention and Control Act of 1970 (21 U.S.C. 826), and delegated to the Administrator of the Drug Enforcement Administration by § 0.100 of Title 28 of the Code of Federal Regulations and further, having been duly designated as Acting Administrator by Order No. 607–75 of the Attorney General, dated May 30, 1975, in accordance with the authority stated therein, and pursuant to the authority delegated to the Acting Administrator by § 0.132(d) of Title 28 of the Code of Federal Regulations, the Acting Administrator of the Drug Enforcement Administration hereby orders that the aggregate production quota for the controlled substance listed below, expressed in grams in terms of anhydrous base, be established as follows:

Basic class:	*Issued 1975*
2-5 Dimethoxyamphetamine	11,000,000

This order is effective November 11, 1975.

Dated: October 20, 1975.

HENRY S. DOGIN,
Acting Administrator, Drug Enforcement Administration.

[FR Doc.75–30913 Filed 11–10–75;8:45 am]

[Docket No. 75–16]

JAMES B. ANDERSON

Notice of Hearing

Notice is hereby given that on June 24, 1975, the Drug Enforcement Administration, Department of Justice, issued to James B. Anderson, M.D., Russellville, Alabama, an Order to Show Cause as to why the Drug Enforcement Administration Registration No. AA3136238 issued to him pursuant to section 303 of the Controlled Substances Act (21 U.S.C. 823) should not be revoked.

Thirty days having elapsed since said Order to Show Cause was received by the Respondent, and written request for a hearing having been filed by the Respondent with the Drug Enforcement Administration, Notice is hereby given that a hearing in this matter will be held commencing at 9:30 a.m. on November 12, 1975, in Courtroom No. 603, 136 Pryor Street SW., Atlanta, Georgia.

Dated: November 5, 1975.

HENRY S. DOGIN,
Acting Administrator, Drug Enforcement Administration.

DEPARTMENT OF THE INTERIOR

Bureau of Land Management

[ES 15368; Survey Group 160]

FLORIDA

Notice of Filing of Plat of Survey

NOVEMBER 4, 1975.

The plat of survey of the following described lands, which was accepted on July 3, 1975, will be officially filed in the Eastern States Office, Silver Spring, Maryland as of 10:00 A.M. on December 15, 1975:

TALLAHASSEE MERIDIAN, FLORIDA

T. 41 S., R. 22 E., Tract No. 37 (0.15 of an acre); Tract No. 38 (0.16 of an acre); Tract No. 39 (0.11 of an acre); Tract No. 40 (0.87 of an acre).

The area aggregates 1.29 acres.

The plat represents the survey of islands omitted from the original surveys of T. 41 S., R. 22 E., as shown on the plats approved May 6, 1850, and July 20, 1872.

Tracts 37, 38 and 39 are islands of sandy formation, ranging 2 to 3 feet in height, with outer fringes of tidal man-

V 40 218 NOV 11 75 XUM

grove. The upland portions of these islands support moderate growths of such vegetation as sea grape, cabbage palm and buttonwood; the undergrowth consists of cacti, vines and small shrubs. Tract 40 is an island of sandy shell formation, ranging 4 to 5 feet in height, with an outer fringer of tidal mangrove. The upland portion supports a moderate growth of sea grape, buttonwood and palm trees, with undergrowth consisting of cacti, vines and small shrubs. The inner tidal areas of all islands are covered with a black and red mangrove mixture. Each island is surrounded by a fringe of red and black mangrove, with no apparent connecting bars, shell or sand ridges to any other islands, and is stable in position with no erosive action.

Tracts 37, 38 and 39 have features and characteristics similar to the mainland of this area, and all characteristics of the mainland would indicate that these islands were in existence in 1845 when Florida was admitted to the Union and at all subsequent dates. Tract 40 contains a high percentage of shells and appears to be an Indian mound. The size and amount of the over-story timber on this island would prove its existence at the time Florida was admitted to the Union in 1845 and at all subsequent dates.

The islands are well over 50% upland in character within the interpretation of the Swampland Act of September 28, 1850.

Except for valid existing rights, these lands will not be subject to application, petition, location, selection or to any other type of appropriation under any public land law, including the mining and mineral leasing laws, until a further order is issued.

All inquiries relating to these islands should be sent to Director, Eastern States, Bureau of Land Management, 7981 Eastern Avenue, Silver Spring, Maryland 20910.

LOWELL J. UDY,
Director,
Eastern States.

[FR Doc.75-30338 Filed 11-10-75;8:45 am]

LOUISIANA-PACIFIC CORPORATION

Availability of Negative Declaration and Environmental Analysis Record on Proposed Right-of-Way

Pursuant to Section 102(c) of the National Environmental Policy Act of 1969, and Part 1500.6(e) of the Council of Environmental Quality Guidelines (38FR20550) August 1, 1973, the Bureau of Land Management, U.S. Department of the Interior, gives notice that an environmental impact statement is not being prepared for the issuance of the Big Butte right-of-way to the Louisiana-Pacific Corporation in Mendocino and Trinity Counties, California.

The proposed right-of-way was included among the actions assessed in the draft environmental impact statement for the Big Butte Timber Sale, which was released for public review on March 8, 1974 (39FR9228). As a result of decisions made through the planning process subsequent to release of the draft statement, the timber sale has been cancelled and a Final Environmental Statement will not be prepared.

The environmental analysis record of this Federal action indicates that the issuance of a short-term right-of-way will not create significant adverse local, regional or national impacts on the environment. As a result of these findings, Mr. Melvin D. Clausen, District Manager, Bureau of Land Management, U.S.D.I., 555 Leslie Street, Ukiah, California 85482, has determined that the preparation and review of an environmental impact statement is not needed for this right-of-way. The right-of-way involves construction of a minimum standard log-haul road across approximately 5 miles of national resource lands.

The environmental analysis record is available for inspection during regular working hours at the following location: Bureau of Land Management, 555 Leslie Street, Ukiah, California 95482.

Requests for single copies of the environmental analysis record should be sent to the above address.

No administrative action on implementation of this proposal will be taken until December 3, 1975.

CURT BERKLUND,
Director.

[NM 26719]

NEW MEXICO

Notice of Application

OCTOBER 31, 1975.

Notice is hereby given that, pursuant to Section 28 of the Mineral Leasing Act of 1920 (30 U.S.C. 185), as amended by the Act of November 16, 1973 (87 Stat. 576), Llano, Inc., has applied for a 12 inch natural gas pipeline right-of-way across the following lands:

NEW MEXICO PRINCIPAL MERIDIAN
NEW MEXICO

T. 24 S., R. 26 E.
Sec. 11, N½SW¼, SE¼SW¼ and S½SE¼;
Sec. 12, SW¼SW¼;
Sec. 13, NW¼NE¼ and NE¼NW¼.
T. 24 S., R. 27 E.
Sec. 17, N½SW¼, SE¼SW¼ and S½SE¼;
Sec. 18, lot 2;
Sec. 21, N½NW¼;
Sec. 25, NW¼NE¼ and S½NE¼.
T. 24 S., R. 28 E.
Sec. 29, S½SW¼, and SW¼SE¼;
Sec. 30, lot 2, SE¼NW¼, NE¼SW¼, N½SE¼ and SE¼SE¼.
T. 25 S., R. 26 E.
Sec. 1, lot 4, SW¼NE¼ and S½NW¼;
Sec. 2, lots 1 and 2.
T. 25 S., R. 29 E.
Sec. 5, S½SW¼;
Sec. 8, N½NE¼, SE¼NE¼ and NE¼NW¼;
Sec. 9, SW¼NE¼, S½NW¼ and N½SE¼;
Sec. 10, N½SW¼, SE¼SW¼ and S½SE¼.
T. 25 S., R. 30 E.
Sec. 9, S½S½;
Sec. 10, S½S½;
Sec.11, S½S½;
Sec. 12, S½S½.
T. 25 S., R. 31 E.
Sec. 7, lot 4, SE¼SW¼ and S½SE¼;
Sec. 8, S½S½;
Sec. 9, S½S½;
Sec. 10, S½S½;
Sec. 11, S½S½;
Sec. 12, S½S½.
T. 25 S., R. 32 E.
Sec. 7, lot 4 and SE¼SW¼;
Sec. 18, lot 1 and NE¼NW¼.

This pipeline will convey natural gas across 20.925 miles of national resource lands in Eddy and Lea Counties, New Mexico.

The purpose of this notice is to inform the public that the Bureau will be proceeding with consideration of whether the application should be approved, and if so, under what terms and conditions.

Interested persons desiring to express their views should promptly send their name and address to the District Manager, Bureau of Land Management, PO Box 1387, Roswell, NM 88201.

FRED E. PADILLA,
Chief, Branch of Lands and Minerals Operations.

IDAHO

Notice of Partial Termination of Proposed Withdrawal and Reservation of Lands

NOVEMBER 3, 1975.

Notice of an application, Serial No. I-7435, for withdrawal and reservation of lands was published as Federal Register Document No. 74-2518 on page 3977 of the issue for January 31, 1974. The Energy Research and Development Administration, formerly the Atomic Energy Commission, has cancelled its application insofar as it involved the lands described below. Therefore, pursuant to the regulations contained in 43 CFR, Part 2300, such lands will be at 10:00 a.m. on December 16, 1975 relieved of the segregative effect of the above-mentioned application.

The lands involved in this notice of termination are:

BOISE MERIDIAN, IDAHO

T. 14 S., R. 26 E.,
Secs. 22, 27, 33 and 34.
T. 15 S., R. 26 E.,
Secs. 3, 4, 5, 8, 9, 10, 16, 17 and 20.
T. 16 S., R. 25 E.,
Secs. 13, 14, 23 and 24.
T. 16 S., R. 26 E.,
Secs. 1, 2 and 7 through 18 inclusive.
T. 16 S., R. 27 E.,
Secs. 6 and 7.

The area described aggregates 16,408.24 acres.

VINCENT S. STROBEL,
Chief, Branch of L&M Operations.

NEVADA STATE MULTIPLE USE ADVISORY BOARD

Notice of Meeting

Notice is hereby given in accordance with Public Law 92-463 that a meeting of the Nevada State Multiple Use Advisory Board will be held December 10 and 11, 1975 at 8 a.m. at the Pioneer Inn, 221 S. Virginia Street, Reno, Nevada.

The Nevada State Multiple Use Advisory Board was established to advise and counsel the Bureau of Land Management and the Secretary of the Interior on national resource land management.

This will be the first meeting of the newly appointed board under its charter approved by the Secretary of the Interior on August 5, 1975. The purpose of the meeting is to orient the board members to BLM's programs, to elect officers and to discuss necessary committees. The following topics will be discussed during the meeting: Role and organization of the board including committees, current issues nationally and in Nevada, BLM Nevada district organization study, current legislation affecting the BLM and the board's perceptions of the BLM.

The meeting is open to the public. Interested persons may make oral presentations to the board or file written statements. Such requests should be made to the official listed below at least 15 days prior to the meeting.

Further information concerning this meeting may be obtained from Carl A. Gidlund, Chief, Public Affairs Staff, Bureau of Land Management, Nevada State Office, Room 3008 Federal Building, 300 Booth Street, Reno, Nevada 89502, telephone 702-784-5459.

Minutes of the meeting will be available for public inspection and copying four weeks after the meeting at the Bureau of Land Management, Nevada State Office, Room 3041, Federal Building, 300 Booth Street, Reno, Nevada 89502.

E. I. ROWLAND,
State Director, Nevada.

Sec. 2, portions of NE¼SE¼.
Further described as follows:
Beginning at Corner No. 1, the ¼ Section Corner common to secs. 1 and 2, T. 20 N., R. 17 E.
From Corner No. 1 by metes and bounds:
N. 73° 57' E., 1065.80 feet to Corner No. 2;
N. 90° 00' E., 346.54 feet to Corner No. 3;
S. 0° 00' E. 129.49 feet to Corner No. 4;
S. 67° 38' W., 256.95 feet to Corner No. 5;
S. 24° 13' W., 126.98 feet to Corner No. 6;
S. 60° 35' W., 1372.50 feet to Corner No. 7;
N. 38° 53' W., 291.90 feet to Corner No. 8;
S. 61° 48' W., 238.00 feet to Corner No. 9;
S. 85° 04' W., 307.28 feet to Corner No. 10;
N. 0° 00' E., 542.10 feet to Corner No. 11;
N. 73° 57' E., 708.97 feet to Corner No. 1; the place of beginning.

The area described contains approximately 23.76 acres in Kittitas County, Washington.

HAROLD A. BERENDS,
Chief, Branch of Lands and Minerals Operations.

[FR Doc.75-30244 Filed 11-10-75;8:45 am]

Geological Survey

[NTL-6]

FEDERAL AND INDIAN OIL AND GAS LEASES

Approval of Operations

Notice is hereby given that the Geological Survey proposes to formalize its procedures for approval of all applications for permits to conduct operational or construction activities on onshore Federal and Indian oil and gas leases. The proposed Notice also prescribes the information which a lessee or operator must submit in support of applications to conduct operations.

Interested parties may submit written comments, objections, and suggestions to the Chief, Conservation Division, U.S. Geological Survey, National Center, Mail Stop 650, 12201 Sunrise Valley Drive, Reston, Virginia 22092, on or before December 14, 1975.

It is hereby certified that the economic and inflationary impacts of proposed Notice to Lessees and Operators, NTL-6, have been carefully evaluated in accordance with OMB Circular A-107.

V. E. MCKELVEY,
Director.

NOTICE TO LESSEES AND OPERATORS OF FEDERAL AND INDIAN ONSHORE OIL AND GAS LEASES (NTL-6)

Pursuant to the National Environmental Policy Act of 1969 (83 Stat. 852), the Department of the Interior is charged with the responsibility of assuring that oil and gas operations on leased lands under its jurisdiction are conducted with due regard for the protection of the environment. Therefore, all operations which are conducted on onshore Federal and Indian oil and gas lease must conform to the requirements of this Notice as well as those contained in the lease and in the Oil and Gas Operating Regulations, Title 30 CFR Part 221.

I. GENERAL

In order that the environmental impact of proposed operations may be properly evaluated, all applications to conduct leasehold operations or construction activities must be accompanied by an appropriate surface use plan. As a minimum, such applications and surface use plans must provide a detailed description of the technical aspects of the proposed operation or activity, the magnitude of surface disturbance involved, and the procedures to be followed in rehabilitating the surface once the operation or construction activity has been completed. Specific requirements in this regard are set forth in Sections II(B), III, and V hereof. One copy of the surface use plan must be attached to each copy of the application to conduct operations or construction activities.

Applications to conduct operations or construction activities with attached surface use plans should be filed at least 30 days in advance of the contemplated starting date of any operation or construction activity in order to allow sufficient time in which to schedule and conduct, if necessary, a joint field inspection by appropriate personnel of the Geological Survey, the Federal surface management agency, the lessee or operator, and, if practical, the lessee's or operator's contractors and subcontractors who will perform the work. However, the early filing of an application is no guarantee that approval thereof will be granted within the 30-day period, as environmental considerations or current workload in the affected Federal agencies may result in further delay.

Lessees and operators have the responsibility to see that their exploration, development, production, and construction operations are conducted in a manner which (1) affords maximum safeguards for the environment; (2) results in the proper rehabilitation of disturbed lands; and, (3) assures the protection of the public health and safety. In that regard, lessees and operators will be held fully accountable for their contractors' and subcontractors' compliance with the applicable laws, regulations, and the requirements of the approved permit and surface use plan.

All approvals of proposed operations as well as subsequent instructions and regulation thereof will come from the District Engineer or Area Oil and Gas Supervisor of the Geological Survey. However, the Federal surface management agency will establish the rehabilitation requirements and will be available for consultation during rehabilitation

V 40 218 NOV 11 75 XUM

operations. Names, addresses, and phone numbers of appropriate personnel of the Geological Survey and the Federal surface management agency, as well as approved surface use areas, will be furnished the lessee or operator on its approved copy of the permit and surface use plan.

Lessees and operators, as well as their contractors and subcontractors, must not commence any operation or construction activity on a lease without the prior approval of the appropriate official of the Geological Survey. Likewise, the terms and conditions of an approved permit and surface use plan may not be altered unless the Geological Survey has approved an amended or supplemental permit and/or plan covering any such modifications. Approval of subsequent operations is addressed in Section V of this notice.

II. Drilling Operations

A. Preliminary environmental review

A preliminary environmental review will be required on all future drilling operations prior to entry on the ground for the purpose of staking the location, access roads, and other surface use areas. The lessee or operator, upon finalizing plans to drill but prior to the actual surveying, must file with the Geological Survey's District Engineer or Area Oil and Gas Supervisor and the appropriate office of the involved Federal surface management agency, a topographic map (or equivalent) of a scale not less than 1 inch=1 mile which shows the preferred location and the general topographic features in the area. This will permit the Federal surface management agency, prior to the lessee's or operator's expenditure of time and money for surveys, to review its records for any potential conflicts with other resource values. If conflicts are noted, a joint conference or field inspection, as appropriate, by the Geological Survey, the Federal surface management agency, and the operator may be scheduled to resolve problem areas.

B. Application for permit to drill

All drilling operations must be conducted in accordance with a permit or development plan which has the prior approval of the District Engineer or Area Oil and Gas Supervisor.

The permit or development plan filed for approval will consist of the application for permit to drill on Form 9–331C, and a multi-point surface use and operations plan. Where private surface is involved, it should also include a copy of the written agreement between the lessee or operator and the surface owner or a letter setting forth the rehabilitation requirements of the surface owner. The requirements for surface use and operations plans and the rehabilitation of private surface are contained in Sections III and VI, respectively, of this notice.

The application for permit to drill must provide information concerning (1) the location in feet and direction from the nearest lines of an established survey, as determined by a registered surveyor or engineer; (2) the elevation above sea level of the ground and derrick floor or rotary kelly bushing; (3) the geologic name of the surface formation; (4) the type of tools and other equipment to be utilized; (5) the proposed drilling depth; (6) the estimated tops of important geologic markers; (7) the estimated depths at which water, oil, gas, or other mineral deposits are expected to be encountered; (8) the proposed casing program including the size, grade, weight, and safety factors for collapse, tension, and burst of each string; (9) the proposed setting depth of each casing string and the amount and type of cement (including additives) and mud to be used; (10) the proposed pressure control equipment which is to be used and a schematic diagram thereof; (11) the type and characteristics of the proposed drilling medium or mediums to be employed; (12) the testing, logging, and coring programs to be followed; (13) any abnormal pressures or temperatures expected to be encountered or potential hazards such as hydrogen sulfide gas and plans for mitigating such hazards; (14) the anticipated starting date and duration of the operation; and, (15) any other facets of the proposed operation which are pertinent to the Geological Survey's consideration of the application. The District Engineer or Area Oil and Gas Supervisor may require additional information as warranted.

A copy of approved application for permit to drill and the accompanying surface use and operations plan shall be posted at the drillsite.

III. Multi-Point Surface Use and Operations Plan

A surface use and operations plan in sufficient detail to permit a complete appraisal of the environmental effects associated with the proposed project must be submitted, in triplicate, to the District Engineer or Area Oil and Gas Supervisor with the application for permit to drill.

The Geological Survey will send a copy of such plan to the Federal surface management agency. When possible, a preliminary field development plan or drilling schedule should also be submitted to allow lead time for evaluating environmental considerations, resource conflicts, and land use planning alternatives.

The plan shall in its context provide for and assure adequate protection of surface resources, other environmental components, and include adequate measures for reclamation of disturbed lands. The plan shall be developed in conformity with the provisions of the lease, attached stipulations, and the guidelines provided by this Notice. In developing the plan, the lessee or operator will make use of such information as is available from the Federal surface management agency concerning the surface resources, environmental considerations, and local reclamation procedures. The plan will be reviewed for adequatecy by the Geological Survey and the Federal surface management agency. Approval of proposed activities that would result in irreparable or extensive damage to the environment will be withheld until the plan is modified, additional mitigating measures are provided, or alternatives to the proposed action are agreed upon.

A. Guidelines for the preparation of surface use and operations plans

In the preparation of surface use and operations plans, lessees and operators should adhere closely to the following:

1. *Existing roads.* A legible map (USGS topographic or county road map of a scale not less than 1 inch=1 mile) shall be used for locating the proposed well site in relation to a town or other locatable reference point. The proposed route to the location including appropriate distances from the reference point to the point where the access route exits the highway or county road shall be shown. All proposed access roads shall be appropriately labeled or color coded. Additionally, all existing roads within a radius of three miles from the location of a proposed exploratory well should be shown. An exploratory well is a well which is located two miles or more from the boundary of a known geologic structure or a producible well. For all other drillsites (development wells) existing roads within a one-mile radius of the location should be shown.

Any plans for the improvement and/or maintenance of existing roads should also be stated.

Information required by item Nos. 3 and 4 of this subsection may also be shown on this map if appropriately labeled.

2. *Planned access roads.* Information in this regard is to be submitted on a large scale map (not less than 4 inches = 1 mile) and shall appropriately identify all permanent and temporary access roads that are to be constructed, or reconstructed in connection with the drilling and production of the proposed well. Width, maximum grade, turnouts, drainage design, location and size of culverts, and surfacing material, if any, shall be stated. At the time of submission, the location of all proposed new or reconstructed roads shall be staked. However, modification of proposed road design may be required after the location is accepted.

Information should also be furnished to indicate where existing fences will be cut and whether gates or cattleguards will be used. Additionally, the discussion should make reference to any existing gates which are to be replaced by cattleguards.

3. *Location of existing wells.* This information should be submitted on a map of suitable scale and include all wells (producing, abandoned, temporary abandoned, shut-in, injection, disposal, and drilling) within a two-mile radius of the proposed location of an exploratory well or within a one-mile radius of the proposed location of a development well.

4. *Lateral roads to well locations.* The information submitted in this regard should be shown on a map of suitable scale and include all existing and proposed lateral roads to all well locations within a one-mile radius of the proposed location.

5. *Location of tank batteries, production facilities, and production, gathering, and service lines.* Existing tank batteries, production facilities, and production, gathering, or service lines within a one-mile radius of the proposed location which are owned or controlled by the lessee or operator should be shown on a map or plat of suitable scale. The type of each present facility and the exact nature of each existing line (oil flowline, gas gathering line, injection line, or water disposal line) should be identified and it should be noted which, if any, of said lines are buried. If new facilities (tank battery, other production equipment, and lines) are contemplated in the event production is established and those facilities are to be located at other than on the well site itself, the map or plot furnished in this regard must also indicate the location all proposed new facilities. Future prospects for additional development of the leasehold should be considered in the siting of new facilities. However, final approval to construct such new facilities will not be granted until after detailed plans have been submitted and evaluated pursuant to Section V hereof.

6. *Location and type of water supply (rivers, creeks, lakes, ponds, and wells).* This information may be shown by quarter-quarter section on a plat or map of suitable scale or may be a written description. The source of all water to be used in drilling the proposed well should be noted. The method of transporting the water shall be stated and any access roads neded to haul the water will be described in items Nos. 1 or 2, as appropriate. However, the Survey's approval of the surface use and operations plan does not relieve the lessee or operator from obtaining any other authorization which may be required for the use of such water. Moreover, if a water supply well is to be drilled on the lease, it must be so stated under this item and the District Engineer or Area Oil and Gas Supervisor may require the filing of a separate application for permit to drill.

7. *Source of construction materials.* This information may be shown by quarter-quarter section on a plat or map of suitable scale or may be a written description. The proposed source, character, and use of all construction materials such as sand, gravel, stone, and soil material should be stated. Any access roads needed to haul such materials should be described in item Nos. 1 or 2, as appropriate.

8. *Methods for handling waste disposal.* A brief, written description should be given of the methods and location for safe containment and disposal of each type of waste material (cuttings, garbage, salts, chemicals, and sewage) which results from the drilling of the proposed well. Likewise, the narrative should include plans for the eventual disposal of drilling fluids and any produced oil or water recovered during testing operations.

9. *Ancillary facilities.* The plan or subsequent amendments to such plans shall identify all ancillary facilities such as camps and airstrips as to their location, land area required, and the methods and standards to be employed in their construction. Such facilities shall be shown on a map of suitable scale and shall be staked on the ground.

10. *Well site layout.* A plat of suitable scale (not less than 1 inch=50 feet) including cross section diagrams of the drill pad and the relation to topography are required. The plat should also include the proposed location of the mud tanks, pits (reserve, burn, and trash), pipe racks, access road, turnaround areas, parking areas, living facilities, soil material stockpile, and the orientation of the rig with respect to the pad and other facilities. Plans to line the reserve pit should be indicated.

The exterior dimensions of the pad and reserve pit shall be specified and will be staked on the ground.

11. *Plans for restoration of the surface.* State the proposed program for surface restoration upon completion of the operation such as stockpiling topsoil, leveling, reseeding, and seed mixture. Such plans will be reviewed for adequacy by the appropriate Federal surface management agency. A proposed timetable for the commencement and completion of rehabilitation operations must be provided.

12. *Other information.* Include a general description of the topography, soil characteristics, formation lithologies, geologic features, flora, fauna, and other aspects of the area such as other surface use activities.

The surface ownership (Federal, Indian, State, or private) at the well location and for all lands which are to be crossed by newly constructed roads should be indicated.

Any available information which would be useful in evaluating the environmental impact of the proposed operation, including proximity to steep hillsides and gullies, water wells, ponds, lakes, or streams, occupied dwellings, or other facilities, and archeological, historical, or cultural sites should be included. Information concerning required cuts and fills during the construction of roads and the location should also be furnished.

All construction practices necessary to accommodate potential geologic hazards should be discussed under the appropriate items of the plan.

13. *Lessee's or operator's representative.* Include the name, address, and phone number of the lessee's or operator's field representative who is responsible for assuring compliance with the approved surface use and operations plan.

14. *Certification.* The following statement is to be incorporated in the plan and must be signed by the lessee's or operator's field representative who is identified in item No. 13 of the plan:

I hereby certify that I, or persons under my direct supervision, have inspected the proposed drillsite and access route; that I am familiar with the conditions which presently exist; that the statements made in this plan are, to the best of my knowledge, true and correct; and, that the work associated with the operations proposed herein will be performed by _____ and its contractors subcontractors in conformity with this plan and the terms and conditions under which it is approved.

_____
Date

_____
Name and Title

IV. Environmental Analysis Requirements

When an application for permit to drill is received, an onsite inspection normally will be required. If made, it will include the District Engineer or Area Oil and Gas Supervisor, the lessee or operator, the Federal surface management agency, and others including the dirt contractor, as appropriate. The purpose of tihs inspection will be to select the most feasible and environmentally acceptable areas for well sites (considering geologic factors and Federal and State regulations), access roads and other proposed surface use areas. Accordingly, lessees and operators are encouraged to designate future development or drilling sites so that several locations may be inspected at one time.

When such an inspection is made, an environmental analysis will usually be prepared by the District Engineer or Area Oil and Gas Supervisor. Said analysis will identify methods for mitigating the potential adverse environmental effects associated with the proposed operation and will be the basis of the approving official's determination as to whether approval of the proposed activity would constitute a major Federal action significantly affecting the quality of the human environment as defined by Section 102(2)(C) of the National Environmental Policy Act of 1969. Any surface protection and rehabilitation requirements specified by the Federal surface management agency will normally be made a part of any subsequently approved permit or and/or the surface use and operations plan.

Due to the probability of a required onsite inspection, the required input from other Federal agencies, and the variations in the level of drilling activity, lessees and operators are encouraged to file applications well in advance of the time when it is desired to commence operations.

V. Approval of Subsequent Operations

Before repairing, deepening, or conditioning a well, a detailed written statement of the plan of work must be filed on Form 9–331 or 9–331C with the District Engineer or Area Oil and Gas Supervisor and approval obtained before the work is started. Any proposed change in any such plan of work must also receive the prior approval of the District Engineer or Area Oil and Gas Supervisor.

Lessees and operators are also required to submit for the approval of the District Engineer or Area Oil and Gas Supervisor

V 40 218 NOV 11 75 XUM

a suitable plan prior to undertaking any subsequent new construction, reconstruction, or alteration of existing facilities, including roads, dams, lines or other production facilities on any lease when additional surface disturbance will result. Sufficient information must be submitted to permit a proper evaluation of the proposed surface disturbing activities as well as any planned accommodations necessary to mitigate potential adverse environmental effects.

The environmental analysis procedures discussed in Section IV of this Notice will also apply to such subsequent operations which have the potential for significant surface disturbance although these requirements may be somewhat less in established producing areas.

VI. AGREEMENT FOR REHABILITATION OF PRIVATELY-OWNED SURFACE

Where the surface is privately owned or is owned by an Indian allottee, each application for permit to drill or to conduct other surface disturbance activities, shall contain information concerning the surface owner's rehabilitation requirements. A written agreement between the lessee or operator and the surface owner is not necessary if a letter from the lessee or the operator setting forth the surface owner's rehabilitation requirements is furnished. Payment of damages in lieu of full restoration will not be an acceptable substitute for a normal cleanup and rehabilitation program.

If no arrangements have been made, or if information concerning such arrangements is not furnished, the District Engineer or Area Oil and Gas Supervisor will request the Federal surface management agency to recommend the necessary surface restoration requirements. In such cases, the lessee or operator will be expected to comply with these rehabilitation requirements, if any, regardless of the arrangement made with the surface owner. Provided, however, that subsequent reasonable requests by the surface owner that pits, roads, and other facilities be left intact may be honored. If written proof of prior arrangements has been provided, the Federal surface management agency will be asked to recommend surface rehabilitation requirements to the District Engineer or Area Oil and Gas Supervisor giving full consideration to the preferences of the landowner.

VI. WELL ABANDONMENT

No well abandonment operations may be commenced in the absence of the prior approval of the District Engineer or Area Oil and Gas Supervisor. However, the Federal surface management agency may request additional surface rehabilitation measures at abandonment and these requirements are normally made a part of the Geological Survey's approval of abandonment. Upon completion of the abandonment and rehabilitation operations, the lessee or operator should notify the District Engineer or Area Oil and Gas Supervisor that the location is ready for inspection. However, final abandonment will not be approved until the surface rehabilitation work required by the drilling permit or abandonment notice has been completed and the required vegetation is established to the satisfaction of the appropriate Federal surface management agency.

VII. WATER WELL CONVERSION

The complete abandonment of a well which has encountered usable fresh water will not be approved if the Federal surface management agency determines it wants to acquire the well. If, at abandonment, the Federal surface management agency elects to assume further responsibility for the well, it will reimburse the lessee or operator for the cost of any recoverable casing left in the hole solely because it is to be completed as a water well. The lessee or operator will abandon the well to the base of the deepest fresh water zone of interest as required by the District Engineer or Area Oil and Gas Supervisor and will complete the surface cleanup and rehabilitation as required by the drilling permit or abandonment notice immediately upon completion of the conversion operations.

National Park Service

BOSTON NATIONAL HISTORICAL PARK ADVISORY COMMISSION

Notice of Meeting

Notice is hereby given in accordance with the Federal Advisory Committee Act, Public Law 92-463, that a meeting of the Boston National Historical Park Advisory Commission will be held at 10:00 a.m. on December 8, 1975, at the North Atlantic Regional Office, Room 715, 150 Causeway Street, Boston, Massachusetts.

The Commission was established by Public Law 93-431 to advise the Secretary of the Interior on matters relating to the development of the Boston National Historical Park.

The members of the Advisory Commission are as follows:

Mr. Richard A. Berenson, Chairman, Brookline, Massachusetts.
Dr. Evelyn Murphy, Lexington, Massachusetts.
Mr. Byron D. Rushing, Boston, Massachusetts.
Mrs. Katherine D. Kane, Boston, Massachusetts.
Mr. Maurice F. O'Shea, Charlestown, Massachusetts.
Mr. Guy A. Beninati, Boston, Massachusetts.

The matters to be discussed at this meeting include:

1. The role of National Parke Service advisory commissions.
2. The organization of the Commission.
3. Status of funding.
4. Status of park administration and operations.
5. Status of cooperative agreement.
6. A review of alternative plans for the management, development and use of the resources included within the Boston National Historical Park.

The meeting will be open to the public. However, facilities and space are limited, and it is expected that not more than 25 persons will be able to attend the sessions. Any member of the public may file with the committee a written statement concerning the matters to be discussed.

Persons wishing further information concerning this meeting, or who wish to submit written statements, may contact Hugh D. Gurney, Project Manager, Boston National Historical Park at 617-223-3777. Minutes of the meeting will be available for public inspection four weeks after the meeting at the office of the North Atlantic Region, 150 Causeway Street, Boston, Massachusetts.

Dated: October 23, 1975.

JERRY D. WAGERS,
Regional Director.

[FR Doc. 75-30370 Filed 11-10-75; 8:45 am]

NORTH ATLANTIC REGION ADVISORY COMMISSION

Notice of Meeting

Notice is hereby given in accordance with the Federal Advisory Committee Act, that a meeting of the North Atlantic Region Advisory Commission will be held at 9 a.m., e.d.t. on December 4, 1975 through 4:30 p.m. on December 5, 1975, at Minute Man National Historical Park, Lexington, Massachusetts.

The purpose of the Commission is to provide for the free exchange of ideas between the National Park Service and the public, and to facilitate the solicitation of advice or other council from members of the public on problems and programs pertinent to the North Atlantic Region.

The members of the Commission are as follows:

Mr. John N. Cole,
Brunswick, Maine.
Ms. Antoinette F. Downing,
Providence, Rhode Island.
Mrs. Arthur Fenske,
Green Village, New Jersey.
Mr. Charles H. W. Foster,
Needham, Massachusetts.
Mr. George T. Hamilton, Dover, New Hampshire.
M. John P. Keith, Hartsdale, New York.
Mr. Frederick R. Micha, Ontario, New York.
Mr. William A. Niering, Gales Ferry, Connecticut.
Mr. William B. Pinney, Charlotte, Vermont.

The purpose of this meeting is as follows:

1. Briefing by the North Atlantic Regional Director on current events in the Region.
2. Discuss and prepare final report of Springfield Armory visit.
3. Receive and discuss report of Acadia National Park visit.
4. The final discussion of Urban Park and Recreation.
5. Discussion of National Park Service Planning Procedure.

The meeting will be open to the public. However, facilities and space for accommodating members of the public are limited, and persons will be accommodated on a first come, first served basis. There will be a tour of Minute Man National Historical Park beginning at the Sheraton Lexington, Concord at 9 AM, December 4, 1975 and ending at 12 noon at the Buttrick Mansion. There will be limited room on the chartered bus, so places cannot be guaranteed for the general public, but they are welcome to accompany the tour in their own transportation.

The formal meeting will begin at 1:30 p.m., December 4, 1975, at the Sheraton Lexington Inn in Concord, Massachusetts in the Colonial Room.

Any member of the public may file with the Commission a written statement concerning the matters to be discussed.

Minutes of the meeting will be available for public inspection four weeks after the meeting at the North Atlantic Regional Office, National Park Service, 150 Causeway Street, Boston, Massachusetts, 02114 at area code (617) 223-3763.

Dated: October 23, 1975.

JERRY D. WAGERS,
Regional Director,
North Atlantic Region.

[FR Doc.75-30369 Filed 11-10-75;8:45 am]

DEPARTMENT OF AGRICULTURE

Forest Service

OZARK-ST. FRANCIS NFS, ARK.

Vegetation Management With Herbicides; Availability of Final Environmental Statement

Pursuant to Section 102(2)(C) of the National Environmental Policy Act of 1969, the Forest Service, Department of Agriculture, has prepared a final environmental statement for Vegetation Management with Herbicides on the Ozark-St. Francis Naitonal Forests in Arkansas, USDA-FS-R8-FES-ADM-75-18.

The environmental statement concerns the use of herbicides (primarily 2, 4-D; 2, 4, 5-T; Silvex, and Picloram) for temporary reduction and control of target plant species on approximately 18-22,000 acres per year. The proposed action will increase the productivity yield and quality of the forests' timber, range, wildilfe and resources.

The final environmental statement was transmitted to CEQ on October 31, 1975.

Copies are available for inspection during regular working hours at the following locations:

USDA, Forest Service, South Agriculture Bldg., Rm. 3230, 12th St. & Independence Ave., SW., Washington, DC 20250.
USDA, Forest Service, 1720 Peachtree Rd., NW, Rm. 804, Atlanta, GA 30309.
USDA, Forest Service, Forest Supervisor, Ozark-St. Francis NFs, P.O. Box 1008, Russellville, Arkansas 72801.

A limited number of single copies are available upon request to Larry Hanson, Forest Supervisor, Ozark-St. Francis NFs, Box 1008, Russellville, Arkansas 72801.

Dated: October 31, 1975.

THOMAS W. SEARS,
Acting Regional,
Environmental Coordinator.

[FR Doc.75-30333 Filed 11-10-75;8:45 am]

WALLOWA VALLEY PLANNING UNIT

Availability of Final Environmental Statement

Pursuant to Section 102(2)(C) of the National Environmental Policy Act of 1969, the Forest Service, Department of Agriculture, has prepared a final environmental statement for the Wallowa Valley Planning Unit, Wallowa-Whitman National Forest, Oregon. USDA-FS-R6-FES-(Adm)-75-17.

This environmental statement concerns a proposed resource allocation.

This final environmental statement was transmitted to CEQ on November 3, 1975.

Copies are available for inspection during regular working hours at the following locations:

USDA, Forest Service, South Agriculture Bldg., Room 3230, 12th St. and Independence Ave., SW., Washington, D.C. 20250.
USDA, Forest Service, Pacific Northwest Region, 319 SW Pine Street, Portland, Oregon 97204.
Wallowa-Whitman National-Forest, Federal Building, Baker, Oregon 97814.

A limited number of single copies are available upon request to Forest Supervisor A. G. Oard, Wallowa-Whitman National Forest, Federal Building, Baker, Oregon 97814.

Copies of the environmental statement have been sent to various Federal, State and local agencies as outlined in the CEQ guidelines.

CURTIS L. SWANSON,
Regional Environmental Coordinator, Planning, Programing and Budgeting.

NOVEMBER 3, 1975.

[FR Doc.75-30334 Filed 11-10-75;8:45 am]

BLACK PINE PLANNING UNIT

Notice of Availability of Final Environmental Statement

Pursuant to Section 102(2)(C) of the National Environmental Policy Act of 1969, the Forest Service, Department of Agriculture, has prepared a final environmental statement for the Black Pine Planning Unit, Sawtooth National Forest, Idaho. The Forest Service report number is USDA-FS—FES (Adm) R4-75-20.

The environmental statement identifies and evaluates the probable effects of the land use plan for the Black Pine Planning Unit on the Sawtooth National Forest. Idaho. The purpose of the plan is to allocate National Forest lands within the unit to specific resource uses and activities; establish management objectives; document management direction, management decisions, and necessary coordination between resource uses and activities; and provide for the protection, use and development of the various resources within the planning unit. The plan provides for minimization of adverse effects and maximization of desirable effects. Significant areas will remain undeveloped with options for future management remaining open.

This final environmental statement was transmitted to CEQ on November 3, 1975.

Copies are available for inspection during regular working hours at the following locations:

USDA, Forest Service, South Agriculture Bldg., Room 3230, 12th St. and Independence Ave., SW., Washington, D.C. 20250.
Regional Planning Office, USDA, Forest Service, Federal Building, Room 4403, 324-25th Street, Ogden, Utah 84401.
Forest Supervisor, Sawtooth National Forest. 1525 Addison Avenue East, Twin Falls, Idaho 83301.
District Forest Ranger, Burley Ranger District, P.O. Box 430, Burley, Idaho 83318.

A limited number of single copies are available upon request to Forest Supervisor E. A. Fournier, Sawtooth National Forest, 1525 Addison Avenue East, Twin Falls, Idaho 83301.

Copies of the environmental statement have been sent to various Federal, State, and local agencies as outlined in the CEQ Guidelines.

Dated: November 3, 1975.

P. M. REES,
Director, Regional Planning and Budget.

[FR Doc.75-30234 Filed 11-10-75;8:45 am]

WHITE MOUNTAIN NATIONAL FOREST ADVISORY COMMITTEE

Notice of Meeting

The White Mountain National Forest Advisory Committee will meet December 3 and 4, 1975, at the Country Fare Inn, Moultonboro, New Hampshire.

The purpose of this meeting is to discuss planning and management proposals for the White Mountain National Forest.

The meeting will be open to the public. Persons who wish to attend should notify Ned Therrien, U.S. Forest Service, Laconia, New Hampshire 03246. Telephone number 603-524-6450.

PAUL D. WEINGART,
Forest Supervisor.

NOVEMBER 3, 1975.

Soil Conservation Service

NORWALK RIVER WATERSHED PROJECT, CONN.

Notice of Availability of Draft Environmental Impact Statement

Pursuant to Section 102(2)(C) of the National Environmental Policy Act of 1969; Part 1500 of the Council on Environmental Quality Guidelines (38 FR 20550, August 1, 1973); and Part 650 of the Soil Conservation Service Guidelines (39 FR 19650, June 3, 1974); the Soil Conservation Service, U.S. Department

V 40 I 218 NOV 11 75 XUM

of Agriculture, has prepared a draft environmental impact statement for the Norwalk River Watershed Project, Fairfield County, Connecticut, USDA–SCS–EIS–WS–(ADM)–76–2–D–CT.

The environmental impact statement concerns a plan for watershed protection, flood prevention, and wildlife. The planned works of improvement include conservation land treatment, supplemented by channel work and four water control structures with two pool areas improved for wildlife (one area is within the pool of a structure already constructed). The channel work will involve the enlargement of 11,125 feet of existing channel.

A limited supply of copies is available at the following location to fill single copy requests: Soil Conservation Service, USDA, Mansfield Professional Park, Storrs, Connecticut 06268.

Norwalk River Watershed Project, Connecticut, Notice of Availability of Draft Environmental Impact Statement

Copies of the draft environmental impact statement have been sent for comment to various federal, state, and local agencies as outlined in the Council on Environmental Quality Guidelines. Comments are also invited from others having knowledge or of special expertise on environmental impacts.

Comments concerning the proposed action or requests for additional information should be addressed to Robert G. Halstead, State Conservationist, Soil Conservation Service, Mansfield Professional Park, Storrs, Connecticut 06268.

Comments must be received on or before December 26, 1975, in order to be considered in the preparation of the final environmental impact statement.

(Catalog of Federal Domestic Assistance Program No. 10.904, National Archives Reference Services.)

Dated: October 31, 1975.

JOSEPH W. HAAS,
Deputy Administrator for Water Resources, Soil Conservation Service.

DEPARTMENT OF COMMERCE

Domestic and International Business Administration

NATIONAL CANCER INSTITUTE

Decision on Application for Duty-Free Entry of Scientific Article

The following is a decision on an application for duty-free entry of a scientific article pursuant to Section 6(c) of the Educational, Scientific, and Cultural Materials Importation Act of 1966 (Public Law 89–651, 80 Stat. 897) and the regulations issued thereunder as amended (40 FR 12253 et seq., 15 CFR 701, 1975).

A copy of the record pertaining to this decision is available for public review during ordinary business hours of the Department of Commerce, at the Office of Import Programs, Department of Commerce, Washington, D.C. 20230.

Docket Number: 76–00015–33–46040. Applicant: National Cancer Institute, Baltimore Cancer Research Ctr., 3100 Wyman Park Drive, Baltimore, Maryland 21211. Article: Electron Microscope, JEM 100C. Manufacturer: JOEL Ltd., Japan. Intended use of article: The article is intended to be used in a research capacity in studies of subcellular aspects of differentiation, neoplastic transformation of hematopoietic cells and the response of malignant and normal cells to chemotherapeutic agents. Etiologic factors of human hematopoietic dyscrasias and animal model systems of such diseases are also under investigation. Of particular importance is the search for and identification of virus like structures in human material. The article will also be used to study structural alterations in cellular components such as nucleic acid malformations, subcellular particle alterations and changes in tissue organization by pharmacologic agents or appearing in the natural course of a disease.

Comments: No comments have been received with respect to this application. Decision: Application approved. No instrument or apparatus of equivalent scientific value to the foreign article, for such purposes as this article is intended to be used, was being manufactured in the United States at the time the foreign article was ordered (April 8, 1975). Reasons: The foreign article has a specified resolving capability of 3 Angstroms (Å). The most closely comparable domestic instrument is the Model EMU–4C supplied by the Adam David Company. The Model EMU–4C has a specified resolving capability of 5Å. Resolving capability bears an inverse relationship to its numerical rating in A, i.e., the lower the rating, the better the resolving capability. We are advised by the Department of Health, Education, and Welfare (HEW) in its memorandum dated October 17, 1975 that the best resolution available is pertinent to the purposes for which the article is intended to be used. HEW further advises that domestic instruments did not provide resolution equivalent to that of the foreign article at the time the foreign article was ordered. We, therefore, find that the EMU–4C was not of equivalent scientific value to the foreign article for such purposes as this article is intended to be used at the time the foreign article was ordered.

The Department of Commerce knows of no other instrument or apparatus of equivalent scientific value to the foreign article, for such purposes as this article is intended to be used, which was being manufactured in the United States at the time the article was ordered.

PURDUE UNIVERSITY

Decision on Application for Duty-Free Entry of Scientific Article

The following is a decision on an application for duty-free entry of a scientific article pursuant to Section 6(c) of the Educational, Scientific, and Cultural Materials Importation Act of 1966 (Public Law 89–651, 80 Stat. 897) and the regulations issued thereunder as amended (40 FR 12253 et seq, 15 CFR 701, 1975).

A copy of the record pertaining to this decision is available for public review during ordinary business hours of the Department of Commerce, at the Office of Import Programs, Department of Commerce, Washington, D.C. 20230.

Docket Number: 76–00017–33–90000. Applicant: Purdue University, ADMS Building, West Lafayette, IN 47907. Article: Rotating X-ray generator, Model GX20 3.5". Manufacturer: AEI Scientific Apparatus, United Kingdom. Intended use of Article: The article is intended to be used as a high intensity fine focus X-ray source for the investigation of the crystal and molecular structure of small spherical RNA viruses.

Comments: No comments have been received with respect to this application. Decision: Application approved. No instrument or apparatus of equivalent scientific value to the foreign article, for such purposes as this article is intended to be used, is being manufactured in the United States. Reasons: The foreign article provides a focused spot of minimal size (0.1 x 0.1 mm) and rotating target for maximum x-ray beam intensity. The Department of Health, Education, and Welfare (HEW) advised in its memorandum dated October 17, 1975 that the capabilities described above are pertinent to the purposes for which the article is intended to be used. HEW also advised that it knows of no domestic instrument of equivalent scientific value to the foreign article for such purposes as the article is intended to be used.

The Department of Commerce knows of no other instrument or apparatus of equivalent scientific value to the foreign article, for such purposes as this article is intended to be used, which is being manufactured in the United States.

UNIVERSITY OF WASHINGTON, ET AL.

Applications for Duty-Free Entry of Scientific Articles

The following are notices of the receipt of applications for duty-free entry of scientific articles pursuant to Section 6(c) of the Educational, Scientific, and Cultural Materials Importation Act of 1966 (Public Law 89–651; 80 Stat. 897). Interested persons may present their views with respect to the question of whether an instrument or apparatus of equivalent scientific value for the purposes for which the article is intended to be used is being manufactured in the United States. Such comments must be filed in triplicate with the Director, Special Import Programs Division, Office of Import Programs, Washington, D.C. 20230, on or before December 1, 1975.

Amended regulations issued under cited Act (40 FR 12253 et seq, 15 CFR 701, 1975) prescribe the requirements applicable to comments.

A copy of each application is on file, and may be examined during ordinary Commerce Department business hours at the Special Import Programs Division, Department of Commerce, Washington, D.C. 20230.

Docket Number: 76–00159–56–17500. Applicant: University of Washington, Department of Oceanography WB–10, Seattle, Washington 98195. Article: Recording Current Meter, Model 4. Manufacturer: Iva Aanderaa, Norway. Intended use of article: The article is intended to be used for studies of time dependent velocity, temperature, conductivity fields in the Pacific Northwest coastal and estuarine waters. Application received by Commissioner of Customs: October 9, 1975.

Docket Number: 76–00168–85–40600. Applicant: University of Georgia, Department of Geology, Athens, Georgia 30601. Article: Isotope Radio Mass Spectrometer, Model 602C and accessories. Manufacturer: V. G. Micromass, United Kingdom. Intended use of article: The article is intended to be used for the following projects:

(1) Examination of the influence of surface meteoric waters upon subsurface volcanic processes. This feature will be studied through analyses of the $^{18}O/^{16}O$ in rocks and minerals from samples obtained from various localities in Antarctica.

(2) Measurement of $^{18}O/^{16}O$ variations of rocks and minerals for the purpose of ascertaining temperatures attained within major thrust sheets of the northern and central Rocky Mountains.

(3) Examination of $^{18}O/^{16}O$ variations of foraminifera from deep sea cores obtained from the Caribbean Sea. These analyses will be utilized for the purposes of obtaining stratigraphic correlation with already analyzed cores at different localities, and

(4) Examinations of $^{18}O/^{16}O$ $^{13}C/^{12}C$ variations from rocks and minerals related to the iron ore deposits of S. E. Missouri. This study will be conducted for the purpose of obtaining information about the source of waters and the temperatures involved in deposit of these ore bodies.

The article will also be used as an educational tool for students in geology and in other scientific fields such as archeology, chemistry and biology. Application received by Commissioner of Customs: October 16, 1975.

Docket Number: 76–00169–33–46500. Applicant: The University of Texas Health Science Center at San Antonio, Dept. of Anatomy, 7703 Floyd Curl Drive, San Antonio, Texas 78284. Article: Ultramicrotome, Model Om U3 with AO Stereoscopic Microscope. Manufacturer: C. Reichert Optische Werke AG, Austria. Intended use of article: The article is intended to be used for studies of biological specimens of placental tissue from several primate species including human. Studies will be performed to characterize the normal morphology of various primate species comparing one with the other and particularly with the human, and to attempt to correlate differences in structure with abnormal conditions. The article will also be used in the course, "Techniques for Electron Microscopy" to give students an understanding of the principles of histologic technique for electron microscopy and practical experience in actually accomplishing the procedures necessary to produce material for study with the electron microscope. Application received by Commissioner of Customs: October 16, 1975.

Docket Number: 76–00170–33–46500. Applicant: Mount Desert Island Biological Laboratory, Salsbury Cove, Maine 04672. Article: Ultramicrotome, Model LKB 8800A. Manufacturer: LKB Produkter AB, Sweden. Intended use of article: The article is intended to be used for studies of tissue from local marine, fresh water and terrestrial organisms (bony and cartilagenous fish, birds invertebrates, shell fish and hemichordates) and hamsters. Experiments will be conducted to determine ultrastructural and cytochemical properties of epithelial and endothelial tissues that transport ions, water and macromolecules. Application received by Commissioner of Customs: October 16, 1975.

Docket Number: 76–00171–33–46500. Applicant: University of Massachusetts, Mass. Agricultural Experiment Station, 217 Stockbridge Hall, Amherst, Mass. 01002. Article: Ultramicrotome, Model LKB 8800A. Manufacturer: LKB Produkter AB, Sweden. Intended use of article: The article is intended to be used for studies of biological materials, including plant and animal tissue, viruses and bacteria which exhibit both normal and pathologic structure. A variety of experiments will be conducted involving the structure and behavior of cells and tissues under normal and pathological conditions. The article will also be used for educational purposes in the courses:

(1) Plant Pathology-Plant Virology—concerned with the structure and properties of plant viruses; virus infection and synthesis; virus transmission; symptomatology and physiology of virus-infected plants; assay and purification of plant viruses; as well as identification and control of plant viruses, and

(2) Entomology—Insect Microbiology and Pathology—involving the diseases of insects including classification and biology of the pathogens involved. Application received by Commissioner of Customs: October 16, 1975.

Docket Number: 76–00172–33–19095. Applicant: The Wistar Institute, 36th Street at Spruce, Philadelphia, Pennsylvania 19104. Article: M–86 Combined Scanning Interferometer and Densitometer with accessories. Manufacturer: Vickers, Ltd., United Kingdom. Intended use of article: The article is intended to be used for investigating the involvement of cycling-noncycling cell transitions in a variety of disease processes, especially aging. Cytochemical and autoradiographic preparations of cultured cells as well as biopsy and autopsy material from humans are used in these studies. The article is also intended to be used for the training of predoctoral, postdoctoral, and resident medical students involved in a number of research projects to provide a basic understanding of the cytophotometer and its application to biomedical research. Application received by Commissioner of Customs: October 16, 1975.

Docket Number: 76–00173–00–75000. Applicant: Massachusetts Institute of Technology, Cambridge, Ma. 02139. Article: Cutter Drive Unit for Camkometer. Manufacturer: Cambridge Insitu, United Kingdom. Intended use of article: The article is an accessory to a Camkometer which will be used to measure in situ stresses in a soil mass by providing a means of inserting load cells into the soil with a minimum of disturbance. Application received by Commissioner of Customs: October 16, 1975.

Docket Number: 76–00174–33–90000. Applicant: Loma Linda University, P.O. Box 728, Loma Linda, CA 92354. Article: EMI Scanner System with Magnetic Tape System and Diagnostic Display Console, Data Transfer Module. Manufacturer: EMI Limited, United Kingdom. Intended use of article: The article is intended to be used for research in the following areas:

(1) Cerebro-vascular occlusive disease and cerebral blood flow.

(2) Acute head injuries.

(3) Early detection and treatment of head injuries.

(4) Application of the scanner to ENT Radiology, specifically the orbit and the ear.

The article will also be used in training programs for medical students, medical school faculty, radiology residents, neuroradiology fellows, and radiologic technologists. Application received by Commissioner of Customs: October 20, 1975.

Docket Number: 76–00175–75–40450. Applicant: University of Rochester, AEP, 400 Elmwood Avenue, Rochester, N.Y. 14642. Article: Doserate Meter-Integrator. Manufacturer: Electron Diamonds Ltd., United Kingdom. Intended use of article: The article is intended to be used for the determination of precise location of a struck irradiation source which is essential to avoid inadvertent damage to source encapsulation with consequent environmental contamination when attempting to achieve safe storage of the source. Application received by Commissioner of Customs: October 20, 1975.

Docket Number: 76–00176–35–46040. Applicant: University of Maryland—

V 40 N 218 NOV 11 75 XUM

School of Medicine, 660 W. Redwood Street, Baltimore, Maryland 21201. Article: Electron Microscope, Model JEM 100B. Manufacturer: JEOL, Japan. Intended use of article: The article is intended to be used to study histochemical changes in the lens epithelium after experimental production of cataracts. These include lysomes and enzymes identified by chemical reactions. The exact area in the cell where the enzyme occurs is particularly important to identify. The article will also be used for teaching medical students and Ophthalmology residents the technique of electron microscopy with applied histochemistry. Application received by Commissioner of Customs: October 20, 1975.

UNIVERSITY OF WASHINGTON, ET AL.

Consolidated Decision on Applications for Duty-Free Entry of Scientific Articles

The following is a consolidated decision on applications for duty-free entry of scientific articles pursuant to Section 6(c) of the Educational, Scientific, and Cultural Materials Importation Act of 1966 (Public Law 89-651, 80 Stat. 897) and the regulations issued thereunder as amended (40 F.R. 12253 et seq, 15 CFR 701, 1975.)

A copy of the record pertaining to each of the applications in this consolidated decision is available for public review during ordinary business hours of the Department of Commerce, at the Special Import Programs Division, Office of Import Programs, Department of Commerce, Washington, D.C. 20230.

Decision: Applications denied. Applicants have failed to establish that instruments or apparatus of equivalent scientific value to the foreign articles, for such purposes as the foreign articles are intended to be used, are not being manufactured in the United States.

Reasons: Section 301.8 of the Regulations provides in pertinent part:

> The applicant shall on or before the 20th day following the date of such notice, inform the Deputy Assistant Secretary whether it intends to resubmit another application for the same article for the same intended purposes to which the denied application relates. The applicant shall then resubmit the new application on or before the 90th day following the date of the notice of denial without prejudice to resubmission, unless an extension of time is granted by the Deputy Assistant Secretary in writing prior to the expiration of the 90 day period. * * * If the applicant fails, within the applicable time periods specified above, to either (a) inform the Deputy Assistant Secretary whether it intends to resubmit another application for the same article to which the denial without prejudice to resubmission relates, or (b) resubmit the new application, the prior denial without prejudice to resubmission shall have the effect of a final decision by the Deputy Assistant Secretary on the application within the context of § 301.11.

The meaning of the subsection is that should an applicant either fail to notify the Deputy Assistant Secretary of its intent to resubmit another application for the same article to which the denial without prejudice relates within the 20 day period, or fails to resubmit a new application within the 90 day period, the prior denial without prejudice to resubmission will have the effect of a final denial of the application.

None of the applicants to which this consolidated decision relates has satisfied the requirements set forth above, therefore, the prior denials without prejudice have the effect of a final decision denying their respective applications.

Section 301.8 further provides:

"* * * the Deputy Assistant Secretary shall transmit a summary of the prior denial without prejudice to resubmission to the FEDERAL REGISTER for publication, to the Commissioner of Customs, and to the applicant."

Each of the prior denials without prejudice to resubmission to which this consolidated decision relates was based on the failure of the respective applicants to submit the required documentation, including a completely executed application form, in sufficient detail to allow the issue of "scientific equivalency" to be determined by the Deputy Assistant Secretary.

Docket Number: 75-00321-56-17500. Applicant: University of Washington, Department of Oceanography, WB-10, Seattle, Washington 98195. Article: Recording Current Meter, Model 4. Date of denial without prejudice to resubmission: July 10, 1975.

Docket Number: 75-00301-33-77030. Applicant: Bowman Gray School of Medicine, 300 S. Hawthorne Road, Winston-Salem, N.C. 27103. Article: CPS Coherent NMR Spectrometer. Date of denial without prejudice to resubmission: July 18, 1975.

Docket Number: 75-00406-44-01100. Applicant: Tulane University School of Medicine, 1430 Tulane Avenue, New Orleans, Louisiana 70112. Article: Morgan Transfertest Model B with Associated Gas Analyzers. Date of denial without prejudice to resubmission: July 10, 1975.

Docket Number: 75-00426-33-90000. Applicant: The Johns Hopkins Hospital, 601 North Broadway, Baltimore, Maryland 21205. Article: EMI Scanner System with Magnetic Tape System and High Definition Display Units. Date of denial without prejudice to resubmission: July 18, 1975.

Docket Number: 75-00427-33-46040. Applicant: Veterans Administration Hospital, 4150 Clement Street, San Francisco, Calif. 94121. Article: Electron Microscope, Model EM 201S and accessories. Date of denial without prejudice to resubmission: July 18, 1975.

Docket Number: 75-00431-33-46040. Applicant: University of Nebraska—Lincoln, Dept. of Veterinary Science, College of Agriculture, Lincoln, Nebraska 68503. Article: Electron Microscope, Model EM 201C and accessories. Date of denial without prejudice to resubmission: July 18, 1975.

Docket Number: 75-00483-25-20700. Applicant: University of Rochester, Rochester, New York 14627. Article: Ultra-fast Photodiode with infrared (S-1) Photocathode Mounted with 50 OHM Output and high voltage connectors. Date of denial without prejudice to resubmission: July 10, 1975.

Docket Number: 75-00549-01-63550. Applicant: Medical University of South Carolina, 80 Barre Street, Charleston, S.C. 29401. Article: Polarimeter with Micro-observation Tube. Date of denial without prejudice to resubmission: July 10, 1975.

DEPARTMENT OF HEALTH, EDUCATION, AND WELFARE

Food and Drug Administration

[Docket No. 75N-0184]

CERTAIN DRUG PRODUCTS CONTAINING AN ANTICHOLINERGIC/ANTISPASMODIC IN COMBINATION WITH A SEDATIVE/TRANQUILIZER; ANTISPASMODIC DRUGS ALONE

Drugs for Human Use; Drug Efficacy Study Implementation; Permission for Drugs to Remain on the Market

A notice was published in the FEDERAL REGISTER of December 14, 1972 (37 FR 26623), informing manufacturers of prescription drugs for human use of the future schedule for implementation of the drug efficacy study. That notice listed certain drugs, together with the justification for their medical need, which may remain on the market pending completion of scientific studies to determine effectiveness, and provided for future additions to or deletions from that list. Other drug products are now being added to that list. The products being added have been widely used in medical practice in the treatment of gastrointestinal disorders. Although none of them have been conclusively proven effective, they are of sufficient medical importance to justify additional study. This notice states the conditions for their continued marketing.

In notices published in the FEDERAL REGISTER of October 21, 1970 (35 FR 16422; DESI 4681), June 18, 1971 (36 FR 11754; DESI 3265), June 22, 1971 (36 FR 11875; DESI 10837), July 27, 1972 (27 FR 15028; DESI 597), and September 18, 1973 (38 FR 26138; DESI 9489), the Commissioner of Food and Drugs announced his conclusions pursuant to evaluation of reports received from the National Academy of Sciences-National Research Council, Drug Efficacy Study Group concerning the following drug products. Other products included in those announcements, but not named herein, are not affected by this notice:

DESI 4681

1. Trasentine Phenobarbital Tablets containing adiphenine hydrochloride 50 mg and phenobarbital 20 mg; Ciba Pharmaceutical Co., 556 Morris Ave., Summit, NJ 07901 (NDA 4-681).

2. Prantal with Phenobarbital Tablets containing diphemanil methylsulfate 100 mg and phenobarbital 16 mg; Schering Corp., 1011 Morris Ave., Union, NJ 07083 (NDA 8-829).

DESI 3265

1. Bentyl Capsules containing dicyclomine hydrochloride 10 mg; Merrell-National Laboratories, Division of Richardson-Merrell, Inc., 110 E. Amity Rd., Cincinnati, OH 45215 (NDA 7-409).

2. Bentyl Injection containing dicyclomine hydrochloride 10 mg/cc; Merrell-National Laboratories (NDA 8-370).

3. Bentyl Syrup containing dicyclomine hydrochloride 10 mg; Merrell-National Laboratories (NDA 7-961).

4. Dactil Tablets containing piperidolate hydrochloride 50 mg; Lakeside Laboratories, Division of Colgate-Palmolive Co., 1707 E. North Ave., Milwaukee, WI 53201 (NDA 8-907).

5. Profenil Tablets containing alverine citrate 120 mg; Smith, Miller and Patch, Inc., 401 Joyce Kilmer Ave., New Brunswick, NJ 08902 (NDA 5-695).

6. Octin Tablets containing isometheptene mucate 2 grains and Octin Solution containing isometheptene hydrochloride 100 mg/cc; Knoll Pharmaceutical Co., 30 N. Jefferson Rd., Whippany, NJ 07981 (NDA 6-420).

7. Trocinate Tablets containing thiphenamil hydrochloride 100 mg; Wm. P. Poythress & Co., Inc., 16 N. 22d St., Richmond, VA 23261 (NDA 6-098).

DESI 10837

1. Daritran Tablets, containing oxyphencyclimine hydrochloride 5 mg and meprobamate 250 mg; Pfizer Laboratories, Division of Pfizer, Inc., 235 E 42d St., New York, NY 10017 (NDA 12-070).

2. Enarax 5 Tablets containing oxyphencyclimine hydrochloride 5 mg and hydroxyzine hydrochloride 25 mg; and Enarax 10 Tablets containing oxyphencyclimine hydrochloride 10 mg and hydroxyzine hydrochloride 25 mg; J. B. Roerig & Co., Division of Pfizer, Inc., (NDA 11-784).

3. Milpath-200 Tablets containing meprobamate 200 mg and tridihexethyl chloride 25 mg; and Milpath-400 Tablets, containing meprobamate 400 mg and tridihexethyl chloride 25 mg; Wallace Laboratories, Division of Carter-Wallace, Inc., Half Acre Rd., Cranbury, NJ 08512 (NDA 11-043).

4. Pathibamate-200 Tablets containing tridihexethyl chloride 25 mg and meprobamate 200 mg; and Pathibamate-400 Tablets, containing tridihexethyl chloride 25 mg and meprobamate 400 mg; Lederle Laboratories Division, American Cyanamid Co., Pearl River, NY 10965 (NDA 10-837).

DESI 597

1. Bentyl Syrup with Phenobarbital containing dicyclomine hydrochloride 10 mg/5 cc and phenobarbital 15 mg/5 cc; Merrell-National Laboratories (NDA 7-961).

2. Bentyl with Phenobarbital Capsules containing dicyclomine hydrochloride 10 mg and phenobarbital 15 mg; Merrell-National Laboratories (NDA 7-409).

3. Dactil with Phenobarbital Tablets containing piperidolate hydrochloride 50 mg and phenobarbital 16 mg; Lakeside Laboratories, Inc. (NDA 8-907).

4. Antrenyl-Phenobarbital Tablets containing oxyphenomium bromide 5 mg and phenobarbital 15 mg; Ciba Pharmaceutical Co., Division of Ciba-Geigy Corp., 556 Morris Ave., Summit, NJ 07901 (NDA 8-492).

5. Robinul-PH Tablets containing glycopyrrolate 1 mg and phenobarbital 16 mg; and Robinul-PH Forte Tablets containing glycopyrrolate 2 mg and phenobarbital 16 mg; A. H. Robins Co., 1407 Cummings Dr., Richmond, VA 23220 (NDA 12-950).

6. Piptal-PHB Tablets containing pipenzolate bromide 5 mg and phenobarbital 16 mg; and Piptal-PHB Elixir containing pipenzolate bromide 5 mg/5 cc and phenobarbital 16 mg/5 cc; Lakeside Laboratories, Inc. (NDA 9-427).

7. Tricolold and Phenobarbital Tablets containing tricyclamol chloride 50 mg and phenobarbital 16 mg; Burroughs Wellcome & Co., Inc., 3030 Cornwallis Rd., Research Triangle Park, NC 27709 (NDA 8-910).

8. That part of NDA 8-919 pertaining to Co-Elorine 100 Pulvules containing tricyclamol chloride 100 mg and amobarbital 16 mg; Eli Lilly and Co., P.O. Box 618, Indianapolis, IN 46206.

9. Nactisol Tablets containing poldine methylsulfate 4 mg and sodium butabarbital 15 mg; McNeil Laboratories, Inc., Camp Hill Rd., Fort Washington, PA 19034 (NDA 12-741).

10. Centrine Tablets with Phenobarbital containing aminopentamide sulfate 0.5 mg and phenobarbital 15 mg; Bristol Laboratories, Division of Bristol-Myers Co., Thompson Rd., P.O. Box 657, Syracuse, NY 13201 (NDA 9-288).

11. Centrine Elixir with Phenobarbital containing aminopentamide sulfate 0.5 mg/5 cc and phenobarbital 20 mg/5 cc; Bristol Laboratories, (NDA 8-885).

12. Profenil Phenobarbital Tablets containing alverine citrate 120 mg and phenobarbital 15 mg; Smith, Miller and Patch, Inc., (NDA 6-471).

13. Cantil with Phenobarbital Tablets containing mepenzolate bromide 25 mg and phenobarbital 16 mg, Lakeside Laboratories, Inc., (NDA 10-679).

14. Banthine with Phenobarbital Tablets containing methantheline bromide 50 mg and phenobarbital 15 mg; G. D. Searle & Co., P.O. Box 5110, Chicago, IL 60680 (NDA 7-390).

15. That part of NDA 8-942 pertaining to Pamine PB Tablets containing methscopolamine bromide 2.5 mg and phenobarbital 15 mg; The Upjohn Co., 7171 Portage Rd., Kalamazoo, MI 49002.

16. Daricon PB Tablets containing oxyphencyclimine hydrochloride 5 mg and phenobarbital 15 mg; Pfizer Laboratories (NDA 13-515).

17. Tral with Phenobarbital Tablets containing hexocyclium methylsulfate 25 mg and phenobarbital 15 mg; Abbott Laboratories, 14th and Sheridan Rd., N. Chicago, IL 60064 (NDA 10-599).

18. Pro-Banthine with Phenobarbital Tablets containing propantheline bromide 15 mg and phenobarbital 15 mg; G. D. Searle & Co. (NDA 9-014).

19. Probital Tablets, containing propantheline bromide 7.5 mg and phenobarbital 15 mg (G. D. Searle) was also referred to in the notice of July 27, 1972. That product was not included in the approved NDA but is affected by the conclusions in this notice as a related drug.

20. Monomeb Tablets containing penthienate bromide 5 mg and mephobarbital 32 mg; Winthrop Laboratories, 90 Park Ave., New York, NY 10016 (NDA 9-032).

21. Trocinate with Phenobarbital Tablets containing thiphenamil hydrochloride 100 mg and phenobarbital 16 mg; Wm. P. Poythress & Co., Inc., (NDA 6-098).

22. Metropine with Phenobarbital Tablets containing methylatropine nitrate 1 mg and phenobarbital 15 mg; Pennwalt Prescription Products Division, 755 Jefferson Rd., Rochester, NY 14623 (NDA 4-298).

23. Phenobarbital and Atropine Tablets containing atropine sulfate 1/6504 grain and phenobarbital ¼ grain; The Vale Chemical Co., Inc., 1201 Liberty St., Allentown, PA 18102 (NDA 0-597).

DESI 9489

Pathilon with Phenobarbital Tablets, containing tridihexethyl chloride 25 mg and phenobarbital 15 mg; Lederle Laboratories (NDA 9-489). This product was not reviewed by the Academy.

The following drug products are subjects of NDA's but were not reviewed by the Academy and have not been the subject of a previous DESI notice. Some are subjects of abbreviated NDA's submitted pursuant to a DESI notice. All are affected by this notice.

1. Librax Capsule, containing clidinium bromide 2.5 mg and chlordiazepoxide 5 mg; Roche Laboratories, Division of Hoffmann-LaRoche, Inc., Nutley, NJ 07110 (NDA 12-750). The new drug application was approved prior to 1962. However, approval of the NDA was withdrawn January 26, 1966 (31 FR 1015), following the occurrence of accentuated anticholinergic effects and the discovery that certain lots of the drug contained greater than usual amounts of impurities which were analogues of clidinium. On September 1, 1966, the new drug application was reinstated after the firm submitted new data including new test procedures to detect the amount of impurities. However, since this reinstatement approval was not based upon a complete review of the entire application and did

V 40 I 218 NOV 11 75 XUM

not constitute a determination that all claimed indications are supported by substantial evidence of effectiveness, exclusion of Librax from NAS–NRC review was in appropriate. The clinical data included in the new drug application have now been reviewed by the Food and Drug Administration and it has been concluded that the data do not provide substantial evidence of effectiveness of the fixed combination. In addition to deficiencies with respect to the elements of adequate and well-controlled clinical investigations set forth in 21 CFR 314.111 (a) (5), the studies were not designed to show compliance with the requirements of 21 CFR 300.50 *Fixed-Combination prescription drugs for humans.* There is therefore no substantial evidence that the addition of chlordiazepoxide to clidinium bromide contributes to the effectiveness of the latter in the adjunctive therapy of peptic ulcer disease.

2. Spacolin Tablets containing alverine citrate 120 mg; Philips Roxane Laboratories, Inc., 330 Oak St., Columbus, OH 43216 (ANDA 80–634).

3. Dicyclomine Hydrochloride Capsules 10 mg; Bolar Pharmaceutical Co., Inc., 130 Lincoln St., Copiaque, NY 11726 (ANDA 83–179).

4. Dicyclomine Hydrochloride Capsules 10 mg; J. Davis Laboratories Inc., 433 Commercial Ave., Palisades Park, NJ 07650 (ANDA 83–860).

5. Dicyclomine Hydrochloride Tablets 20 mg; J. Davis Laboratories Inc. (ANDA 83–924).

6. Dicyclomine Hydrochloride Capsules 10 mg; The Lannett Co., Inc., 9000 State Rd., Philadelphia, PA 19136 (ANDA 84–285).

7. Dicyclomine Hydrochloride Capsules 10 mg; Danbury Pharmacal Inc., 131 West St., Danbury, CN 06810 (ANDA 84–347).

8. Dicyclomine Hydrochloride Tablets 20 mg; Bolar Pharmaceutical Co., Inc. (ANDA 84–361)..

9. Dicyclomine Hydrochloride Tablets 20 mg; Barr Laboratories Inc., Northvale, NJ 07647 (ANDA 84–600).

10. That part of NDA 5–695 pertaining to Profenil Injection, containing alverine hydrochloride 45 mg/cc; Smith, Miller & Patch. Profenil Tablets containing alverine *citrate,* same NDA, was reviewed by the Academy and is listed above under DESI 3265.

All identical, related, and similar drug products, not the subject of an approved new drug application, are covered by the applications reviewed and are subject to this notice. (21 CFR 310.6). Any person who wishes to determine whether a specific product is covered by this notice should write the Food and Drug Administration, Bureau of Drugs, Division of Drug Labeling Compliance (HFD–310), 5600 Fishers Lane, Rockville, MD 20852.

Numerous products containing one or more belladonna alkaloids plus a barbiturate are known to be marketed without an approved new drug application. They are also affected by this notice. Following are some examples of such products, although this is not intended to be an exhaustive list:

1. Barbidonna Tablets and Elixir; Mallinckrodt Chemical Works, Pharmaceutical Division, 2d & Mallinckrodt Sts., St. Louis, MO 63160.

2. Belbarb Tablets; Arnar-Stone Laboratories, Inc., 601 E. Kensington Rd., Mount Prospect, IL 60056.

3. Belladenal Tablets and Elixir; Sandoz Pharmaceuticals, Inc., Rte. 10, E. Hanover, NJ 07936.

4. Butibel Tablets and Elixir; McNeil Laboratories, Inc., Camp Hill Rd., Fort Washington, PA 19034.

5. Chardonna Tablets, William H. Rorer, Inc., 500 Virginia Dr., Fort Washington, PA 19034.

6. Donnatal Tablets, Capsules, and Elixir; A. H. Robins Co., Inc.

7. Donphen Tablets; Lemmon Pharmacal Co., Sellersville, PA 18960.

8. Hybephen Tablets and Elixir; Beecham-Massengill Pharmaceuticals, Division of Beecham, Inc., 501–551 Fifth St., Bristol, TN 37620.

9. Kinesed Tablets; Stuart Pharmaceuticals, Division of I.C.I. America, Inc., 3411 Silverside Rd., Wilmington, DL 19899.

10. Levsin Tablets, Elixir, and Injection; Kremers-Urban Co., 5600 W. County Line Rd., P.O. Box 2038, Milwaukee, WI 53201.

11. Phenobarbital and Belladonna Tablets; The Upjohn Co.

12. Sidonna Tablets; Reed & Carnrick, 30 Boright Ave., Kenilworth, NH 07033.

The DESI notices cited above classified the combination products which they covered as possibly effective for certain indications and lacking substantial evidence of effectiveness for all other indications, and the single-entity drug products as effective with less-than-effective indications.

I. The Combination Drug Products

The anticholinergic/antispasmodic-sedative/tranquilizer combinations reviewed by the NAS–NRC, Drug Efficacy Study Group Panels and by the Food and Drug Administration were in all cases rated as less than effective (none were higher than "possibly effective") as fixed combinations. The anticholinergic components of the combinations were considered effective as "adjunctive therapy in the treatment of peptic ulcer" and the sedative components effective for sedation. Since publication of the initial notices, the FDA has not received information that would alter the conclusion that the combinations have not been demonstrated to be effective. The Commissioner of Food and Drugs has now considered these products further in light of the following.

A. Evidence of effectiveness

The nature of the evidence needed to demonstrate effectiveness is determined by the condition(s) for which a drug is indicated. Two kinds of indications can be considered for anticholinergic-sedative combinations. First, they could be indicated for treatment of specific gastrointestinal diseases, e.g., for treatment of peptic ulcer disease or functional bowel syndrome. Alternatively, they could be indicated for treatment of two independent diseases; that is, for a gastrointestinal disease when there is also anxiety.

If the combinations are indicated for treatment of the gastrointestinal disease alone, then evidence of their effectiveness must be derived from studies which demonstrate, as required by 21 CFR 300.50 *Fixed-combination prescription drugs for humans,* that the anticholinergic drug and the sedative each contribute to the treatment of the gastrointestinal disease. This is accomplished by showing that the combination improves some gastrointestinal clinical parameter (rate of healing, pain, nausea, rate of recurrence) better than either single ingredient. It should be stressed that evaluation of the effectiveness of the drugs in treating anxiety in these patients is irrelevant to proof of effectiveness for the gastrointestinal indication, since it is the gastrointestinal disease that is being treated. (It might be of interest, however, to evaluate anxiety in order to determine whether there is a particular subclass of patients with gastrointestinal disease who respond best to combinations.)

Although alternative indications could be proposed, it is fairly clear that the anticholinergic-sedative combinations are intended by most physicians to treat gastrointestinal diseases, rather than two independent diseases, because it is thought that anxiety or tension, even if not at a level needing treatment if there were no gastrointestinal disease, contributes to the development of the gastrointestinal diseases or causes exacerbation of their symptoms and that sedation or relief of anxiety may therefore be helpful. This is a reasonable hypothesis and is supported by the known increase in acid secretion in humans with stress, by the well-described ability of stress to produce ulcer disease in animals, and by anecdotal evidence of symtomatic exacerbation of human gastrointestinal disease in periods of stress or anxiety. Although the hypothesis that sedation may be of benefit in treatment of gastrointestinal diseases is a plausible one, there are no adequate and well-controlled studies of any of the anticholinergic / antispasmodic - sedative/tranquilizer combinations which provide substantial evidence, as required by 21 CFR 300.50, that each component in fact contributes to the healing or other improvement of peptic ulcer disease or functional bowel disease. At a meeting of the FDA Gastrointestinal Drugs Advisory Committee on December 16, 1974, Dr. Stanley Lorber, a gastroenterologist who has strongly advocated continued availability of the combinations (see below), agreed with the committee that he knew of no adequate and well-controlled studies which demonstrated the contribution of each component of the combinations.

In addition to such evidence, the FDA combination policy requires that the components be present in a "dosage * * * (amount, frequency, duration) such that the combination is safe and effective for a significant population requiring such concurrent therapy as defined in the labeling for the drug." This requirement raises the question of whether the effectiveness of the combination would depend on the ability to titrate each component independently. This question, however, obviously cannot be addressed at all until the contribution of each component is demonstrated.

It could be contended that the drugs are indicated, not for treatment of a gastrointestinal disease alone, but for treatment of two independent conditions, a gastrointestinal disease and anxiety, when the two conditions coexist. The implication of such an indication is that the two independent conditions coexist in a significant population, perhaps because they are not truly independent but tend to be associated, and that this population is definable in drug labeling and *requires* both drugs concurrently at the precise dosage (amount, duration of therapy, frequency of therapy) that is available in the fixed combination. The treatment population would thus have to have both the gastrointestinal disease and an anxiety episode needing treatment (i.e., a physician seeing such a patient without any gastrointestinal disease at all but with the same degree of anxiety would prescribe a sedative/tranquilizer in the amount present in the combination). Moreover, there would need to be evidence that the gastrointestinal disease and the anxiety arose and disappeared more or less simultaneously, so that neither drug was given for a condition that was no longer present.

There has been no evidence submitted to the FDA demonstrating that the population needing such concurrent therapy for the two coexisting conditions exists. The requirements of 21 CFR 300.50 are thus not fulfilled for this indication.

B. Evidence of medical need

In the court order of October 11, 1972, by Judge William B. Bryant of the U.S. District Court for the District of Columbia, which set time requirements for implementation of the Drug Efficacy Study, provision was made in Paragraph XIV for a limited number of drugs to "remain on the market pending completion of scientific studies to determine effectiveness where there is a compelling justification of the medical need for the drug."

Anticholinergic-sedative combinations are widely prescribed for the treatment of gastrointestinal diseases and are perceived as important in such treatment by many specialists in gastroenterology. Dr. Stanley Lorber, Professor of Medicine and Chairman of the Deparement of Gastroenterology of Temple University asked 105 physicians, most of them directors of gastroenterology training programs, to sign a letter to the Director of the Bureau of Drugs, supporting continued availability of the combinations. Of the 58 who responded, 45 supported the letter, which described the combinations as "useful in the treatment of a variety of gastrointestinal diseases and disorders * * *, constructed in such a way as to insure optimum safety with effectiveness . . . , well accepted by gastroenterologists as well as by general practitioners." The letter also stated that "65 percent to 75 percent of prescriptions written for anticholinergics/antispasmodics are prescribed in association with sedative drugs" and that "The potential disadvantages to patients, practicing physicians, and clinical investigators which would result from the removal of these combinations from the formulary and the subsequent need to re-prove their efficacy, when such efficacy has been been recognized for decades, would be a therapeutic injustice as well as an investigative burden of immense proportions. The latter would divert funds and investigative resources away from useful channels." Copies of Dr. Lorber's letter and pertinent portions of the minutes of the meeting of the FDA Gastrointestinal Drugs Advisory Committee have been placed on file in the office of the Hearing Clerk, Food and Drug Administration, Rm. 4–65, 5600 Fishers Lane, Rockville, MD 20852 and may be seen in that office Monday through Friday between 9:00 a.m. and 4:00 p.m. except on Federal legal holidays.

Standard texts also indicate that there are recognized experts in gastroenterology who perceive sedation as an important element in treating gastrointestinal diseases, although this view is far from unanimous and many experts indicate that the usefulness of sedation is not established.

Thus, while "Harrison's Principles of Internal Medicine" (Ref. 1) cautions against the routine use of sedation (p. 1437) and notes that sedatives have not been shown to alter the course of duodenal ulcer materially, "Cecil-Loeb Textbook of Medicine" (Ref. 2) states that while sedatives and tranquilizers do not affect gastric secretion, they promote relaxation and sleep and "rest and relief of tension are important" in treatment of ulcer disease (p. 1274). Small doses of sedative/tranquilizers are mentioned, the same doses generally present in the anticholinergic-sedative combinations. This view is more strongly advocated in "Drugs of Choice 1974–1975" (Ref. 3) (p. 297), which states that "Emotional tension plays an important role in the pathogenesis of peptic ulcer * * *. The relief of anxiety, tension, and other emotional stresses, therefore, is an important therapeutic consideration. Mild sedatives such as phenobarbital, 15 to 30 mg 4 times daily, facilitate rest and relaxation. Chlorlazepoxide (Librium), in doses of 5 to 25 mg 3 or 4 times daily, is useful in decreasing anxiety." There is no specific reference to combinations, but the description plainly includes the dosages of sedatives most commonly included in the combinations.

References

1. Silen, W., "Peptic Ulcer," *Harrison's Principles of Internal Medicine,* 7th ed. Edited by Wintrobe, M. W. et al., McGraw-Hill, New York, 1974.

Similar assertion of the usefulness of sedation is made in reference to functional bowel disorders ("Drugs of Choice," p. 310), emotional tension being cited as "the most important and most common cause of functional gastrointestinal distress." Combinations of antispasmodics and sedatives are specifically recommended.

It must be emphasized that neither Dr. Lorber's letter nor the opinions offered in standard textbooks constitute in any way evidence that the anticholinergic-sedative combinations are effective. The Commissioner does not accept the view that demonstration of the effectiveness of the anticholinergic-sedative combinations would be a useless diversion of investigative resources, or the conclusion, supported by no reports of adequate and well-controlled studies, that the effectiveness of the combinations has been recognized for decades. The very fact that use of these products is extensive is strong argument for the importance of carrying out studies to determine whether that use is effective.

At the same time, the important role of sedation and anticholinergic-sedative combinations perceived by numerous experts in gastroenterology and the claimed importance of the drugs to patient convenience and selection of proper dosage represent a compelling justification of their medical need and a basis for permitting the combinations to remain available while adequate and well-controlled studies are carried out to determine their effectiveness.

In addition to the medical need for these products represented by their present importance to many gastroenterologists and general practitioners, there are two additional considerations in placing these products under the Paragraph XIV exemption.

First, it is recognized by the Gastrointestinal Drugs Advisory Committee and the Food and Drug Administration that studies of drugs, including combination drugs, for treatment of the common gastrointestinal diseases are difficult to design and conduct because definition of the disease and rating of the severity of illness is difficult end points of success are difficult to define and measure, and the diseases are placebo-responsive and spontaneously fluctuating in their severity. In part for these reasons, adequate studies of the combinations have not been carried out. The conclusion that there is no substantial evidence of effectiveness of the combinations thus represents predominantly a conclusion that there are no good data, rather than strong evidence that the combinations are not effective. For several years, manufacturers have been attempting to design, and agree with the Food and Drug Administration on, protocols for studies that would be well-controlled; but only recently has FDA, with the help of the new Gastrointestinal Drugs Advisory Committee, been able to provide guide-

V 40 N 218 NOV 11 75 XUM

lines for such studies. The lack of adequate studies of the anticholinergic-sedative combinations thus is, at least in part, a result of undeveloped investigational methodologies in this area.

Second, the question of the effectiveness of the fixed-dose anticholinergic-sedative combinations cannot be separated from the larger issue of whether sedatives, in variable combination or alone, are effective therapy for gastrointestinal diseases. Although no sedative is at present approved as effective for treating peptic ulcer disease or its symptoms or for treating functional bowel syndrome, sedative-tranquilizers are well-known to be used for these conditions, often with anticholinergics. These uses are not being extensively studied, and there appears to be little incentive to do so when the drugs are generally available and when many potential investigators, such as the signers of the letter to the Director, believe sedatives are already known to be effective. Studies of the fixed-dose combinations will thus provide information that is of great importance to the rational practice of gastroenterology: evidence of whether or not sedation, an important element in current treatment of peptic ulcer disease and functional bowel syndrome, is in fact an effective part of such treatment.

For the above reasons, the Commissioner of Food and Drugs has concluded that combinations of an anticholinergic/antispasmodic drug and a sedative/anti-anxiety drug, should be added to the list of drugs which may remain on the market beyond the applicable time limits for implementation (37 FR 26623). However, continued marketing will depend upon fulfillment of specific requirements, namely, the carrying out, according to protocols that are satisfactory to the Food and Drug Administration, of studies intended to resolve in a timely manner the question of whether or not such drugs are in fact effective (21 CFR 300.50 and 21 CFR 314.111(a)(5)).

Some of the anticholinergic-sedative combinations considered by the NAS/NRC contain only 8 mg of barbiturate. This is well below the therapeutic dose and does not appear to represent a likely unit of titration. These products have not been exempted and are the subject of a separate notice appearing elsewhere in this issue of the FEDERAL REGISTER.

Certain products reviewed by the NAS/NRC contain an anticholinergic in combination with a major tranquilizer. Since these major tranquilizers have not been shown to be effective as sedatives or as antianxiety agents in non-psychotic patients, the combinations containing them lack the rationale of the anticholinergic-sedative combinations and they have not been exempted. They are the subject of a separate notice appearing elsewhere in this issue of the FEDERAL REGISTER.

II. CERTAIN SINGLE-ENTITY ANTICHOLINERGIC DRUGS

In the announcement published in the Federal Register of June 18, 1971 (36 FR 11754; DESI 3265), the Commissioner of Food and Drugs announced his conclusions concerning the single-entity anticholinergic drugs. These were considered to be effective for use as adjunctive therapy in the treatment of peptic ulcer and probably effective in the irritable bowel syndrome. The pediatric preparations were probably effective for use in the treatment of infant colic. A number of drug products which lack anti-secretory properties entirely, are not anticholinergic drugs, and had not claimed effectiveness in ulcer disease except to relieve "spasm" were included erroneously in this list: products containing dicyclomine hydrochloride, piperidolate hydrochloride, alverine citrate, thiphenamil hydrochloride, isometheptene mucate, and isometheptene hydrochloride. In a separate notice appearing elsewhere in this issue of the FEDERAL REGISTER the Director, Bureau of Drugs, announces his conclusion that these drugs, in view of their lack of anti-secretory activity, lack substantial evidence of effectiveness as adjunctive therapy in the treatment of peptic ulcer and are less than effective (probably effective) for the irritable bowel syndrome. These drugs, however, may have advantages in the latter condition, in that they lack the anti-secretory effects of most anticholinergics and may produce fewer side effects as a result. In addition, the difficulties in designing protocols for study of functional bowel syndrome has delayed good study of these products, as well as the combinations. For these reasons, these single-entity antispasmodics have been placed on the exempt list.

III. CONTROLLED RELEASE DOSAGE FORMS

The exemption does not apply to controlled-release forms of such products. A notice concerning controlled-release products appears elsewhere in this issue of the FEDERAL REGISTER.

Accordingly, a new section is added to the list of drugs which may remain on the market (paragraph 3 of the notice of December 14, 1972) to read as follows:

XVIII. ANTICHOLINERGIC/ANTISPASMODIC-SEDATIVE/TRANQUILIZER COMBINATION DRUGS AND ANTISPASMODIC DRUGS ALONE

Class A. Anticholinergic drugs in combination with a sedative/tranquilizer

Any of the following anticholinergic drugs: aminopentamide sulfate, anisotropine methylbromide, atropine sulfate, clidinium bromide, glycopyrrolate, hexocyclium methyl sulfate, hyoscine hydrobromide, hyscyamine sulfate, mepenzolate bromide, methantheline bromide, methscopolamine bromide, methylatropine, nitrate, oxyphencyclimine hydrochloride, oxyphenonium bromide, penthienate bromide, pipenzolate bromide, poldine methylsulfate, propantheline bromide, tricyclamol chloride, or tridihexethyl chloride, in combination with an effective dose of one of the following sedatives or minor tranquilizers:

Sedatives: amobrabital, butabarbital, mephobarbital, phenobarbital, or other intermediate-duration barbiturates;

Minor tranquilizers: chlordiazepoxide, hydroxyzine, meprobamate.

Class B. *Antispasmodic drug alone or in combination with a sedative/tranquilizer.*

Any of the following antispasmodic drugs alone or in combination with an effective dose of a sedative or minor tranquilizer listed under Class A: adiphenine hydrochloride, alverine citrate, alverine hydrochloride, dicyclomine hydrochloride, isometheptene hydrochloride, isometheptene mucate, piperidolate hydrochloride, or thiphenamil hydrochloride.

A number of FEDERAL REGISTER notices were published classifying many of these drugs in combination as less than effective (possibly effective) for their labeled indications. At the present time there is no substantial evidence that any of these products are effective combinations meeting the requirements of 21 CFR 300.50, or that the single-entity antispasmodic drug products are effective for any indication. It is recognized, however, that well-controlled studies of drugs for peptic ulcer disease and functional bowel syndrome are difficult to design and conduct because definition of the diseases and rating of the severity of illness are difficult, end-points of success are difficult to define and measure, and the diseases are placebo-responsive and spontaneously fluctuating in their severity. Only in recent months has the Food and Drug Administration been able to develop guidelines for study of these conditions.

Antispasmodic - sedative / tranquilizer combinations and single-entity antispasmodic drugs are widely used in the treatment of peptic ulcer disease and functional bowel syndrome and are perceived as important and useful tools of therapy by many gastroenterologists and general practitioners, the loss of which would result in poorer and less convenient therapy for their patients. While this perception cannot in any way substitute for well-controlled studies, it does provide a compelling justification for permitting the continued marketing of these drugs while studies are underway to determine whether or not they are in fact effective. Furthermore, in addition to providing information about the fixed-dose combinations under consideration, such studies will provide important data about the use in general (i.e., alone and as variable combinations as well as fixed combinations) of anti-anxiety agents in the treatment of gastrointestinal diseases. Such use is common but is not an approved use for any sedative/tranquilizer because there is a lack of substantial evidence that this use is effective in relieving any gastrointestinal symptom or affecting the course of any gastrointestinal disease. Well-controlled studies of these drugs are thus of great importance to the rational practice of gastroenterology.

Because of the importance in day-to-day practice of these drugs, the need to develop information on this widely used class of drugs, and the difficulty of planning and conducting studies of the common gastrointestinal diseases, these products are being permitted to remain on the market pending completion of scientific studies to determine effectiveness. The specific conditions under which these drugs may be marketed are as follows:

1. *Labeling.* Class A drugs shall be labeled as possibly effective as adjunctive therapy in the treatment of peptic ulcer and as possibly effective in the treatment of the irritable bowel syndrome (irritable colon, spastic colon, mucous colitis) and acute enterocolitis.

Class B drugs, if combinations, shall be labeled as possibly effective in the treatment of the irritable bowel syndrome (irritable colon, spastic colon, mucous colitis) and acute enterocolitis or, if single entities, shall be labeled as probably effective for the same indications. Single-entity pediatric antispasmodic drugs shall be labeled as probably effective for use in the treatment of infant colic.

The exemption does not apply to controlled-release forms of such products.

2. *Studies.* a. On or before February 9, 1976, the manufacturer or distributior of any such product shall submit a protocol to the Division of Cardio-Renal Drug Products, Gastrointestinal Drug Products Group (HFD–110), Bureau of Drugs, Food and Drug Administration, 5600 Fishers Lane, Rockville, MD 20852 for at least two adequate and well-controlled studies by independent investigators or for a multi-clinic study in which the data of at least three investigators can be evaluated independently, to determine whether or not the product is effective for at least one of the indications.

These protocols shall be compatible with Bureau of Drugs guidelines for such studies, available from the Division of Cardio-Renal Drug Products.

The Bureau of Drugs will review submitted protocols within a 90-day period and will provide to the manufacturer or distributor notice of approval or comments.

b. Within 6 months after receipt of the Bureau's approval or comments on the protocol, studies shall be in progress and the manufacturer or distributor shall so notify the Division of Cardio-Renal Drug Products in writing.

c. At 6-month intervals after studies have begun, the manufacturer or distributor shall submit a progress report to include the number of patients and investigators in the studies, the number of studies completed, and the number continuing.

d. Within 18 months after receipt of the Bureau's approval or comments on the protocol, the manufacturer or distributor shall submit data to the Division of Cardio-Renal Drug Products.

3. It will be acceptable to the Food and Drug Administration for manufacturers of products containing the same ingredients at the same dosages or dosage ratios to conduct studies in cooperation with one another and to submit a joint protocol. For this purpse, all barbiturates may be considered as identical.

Failure of any manufacturer or distributor of such drug products, whether or not his drug is the subject of a new drug application, to comply with the requirements of this notice, or to show adequate progress, will result in regulatory action to remove the drug product from the market.

All submissions (e.g., protocol, progress report) pursuant to this notice shall be identified by including the following in a box in the upper portion of the cover letter:

PARAGRAPH XIV DRUG—CATEGORY XVIII (identify as appropriate, e.g. ANTICHOLINERGIC-SEDATIVE COMBINATION, ANTISPASMODIC)

This notice is issued pursuant to provisions of the Federal Food, Drug, and Cosmetic Act (secs. 505, 701, 52 Stat. 1052–1053, as amended, 1055–1056, as amended, (21 U.S.C. 355, 371)), the Administrative Procedure Act (5 U.S.C. 553, 554), and under authority delegated to the Commissioner (21 CFR 2.120).

Dated: November 5, 1975.

SAM D. FINE,
Associate Commissioner for Compliance.

[FR Doc.75-30273 Filed 11-10-75;8:45 am]

MICROBIOLOGICAL GUIDELINES AND CRITERIA FOR TESTING CONTACT LENSES MADE WITH NEW POLYMERS

Notice of Availability

The Commissioner of Food and Drugs has developed microbiological guidelines and criteria for testing contact lenses made with new polymers (other than polymethylmethacrylate (PMMA)). These guidelines were developed by the Food and Drug Administration with the assistance of consultants and the Food and Drug Administration's Ophthalmic Drugs Advisory Committee. The guideline's purpose is to (1) provide the microbiological criteria by which contact lenses made with new polymers (other than PMMA) can be approved for marketing, and (2) provide an outline of tests to be performed by manufacturers to ascertain if such criteria have been met. The criteria are intended to minimize the risk of introducing pathogenic organisms into the eye as a consequence of using contact lenses made with new polymers. These guidelines are not designed to be specific in all details. On request of the sponsor, protocols for studies will be reviewed by the Food and Drug Administration prior to initiation of the studies.

A copy of the draft guidelines has been placed on public display in the office of the Hearing Clerk, Food and Drug Administration, Rm. 4–65, 5600 Fishers Lane, Rockville, MD 20852, and will be available for public inspection Monday through Friday, from 9 a.m. to 4 p.m. Copies of the draft are also available upon request from the Hearing Clerk. Such requests shall be in writing.

Interested persons may, on or before December 11, 1975, submit to the Hearing Clerk written comments, preferably in quintuplicate, on these draft guidelines. Received comments may be seen in the Hearing Clerk's office during working hours, Monday through Friday.

Dated: November 5, 1975.

SAM D. FINE,
Associate Commissioner for Compliance.

[FR Doc.75-30278 Filed 11-10-75;8:45 am]

[Docket No. 75N–0185; DESI 3265]

CERTAIN SINGLE-ENTITY ANTISPASMODIC DRUGS

Drugs for Human Use; Drug Efficacy Study Implementation; Amendment and Notice of Opportunity for Hearing

In an announcement (DESI 3265; Docket No. FDC–D–303 (Now Docket No. 75N–0185; NDA 3–265 etc.)) published in the FEDERAL REGISTER of June 18, 1971 (36 FR 11754), the Food and Drug Administration announced its conclusion that the drugs described below are effective as adjuncts in the treatment of peptic ulcer and less than effective for other indications. The Director of the Bureau of Drugs has now concluded that these particular products are not effective adjuncts to peptic ulcer treatment and proposes to withdraw approval of that indication and also certain other indications which were not supported by substantial evidence of effectiveness. Persons wishing to request a hearing must do so on or before December 11, 1975. Other drugs were also included in the announcement of November 18, 1971, but are not affected by this notice.

1. Bentyl Capsules containing dicyclomine hydrochloride 10 mg; Merrell-National Laboratories, Division of Richardson-Merrell, Inc., 110 E. Amity Rd., Cincinnati, OH 45215 (NDA 7–409).

2. Bentyl Injection containing dicyclomine hydrochloride 10 mg/cc; Merrell-National Laboratories (NDA 8–370).

3. Bentyl Syrup containing dicyclomine hydrochloride 5mg/5cc; Merrell-National Laboratories (NDA 7–961).

4. Dactil Tablets containing piperidolate hydrochloride 50 mg; Lakeside Laboratories, Division of Colgate-Palmolive Co., 1707 E. North Ave., Milwaukee, WI 53201 (NDA 8–907).

5. Profenil Tablets containing alverine citrate 120 mg (and Profenil Injection containing alverine hydrochloride 45 mg/cc); Smith, Miller & Patch, Inc., 401 Joyce Kilmer Ave., New Brunswick, NJ 08902 (NDA 5–695). Profenil Injection was not reviewed by the National Academy of Sciences-National Research Council, Drug Efficacy Study Group and was not included in the June 18, 1971 notice, but is regarded as similarly affected.

6. Octin Tablets containing isometheptenemucate 2 grains and Octin Solution containing isomethepteneheptene hydrochloride 110 mg/cc; Knoll Pharmaceutical Co., 30 N. Jefferson Rd., Whippany, NJ 07051 (NDA 6–420).

7. Trocinate Tablets containing thiphenamil hydrochloride 100 mg; Wm. P. Poythress & Co., Inc., 16 N. 22d St., Richmond, VA 23217 (NDA 6–098).

The following abbreviated new drug applications, although approved pursuant to the June 18, 1971 notice, are affected by the conclusions below.

1. Spacolin Tablets containing alverine citrate 120 mg; Philips Roxane Laboratories, Inc., 330 Oak St., Columbus, OH 43216 (ANDA 80–634).

2. Dicyclomine Hydrochloride 10 mg Capsules; Bolar Pharmaceutical Co., Inc., 130 Lincoln St., Copiaque, NY 11726 (ANDA 83–179).

3. Dicyclomine Hydrochloride 10 mg Capsules; J. Davis Laboratories, Inc., 433

V 40 N 218 NOV 11 75 XUM

Commercial Ave., Palisades Park, NJ 07650 (ANDA 82–860).

4. Dicyclomine Hydrochloride 20 mg Tablets; J. Davis Laboratories Inc., (ANDA 83–924).

5. Dicyclomine Hydrochloride 10 mg Capsules; The Lannett Co., Inc., 9000 State Rd., Philadelphia, PA 19136 (ANDA 84–365).

6. Dicyclomine Hydrochloride 10 mg Capsules; Danbury Pharmacal Inc., 131 West St., Danbury, CN 06810 (ANDA 84–347).

7. Dicyclomine Hydrochloride 10 mg Tablets; Bolar Pharmaceutical Co., Inc., (ANDA 84–361).

8. Dicyclomine Hydrochloride 20 mg Tablets; Barr Laboratories Inc., Northvale, NJ 07647 (ANDA 84–600).

All identical, related, or similar products, not the subject of an approved new drug application, are covered by the new drug application(s) reviewed and are subject to this notice (21 CFR 310.6). Any person who wishes to determine whether a specific product is covered by this notice should write to the Food and Drug Administration, Bureau of Drugs, Division of Drug Labeling Compliance (HFD–310), 5600 Fisheries Lane, Rockville, MD 20852.

The announcement of June 18, 1971, stated that the above products, among other single-active-entity products, were regarded as effective for use as adjunctive therapy in the treatment of peptic ulcer, probably effective in the irritable bowel syndrome and adjunctive therapy in neurogenic bowel disturbances (including the splenic flexure syndrome and neurogenic colon), and possibly effective and lacking substantial evidence of effectiveness for other indications. Preparations labeled for pediatric use were regarded probably effective for infant colic.

The evaluations of dicyclomine, piperidolate, alverine, isometheptene, and thiphenamil products in the aforesaid notice as effective adjuncts in the treatment of peptic ulcer was inappropriate. That notice dealt with anticholinergics. These drug entities have not been shown to be effective as anti-secretory agents and in fact possess little or no anticholinergic activity. Further, the sponsors of the products had not previously claimed that they are effective in peptic ulcer disease, except to relieve "spasm". These drug entities are correctly classified as antispasmodics. They continue to be regarded as less than effective (probably effective) for the irritable bowel syndrome and the preparations labeled for pediatric use are regarded as less than effective (probably effective) for infant colic. In that no data were submitted in support of the other less than effective (probably and possibly effective) indications described in the June 18, 1971 notice, those indications are now regarded as lacking substantial evidence of effectiveness.

Accordingly, insofar as the drugs described above are concerned, the revised conclusions are as follows:

A. *Effectiveness classification.* The Food and Drug Administration has considered the Academy's report, as well as other available evidence, and concludes that:

1. The drugs are less than effective (probably effective) as described in paragraph B below.

2. The drugs lack substantial evidence of effectiveness for adjunctive therapy in the treatment of peptic ulcer and for all the other labeled indications for which they were stated in the notice of June 18, 1971, to be either probably effective or possibly effective.

B. *Labeling conditions.* Labeling revised pursuant to this notice should furnish adequate information for the safe use of the drug for the following less-than-effective (probably effective) indications: the treatment of the irritable bowel syndrome (irritable colon, spastic colon, mucous colitis) and acute enterocolitis and, for pediatric products, infant colic.

C. *Market status.* Because these drug products may have advantages in the irritable bowel syndrome in that they lack the antisecretory effects of most anticholinergics and may produce fewer side effects as a result, and in that difficulties in designing protocols for study of functional bowel syndrome have delayed good study of these products, these single-entity antispasmodics, as well as certain of their combinations, are being placed on the list of drugs which may remain on the market pending completion of scientific studies to determine effectiveness. The specific conditions under which these drugs may be marketed are described in a separate notice published elsewhere in this issue of the FEDERAL REGISTER.

C. *Notice of opportunity for hearing.* On the basis of all the data and information available to him, the Director of the Bureau of Drugs is unaware of any adequate and well-controlled clinical investigation, conducted by experts qualified by scientific training and experience, meeting the requirements of section 505 of the Federal Food, Drug, and Cosmetic Act (21 U.S.C. 355) and 21 CFR 314.111 (a) (5), demonstrating the effectiveness of the drugs for indications referred to in paragraph A.2 of this notice.

Therefore, notice is given to the holders of the new drug applications, and to all other interested persons, that the Director of the Bureau of Drugs proposes to issue an order under section 505 (e) of the Federal Food, Drug, and Cosmetic Act (21 U.S.C. 355(e)), withdrawing approval of the new drug applications and all amendments and supplements thereto on the ground that new information before him with respect to the drug products, evaluated together with the evidence available to him at the time of approval of the applications, shows there is a lack of substantial evidence, for the indications referred to in paragraph A.2 of this notice, that the drug products will have the effect they purport or are represented to have under the conditions of use prescribed, recommended, or suggested in the labeling. An order withdrawing approval will not issue with respect to any application supplemented, in accord with the notice, to (1) delete the claim(s) lacking substantial evidence of effectiveness; and (2) revise the labeling to be in accord with the labeling conditions set forth in paragraph B of this notice.

In addition to the ground for the proposed withdrawal of approval stated above, this notice of opportunity for hearing encompasses all issues relating to the legal status of the drug products subject to it (including identical, related, or similar drug products as defined in 21 CFR 310.6), e.g., any contention that any such product is not a new drug because it is generally recognized as safe and effective within the meaning of section 201(p) of the act or because it is exempt from part or all of the new drug provisions of the act pursuant to the exemption for products marketed prior to June 25, 1938, contained in section 201 (p) of the act, or pursuant to section 107(c) of the Drug Amendments of 1962; or for any other reason.

In accordance with the provisions of section 505 of the act (21 U.S.C. 355) and the regulations promulgated thereunder (21 CFR Parts 310, 314), the applicant and all other persons who manufacture or distribute a drug which is identical, related, or similar to a drug product named above (21 CFR 310.6), are hereby given an opportunity to show why approval of the new drug application(s) providing for the claim(s) involved should not be withdrawn and an opportunity to raise, for administrative determination, all issues relating to the legal status of a drug product named above and all identical, related, or similar drug products.

If the applicant or any person subject to this notice pursuant to 21 CFR 310.6 elects to avail himself of the opportunity for a hearing he shall file (1) on or before December 11, 1975, a written notice of appearance and request for hearing, and (2) on or before January 12, 1976, the data, information, and analyses on which he relies to justify a hearing, as specified in 21 CFR 314.200. Any other interested person may also submit comments on this proposal to withdraw approval. The procedures and requirements governing this notice of opportunity for hearing, a notice of appearance and request for hearing, a submission of data, information, and analyses to justify a hearing, other comments, and a grant or denial of hearing, are contained in 21 CFR 314.200.

The failure of the applicant or any other person subject to this notice pursuant to 21 CFR 310.6 to file timely written appearance and request for hearing as required by 21 CFR 314.200 constitutes an election by such person not to avail himself of the opportunity for a hearing concerning the action proposed with respect to such drug product and a waiver of any contentions concerning the legal status of such drug product. Any such drug product labeled for an indication(s) lacking substantial evidence of effectiveness referred to in paragraph A.2 of this notice may not thereafter lawfully be marketed, and the Food and Drug Administration will initiate appropriate regulatory action to remove such drug products from the market. Any new drug product marketed without an approved NDA is subject to regulatory action any time.

A request for a hearing may not rest upon mere allegations or denials, but must set forth specific facts showing that there is a genuine and substantial issue of fact that requires a hearing. If it conclusively appears from the face of the data, information, and factual analyses in the request for the hearing that there is no genuine and substantial issue of fact which precludes the withdrawal of approval of the application, or when a request for hearing is not made in the required format or with the required analyses, the Commissioner will enter summary judgment against the person(s) who requests the hearing, making findings and conclusions and denying a hearing.

All submissions pursuant to this notice of opportunity for hearing shall be filed in quintuplicate. Such submissions, except for data and information prohibited from public disclosure pursuant to 21 U.S.C. 331(j) or 18 U.S.C. 1905, may be seen in the office of the Hearing Clerk (address given below) Monday through Friday from 9 a.m. to 4 p.m., except on Federal legal holidays.

Communications forwarded in response to this notice should be identified with the reference number DESI 3265, directed to the attention of the appropriate office listed below, and addressed to the Food and Drug Administration, 5600 Fishers Lane, Rockville, MD 20852:

Supplements (identify with NDA number): Division of Cardio-Renal Drug Products (HFD–110), Rm. 16B–30, Bureau of Drugs.

Request for Hearing (identify with docket number): Hearing Clerk, Food and Drug Administration (HFC–20), Rm. 4–65, Parklawn Building.

All other communications regarding this notice: Drug Efficacy Study Implementation Project Manager (HFD–101), Bureau of Drugs.

This notice is issued pursuant to the provisions of the Federal Food, Drug, and Cosmetic Act (secs. 502, 505, 52 Stat. 1050–1053, as amended (21 U.S.C. 352, 355)) and under the authority delegated to the Director of the Bureau of Drugs (21 CFR 2.121).

Dated: October 29, 1975.

J. RICHARD CROUT,
Director, Bureau of Drugs.

[Docket No. 75N–0223; DESI Nos. 597, 3265, 4681]

CERTAIN ANTICHOLINERGIC DRUGS IN CONTROLLED-RELEASE DOSAGE FORM

Notice of Opportunity for Hearing on Proposal To Withdraw Approval of New Drug Applications

In notices published in the FEDERAL REGISTER of October 21, 1970 (35 FR 16422; DESI 4681), June 18, 1971 (36 FR 11754; DESI 3265), and July 27, 1972 (37 FR 15028; DESI 597), the Food and Drug Administration announced its conclusions that certain anticholinergic drugs in controlled-release dosage form, described below, were probably effective, possibly effective, or lacking substantial evidence of effectiveness for use in the treatment of various gastrointestinal disorders (for example, ulcers) for which they were labeled. Since no data demonstrating the claimed prolonged effect have been received, substantial evidence of effectiveness is lacking and withdrawal of approval of these products is now being proposed. Persons wishing to request a hearing on the proposal must do so on or before December 11, 1975. Other products included in the above-listed announcements, but not named herein, are not affected by this notice.

DESI 597

1. Bentyl Repeat Action Tablets with Phenobarbital containing dicyclomine hydrochloride and phenobarbital; Merrell-National Laboratories, Division of Richardson-Merrell, Inc., 110 E. Amity Rd., Cincinnati, OH 45215 (NDA 9–311).

2. Tral with Phenobarbital Gradumets, (controlled-release tablets) containing hexocyclium methylsulfate and phenobarbital; Abbott Laboratories, Abbott Park, 14th & Sheridan Rd., N. Chicago, IL 60064 (NDA 11–200).

3. Pathilon with Phenobarbital Sequels (controlled-release capsules) containing tridihexethyl chloride and phenobarbital; Lederle Laboratories, Division American Cyanamid Co., P.O. Box 500, Pearl River, NY 10965 (NDA 11–940).

DESI 3265

1. Tral Gradumets (controlled-release tablets) containing hexocyclium methylsulfate; Abbott Laboratories (NDA 11–200).

2. Pathilon Sustained Release Capsules containing tridihexethyl chloride; Lederle Laboratories (NDA 11–889).

DESI 4681

1. Prantal Repetabs (controlled-release tablets) containing diphemanil methylsulfate; Schering Corp., Galloping Hill Rd., Kenilworth, NJ 07033 (NDA 8–638).

2. Scopolamine Methyl Bromide Prolongsules (controlled-release capsules) containing methscopolamine bromide; Richlyn Laboratories Inc., 3725 Castor Ave., Philadelphia, PA 19124 (NDA 10–404).

Scopolamine Methyl Bromide Prolongsules (NDA 10–404) was a subject of an order published in the FEDERAL REGISTER of October 27, 1971 (36 FR 20619), withdrawing approval of the new drug application on the ground of failure to submit required reports under section 505(j) of the Federal Food, Drug, and Cosmetic Act (21 U.S.C. 355(j)). At that time no final conclusions concerning effectiveness of this drug had been reached. Conclusions have now been reached and the drug is included here to inform all interested persons of such conclusions and offer them the opportunity to request a hearing.

All of the above drug products have been reclassified as lacking substantial evidence of effectiveness. This reclassification is based upon the lack of any data demonstrating a prolonged duration of effect as compared with the products in standard dosage form.

With respect to the single-entity anticholinergic products (i.e., hexocyclium methylsulfate, tridihexethyl chloride, diphemanil methylsulfate, socpolamine methylbromide): since the standard dosage forms of single-entity anticholinergic products were classified as effective, bioavailability data demonstrating the prolonged effect claimed would permit reclassifying the products to effective.

With respect to the combination products: since, in a notice appearing elsewhere in this issue of the FEDERAL REGISTER, the standard dosage forms of the combination products are being included on the list of drugs which may remain on the market pending completion of scientific studies to determine effectiveness, bioavailability data demonstrating the prolonged effect claimed would permit these products to be added to that list. The required scientific studies could be conducted with either the standard or controlled-release forms of the combinations: the conclusions reached will be considered applicable to both forms.

Data from bioavailability studies may be submitted as part of a request for hearing, subject to the conditions described in 21 CFR 314.200(c)(4). If such data demonstrate the prolonged effect claimed, appropriate action, as discussed above, will be initiated.

On the basis of all of the data and information available to him the Director of the Bureau of Drugs is unaware of any adequate and well-controlled clinical investigation, conducted by experts qualified by scientific training and experience, meeting the requirements of section 505 of the Federal Food, Drug, and Cosmetic Act (21 U.S.C. 355) and 21 CFR 314.111(a)(5), and, for those products which are combinations, 21 CFR 300.50, demonstrating the effectiveness of any of the drug products listed above.

Therefore, notice is given to the Holder(s) of the new drug application(s) and to all other interested persons that the Director of the Bureau of Drugs proposes to issue an order under section 505 (e) of the Federal Food, Drug, and Cosmetic Act (21 U.S.C. 355(e)), withdrawing approval of the new drug application(s) (except for NDA 10–404) (or if indicated above, those parts of the application(s) providing for the drug product(s) listed above and all amendments and supplements thereto on the ground that new information before him with respect to the drug product(s), evaluated together with the evidence available to him at the time of approval of the application(s), shows there is a lack of substantial evidence that the drug product(s) will have the effect it purports or is represented to have under the the conditions of use prescribed, recommended, or suggested in the labeling.

V 40 N 218 NOV 11 75 XUM

In addition to the holder(s) of the new drug application(s) specifically named above this notice of opportunity for hearing applies to all persons who manufacture or distribute a drug product which is identical, related, or similar to any of the drug products named above, as defined in 21 CFR 310.6. It is the responsibility of every drug manufacturer or distributor to review this notice of opportunity for hearing to determine whether it covers any drug product he manufactures or distributes. Any person may request an opinion of the applicability of this notice to a specific drug product he manufactures or distributes that may be identical, related, or similar to a drug product named in this notice by writing to the Food and Drug Administration, Bureau of Drugs, Division of Drug Labeling Compliance (HFD–310), 5600 Fishers Lane, Rockville, MD 20852.

In addition to the ground(s) for the proposed withdrawal of approval stated above, this notice of opportunity for hearing encompasses all issues relating to the legal status of the drug products subject to it (including identical, related, or similar drug products as defined in 21 CFR 310.6) e.g., any contention that any such product is not a new drug because it is generally recognized as safe and effective within the meaning of section 201(p) of the act or because it is exempt from part or all of the new drug provisions of the act pursuant to the exemption for produdcts marketed prior to June 25, 1938, contained in section 201(p) of the act, or pursuant to section 107(c) of the Drug Amendments of 1962; or for any other reason.

In accordance with the provisions of section 505 of the act (21 U.S.C. 355) and the regulations promulgated thereunder (21 CFR Parts 310, 314), the applicant(s) and all other persons subject to this notice pursuant to 21 CFR 310.6 are hereby given an opportunity for a hearing to show why approval of the new drug application(s) (except for NDA 10–404) should not be withdrawn and an opportunity to raise, for administrative determination, all issues relating to the legal status of any of the drug products named above and of all identical, related, or similar drug products.

If an applicant or any other person subject to this notice pursuant to 21 CFR 310.6 elects to avail himself of the opportunity for a hearing, he shall file (1) on or before December 11, 1975, a written notice of appearance and request for hearing, and (2) on or before January 12, 1976, the data, information, and analyses on which he relies to justify a hearing, as specified in 21 CFR 314.200. Any other interested person may also submit comments on this notice. The procedures and requirements governing this notice of opportunity for hearing, a notice of appearance and request for hearing, a submission of data, information, and analyses to justify a hearing, other comments, and a grant or denial of hearing, are contained in 21 CFR 314.-200.

The failure of an applicant or any other person subject to this notice pursuant to 21 CFR 310.6 to file timely written appearance and request for hearing as required by 21 CFR 314.200 constitutes an election by such person not to avail himself of the opportunity for a hearing concerning the action proposed with respect to all such drug products (except Scopolamine Methyl Bromide Prolongsules (NDA 10–404)) and a waiver of any contentions concerning the legal status of any of the drug products named above. Any such drug product may not thereafter lawfully be marketed, and the Food and Drug Administration will initiate appropriate regulatory action to remove such drug products from the market. Any new drug product marketed without an approved NDA is subject to regulatory action at any time.

A request for a hearing may not rest upon mere allegations or denials, but must set forth specific facts showing that there is a genuine and substantial issue of fact that requires a hearing. Unless the request for hearing includes data which demonstrate the prolonged effect claimed for the product, if it conclusively appears from the face of the data, information, and factual analyses in the request for the hearing that there is no genuine and substantial issue of fact which precludes the withdrawal of approval of the applications (except for NDA 10–404), or which requires a hearing with respect to a determination of the legal status of any of the drug products named above and of all identical, related, or similar drug products or when a request for hearing is not made in the required format or with the required analyses, the Commissioner will enter summary judgment against the person(s) who requests the hearing, making findings and conclusions, denying a hearing. If the data submitted demonstrate that the product has the prolonged effect claimed, this notice will be rescinded with respect to such product and appropriate action will be initiated as discussed above in this notice.

All submissions pursuant to this notice shall be filed in quintuplicate with the Hearing Clerk, Food and Drug Administration, Rm. 4–65, 5600 Fishers Lane, Rockville, MD 20852.

All submissions pursuant to this notice, except for data and information prohibited from public disclosure pursuant to 21 U.S.C. 331(j) or 18 U.S.C. 1905, may be seen in the office of the Hearing Clerk Monday through Friday from 9 a.m. to 4 p.m., except on Federal legal holidays.

This notice is issued pursuant to provisions of the Federal Food, Drug, and Cosmetic Act (sec. 505, 52 Stat. 1052–1053, as amended (21 U.S.C. 355)), and under authority delegated to the Director of the Bureau of Drugs (21 CFR 2.121).

Dated: October 29, 1975.

J. RICHARD CROUT,
Director,
Bureau of Drugs.

[FR Doc.75-30275 Filed 11-10-75;8:45 am]

[Docket No. 75N–0187; DESI 10837]

ANTICHOLINERGIC DRUGS; PROCHLORPERAZINE MALEATE WITH ISOPROPAMIDE IODIDE, AND PROPANTHELINE BROMIDE WITH THIOPROPAZATE HYDROCHLORIDE

Notice of Opportunity for Hearing on Proposal To Withdraw Approval of New Drug Applications

In a notice (DESI 10837) published in the FEDERAL REGISTER of June 22, 1971 (36 FR 11875), the Food and Drug Administration announced its conclusions that the drug products described below are less than effective (possibly effective as adjunctive therapy in peptic ulcer and in the irritable bowel syndrome, functional diarrhea, drug-induced diarrhea, ulcerative colitis, urinary bladder spasm and urethral spasm), and lacking substantial evidence of effectiveness for their other labeled indications, and that additional evidence is required to establish their effectiveness. No data concerning effectiveness having been submitted, the products are now regarded as lacking substantial evidence of effectiveness. This notice announces that conclusion and proposes to withdraw approval of the products. Persons wishing to request a hearing must do so on or before December 11, 1975. Other products included in the notice of June 22, 1971, are not affected by this notice of opportunity for hearing.

NDA 11–162: Combid Spansule Capsules, containing prochlorperazine maleate and isopropamide iodide; Smith, Kline, and French Laboratories, Division of Smith Kline Corp., 1500 Spring Garden St., Philadelphia, PA 19101.

NDA 11–368; Pro-Banthine with Dartal Tablets, containing propantheline bromide and thiopropazate hydrochloride; Searle Laboratories, Division of G. D. Searle & Co., Box 5100, Chicago, IL 60680.

The possibly effective indications have been reclassified as lacking substantial evidence of effectiveness in that no data have been submitted to support the efficacy of these combination drugs. Further, the major tranquilizer components of these combinations, as single-entities, have not been shown to be effective as sedatives or as antianxiety agents in nonpsychotic patients.

On the basis of all of the data and information available to him, the Director of the Bureau of Drugs is unaware of any adequate and well-controlled clinical investigation, conducted by experts qualified by scientific training and experience, meeting the requirements of section 505 of the Federal Food, Drug, and Cosmetic Act (21 U.S.C. 355) and 21 CFR 314.111(a)(5) and 21 CFR 300.50, demonstrating the effectiveness of these combination drugs.

Therefore, notice is given to the holder(s) of the new drug application(s) and to all other interested persons that the Director of the Bureau of Drugs proposes to issue an order under section 505(e) of the Federal Food, Drug, and Cosmetic Act (21 U.S.C. 355(e)), withdrawing approval of the new drug application(s) (or if indicated above, those parts of the application(s) providing for the drug product(s) listed above) and all amendments and supplements thereto on the ground that new information before him with respect to the drug product(s), evaluated together with the evidence available to him at the time of approval of the application(s), shows there is a lack of substantial evidence that the drug product(s) will have the effect it purports or is represented to have under the conditions of use prescribed, recommended, or suggested in the labeling.

In addition to the holder(s) of the new drug application(s) specifically named above, this notice of opportunity for hearing applies to all persons who manufacture or distribute a drug product which is identical, related, or similar to a drug product named above, as defined in 21 CFR 310.6. It is the responsibility of every drug manufacturer or distributor to review this notice of opportunity for hearing to determine whether it covers any drug product he manufactures or distributes. Any person may request an opinion of the applicability of this notice to a specific drug product he manufactures or distributes that may be identical, related, or similar to a drug product named in this notice by writing to the Food and Drug Administration, Bureau of Drugs, Division of Drug Labeling Compliance (HFD–310), 5600 Fishers Lane, Rockville, MD 20852.

In addition to the ground(s) for the proposed withdrawal of approval stated above, this notice of opportunity for hearing encompasses all issues relating to the legal status of the drug products subject to it (including identical, related, or similar drug products as defined in 21 CFR 310.6) e.g., any contention that any such product is not a new drug because it is generally recognized as safe and effective within the meaning of section 201(p) of the act or because it is exempt from part or all of the new drug provisions of the act pursuant to the exemption for products marketed prior to June 25, 1938, contained in section 201(p) of the act, or pursuant to section 107(c) of the Drug Amendments of 1962; or for any other reason.

In accordance with the provisions of section 505 of the act (21 U.S.C. 355) and the regulations promulgated thereunder (21 CFR Parts 310, 314), the applicant(s) and all other persons subject to this notice pursuant to 21 CFR 310.6 are hereby given an opportunity for a hearing to show why approval of the new drug application(s) should not be withdrawn and an opportunity to raise, for administrative determination, all issues relating to the legal status of a drug product named above and of all identical, related, or similar drug products.

If an applicant or any other person subject to this notice pursuant to 21 CFR 310.6 elects to avail himself of the opportunity for a hearing, he shall file (1) on or before December 11, 1975, a written notice of appearance and request for hearing, and (2) on or before January 12, 1976, the data, information, and analyses on which he relies to justify a hearing, as specified in 21 CFR 314.200. Any other interested person may also submit comments on this notice. The procedures and requirements governing this notice of opportunity for hearing, a notice of appearance and request for hearing, a submission of data, information, and analyses to justify a hearing, other comments, and a grant or denial of hearing, are contained in 21 CFR 314.200.

The failure of an applicant or any other person subject to this notice pursuant to 21 CFR 310.6 to file timely written appearance and request for hearing as required by 21 CFR 314.200 constitutes an election by such person not to avail himself of the opportunity for a hearing concerning the action proposed with respect to such drug product and a waiver of any contentions concerning the legal status of any such drug product. Any such drug product may not thereafter lawfully be marketed, and the Food and Drug Administration will initiate appropriate regulatory action to remove such drug products from the market. Any new drug product marketed without an approved NDA is subject to regulatory action at any time.

A request for a hearing may not rest upon mere allegations or denials, but must set forth specific facts showing that there is a genuine and substantial issue of fact that requires a hearing. If it conclusively appears from the face of the data, information, and factual analyses in the request for the hearing that there is no genuine and substantial issue of fact which precludes the withdrawal of approval of the application, or when a request for hearing is not made in the required format or with the required analyses, the Commissioner will enter summary judgment against the person(s) who requests the hearing, making findings and conclusions and denying a hearing.

All submissions pursuant to this notice shall be filed in quintuplicate with the Hearing Clerk, Food and Drug Administration Rm. 4–65, 5600 Fishers Lane, Rockville, MD 20852.

All submissions pursuant to this notice, except for data and information prohibited from public disclosure pursuant to 21 U.S.C. 331(j) or 18 U.S.C. 1905, may be seen in the office of the Hearing Clerk Monday through Friday, from 9 a.m. to 4 p.m., except on Federal legal holidays.

This notice is issued pursuant to provisions of the Federal Food, Drug, and Cosmetic Act (sec. 505, 52 Stat. 1052–1053, as amended (21 U.S.C. 355)), and under authority delegated to the Director of the Bureau of Drugs (21 CFR 2.121).

Dated: October 29, 1975.

J. RICHARD CROUT,
Director, Bureau of Drugs.

[Docket No. 75N–0186; DESI 597]

CERTAIN COMBINATION DRUGS CONTAINING AN ANTICHOLINERGIC WITH A BARBITURATE

Notice of Opportunity for Hearing on Proposal To Withdraw Approval of New Drug Applications

In a notice (DESI 597) published in the FEDERAL REGISTER of July 27, 1972 (37 FR 15028), the Food and Drug Administration announced its conclusion that certain combination drug products described below were either only possibly effective or lacking substantial evidence of effectiveness for use in the treatment of the various gastrointestinal disorders (for example, ulcers) for which they are labeled. Because no data providing substantial evidence of effectiveness were received pursuant to that notice, the Director of the Bureau of Drugs proposes to withdraw approval of certain of such products. Persons wishing to request a hearing on the proposal must do so on or before December 11, 1975. Other products named in the notice of July 27, 1972, are not affected by this notice of opportunity for hearing.

1. That part of NDA 8–919 pertaining to Co-Elorine 25 Pulvules containing tricyclamol hydrochloride 25 mg and amobarbital 8 mg; Eli Lilly and Co., P.O. Box 618, Indianapolis, IN 46206.

2. Valpin-PB Tablets containing anisotropine methylbromide 10 mg and phenobarbital 8 mg; Endo Laboratories, Inc., 1000 Stewart Ave., Garden City, Long Island, NY 11533 (NDA 13–430).

3. Valpin-PB Elixir containing anisotropine methylbromide 10 mg per 5 cc and phenobarbital 8 mg per 5 cc; Endo Laboratories (NDA 13–431).

4. That part of NDA 8–942 pertaining to Pamine-PB Half-Strength Tablets containing methscopolamine bromide 1.25 mg, and phenobarbital 8 mg; The Upjohn Co., 7171 Portage Rd., Kalamazoo, MI 49002.

5. Pamine-PB Drops (Pediatric) containing methscopolamine bromide 0.5 mg per cc and phenobarbital 20 mg per cc; The Upjohn Co. (NDA 9–260).

6. Pamine-PB Elixir and Paminal Elixir containing methscopolamine bromide 1.25 mg per 5 cc and phenobarbital 8 mg per 5 cc; The Upjohn Co. (NDA 9–261).

Other anticholinergic-barbiturate combinations were included in the July 27, 1972 notice. All of them contain, in each dosage unit, an amount of the barbiturate which is regarded as adequate for its purpose. It has been concluded that those products should be permitted to remain on the market provided that additional clinical studies are undertaken to determine effectiveness of the products as fixed combinations. A notice appearing elsewhere in this issue of the FEDERAL REGISTER describes the conditions for their continued marketing. As presently formulated, each dosage unit of those particular products named in this notice, except as noted with respect to Pamine-BP Drops (Pediatric) (NDA 9–260), contains what is regarded as an inadequate amount of the barbiturate.

V 40 218 NOV 11 75 XUM

For that reason, it has been concluded that, unless they are reformulated to increase the amount of barbiturate to an adequate amount, they should not be included among the combinations which may continue to be marketed pending additional study. Pamine-PB Drops (Pediatric), although its barbiturate content is not regarded as inadequate, is included in this notice since the holder of the new drug application has informed the Administration that additional studies will not be undertaken.

On the basis of all of the data and information available to him, the Director of the Bureau of Drugs is unaware of any adequate and well-controlled clinical investigation, conducted by experts qualified by scientific training and experience, meeting the requirements of section 505 of the Federal Food, Drug, and Cosmetic Act (21 U.S.C. 355) and 21 CFR 314.111 (a) (5) and 21 CFR 300.50, demonstrating the effectiveness of the combination drugs.

Therefore, notice is given to the holder(s) of the new drug application(s) and to all other interested persons that the Director of the Bureau of Drugs proposes to issue an order under section 505(e) of the Federal Food, Drug, and Cosmetic Act (21 U.S.C. 355(e)), withdrawing approval of the new drug application(s) (or if indicated above, those parts of the application(s) providing for the drug product(s) listed above) and all amendments and supplements thereto on the ground that new information before him with respect to the drug product(s), evaluated together with the evidence available to him at the time of approval of the application(s), shows there is a lack of substantial evidence that the drug product(s) will have the effect it purports or is represented to have under the conditions of use prescribed, recommended, or suggested in the labeling.

In addition to the holder(s) of the new drug application(s) specifically named above, this notice of opportunity for hearing applies to all persons who manufacture or distribute a drug product which is identical, related, or similar to a drug product named above, as defined in 21 CFR 310.6. It is the responsibility of every drug manufacturer or distributor to review this notice of opportunity for hearing to determine whether it covers any drug product he manufactures or distributes. Any person may request an opinion of the applicability of this notice to a specific drug product he manufactures or distributes that may be identical, related, or similar to a drug product named in this notice by writing to the Food and Drug Administration, Bureau of Drugs, Division of Drug Labeling Compliance (HFD–310), 5600 Fishers Lane, Rockville, MD 20852.

In addition to the ground(s) for the proposed withdrawal of approval stated above, this notice of opportunity for hearing encompasses all issues relating to the legal status of the drug products subject to it (including identical, related, or similar drug products as defined in 21 CFR 310.6) e.g., any contention that any such product is not a new drug because it is generally recognized as safe and effective within the meaning of section 201(p) of the act or because it is exempt from part or all of the new drug provisions of the act pursuant to the exemption for products marketed prior to June 25, 1938, contained in section 201(p) of the act, or pursuant to section 107(c) of the Drug Amendments of 1962; or for any other reason.

In accordance with the provisions of section 505 of the act (21 U.S.C. 355) and the regulations promulgated thereunder (21 CFR Parts 310, 314), the applicant(s) and all other persons subject to this notice pursuant to 21 CFR 310.6 are hereby given an opportunity for a hearing to show why approval of the new drug application(s) should not be withdrawn and an opportunity to raise, for administrative determination, all issues relating to the legal status of a drug product named above and of all identical, related, or similar drug products.

If an applicant or any other person subject to this notice pursuant to 21 CFR 310.6 elects to avail himself of the opportunity for a hearing, he shall file (1) on or before December 11, 1975, a written notice of appearance and request for hearing, and (2) on or before January 12, 1976, the data, information, and analyses on which he relies to justify a hearing, as specified in 21 CFR 314.200. Any other interested person may also submit comments on this notice. The procedures and requirements governing this notice of opportunity for hearing, a notice of appearance and request for hearing, a submission of data, information, and analyses to justify a hearing, other comments, and a grant or denial of hearing, are contained in 21 CFR 314.200.

The failure of an applicant or any other person subject to this notice pursuant to 21 CFR 310.6 to file timely written appearance and request for hearing as required by 21 CFR 314.200 constitutes an election by such person not to avail himself of the opportunity for a hearing concerning the action proposed with respect to such drug product and a waiver of any contentions concerning the legal status of any such drug product. Any such drug product may not thereafter lawfully be marketed, and the Food and Drug Administration will initiate appropriate regulatory action to remove such drug products from the market. Any new drug product marketed without an approved NDA is subject to regulatory action at any time.

A request for a hearing may not rest upon mere allegations or denials, but must set forth specific facts showing that there is a genuine and substantial issue of fact that requires a hearing. If it conclusively appears from the face of the data, information, and factual analyses in the request for the hearing that there is no genuine and substantial issue of fact which precludes the withdrawal of aproval of the application, or when a request for hearing is not made in the required format or with the required analyses, the Commissioner will enter summary judgment against the person(s) who requests the hearing, making findings and conclusions and denying a hearing.

All submissions pursuant to this notice shall be filed in quintuplicate with the Hearing Clerk, Food and Drug Administration, Rm. 4–65, 5600 Fishers Lane, Rockville, MD 20852.

All submissions pursuant to this notice, except for data and information prohibited from public disclosure pursuant to 21 U.S.C. 331(j) or 18 U.S.C. 1905, may be seen in the office of the Hearing Clerk Monday through Friday from 9 a.m. to 4 p.m., except on Federal legal holidays.

This notice is issued pursuant to provisions of the Federal Food, Drug, and Cosmetic Act (sec. 505, 52 Stat. 1052–1053, as amended (21 U.S.C. 355)), and under authority delegated to the Director of the Bureau of Drugs (21 CFR 2.121).

Dated: October 29, 1975.

J. RICHARD CROUT,
Director, Bureau of Drugs.

COMMITTEE ON HIGH INTENSITY MERCURY VAPOR LAMPS

Meeting Regarding Standards Development Activities

To carry out a succesful radiation control program in those areas covered under its broad authorities, the Bureau of Radiological Health of the Food and Drug Administration follows a policy of cooperation with standards-setting and related organizations. The policy of the Food and Drug Administration recognizes that liaison representation permits cooperation between government representatives and members of an association in the exchange of information and opinions on matters of common interest. To further support the efforts of the American National Standards Institute (ANSI) in resolving a radiation safety problem associated with mercury vapor lamps, the Food and Drug Administration has agreed to provide facilities for a meeting of an ANSI working group from the Committee on High Intensity Mercury Vapor Lamps. Only members of the working group and selected experts have been invited to participate. The meeting, however, will be open to the public to the extent that available space permits.

The meeting will be held at 9 a.m. on November 25, 1975, in Rm. 400 of the Bureau of Radiological Health, 12720 Twinbrook Parkway, Rockville, Md. 20852. Minutes will be prepared following the meeting and will be filed with the office of the Hearing Clerk, Food and Drug Administration, Rm. 4–65, 5600 Fishers Lane, Rockville, Md. 20852.

Anyone wishing to submit recommendations, comments, or technical data that may be useful to the working group should submit such information in quintuplicate, preferably in advance of the meeting.

For additional information, contact Mr. Marshall Little, Division of Compliance, Bureau of Radiological Health (HFX–440), Rockville, MD 20852, telephone (301) 443–3429.

Dated: November 5, 1975.

SAM D. FINE,
Associate Commissioner for Compliance.

Office for Civil Rights

SEX DISCRIMINATION IN ATHLETIC PROGRAMS

Memorandum

In the matter of memorandum to chief State school officers, superintendents of local educational agencies, and college and university presidents on elimination of sex discrimination in athletic programs.

The following memorandum, intended for the guidance of educational institutions receiving Federal financial assistance from HEW as to their major first year responsibilities under the Department's Title IX regulation in the area of athletics and athletic scholarships, was issued to the Chief State School Officers, Superintendents of Local Educational Agencies, and College and University Presidents.

Public comment is welcomed on these guidelines.

Dated: November 5, 1975.

PETER E. HOLMES,
Director.

ELIMINATION OF SEX DISCRIMINATION IN ATHLETIC PROGRAMS

TO: Chief State School Officers, Superintendents of local Educational Agencies and College and University Presidents.

FROM: Director, Office for Civil Rights.

SEPTEMBER 1975.

Title I of the Education Amendments of 1972 and the Departmental Regulation (45 CFR Part 86) promulgated thereunder prohibit discrimination on the basis of sex in the operation of most federally-assisted education programs. The regulation became effective on July 21, 1975.

During the forty-five day period immediately following approval by the President and publication of the regulation on June 4, 1975, concerns were raised about the immediate obligations of educational institutions to comply with certain sections of the Departmental Regulation as they relate to athletic programs. These concerns, in part, focus on the application of the adjustment period provision (§ 86.41 (d)) to the various non-discrimination requirements, and additionally, on how educational institutions can carry out the self-evaluation requirement (§ 86.3(c)).

This memorandum provides guidance with respect to the major first year responsibilities of an educational institution to ensure equal opportunity in the operation of both its athletic activities and its athletic scholarship programs. Practical experience derived from actual on-site compliance reviews and the concomitant development of greater governmental expertise on the application of the Regulation to athletic activities may, of course, result in further or revised guidance being issued in the future. Thus, as affected institutions proceed to conform their programs with the Department's regulation, they and other interested persons are encouraged to review carefully the operation of these guidelines and to provide the Department with the benefit of their views.

BASIC REQUIREMENTS

There are two major substantive provisions of the regulation which define the basic responsibility of educational institutions to provide equal opportunity to members of both sexes interested in participating in the athletics programs institutions offer.

Section 86.41 prohibits discrimination on the basis of sex in the operation of any interscholastic, intercollegiate, club or intramural athletic program offered by an educational institution. Section 86.37(c) sets forth requirements for ensuring equal opportunity in the provision of athletic scholarships.

These sections apply to each segment of the athletic program of a federally assisted educational institution whether or not that segment is the subject of direct financial support through the Department. Thus, the fact that a particular segment of an athletic program is supported by funds received from various other sources (such as student fees, general revenues, gate receipts, alumni donations, booster clubs, and non-profit foundations) does not remove it from the reach of the statute and hence of the regulatory requirements. However, drill teams, cheerleaders and the like, which are covered more generally as extracurricular activities under § 86.31, and instructional offerings such as physical education and health classes, which are covered under § 86.34, are not a part of the institution's "athletic program" within the meaning of the regulation.

Section 86.41 does not address the administrative structure(s) which are used by educational institutions for athletic programs. Accordingly, institutions are not precluded from employing separate administrative structures for men's and women's sports (if separate teams exist) or a unitary structure. However, when educational institutions evaluate whether they are in compliance with the provisions of the regulation relating to non-discrimination in employment, they must carefully assess the effects on employees of both sexes of current and any proposed administrative structure and related coaching assignments. Changes in current administrative structure(s) or coaching assignments which have a disproportionately adverse effect on the employment opportunities of employees of one sex are prohibited by the regulation.

SELF-EVALUATION AND ADJUSTMENT PERIODS

Section 86.3(c) generally requires that by July 21, 1976, educational institutions (1) carefully evaluate current policies and practices (including those related to the operation of athletic programs) in terms of compliance with those provisions and (2) where such policies or practices are inconsistent with the regulation, conform current policies and practices to the requirements of the regulation.

An institution's evaluation of its athletic program must include every area of the program covered by the regulation. All sports are to be included in this overall assessment, whether they are contact or non-contact sports.

With respect to athletic programs, § 86.41(d) sets specific time limitations on the attainment of total conformity of institutional policies and practices with the requirements of the regulation—up to one year for elementary schools and up to three years for all other educational institutions.

Because of the integral relationship of the provision relating to athletic scholarships and the provision relating to the operation of athletic programs, the adjustment periods for both are the same.

The adjustment period is *not* a waiting period. Institutions must begin now to take whatever steps are necessary to ensure full compliance as quickly as possible. Schools may design an approach for achieving full compliance tailored to their own circumstances; however, self-evaluation, as required by § 86.3(c) is a very important step for every institution to assure compliance with the entire Title IX regulation, as well as with the athletics provisions.

REQUIRED FIRST YEAR ACTIONS

School districts, as well as colleges and universities, are obligated to perform a self-evaluation of their entire education program, including the athletics program, prior to July 21, 1976. School districts which offer interscholastic or intramural athletics at the elementary school level must immediately take significant steps to accommodate the interests and abilities of elementary school pupils of both sexes, including steps to eliminate obstacles to compliance such as inequities in the provision of equipment, scheduling and the assignment of coaches and other supervisory personnel. As indicated earlier, school districts must conform their total athletic program at the elementary level to the requirements of § 86.41 no later than July 21, 1976.

In order to comply with the various requirements of the regulation addressed to nondiscrimination in athletic programs, educational institutions operating athletic programs above the elementary level should:

(1) Compare the requirements of the regulation addressed to nondiscrimination in athletic programs and equal opportunity in the provision of athletic

V 40 N 218 NOV 11 75 XUM

scholarships with current policies and practices;

(2) Determine the interests of both sexes in the sports to be offered by the institution and, where the sport is a contact sport or where participants are selected on the basis of competition, also determine the relative abilites of members of each sex for each such sport offered, in order to decide whether to have single sex teams or teams composed of both sexes. (Abilities might be determined through try-outs or by relying upon the knowledge of athletic teaching staff, administrators and athletic conference and league representatives.)

(3) Develop a plan to accommodate effectively the interests and abilities of both sexes, which plan must be fully implemented as expeditiously as possible and in no event later than July 21, 1978. Although the plan need not be submitted to the Office for Civil Rights, institutions should consider publicizing such plans so as to gain the assistance of students, faculty, etc. in complying with them.

ASSESSMENT OF INTERESTS AND ABILITIES

In determining student interests and abilities as described in (2) above, educational institutions as part of the self-evaluation process should draw the broadest possible base of information. An effort should be made to obtain the participation of all segments of the educational community affected by the athletics program, and any reasonable method adopted by an institution to obtain such participation will be acceptable.

SEPARATE TEAMS

The second type of determination discussed in (2) above relates to the manner in which a given sports activity is to be offered. Contact sports and sports for which teams are chosen by competition may be offered either separately or on a unitary basis.

Contact sports are defined as football, basketball, boxing, wrestling, rugby, ice hockey and any other sport the purpose or major activity of which involves bodily contact. Such sports may be offered separately.

If by opening a team to both sexes in a contact sport an educational institution does not effectively accommodate the abilities of members of both sexes (see § 86.41(c)(i)), separate teams in that sport will be required if both men and women express interest in the sport and the interests of both sexes are not otherwise accommodated. For example, an institution woud not be effectively accommodating the interests and abilities of women if it abolished all its women's teams and opened up its men's teams to women, but only a few women were able to qualify for the men's team.

EQUAL OPPORTUNITY

In the development of the total athletic program referred to in (3) above, educational institutions, in order to accommodate effectively the interests and abilities of both sexes, must ensure that equal opportunity exists in both the conduct of athletic programs and the provision of athletic scholarships.

Section 86.41(c) requires equal opportunity in athletic programs for men and women. Specific factors which should be used by an educational institution during its self-evaluative planning to determine whether equal opportunity exists in its plan for its total athletic program are:

The nature and extent of the sports programs to be offered (including the levels of competition, such as varsity, club, etc.);
The provision of equipment and supplies;
The scheduling of games and practice time;
The provision of travel and per diem allowances;
The nature and extent of the opportunity to receive coaching and academic tutoring;
The assignment and compensation of coaches and tutors;
The provision of locker rooms, practice and competitive facilities;
The provision of medical and training facilities and services;
The provision of housing and dining facilities and services;
The nature and extent of publicity.

OVERALL OBJECTIVE

The point of the regulation is not to be so inflexible as to require identical treatment in each of the matters listed under § 86.41(c). During the process of self-evaluation, institutions should examine *all* of the athletic opportunities for men and women and make a determination as to whether each has an equal opportunity to compete in athletics in a meaningful way. The equal opportunity emphasis in the regulation addresses the totality of the athletic program of the institution rather than each sport offered.

Educational institutions are not required to duplicate their men's program for women. The thrust of the effort should be on the contribution of each of the categories to the overall goal of equal opportunity in athletics rather than on the details related to each of the categories.

While the *impact* of expenditures for sex identifiable sports programs should be carefully considered in determining whether equal opportunity in athletics exists for both sexes, equal aggregate expenditures for male and female teams are not required. Rather, the pattern of expenditures should not result in a disparate effect on opportunity. Recipients must not discriminate on the basis of sex in the provision of necessary equipment, supplies, facilities, and publicity for sports programs. The fact that differences in expenditures may occur because of varying costs attributable to differences in equipment requirements and levels of spectator interest does not obviate in any way the responsibility of educational institutions to provide equal opportunity.

ATHLETIC SCHOLARSHIPS

As part of the self-evaluation and planning process discussed above, educational institutions must also ensure that equal opportunity exists in the provision of athletic scholarships. Section 86.37(c) provides that "reasonable opportunities" for athletic scholarships should be "in proportion to the number of students of each sex participating in interscholastic or intercollegiate athletics."

Following the approach of permitting separate teams, § 86.37(c) of the regulation permits the overall allocation of athletic scholarships on the basis of sex. No such separate treatment is permitted for non-athletic scholarships.

The thrust of the athletic scholarship section is the concept of reasonableness, not strict proportionality in the allocation of scholarships. The degree of interest and participation of male and female students in athletics is the critical factor in determining whether the allocation of athletic scholarships conforms to the requirements of the regulation.

Neither quotas nor fixed percentages of any type are required under the regulation. Rather, the institution is required to take a reasonable approach in its award of athletic scholarships, considering the participation and relative interests and athletic proficiency of its students of both sexes.
